PART I.

Government of India Notifications, Appointments, Promotions, &c.

HOME DEPARTMENT.

NOTIFICATIONS

PUBLIC.

Calcutta, the 27th March, 1896.

No. 664.—Under the provisions of section 9 of the Statute 24 and 25 Victoria, Cap. 67, the Governor General in Council is pleased to direct that His Excellency's Council shall assemble at Simla in the jurisdiction of the Lieutenant-Governor of the Punjab.

ESTABLISHMENTS.

The 28th March, 1896.

No. 253.—Major J. Shakespear, D.S.O., Leinster Regiment, Superintendent, South Lushai Hills, is appointed to be an Assistant Commissioner of the 1st grade in Assam.

Simla, the 2nd April, 1896.

No. 263.—The Home Department Notification No. 515, dated the 20th August 1895, replacing the services of Colonel T. W. Hogg, a Deputy Commissioner in the Central Provinces, at the disposal of the Military Department, is hereby cancelled.

J. P. HEWETT,
Secretary to the Government of India.

GOVERNMENT OF MADRAS.

NOTIFICATION.

JUDICIAL DEPARTMENT.

The 12th March, 1896.

No. 132.—In exercise of the power conferred by section 5 of the Scheduled Districts Act, 1874, and with the previous sanction of the Governor General in Council, the Governor of Fort St. George in Council is pleased to extend the Madras Act, III of 1895 (an Act to repeal Madras Regulation VI of 1831 and for other purposes) to all the scheduled districts in the Gódávari district with the exception of the Dutsarti and Guditeru muttahs.

By order,

J. F. PRICE,
Chief Secretary to the Government of Madras.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Simla, the 2nd April, 1896.

No. 544-G.—*Erratum.*—In the notification of the Government of India in the Foreign Department, No. 1296-G., dated the 10th July, 1895, *for* "Mr. J. S. Edward" *read* "Mr. J. R. Edwards."

No. 546-G.—With the sanction of Her Majesty's Government, the Governor-General in Council is pleased to recognise the appointment of Mr. Richard Focke as Consul for Peru at Rangoon.

No. 549-G.—The Governor-General in Council is pleased to recognise the appointment of Monsieur F. Masotti, Belgian Consul at Bombay, as Acting Consul-General for Belgium at Bombay, during the absence of Monsieur Leon Dossogne, Consul-General.

No. 552-G.—The under-mentioned officer is granted leave to proceed out of India, on private affairs, under the leave rules for the Staff Corps; the specified period to count from the date of being struck off duty:

Lieutenant S. Clay, Indian Staff Corps, Wing Officer and officiating Adjutant, Mewar Bhil Corps, for one year. Pension service—6th year, commenced on the 3rd May, 1895.

No. 555-G.—Lieutenant F. G. Beville, Indian Staff Corps, Political Assistant of the 3rd (officiating 2nd) Class, is posted as Political Agent at Máskat, with effect from the date of assuming charge.

No. 556-G.—Captain A. F. DeLæssoe, C.M.G., C.I.E., Political Agent of the 3rd Class, is posted on return from furlough, as Political Agent in Bhopawar, with effect from the date of assuming charge.

No. 1125-I.—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), the Governor-General in Council is pleased to appoint Pandit Suraj Narain, Assistant Cantonment Magistrate, Secunderabad, to be a Magistrate of the 1st Class as described in the Code of Criminal Procedure, 1882, within the limits of the Hyderabad Residency Bazars.

No. 1127-I.—In exercise of the powers conferred by section 13 of the Births, Deaths and Marriages Registration Act, VI of 1886, the Governor-General in Council is pleased to appoint the Reverend Fawcett Shaw, a Minister of the Methodist Episcopal Church, to be a Registrar of Births and Deaths for the territories of Mysore, including the Civil and Military Station of Bangalore, in respect of the classes of persons indicated in section II, sub-section (I), clause (*b*) of the said Act, whom he baptises or whose funeral ceremonies he performs.

No. 1129-I.—Whereas the Governor-General in Council has full jurisdiction within the lands which are, or may hereafter be, occupied by the Ankleshwar-Pardi section of the Rajpipla State Railway (including the land occupied as stations and for out-buildings and other purposes connected with the railway), and which lie within the Rajpipla State;

In exercise of this jurisdiction and of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to direct that the following addition shall be made to the notification of the Government of India in the Foreign Department, No. 1328-I., dated the 23rd March, 1891, namely:

In the schedule, *before* the entries relating to the Rajputana-Malwa Railway, the following entries shall be inserted:

Ankleshwar-Pardi section of the Rajpipla State Railway.	Rajpipla.	...	The Government of Bombay.

H. S. BARNES,
Offg. Secretary to the Government of India.

MILITARY DEPARTMENT.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 30th March, 1896, and is hereby promulgated for general information:

ACT NO. XIII OF 1896.

An Act to amend the Code of Criminal Procedure, 1882.

1882. WHEREAS it is expedient to amend the Code of Criminal Procedure, 1882; It is hereby enacted as follows:

Amendment of section 269, Act X, 1882.

1. (*1*) In the first sentence of section 269 of the said Code, after the word "may," where it first occurs, the words "with the previous sanction of the Governor General in Council," and after the word "may," where it next occurs, the words "with the like sanction," shall respectively be inserted.

(*2*) After the first sentence of the same section the following shall be inserted, namely:

"The Local Government, by like order, may also declare that, in the case of any district in which the trial of any offence is to be by jury, the trial of such offence shall, if the Judge, on application made to him or of his own motion, so directs, be by jurors summoned from a special jury list, and may revoke or alter such order."

Amendment of section 276, Act X, 1882.

2. In section 276 of the said Code, before the word "*thirdly*" the word "and" shall be repealed, and to the same section the following shall be added, namely:

"and *fourthly*, in any district for which the Local Government has declared that the trial of certain offences may be by special jury, the jurors shall, in any case in which the Judge so directs, be chosen from the special jury list prescribed in section 325A."

Amendment of section 307, Act X, 1882.

3. (*1*) In section 307 of the said Code, for the words "so completely that he considers it" the words "and is clearly of opinion that it is" shall be substituted.

(*2*) In the same section, for the words "but it may" the words "and subject thereto it shall, after considering the entire evidence and after giving due weight to the opinions of the Sessions Judge and the jury," shall be substituted.

Amendment of section 319, Act X, 1882.

4. To section 319 of the said Code the following words shall be added, namely:

"or, if the Local Government, on consideration of local circumstances, has fixed any smaller area in this behalf, within the area so fixed."

Addition of new section after section 325, Act X, 1882.

5. After section 325 of the said Code the following section shall be added, namely:

Preparation of list of special jurors.

"325A. In the case of any district for which the Local Government has declared that the trial of certain offences shall, if the Judge so direct, be by special jury, the Sessions Judge and the Collector of such district or other officer as aforesaid shall prepare, in addition to the revised list hereinbefore prescribed, a special list containing the names of such jurors as are borne on the revised list and are, in the opinion of such Sessions Judge and Collector or other officer as aforesaid, by reason of their possessing superior

qualifications in respect of property, character or education, fit persons to serve as special jurors: Provided always that the inclusion of the name of any person in such special list shall not involve the removal of his name from the revised list nor relieve him of his liability to serve as an ordinary juror in cases not tried by special jury."

6. In section 326 of the said Code, after the words "the said revised list" the words "or the said special list" shall be inserted, and the words "on the revised list" shall be omitted.

Amendment of section 326, Act X, 1882.

7. After section 330 of the said Code the following section shall be added, namely:

Addition of new section after section 330, Act X, 1882.

"330A. The Court of Session may, if it shall think fit, at the conclusion of any trial by special jury direct that the jurors who have served on such jury shall not be summoned to serve again as jurors for a period of twelve months."

Court may relieve special jurors from liability to serve again as jurors for twelve months.

S. HARVEY JAMES,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a. m. on Saturday, March 21st, 1896.

As was the case last week, pressure has been very unsteady during the week under review, but the weather thereby has been very little affected and has been generally fine or only slightly showery over by far the greater part of the country. On the first day of the week, pressure was high all over North-Western and Central India, but a brisk fall was in progress over Baluchistan. This was succeeded by a slight depression which appeared over the Indus Valley on the 16th, and subsequently passed across Rajputana and the Southern Punjab and disappeared among the North-Western Himalayas. It occasioned unsettled weather over Baluchistan, Kashmir, and the Punjab, and heavish snow was received at Minimarg. By the morning of the 19th the depression had disappeared, and readings decreased fairly steadily from a high pressure area in the west of the Punjab to a low pressure area over Bengal. Northerly (north-westerly—north-easterly) winds prevailed over a large part of the country, but southerly winds were experienced at the head of the Bay, and easterly winds in Assam and North Bengal. These conditions lasted until the close of the week, and during their continuance showers occurred over parts of North-Eastern India. The mean temperature of India gradually rose during the week, and was highest and about 2° above the normal at its close.

Daily Summary.—*Sunday, March 15th.*—Pressure had increased briskly at a few central stations, and decreased briskly in Baluchistan, but elsewhere the changes were small. Readings were high over North-Western India, relatively low over North-Eastern India, and lowest over the Deccan, while a depression was apparently advancing through Baluchistan. The winds were generally

from north-west and west down the Gangetic plain, north-easterly over the Central Provinces, and from irregular cyclonic directions over the Peninsula. The mean temperature was in slight to large excess over the Peninsula and over Assam and Burma, and generally in defect elsewhere. The deficiency was large over Eastern Rajputana and the west of the North-Western Provinces. Showers were reported from parts of Lower Bengal, of Assam, and of the east of the Central Provinces.

Monday, March 16th.—The barometer had fallen briskly to rapidly over North-Western India, and risen slightly to rapidly over North-Eastern India. A shallow depression had appeared over the Indus Valley, while readings were highest over the Assam Valley. The winds were feebly cyclonic over North-Western India, and were very variable elsewhere. The mean temperature was excessive over the Peninsula, and in defect over Northern and Central India. The area of greatest abnormal deficiency had been transferred eastward, and was shown over the region represented by the stations of Nowgong, Saugor, and Sutna. A few light showers were reported from parts of North-Eastern India and of the Peninsula.

Tuesday, March 17th.—The barometer had fallen briskly over the Southern Punjab and Eastern Rajputana, but had generally changed slightly elsewhere. The depression from the Indus Valley had reached the Southern Punjab. Except over North-Western India, pressure was exceedingly uniform. The winds were feebly cyclonic in the north-west, and very variable elsewhere. The mean temperature was in excess of the normal over North-Western India and over the Carnatic, but was in defect in other parts of India. The greatest deficiency was over the lower Gangetic plain; the greatest excess over the south of the Punjab. Showers were reported from Kashmir, Baluchistan, and a few places in the east of the Peninsula.

Wednesday, March 18th.—Pressure had decreased slowly over the Gangetic plain, and generally increased elsewhere. The rise was greatest over the west of the Punjab. A broad band of relatively low pressure stretched across Northern India, and within this band were three small depressions. The winds were extremely variable. The mean temperature was below the normal average over North Bengal, and on part of the West Coast, but was excessive generally. Snow was reported from Kashmir, and dust or thunder storms had given scattered showers to different parts of the country.

Thursday, March 19th.—Pressure had fallen briskly over Bengal, and slightly over the Peninsula, while it had continued to increase over North-Western India. Readings were highest over the west of the Punjab, and lowest over Bengal, and, owing to the changes described above, the pressure difference had increased. The winds were generally northerly over North-Western India and down the West Coast, westerly down the Gangetic plain, south-westerly in Lower Bengal, and easterly in North Bengal. The force was fresh at some of the Bay stations. Snow had again fallen in Kashmir, light rain over the North-Western Himalayas, and a few scattered showers in other parts of the country.

Friday, March 20th.—Pressure had given way everywhere, the change having been brisk to rapid over the greater part of the country. The general distribution of pressure had not changed much, but the pressure difference between the Punjab and Bengal had become less. The wind directions had not altered much. The mean temperature was excessive over nearly the whole country—most so over West Bengal and the east of the Central and North-Western Provinces. Snow continued to be reported from Kashmir, and showers of rain from parts of North-Western and of North-Eastern India. In Assam the amounts were considerable.

Saturday, March 21st.—Pressure was giving way over Baluchistan and the Indus Valley, but in nearly all other places a recovery had commenced. The low pressure area over Bengal had largely filled up, and pressure was again very uniform over a large part of the country. A southerly wind had appeared over Baluchistan, but in other places there was not much change. The mean temperature was low over Assam and Upper Burma, but was generally excessive in other places—most so over the Central Provinces. Snow continued to fall at

the highest hill stations, while a few local showers of rain were received on the plains.

Temperature.—On the first two days of the week a large area of low temperature overlay the central and northern parts of India. On the 17th this area began to move eastward, and a well marked high temperature area appeared in the north-west. This high temperature area gradually extended, and on the 20th and 21st practically covered the whole country.

The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	March 1896.							Mean variation of week.
	15th	16th	17th	18th	19th	20th	21st	
	°	°	°	°	°	°	°	°
Burma	+1·2	—0·2	+1·0	+0·4	+0·1	+0·1	+0·6	+0·5
Bengal and Assam . .	—0·3	—1·9	—1·3	—0·1	+2·1	+2·9	+2·6	+0·6
North-Western Provinces and Oudh	—4·1	—3·3	—2·3	+2·2	+3·9	+3·4	+1·6	+0·2
Punjab	—3·1	—1·0	+3·3	+2·2	+1·4	+1·9	+1·5	+0·9
Bombay	—0·4	—0·7	—0·7	—1·0	—0·4	+0·8	+1·7	—0·1
Central Provinces and Berar	—1·1	—4·1	—0·2	+1·3	+2·1	+2·4	+3·8	+0·6
Central India and Gujarat .	—4·4	—3·9	—1·1	+0·8	+3·5	+3·6	+2·9	+0·2
Sind and Rajputana . .	—4·8	—2·4	+1·9	+3·8	+4·1	+1·9	+1·6	+0·9
Madras	+3·0	+3·3	+2·3	+1·3	+0·6	+1·9	+1·6	+2·0
Mean for whole of India .	—1·6	—1·6	+0·3	+1·2	+1·9	+2·1	+2·0	+0·6

On the 15th and 16th, when as stated above a large low temperature area overlay Northern and Central India, the mean temperature of the whole country was 1·6° below the normal. On the 17th a slight excess was shown, and temperature gradually increased up to the close of the week. The provincial variations showed that the mean temperature of the week was excessive in Madras, and about normal in all the remaining provinces.

The highest maximum reported on each day was as follows:

March	15th	103·7°	at	Akola and Cuddapah.
„	16th	105·2°	„	Cuddapah.

Rainfall.—The rainfall of the week under review has been more extensive than that of the two preceding weeks, but the amount received, except in the case of Assam and of the Baluchistan hills has been exceedingly small. Rain was received on each day of the week. On the 15th and 16th the showers were mainly received over North-Eastern India and the east of the Peninsula, on the 17th the precipitation occurred over the north-west hills and the east of the Peninsula, on the 18th there were scattered showers in different parts of the country, and on the 19th, 20th, and 21st there was heavy snow in Kashmir and scattered showers in various parts of India. The concluding table gives the rainfall data. Rain fell in no less than twenty-seven of the rainfall divisions, but in eighteen of these divisions the average actual rainfall per division was less than 0·10 inch. This leaves nine divisions in which the fall was effective. These nine divisions were—East Bengal, the three Assam divisions, Orissa, the Central Punjab, Madras (South-Central), the Baluchistan hills, and the East Coast (North). In all the remaining divisions the rainfall of the week was either actually or practically *nil*. The

second column of the table shows the rainfall ordinarily expected during the week under review, and the third column shows the difference between the actual and normal rainfall. These columns exhibit a very general deficiency of rain. Only in the case of Assam (Surma), of Sind, of Baluchistan, and of the East Coast (North) has there been any excess, though, except in the case of a few of the divisions in North-Eastern and North-Western India, the amount of the deficiency has been very small.

The three concluding columns of the table show the condition of the rainfall of the three weeks March 1st to 21st. Except in Assam, the Punjab, Baluchistan, Lower and South-West Bengal and the Ganjam Coast, the rainfall of the period has been very light, and in no case, except Baluchistan, has the normal been exceeded.

The following are the principal totals recorded during the week March 15th to 21st: Karimgunj (Sylhet) 2·97 inches, Silchar 4·18 inches, Cherrapunji 2·73 inches, Golaghat (Sibsagar) 1·44 inches, False Point (Cuttack) 1·07 inches, Ootacamund 1·28 inches, Russellkonda (Ganjam) 2·62 inches, Chandavarum (Vizagapatam) 3·29 inches, Alamur (Godavery) 1·50 inches, Palamanar (North Arcot) 1·25 inches.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *26th March 1896.*

F. G. SLY,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, March 28th, 1896.

At the end of last week a depression was approaching the north-west frontier, and at the beginning of the week under review this depression entered North-Western India, and at 8 A.M. on the 22nd apparently overlay Rajputana and the Southern Punjab. It was a feeble disturbance, but gave disturbed showery weather to North-Western India—both hills and plains. By the 23rd the feeble depression had disappeared, but the accompanying improvement in the weather was very slight, and showers continued to be received at many stations in the north-west. On Tuesday, the 24th, the distribution of pressure assumed a form which with slight modifications lasted until the close of the week. During this period readings were highest in the north-west and relatively high over Burma with an intervening region of low pressure. Within this region of low pressure an area of considerable depression was developed over North Bihar, and this locality remained steadily the seat of the lowest pressure till the end of the period. On the last two days of the week, further feebly unsettled weather appeared over North-Western India, and light showers were again received over Baluchistan, Kashmir, the North-Western Himalayas, and the Northern Punjab. The temperature conditions have agreed fairly closely with the rainfall conditions. At first the mean temperature was everywhere excessive, but with the occurrence of rain over the Punjab the mean temperature fell over North-Western India, and on Wednesday, the 25th, the mean of the whole country was below the normal. Subsequently as the influence of the showers disappeared the temperature rose, and on Saturday, the 28th, the mean was again excessive almost everywhere.

Daily Summary.—*Sunday, March 22nd.*—Pressure had increased in all parts of the country, except Eastern Rajputana, where a slight depression existed. Pressure was somewhat higher over Tenasserim, and somewhat lower over Bihar and over Eastern Rajputana than elsewhere, but in general readings were very uniform. The wind was between south-west and south-east over North-Eastern India, and very variable in other parts of the country. Calms were reported at several central stations, while, on the contrary, the force of the wind was strong at some of the hill stations, and fresh at the head of the Bay. The mean temperature was excessive almost everywhere, especially so over the central parts of the country.

Monday, March 23rd.—The depression noticed over Eastern Rajputana on the 22nd had disappeared, and pressure had continued to increase—most so over North-Western India. Pressure was high over North-Western India, and relatively high over Assam and Burma, while it was low over Bengal, the North-Western Provinces, and the east of the Peninsula. The pressure differences were, however, small. The winds were northerly in the north-west, between south-westerly and south-easterly in the north-east, and variable in other places. The force was fresh at some western stations and around the head of the Bay. Temperature had fallen fast over North-Western India and

in Madras, and in both these localities the mean was below the normal, but elsewhere the temperature has been generally steady, and the mean was still excessive. Moderate rain had been received over the North-Western Himalayas and the Punjab plains.

Tuesday, March 24th.—Pressure had decreased slightly over North-Eastern India, and increased elsewhere—most so over the central parts of India and of the Peninsula. The general distribution of pressure was little changed, and readings were still above the normal average everywhere. With the exception of a north-westerly wind over part of North-Western India, the wind directions were very irregular. The low temperature area over North-Western India had increased in extent and intensity, and a slight low temperature area had appeared over Madras. Elsewhere the mean temperature remained excessive—more especially so over West Bengal. Showers were reported from various places in North-Western, North-Eastern and Central India.

Wednesday, March 25th.—The barometer was now falling almost everywhere—most so along the foot of the hills and over Northern Bombay. Readings were high over North-Western India, relatively high over Tenasserim and the Bay, and low over North Bengal. Northerly winds prevailed over North-Western India, westerly winds down the Gangetic plain, and southerly winds at the head of the Bay, while over the Peninsula the directions remained variable. The mean temperature was generally lower than usual over North-Western India and over the Carnatic, and generally higher than usual in other parts of the country, but the general distribution with regard to the average was irregular. Showers of rain had been received at a few places in North-Western and North-Eastern India, and also at Colombo and Nagpur.

Thursday, March 26th.—Pressure had risen briskly over Burma and Assam, and over part of the West Coast, while it had changed slightly elsewhere. Readings remained high over Tenasserim and over the west of the Punjab, low over Bihar, and very uniform elsewhere. The winds were practically unchanged. The mean temperature was in slight to moderate defect over the north of the Punjab, over part of the Gangetic plain, and over Madras, and was in slight to moderate excess elsewhere. A few scattered rain showers were reported.

Friday, March 27th.—Pressure had generally changed slightly and irregularly, and the general distribution and conditions of pressure were practically unaltered. The northerly winds over North-Western India had largely disappeared, and easterly winds had appeared over North Bengal, but there was no other change. The mean temperature was excessive, except in the north of the Punjab and on the coasts of the Peninsula. Light showers had been received over Baluchistan and the North-Western Himalayas.

Saturday, March 28th.—Pressure had decreased everywhere—briskly over a large part of the country. Readings were very uniform generally, though still relatively low over Bihar and the North Gangetic plain. Easterly winds continued to prevail over North Bengal, and south-westerly winds in Lower Bengal, but elsewhere the directions were very variable. The general temperature distribution was the same as on the preceding day. There was large excess over Rajputana. Light showers had again fallen over Baluchistan, the Punjab hills, and the Northern Punjab.

Temperature.—The mean temperature has been generally excessive throughout the week. The showers, however, which occurred over the Punjab, etc., on the 22nd brought about a fall of temperature over North-Western India, and on the 23rd an area of relatively low temperature was shown over the Punjab and the western desert. This area extended and intensified during the 24th and 25th, and on the latter date covered the whole of North-Western and Central India. On the 26th it commenced to recede again, and by the close of the week had almost disappeared. Over Madras also a low temperature area appeared on the 22nd. It was very small at this time, but gradually grew, and on Tuesday, Wednesday, and Thursday covered the greater part of the Presidency.

The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day:

Province.	March 1896.							Mean variation of week.
	22nd	23rd	24th	25th	26th	27th	28th	
	°	°	°	°	°	°	°	°
Burma	+1·8	+2·6	+2·5	+3·0	+2·4	+2·1	+2·6	+2·4
Bengal and Assam . .	+3·7	+4·2	+4·3	+0·9	+2·1	+2·5	+3·0	+3·1
North-Western Provinces and Oudh	+2·7	+5·4	+1·6	—1·2	—1·0	+1·7	+2·4	+1·7
Punjab	+3·5	—5·0	—3·0	—2·7	—0·4	+0·1	+1·7	—0·8
Bombay	+2·2	+2·1	+1·8	+1·3	+1·2	+1·1	+2·3	+1·7
Central Provinces and Berar	+4·4	+7·0	+4·2	+0·1	+1·8	+3·4	+3·7	+3·5
Central India and Gujarat .	+3·1	+4·1	—2·4	—1·1	—0·3	+1·5	+3·1	+1·1
Sind and Rajputana . .	+5·1	+2·3	—2·0	—2·2	+0·8	+2·5	+3·8	+1·5
Madras	+1·0	—0·2	—0·2	+0·2	—0·6	+0·3	—1·0	—0·1
Mean for whole of India .	+3·1	+2·5	+0·8	—0·2	+0·7	+1·7	+2·4	+1·6

The mean temperature of the whole country, relatively to the normal, decreased from the 22nd to the 25th, and then increased again up to the close of the week. The mean temperature for the week was about normal in Madras and the Punjab, but was in slight to considerable excess in the other provinces.

The following were the maximum temperatures throughout India reported on each day:

March 22nd	107·9°	at Chanda.
„ 23rd	106·2°	„ Akola and Cuddapah.
„ 24th	106·9°	„ Chanda.
„ 25th	107·0°	„ Yamethin.
„ 26th	106·0°	„ „
„ 27th	106·9°	„ Chanda.
„ 28th	107·9°	„ „

Rainfall.—The rainfall of the week has been almost altogether confined to the north-western and north-eastern districts of India. In the former division the rainfall resulted directly or indirectly from the atmospheric disturbance which followed the advance into North-Western India of small barometric depressions, while the rainfall of the latter division was mainly attributable to thunderstorms which accompanied the setting in of strong southerly winds at the head

of the Bay, while Assam, North Bengal, &c., were occupied by a more or less steady easterly current. In addition to the above, the central parts of the country were in the middle of the week visited by duststorms which gave very slight showers to a few stations. The concluding table shows the rainfall data. The first column shows that rain was received in twenty-three of the rainfall divisions, but of these twenty-three only thirteen received effective rain, that is a fall for the week equalling or exceeding one-tenth of an inch. These thirteen divisions were—the three Assam divisions, the Bengal hills, Orissa, the North-Western Provinces hills, the central, submontane, hills, northern and western divisions of the Punjab, the Baluchistan hills, and the west of Rajputana. In all other parts of India, the rainfall of the week was either practically or actually *nil*. The heaviest average rainfall was 1·82 inches in Assam (Surma), followed by 0·77 inch in Baluchistan, by 0·67 inch in the Northern Punjab, and by 0·59 inch in the Brahmaputra division of Assam. The second column of the table shows the average normal rainfall for the week, and the third column gives the difference between the actual and normal average fall. In the case of the central, submontane, northern and western districts of the Punjab, of Sind, and of Baluchistan, there has been a slight to moderate excess of rain, but in all other divisions there has been a deficiency which in the case of parts of Bengal and of Assam has been considerable.

The three concluding columns of the table show the state of the seasonal rainfall. During the four weeks ending on the 28th of March, there has been little or no rain over Burma, and the greater part of Bengal, of the Gangetic plain, of the Central Provinces, and of the Peninsula, while the concluding column of the table shows that in all parts of the Indian region, except the Western Punjab, Sind, Baluchistan, and Western Rajputana, the rainfall of the four weeks has been in considerable to large defect of the normal. In Gujarat, however, no rain has been received, and none is anticipated.

The following are the principal totals recorded during the week under review: Karimgunj (Sylhet) 3·82 inches, Sibsagar 2·32 inches, Abbottabad 1·78 inches, Jhang 1·15 inches.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *2nd April 1896.*

DENZIL IBBETSON,

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 28th March.*—No rain, except scattered showers in parts of Vizagapatam and one station in Ganjam and at Cochin. The standing crops are generally fair. The harvest continues with moderate yield. Pasture is generally scarce, but fodder is available. Cattle are in good condition. Prices are generally stationary, but are slightly dearer in parts of the Deccan and Southern districts.

Bombay.—*For week ending 1st April.*—Slight rain in parts of Karachi, Upper Sind frontier, Belgaum and Dharwar. The standing crops have been damaged by hail in parts of Shikarpur and the Upper Sind frontier; otherwise the crops are good. Extracting of opium juice continues in parts of Baroda territory. Cotton-picking continues in parts of Gujarat, Kathiawar, and Dharwar, and harvesting of the late crops is in progress generally in fourteen districts. Preparations for next season are progressing in eleven districts. Fodder is insufficient in parts of Sind. Agricultural stock are in good condition, except in parts of Shikarpur and Broach. Prices are normal, except in parts of Shikarpur and Sholapur.

Bengal.—*For week ending 30th March.*—There was practically no rain during the week. Rain is generally much wanted both for the crops in the ground and for the ploughing of lands in North Bengal and Bihar. The sowing of early paddy has begun in Bihar, some millets are also being sown. The harvesting of the spring crops is nearly completed. The collection of opium is over, and weighments have begun. Want of drinking water is reported from parts of Burdwan, Midnapore, the 24-Parganas, Khulna, Pabna and Dacca. The price of common rice continues almost stationary.

North-Western Provinces and Oudh.—*For week ending 25th March.*—The weather is seasonable. Harvesting operations are approaching completion in several districts; in a few places threshing and winnowing have begun. The extra crops are being irrigated where practicable. Prospects are unchanged. Opium collections are in progress, and the yield is generally fair. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, the 21st March, were—Banda 33,726, Hamirpur 28,392, Allahabad 802, Jhansi 10,186, Jalaun 17,054, Garhwal 343, Hardoi 124—total 90,627; of these 16,292 were dependants gratuitously relieved on the works; 1,552 persons also received gratuitous relief under other provisions of the Famine Code. In Sitapur and Hardoi test works have been closed, they will be opened in Pilibhit on 25th March. Supplies are sufficient, but fodder is becoming scarce in places. Prices, though ruling high, are falling.

For week ending 1st April.—The weather continues seasonable. Harvesting operations have been completed in several districts, and are approaching completion in others. Threshing and winnowing are in progress. Cane and extra

crops are being sown and irrigated where practicable. The crops in Dudhi, South Mirzapur, are said to have failed, the outturn not being equal to the seed sown. Prospects are unchanged. The numbers employed on relief works and in receipt of gratuitous relief on the 28th March were :—Banda 47,867, Hamirpur 31,559, Jhansi 22,040, Jalaun 27,162, Allahabad 1,157, Pilibhit 1,263, Ghamal 1,184—total 1,32,232 ; of this number 20,648 dependants were gratuitously relieved on the works ; 2,841 persons also received gratuitous relief under other provisions of the Famine Code. Supplies are ample, but fodder is becoming scarce in places, and the want of water is felt in Banda and Hamirpur. Prices continue to fall.

Punjab.—*For week ending 1st April.*—Rain has fallen in all districts, except Hissar and Karnal. The harvesting of certain spring crops has commenced. Ploughings for and sowings of the extra spring crops and of sugarcane, cotton, and other autumn crops are in progress. More rain is wanted in Shahpur. The condition and prospects of the standing crops are generally reported to be average on irrigated lands and poor on unirrigated lands. The stock of food-grains is said to be insufficient in Sialkot, Rawalpindi, Gujranwala and parts of Shahpur. Hail fell in parts of Dera Ismail Khan, but no damage has been done to the crops. Cattle are still in poor condition in Hissar and Shahpur, and they are dying for want of fodder in parts of Karnal, Lahore and Gujranwala ; elsewhere they are in good condition. Fodder is scarce in all districts, except Jullundur and Sialkot. The stock of fodder is said to be insufficient in some districts. Prices are normal in Ferozepore and Dera Ismail Khan, but are high elsewhere.

Central Provinces.—*For week ending 1st April.*—The weather is hot and occasionally cloudy in parts. Threshing of the winter crops is in progress. The land is being prepared for the monsoon sowings in Nimar, Wardha and Sambalpur. Fodder and water are getting scarce in Wardha and Seoni.

Burma.—*For week ending 28th March.*—In Lower Burma the dry-weather paddy is being reaped in Tavoy. In Upper Burma cultivation of dry-weather paddy is completed in some places, and is progressing in others. Ploughing for the early wet-weather paddy continues in Kyaukse. The standing crops of dry-weather paddy are in good condition, and the island crops are promising, particularly in Minbu. The price of paddy has risen considerably in Rangoon, Prome and Bassein, and slightly in Henzada and Magwe, but has fallen slightly in Bhamo ; elsewhere prices are stationary.

Assam.—*For week ending 31st March.*—The weather is dry. Sowing of early rice is progressing. The condition of cattle is fair. Fodder and water are insufficient in places.

Mysore and Coorg.—*For week ending 1st April.*—MYSORE : No rain. The crops and prospects are good. Prices have slightly risen in all districts, except Bangalore and Kolar.

COORG.—No standing crops. Want of fodder and water for cattle is felt in some parts. Prices of food-grains are normal.

Berar and Hyderabad.—*For week ending 1st April.*—BERAR: The weather is warm and clear. No rain has fallen during the week. Breaking up of land for the next autumn crops continues. Fodder and water are generally scanty. Prices are fluctuating in Wun, but are steady elsewhere.

HYDERABAD.—No rain during the week. Harvesting of the spring crops continues. The crops on irrigated areas are being harvested in the central division, and they are in fairly good condition in the eastern division, but are drying up in the Gurmatkal and Korangal taluks in the southern division. Fodder is getting scarce. The water-supply also is running short. Prices are normal.

Central India.—*For week ending 1st April.*—Slight rain fell in one tehsil of Gwalior during the week. Agricultural operations are in progress throughout Central India. The probable outturn will be below average in three Agencies owing to the damage caused to the crops from want of rain, but will be fairly good in others. Cattle are in good condition, except in parts of Bhopal and Gwalior. Pasturage is good and sufficient in all Agencies. Prices are above normal in Baghelkhand, Malwa, Goona, and in five districts of Gwalior; elsewhere prices are normal. The opium crop is in fairly good condition in Gwalior, Bhopal and Malwa. The numbers employed on relief works in the Bundelkhand and Goona Agencies were 3,212 and 747 respectively.

Rajputana.—*For week ending 1st April.*—Agricultural operations are generally satisfactory, except in Merwara and Jaisalmere, where the crops and prospects are poor. The unirrigated crops are suffering in Ajmere-Merwara, and the crops have been damaged in Dholpore for want of rain, which is generally needed. Agricultural stock are generally in good condition, but are suffering in Ulwar and parts of Jaisalmere for want of fodder. Pasturage and fodder are scarce in Shahpura, Ajmere-Merwara, Ulwar, Tonk, Jaisalmere, and parts of Meywar; fodder is failing in Dholpore and Bhurtpore, but is sufficient elsewhere. Prices are rising in four States, fluctuating in three others, and falling in one, but are steady elsewhere. In Marwar 4,310 persons are on relief works, and 168 on gratuitous relief, in Shahpura 200 on relief works, in Merwara 2,112 on relief works, in Bikanir 1,614 on relief works, and 341 on gratuitous relief, in Jaisalmere 365 on relief works, and 37 on gratuitous relief.

Kashmir.—*For week ending 31st March.*—KASHMIR VALLEY: Rain has fallen. Water is ample for irrigation. Prices continue normal.

JAMMU PROVINCE.—*For week ending 25th March.*—Good rain. The harvest is fair. Fodder is scanty.

For week ending 1st April.—Report not received.

Nepal.—*For week ending 28th March.*—The weather is warm, dry and windy. Sowing of rice and maize is delayed for want of rain. The prospects of the wheat crop are poor.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

NOTICES.

Applications and all communications relating to the Inventions and Designs Act, 1888, should be placed under cover addressed "Secretary to the Government of India, Revenue and Agricultural Department (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Inventions and Designs Act, 1888, is open for the transaction of business on all days (except Sundays and Gazetted Holidays) from 11 AM. to 4 P.M.

Applications for the registration of Trade Marks as "Designs" under Part II of the "Inventions and Designs Act (V of 1888)" are frequently received in the Office of the Secretary appointed under the said Act. It is hereby notified for general information that the Government of India are advised that Trade Marks are not "Designs" within the meaning of the said Act, and, therefore, are not capable of such registration.

The fees payable under the Inventions and Designs Act, V of 1888, are now collected in cash. Cheques do not constitute payment in cash until they have been actually cashed, and applicants must submit to the risk of delay being incurred in cashing them.

Copies of the weekly Notifications of applications and specifications filed in the office of the Secretary under the Inventions and Designs Act, 1888, are now on sale to the public at one anna a copy.

Copies of the quarterly lists of applications and specifications filed in the office of the Secretary under the Inventions and Designs Act, 1888, are now on sale to the public at 8 annas a copy.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

The 23rd March, 1896.

No. 6.—Mr. W. Beechey, Executive Engineer, 3rd grade, temporary rank, is granted, under Article 371 of the Civil Service Regulations, furlough for twelve months, with effect from 15th April, 1896, or such subsequent date as he may be permitted to avail himself of it.

G. BOUGHEY, *Colonel*,
Manager, N. W. Railway.

TREASURE TROVE.

NOTICE.

It is hereby notified, under section 5 of Act VI of 1878, that on 31st December, 1895, the undermentioned copper idols and a copper tiruvasi, weighing 348½ seers in all, and estimated to be worth ₹120, were found buried in Paimash No. 2691 of Kamal village, Mayavaram Taluk, which was measured as Sengamottu Mattu manthai (cattle stand), but which is now measured in Survey No. 722, as thrashing floor and path:—

Description.	Weight in seers.	Value. R	a.	p.
1. Perumal (god), small	37½	12	0	0
2. Goddess do.	11	5	0	0
3. Do. do.	8½	4	0	0
4. Perumal (god) large	140½	48	0	0
5. Goddess, do.	69½	24	0	0
6. Do. do.	67½	23	0	0
7. Tiruvasi	14	4	0	0
TOTAL	348½	120	0	0

All persons claiming the said treasure, or part thereof, are hereby required to appear personally, or by Agent, before the Collector of Tanjore, at his Office, on the 11th September, 1896, in view to the matter being enquired into and determined according to law.

G. STOKES,
Collector.

TANJORE COLLECTOR'S OFFICE,
Camp Shiyali, 17th March, 1896.

NOTICE.

It is hereby notified, under section V of the Indian Treasure Trove Act (VI of 1878), that on the 19th day of October, 1895, treasure, consisting of the undermentioned articles, valued at R277-8-0, was found hidden in the ruined

Perumal povil, in the village of Vinnamangolani, in the Vellore Taluq, North Arcot District :—

Description of property.	Value. R	a.	p.
A pumbaloga (5 metals) Anjaneyar idol, weighing 40½ seers . .	20	4	0
A Krishnaswami idol, weighing 28½ seers	14	4	0
A Pirumal idol, weighing 87 seers .	43	8	1
A Amman idol, weighing 100½ seers	50	4	0
A female image of Siva temple, weighing 108 seers	54	0	0
Ditto ditto, 102 seers	51	0	0
Subramaniaswami idol, weighing 61½ seers	30	12	0
Nafesar idol, weighing 27 seers .	13	8	0
	277	8	0

All persons claiming the said treasure, or any part thereof, are hereby required at Chittoor, to appear personally, or by agent, before the Collector of North Arcot, at his office, on the 15th day of August, 1896, in order to the matter being enquired into and determined in accordance with the provisions of the Act.

For *Collector*.

NORTH ARCOT COLLECTOR'S OFFICE.
Chittoor, 25th March, 1896.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin, R18, or, post free, R18-12.
½ „ R 9, „ R9-8.
¼ „ R4-8, „ R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮৲ বা ডাকমাশুল বিনা ১৮৷৹
½ আধ „ „ ৯৲ „ ৯৷৹
¼ সিকি „ „ ৪৷৹৲ „ ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনিডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের বোটানিক বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

SEA AND FOREIGN MAILS.

Mails for	Date of closing at Calcutta	Route by which despatched.
	1896	
Aden, Egypt, Europe, America, Zanzibar, Mozambique, Delagoa Bay, Mauritius, Seychelles, Madagascar, Réunion, etc., Natal, and Cape Colony, and in general all countries served through the United Kingdom.	8th April	Per P. & O. Str from Bombay.
Straits Settlements, China, and Japan.	11th ,,	*Vid* Tuticorin and Colombo.
*Australasian Colonies	11th ,,	Ditto.*
Ditto ditto	4th ,,	Ditto.*
Madras and Colombo	13th ,,	Per P. & O. Str. *Bengal.*
Straits Settlements, China, and Japan.	9th ,,	Per Steamer *Lightning.*
Rangoon and Moulmein	10th ,,	Per Steamer *Pyrene.*
Rangoon, Moulmein, Penang, and Singapore.	7th ,,	Per Steamer *Ethopia.*
Akyab, Kyaukpyu, Sandoway and Rangoon	8th ,,	Per Steamer *Kistna.*
Port Blair	7th ,,	*Via* Rangoon.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the Steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any Steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a Steamer not belonging to one of the regular lines.

N.B.—The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late-fee at 7 P.M. precisely; after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up to 7-30 P.M.

On the day of despatch of the Mail for the Australasian Colonies and the Far East *vid* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 8 P.M., and late letters and papers fully prepaid will be received up to 8-30 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 7 P.M., and late letters and papers will be received up to 7-30 P.M. for despatch by any Foreign Mails despatched the same night. The late-fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,
Presidency Postmaster, Calcutta.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1893.

A Registry Office for men of all grades out of employ is kept up by the Principal, Thomason College, Roorkee. Officers requiring men are requested to apply to Principa.

J. CLIBBORN, *Major, S.E.*,
Principal, Thomason College.

THE YEARLY EXAMINATION OF CANDIDATES FOR 4TH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for 4th grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 1st and 2nd June, 1896, at 10-30 A.M. :—

SUBJECTS.	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity)	100	50
Dictation (spelling, punctuation, etc.)	100	50
Arithmetic (the whole)	240	100
Mensuration (*a*) the whole	60	30
Book-keeping, (*b*) mercantile	100	50
TOTAL	600	400

Mimimum required in all papers collectively.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) " Book-keeping " by Ball and Hamilton.
" Book-keeping " by double and single entry by W. Inglis (Chambers' Educational Course).

The marks gained by candidates who fail will not be published.

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed, but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it; but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior or by the instructor under whom he has been educated or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, on a consideration of these certificates, to decided whether the candidate should be registered for the examination or whether his application should be rejected. He will only forward the names of accepted candidates to the Principal, together with their applications in their own handwriting, statement of their ages, and fees. These should be transmitted altogether under one covering letter on the last day allowed by the rule.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish f esh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

N.B.—The attention of candidates is drawn to the alteration in rule 2 (3). In future no candidate is to apply direct to the Principal for permission to attend the examination, but must send his application through an Examiner of Public Works Accounts, who will decide whether the candidate is to be admitted.

The Principal will attend to no application received direct.

J. S. SLATER,
Principal, Civil Engineering College.

SIBPUR;
The 31st March, 1896.

N.B.—All Cheques, Money Orders, etc., must be made payable to the "Treasurer, Asiatic Society," only.

Catalogue of Books printed at Thomason College Press and procurable from Thomason College Book Depot.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments (electrum) are available at the College Book Depôt, at R64 per box. Drawing Instruments, drawing materials, etc., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

* The other Fasciculi of these works are out of stock, and complete copies cannot be supplied.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

First two Volumes are published in separate Sections, as below, but can be bound up in Volumes if required :—

VOLUME I.*

Section	I.	Building Materials	(1895),	R2-8
,,	II.	Masonry	(1891),	R1-8
,,	III.	Carpentry	(1889),	R1-8
,,	IV.	Earthwork	(1892),	R1-8
,,	V.	Tools and Plant (never published).		

VOLUME II.*

Section	VI.	Buildings	(1891),	R1-8
,,	VII.	Bridges	(in the Press),	say
,,	VIII.	Roads	(1888),	R2-0
,,	IX.	Railways	(1891),	R1-8
,,	X.	Irrigation Works	(1873),	R2-0

Roorkee Treatise on Civil Engineering, Vol. II (1867 edition). R5.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods (in the Press).

,, **II.** The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (6th edition), with Curve Table. R3-8

XIII Drawing (by Lieut. R. Pulford, R.E.†) R2.

XIIIa. Drawing, First Principles of Geometrical (by do.) (4th edition). R1-4.

XIV. Simple Applied Mechanics (2nd edition), Parts I and II in one. R3.

Simple Applied Mechanics, Part II (1st edition). 8a.

XV. Examples of Estimating. Comprising a progressive series of Estimates (with plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (4th edition) (5th edition in Press).

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 8a.

XVII. Specimens of Printing used in the College, Drawing Course and Entrance Examinations. 8a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Sections IX and X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve (in the Press.)

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 10 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1-8.

Scantlings of Timber for Beams. 8a.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 8a.; mounted on cloth, to fold up. R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces (in the Press), say

Tyndall's Hand-Book of Specifications. R6.

GEORGE WAIT,
Reporter on Economic Products to the Govt. of India.
CALCUTTA,
The 28th November, 1894.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage*. . . R22-8

	Without postage. R	a.	p.	With postage. R	a.	p.
For the Calcutta Series	10	0	0	12	8	0
„ each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...			2	0	0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

Ditto. Urdu version. Royal 8vo., stiff boards. 6*a*.

A Dictionary of the Economic Products of India.

BY DR GEO. WATT, C.I.E.,

Reporter on Economic Products.

The first five volumes and Volume VI, Parts I, II, III, & IV of the Dictionary are now ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross-references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal 8vo pages; Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L; and Volume V contains the latter half of L to end of O; Vol. VI (which consists of four parts), Part I, contains letters P to R. The whole work completed in nine volumes (including Parts II to IV of Vol. VI), but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and, as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Technical Art Series published up to 1894, together with their explanatory Text—

1886-87, 6 Plates with Text. R1-8 a set (4*a*.)
1888-89, 18 Plates with Text. R4-8 a set (8*a*.)

PART VI.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House on Thursday, the 26th March, 1896.

PRESENT:

His Excellency the Viceroy and Governor General of India, P.C., G.M.S.I., G.M.I.E., LL.D., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K C.S.I.
The Hon'ble Sir A. E. Miller, KT., C.S.I., Q.C.
The Hon'ble Lieutenant-General Sir H. Brackenbury, K.C.B., K.C.S.I., R.A.
The Hon'ble Sir J. Westland, K.C.S.I.
The Hon'ble J. Woodburn, C.S.I.
The Hon'ble Alan Cadell, C.S.I.
The Hon'ble M. R. Ry. P. Ananda Charlu, Rai Bahádur.
The Hon'ble J. D. Rees, C.I.E.
The Hon'ble G. P. Glendinning.
The Hon'ble Nawab Amir-ud-Din Ahmad Khan, C.I.E., Bahádur, Fakharuddoulah, Chief of Loharu.
The Hon'ble Rao Sahib Balwant Rao Bhuskute.
The Hon'ble P. Playfair, C.I.E.

QUESTIONS AND ANSWERS.

The Hon'ble NAWAB AMIR-UD-DIN AHMAD KHAN, BAHÁDUR, in the absence of the Hon'ble PRINCE SIR JAHAN KADR MEERZA MUHAMMAD WAHID ALI BAHÁDUR, asked:—"With reference to Sir Charles Pritchard's replies to my questions (1), (3), (4) and (5) on the 7th February, 1895,

regarding conveniences for railway passengers, will the Government please state the result of its enquiries and consideration?"

The Hon'ble MR. CADELL replied:—"The attention of Local Governments and Administrations was drawn, in July, 1895, to the importance of the subject, and the various railway administrations were invited to co-operate in the removal of all reasonable causes of complaint. Amongst others, particular attention was invited to the following points:—

(*1*) the reduction during the hot weather of the number of passengers carried in each compartment or carriage;

(*2*) the removal of delays and difficulties in obtaining third class tickets by the opening of ticket offices for a more prolonged period before the arrival of trains, or, where necessary, for the whole day; the establishment, where the demands of traffic call for it, of agencies for the issue of tickets in the bazars or other convenient places; and the provision at large booking centres of additional ticket-issuing windows, and of additional staff for the issue, checking and collection of tickets, and the employment of female ticket collectors, when possible, for dealing with female passengers;

(*3*) the improvement, where necessary, of existing latrines by the addition of screens or other means of securing privacy;

(*4*) the distribution of pure drinking water, especially in the hot weather and during fairs or other large gatherings, with proper precautions to protect it from pollution.

"Having regard to the extreme importance of the matter, no less from the standpoint of the Government and of the railway administrations than from that of the great mass of the travelling public, the Governor General in Council desired that the authorities of the several railways should give their constant attention to the subject by enforcing the rigid observance of the rules already in force and by the introduction from time to time of such further reforms as experience may show to be necessary or desirable.

"Government Inspectors for Railways have also been instructed that in the course of all periodical and other inspections made by them attention should be paid to any improved arrangements that have been found possible for the comfort and convenience of passengers, and that these arrangements, or the necessity for improved arrangements, should be made the subject of report."

The Hon'ble NAWAB AMIR-UD-DIN AHMAD KHAN, BAHADUR, in the absence of the Hon'ble PRINCE SIR JAHAN KADR MEERZA MUHAMMAD WAHID ALI BAHADUR, asked:—"Will the Government please state whether any, and if so what, communication has been received from the Secretary of State as to the result of the Opium Commission?"

The Hon'ble SIR JAMES WESTLAND replied:—"The Government of India communicated its views to Her Majesty's Secretary of State in a despatch dated the 19th October, 1895, to which the Secretary of State replied on December 12th. Both despatches were published in full in the Official-Papers Supplement to the Gazette of India of the 18th January last, and are available also in pamphlet form."

FINANCIAL STATEMENT.

The Hon'ble SIR JAMES WESTLAND, in moving that the Financial Statement be taken into consideration, said:—"There are one or two subjects which are of some public interest and which were not referred to in that statement, but in regard to which I should like to take the opportunity of giving some explanation now. The first question to which I wish to allude is the reference which we made in the course of the past year to Commercial and Banking Institutions on the subject of the investment of the currency reserve. The proposal that we laid before them was that, whereas the currency reserve is now invested to the extent of eight crores, we should take legal powers to

invest it up to the limit of ten crores. We furnished these bodies with statistics relating to the circulation, and we asked them their opinion as to the measure, and whether, in their opinion, it in any way diminished or endangered the perfect convertibility of the currency note. We have received answers from all the Chambers of Commerce and Presidency Banks, and I may say that there is not one of these bodies which calls in question the proposal to make this investment on the ground that it diminishes the security for the convertibility of the currency note. I may mention that since these papers were circulated to the Banks and to the Chambers of Commerce we have received even additional evidence of the security with which the proposed transactions can be carried out. It will perhaps be remembered that we drew up two statements shewing the variation in the circulation. One of these statements was a statement, month by month, for some time past, of what we call the gross circulation of the currency notes. The other was a statement of what we call the net circulation. The difference between the gross and the net circulations in this case is that the gross circulation includes the currency notes which lie in our Reserve Treasury and also the currency notes held by the Presidency Banks. These notes are certain to come to us for encashment sooner or later; we do not regard them as a permanent part of the currency circulation, and we ought not to regard them as such in discussing any question of the currency reserve. The net circulation is the balance which remains in the hands of the public generally.

"Now, since these papers were sent out this gross circulation has very much diminished. It stood, if I remember rightly, at about 31½ crores when we sent out the statistics, but now the gross circulation has been reduced to something like 25 crores. That is to say, the demand for money which springs up every cold weather, and which sprang up this cold weather also, has so greatly reduced the amount held in the balance of the Reserve Treasury and in the Presidency Banks, that they have brought forward their notes for encashment, and by that means have reduced very largely—by something like 20 per cent.—what I have been defining as the gross circulation. But notwithstanding this great change in the gross circulation, the net circulation, that is to say, the amount of notes which remains in the hands of the public, and which can be depended upon to a large extent to remain in the hands of the public, has increased by a small amount. When we consulted these bodies whom I have named, we based our proposals entirely upon the statistics of the net circulation, and rightly so, so far as I can see. The evidence that this circumstance has given to us—the circumstance, namely, of the great diminution of the gross circulation, entirely unaccompanied by any diminution in the net circulation—adds considerable strength to the argument that we can increase our currency investment from eight to ten crores without the slightest danger to the convertibility of the note.

"The only objection that has been raised to the proposal which we made was that we might to some extent endanger our currency policy, that is to say, our rupee currency policy, by throwing on the market two crores of rupees. These two crores of rupees would hardly be thrown upon the market in the sense of being suddenly put upon the market, but ultimately and after a long series of intermediate transactions the circulation of rupees in the country would be two crores more than it would otherwise be. Now, this is obviously a theoretical objection, and it is based upon theoretical grounds. I am not prepared to discuss these theoretical grounds now, because it is very difficult indeed to say how far the total amount of the rupee currency in circulation affects the exchange value of the rupee, and I do not wish to discuss a difficult and dangerous question of that kind. But I am a little doubtful whether in discussing the question of the investment of the currency reserve we are at liberty to look at outside considerations of that kind. Of this I am confident that we are not entitled to use the currency reserve for any purpose of producing a certain effect upon the exchange value of the rupee. No person would for a moment allow that if we did that we would be acting within our duty. It is for the same reason arguable that when a measure affecting the currency reserve is proposed, from the point of view of the currency-reserve pure and simple, we ought not perhaps to allow

ourselves to be influenced by the possible effect which a measure desirable from a currency-reserve point of view, may have upon the exchange value of the rupee. However, these are all questions which will no doubt be argued out before the measure which we propose takes any actual form. What I wish to state at present for the information of the Council is what the Government intend to do with regard to the proposal generally. In the first place, we shall publish in the Government Gazette for general information the opinions that we have received upon the subject. We shall also communicate them to the Secretary of State for his information, with a view to any suggestions or orders that he may desire to give. If he sanctions our proposals, it is possible that we may bring forward a legislative measure for carrying them out, but that will not be done until next cold weather; that is to say, that we shall not make any proposals of this kind during the session at Simla, where we do not receive the assistance of our commercial colleagues.

"The other matter to which I desire to make reference was a communication made to me by merchants at Rangoon during my visit to that place. It is a matter which I considered partly at that time and afterwards in Calcutta. The merchants of Rangoon had two requests to make—first, that the Secretary of State might draw his Council Bills upon Rangoon as well as upon Calcutta and Bombay. This is a question which has been before the Government at various times during the past few years, but the Government has never seen its way to allow any drawings of Council Bills on Rangoon. There is more than one reason for this. The drafts of the Secretary of State come at present, for example, to about sixty lakhs a month. If we were to allow the Secretary of State to draw upon Rangoon, it is obvious that we ought to be prepared at any moment to pay sixty lakhs at Rangoon. It is easy for us, at centres like Bombay and Calcutta, to provide ourselves with as large an amount of money as may at any time be necessary to meet the Council Bills of the Secretary of State; but, if we were obliged to provide money for that purpose at Rangoon also, it would make far too serious an inroad upon our cash balances, and we would be able only with great difficulty, and not even so at some times of the year, to provide the necessary funds to meet such Council Bills as might be drawn on Rangoon. I may also point out that the Exchange Banks, through whom most of these Council Bills are passed, are exactly in the same position and circumstances as ourselves. It does not pay them to keep money lying at Rangoon waiting the demands of the merchants. They prefer financing Rangoon entirely from Calcutta. Even if we were to allow Council Bills to be drawn upon Rangoon, the chances are that the Banks through whom they almost entirely pass would prefer drawing upon Calcutta and holding their funds there; because in that case the same amount of reserve held in their hands would be available both for the demands made upon them at Calcutta and those made at Rangoon. We have an exact example of this in the Secretary of State's drawings at Madras. The Secretary of State may draw on Madras—and he does so to a small extent—but as a matter of fact the commerce of Madras is financed almost entirely through Calcutta and Bombay. The Banks prefer having their money at these big centres, and sending it thence, from time to time, to where it is actually wanted. I do not think, therefore, in the first place that it would be possible, or desirable, that the Secretary of State should draw upon Rangoon, nor, should he determine to draw upon Rangoon, that much advantage would be taken of the permission by the Exchange Banks.

"The other matter which was brought forward by the same merchants at Rangoon was their demand that the large sums of money, which through currency and commercial operations become available in our hands at Rangoon at the beginning of every cold weather, should be made available for the rice trade at Burma, not only, as at present through the Bank of Bengal, but to the merchants directly. Our present practice is to make an arrangement with the Bank of Bengal that we should hold this money at their disposal and make it available to them at a premium of four annas per cent. The Exchange Banks, I believe, pay another anna per cent. to the Bank of Bengal, and by this means and by any necessary cash remittances made by the Bank of Bengal the whole of the Burma rice trade is financed. The desire of the merchants was that, instead of making this money available through the Bank of Bengal only, we should throw

it open to tender in the same way as the Secretary of State throws open his Council Bills to tender; and the merchants think that by this means they will get rid of part of the present banking charges which they consider fall very heavily upon them. Now it may be impertinent in me to pretend to know more about the business of the merchants of Rangoon than they do themselves, but I confess I have some doubts that when bills are made available in this way the merchants will be able in any way either to reduce their banking and remitting charges or to compete with the Banks for these remittances. However, I perfectly admit that my opinion on this subject is not sufficient to warrant me in withholding from them the permission they ask for to tender for the Bills in competition with the Bank of Bengal.

"I have therefore made an arrangement, and I have communicated it to the Rangoon merchants, that next season we shall advertise at the proper time the amount of funds that we have available at Rangoon, and we shall call for tenders for the available amount of money. These tenders can be made either by the Bank of Bengal or by the Exchange Banks or by the merchants direct. That is what the merchants have asked for, and it remains to be seen whether the plan will suit the circumstances of the trade. I myself feel a little doubtful as to whether the merchants will in the end find it profitable to take all these banking transactions upon their own shoulders, but that is a matter for them to consider for themselves. At present even Exchange Banks are unwilling to take upon themselves this burden of keeping money lying idle at Rangoon. They prefer to keep the money here till it is actually wanted at Rangoon, and when it is wanted they can depend upon its being made available through the present system. That is in my opinion the cheapest and most practical system; but, as I have said, I have not the slightest objection to allowing the merchants of Rangoon to attempt the system of direct tender if they find that it suits them better.

"I thought it desirable to give a public explanation on these two matters because they are matters in which the commercial public have generally some interest. I did not think it worth while to enter upon these subjects in the Financial Statement, and therefore I have taken this opportunity of making the explanations which I have to give the public on the matter."

The Hon'ble MR. PLAYFAIR said:—"My Lord, the Financial Statement before your Excellency's Council again testifies to the buoyancy and elasticity of the Indian revenue, and it does more, for it manifests in a most satisfactory manner the result of the perseverance in economy which has distinguished your Excellency's administration.

"My Lord, I have little to add to my congratulations to the Hon'ble Member for Finance, that under his guidance the country has emerged from the transition period he was forced to proclaim two years ago and that he is able to state in paragraph 10 of the Financial Statement that he has paid for the Chitral Expedition, restored the Famine Insurance Grant, recouped the contributions levied in 1894-95 from the Provincial Governments, and has a surplus over and above, approximating to a crore of rupees. Unless the value of the rupee again and suddenly alters for the worse and the country is called upon to meet some unforeseen calamity, it is apparent that the surplus of the current year should be considerably larger than the estimate of Rx. 463,000 taken in the Budget. I therefore look forward with most concern to 'l'embarrass des richesses' as likely to invite demands upon the Member for Finance from many directions as the year advances and as the surplus accumulates. I have lately expressed the hope in this Council and elsewhere that the Government of India will take into earnest consideration those commercial wants of the Empire to attend fully to which it has not had either leisure or opportunity during the recent periods of war and poverty. I would specially refer to the competition from other countries with which the produce and trade of India is now beset, and to the effect which existing inland transport charges, and especially railway rates, tend to restrict traffic. I hope that these important questions will not be forgotten when Government comes to deal with the surplus balances of the year. I do not propose to enlarge upon this question on the present occasion. I hope it may be presented by the commercial community more

fully for the deliberate consideration of your Excellency's Government than time at present would permit. In this connection it is encouraging to learn that the Budget contains provision for a more extensive railway programme than India has known for many years. And, while I heartily congratulate the Government on this advance, I would express the hope that more liberal encouragement may attract the private resources of the country and of investors in Europe to the development of the system of communication by the construction of feeder railways and tramways throughout the country.

"Another most satisfactory feature in this Budget is the savings that have been effected under the ordinary army expenditure, amounting to Rx. 462,000. Two years ago the Council listened with keen interest to a carefully prepared and business-like explanation given by the Hon'ble and gallant Military Member of Council with regard to the army expenditure. I may venture to assure the Hon'ble Member that any additional information he can give the public, especially as to whether the Chitral outpost may create a demand for special defence works, will be received with lively interest. Such an explanation, made on the eve of his retirement,—an event which is regarded with general regret,—would be at this juncture of very great importance.

"Turning to the question of income, it is a matter of anxiety, which I am glad to find the Government of India share with the public, that the opium crop continues to yield very much below the quantity gathered during previous years. The total income from this source has fallen from Rx. 8,451,185 in 1880-81 to Rx. 4,979,800 in 1894-95. The decline has been attributed to unfavourable seasons, but it has not been shown that the same influence has affected other crops in like manner. I would invite the Member for Finance to say whether experience satisfies him that the rise in price paid to the cultivators he announced a year ago has been sufficient to secure the more general cultivation of the crop, and whether it would not be advisable to offer a still further advance to the cultivator to ensure a supply to replenish stocks and bring them up to the requirements of the demand. I would also like to enquire whether the attention of the Government of India has been directed to the remarks appearing in the reports of the British Consuls in China upon the increased adulteration by the Chinese of Indian opium with Tientsin cake, Sesamum seed cake, and other compounds, to the prejudice of the reputation of the Indian drug, before it reaches the consumer, and whether the Government will endeavour to induce the officials in China to protect the Indian trade against this pernicious practice.

"It would also be of interest should the Minister for Finance find himself able to state at what rate of interest he intends raising the new rupee loan of Rx. 4,000,000, contemplated in paragraph 178 of the statement. With regard to the remark that the minimum cash balance required by the Government of India over all the Treasuries in India is between 8 and 9 crores, I desire to enquire whether in view of the increased balances of the Savings Banks—estimated in the Budget of 1896-97 to amount to Rx. 11,862,618—it is not necessary, in the opinion of the Government of India, to retain rather a higher balance in cash than formerly.

"A reply to this question, in view of the remarks that have fallen from the Hon'ble Member in connection with the proposed increase of the Paper Currency Reserve would, I think, be of interest to many. Without entering upon the question raised by the Hon'ble Member, I would desire to say that the mercantile community have every appreciation for the seven lakhs saving in interest that his scheme is designed to afford. When the reserve was raised in 1889-90 from 6 to 8 crores of Government paper, the Savings Bank balances were, if my memory serves me right, about 7 crores. These balances will stand according to the estimate in the Budget of 1896-97 at something like Rs. 11½ crores, and, as I have remarked, it will be of interest if the Hon'ble Member is able to give a reply to the question I have put."

The Hon'ble RAO SAHIB BALWANT RAO BHUSKUTE said:—"My Lord, the Financial Statement is certainly an unmixed gratification for which we were

not altogether unprepared. Yet our anticipations were mere conjectures. They have been agreeably realised and the Government of India must be warmly congratulated on the prosperity budget which the Hon'ble Sir James Westland has been able to place before the Council for their consideration. Two years ago, when our troubles seemed to be at the worst, nobody could have ventured to hope that the Government of India would have been able to tide over their difficulties so successfully as they have done, and your Excellency's Government will receive the congratulations of the country on this happy result. Both the actuals of 1894 and the revised estimates of 1895 have turned out better than were anticipated, and we can now count upon a surplus in the past year's accounts as also in those of the opening year with great confidence. The public will now have their anxieties allayed. A surplus means an implied pledge that public burdens will at least not be augmented if not lightened.

"It is in this connection that the Hon'ble Member for Finance deserves especial felicitations. He took office under the most unfavourable circumstances. An evil star seemed to haunt him. Some nine years ago, when he was in temporary charge of the Finance Department, he was forced to have recourse to the extreme necessities of taxation. It was necessitated by the annexation of Northern Burma, the increase of the army expenditure the military expenditure on the North-Western frontier, and by the rapid fall of exchange. Some three years ago, when the portfolio of finance was made over to him, the circumstances were equally unfavourable. Talents, which could pre-eminently have relieved the public at large of onerous duties by an inborn mastery over financial problems, were thus employed in struggling with a crisis threatening bankruptcy. Better days appear to smile on him and on your Excellency's Government.

"But to what are we to attribute the present occasion for rejoicing? When this question comes to our mind we find ourselves again left to mere chance and frailty. The opium revenue and the rise in exchange underlie this prosperous outlook.

"The great Roman jurist Paulus had laid down that 'money circulates with a power which it derives not from its substance but from the quantity.' This view has not been contradicted to the present day. This is the principle of the Barbour scheme and it has admirably succeeded. Other circumstances too contributed to its success. Chitral has probably caused a large amount of money to be directed towards itself. Payments on account of railways under construction must have likewise caused a great absorption. The closing of the mints successfully operated on raising the market value of the rupee. Thus a rise in the exchange is due to exceptional circumstances.

"The Chitral expedition is probably, at least we all pray, the last of the projects of our Supreme Government for pushing their conquests in the North-West. Further circulation of money is therefore retarded. Crops in the North-Western Provinces and in some parts of the Central Provinces are fearfully bad. There will be less advances made than in the preceding year. Doubtless the whole basis of the Budget is the state of exchange. The Finance Member is aware of the difficulties and hence the caution which characterises his Budget (paragraph 31 at Part I of the Statement).

"The vagaries of exchange are almost certain in future. The present triumph is by no means final. To prevent importations of silver a further augmentation of the duty will be necessary. During the last week the exchange was as low as 14½*d*. And even while the Hon'ble Member was speaking a further fall had taken place.

"The exchange, therefore, my Lord, is not an unfailing indication of the improvement of our financial situation. Our surplus or deficit or equilibrium is solely guided by it. Suppose the rupee had fallen to 13*d*., what would our position have been? With public works stopped and progress starved it would have been a paramount necessity to find out some means of escape. Whatever it be there are chances enough that exchange may rise, and we all wish it would.

"The other main advantage accruing to the Government during the past year and contributing enormously to the present situation comes from opium,

During the past ten years, as I shall show later on, the opium revenue has gone far lower than what it was during the ten years immediately preceding. This item of revenue, though conspicuous some particular year, is as frail as the exchange. A due allowance has even in this case been made for this unstable nature of the revenue. Here we find another proof of the cautiousness of the Finance Minister.

"There are, however, reasons to hope for a time when budgets can be taken for a true forecast of the year. The financial administration will be free from that anxiety which has harassed it during the last decade of years, if an effective control were exercised on it. Without it we cannot be said to have made any progress.

"In adverting to the means of control, I wish to make it clear that I am duly aware of the heavy work of this day. I shall therefore abridge my remarks as much as possible. A non-official Native member is said to be waiting for this one day in a year to expend his ire. This is a gross injustice to him. Ire he has none, and if he has it he has other times and places to expend it. This is in my opinion a sacred place where we are bound in duty to place before your Excellency such arguments as may conduce to the best interests of the millions whose destinies your Excellency has been called upon to rule. Making light therefore of the insinuations of others, I hasten to offer my remarks. But before proceeding to my task I must state I am no expert in statistics, and the figures I shall quote are taken from an authority at least satisfactory to me.

"The Budget is very reticent with regard to the means of economy either actual or prospective. The Government has during these twelve years endeavoured to meet its extra demands with peculiar indifference to expenditure and revenue. Among the financial expedients resorted to by Government the principal ones are—the frequent curtailment or even suspensions of the Famine Insurance Fund; absorption of the provincial resources and balances; suspensions of useful administrative reforms and expenditure; and taxation. I shall speak of each of these and say how the Budget deals with it.

"(1) *The Famine Insurance Fund, otherwise called the Famine Insurance Grant.*—During the past twelve years the grant appears to have been five times suspended and twice curtailed. The Government could not have done a better thing than taking advantage of the present prosperity to reconstitute the Famine Grant on its own basis. That grant was a sacred trust which ought never to have been diverted to other purposes. It is no use complaining of the past, and in view of the uncertain character of the present season, after the long spent impunity we have enjoyed, the country will breathe more freely when it learns authoritatively that your Excellency's Government is prepared to accept the pledges so solemnly given when the fund was first constituted. The Hon'ble Sir James Westland gives reasons to justify the resolutions of the Government of India to reduce this provision for famine from a crore and a half rupees to one crore. The propriety of the policy which is now announced of reducing this grant by one-third of the amount fixed by Sir John Strachey and Lord Lytton may be questioned, considering that during the last fifteen years the total sums spent on various accounts under this head represent an average expenditure representing one crore and sixteen lakhs. Even if the reasons assigned by Sir James Westland be as cogent as they are represented to be, the further question arises whether this reduction of the grant does not require the Government of India that they should remit those special taxes which were imposed for this special purpose when famine insurance was accepted as a State obligation by the Government of India. Sir James Westland's remarks throw no light on this head, although it is a matter on which the provinces affected by this special taxation will naturally claim immediate consideration at the hands of the Government of India.

"(2) *The provincial resources and balances.*—Besides reconstituting the Famine Insurance Fund on partial footing the Government of India has been able, chiefly by reason of rise in exchange, out of its realised surplus of nearly three and a half crores in the revised estimates of the present year, to pay off the whole of the Chitral expenditure of nearly two crores and to return back to the Provincial Government forty lakhs of the balances withdrawn from them two years ago. This latter feature will not fail to inspire greater confidence in the binding force of the Provincial contracts—an arrangement entered into from

time to time by the Government of India with the various Local Governments. The appropriation of these balances, during the term of the contracts, has always a very prejudicial effect, and as it now turns out there was no necessity for such interference with existing arrangements. It is to be hoped that, when the next five years' contracts are entered into, guarantees may be given that recourse will not be had to such interference. It necessarily tends to unsettle Provincial arrangements.

"Towards the conclusion of the first part of his statement, the Hon'ble Finance Minister, with his usual ability and clearness, discusses the question how far Provincial revenues are appropriated to Provincial purposes and how far they are diverted to supplement Imperial revenues appropriated mainly to Imperial charges. His position is that, taking the distributable and non-distributable items of revenue and expenditure, the claims of the Provincial administration are not unduly sacrificed to subserve Imperial purposes. He estimates that the non-distributable items of revenue, including Opium, Salt, Customs, Post, Telegraph, Mint, Miscellanous and Railways, come to about 28 crores, and the contributions by the provinces from their net receipts come to about 21 crores, making about 50 crores, which represent the non-provincial items of expenditure on the Central Administration, the Army interest and Famine Insurance charges spent in India, making a total of 22 crores, and the English charges, Army interest, Superannuation allowances and other items, which with exchange come to about 28 crores. In other words, the Imperial charges are about 50 crores and the receipts about 28 crores. The deficit is made up by 22 crores contributed out of their surplus revenues by the provinces. While the Imperial revenues are thus short of Imperial charges by 22 crores, the Provincial revenues under distributive heads are 48 crores and the Provincial charges are 26. The representation is perfectly correct as far as it goes, though it does not cover the whole field of Indian finances. It moreover fails to take account of the main grounds on which the complaint made by the provinces really rests.

"This complaint is not, as the Hon'ble Member puts it, that each province thinks the richer provinces have a surplus which they are made to disgorge for the poorer provinces, but that under the present arrangements the poorer provinces are made to contribute more than their proper shares in order that the richer provinces might not be taxed their full share of the Imperial contribution. On the basis of the figures furnished in the Financial Statement I have tried to prepare statements which bring out this fact more clearly than what I could actually describe:—

PREPARED FROM THE FINANCE REVENUE ACCOUNT, PAGE 24, AND FROM THE FINANCIAL STATEMENT.

Table showing the incidence of taxation per head in the different provinces.

Provinces.	Total.	Land.	Salt.	Excise.	Customs.	Other heads.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Central Provinces	1 5 4	0 9 9	0 2 6	0 4 1½	...	0 3 9
Burma . .	6 0 4	3 3 9	0 3 6	0 7 10	0 10 9	0 15 7
Assam .	2 2 3	1 1 9	0 2 4	0 7 10	...	0 4 1
Bengal . .	1 5 5	0 8 9	0 3 9	0 2 9	0 0 6	0 3 6
North-Western Provinces and Oudh.	2 0 7	1 3 6	0 2 4	3 1 11	...	0 4 5
Punjab . .	2 3 3	1 2 3	0 3 0	0 1 7	...	0 5 4

Military Department	·8	Buildings	·5
TOTAL	48·15		48·5

"It appears from these statements that while in the rich Gangetic province of Bengal the land-revenue charged is only eight annas per head, it is as high as Rs. 2-6 in Bombay and even in my poor province the charge is nearly ten annas per head. Under Excise the same story is repeated. The total charged per head of distributive revenue in Bengal is Rs. 1-5-5, the same as in Central Provinces, while in Bombay it is as high as Rs. 4-3-5. It is this unequal distribution of burden involved in the present arrangement which is really the subject of complaint. The poorer provinces are taxed more than their capacities, while the richer provinces pay less than their shares. The charge of net revenue contributions made to the Imperial Government per head of population is ten annas in Bengal, while it is Re. 1-6 in Bombay and Madras, Re. 1-3 annas in North-Western Provinces and Oudh, and 14 annas in the Punjab.

"If the calculations partially made by the Hon'ble Sir James Westland in his statement be extended on the same principles so as to cover all the expenditure and receipt, it would be found that roughly speaking out of 96 crores of rupees raised as revenue in India the purely Imperial receipts (Opium, Salt, Customs, Tribute, Interest, Post, Telegraph, Mint, Irrigation and Railway Works, Miscellaneous) represent a total nearly of 48 crores, which is realised for the Imperial Government through the Local Governments or directly through its own agencies, while Lands, Stamps, Excise, Rates and Taxes, Forest, Registration, Civil and Miscellaneous Receipts, which may be regarded more or less Provincial, amount to another 48 crores. Out of these 48 crores the Local Governments are permitted to spend about 24 crores on their own responsibility under the system of Provincial contracts, and the remaining 24 crores are paid over to the Imperial Government which spends 33 crores in England, 37 crores in India, making in all nearly 70 crores. The remaining 26 crores are all that are really spent on Provincial purposes. If, instead of Imperial Government assigning at its own sweet will what it thinks a fair share in Provincial charges, the Local Governments were required to pay their fixed proportion on the principle of population or income, to supplement the Imperial receipts, a more healthy state of things would spring up than the present centralising arrangement permits and all cause for local complaints will be removed.

"My Lord, I have only ventured to press these points upon the attention of the Council. The expected fall in exchange and the rise in the rupee price will I am sure establish better relations between income and expenditure and enable your Excellency's Government to remit the heavy additional taxation which has been imposed during the past few years to meet the crisis. When this time arises your Excellency's Government will no doubt weigh the claims of the people of India for relief, though these claims cannot for obvious reasons be pressed with the same urgency as those of the manufacturers of Lancashire in whose interests the Council has already gone so far as circumstances require. Properly speaking, when the finances permitted reduction in taxation, the poor

population of India should have been the first to feel the benefit of the remission. I hope when the next opportunity arises your Excellency's Government will redeem its word by granting this promised relief.

" *Administrative reforms and useful expenditure.*—These have been neglected. The department of police, for instance, demands a thorough revision. Time is come for making educational and departmental tests the essential qualifications for higher appointments in the police. There has been a universal cry for the separation of the judicial from the executive. The expenditure on public education is exceedingly meagre and has not kept pace with diffusion of education and rising taste for learning. The pay is inadequate and promotion bad. A general discontent among the schoolmasters is the natural consequence. Men of sound learning and impressive character shrink from the service. Minds entrusted to the care of this body of men are sure to imbibe at a very seasonable period some tincture of their teachers' spirit. Useful public works have been likewise stopped.

" So long as our expenditure abroad is thus increasing there can be no hope of having these requirements satisfied. A proper re-adjustment of revenue expenditure and utmost economy have been axiously called for from every quarter.

" Last year the Hon'ble Finance Member showed a decrease of taxation 4·5 millions. No doubt the receipts under taxation in 1883 were 33·678 millions sterling. Those in 1894-95 were 29·528. But he omitted the income of the country. Were it likewise reduced to a sterling basis it too would have shown a corresponding decrease. During the twelve years from 1883 to 1894 taxation has increased 35 per cent., whereas it has increased in the United Kingdom in the same space by only 14 per cent.

" The subject of agriculture may justly be called the burning question of the day. It now demands the immediate attention of those whom it has pleased God to place over us. Further postponement of this matter would amount to the neglect of a solemn trust. The population of India may fairly be estimated at 30 crores. Of this a little above 80 per cent. live on agriculture, and nearly 10 per cent. live or trade on the produce. We admit we have unprecedented blessings of peace and safety. We must acknowledge the rectitude of purpose of our rulers. Our only complaint is that a proper investigation has not been made of the real state of things. The breaking of the ice is only difficult. The rest is smooth enough. None but your Excellency's Government can do this. On account of the security of person and property, on account of peace and tranquility conferred upon us, the Indian races breed rapidly. The increase of mouths has necessarily to be fed. The area of cultivation has not kept pace with the increased needs of an over-increased and ever-increasing population. No agricultural improvements have been introduced. Rude system of agriculture, unmanured cropping, continuous cultivation have all as it were conspired to contribute to the fast proceeding exhaustion of the soil. Crops have begun as a matter of natural consequence to yield diminishing returns. The proverbial indebtedness of the agricultural classes has however kept its just measure and time with the other difficulties. If the Government be the sole proprietor of the soil, as such, and also as a State, it doubly becomes the bounden duty of the Government to put it right.

" The salt duties were enhanced in 1888. In 1886-87, 3,37,35,054 Indian maunds of salt were consumed, whereas in 1894 the consumption was 3,41,50,507 maunds, or only 4,15,453 maunds more than in 1886. The population must have increased by about 23 millions. The normal rate of consumption of salt per head of population is 10 lbs. The consumption per eight heads of population is therefore one maund per annum. The increase of consumption proportioned to population ought to have been nearly 33 lakhs of maunds ; but the increase is only 4 lakhs of maunds and a little more. The consumption has thus, it is plain enough, fallen by 25 lakhs of maunds. Such is then the poverty of the masses that a slight increase in duty has caused a diminution in the consumption of an indispensable necessary of life such as salt.

"*Numerous other proofs may be given of the strains on the poor. It* would be impossible to produce all. I have tried to avoid as far as possible arguments requiring a deal of reasoning. For instance, there is a general rise in prices, but wages have remained stationary. The acknowledged principle of taxation is that it should not affect the national industries. There is again nothing to rely on should these happy peaceful times threaten war. In times of peace we should prepare for war. We deprecate such an event, but we must have a large surplus in the shape of preparation.

"This increase of taxation has features which cannot be made light of. There is every certainty that your Excellency's Government will soon take such measures as may tend to lighten taxation and relieve the anxieties of our men. The position which Lord George Hamilton holds is briefly one of financial equilibrium—a test considered to be an acknowledged proof of its soundness. But there lies underneath a grave and serious peril to which we ought to be no longer blind.

"It is no use discussing where the money thus raised was spent. It is far from my mind to throw any unjust and undeserved odium on this or that administration or on this or that individual administrator. It is the entire system which has given birth to these difficulties. So long as this whole system has not been altered no part of the evil will be uprooted.

"My Lord, I have briefly tried to bring out the nature of our present financial position. I have also tried to show that though we are all very jubilant to-day there is no knowing how exchange may rise or fall. I have also shown the justness on the steps taken in partially restoring the Famine Insurance Fund and in re-imbursing the Provincial treasuries with the balances taken from them. It only remains for me to add a few more things connected with expenditure on which the Financial Statement is notably silent, though it has made some trifling savings by way of economy in different administrations.

"The exchange and opium had a continual fall since 1883. The former entailed a loss of $9\frac{3}{4}$ crores exclusive of additional payment to European soldiers. The aggregate excess loss in consequence of exchange from 1884 to the present date amounts to nearly 60 crores. The increase in Home charges has since been about 2 millions sterling, due mainly to military expenditure and increase of loss on railway accounts.

"Opium receipts also showed a continual deficiency compared to those of previous ten years to an aggregate of nearly 6 crores of rupees. Both these losses were beyond the control of Governments.

"Towards the close of 1885 followed a tremendous extension of the frontier forward policy, special defence work, fortunately not given a prominent figure in this year's budget, and the recruiting of the armies.

"The frontier policy necessitated an aggregate expenditure of nearly 68 crores and added six to the permanent annual charge. The real cause of the financial difficulties is not the exchange, but it is this expenditure. Railway extensions have been carried on with little regard for costs. It is not necessary to think of the exchange compensation grant. The total expenditure has risen to $85\frac{1}{2}$ crores, making a permanent addition of 9 crores. Placing the military expenditure of 1887 and 1893 side by side with each other, the latter has risen to nearly $2\frac{3}{4}$ crores. Of this net increase in the charges both effective and non-effective is one crore and eighty-three lakhs, while the increase due to exchange is only 96 lakhs.

"Such is the increase in a department whose charges are already tremendously heavy.

"Though people have an incomplete knowledge of statistical study and though they cannot account for the premises of their reasonings, this is the inference they have drawn. It is difficult for a non-official member to presume to lay his fingers on established institutions. It was my duty, my Lord, to lay before your Excellency the causes of this embarrassment.

"Your Excellency's Government can best remedy the shortcomings adverted to. As regards the provinces which I have the honour to represent I must state the Finance Minister has been rightly informed as regards the

crops there. I am glad the Hon'ble Member for Finance proposes restoring the contribution taken from that administration. I am aware, though the cultivators are warned that the remission granted owing to failure of crops would be claimed in the year following, they are never exacted with much rigidity. There has been a continued failure in some parts and an entire remission is therefore very imperative. Some lenient rules ought to be framed for recovering arrears allowed to accumulate. If Government were to realise their arrears in one or at the most two years, the cultivator has no option other than that of borrowing. A complete remission in hard cases and a partial one in others would be desirable. The arrears in the latter cases were better collected in four or five annual instalments. In cases like this the Famine Insurance Fund may be partially utilized. If it be taken out of the pockets of the people in times of plenty to meet famine contingencies, it may be spent to meet their wants in times of scarcity. I am sure such steps will be taken both by the Local and the Central Governments.

"In this year's budget protective railways constitute the most important head of expenditure. Most of them are constructed for protecting the North-Western Frontier. The vigorous prosecution of railway construction has already largely added to the net loss to the State during previous years. Several of the new lines are strategic.

"There appears to have been much unnecessary outcry against the special grant for mobilisation purposes. Unless another war were in contemplation this item would necessarily pass into the surplus very likely to be attained over and above the margin presented in the Budget.

"There is now no use raking up an old question decided once for all. Legislation deemed it necessary to forego an income of about half a crore imposing a burden of about 8 lakhs on this country. But it could not be helped. Clouds are gathering on the horizon and there are indications enough of a gathering tempest. We have every assurance in that case that the Indian Government will assert its own.

"On the whole we cannot but admire the cautious spirit which reigns throughout the budget. Even supposing the exchange to fall, and even supposing the opium revenue to fall as it threatens to, it will be found at the end of the year that there is no shortcoming."

The Hon'ble NAWAB AMIR-UD-DIN AHMAD KHAN, BAHADUR, said :—

"My Lord, I am very glad to be able to say that I do not feel myself called upon to take up much of the time of Your Lordship's Council to-day, or to enter into any detailed criticism of the Financial Statement now under discussion. Feeling sure, as I am, of the desire of your Excellency's Government to do what is right, and in the best interests of the people of this country, having due regard to the duty that is laid upon it by the control that is exercised by the authorities to which it is responsible, and knowing, as is well known, that the financial interests of the Empire are at present committed to one who is eminently fitted to deal with and control them, I confidently anticipated that the Budget for the ensuing year would call for no unfavourable comment except, perhaps, from those who consider it a privilege or duty to attack everything that the Government may do, and my expectations have been fully realized.

"The Financial Statement for the year 1896-97, which was presented by the Hon'ble the Finance Minister at last Thursday's Meeting of Council, is one which I think the Government of India have good reason to be satisfied with. A surplus of nearly one crore of rupees is shown in the revised figures for the year now drawing to a close although a very large expenditure, which was not provided for in the budget estimate, had to be incurred. This in itself is matter for congratulation, but when it is remembered that this great expenditure includes amounts which denote first, the large sums debited on account of the Chitral Expedition, second, the redemption of the pledges of the Government in respect of insurance against famine, and, third, the repayment of the contributions levied from the several Provinces, the result shows that the Government has maintained its reputation for an earnest desire to do what is right, and the best that circumstances will admit of.

"The budget estimate for 1896-97 may on the whole, I think, be regarded as illustrating the prosperous condition of the country and the soundness of its financial position, and the forecast of the year, as far as it is practicable to make one, may safely be accepted.

"A budget estimate is necessarily liable to be affected by causes beyond human control, a fact which the Hon'ble Finance Minister is not slow to admit; nevertheless I for one cannot but express my appreciation of the prudence that has led to the cautious estimates of revenue which have been framed by the Hon'ble the Finance Minister in order as far as possible to be prepared for any unforeseen causes, which may operate to affect the estimates unfavourably. This is especially shown in the very moderate estimate of the gain in revenue due to the rise in exchange, for, although the present state of the silver market might justly warrant calculations at a higher rate than has been adopted, that rate will most probably prevent dislocation of the estimate and any difficulty that might be caused by an unexpected reverse. Another feature in the Financial Statement which has struck me as indicative of a wise policy on the part of the Government is the determination to improve the resources of the country by the extension of irrigation works and the constructions of railways, and additions to lines already opened out. This is in my opinion a step in the right direction which would no doubt have been taken years ago but for the state of the finances of the country which has for sometime past caused uneasiness.

"My Lord, as I indicated at the beginning of my remarks, there must and will be critics who will endeavour to pick holes, but on the present occasion they must endure the disappointment they will have to suffer in that they cannot find even a decent pretext for raising their voice against the annual Financial Statement which is now under consideration and which will, I have no hesitation in saying, call forth general approbation and tend to free the public mind from undue anxiety as to the intentions of the Government or the prospects of the future."

The Hon'ble MR. REES said:—"The hon'ble gentleman who opened the debate with all the authority which attaches to the representative of the Chamber of Commerce has already dwelt upon the most salient feature of this statement, and few, if any, who have the interests of India at heart can doubt that in the discriminate multiplication of railways lies the greatest good of the greatest number of its inhabitants. And my hon'ble friend Mr. Ananda Charlu who will speak next, clothed in a still more comprehensively representative character, will no doubt discover other merits in a Budget, the criticism of which is likely to eventuate in a chorus of congratulation. I would only beg for your Excellency's indulgence for a very few minutes to briefly refer to two or three provisions which cannot but increase in a conspicuous measure the material prosperity of Southern India in localities with which I have an intimate acquaintance.

"The first of these is the allotment of six lakhs for the water-supply of Bangalore. For many years successive Residents in Mysore, two of them distinguished officers of the Corps of Royal Engineers, and successive Governors of Madras have had this problem before them, and have sought to devise a scheme for its solution; but either because none was suitable, or because it was doubtful which was most suitable, or because funds were not forthcoming, little has been effected till this present time. With an admirable climate, and with all the advantages and amenities of one of the most favoured localities in the country, the water there has not been the best thing, but the worst, and there has been so little of it as to give rise to annual apprehension. In future upwards of 180,000 souls in city and cantonment, and the whole population of surrounding British and Mysore districts, which use Bangalore as a health resort, will directly or indirectly benefit by the blessings of an improved water-supply. Had the late Maharaja of Mysore, who provided a supply for the city, been spared, none would have rejoiced more than that admirable Prince to witness the grant of this boon to the inhabitants of the small tract of Mysore which is under British administration.

"The six lakhs of rupees required in the coming year for the improvement of the Coum River are provided by the Provincial Government, but by sanctioning this allotment and by passing the large estimates prepared, the Government of India has co-operated with that of Madras in the greatest effort yet made to heal a running sore which has baffled successive Administrations probably ever since the British flag has flown at Fort St, George and has contributed in no small degree to raise Madras, as judged by its death-rate, to a bad eminence among the insanitary cities of the world. Nothing so much as the improvement of the Coum will conduce to removing it from that index.

"The Hon'ble Finance Member in his speech last Thursday referred to a new and interesting feature of the present Budget, the statement showing the financial relations between the Central and the several Local Governments and the use which is made of provincial contributions, and he trusted that the figures given would show that there was no foundation for the theory that provincial surpluses are absorbed by the Imperial Government for expenditure on objects foreign to the provinces in which they arise.

"But however interesting and useful these figures are to dissipate a belief which I venture to think is not wholly peculiar to 'non-official circles,' the present Budget affords a most convincing refutation of any such theory in the liberal grants made for railways not only in adjacent, but in remote provinces, which exceed, I believe, those of any previous year.

"The matters to which I have referred, though of supreme local importance, are altogether insignificant beside the grant of Rx. 137,800 for the completion of the East Coast Railway between Bezwada and Cuttack, and of Rx. 800,000 for the Madras-Bezwada line, probably the largest sum which can consistently with efficiency and economy be spent in a single year.

"If to these amounts be added the advance of Rx. 750,000 to the Bengal-Nagpore Railway, of which perhaps Rx. 500,000 will be devoted to the East Coast connection, little less than Rx. 1½ millions is provided for the completion of railway communication between Calcutta and Madras, which it is believed in no long time will be reduced to a matter of 44 hours. Quite lately such a prospect would have been regarded as an optimistic dream.

"There would be no justification for occupying the time of your Excellency's Council in demonstrating the acknowledged fact that the speedy construction of this line will result in unnumbered advantages to several contiguous and populous districts, at present so little in touch one with another that in 1889 Ganjam suffered from famine while its neighbours enjoyed normal prosperity.

"But it is difficult for one who upwards of twenty years ago knew the Northern Circars at all times cut off by land and not infrequently when cyclones raged in the Bay cut off by sea from all communication with the rest of the Indian world, to pass by these liberal grants without endeavouring, however inadequately, to express on behalf of nearly nine millions of inhabitants of upwards of 31,000 square miles of Madras territory a satisfaction keenly felt by the industrious and estimable Telegu people, which is not articulate in proportion to its worth.

"If I have not referred to the restoration of the Famine Insurance Grant it is because a Railway Budget is in the best and widest sense of the word an insurance against famine as well as an advance all along the line.

"There is an Arab proverb current in India, 'Better an hour of justice, than seventy years of prayer.' So little do I think that the Hon'ble Member for the Central Provinces is right in holding that the construction of railways has pressed heavily on the Indian peasantry, that I believe, if rural India could be polled, it would answer in a paraphrase of this proverb and would say, 'Better a line of railway than all the other services of civilisation.'"

The Hon'ble ANANDA CHARLU, RAI BAHADUR, said:—"May it please your Lordship, I cordially congratulate the Hon'ble Finance Minister on his very able Financial Statement, subject to some few exceptions; and as to these exceptions I cordially sympathise with him in his personal inability

to get rid of them. With all these latter, it is hardly possible to deal at present; but some of them I cannot but discuss at some length, for which I beg to apologise.

"It is highly gratifying to note that the question of questions of vital interest to the people of India, that of the Famine Insurance Fund, is again taken in hand and a provision has been made towards it on the credit side. It is deservedly given the first and foremost place. I do not see, however, why it is called a *self-imposed* obligation. It is, I believe, an obligation, compulsorily thrust on the Government by the necessities and conditions inseparable from the administration of a country subject to repeated recurrences of famine almost as a matter of course. If so, it is like all other obligations which are forced upon the Government by causes extraneous to its mere will and pleasure. If this has been specialised as self-imposed in order to facilitate its suspension in the future, as has too often been done in the past, I must strongly object to it as the introduction of the thin end of the wedge to initiate an unsympathetic and radical change of policy. Again, I first thought that it was nothing more than an accident that the well-known name—the Famine Insurance Fund—was discarded in favour of the new designation, the Famine Insurance Grant. To my mind and to the general public the former conveyed and conveys the idea of a trust already created and already existent, while the latter denotes a mere creature of option—not importing any sense of obligation. But this seemingly slight change of nomenclature appears to have a history behind it, and it has been followed by the systematic use of such expressions as 'famine insurance policy,' 'obligation of famine insurance,' and so forth, to the studious exclusion of the word "Fund"; and it is too much to be feared that power is meant to be taken or retained henceforward to grant the provision, to withhold it, or to withdraw it, or as it suits the exigencies of each year. To this substantial change of front I must indeed object. I fear there is, beneath the surface of an acknowledgment of the obligation, a distinct undercurrent, undermining the policy originally inaugurated and the pledges given when the Famine Insurance Fund was brought into being, under a deep and harrowing sense of responsibility for human lives, by Lord Lytton, a horrified eye-witness of the palpable havocs of famine—chiefly in the Madras Presidency. There are, in the Financial Statement before us, other indications accentuating this fear. This fund —I prefer continuing to call it by the name with which it was first christened—this Fund as set forth in the Financial Statement under debate is to be devoted (1) to actual relief of famine when it occurred, (2) to measures calculated to prevent the recurrence of famine, and (3) to facilitate measures of relief on its occurrence. Let us see how the purposes of that Fund were described at its creation.

"Now, looking back upon the history of this Fund, from the records available to me, it appears that the question of organising some system in the direction of preparing against famine was first taken up by Lord Northbrook.

"Sir John Strachey, speaking in connection with his Financial Statement for 1877-78 on the 27th December, 1877, said:—

'He (Lord Northbrook) determined that to enable the State to meet the serious obligation of preventing and relieving famine, it was necessary to secure in prosperous times a substantial surplus of revenue over expenditure in addition to that necessary margin which a prudent administration demands for the ordinary requirements of the State. Due provision would thus be made for meeting occasional expenditure upon famine. He urged that if this surplus were devoted to the reduction of debt or to preventing the increase of debt for the construction of reproductive public works in years of ordinary prosperity, there would be no objection to the public expenditure exceeding the public revenue in occasional years of adversity, so that we might then without objection meet the charges on account of famine from borrowed funds, to the full extent to which our surplus had permitted the discharge of debt or prevented its increase.'

"The policy herein indicated may be put thus:—

1. Secure a substantial surplus in prosperous times.
2. Make out of it due provision to give actual famine relief.
3. Devote the rest of it to (1) reduction of debt, (2) to prevent increase of debt, and (3) to the construction of *reproductive* public works.

4. Thus enable Government at any given time to borrow funds to meet the charges on account of famine, when they actually come on.

"That embryonic policy had to be essentially modified, proclaimed and strengthened with clear pledges, when Lord *Lytton* came face to face with the ravages of the dread spectre! In his minute, in his speeches from his place in the Council, and in his replies to public bodies, he made his meaning abundantly clear that *every year* an allotment of *a crore and half of rupees* should be *religiously* set apart, and that, among other things, the sums, so to be set apart, should be *actually* and *loyally* invested in a particular class of public works which he indicated pretty intelligibly, irrespective of other works, generically similar perhaps, but admittedly different in character.

"Here are his chief utterances on the subject :—

'Well, then, I think I am entitled to point out to the Council that we are not now fairly open to this customary criticism. We do not speak without having acted; and we promised nothing which we have not, after long and anxious consideration, provided ourselves with the means of performing. I must have very imperfectly explained myself thus far, if I have failed to make it clearly understood that I am not now speaking of what we ought to do or would do, to insure this country against the worst effects of future famine, had we only the means of doing it; but of what we can do, and will do with the means already provided for in the measures now before the Council. I do not mean to say that the construction of such an extensive system of local railroads and irrigation works as we propose to undertake, will not be the gradual task of many years. But I *do* mean to say that in the manner and on the principle already explained we are now providing for the prompt commencement and uninterrupted continuation of this great and necessary task.

'As the representative of the Sovereign of India, I regret that such language should have been held to me by you.....The sole purpose of the additional taxation, you complain of, was the preservation of the lives of the people of India from the effects of famine..... Whatever may be the faults or shortcomings of this Government, its action in the matter to which your address makes reference was dictated by the sincerest and most anxious desire to give the people of India the greatest protection which could practically be provided for them against the calamities of future famine. To insinuate the contrary is to insinuate a calumny.'

"The passage below sets forth the engagements of the Government in Lord Lytton's own words :—

'*1st.*—To apply funds from the surplus revenues at the rate of 1½ millions sterling per annum in such a manner as to create what shall be, in fact, an Insurance Fund, from which future expenditure for famine relief can be provided for without adding to the permanent burdens on the revenues.

"*2nd.*—To bring about this result, either by the direct discharge of debt in times of prosperity or by investments of surplus revenue in productive public works under conditions that shall ensure their being really remunerative, and that they shall at the same time supply to the country the best material protection against famine.

"*3rd.*—To comply with this condition carrying out in all the provinces of India as speedily as our financial position and other economical considerations will admit all approved extensions of irrigation, and a complete system of cheap railroads, primarily and specially adapted to a slow goods traffic.

"*4th.*—To secure to the utmost the finance basis of this undertaking by assigning to, and concentrating upon, the Local Governments the financial responsibility and administrative powers necessary for the designing, commencement, completion and maintenance, within their respective provinces, of such a system of works as shall fulfil the requirements of the case for each of them.

"*5th.*—To arrive at this result by giving to these Local Governments the maximum of pecuniary interest and profit in the cheap construction and successful management of all provincial public works by reducing to a minimum interference on the part of the Government of India in the administration of such works, and by not permitting such interference to extend beyond what is necessary to ensure regularity and harmony of action or protection to the general financial interests of the State.'

"Placed side by side, there is a very striking, and I shall add a very startling, divergence between the two. One cannot help reading between the lines and noting with profound sorrow an ill-concealed disposition to starve this Fund in order to meet the cost of measures which are more or less dictated by the

general obligation the Government is under to meet commercial or strategic needs, and to develop the resources of the country and which it is bound to undertake for their own sakes and quite apart from any relation to famines. These, for purposes of distinction and easy reference, I shall call non-famine public works, including both large irrigation measures and railway constructions. The phrase 'measures calculated to prevent the recurrence of famine and the phrase 'to facilitate measures of relief on its occurrence,' which are used by the Hon'ble Finance Minister, are far too elastic and far too vague. Given a certain amount of skill and ingenuity, I do not know what measures could not be easily lugged into these categories, irrespective of all specifications in the past. Every railway construction by affording easy transit for food-grains, and every work of irrigation by serving the same purpose and rendering the further service of watering more extended areas of cultivated land, must to some extent help to check famine and might any day be declared to come under the latter of these words. What is the permanent differentia? Is it to be the will and pleasure of the holders of the portfolio for the time being? I do wish that the Hon'ble Finance Minister had more unequivocally enunciated his restricted meaning and shewn the amount of famine public works already accomplished and yet remaining to be accomplished out of them by means of a map or sketch indicating the former and the latter in different colours. In paragraph 4 of the Financial Statement it is stated that a total sum of Rx. 1,815,724 has been spent upon the construction of irrigation works out of the Famine Insurance Grant within these fifteen years. The first thing that strikes one is to ask why is there no table or explanation as to how this Fund had been dealt with from the date of its creation, namely, from 1878 down to 1881-82?

The Hon'ble SIR JAMES WESTLAND: "Government publishes this every year. The whole thing is available to the public whenever they like to ask for it."

The Hon'ble ANANDA CHARLU, RAI BAHADUR, said he was not aware of the existence of any such return or explanation.

THE HON'BLE SIR JAMES WESTLAND: "I think, before that accusation against the Government passes, I should like to hand the Hon'ble Member a copy of the return in question."

The Hon'ble ANANDA CHARLU, RAI BAHADUR: "I only want the assurance. That is sufficient. Is it that, during that interval, the entire Fund was devoted to famine relief and famine works? Or is it that its very existence was all these years ignored? I crave a solution of these doubts. The next thing that occurs to me is to ask for information whether the sum named represents the cost of the *entire* irrigation work constructed during that period or of a *portion only*, *i.e.*, the portion debitable against the Famine Insurance Fund? A misgiving is created by the fact that whereas, as regards the railway construction, a distinction in this respect is shewn in the table, no such thing is done as regards the irrigation works. If only a portion, I shall feel thankful if information is afforded as to the location and the cost of the rest. A natural misgiving arises from the very phraseology employed by the Hon'ble Finance Minister. In describing the source out of which the amount of their cost was taken he does not content himself with saying that they came 'out of the Famine Insurance.' But he hastens to add, '*i.e.*, out of our revenue.' Are these identical expressions? Or is it an attempt to be true to the ear but not to the hope?

"Next as to what is said on the railway construction. I have to ask about this also, for information as to the period prior to 1881-82, such as I have desired as regards irrigation works. A further point requires clearing up, namely, a specification of the railway construction already completed, as distinguished from those which yet remain to be taken up, and why so. It would have been a considerable help if it had occurred to the Hon'ble Finance Minister to indicate this also, in a map or sketch as an annexure to the Finan-

cial Statement. Such maps or sketches would also be valuable as guides in respect of future operations in the direction of safeguarding famines, and ensuring unintermittent attention to famine public works. Now it is quite possible to seize and carry away, year after year, by the right (*i.e.*, the wrong) hand and for non-famine public works what are annually doled out to famine public works by the left hand.

"If the humane policy, which dictated a yearly allotment of a crore and a half and a utilisation of it in famine public works, has been religiously given effect to all these years, we should have to-day famine irrigation work and famine railway construction worth at least a sum of seven crores of rupees over and above what now exists. In the interests of the eighty per cent. of the people, *i.e.*, in the interests of the entire body of agriculturist population in the country, I am bound to say that these seven crores and odd should be put back into the coffers, reserved for actual famine relief and for the completion of the famine public works, as absolutely needful for supplying them with the necessaries of life, if the word *restoration*, which is so freely and so frequently diffuse throughout the Budget, is to receive its full meaning. The so-called restoration of famine insurance in the present Budget is to me, therefore, not a matter of such jubilation as it evidently has been to others whose eyes do not fall on the toiling millions of the country and who, somewhat like the barber in a Tamil story, have in their carpet-bags a small ingot of gold and will hence say that, in this land, there is none so poor as not to possess a nugget of that precious metal. I shall be deeply grateful if I am at least told whether the Fund is to be ever recouped, according to this measure of justice, if not in the immediate present. I shall also receive with an equal gratitude a further assurance as to whether the policy, now meant to be recognised and carried out, is the policy as laid down by Lord Lytton's Government, and whether annual contributions would be, hereafter at least, loyally made, to make amends for the past neglect of years; for it is surely no satisfaction to be referred, year after year, to works such as are mentioned in paragraph 4 of the Financial Statement.

"I am indeed perfectly certain that whether the Famine Insurance Fund existed or not the Government would laudably rise to the exigencies of famines whenever and on whatever scale they might occur, and that it would generously and humanely grapple with them at all cost. But that is a species of obligation quite distinct from the inviolable obligation to put back the consecrated money where it was or where it should have been, or shew it in the form of famine public works already completed and in a working order. The very fact that, side by side with the general obligation to fight famines, a special reserve under the name of Famine Insurance *Fund* was set on foot shows that contributions to it were meant to be regularly made and uninterruptedly utilised for the intended purpose, without division and without being subject to the liability to lapse, at the end of each year, into the common exchequer. It must have been so set apart, as is easy to realise, for the very reason that, when famines do come, the Government may not have to strain its giant strength and put forth its uttermost efforts to cope with them, as it had to do, to its bitter experience, during the famine of 1876 and 1877, chiefly in the Presidency of Madras; for, with all that the Government could do on that occasion, the public and the British generosity had to be appealed to, with all the weight and prestige of no less than the Duke of Buckingham, the then Governor of Madras. Notwithstanding all this stupendous effort, no less than six millions died by the famine of those years. It was wisely assumed that such unstinted and princely bounty, on the part of the British public in particular, could not always be counted upon and therefore a *reserve of a crore and half of rupees under the name of Famine Insurance Fund* was brought into being, in the first instance, to be augmented by a crore and a half of rupees every succeeding year, but to remain untouched except for giving *actual* relief in times of famine and except for carrying out famine public works, *i.e.*, that particular class of works which would directly contribute to ward off occurences of great scarcity. A new and special tax—the license-tax—was imposed for the very purpose of making up and enlarging that Fund. The proceeds of that tax ought to have been, as was pledged religiously, placed to the credit of the Famine Insurance Fund, and when the income-tax has replaced that tax an equal amount out of the collections under the

new impost should have been put into the coffers of that Fund. 'Revive the Famine Insurance Fund or remit the taxation initiated for the purpose' demanded the Hon'ble Mr. Playfair last year. My demand this year is somewhat different, namely, do not remit the taxation initiated for that purpose, but restore the Famine Insurance Fund loyally to what it should and would have been if it had not been meddled with.

"It may be said, and it has been said, that miles of famine railroads have been constructed and numerous works of famine irrigation have been completed. Quite true. But it is beside the question. It would indeed be an answer to a charge of absolute non-performance. But how is it an argument why the rest of the promise has remained unredeemed by action? If it be said that there is very little yet left to be done in this direction, then the burden of the tax on the poorer classes must *pro tanto* go. Let the taxable minimum of the income-tax be proportionately raised or let reduction of salt-tax follow, or let a stop be put to the process of squeezing his paltry remnant from the raiyat by so-called re-surveys and re-settlements, the object of which has, till now, been enhancement and nothing but enhancement—such as the Presidency of Madras is, with one voice, lamenting and crying against. This and the like of this are perhaps the basis for the Hon'ble Finance Minister's complacent remarks in paragraph 65: 'Our prospects are now very much more hopeful. Our revenues are advancing.'

"I cannot pass away from this subject without reminding ourselves of certain very appropriate words of Lord Lytton. Here they are:—

'The current claims upon the activities and resources of the Government of India are so numerous, so pressing, so important, official forces and imperial funds so necessarily limited, that when once the daily, hourly strain of a great famine has been removed from a wearied administration and impoverished treasury, its fearful warnings are soon forgotten; its disquieting ghosts are quickly exorcised by the conventional declaration of some unexceptionable principle, its bitter memories decently interred beneath the dull *hic jacet* of a blue-book, and there, for all practical purposes, is an end of the matter.'

"I next proceed to the pronouncement in regard to Chitral. The Honb'le Finance Minister has very properly said that the Financial Statement is not the place in which to defend the policy relating to Chitral. I say, with greater propriety of language, that it is not of any avail (and therefore not fitting) that it should be discussed in this Council. But one single remark has, however, to be made in this connection, namely, that, owing to the accident of a recent change of Ministry in Great Britain, five untoward results to India have ensued, namely, (1) the disappearance of a *good slice* of her previous income, (2) the permanent addition to her already over-burdened expenditure by reason of retaining Chitral, (3) the postponement of a performance of a long-standing and deliberate promise to relieve her suffering poor by a reduction of the salt-tax, (4) by a fresh burden in the shape of taxation on the coarser goods which alone are available to the poor in the land, and (5) a burden of 15 lakhs a year in the shape of interest on the loan of four crores that has been announced to be in immediate contemplation. This is matter, perhaps, for serious reflection on the part of those who still cling to the fond belief that Indian affairs are outside the sphere of the party politics of Great Britain and Ireland.

"I proceed and I note that the entire income derived from the whole of the irrigation works and railway construction is coolly put down as available for the general purposes of the Imperial administration. This seems to militate against what was laid down by Lord Lytton in respect of the profits of true famine public works. Let me repeat his words in this context:—

'To arrive at this result by giving to these Local Governments the maximum of pecuniary interest and profit in the cheap construction and successful management of all Provincial public works by reducing to a minimum interference on the part of the Government of India in the administration of such works, and by not permitting such interference to extend beyond what is necessary to ensure regularity and harmony to action of protection to the general financial interests of the State.'

"I pass on to exchange and opium. I heartily congratulate the Hon'ble Finance Minister on the cautious data on which he has based the Budget so

far as the exchange and the opium revenue are concerned, and on the hopeful prospect of further betterment which he asks us to cherish regarding these shifting causes of Indian misfortune. Having regard to that prospect, and believing with others that the rate of exchange might not fall below 14*d.*, I should receive with gratitude—not only I myself but the entire country would so receive—an assurance from the Government that, so soon as the exchange or opium rendered it possible, the reduction of the salt-tax and the raising of the taxable minimum of the income-tax would engage its very first attention.

"As regards the attitude of the Central with the Provincial Governments, it is a welcome news that repayments will be made to them of the contributions taken from them in 1894-95. But I must enter a solemn protest against the most extraordinary theory of the mutual relations between the Central and the Provincial Governments, developed and dwelt upon in paragraphs 61 to 64 of the Financial Statement.

"It is, to my mind, subversive of all accepted notions of fairness and propriety. It reduces the Governors of Provinces into gardeners for a far-off absentee landlord and the tillers of soil into his serfs. Just as a gardener cannot touch or call one bunch in the vineyard as his own, so the Governors are to be merely guards and sentinels to watch and see that no one takes any part of the outturn. Just as the serf cannot, *as of right*, look to any good coming to him from the crop which he exerts himself to raise, the people themselves cannot, *as of right*, expect that the share of the fruits of their labour, which they hand over to their Governors, might in the first instance be applied towards their well-being. This is as cruel as it is amazing and unfair. It is difficult to say which to admire—the temerity or the heartlessness of the pronouncement. Every body has been saying to himself that, at the approaching revision of the Provincial Contracts, there ought to be an insistance upon a larger retention by the Provincial Administrations of the revenues they raise. The further idea has also been fondly cherished that, on that coming occasion, Provincial Administrations should ask to be permitted to keep to themselves such sums as they may have by economy saved and allowed to accumulate for large and costly works of provincial utility, in the way of reliefs to municipalities and district boards where the revenues of these latter are not equal to them. It is indeed an irony of fate that, amid all this hope, the bolt should have fallen blasting all that hope. I sincerely wish that this theory—perilous to the welfare of the provinces and perilous to the responsibility and motives to economy on the part of the Provincial Governors as well—will not pass beyond the stage of mere enunciation.

"This Budget is indeed an admirable feat. I can only describe it as an inverted cone, with its apex in the shifting sands of exchange, with all the weight of this year's Indian prosperity mainly poised on that apex. That unstable foundation might any day discover sudden signs of giving way; and to prop up our inverted cone we might have to seize upon every thing ready to hand, even to the extent of further straitening the poor man's food and clothing and his small savings. It behoves us, therefore, to see how to rehabilitate our revenue and to place it on a sound, firm and solid basis. There is but one alternative, and it is but to have the word 'retrenchment' largely writ and put in practice measures tending towards it. A mere cheese-paring policy will never do. The insatiate and never-ceasing demands of our forward policy must be attacked and overcome. Our ever-growing home charges must be considerably beaten down.

"If these are impracticable, then the sole remedy is for Great Britain to come out with a substantial contribution to alleviate India's burden. The colossal and costly schemes of the forward policy are mainly to maintain the British prestige—say what others may to the contrary—and this measure of bare justice is rightly due from the dominant and flourishing to the subject and prostrate country. Without these righteous achievements, to endeavour to promote the happiness or contentment of the people and, in a true sense, to make the two ends meet is—to use a homely simile—to work at the pump and leave the leak open.

"Within these ten years this forward policy has cost us—apart from the wars themselves—an aggregate sum of nearly *seventy crores* and has added to

our permanent expenditure no less a sum than *six crores per annum*; and as for the home charges they have amounted up to over twenty-five crores of rupees. It is to meet drains such as these that the poor man's food and salt are reduced to famine rations, and the hand of the tax-gatherer is laid even on his coarse and scanty raiment.

"This has been said, and said times out of number. The non-officials have said it, and they have been laughed at for their pains. But two predecessors of the Finance Minister of to-day have also said it, with a full knowledge of the arcana of the Indian finance. They have, with the trammels of office, thrown away the dead weight of reticence which sat heavily on their conscience while they held the official portfolio. They have discharged their conscience by boldly denouncing these as the true enemies of India. They, too, have been relegated to the limbo of disdain and scorn. This is the most unspeakable of India's misfortunes."

The Hon'ble MR. CADELL said:—"My Lord, no department is more interested in the success of the Hon'ble Member's financial administration than that which I have the honour to represent, and no one can congratulate him more heartily than I do on the financial prosperity which his skilful administration has been instrumental in establishing, and which among other advantages which it has brought to the country has rendered possible increased effort with respect to public works.

"Notwithstanding what has just been said by the Hon'ble Mr. Ananda Charlu, I think that I am justified in making the statement that so much has been done in former years to secure and improve cultivation in different parts of India, by extensive irrigation works, that there is now comparatively little left to be done on a large scale in that direction, and at all events the irrigation works in hand or sanctioned do not require for their completion an expenditure greatly exceeding 4 crores of rupees to be spread over a number of years.

"The Hon'ble Mr. Ananda Charlu may be surprised to hear that the demand for strictly protective works is a very small one, and does not exceed 4 to 5 lakhs annually for the help of India. A further sum of 10 or 12 lakhs may be necessary for Burma, but as most of the works required there are likely to be remunerative they would not come under the head of 'Protective.'

"In this way financial interest with respect to public works is largely concentrated upon the operations of our railway engineers, whose possible requirements are practically unlimited, and whose immediate requirements have in the Budget under discussion been very liberally provided for. Even the figures given at page 14 of the Financial Statement show very substantial and increasing provision for the wants of the country with respect to railways, and the figures there given by no means represent the whole of the expenditure on railway extension in India, which is due either directly or indirectly to the action of Government, for, as is noticed in the Statement, there are large items of expenditure which do not pass through the Government accounts, and our expectation is that, while in the year which is just closing a sum of 6¼ crores of rupees will have been usefully spent on railways, in the year which is about to begin, no less a sum than 13¼ crores will be so spent, and it is hoped that the Hon'ble Member's provision for the further development of the railway communications of India will be on a not greatly restricted scale in future years.

"But perhaps it will be well that I should leave financial details alone, and that I should restrict myself to the results which this Department has recently achieved or hopes to achieve, and for this purpose a convenient period to consider will be that of your Excellency's administration. When the first complete financial year of that administration began, there were 18,503 finished miles of railway in India; in 1894-95 360 miles were added, and it is hoped that in the year which is about to close 1,009 miles more will now have been completed, and, if it be possible to carry out the programme which has been drawn up, there will have been added, during the period of your Excellency's administration, no less than 4,400 miles of railway, which would constitute an addition of 24 per cent. to the mileage of 1893-94.

'But even the completion of this programme in whatever direction it may be finally altered will leave much work already considered and approved untouched. Important main lines, links which are most desirable if not absolutely necessary, and numerous minor lines, must be omitted, and there will remain very ample room for the expansion of railways in all directions, more especially in such countries as Assam and Burma.

"The most noteworthy events in the history of the Public Works Department during the year which is drawing to a close have been the opening of the Periyar Irrigation work, the brilliant conception and the practical working out of which we owe to Colonel Pennycuick, and the completion of the Mushkaf-Bolan Railway, a work presenting many difficulties which have been overcome by the skill and perseverance of Messrs. Ramsay and Hodson and their staff.

"It is, however, in the addition to our railway undertakings that the year 1895-96 has been most conspicuous. First of all in magnitude and in importance to Calcutta and Madras are the connections now arranged for at a cost of 7½ crores of rupees for linking Calcutta with Cuttack and Madras with Bezvada, which will complete the direct line of railway communication between the two Presidency-towns, and will be most beneficial to the trade of both.

"Another important line between Rohri and Kotri to the east of the Indus is approaching completion, and the projected line of the Southern Punjab Railway from Bhatinda to near Bhawalpur will form an important complement to it, when the bridge over the Indus is finished. The Saugor-Katni Railway forms another desirable link which will render the coal-fields of the Central Provinces accessible to the railway system and Rajputana, and is being arranged for by the Indian Midland Railway.

"In the North-Western Provinces as in certain other parts of India the extension of the railway system of the country has been accelerated by the prevailing scarcity, which rendered the commencement of work desirable, on the extension from Rai Bareli to Benares and on the Bengal and North-Western system.

"In Burma work on the Mu Valley Railway has been progressing steadily an extension has been sanctioned from Mogaung to the river at Myitkina, and the construction of an important line from Mandalay to the Salween river at a cost of 225 lakhs has been authorized and has been begun.

"In all directions there has been marked progress and the foundation has been laid of still more important progress in the near future, and I think it may be said that the Public Works Department of the Government of India, until recently presided over by Sir Charles Pritchard, is taking full advantage of the opportunities which have been afforded by the great improvement in the financial condition of the country which has taken place.

"The Hon'ble Mr. Playfair expressed the hope that more liberal encouragement might in future be given to the construction of feeder railways. I do not think that one who is only temporarily connected with the Government should be its exponent on questions of permanent policy, but in case your Excellency does not discuss this question, I may say that new rules on the subject are under consideration, and will shortly be issued with the effect, I trust, of encouraging private enterprise in this very useful direction.

"The Hon'ble Rao Sahib Balwant Rao Bhuskute has made a statement to the effect that 'protective railways constitute the most important head of expenditure. Most of them are constructed for protecting the North-Western frontier.' As a matter of fact, the only two railways which bear this character are the Mushkaf-Bolan and the Mari-Attock Railways, for the Kotri-Rohri chord line lies to the east of the Indus, and although it will no doubt be used for military purposes when required, it was principally demanded by the commercial community of Karachi in the interests of that port. So far from most of the railways being on the North-West frontier, most of them, it so happens, are on the Eastern side of India.

"The Hon'ble Mr. Rees has borne testimony to the great advantage to the country which is likely to follow the construction of a continuous line of railway from Madras to Calcutta, and there is little doubt that it will serve

the interests of Calcutta and Madras, as much as it will tend to the advantage of the districts traversed and the convenience of the people.

"The chief assailant of the administration of the Government in past times and in the budget arrangements of the present period has been the Hon'ble Member on my right, Mr. Ananda Charlu, who seems to think that protective works have been systematically neglected, and that the administration of the country has been careless of the interests of the people. The Hon'ble Member in charge of the Finance Department will no doubt reply to the Hon'ble Member on the whole question, but I think it may be of use if I describe what within my personal observation has been done to protect the only province, as far as I know in the territories under immediate administration of your Excellency's Government, in which upon any extensive scale relief operations have at the present time been found to be necessary. I happened to be in charge of one of the Bundelkhand districts when famine last threatened in 1877. At that time there was no railway in the province, and if the supply of food had proved insufficient to meet the wants not only of the population of our districts, but of adjoining Native States, there might have been serious difficulty in pouring supplies into a country provided with few metalled roads, and with unmetalled roads peculiarly liable to be rendered impassable if rain had fallen at a time which was too late for the purposes of agriculture. Now the Province is traversed to the west by the main line of the Indian Midland Railway, while to the east a long and wholly unremunerative broad gauge branch passes through three out of the four districts and brings every village in within 50 miles or less of the railway. Both these branches of the Indian Midland Railway have been constructed from the Famine Grant, from which also the annual loss is met. But this is not all that has been done to safeguard the people of Bundelkhand from the worst terrors of drought, for although there was great difference of opinion as to whether it was desirable to construct a canal in a country in which black soils predominate on the level plain, Government decided that the experiment should be tried, and undertook the construction of the Betwa Canal at the cost of some 40 lakhs of rupees. This work has never paid, and has not so far been so beneficial to the country as to justify the construction of the other Bundelkhand Canal which was at one time contemplated. The benefit to the country of the Betwa Canal during a period of scarcity is now being tested. I am certainly not one of those to use words used by the Hon'ble Member 'whose eyes do not fall upon the toiling millions of the country'. I have year after year spent many months each season in contact with the agricultural community, in their villages and fields, and I can certainly say that I have never noticed more especially in the districts which I have mentioned, the harsh and unsympathetic attitude of which the Hon'ble Member complains. Enhancements of land-revenue are only looked for where the circumstances of the country fully justify them, and I am sure that the Hon'ble Member on my left (Mr. Woodburn) will bear me out in saying there is no pressure on the part of Government in that direction. I can for my own part assert that when in one of these very Bundelkhand districts to which I have referred large and important reductions in assessment were held to be necessary, they were granted with the fullest and readiest approval of every authority to which they were submitted. The Hon'ble Member's charges are general, and a mere general assertion to the contrary would have been of little use. I have traversed them by stating what has been done in a single tract of country selected for the sole reason that it is happily the only portion of British territory with which I am acquainted in which during the current year relief operations on a considerable scale have been found to be necessary."

The Hon'ble MR. WOODBURN said:—"I had no intention of intervening in this debate, but as I have been appealed to by my hon'ble friend Mr. Cadell, I may at once confirm what he has said as to the attitude of the Government of India and the Local Governments in the matter of the assessment of land-revenue. I listened with some surprise to the remarks made by the Hon'ble Mr. Bhuskute on the condition of the soil, and of the people who live on

it. In the part of the country with which he is most familiar I have never heard or seen any evidence of any sensible depreciation of the soil within recent times; nor have I heard that crops have as a natural consequence begun to yield diminishing returns. But what I have heard and seen is a great enhancement within the last quarter of a century of the rents which are received by the landlords. No one would be more ready than my hon'ble friend in calmer moments to admit that in that great increase of the landlord's receipts, the State, which supplies protection and the assistance of many services, is entitled to have a place.

"There is one matter in which Mr. Cadell has taken from my lips the only other remark which has been suggested to me by the course of this discussion. I was surprised to hear my hon'ble friend Rai Ananda Charlu speak with such disapproval of the expenditure from the Famine Fund and, indeed, from the general revenues. No one who has seen the influence of railways in tracts where the harvests are short can doubt that almost every railway is in fact a famine protection railway. In Saugor, where two years ago there was sharp scarcity, the railway brought such supplies of food and grain that prices never rose to what used to be known as famine prices. Similarly, in the North-West Provinces in the present year the Lieutenant-Governor has just presented to your Excellency a statement in regard to the scarcity there which is illustrated by those maps that Rai Ananda Charlu would like to see presented to this Council. Each one of these districts is traversed by a railway, and the consequence is that, though there may be much suffering and poverty, the prices will never be abnormal, and it ought to be possible that there shall be no death from starvation."

The Hon'ble LIEUTENANT-GENERAL SIR HENRY BRACKENBURY said:—"My Lord, I am grateful to my hon'ble colleagues in charge of the Public Works and Home Departments for having intervened between the speech of the Hon'ble Mr. Ananda Charlu and myself, for I feel that it is always a somewhat ungrateful task to bring a debate down from those high, if somewhat misty and vague, regions of Oriental metaphor to which this debate was raised by the Hon'ble Member, to those earthly, but I trust solid and substantial, regions of fact in which I shall have to ask the Council to follow me for I fear some considerable length of time. My hon'ble friend Mr. Playfair, with his usual courtesy, gave me notice of his intention to invite me to explain to this Council some matters connected with military expenditure, and especially the point in connection with the Chitral outposts. I have now to thank him also for his most kindly mention of myself, and for his statement that my efforts in former years to explain in this Council in as clear a manner as possible the facts in regard to our military expenditure in India have given satisfaction to the commercial classes in India; and I trust that in the statement I shall now make I shall be able satisfactorily to account to him and to this Council for much upon which it is impossible for them, without such statements being made in Council by the Member in charge of the Military Department, to have any real knowledge.

"To the best of my recollection I have never heard the Royal Indian Marine mentioned in this Council, but I am responsible to your Excellency for the estimates of that Service, and I should like to say a few words about them. The Royal Indian Marine is a very important service. It contains more than fifty vessels of various kinds. Of these, two armour-plated turret vessels, two gun-boats, and seven first class torpedo boats, constituting Her Majesty's ships and vessels for the naval defence of India, are in charge of the Royal Navy, and are partly officered by officers of the Royal Indian Marine; four are troopships, which carry out the whole of the Indian Trooping Service between India and Burma, and between the various ports on our coasts, occasionally proceeding to England or elsewhere out of Indian waters; one is used as a despatch vessel in the Persian Gulf, while the remainder are employed in various services, including the Marine Survey and the conveyance of troops by river in Burma and elsewhere.

"This service provides the Port Officers for all the chief ports in India, and the officers for Marine Transport Service and for the Marine Survey. It

possesses dockyards at Bombay, Kidderpore and elsewhere, where repairs are carried on for the Royal Navy and for its own ships, where vessels of small size are built, and where services of construction and repair are carried out for Local Governments at actual cost price. Its net budget estimate for the year now closing was 16⅓ lakhs. The actual expenditure has been about 14 lakhs, showing a saving of 2⅓ lakhs. The net estimates for the coming year are Rs. 1,36,000 below the estimates for 1895-96.

"I will now proceed to deal with military expenditure, and in speaking on this subject, I shall always deal with net figures. I have great satisfaction in bringing to notice that the net expenditure in the Indian estimates for 1894-95, the accounts of which year are now completed, was 6⅓ lakhs below the budget estimates for that year, although there was an expenditure of 6¾ lakhs on account of the Chitral Expedition in that year for which no provision had been made in the estimates. This is, I believe, the first time for many years that the military expenditure has been within the Indian budget estimates. The Military Works expenditure, the Special Defence expenditure, and the Home expenditure for 1894-95 were all also well within the estimates.

"I now pass to the current year. There are four separate items to be considered :—

1.—The Home Military Budget Estimates.

2.—The Indian Military Budget Estimates.

3.—The Military Works Estimates (India and Home taken together).

4.—Special Defence Estimates (India and Home taken together).

"In the Home estimates there has been a saving of 25 lakhs in expenditure as compared with the estimates. In India there has been an excess over estimates of 108½ lakhs. In the Military Works estimates the expenditure just comes up to the estimates; and in Special Defence estimates there has been a saving of 4 lakhs. Taking the whole of these several estimates together the net excess of expenditure over estimates has been 79⅓ lakhs.

"There has been expenditure on account of the Chitral Expedition in the Home estimates to the extent of 3 lakhs, in the Indian estimates of 165 lakhs, and in the Military Works estimates of 5⅓ lakhs, so that the total expenditure upon the Chitral Relief Expedition during the year has been 173⅓ lakhs. A sum of 15 lakhs only was provided in the estimates; as stated in the Financial Statement of last year, not for an expedition, but for preliminary preparations in case an expedition should become necessary. We have thus an expenditure of 158½ lakhs over what was provided in estimates for preparations for the Chitral Expedition, while the actual expenditure over estimates has been only 79⅓ lakhs. Thus, but for the Chitral Expedition, the whole of the military expenditure during the current year would have been 79 lakhs below the estimates for the current year.

"The savings in the Home estimates are largely due to causes over which the Government of India has no control. But in those portions of the Home estimates over which the Government of India has control, that is to say, the supply of stores from England, the expenditure has been kept well within the estimates.

"The savings in the Indian budget estimates which have reduced the net excess from 165 lakhs due to the Chitral Expedition to 108½ lakhs are due to various causes. Seventeen lakhs of these savings are due to fall in food prices below the estimated rate; 5⅓ lakhs are due to diminution in exchange compensation allowance owing to improvement in exchange; 7 lakhs are due to savings on account of conveyance of troops and stores; 5⅓ lakhs to savings in Commissariat establishments and miscellaneous Commissariat expenditure; 1¾ lakhs to savings in hot weather establishments and barrack supplies; ¾ lakh to saving in sea transport charges; 7⅓ lakhs to saving in Ordnance establishments and expenditure; ¾ lakh to savings in Remount Depôt charges. All these savings show careful and economical management by heads of departments, upon whom the Government of India pressed the necessity for watching and keeping down expenditure, and to whom, in my opinion, great thanks are due for their efforts to assist the Government and tax-payers in this direction.

"The first great event of the year from the military point of view has been the introduction on the 1st April of the new scheme under which the Presidential Army system was abolished, the control of the armies of Madras and Bombay, hitherto vested in the Governments of those presidencies, was transferred to the Government of India, and their supreme command from the Commanders-in-Chief in those presidencies to the Commander-in-Chief in India. During the current financial year there has been but one army in India, under the Commander-in-Chief in India, and under the Government of India. The system has worked, I believe I may say, without a hitch of any importance, a result which I believe to be due in the first place to the determination of all concerned, including the Lieutenant-Generals Commanding in Madras and Bombay, to make the new system work smoothly; and in the second place to the deliberation with which every detail consequent upon the change was considered previous to the change being introduced. The Military Secretariats of the Governments of Madras and Bombay were abolished from the 1st April, and a considerable saving ensued to the civil estimates. The Military Department of the Government of India made no addition to its higher staff in consequence of the increase of work, and only a small addition to its clerical establishment. Large reductions have been effected in the staff at the head-quarters of the commands in Madras and Bombay, some reductions have been made in the head-quarters staff of the Commander-in-Chief in India, and further reductions are about to be made on the 1st of April next. But it must be remembered in considering the reductions that can be made at army head-quarters that, although the Commander-in-Chief has got rid of the direct command of the armies of the Punjab and Bengal, he has had thrown upon himself and his staff the supreme command of the armies in Madras and Bombay. The establishments of the two new commands created in the Punjab and Bengal have been kept within most economical limits. Further experience is necessary before the establishments of the four commands and of army head-quarters can be distinctly and finally fixed. But I believe they will be kept, taken as a whole, within the amount sanctioned by the Secretary of State when the scheme was originally introduced; and I can say with confidence that no further increase on account of this change will be required in the office establishment of the Military Department of the Government of India.

"The second great event of the year from the military point of view has been the Chitral Expedition. On the morning of the 7th of March last year, news reached your Excellency's Government leading it to believe that it might be absolutely necessary to send an expedition by way of Swat and Bajaur to relieve the beleaguered garrison of Chitral. The Commander-in-Chief was absent in Assam. That afternoon I held an interview with the representative of the Quartermaster-General's Department present in Calcutta, and the Commissary General-in-Chief. The latest report of the Intelligence Department upon the steps to be taken for such an expedition was laid before me, and the Commissary General-in-Chief stated his views. It was clear that owing to our mobilisation arrangements the troops necessary could be assembled on the frontier in a very short time, and that whatever delay might occur in the despatch of the expedition across the frontier would be due to the time required for collecting transport. I laid certain proposals for the collection of transport before your Excellency, and you assembled a Council the same evening which decided that these preparations should be proceeded with. At midnight on the 7th I personally gave the orders to the Commissary-General-in-Chief, and they were telegraphed off the same night, the Commander-in-Chief being informed. The Commander-in-Chief returned to Calcutta on the 11th, and at the Council held on the 14th March it was decided, on His Excellency's recommendation, to issue instructions for the mobilisation of the First Division of the field army, with certain modifications due to the special nature of the country between our frontier and Chitral. It was then still hoped that an expedition might be avoided, but before the end of March that hope was dead; and on the 1st of April, the day named in your Excellency's ultimatum to Umra Khan, within eighteen days from the order for mobilisation, a force of upwards of 15,000 men advanced across the frontier. The despatch of that force under the command of Sir Robert Low, its complete success in the storming of that most difficult

position, the Malakand Pass, and its rapid advance into Dir, enabled Colonel Kelly with a small force of Pioneers, Kashmir Imperial Service Troops and native levies, to effect the relief of the garrison of Chitral at a time when they were closely pressed by the enemy, and when their provisions would shortly have been exhausted.

"Your Excellency's Government in a General Order has expressed its sense of the services of Sir Robert Low and Colonel Kelly and the troops under their command, and Her Majesty's Government has endorsed those expressions. But there are some points in connection with that expedition to which I now wish to draw attention. But for the delay which occurred in the hire and purchase of transport at the outset, the expedition might have started sooner. This delay was in no way due to any neglect on the part of the Government or the military authorities. For a considerable time past the whole of the arrangements for the purchase of transport in the event of war had been matured. Civil officers of districts had taken steps to ascertain where and how the transport animals could best be procured, purchasing officers had been told off and placed in communication with the civil authorities. The delay was due in part to the time actually necessary for collecting the animals, in part to hesitation of owners to hire or sell them. Once it had started, the expedition was, I may safely assert, an unqualified success. Owing to the good medical arrangements the health of the troops was on the whole excellent. Fearing that owing to the necessity for rapidity of movement the troops might be obliged to put up with short rations for some time, permission to give compensation to the men in such cases was granted by Government; but such were the commissariat arrangements that in no single case were we called upon to grant that compensation. As soon as the first rush was over, and the line of communications was thoroughly established under the able direction of General Stedman, the staging system of transport was introduced throughout with the most admirable results. The condition of the Government transport at the end of the campaign was excellent. I believe it may safely be said that in no campaign ever yet conducted on the Indian frontier has there been so little loss in mule transport, or have the animals been in such good condition at the close of the campaign. As regards camels, the same can only to a certain extent be said. We were dependent entirely upon hired camels or upon camels purchased expressly for the campaign. The Government has no establishment of camels in peace, and has therefore no means of training officers and men to the care and supervision of those most delicate animals. The result is that the management and working of camels is not understood as it should be by our Transport Department. The hired camels did better in the campaign than the camels which we had purchased, the reason being that where camels were hired they were accompanied by the trained camel drivers of their owners, who looked after them in their masters' interests. But the number which could be hired was extremely small, and at the very outset the Government was obliged to have recourse to purchase. Having no trained establishment of drivers of its own it had to engage as transport drivers any men who were willing to take such service, and they were nearly all utterly inexperienced in the work. The result has been that while comparatively few camels actually died on the campaign, the camels purchased by Government have for the most part so broken down in health that it has been found impracticable to retain any but a very small number of them for future use. I shall state presently how the Government of India propose to remedy this great defect in our preparation for war in the future.

"The expedition has been invaluable to us as a test of the mobilisation arrangements for a whole division of the field army. It would be too much to say that those arrangements were found perfect. No army in the world, so far as I know, and I have been a great student of these matters, has ever found its mobilisation arrangements perfect, though all the skill and experience of its ablest experts has been brought to bear upon them. But with a few exceptions the mobilisation arrangements were found thoroughly sound, practical and easy to work. The campaign has also taught a great lesson to our military authorities in the working of the lines of communication of an army. And I feel confident that, in any future campaign, that experience will bear

most valuable fruit, both in the form of comfort and saving of suffering to the troops engaged, and in the form of reducing waste of transport. The campaign has also been of great value in testing the Imperial Service Troops. The Kashmir Imperial Service Troops showed very fine qualities, and the greatest advantage was derived from the admirably organised transport corps of the Maharajas of Gwalior and Jeypore, who placed those corps at our disposal. And I would take this opportunity of expressing my hope that further efforts may be made by the Native Rulers of India to organise such transport corps, which cannot fail to be of the greatest service in any considerable campaign. I wish to bring prominently to notice the fact that the charges for this campaign include the whole cost of an excellent metalled road from Hoti Mardan to the Swat River, of the bridging of that river and the Panjkora, and of the pack road which has been constructed from the Swat River to Chitral, as well as the construction of forts and barracks for the troops at the Malakand, at Chakdara and in Chitral. There, I may say in answer to the Hon'ble Mr. Playfair, will be no charge on account of these barracks and defences in the Special Defence estimates; and a small addition to the Military Works estimates of the coming year, which I shall presently mention, completes the provision for them.

"I now turn to the estimates for 1896-97. Here again I have to deal with the four estimates:—

1.—Home Budget Estimates.
2.—Indian Budget Estimates.
3.—Military Works Estimates.
4.—Special Defence Estimates.

"The Home budget estimates, as compared with the estimates of 1895-96, show a decrease of rather more than 5 lakhs of rupees. These estimates are so complicated by causes over which the Government of India has no control, such as payments to the War Office for services, and payments for stores, rising or falling according as the payments are made in one year or another, that I can say nothing about them, except this one simple fact that that portion of them over which the Government of India has control, namely, its demands for stores, shows a saving of 14 lakhs in the estimates of 1896-97 as compared with the similar demands for 1895-96. This is largely due to manufacture in this country having replaced manufacture at home. The Indian budget estimates for 1896-97 (I am dealing with net figures) show an increase of 39 lakhs over the budget estimates for 1895-96. The Military Works estimates show an increase of 6 lakhs over the estimates for 1895-96, and the Special Defence estimates show a decrease of 10 lakhs. So that the whole of the Military estimates for which the Government of India is responsible, taken together, show a net increase over those of the current year of only 21 lakhs of rupees.

"This Council is aware that a Royal Commission is now sitting in England to discuss the apportionment of Home charges between the mother country and India. We have sent home officers specially versed in this question, including Sir Edwin Collen and Captain Hext, to give evidence before that Commission, and we hope that its report may be in favour of giving some relief to India in the matter of the Home charges.

"The Indian budget estimates for 1896-97 include three great items of expenditure which have not appeared in former budget estimates. The first of these is an addition of 11 lakhs to the pay for the Native army. The estimates of the current year only include the extra pay given to the sepoy from 1st July last for eight months of the year; in next year's estimates twelve months have to be provided for, causing this increase of 11 lakhs. There is an item of 49½ lakhs for preparations for mobilisation, concerning which I shall speak presently; and the cost of the occupation of Chitral and the line of communications to it, and of the relief of troops which has to be carried out during the current year, adds 23 lakhs to the estimates. These three items amount to 83½ lakhs as against 39 lakhs of excess over last year's estimates, and the difference of 44½ lakhs may be roughly accounted for in the following way: Thirteen lakhs is on account of the Chitral Expedition, 15 lakhs having been provided in the current year's estimates, and only 2 lakhs being required for

arrear charges in the estimates for 1896-97. The adoption of a more favourable rate of exchange causes a saving of 13 lakhs in exchange compensation, and 5 lakhs on account of the pay of the British soldier. There is a saving of 6 lakhs on account of lower estimate for food prices for men and animals, and the remaining 7½ lakhs of savings is spread over a great number of items which it is not necessary for me to enter upon.

"Economies are constantly being introduced on the recommendation of the Commander-in-Chief, or Heads of Departments, or the Controllers. On the other hand, new demands are constantly being made upon us for additional expenditure on account of necessary services, and in the interests of improvement and progress. It would be useless for me to weary the Council with a long list of the economies effected on the one side, and the additional expenditure sanctioned on the other side. It is sufficient to point out that apart from the great items which I have already mentioned, the net result of this is a saving of between 7 and 8 lakhs in the coming year.

"As regards the three great items of addition to the estimates which I have named, that on account of pay for the Native soldier explains itself. The pay of the dismounted branches of the army was raised by Rs. 2 a month from the 1st of July last, with, I think I may say, the unanimous approval of this Council.

"The expenditure due to the occupation of Chitral has been kept as low as possible. That expenditure is due to the deliberately adopted policy of the Government of India, endorsed and approved by Her Majesty's Government. It is not for me to defend that policy, heartily as I approve it. All that I need say is that up to the present date it has been attended with complete success from every point of view. The troops in Chitral and at the Malakand are on a war footing. They are ready to take the field at a moment's notice. They are healthy; their transport is in excellent condition, and though the service may be somewhat irksome, especially for the troops in Chitral, they receive the prescribed pecuniary and other concessions which render them contented. The inhabitants of Swat, Dir and Chitral find their advantage in the markets created by the presence of our troops; and in the coming year it is believed that the greatest portion of the supplies required will be obtained by local purchase. Trade between these countries and India has very largely increased. It is intended to reduce the garrison of the Malakand by one regiment of infantry during this year; and I look forward with confidence to further reductions becoming possible within a short period of time. Against the expenditure under the head of 'Occupation of Chitral' has to be set the saving due to the withdrawal of the regiment of Native Infantry from Gilgit, which was made possible by the occupation of Chitral, and proposal for further reductions in the cost of the Gilgit Agency are under consideration.

"As regards the large sum of 49¼ lakhs included in the estimates for the preparations for mobilisation, I will, with the permission of the Council, explain to what this is due. Preparation for mobilisation is comparatively a new branch of the science of war. It is an outgrowth of modern times. When once one army had prepared itself in every detail to pass with great rapidity from a peace footing to a war footing, it became necessary for other armies to follow in the same direction. The field army of India consists of a certain number of divisions, each including a Cavalry Brigade, and of an additional force of cavalry and of reserve artillery. The arrangements for the mobilisation of this army, which is quite apart from the garrisons which will have to be maintained in India in case of the field army marching to the frontier, have been worked out in every detail upon paper. But the equipment, stores and mules required for mobilisation have only been provided as yet for a part of that army, and until they have been provided for the whole of it, our field army cannot be considered ready for war. Great delay would occur in procuring from England the stores and equipment which must be obtained thence, and in the manufacturing in this country of such stores as could not be obtained ready in the local markets. And it would be practically impossible to purchase at short notice in this country the mules that would be required. Were circumstances to compel us to mobilise our field army,

it is the opinion of your Excellency's Government that the attitude of the frontier tribes would largely depend upon our ability to advance rapidly and in perfect order; while, in the event of our having to meet a strong enemy, there would be great risk in pushing forward only a portion of our army, when weeks and even months might pass before the remainder could be in a position to support it.

"These grave considerations have not been absent from the minds of the Government of India, but in recent years financial considerations have prevented our making the preparations which we considered necessary. The time has now come when we consider that these preparations should no longer be delayed, and we have therefore, with the full approval of the Secretary of State, made the necessary provision in the estimates of the coming financial year for obtaining such equipment and stores as could not be at once obtained locally at the time of mobilisation, and for such number of the mules required as we believe can be purchased within twelve months at ordinary rates in the local market.

"If our field army were to be mobilised, in order to bring the reserve cavalry, the reserve artillery and the line of communication troops up to war strength, nearly 1,000 artillery horses would be required, and to obtain these we should have to take them from the batteries remaining with the garrisons in India, which would thus be so depleted as to be scarcely fit for fighting purposes. To bring these batteries up to war strength we should have to purchase in Australia, for this country does not provide horses fit for artillery, and a long time would elapse before the horses, which would arrive raw, unbroken and unacclimatised, could be fit for service. More than four years ago we brought this to the notice of the Secretary of State, and we obtained his permission to provide a reserve of 1,000 horses whenever our funds would admit of it. Up to the present time we have been unable to make this provision. But with the approval of the Secretary of State it has now been made in the estimates for the coming year.

"Experience has shown us that the greatest delay in the starting of every expedition is caused by the time that is required to obtain camels for transport purposes. This was specially marked in the case of the despatch of the Chitral Relief Force. A week had passed from the date of our orders before any camels had been obtained in the districts. It was found impossible to hire in sufficient numbers, and resort had to be made to purchase, with the results which I have already described in speaking of that expedition. Time is necessarily involved in the despatch of purchasing officers to the districts in which camels are to be procured, in sending orders to the district civil officers, in the issue of instructions by them for the collection of transport and in the collection of that transport. Valuable time which might be utilised in the formation of advanced depôts is thus lost. Year by year the number of camels that can be procured for transport purposes in India is diminishing, as railways take the place of camel transport, and our difficulties on this score are increasing. The troops can always be moved in far less time than it takes to collect the stores and supplies in the advanced depôts, and we consider it of great importance to minimise this delay as far as possible. We have, therefore, with the Secretary of State's approval, made provision in the estimates of the coming year for the purchase of sufficient camels to complete an establishment of 3,250, which we propose to maintain in future, so that they will be immediately available, and can be utilised for the formation of advanced depôts, even before formal orders for mobilisation issue. We look to another immense advantage from the purchase of these camels. By thus maintaining an establishment of camel transport, the Government will be able to educate both officers and attendants in the care and management of camels, and will have a considerable nucleus of trained camel attendants who will be able to superintend those large numbers of hired and purchased camels—no less than 40,000 transport animals were employed with the Chitral Relief Force—which it is always necessary to obtain in case of an expedition. We believe that this will bring great advantages to us in any future campaign.

"The provision which we have made in the estimates provides under the head 'Rations for men' for all home supplies required for the field army; local supplies could not wisely be laid in, having regard to the stocks already main-

tained, which are as much as can be turned over. Under the head 'Rations for animals' provision has been made for the purchase of fodder for the concentration period, for the fodder to accompany corps, for the marching stages and for one-fourth of the reserve. The remainder of the fodder could not wisely be laid in for the same reason as in the case of rations for men, but provision has been made for the provision of the fodder presses and engines required for pressing this amount on the occasion arising.

"Under the head 'Clothing' a full reserve of articles required has been provided for troops and followers, with certain deliberately considered exceptions.

"Under 'Transport Animals' provision has been made for the purchase of 1,750 mules and 3,250 camels; bullocks, it is believed, could be purchased when required. Employment for the mules and the camels can be found during peace, and there will be a saving on account of hire of transport in consequence. Bullocks on the other hand could not be economically employed during peace time. Provision has been made for the camel gear, transport carts, transport gear, water gear, regimental equipments, ambulance equipments, artificers' tools, stationery, forms, office furniture, miscellaneous equipment and packing materials to enable our field army to take the field without delay.

"Under 'Ordnance' provision has been made for all the stores required from home, and for local expenditure in providing the tents, harness, saddlery, Ordnance stores for medical and veterinary hospitals, entrenching tools, ammunition boxes and general stores for ammunition columns and field parks. In the Medical Department the medical and surgical stores, Commissariat stores, equipment and furniture required to complete the equipment of the field hospitals of the whole field army have been provided for. In the Veterinary Department the whole of the veterinary equipment and medicines, instruments and other supplies required will be purchased. Eight hundred and fifty artillery horses will be purchased in the coming cold season, and the shippers have already received notice that this number will be required; we already possess a reserve of about 150 horses. One thousand seven hundred and fifty mules and 3,250 camels with their gear will be provided. The establishments for the care of the horses, mules and camels are provided for in the estimates.

"It is evident that the maintenance of these additional animals involves a recurring charge in the estimates annually, and there will be a certain small annual charge for deterioration of stores and for compressing forage. For the year 1896-97 this recurring charge is estimated at a little under 6 lakhs; so that of the 49½ lakhs 43½ lakhs are an initial charge, which will drop out of the estimates in future years. But, on the other hand, it is estimated that in future years the recurring charge, which for the present year will be only 6 lakhs, will rise in round numbers to 13 lakhs. This initial charge of 43½ lakhs, and this annual recurring charge of 13 lakhs, do not, in my opinion, provide all that is required. The number of mules should, I consider, be increased in future years by about 2,700, and the number of camels be raised from 3,250 to 6,500. This would involve an additional initial expenditure of about 7 lakhs, and an additional arnual expenditure of between 10 and 12 lakhs. These initial and annual charges are the price which India must pay for having its army ready for war. I believe that there is no greater extravagance than to maintain a large army and to keep that army unready for war. There is, it seems to me, but one excuse for military expenditure, that when the army on whose account this expenditure has been incurred is called upon to take the field, it shall be ready to do so promptly and in perfect order. I believe that when these preparations have been fully completed, the army of India will be in every detail as ready to take the field and as able to give a good account of its enemies as any army in the world.

"The increase of 6 lakhs in the Military Works estimates for this year is due to the provision of 4 lakhs for a cantonment in the Tochi Valley and 2 lakhs for works connected with the occupation of Chitral.

"Special Defence estimates for the coming year are 5¾ lakhs as against 15½ lakhs in the current year and 22 lakhs in the year 1894-95. In the budget

estimate for the current year sufficient provision was made for nearly carrying to completion the whole programme of Special Defences, with the exception only of those items which the Government of India have decided should be abandoned or indefinitely postponed. But it was found impossible to spend the whole of the money during the year, and about 4 lakhs have lasped from one cause or another. The budget provision for 1896-97 is chiefly for carrying out works provided for but not executed in 1895-96. Two new items only have been brought forward, namely, an extension of the sea-wall at Middle Ground Battery, Bombay, which is necessary for the security of the work, and a new main magazine at Bombay. The provision made in 1896-97 should suffice to carry the Special Defence programme to completion, so far as it is considered desirable to carry out the original programme, and these Special Defence estimates should in future years disappear.

"My Lord, this is the last time that I shall speak or sit in this Council, and I will ask its indulgence while I mention briefly a few of the chief reforms which have been carried out, during the past five years, in the Departments of which I have been in charge.

"In the Royal Indian Marine, under the direction of that able officer, Captain Hext, while the tone and spirit of the service have greatly improved, there is not one test by which you can measure the work done which will not show that economy has been effected. Whether you take the cost per mile run of the ships, the cost per head of men conveyed by them, or the cost per ton of the vessels maintained, the charge is less than it was five years ago.

"Turning to the reforms in the Military Department, these have all had one of two objects, either the effecting of economy, or the making the army of India a more perfect instrument for war. First amongst these in time and date, and second to none in importance, is the reorganisation of the Intelligence Department at Army head-quarters. Upon the information of the Intelligence Department depends and must depend in all armies the original direction and impetus given to the army at the commencement of a campaign. And it is a well-known military axiom that, if the original impetus given is in the right direction and with sufficient force, half the campaign is already won. The Intelligence Department was insufficiently officered, and was stinted in funds. It was entirely reorganised and granted sufficient money to enable it to carry on its work, and was placed in charge of that most able officer, Colonel Elles, under whom and his successor it has become, I believe, as good as any Intelligence Department can be. The Chitral Relief Expedition was carried out, with scarcely any alteration, on the lines indicated in the Intelligence Department memorandum which I have already spoken of as having been placed in my hands on the 7th of March of last year.

"The next great reform has been in our mobilisation system. Five years ago this was only in embryo, and none of the present details had been worked out. A little less than five years ago the Mobilisation Committee, of which Lord Roberts was President, met at Simla, and the lines upon which mobilisation was to proceed were definitely decided. It was felt that a large committee was not the right machinery for carrying out a system full of extraordinarily complicated details, and a section was created in the Quartermaster-General's Department under the charge of that most valuable officer, Captain Kemball, for the purpose of working out all the details and keeping them constantly up to date. The troops to form the several brigades and divisions of the field army have been told off. Those of the first divisions have been supplied with their regimental equipment for war; transport, equipment and stores for the mobilisation of the first two divisions have been collected at the strategic points laid down. Field Service Manuals containing instructions for all arms and departments in case of mobilisation have been printed. The corps composing the field army are kept warned; the Staff and Army Departments are told off; railway time tables for the movement of the whole field army and its stores for long distances have been prepared in concert with the railway authorities. By the end of March, 1897, thanks to the provision made in the estimates for the coming year, the entire equipment and stores required for the whole field army will be in readiness.

"Our establishment of transport, which is our greatest difficulty in India, was increased by 2,000 mules in 1891, and will be again increased as I have already explained in the coming year, and at the end of the year we should, as I have said, be in possession of a nucleus of camel transport.

"Of the abolition of the Presidential Army System, and of the substitution for it of a single army of India, I have already spoken. This great reform had been so long delayed, though so constantly urged by successive Indian Governments, that it still seems to me almost difficult to believe that this dream has been so quietly and completely realised.

"The Coast Defences at Karachi, Bombay, Calcutta, Madras and Rangoon have been brought to completion, and the defence vessels of the Royal Indian Marine have been placed under the control of the Admiral Commanding the East India Squadron, by whom they will be utilised in case of war with a maritime Power.

"The defences of the North-West Frontier, including the lines of Quetta and the great bridge heads on the Indus at Sukkur and at Attock, have been completed. A series of forts has been completed at Rawal Pindi, forming a strong entrenched position. These forts required a long time for construction, and the Government of India thought it well that they should be made. But it has been decided to postpone the construction of the intermediate batteries, as these could comparatively rapidly be made, and in view of the great progress of modern military science it is thought that the armament should not yet be procured.

"Great progress has also been made in the armament of the troops. The Horse and Field Artillery have been armed with 12-pounder breach-loading guns, and every encouragement is given to them in the way of grants of ammunition and prizes to make the most by good shooting of that weapon. The British Infantry has been armed with the Lee-Metford magazine rifle, a most satisfactory arm. The only complaint made in regard to this weapon has been that the small-bore bullet has not, at short ranges, sufficient stopping power. Experiments have been conducted with a view to remedying this defect, and there is every reason to believe that a complete remedy has been found in a modification of the bullet. The Native Infantry and Cavalry have been armed with Martini-Henry rifles and carbines in place of Sniders, while the Sniders returned by the Native Infantry have, after conversion into smooth-bores, been handed over to the armed police. The shooting of both the British and Native Infantry is eminently satisfactory. Large grants of free ammunition are made for practice, and the troops are allowed to purchase, within certain limits, additional ammunition at considerably reduced prices.

"Great progress has been made in the manufacturing departments, and India is now turning out all her own small-arm ammunition, is making her own cartridge metal, gun fittings for the latest types of guns, powder, accoutrements, harness and saddlery to keep pace with the extended needs of the army in India; while under the able direction of Captain Mahon, and of General Walker, the Director-General of Ordnance, the manufacture of steel and steel projectiles has been successfully introduced at Cossipore.

"As examples of the economy of substituting Indian manufactures for articles from home, I may mention that the English price of Martini-Henry rifle cartridges is Rs. 71 per 1,000, and we manufacture them in India for Rs. 49 per 1,000. The English price of Lee-Metford cordite cartridges is Rs. 108 per 1,000; we manufacture them in India for Rs. 83 per 1,000. Twelve-pounder shrapnel shells cost in England Rs. 837 per 100; we manufacture them for Rs. 710. In every proposal for new manufacture in this country the Ordnance Department has been required to show that the local manufacture will be economical; and the result of our advance in this direction has been that every material increase in the Ordnance Indian budget estimate has been counterbalanced by a larger reduction in the Home estimates. The official Financial Review shows that in 1894-95 a saving of close upon 20 lakhs was effected during that year in the Bengal ordnance factories by local manufacture having taken the place of importation of stores.

"A Proof Department has been established at Balasore for the practical test of projectiles, fuzes, etc., made in India, before they are passed into the service.

"We have not as yet attempted the manufacture of cordite in India. For some time there was a doubt as to its suitability for standing the heat of India, as it failed in some cases to fulfil the War Office standard heat test. But its ballistic properties, even when it failed to fulfil this test, were unimpaired, and the War Office have recently acknowledged that the test, not the cordite, was in fault. The test has been reduced, the cordite thoroughly meets the requirements of the new test, and all anxiety has been removed. It causes rather excessive wear of the Lee-Metford rifle barrels. I have no doubt that means will be found of removing this drawback; and it is probable that in a rifle of larger calibre this wear would not take place, but pending certainty on this point cordite is not being introduced for the Native army. We are still experimenting to obtain a thoroughly satisfactory rolled cartridge case for the Henry-Martini rifle, as this will cost very much less than the solid-drawn cartridge case in use with the Lee-Metford. I have no hesitation in saying that we are on the point of success. There would undoubtedly be difficulties attending the manufacture of cordite in this country; and we do not propose to attempt it, unless there is reason to suppose we cannot obtain our full requirements at a reasonable rate from England. There would be no danger in depending upon England for it, as we should always keep a four-years' supply in this country.

"The greatly increased duties of the Ordnance Department have been hitherto carried out without increase to its staff. But it is under-officered, and, as this is not true economy, provision has been made in the estimates of the coming year for an increase of five officers to the department.

"The Commissariat Department has shown itself effective and successful in the many expeditions and campaigns that have taken place in the last five years, campaigns for the most part conducted in wild countries where it is most difficult to obtain supplies; and searching inquiries have convinced me that in time of peace its administration is as economical as can reasonably be expected.

"Lieutenants-General Commanding have since the 1st of April last been invested with the control over the Commissariat Department within their respective Commands, and are responsible for its maintenance in an efficient condition, as well as for strict economy in its administration. The Commissaries-General have been placed on their departmental staff; and Commissariat officers have been made staff officers of the Generals or other officers commanding districts or stations.

"The principle that as far as possible supplies and services should be arranged for by contract rather than by departmental agency has been carefully observed, and in the Bombay Command especially very considerable savings have been effected by introducing important changes in this direction.

"In all cases where Indian manufactures can be obtained as good in quality as imported articles, and no dearer in price, they have been substituted for imported articles. The gain in 1891-92 resulting from the use of stores manufactured in India in substitution for stores formerly imported through Secretary of State was Rs. 5,37,000, and in 1894-95 Rs. 16,50,000.

"The bread supply of the troops has received careful attention. An officer of the Commissariat was deputed to inspect mills and private bakeries in England in 1892, and consequent on his report schools of instruction have been established for the training of European departmental subordinates in bread-making, instructors having been obtained from Home. A native bakery class was established at Rawal Pindi, and a second class is about to be held in the coming year. With a view to checking the spread of enteric fever, dairy farms have been established at several stations throughout India and Burma. Officers have been trained in meat inspection since 1893. The entire supply of tinned meat is now obtained direct from the British Colonies, the supplies so obtained being better and cheaper than the American meats previously obtained from England.

"The spread of cultivation having made it almost impossible to obtain grass through the agency of grass-cutters from waste land, a system of grass cultivation was inaugurated in 1887. During the past five years these operations have been extended very considerably, and have been very successful financially and otherwise. Grass farms and rukhs are now existing practically to the full extent necessary in the Bengal and Punjab Commands, and Government have recently sanctioned the extension of the system to the Bombay Command. In the Bengal and Punjab Commands in 1894-95, the Financial Review shows that these grass operations resulted in a saving of Rs. 2,74,000, besides which there were further indirect savings by the reduction of claims from Silladar Cavalry corps for compensation for dearness of forage.

"It has been satisfactorily proved that the Commissariat rates for supplies are well within market rates, and that the compensation for dearness of food and forage given to troops corresponds fairly accurately with the fluctuation in those rates. The Department suffered great loss this year in the removal of its able chief, General Badcock. But in his new position as Quartermaster-General his valuable advice will still be available to the Government.

"In the Clothing Department every effort has been made to substitute clothing materials of *bonâ fide* Indian manufacture for imported articles, in order to encourage local industries, and in view to economy. The gain to the State by this procedure was in 1891-92 Rs. 1,68,000, and in 1894-95 Rs. 3,33,000. As a specimen of the success attending these efforts I may mention that the white drill for the summer clothing of British troops which costs about $3\frac{1}{2}d.$ a yard manufactured in India was reported upon by the Store Department of the India Office to be superior to the material costing about $4\frac{1}{2}d.$ a yard previously supplied from England, or to any material which could be manufactured in England at the price.

"The whole of the boots for the British troops serving in India are now made by Messrs. Cooper, Allen & Co. of Cawnpore. They are cheaper and at least as good as the boots previously supplied from England

"Helmets, formerly obtained from Home and costing up to 1892 Rs. 3-14, are now made in India for Rs. 2-12. Many internal improvements have been introduced in the Clothing Department.

"In the Military Works Department great progress has been made in the direction of sanitation. Pure water-supply has been laid down at a large number of the military stations in India, including Secunderabad. Delhi, Agra, Lucknow, Allahabad, Dum-Dum, Rawal Pindi, Murree and Quetta; and each year the number of such stations is being added to. Provision has been made in the estimates of the coming year for the water-supply of the Civil and Military Station of Bangalore, to which my hon'ble friend Mr. Rees has alluded; not for the whole cost of that scheme, but for as much as it is believed can be usefully expended upon it during the financial year. Improved systems of conservancy have been introduced, and we are now experimenting at several stations with different kinds of incinerators, by which method of disposal of the solid products of sewage it is to be hoped that the health of our troops may be greatly improved.

"In one most important matter, the horsing of the Cavalry and Artillery, considerable advance has been made. For horses for our Artillery and for the greater part of the British Cavalry we are dependent upon Australia, and it became necessary to raise the prices which had hitherto been given, as the supply was falling off in consequence of the diminished value of the rupee. The price now given is £45 sterling, with which the shippers are thoroughly content, and I believe that I may confidently say that nowhere in the world are any cavalry and artillery so well horsed as ours are in India. Three regiments of British Cavalry are now mounted on country-breds by which a considerable saving is effected. But at present the local markets do not supply horses fit for this purpose in sufficient numbers to mount more than three British regiments.

"It is impossible to buy country-bred horses of an age fit for issue as remounts. Young horses, if left with the zamindars who have bred them, are worked too young, and are not sufficiently well fed or allowed sufficient freedom

in that early stage of a horse's life when his growth depends upon good feeding and freedom. Consequently, the Government has established rearing depôts at Ahmednagar, Hapur and Kurnal. It buys, every year, some hundreds of young stock at eighteen months of age and over, and rears them in the very best conditions under its own care, issuing them when fit as remounts. The age of issue of remounts to British Cavalry and Artillery has been raised from four years to five years. Although this involves an additional initial expenditure in the cost of the horse when issued, there is no doubt that horses which are not worked till five years old will last longer and stand the strain of heavy weights better than horses which are worked at an earlier age. The Government horse depôts have been strictly limited to their functions of rearing, breaking and acclimatising horses. The old stud system, abolished several years ago, but which had begun again to crop up, was absolutely abolished and forbidden four years ago. There is now no competition whatever between the Government and the private breeders in the matter of breeding horses. The Government of India is indebted to Colonel Deane, Director of Army Remounts, for his loyal co-operation in its orders in this respect, and for his excellent management of the remount depôts.

"A great improvement in horse-breeding in India has taken place. There is a distinct improvement in the quality of the horses at the fairs upon which the Silladar Cavalry are dependent for their remounts. The present Inspector-General of the Civil Veterinary Department, Veterinary-Colonel Queripel, is an enthusiast on the subject of horse-breeding, and I have little doubt that it will improve greatly in his hands. He has induced several of the Native States to take the question up.

"Mule-breeding too has made considerable progress. We have imported first class donkey stallions from Europe and elsewhere, and for the past three years we have been able to obtain the whole of our requirements in mules, both for transport and for ordnance purposes, within the limits of India.

"As regards the personnel of the army, the British soldier is well paid. He receives the equivalent of his sterling pay at the current official rate of exchange; and, as his expenditure is all in India, he has benefited by the fall in the sterling value of the rupee. He is well fed, well housed and well clothed, and a new clothing scheme is on the point of being introduced, which, while it results in economy to the State, will also save the pocket of the soldier, and will ensure his always being clothed in a dress suitable to the climate, the cloth clothing worn in England being, with the exception of certain regiments, abolished for India.

"As regards the Native army, the opinion of the Military authorities has long been that class regiments are better fitted for war than regiments composed of several classes. And in this direction progress has been made. Sixteen mixed battalions of Hindustani regiments have been reconstituted into class regiments of Brahmins, Rajputs, Jats and Muhammadans. And in Madras seven battalions of infantry have been reconstituted by transforming battalions of Military police, composed of Gurkhas, Sikhs, Punjabis and other hardy and valiant races into local battalions for service in Burma. In Bombay a class company system has been introduced, and two regiments have been converted into local corps, for service in Baluchistan, composed of warlike tribes of Northern India. It is believed that the class company system will result in our obtaining recruits of a better stamp than those obtainable under the old system in which men of all classes were indiscriminately mixed together.

"An improved system of recruiting has been introduced, under which officers specially selected are told off for the recruiting of certain classes of soldiers in the Punjab, in Bengal and in Bombay. This system cannot yet be introduced into Madras, for the authorities there have not as yet sufficient information as to the classes suitable for recruitment in that Command; but the existing system of recruiting there has been improved, and certain unwarlike races will no longer be recruited.

"The increase of pay of Rs. 2 granted to the dismounted branches of the Native army in the current year is already having its effect in an improvement in the class of men who join the army. And I may mention that the deficiency

in the strength of the army as compared with sanctioned establishments was a thousand less on the first of this month than on the first of March last year. There is little doubt that as the increased advantages given to the soldier become more widely known their effect will become more marked.

"One great step is being taken towards the comfort of the Native soldier. The old system under which he built his own lines, receiving a hutting and repair allowance from the Government, is being gradually replaced by a system under which good lines of an improved pattern are being built for him by the Government, and maintained at the expense of Government. The estimates for the current year and coming year each contain a grant sufficient to build from three to four new sets of lines, and at the end of a few years all the Native Infantry should be decently and comfortably housed.

"An Act was passed in this Legislative Council in 1894 revising and amending the Indian Articles of War, and they are now thoroughly adapted to the disciplinary requirements of the Native army.

"As regards the numbers of the army, there has been practically no addition to the army during the past five years, and the occupation of all the new territory which has come under our control, whether on the frontiers of Burma, or on the North-West Frontier of India, has been provided for by the redistribution of the troops.

"But the Reserves of the Native army which stood on the 1st of April 1891 at a strength of 7,093 now stand at a strength of 15,567. These are all thoroughly trained soldiers within good fighting limits of age. They are called up annually and trained at the centres of the regiments to which they belong, and they will be a most substantial and valuable addition to our army in case of its having to take the field.

"Finally, there are the Imperial Service Troops, which have to a great extent taken the place of the large inferior and undisciplined armies formerly kept up by the Native States in India. They have made great progress under the Inspector-General, Colonel Melliss, during the past five years. By the latest report in the hands of Government these troops numbered 7,970 cavalry, 289 artillery, 303 Sappers and Miners, 9,015 infantry, 497 camel corps and 942 transport corps, a total of 18,710, with 1,400 transport ponies and 600 carts. The troops are trained under the supervision of British officers, they have recently been armed with Martini-Henry rifles, and many of them have now reached a stage of efficiency which, in the opinion of the Commander-in-Chief, would render them valuable auxiliaries to our army in the field. To the services of the Kashmir Imperial Service Troops and of the Transport Corps of Jeypore and Gwalior in the Chitral Relief Expedition I have already alluded.

"On the European side, the volunteers, who in April 1891 numbered less than 20,000 efficients and less than 23,000 enrolled, now number nearly 24,000 efficients and nearly 30,000 enrolled. Additional concessions have been given to them in the way of grants for camps-of-exercise and field days, relieving the pockets of the officers of expense, and for construction of armouries, head-quarters buildings, etc. By the Act passed a fortnight ago the Governor General in Council has obtained power to call out the volunteers for actual military service in case of emergency, and to provide them with pay, supplies and transport, and to give pensions and gratuities to them and their families in case of wounds or death.

"These, my Lord, are some of the great improvements which have been made in the army in the past five years. When my predecessor in office, the late General Sir George Chesney, left India, he left behind him an important and long minute on the Indian Army and Military Administration, in which he recommended certain improvements and reforms. Some few of these have been deliberately considered and rejected, but the rest, with one exception, have been either entirely carried out, or are in actual progress. That one exception is an increase to the number of British officers with the Native army.

"Were it necessary now for me to write for my successor such a minute, I should confine my expression of the wants of the army of India to three

points—more transport, more officers and more garrison artillery. I hope that that transport may be provided in the next year or two. Our forts and batteries are undermanned, but it has not been in our power to provide the money for an increase to the garrison artillery establishments.

"The greatest want, in my opinion, and, I know, in the opinion of the Commander-in-Chief, is an increase to the number of British officers. We have endeavoured to meet this by establishing a reserve of officers, but the attempt has been a failure. Civilians in the service of the State would be far too heavily occupied with their own duties for us to be able to count upon their service with the army in case of war, and the number of British civilians in India not in the service of the State is so small, and they are all such busy men, that it is little wonder that we have had but few applications to join the reserve of officers. Yet, upon the outbreak of war, we ought to increase the number of European officers with every unit of the Native army, and we should require some hundreds of officers for transport duties, and for various staff appointments in the field. Where to lay hands upon these officers is a problem that has not yet been solved. Should the finances of India improve, I earnestly hope that this question will not be lost sight of.

"In addition to the reforms which I have above enumerated, there is one which is unknown outside the walls of the Military and Finance Departments and the India Office in London, and that is the internal reform of our military financial system. The system which I found in existence was one that did not give sufficient control even in times when money was plentiful, and was utterly unsuited for times of difficulty. The Military Member of Council and Finance Department did not have that control over military expenditure which they should have had. For that system one has been substituted, under which not one rupee of additional expenditure can be sanctioned by any one but the Military Member of Council himself, under which no expenditure not provided for in the estimates is sanctioned during any current year, unless it is of absolute and urgent necessity, and no fresh expenditure is added to future estimates until after the Military and Financial Members have personally agreed upon the amount available for military expenditure within which the estimates must be kept. I take this opportunity of expressing my sense of deep personal indebtedness to Colonel Miley, the Military Accountant-General, for his untiring efforts to assist me in carrying out these reforms, and in effecting true economy. I would like to give this Council one specimen of the Accountant-General's work, which will, I think, convey confidence to the minds of this Council and of the public; especially to those who remember the failure to forecast the expenditure in the Afghan war. Within about five weeks from the starting of the Chitral Relief Force, the Accountant-General sent to the Finance Department his approximate estimate of the cost of the expedition. It was a full estimate, in which an allowance had been made for contingencies under each separate head. The actual expenditure has been 19 per cent. below the Accountant-General's estimate. I can assure this Council that the most rigid economy is now practised in all matters of military expenditure, that no effort is spared by the Military Department, by the Commander-in-Chief and the heads of departments to effect reductions of expenditure wherever they can be effected without detriment to the efficiency of the army, and that, except for military expeditions which cannot be provided for in the estimates, such things as supplementary estimates have altogether ceased.

"I am to be suceeded in charge of the Military Department by an officer, Sir Edwin Collen, who has for the past five years been working with me heart and soul in these reforms, whose ability is well known, and whose efforts in favour of economy have not been exceeded by those of any officer in the service of the Government. I would ask this Council to trust him.

"The past five years have been years of great difficulty for the Military Department. There have been a great number of frontier expeditions, which have upset our budgets, and have been unwillingly concurred in by the Commander-in-Chief and myself. There has been, owing to the fall in exchange, a financial pressure such as had been hitherto unknown.

"In face of these facts I trust, my Lord, that the list of improvements and reforms which have been effected in our army and our military administration will not be considered by this Council an unsatisfactory record of progress.

"The army in India is in my opinion none too large for the work it may be called upon at any time to perform, and I trust that this Council will never lend a willing ear to those who advocate reduction of military expenditure other than that recommended by your Excellency's Government. For I say deliberately and advisedly, after the closest and most minute study of every detail of that expenditure, that such reduction could only result in that worst and most wicked of all waste, the maintenance of an army which would be either insufficient in strength, or unfit and unready for war."

His Honour THE LIEUTENANT-GOVERNOR said:—"I should like to say a few words on the subject of Provincial Finance and paragraphs 60-64 of the Hon'ble Member's statement. I hardly think it possible that at the present day Local Governments can have any such misapprehension of their true relation to the Supreme Government as the Hon'ble Member describes. Personally I have always refused to admit that there can be any separation of interests between the Government of India and the Local Administrations. The latter are as much interested in the expenditure directly controlled by the Imperial Government as the Imperial Government itself. But the principle applies in the other direction also. The Imperial Government is, or ought to be, as much interested in the matters left to the Provincial Governments as any or all of those Governments. Now I have received myself as a provincial administrator, as a general rule, the most generous treatment and support from the Government of India during the past ten years. Our relations have ordinarily been of the most amicable kind. But nevertheless it has at times appeared to me that the Supreme Government did not always realise that it has as great a responsibility for local administration as the Local Government itself. I have seen or seemed to see a tendency on the part of that Government to wash its hands of this responsibility, especially as regards finance. I thought I saw this when as Chief Commissioner of Burma I protested vigorously against the mulct of 18 lakhs taken from that province in 1894-95, and which I am glad to see now given back. I know that my hon'ble friend will repudiate the idea, but I have, I believe, none the less seen it elsewhere also in operation, conscious or unconscious. I refer to it, however, now not by way of complaint about the past, but in order to enter a caveat in view of the revision of the provincial contracts to which the Hon'ble Member alludes in his paragraph 60. I trust that he will enter upon this revision in full consciousness of the fact that the Imperial Government is as much interested in the development and improvement of provincial administration as the Provincial Governments themselves, and that any check inflicted on them is a check to the whole imperial machine. I must say I deprecate the way in which these quinquennial revisions have too frequently been carried out. The provincial sheep is summarily thrown on its back, close clipped and shorn of its wool and turned out to shiver till its fleece grows again.

"The normal history of a Provincial contract is this—two years of screwing and saving and postponement of works; two years of resumed energy on a normal scale, and one year of dissipation of balances in the fear that if not spent they will be annexed by the Supreme Government, directly or indirectly, at the time of revision. Now, all this is wrong, not to say demoralising. I say that the Supreme Government ought not to sheer too closely each quinquennium. It is as much interested in the continuity of work as the Local Governments: and ought to endeavour to secure this and avoid extreme bouleversements of the Provincial finances. In the first two Provincial contracts India left Bengal not only its accumulated balance, bur part of its normal and recurring surplus. In the last three contracts it has taken the whole normal surplus, leaving Bengal to create a new surplus, and make what it could out of the progressive growth of its revenues. This necessarily inflicts on the province at least two years of leanness at the outset of each quinquennium. It would be an immense gain to local administration if the Government of India could see its way to renewing the contracts

with as little change as practicable on each occasion. It is only in this way that the element of fiscal certainty, which was put forward in 1870 as one of the main objects of decentralisation, can be secured. Hitherto we have had but little of certainty. Not only have the terms of the contract been repeatedly changed, but 3 out of 5 have been practically set aside. I do not grumble at this. I would willingly surrender every available rupee if Imperial necessities required it. We are, as I said at starting, all one Government. I merely desire to suggest that this unity should be recognised throughout all the financial arrangements, and as little disturbance as possible be introduced on each occasion of quinquennial revision."

The Hon'ble SIR JAMES WESTLAND said :—"During the past week I have been making an attempt, by studying the public newspapers, to discover on what particular lines my Financial Statement was likely to be attacked. I failed somewhat in that effort, because I have found that the proposals of the Government as made in the Statement have been generally accepted. There was one newspaper, I admit, that I looked to with some fear and trembling—it is a weekly newspaper published in Calcutta, a newspaper that never has a good word to say for the Government or any of its doings, and I was afraid that this newspaper would have some words of commendation for the Financial Statement—a commendation which would damn it in its author's eyes. But fortunately I found that this newspaper did not approve of the Statement. It did not give any particular reasons, but it did not approve of it, and it went on to accuse me of something like the fraud, of which the Hon'ble Rai Ananda Charlu has been accusing me, namely, that of diverting the Famine Insurance Grant, or the Famine Insurance Fund, as he insists upon calling it, to purposes for which it was never intended. I have also been accused of fraudulently making up the accounts by a gentleman on the Bombay side who is under the delusion that he knows something about Indian finance and has been making occasional attempts to induce the public to share in his hallucination. He stated that it was no wonder that I should bring forward the accounts of 1894-95 as showing how accurately we had forecasted them in the revised estimates presented last March, because we had already obviously taken the revised estimate as our basis and falsified the accounts so as to make them work up to the estimate. He was able to show this by comparing the Statement of Accounts we published with the estimates with one that we published in one of our Gazettes in February. Now, it requires only an elementary acquaintance with our accounts to know that when we first make them up we gather the land-revenue and the interest each under a single head, because it is a single class of receipt or of charge; but that afterwards, when making up our final accounts, we divide these preliminary figures between two different heads, namely, the land-revenue ordinary, and the land-revenue due to Irrigation, and in the case of interest, part of the interest we pay is transferred to the charge of the Irrigation and the Railway Accounts. All this was perfectly plain on the face of the Account presented for certain comparative purposes in the Gazette in February; but by suppressing the differences in the names we gave to the heads, this critic of mine on the Bombay side professed to show that we produce different figures under the same designation. Of course they were different figures, because they refer entirely to different things. If he had carried the comparison into detail, he would have found that the figures he produced in one statement exactly corresponded with the figures I had produced in another. I only notice these matters because they have been given currency to by one of the leading newspapers of Bombay. I think it necessary, as I shall have to answer other charges of fraudulent concoction of accounts, to state that these accounts are made under safeguards which render it perfectly impossible, even if the Government of India desired to produce fraudulent accounts, for it to do so. I am accustomed to be hauled over the coals for doing dishonest actions; but political criticism in this country is young, and it has not emerged from that primitive stage in which it consists of accusing your adversary, with or without evidence, of dishonest actions. But what did touch me in the criticism presented in Bombay was that we were not only supposed to be rogues in making up our accounts, but also declared to be such fools as to provide the public in our own Gazette with the means of convicting us.

"The Hon'ble Mr. Bhuskute has prepared a long discussion, and I think on the whole a very useful one for the purposes of the Government of India upon many questions raised in the Budget. I call it a very useful discussion, because I think it is very desirable, and that it is a very valuable assistance to us to get a calm statement of the manner in which our accounts and financial transactions present themselves to a non-official gentleman who has at heart the interests of the province to which he belongs.

"The Hon'ble Mr. Bhuskute was good enough to give me a copy of his statement last night, and in the course of this morning I have been able to examine his statements and some figures on which he has founded them. Now, Sir, of course an Hon'ble Member who gives me a statement of this kind places himself, I know, at a very great disadvantage. He gives me a very great dialectic advantage over him; he knows that the last word will come to me, and that I may make use of his statement without the possibility of his making any answer to my criticisms. I desire to avoid as far as possible using any language which can be interpreted as in any way disparaging the Hon'ble Mr. Bhuskute's criticisms, because, as I say, I do admit it is very useful for us to know what view is taken of many of these matters by an independent gentleman in his position. But I am bound at the same time to point out that many of the statements and figures presented are very far from correct. I know that in these matters I am at a very great advantage. He is dealing with figures new to him—figures which in their very mass are very difficult to follow, and I am dealing with matters with which I have been familiar during the whole of my life. For one of the statements the Hon'ble Mr. Bhuskute drew up he was good enough to come to me for information. I gave him that information at once, but in regard to the other matters I regret that he did not ask me for further information, because I could have saved him a very great deal of criticism which I think somewhat unfounded.

"Now the Hon'ble Mr. Bhuskute addresses himself first of all to the Famine Insurance Grant, and what he has said has been repeated with additions by the Hon'ble Rai Ananda Charlu. I think it will be better for me to notice first the points which the Hon'ble Mr. Bhuskute has taken up, and afterwards to take up those to which the Hon'ble Rai Ananda Charlu drew attention.

"The Hon'ble Mr. Bhuskute objects to the reduction of the amount of the Famine Insurance Fund on the ground that we spent during the last fifteen years an average representing one crore and sixteen lakhs. I cannot admit this to be true. I am quite sure that, if any person having an income (say) of five lakhs of rupees chose to invest of that income two lakhs in railway shares and two lakhs in Government securities, it would not be said that he spent his whole income. That is exactly what we have been doing with our Famine Insurance Grant. We have not spent the 116 lakhs; the greater part of that has been invested in railways and in Government securities. It is obvious, therefore, that the fact that we have laid out 116 lakhs in these investments is no argument to show that it is for the future necessary for protection against famine to maintain the grant at its original figure—1½ millions.

"Then he calls upon us to remit the special taxes imposed at the time when this Insurance Fund was instituted. And he says that the provinces interested in this special taxation will naturally claim immediate consideration of the subject from us. In the first place, I have to point out that the taxes imposed for the institution of the Famine Insurance policy did not exceed one crore of rupees, and that therefore no question of their remission at present arises. I will make a quotation on this point from one of Sir John Strachey's Financial Statements (1880-81), in which he says—

'As I have already explained, that taxation amounted originally to Rx. 1,345,000. It has now been reduced to Rx. 1,000,000.'

"So that the amount of taxation which was called the famine taxation and was instituted at the time when the Famine Insurance Grant was instituted does not exceed the amount set aside now as famine insurance. Moreover, I rather think that the Hon'ble Member is not aware to what a small extent his own province is interested in this famine taxation. The details of it are before

me; they were given in the Financial Statement of 1879-80. They consisted for the most part of the license-tax amendment, ordinarily called the income-tax, and of the Bengal public works cess. Then there were small amounts of local taxation, of which the additional cess in the Central Provinces comes only to 1½ lakhs of rupees. It would appear, therefore, that the Hon'ble Member's province is very little interested in the question of the abolition of the taxation which was instituted at the time of the Famine Insurance Grant, and I am quite sure from what the Hon'ble Member says in his speech of the smallness of the contribution which Bengal makes compared with other provinces that he would not argue in favour of the remission of that part of the taxation which is represented by the public works cess of Bengal.

"I wish to point out with reference to this point that Sir John Strachey, when he instituted this Famine Grant, distinctly declared that any intermission of it did not involve in the smallest degree the question of the remission of the particular taxation levied at the time of the grant And it is very obvious that that cannot be the case. Our last tax in point of date was the imposition of the customs-duties. We levied the customs-duties because the value of the rupee had fallen from 14 or 14⅛ to 13 pence. If there was any force in the argument of the Hon'ble Member, it is obvious that our first endeavour when the rupee rises ought to be to abolish these customs-duties and not touch any part of the rest of the taxation of the Empire. Now I do not think there is any person who would urge that as the first tax to be got rid of.

"There are a great number of taxes for the prior remission of which claims may be made—one from the Hon'ble Rai Ananda Charlu for example, that a portion of the income-tax should go. We have a claim from the Hon'ble Rai Ananda Charlu, and also I think from the Hon'ble Mr. Bhuskute, that the salt-tax should go. It is obvious that these claims are founded upon a theory quite different from that which would attach to each tax a particular ear-mark and declare that when the increase of expenditure, with reference to which that special taxation had been levied, ceased, it should become the duty of Government to abolish the particular tax levied for it. Sir John Strachey was very clear on that point, and I shall read a short extract from his Financial Statement, the same statement as that from which I quoted before, of 1878-79, in which he says—

'I need hardly say, after what has been said on former occasions, that the Government can entertain no idea of giving these taxes up and of sacrificing a million a year of revenue.'

"I would wish to point out to the Hon'ble Rai Ananda Charlu that this statement was made at a time when Sir John Strachey was suspending the Famine Grant, and that even at that time he declared that he would not propose to remit the taxation which was levied with reference to the constitution of the Famine Insurance Grant."

The Hon'ble RAI ANANDA CHARLU BAHADUR: "Kindly give me the year."

The Hon'ble SIR JAMES WESTLAND: "It is paragraph 54 of the Financial Statement of 1880-81. Sir John Strachey goes on to say—

'Even if those taxes were as bad as some think them, a time like the present, when we have to meet the heavy obligations entailed by a serious war, would not be opportune for abandoning them; still less could such a course be approved by those who believed, with me, that these taxes are far less objectionable than others that could be named, and that when the time comes for remitting taxes, it is not with these that we ought to begin.'

"When a tax is imposed, whether it is imposed at a time when it is necessary to make a special provision for famine, or whether it is imposed at a time when the conquest of a new province has necessitated the increase of our army expenditure, or whether it is imposed, as it was two years ago, at a time when great difficulties in exchange had increased the burden of our expenditure, that tax becomes part of the regular fiscal system of

the Empire. When we come to questions of remission of taxation, which I hope is not very far distant—although I do not like to prophesy until I am sure—we must take up the remission of taxation as a thing which is quite independent of the particular expenditure for which the tax has been levied. We must choose for remission those taxes which are found to be most burdensome and whose remission will bring the greatest relief to the Empire.

"My statement of the financial relations between Provincial Governments and the Imperial Government has been criticised in more than one direction. I am afraid that the Hon'ble Mr. Bhuskute is one of those against whose views it was my object to remonstrate, one of those, namely, who think that the Local Governments and the local objects have necessarily a first claim upon the revenues and that the Imperial Government is something which lies entirely outside. In fact, the Hon'ble Mr. Charlu went further than that and protested against our imagining that the Local Governments were only the agents of an absentee landlord and were merely collecting taxes for some other Government. I am glad for one thing that His Honour the Lieutenant-Governor has very promptly repudiated these claims, and I am sure that every Local Government will admit, as he has admitted, that it is both legally and constitutionally the agent of the Government of India for carrying on the administration of its province, and that it cannot declare to us that its business is to keep its own revenue in its own hands and refuse to be responsible to the Government of India for the revenues it collects. In talking of it as an agent it is to be understood that I am not denying it a large amount of discretion. In fact, the whole system is founded on the theory that it is still an independent Government and has all the functions of a Government, but that we must control the action of the Local Governments in their financial proceedings on the theory that the whole financial system of India is one, and that we cannot break up the system into financially separate provinces and make these provinces independent contributories to a central account. This is one of the proposals which the Hon'ble Mr. Bhuskute makes in his statement. In connection with it he says :—

'This complaint is not, as the Hon'ble Member puts it, that each province thinks the richer provinces have a surplus which they are made to disgorge for the poorer provinces, but that under the present arrangements the poorer provinces are made to contribute more than their proper shares in order that the richer provinces might not be taxed their full share of the Imperial contribution.'

"And here, my Lord, I think that the Hon'ble Member's statements are not borne out by the figures which I set forth in my Financial Statement, from which it will be seen that, as a matter of fact, the richer provinces do contribute a very much larger share than the poorer provinces. I would ask attention to paragraph 63 of the Financial Statement in which I showed the figures of the contributions made to the central account by the various Governments. Now, I take the Central Provinces: those provinces have a population of ten millions and contribute Rx. 451,000. Bengal has a population of seven times as much, but contributes ten times as much. Madras has a population of three and a half times as much, but contributes ten times as much. Bombay has a population of not quite twice the amount of the Centtal Provinces, but its contribution is about six times the amount that the Central Provinces contribute. I think there is no better proof than that afforded by those statements that the present provincial system is not liable to the charge, that the poorer provinces are taxed beyond their power, and that the largest provinces get off with too small a contribution.

"And with reference to the proposal that it might be possible to alter the system of assignment altogether, which has been made by the Hon'ble Mr. Bhuskute, and partly also by His Honour the Lieutenant-Governor, I can only say that the question has been considered over and over again and that there are immense difficulties in the way. You cannot deal with India as a homogeneous country. Various provinces are in various stages of advancement. Bombay and Bengal, which have been a long time under the control of the British Government, are advanced provinces to an extent to which such recent occupation as the Central Provinces can lay no claim. They are better fitted out with roads and communications; their whole administrative

system is more complete; the population is for the most part a more dense one; and their industrial development is also very much greater. You cannot deal on the same footing with such provinces as Bombay and the Central Provinces, which, although neighbours of each other, are yet in such entirely different stages of development. Now, if we were to attempt to make a theoretical distribution of liability according to the Hon'ble Mr. Bhuskute's plan so that the same tax per head should be levied towards Imperial purposes from the various provinces, we would be met at the outset by this impossibility—we would be assuming an equality between provinces which does not exist. It is perhaps a fault, but it is an inevitable fault of the provincial system, that we must take the actual state of each province as a starting point, and the result of the provincial system, as at present applied, is that taking that starting point each Local Government can practically keep in its demands upon the general account its relative position with reference to all other provinces. We cannot, for example, reduce the assignment made to Bombay because we find that in some respects its expenditure is greater than that of Bengal and might theoretically be reduced to the same standard. It is not practicable to impose upon any province an obligation to reduce its expenditure to the standard of another province. Suppose, for example, that dealing with questions by the head of population, we were to tell Bombay that we must reduce its assignment by half a crore. What would that mean to Bombay? It would only mean that it would not have the means of carrying on its existing system of administration; perhaps it would have to discharge some hundreds of its officers. We would certainly dislocate by this means its whole administration. We must, therefore, as I say, deal with each province, in the consideration of the requirements of its administrative expenditure, almost as a separate unit, and in these matters at least take each province as we find it. I quite agree with the theory of His Honour the Lieutenant-Governor that the Government of India has a very direct interest in provincial expenditure and should not wash its hands of responsibility for it. I think the Government of India gave a very satisfactory proof of their acceptance of that theory in returning into the hands of the Provincial Administrations the balances which it was obliged to take from them when it had to impose upon them a share of the retrenchment which had to be effected two years ago.

"I have taken a note also of the Hon'ble Mr. Bhuskute's remarks in which he called upon us for reduction of taxation, but unfortunately they are mixed up with calls for increase of expenditure. These are two things which it is very obvious will not go together. You cannot reduce taxation and at the same time urge, as Mr. Bhuskute does, that 'the department of Police should undergo a thorough revision,' that 'there is an universal cry for the separation of the Judicial and Executive functions, and for larger grants for higher education' on the ground that the taste for learning has increased and the amounts at present allowed are inadequate. I freely admit that it is highly desirable that we should increase expenditure in some directions, but it must be continually borne in mind that if we increase the expenditure we can only do so by increasing taxation. It is no use to call upon us to diminish this tax and that tax, if at the same time you call for increased expenditure. At the same time I would call attention to one of the theories of the Hon'ble Rai Ananda Charlu with reference to provincial and local arrangements. He protests against our entering upon a new settlement of our contracts with the Provincial Governments with the idea that we are going to make money out of the operation. He points out with perfect truth that the local funds, which, I admit, are in Madras developed to a much larger extent than in any other part of India, are demanding larger assignments of funds from the Provincial Government, that the Provincial Government requires for this and other purposes larger funds; and he argues that therefore we are called upon to increase the provincial assignment that all this may be undertaken. But then the question is where is the money to come from? He protests against our sending Settlement-officers over the land because it means enhancement of land-revenue; and he wants the salt-tax reduced. You cannot be increasing your provincial assignments and increasing provincial and local expenditure unless you are prepared to pay for it by paying increased taxes.

"He has called upon us also to restore the Famine Fund, and declares that

it is useless for us to talk of restoring the Famine Fund, because in order to do that we must repay to it the seven crores of rupees by which the forward totals fall short of 1½ crores a year. I have to ask again where these seven crores are to come from? I would ask, for example, what would be thought if I were to give notice now, that, as the Hon'ble Rai Ananda Charlu has pointed out this obligation on the part of Government, at the next sitting of Council I would introduce a Bill by which the income-tax for the present year would be quintupled, because it would require fully that amount of taxation to restore these seven crores of rupees which he represents to belong to the Famine Fund? Government does not possess money other than what it derives from taxation. It is no use saying that we must get this money and that money if at the same time it is known that it cannot be got except by taxation. The Famine Fund had occasionally to be suspended because the Government did not possess the money to keep it at a crore and a half; and it deliberately chose to suspend the grant rather than impose a new burden upon the people. If the Hon'ble Rai Ananda Charlu's advice had been taken then it would have been necessary, in order to keep up the Famine Grant up to the mark, to impose some new tax upon the people; it is quite obvious that in no other way could Government have observed the obligation which he insists upon to keep up the Famine Fund to a standard of one and a half crores. But, as regards this assumed standard, I shall read a paragraph from Sir John Strachey's statement dated the 27th December, 1877, which shews that it was never his intention to permanently fix it at one and a half crores, and that he knew perfectly well that the question would arise whether it should be maintained at that figure or should be reduced :—

* * * * * * *

'Making all allowances for these considerations, I cannot now venture to estimate the yearly average cost of famines in loss of revenue and actual expenditure at less than £1,500,000. This amount has necessarily been arrived at in a somewhat arbitrary manner, and it will be seen to correspond approximately with the sum that would be requisite to distribute the charges of the last five years over a period of ten years. It will remain for the Government in the future to reconsider, from time to time, the practical result of the assumption which we are now constrained to make on what are necessarily imperfect grounds, and to take all requisite steps in the way of correcting any error into which farther experience may indicate that we have fallen, either in the one direction or the other.'

* * * * * * *

"I cannot imagine a more distinct statement made by the founder of the Fund shewing that it was not to be fixed at one and a half crores and that the amount was to be reconsidered from time to time. We have done so, and the Government has come to the conclusion on the facts set forth in the Financial Statement that, for the present at least, we meet all necessary obligation by keeping it at a million. So far as the power to reduce the amount is concerned, the Government is at perfect liberty to reduce it to a million or any other sum which the experience of the past may teach to be expedient. The original sum was fixed as the amount which the then Government calculated to be sufficient and expedient, and in the same way the present or any future Government can consider the question upon the same basis and find it sufficient and expedient to fix it at a crore. I am rather sorry to see that an Hon'ble Member of this Council should charge the Government with something like a breach of faith or dishonesty in its reducing the amount to a million, and should declare that he expects further dishonesty to take place because we have been using the term 'grant' instead of the term 'fund' which he prefers to use. As to this point perhaps I may also quote from the same speech of Sir John Strachey. It is to these speeches, delivered at the time of the institution of the Famine Fund or Famine Grant that we must appeal to discover the meaning of the Famine Insurance system and to see from the expressions in them what the intentions were that the founders wished to be carried out :—

* * * * * * *

'So far, however, as we can now speak for the future, the Government of India intends to keep this million and a half as an insurance against famine alone. In saying

this I should explain that we do not contemplate the constitution of any separate statutory fund, as such a course would be attended with many useless and inconvenient complications, without giving any real security. Unless, then, it should be proved hereafter by experience that the annual appropriation of a smaller sum from our revenues will give to the country the protection which it requires, we consider that the estimates of every year ought to make provision for religiously applying the sum I have mentioned to this sole purpose, and I hope that no desire to carry out any administrative improvement, however urgent, or any fiscal reform, however wise, will tempt the Government to neglect this sacred trust.'

"One of the inconvenient complications which Sir John Strachey foresaw and deprecated was that we would from time to time have to temporarily increase the taxation purely for maintaining the Fund at a certain amount, and we might have now to introduce a Bill to levy seven crores of rupees of new taxes from the people in order to restore this seven crores which the Hon'ble Member claims for his Famine Fund.

"The Hon'ble Member does not at all say what we are to do with these seven crores. I suppose they are to be put into some hiding place. He seems to have overlooked the fact that there is nobody but ourselves to whom the restoration could be made ; it is the Government treasury alone to whom the restoration could be made.

"There is one thing also with reference to which I desire to express my regret. The Hon'ble Member who represents Madras has used the word 'protest' half a dozen times, and it is my duty on the part of Government also to make a protest. My protest is this, that when an Hon'ble Member desires to make a statement on a subject in which he accuses the Government of dishonesty, which the Hon'ble Member has done, he ought to be very careful in ascertaining the facts. I do not think that my hon'ble friend Rai Ananda Charlu has done so before bringing this accusation against us. If I followed his statement rightly—and Hon'ble Members here have had the same opportunity as I have had of following his speech—he has accused us of suppressing the Famine Fund, and he has accused us of using this Fund for the purposes of ordinary irrigation, ordinary railway-construction and other things. He has also accused us of concealing these facts. At the last meeting of the Council I stated that if any Hon'ble Member desired to have information on any points which were not fully enough explained in the Financial Statement, I would be very pleased if he gave me notice of what he wanted in order that I might possibly give him all the information he pleased. The Hon'ble Rai Ananda Charlu has not asked for a single piece of information, and yet he now says that the Government has acted dishonestly in respect of these moneys and we are withholding the facts and the accounts of the expenditure. There is not a single point in all the information which he says we are withholding because we dare not publish it, in which the fullest details are not set forth in our annual accounts for the benefit of every one who desires information ; and they are set out not only for the year concerned but for all previous years. The Government accounts are available for any Hon'ble Member (in fact, for any member of the public,) who wishes to see them, and any one with the slightest knowledge of how the work of Government is done ought to know that the Government publishes these accounts. I have great pleasure in passing down a copy of the accounts of 1894-95 to the Hon'ble Rai Ananda Charlu, if he wants to satisfy himself that the Government of India has published the full information he desires.

"I am afraid I am a little discursive in the order in which I take up the different subjects. It is rather difficult for me to take up my subjects in a regular and definite order, because I have been busy the whole day in taking notes of the various statements which have been made by the speakers, and I am obliged to bring matters forward in the order in which I have taken notes.

"I am led back now to the salt-duties, which have been criticised and represented to us as a heavy burden upon the people. If it is a burden at all, it is a burden which not a soul in the country feels, and this is good evidence that it is a burden which can be very easily borne. Of course I quite agree in thinking that it is desirable that these duties should be reduced if possible, and possibly some day the question may arise. But there is one thing I will impress

upon Hon'ble Members who think that the Government imposed a heavy burden by the increase of the salt-duties, which took place about ten years ago, and that is, that instead of affecting the salt-trade by making the price of salt higher, during the last ten years the price of salt has been very much lower than it was ever before in this country.

"I have here statistics which go back to the year 1861 and there is hardly a single province except Burma in which the figures do not show that salt at the present day sells at a cheaper price than it ever did before. The truth is that the improvement of communication in the country and the gradual extension of railways has cheapened salt so much that notwithstanding the taxation imposed upon it its price has not been added to. The consequence therefore is that the burden upon the people in respect of the salt, instead of increasing, continues to diminish and has been continually diminishing.

"As regards the burden of land-revenue the Hon'ble Rai Ananda Charlu has expressed his horror at seeing the Settlement-officer let loose in every province raising the land-revenue. I will read a paragraph from a despatch which was recently sent by the Secretary of State which will show that the land revenue has also been a gradually diminishing burden upon the people. This paragraph runs as follows—

* * * * * * *

'8. We shall first set forth, as briefly as the facts permit, the successive steps by which the Government share of the assets of land has been reduced.

'It was laid down in Regulations IX and X of 1812, following the precedent of the Permament Settlement, that a net income of 10 per cent. on the Government demand should be reserved to the proprietors. This fixed the State's share of the assets at 91 per cent. Regulation VII of 1822 raised their income to 20 per cent., and reduced the share of the State to 83 per cent. of the assets. The assessment was to be based upon an enquiry into the productive capacity of each field or plot of land; and the Resolution which accompanied the Regulation substituted for the two or three years term of settlement that had till then been customary, a term of ten to twelve years, and thus introduced the first long-term settlements. The detailed enquiry thus prescribed was found to be impracticable, and Regulation IX of 1833 was based upon a minute by Lord William Bentinck, dated 26th September, 1832, in which he proposed that the demand should be fixed upon a general consideration of the circumstances of each village or estate, and that the term should be extended to fifteen or twenty years. At the same time, he limited the Government share of the assets to 70 to 75 per cent. All the early settlements of the North-Western Provinces were made under this Regulation, and for the most part for a term of thirty years. In 1844 Mr. Thomason, Lieutentant-Governor of the North-Western Provinces, reduced the share of the net assets to be taken as revenue to two-thirds, or 67 per cent. In 1855 the demand was still further reduced by the Saharanpur Instructions, Rule XXXVI of which limited it to 50 per cent. of what were described as "the *real* average assets," and this proportion has ever since formed the basis of assessment in Northern India; though, as we shall presently show, still further reduction has been authorised in certain cases.'

"I wish in addition to this to point out to my hon'ble friend a purely arithmetical calculation which will show how much of the increase of the productiveness of the land has fallen to the share of the proprietors and how very small the increase to Government has been. We will assume that the land-revenue at present is something like 25 crores. The purpose for which I am making use of this figure is one in regard to which we need not be particular. I will assume that fifty years ago the land-revenue assessed upon the same territory was 15 crores and that we have during this time increased our assessment of land-revenue from 15 crores to 25 crores. Let us see what this enhancement really means to the people of the country. We fixed it at 15 crores at a time when Government got 75 per cent of the assets and the people got 25 per cent. The people's share of the assets, fifty years ago, was therefore five crores. Now, when we get 25 crores we get 50 per cent., and the consequence is that the share of the people is equal to our own and is equal to 25 crores. So that the Government share of the produce of the land has increased from 15 crores to 25 crores, but the share of the people has increased from 5 crores to 25 crores. This will show that the enhancement of the land-revenue has been brought about without adding to the burden of the people, and that the amount left in the people's pockets after each settlement is greater than at each previous

settlement. This is what our Settlement-officers have done; they universally find that in claiming for Government its proper share of the enhancement of the produce of the land, they leave a continually increasing share in the pockets of the people.

"Another matter which was referred to in the Hon'ble Mr. Bhuskute's address was his declaration that the vigorous prosecution of railways has caused us heavy loss, and in the same way the Hon'ble Rai Ananda Charlu says that we are imposing a new and unnecessary burden, because we are raising four crores of rupees during the current year for the construction of railways. I can only say that the vigorous prosecution of railways during the last ten years has not caused loss of revenue. Our railways have produced more than the interest on the loans raised for the purpose of construction, and as regards these four crores of rupees that we are to raise this year, every single railway project has been separately investigated and the greater part of them will produce a great deal more than the amount we will have to pay as interest on the loan. At the present moment the whole of our loss on railway transactions is about two crores of rupees, that is to say, we have constructed and we are running 19,000 or 20,000 miles of railway, part of them constructed on military grounds and without reference to commercial returns; part of them constructed for protective purposes—protection against famine; and most of them constructed for commercial purposes. Taking the whole of them, the charge to Government is only two crores of rupees. I would ask simply as a question of policy whether the possession of these 20,000 miles of railway is not worth to the people of India two crores of rupees. There is not a soul in the room who would not admit that India would be better for these railways even if the people had to pay ten crores a year instead of two.

"With reference to these two crores of rupees I have also to state that the loss which we have to bear mostly arises upon railways constructed on the guaranteed system. The loss a few years ago was only 70 lakhs of rupees. It has since mounted to two crores mainly because we have to bear a heavy loss of exchange upon the sterling debt connected with the older railways. But it is obvious that this heavy loss has nothing to do with the present construction of railways. We would have to bear this loss even if we were not constructing any railways during the last ten or twenty years. The later construction and expansion of railways has therefore been on the whole a financial gain.

"Before I close I want to refer to another statement which is made in the Hon'ble Mr. Bhuskute's address and which refers to the military expenditure. We have been liberally accused on all sides of having indulged in heavy military expenditure, and putting the figures of 1887 and 1893 side by side it is stated that the latter has risen by $2\frac{3}{4}$ crores of rupees; and the statement is made that the only portion of the increase due to exchange is 95 lakhs. The Hon'ble Mr. Bhuskute is erring in good company, for the *Economist* made the same blunder in a criticism it published about July last. The Hon'ble Mr. Bhuskute when he talks of these charges means that the figures which are entered in the exchange column account for only 96 lakhs of increase; but he forgets, what has often been pointed out, that there are a number of charges which enter into our Indian column of expenditure which are very much affected indeed by exchange. One of them, for example, is the obligation to pay the British soldier at a sterling rate. The consequence is that as the rate of exchange falls we have to pay him more rupees. I have made an actual calculation of the difference which arose between 1887 and 1893 on this account and also on account of exchange compensation allowance which, whether the Hon'ble Member is in favour of it or not, he must admit arises purely from the fall in rate of exchange. From these figures I take it that from 55 to 60 lakhs are the amount of the increase which is made in the British soldier's pay and 26 lakhs were the amount which we had to pay for exchange compensation in the year 1893. These two amounts taken together make up 81 to 86 lakhs of rupees, and these 86 lakhs do not represent increased military expenditure, as the Hon'ble Member and the *Economist* put it, but arise from the fall in exchange.

"There is one thing with reference to this subject which I wish to mention. It seems to me that I have been unnecessarily modest in not claiming for

myself the whole of the credit for the improvement that has occurred in the financial state of affairs. I thought I was bound to be honest and state that the increase of some Rx. 1,400,000 was due to exchange. For many years past the Government of India has been declaring that the difficulty they were in had been almost entirely due to the imposition upon it of the burdens arising from the loss in exchange, and that statement has been continually denied by our critics, and we have been continually told that our difficulties arose from our own extravagance and that it was not any loss in exchange which produced this result. Well, the people who make that statement against us are bound, if they are consistent with themselves, to admit that the improvement in the present state of finances is due to our own good management, and that it is nonsense on our part to allege that the improvement is due to the rise in the value of the rupee. If they were right, and we were wrong, in estimating the gravity of the effect of the falling rupee, they are bound now to give to us, and not to the rising rupee, the credit of the recovery that has taken place.

"The Hon'ble Mr. Bhuskute, in the twelfth page of the statement which he has made, compares the duty and consumption of salt in 1886-87 with that in 1894, and deduces a conclusion as to the poverty of the people. I know where he has got these figures, but there is one important thing he omitted to observe. The consumption of salt in any given twelve months from various circumstances is always altering. The Hon'ble Mr. Bhuskute has taken as his first year one in which it was abnormally large, and for his second year one in which it was abnormally small. If he had only taken as his figures for 1886-87 those which are the average for that year and the year before it and the year after it, and for the second year also not the figures of that year but the figure which is the average of that year and the year before it and the year after it, the result is that the consumption of salt for the first period on which the Hon'ble Member makes his stand is 32·8 millions of maunds and for the second 34·4, and the Hon'ble Mr. Bhuskute's conclusion as to 'the poverty of the masses' becomes reversed.

"In connection with the taxation of salt, which is said to be an extreme burden upon the masses, I wish to make one remark. One can hardly understand the people of India being an over-taxed people, as they are often represented to be by Native political associations, if they do not in some way or another feel the burden of the tax. But the truth is that there is not one man in a hundred who is in the least degree aware that he contributes a single pice to the system under which he obtains security for his property and person to which his forefathers of three generations ago were utter strangers, and is assured of the possession of legal rights which are superior to those enjoyed by many nations of the West. I can only oppose to this imaginary, poor, over-taxed raiyat the fact, which is perfectly notorious and which every one can verify for himself, that there is not a single country in the civilized world where the amount of taxation is so small as it is in India.

"And here I want to add one remark with reference to the military expenditure which is attacked by the Hon'ble Mr. Bhuskute and a great many other people as a tremendously heavy one. I can quite understand the ordinary cultivator, whose knowledge of history never goes beyond his own life and whose experience is limited by the boundaries of his own village, thinking that the state of peace, prosperity, tranquillity and comfort which he enjoys is the natural condition of India. But for educated gentlemen like our political critics to know nothing of the history of their own country astonishes me. They have only to look back one hundred years to see that those fields which now smile with yellow harvest and which the husbandman can till every year with the absolute assurance that in time he will reap his harvest were year by year liable to be devastated by warfare or by the rivalries of contending chiefs whose armies plundered the country. The districts from which the Hon'ble Mr. Bhuskute comes were the highway between Northern India and the Dekkhan. They were the districts through which the armies of the Mogul poured from Northern India to the Dekkhan for conquest and for plunder. The whole country within the last hundred years resounded to the tramp of armies and was filled with robbery and rapine, and that is a state of things which would return to India if the British army were withdrawn. The one security that India has for the

continual preservation of that state of peace and tranquillity is that there is one Paramount authority that possesses sufficient power to suppress all disorderly elements. It is at the back of our civil administration, which would not be effective unless it could carry out its duties in peace and quietness. The cost of the army, to which 250 millions of people are indebted for the peace and tranquillity which they enjoy, comes to something a little more than half a rupee per head of the people protected. The Hon'ble Sir Henry Brackenbury has made a very full statement to-day which is a complete answer to those who think that the interests of economy are not fully studied in its administration. There is no army so effective anywhere as the army of India; none in which the money spent is made to go so far in the direction of efficiency. I cannot understand how educated people who know the perpetual condition of warfare and insecurity in which people were in India before it was occupied by one over-mastering Power can make any objection to the military expenditure which is necessary for maintaining the security, peace and tranquillity, to which Mr. Bhuskute refers as one of the gifts of the British power.

"My Lord, I have left till the end a necessary duty—that of answering the questions which have been put to me by the Hon'ble Mr. Playfair. I shall answer them one by one. The first question that he asked was with reference to opium—whether I consider that the rise in the price which we offer for crude opium is sufficient. I think it is, and my reasons are that it has secured to us as much extension of cultivation as we wanted: that is, enough to enable us to recommence piling up a reserve. I regret that the crop has partially failed, and that the raiyats again will fail to benefit by the enhanced price to the extent that we and they hoped they would. What is wanted more than anything else is a favourable season; and, if we were to get a fairly favourable season, I am quite sure that the cultivator would get such encouragement that we would obtain, at the price we at present offer, all and more than all the cultivation we want.

"Another question was asked with regard to the interest which we propose to fix for the loan which we are about to issue. This is rather a difficult question to answer just now, for it is difficult for me to make a statement, without its being held to some extent to be binding. I must therefore begin by saying that any statement I make now will be understood as not in any way binding upon us when we come to make a settlement of the terms of the new loan. What they will really be depends solely upon the state of the market at the time. But, if I am allowed to make this complete reservation as to what we may do, I have no hesitation in saying that, unless circumstances change, my advice to the Government will be to issue a three per cent. loan and to add conditions guaranteeing it against a reduction of interest for a certain number of years, say, twenty years or something like that.

"I hope my hon'ble friend will be satisfied with that answer. It is impossible for me to give any answer which may be taken in any way as pledging the Government.

"In regard to the question of saving bank balances raised by the Hon'ble Member, the difficulty raised is one which is felt not only by the Government in this country but by the Government at home. The only security which we have in respect of our saving bank balances is that the amounts are all extremely small, so that it requires a very large combination of depositors to make a demand upon us which we would have the least difficulty in immediately meeting. They are, of course, secure of being all ultimately met, in any circumstances. We have, as the Hon'ble Member points out, about 10 crores on deposit payable upon call. But 10 crores is composed of a very large number of very minute items, and in practice we have as little danger to fear as any ordinary Bank, in respect of the calls of its depositors.

"Now, my Lord, before I close I have one word to say. It may be considered impertinence on the part of a junior Member of your Excellency's Council to say a word in acknowledgment of the services of a senior Member of this Council. But my relations with my hon'ble friend Sir Henry Brackenbury in the financial administration of his department have been such, that it is impossible for me to allow him to leave this Council without conveying to him, on the part

of the department over which I have the honour to preside, our acknowledgments for the grand work that he has done in bringing under complete financial control the whole of the expenditure of his department. I have had in my time of service in the Financial Department, now extending back over a quarter of a century, not a few contests with the Military Department. It is almost necessary that these should arise, because the Military Department is peculiarly the spending department of the Government and the Financial Department is very much interested in its financial control and in its financial arrangements. But there have been no difficulties of this kind during the time that I have had as my colleague the distinguished officer who sits on my left, and who is not only a distinguished soldier and military administrator, but is also a financier, and in that capacity has been able to give to me in my official duties most material assistance and helpful counsel."

His Excellency THE PRESIDENT said:—"I recognise with pleasure that no attack has been made on the policy of the Budget now under discussion, which calls for any general defence from me. It is not a sensational Budget; it is, as the Hon'ble Member has said, a modest Budget, as modest as himself, but I doubt if sensational Budgets are always the most satisfactory. It is generally agreed that, in the circumstances of the present time, the proper financial policy for India is one that is cautious, moderate and conservative, and that while the time may come, as the Hon'ble Member has hinted, for a comprehensive revision of the position, that time is not yet. What we have done in the Budget before us is to take advantage of the increase of the revenue which has exceeded the anticipations of last year, in two ways; in the first place, to retrace certain steps which we were very unwillingly obliged to take in laying under contribution for general purposes, grants which otherwise would have been devoted to special and useful purposes; and, in the second place, to the making good of special deficiencies. It is, in my opinion, most satisfactory that we have been again able to grant the large sum of a crore of rupees to the purpose of Famine Insurance—purposes as to which I cannot altogether accept the definition of the Hon'ble Mr. Ananda Charlu, which I venture to think is based on some misconception of the original proposals, of the nature of the transactions of the last fifteen years, and of the necessities of to-day. It is also most satisfactory that we have been able to restore to Provincial Governments the contributions from their balances which we had to demand in 1894. I have for myself always entirely sympathised with the disappointment which the Local Governments must feel, when they are suddenly called upon to relinquish funds on which they had calculated for works which they considered essential for the well-being of the people under their care.

"It is satisfactory also, for the reasons so well stated by the Hon'ble the Military Member, that we are at last able to complete those arrangements on which, it has been long recognised, in an emergency the safety of the Empire would depend. There is only one general remark which I would like to make with reference to these aspects of the Budget, and that is that it must not be supposed that we are going to deal equally generously with all demands of the kind. My hon'ble colleague, the Financial Member, will insist on as strict economy as the Hon'ble Mr. Ananda Charlu can desire.

"I am sure the Council will have heard with much interest the statement which has been made by the Hon'ble the Military Member; and not only have we listened to it with interest, but it will be exceedingly valuable to have on our proceedings a record of this kind. It is a record of a great work, not only the work during five years of an individual of distinguished ability, but the work of a great Department of State under the guidance of the Hon'ble Member. It is, I believe, a record of progress both in efficiency and in economy.

"We shall all miss the Hon'ble Member in our debates here, but we rejoice to know that the influence of his work will be felt in India for many years to come.

"There is another great Department, however, in which it is impossible for me not to take a personal interest, and to which I should like to refer. The

Hon'ble Mr. Playfair has spoken of the importance to India of its railways. He not unnaturally dwells specially on the question of rates. But I shall, with him, postpone the discussion of that delicate question. He has, however, spoken of the general railway policy of the Government with approval, and I should like to say a word or two about that.

"The development of the country by the construction of railways has for long been the recognised policy of the Government of India, and I need support it by no detailed argument. The fact is that it is the method by which we can materially improve the condition of the vast population dependent upon agriculture most surely and most steadily, and I am the last person to deny the contention of the Hon'ble Member from the Central Provinces that there is much in the condition of the agricultural population that calls for the careful attention of the Government. Even irrigation works, all important as they are in certain localities, can scarcely claim such far-reaching results as railways; at all events, unless irrigation and railway works proceed simultaneously.

"I need scarcely point out that the improvement in the condition of the people which I have claimed for railways has a special bearing on the discussion of to-day. I believe that, if the lines we have constructed for military purposes and protection against famine are kept separate, a very sufficient return is realised on the capital we have expended on railways. But, in truth, their value is far greater indirectly—from the growth and stability of the land-revenue on which Indian finance depends so much, and which in its turn depends largely on increased facilities of communication.

"But while there has never been much doubt about the policy, there has been considerable debate as to the best means of carrying it out. At first the construction of railways was generally entrusted to companies under some form of guarantee; then came a period when State agency alone was employed. Since 1880 the pendulum has swung now to one side, now to another: and the problem has been how best to utilise the resources of the State on the one hand, and the funds which private enterprise offers on the other.

"I think there has been some misconception of what the Government have been doing in the matter. I shall not repeat more than necessary what has been said by other Members, but I should like to say how it appears to me.

"As a preliminary, however, we must clearly understand what we mean by private enterprise as applied to railways. It is not the same, and probably it never can be wholly the same here, as it is in England. There it means that certain persons propose to construct a railway; they obtain surveys and estimates and prepare their Bill; they prove their surveys and estimates before a Select Committee, and pass their Bill, if they can. They raise their capital, buy the land, carry out their works; and, if they succeed in all this, they may make a profit. Throughout they look for nothing from the State. Parliament gives them certain rights, and imposes on them certain obligations, but only interferes with them financially by mulcting them in heavy Parliamentary expenses.

"We have nothing of all this in India, not even the last item. Private enterprise does not stand alone in this way. I do not propose at present to examine the causes of this; I merely ask you to note the fact that it is the State which makes the survey, which examines the estimates, which sanctions the project which provides the land, which perhaps builds the line, and, quite possibly, in certain circumstances, might even work it. In fact the assistance given to the Government in India by private enterprise, with scarcely an exception, takes one of two forms: (1) it raises the capital in the sense that it acts as intermediary between the Government and the individual investor; or (2) it undertakes the management of the line when opened. Of the second, I need not say more than this, that the policy of entrusting the working of railways to company management has, in several instances, proved very successful, and may be carried further with advantage, provided that the companies are such that we can be sure the management will be in the hands of capable and energetic men.

"As to the raising of capital, I need scarcely remind you that the determining cause is the nature of the security offered. In proportion to any doubt which the investor may entertain of the safety of his investment will he demand a larger interest on his loan. The Government of India could certainly borrow on its own account all the money required for its railways at the cheapest rate, if it consented to offer the security of the revenues of India. Of late years, as I have said, it has been thought wiser not to do this in all cases, and the assistance of private enterprise has therefore been sought. That was the origin of the Branch Lines Resolution of 1893, which offered, not the guarantee of the Government, but a security based on certain traffic arrangements. I believe that as all, or almost all, of the lines coming under this Resolution would have been lines which had been approved by the Government as likely to give a fair return, the terms of the Resolution did, as a matter of fact, afford ample security. But, unfortunately, the conditions were necessarily somewhat complicated, and it was impossible so to state them as to bring home to the average reader what his true position would be. The results, therefore, have been disappointing, and the Government have taken the whole matter into consideration. It has now been determined to issue a new Resolution for branch lines which will offer two alternatives—

(1) a fixed yearly minimum dividend with such share of the surplus net profits as may be agreed upon; or,
(2) a rebate arrangement on the lines of the present.

"The particular rate of interest will, of course, form part of the bargain, but the present intention is that the minimum dividend to be guaranteed under the first alternative should not exceed 3 per cent., and the rate of interest secured by rebates under the second alternative should be $3\frac{1}{2}$ per cent.

"The effect will be shortly this—

"Under (1) the company will receive an absolute guarantee of interest at a rate not exceeding 3 per cent. and a higher return if the net earnings of the branch are sufficient to pay more than the guaranteed dividend; and, as an alternative, under (2) the company will receive a dividend of $3\frac{1}{2}$ per cent., provided that the amount of the net earnings from local and interchanged traffic be sufficient, and a higher return if the net earnings of the branch from its own traffic be sufficient to pay a higher dividend.

"I do not wish to be misunderstood. We do not put forward this new Resolution because the small success of the former Resolution has hindered us in pushing forward the work of construction of railways. I do not believe that the amount of work we are now doing is at all realised, and I should like to give a few figures of mileage to show what it has been during the year now current.

"At the commencement of 1895-96, *i.e.*, on the 1st April, 1895, the total length of railways open for traffic was 18,863 miles, and the mileage under construction, or sanctioned for commencement on the same date, was 2,217 miles. During 1895-96, *i.e.*, from April 1st, 1895, to the present time, the commencement of 2,384 miles of new railway was authorised, and 1,009 miles were opened to traffic.

"Thus the total length of open line at the present moment is 19,873 miles, and the mileage now under construction, or sanctioned for commencement, is 3,564 miles.

"Adding together the amount of construction completed during the current year, and that in hand at the end of it, we have 4,573 miles, or an addition of one-fourth to the existing railways of India. This length of line exceeds the total length constructed in the United Kingdom in the last 20 years—or, to put it another way, is more than double the entire mileage of what is sometimes called the premier railway in England—the London and North-Western Railway Company—while there are only half a dozen Railway Companies in the United Kingdom whose mileage exceeds that which we opened as new lines in India in the single year 1895-96.

"I think that Hon'ble Members will be of opinion that this is a sufficiently extended programme. That part of it which still remains to be completed

represents an expenditure of something like 35 crores. The Financial Statement shows that we are preparing to undertake not much less than a third of it during the year 1896-97, including the amounts which are to be provided by companies, and do not pass through the Government accounts.

"It is also a comprehensive programme if you look at the character of the principal undertakings. In the west, in the Bombay Presidency, we have the Rohri-Kotri Chord, 200 miles, which not only practically doubles the main line to Karachi, but secures us against an interruption of the traffic by the irruption of the Indus.

"Passing northwards, we have in Upper India the new company, the Southern Punjab, with a mileage of 400 miles, shortening materially the distance from Delhi We have extensions of the Bengal and North-Western and Tirhoot State Railway system, 489 miles, which will provide on the north side of the Gogra a much improved communication between the districts where population is congested, and the districts in Eastern Bengal and Assam where labour is scarce, and on the south side of the Gogra a series of branches in the Eastern part of the North-West Provinces which is peculiarly liable to scarcity. We have also an important work, though the mileage is shorter, in the linking-up of the metre gauge systems of the north and west by a new connection between Cawnpore and the Gogra river, 80 miles.

"In Central India we have the Saugor-Katni Line, 118 miles, in connection with the Indian Midland system, which will not only secure districts which have suffered from scarcity more than any others since I came here, but will give a direct access for Umaria coal towards the west; and a similar advantage for east and west traffic has been secured by the construction of the Godhra-Rutlam and Bhopal-Ujjain Railways, a little further south.

"In the east there is the great scheme of the East Coast Railway, long contemplated, and now in a fair way to completion, of which it might be enough to say that Calcutta and Madras seem prepared to tear any one to pieces who denies their claim to the larger share in its benefits. At all events, this large work of which there is now under construction about 600 miles, while it completes the programme of the Famine Commission—a Commission which I may remark did long ago the work which, if I rightly understood the Hon'ble Mr. Ananda Charlu's observations, he asked should now be done—in the one district remaining, Orissa, and gives an independent access to Calcutta to the Bengal and Nagpur Railway, it will connect Madras with the Northern districts of that Presidency, and will bring to it cheaply and expeditiously the excellent coal of Singareni. I am obliged to the Hon'ble Mr. Rees for the warm way in which he has represented the views of Madras.

"In the north-east, by the doubling of a considerable portion of the Eastern Bengal Railway, we hope to provide facilities for the great jute trade in which this city is so largely interested, while it is not too much to say that the construction of the Assam-Bengal Railway, 600 miles, will open up an entire province, and have a lasting effect on another great interest, *i.e.*, trade in tea.

"In Burma we have in hand the completion of the Mu Valley line to Myitkina, which will give a thorough connection to Upper Burma over more than 700 miles of railway and by the Mandalay-Kunlon, 224 miles, the carrying forward of our railways to the Chinese border.

"In addition to all this and outside the mileage figures I have given, the Nizam's Government have several railway projects under consideration, and we are assured that a line in the Godavari Valley of some 400 miles in length will shortly be begun. The growing interest taken by Native States in railway construction is an encouraging symptom.

"I venture to say that in this programme—I do not profess to have described it exhaustively, but only to have touched on its more prominent features and the longer lines—we have endeavoured to provide for the more pressing needs in many directions in the varying conditions of this great Empire. I do not deny that there are many more to satisfy. I know that here in this city there are those who complain of our inaction. I can say for the

Government as well as for myself that we can never be indifferent to anything that would tend to the prosperity of this city and of its trade. No one who has seen the magnificent spectacle of the river crowded with shipping could fail to recognise how strong would be the arguments—sentimental as well as material—against anything that affected adversely interests so great. But, if I may say so in a whisper, we are doing something for Calcutta on the East Coast Railway—on the Eastern Bengal Railway—perhaps I might add in the opening up of Assam. I am not going to argue in detail the vexed question of the connection to the north. I am bound to say that I am not one of those who think two railways always better than one, or three railways better than two, and I am also bound to add that I cannot find evidence to prove that the existing facilities are insufficient for the existing traffic. On the other hand, I admit that there are districts from which new traffic might come to Calcutta, and I admit that, if and when existing facilities prove insufficient, it would be necessary to provide additional facilities. All I would urge is that in the case of new traffic we are bound to have as complete information as can be obtained, in the case of coal fields to be opened up we are bound to be satisfied as to the quality and quantity of the coal, and in the case of fresh facilities we must study the best way of giving them; and, much as I should like to see the coal traffic from Palamow or Jherria filling the docks of Kidderpore, all I can say now is that we are prosecuting our enquiries as to the mineral resources of the district between Calcutta and the North-West, but they are not complete.

"As to fresh facilities *primâ facie*, the first desideratum is to shorten the distance to be travelled. It will have been observed from a reply by the Secretary of State the other day to a question in Parliament that we have acknowledged that it falls to the East Indian Railway to construct what is undoubtedly the shortest line to the north, namely, the line known as the 'grand chord;' but we have coupled that acknowledgment with a very important stipulation. We are distinctly of opinion that full rights to running powers must be reserved for the administration working the Oudh and Rohilkhand Railway over any lines that may hereafter form part of a new through route between Mogal Sarai and Calcutta, and that stipulation will be found in the contract for the construction of the lines to Shergotty and Gaya now sanctioned. We recognise that it is imperative that the mercantile communities not only of Calcutta, but of Upper India, should be secured the full benefits that such a scheme, when carried out, would bring, and what I wish to make clear is that, if we have not been able to accept the case for the immediate construction of a second line between Calcutta and the North-West, we have at least taken care that no steps we are taking now shall be an obstacle to such a line, if it should be found desirable in the future.

"And, if any one has any hesitation about the efficiency of such a provision, I can give him an example. I was till the other day a Director of a Railway Company in Scotland that only by a right to running powers over a certain section of railway has access to an important city. It was essential to our rivals to shut us out if they could, and I will not deny that they did their best, but that they failed I think will be self evident when I mention that the line of which I speak formed the 'run in,' 'the finish,' of the great railway race to the North, of which the home papers were so full a few months ago. There will be no lack of competition if the rivals of the East Indian Railway have the same powers as the rivals of the Caledonian.

"I have shown that our programme is a full programme, and that it covers a great deal of ground. I wish now to impress upon you that all this lays upon the Government one duty above others for the present, *i.e.*, to resist temptation. It *is* very tempting to be asked to embark in large schemes or great works. But, if I am right in saying that the State is concerned in some way or other in every railway enterprise in India, it is undoubtedly incumbent on us not only to push forward railway construction at a favourable time such as this, but to do so at a rate that is not excessive, but can be steadily maintained: to be bold indeed but not to be rash.

With this object it is most desirable that the Government should themselves determine in the case of the larger schemes what new railways are required, and when they ought to be undertaken. It is only by so doing that a programme can be formed, can be adhered to, and can be carried out with regularity and efficiency. For the present it will be clear to every one that so far as large schemes are concerned our hands are full, and our ambitions must be humble.

"But there is another branch of railway construction which is at this moment even more important than the prosecution of large schemes, and that is the construction of those shorter lines which spread out from the great systems and, by gathering together the produce of the country, extend the beneficial influence of these systems over a far wider area. There is but one opinion of the necessity that exists for these lines in all directions, if we are to secure the development of the country of which I spoke at the beginning. I hope that, though our hands are full, it will still be possible to proceed with this work. It is a work which is specially suited for the employment of private enterprise, and I have told you the encouragement we are prepared to offer. It is a work which can also be profitably undertaken by the great main lines themselves, and we are anxious to see them engaged in it. It is a work of which the several items may seem unimportant, yet which is the most potent instrument we possess not only to consolidate and render profitable the great railway system of India, in which so much of its wealth is invested, but to make it an all-powerful agent in the promotion of the material and social advancement and political tranquillity of the people."

CRIMINAL PROCEDURE CODE, 1882, AMENDMENT BILL.

The Hon'ble SIR ALEXANDER MILLER moved that the Report of the Select Committee on the Bill to amend the Code of Criminal Procedure, 1882, be taken into consideration. He said:—"This Bill has been so frequently before the Council, and the effects of the procedure discussed in the Select Committee were explained so fully last week when I presented the Report, that I do not propose to-day to recapitulate what must be fresh in the memory of Members of Council."

The Hon'ble MR. BHUSKUTE said:—"My Lord, the jury system has existed in India in the shape of a germ from time immemorial. Even the law, as it obtains here, recognizes it in the panchayat, arbitration, etc. Nay, the conclusiveness of its judgments has been generally accepted with satisfaction. I should have liked, my Lord, to dwell more on this point, had it not been for the heavy work of this day. I think the Bill as amended will please most of us, though there is some hesitation about section 307 of the original Act. But in my opinion the new wording inserted for the words 'so completely' does not make any new changes."

The Hon'ble NAWAB AMIR-UD-DIN AHMAD KHAN, BAHADUR, said:—"My Lord the Bill to amend the Criminal Procedure Code, popularly known as the Jury Bill, has evoked a good deal of hostile criticism, and has engaged the attention of all classes of the community since its introduction in Your Lordship's Council.

"It is therefore a cause of much satisfaction that the Select Committee, as the result of their deliberations, have modified the original Bill to such an extent as to render any further adverse criticism unnecessary and have presented the measure in a form in which it can meet with general approval. The elimination from the Bill, as introduced, of the provision in respect of special verdicts on specific issues of fact is the most noticeable feature of the Bill, as amended, and will be regarded as a very necessary modification, while the provision requiring High Courts to consider the entire evidence and to give due weight to the opinions of the Sessions Judge and jury in cases of reference when the Judge and jury differ in the matter of a verdict, and extending the period of

exemption from service to twelve months in the case of special jurors, will I have no doubt make the jury system more acceptable to the people generally. I am exceedingly glad to find that the measure as it stands deserves cordial support, and I desire to be permitted to avail myself of this opportunity of congratulating the Hon'ble the Law Member in having on the eve of his laying down his high office been enabled to allay the uneasiness to which the Bill as introduced gave rise."

The motion was put and agreed to.

The Hon'ble SIR ALEXANDER MILLER moved that the Bill, as amended, be passed.

The motion was put and agreed to.

UNITED KINGDOM PROBATES BILL.

The Hon'ble SIR ALEXANDER MILLER said:—"The next motion in my name is the one with reference to the Probates and Letters of Administration Bill. I introduced this under the impression that it was perfectly and obviously non-contentious, and when I received from the Hon'ble Mr. Playfair the letter from the Administrator General which I thought was merely intended as a hint to call my attention to certain observations on the Bill, which I thought and still think showed an entire misapprehension of its meaning, I did not then think myself called upon to do more than mention the fact to the Council. Since then I have received what might be called a Parliamentary Paper from the Administrator General, which shows that he is still under what, without disrespect to him, I might call the illusion that the Bill will be injurious to the interests of creditors in India; and under the circumstances I do not think it would be wise in me to press for the passing of the Bill without its being referred, in the ordinary way, for the opinions of the various High Courts; and therefore I do not propose to make the motion that stands in my name, but would move that the Bill be circulated for opinion to Local Governments and Administrations and to the High Court of Calcutta."

The motion was put and agreed to.

REFORMATORY SCHOOLS BILL.

The Hon'ble MR. WOODBURN moved for leave to introduce a Bill to amend the Law relating to Reformatory Schools, and to make further provision for dealing with youthful offenders. He said:—"This is a Bill to amend an Act passed by this Council in 1876. Since that period several minor defects have been brought to notice, and some suggestions have been made to the Government by a Conference held in 1892, and the opportunity has been taken to consider the procedure in force in certain British Colonies. The detailed results of this examination are not very numerous, nor are they very important, but most of them are very useful. At this hour of the afternoon I will not refer in detail to them, but I may mention as illustrating them the authority that is given to a Subordinate Magistrate, who is not himself empowered to send an offender to a Reformatory School, to submit to the District Magistrate cases in which he considers that such detention is the most appropriate punishment: another, which I myself regard with special interest, provides authority by which opportunity is given to a Magistrate to discharge with a mere admonition a youthful offender convicted of an offence."

The motion was put and agreed to.

The Hon'ble MR. WOODBURN introduced the Bill.

The Hon'ble MR. WOODBURN moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English, and in the local official Gazettes in English and in such other languages as the Local Governments may think fit.

The motion was put and agreed to.

GLANDERS AND FARCY ACT, 1879, AMENDMENT BILL.

The Hon'ble MR. WOODBURN also moved for leave to introduce a Bill to amend the Glanders and Farcy Act, 1879. He said:—"It has been represented to the Government of India that it is highly expedient and desirable that the Glanders and Farcy Act should be made applicable to the Presidencies of Madras and Bombay and the Province of Bengal, as well as other Provinces in which it is desirable, and the entire object of the Bill is to make that extension."

The motion was put and agreed to.

The Hon'ble MR. WOODBURN introduced the Bill.

The Hon'ble MR. WOODBURN moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English, and in the local official Gazettes in English and in such other languages as the Local Governments may think fit.

The motion was put and agreed to.

The Council adjourned *sine die*.

S. HARVEY JAMES,

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Simla, the 10th April, 1896.

No. 6.—Whereas the non-official Members of the Council of the Governor of Bombay have, in accordance with the Regulations published in the Notification of the Government of India in the Legislative Department, No. 19, dated 23rd June, 1893, recommended Mr. Rahimtula Muhammad Sayani, M.A., LL.B., for nomination as an Additional Member of the Council of the Governor General for the purpose of making Laws and Regulations, His Excellency the Governor General, under the authority vested in him by section 10 of the Indian Councils Act, 1861 (24 and 25 Vict., c. 67), and section 1 of the Indian Councils Act, 1892 (55 and 56 Vict., c. 14), has been pleased to nominate the said Mr. Rahimtula Muhammad Sayani, M.A., LL.B., to be an Additional Member of the said Council of the Governor General.

S. HARVEY JAMES,
Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

ESTABLISHMENTS.

Simla, the 8th April, 1896.

No. 270.—A vacancy having occurred in the office of an Ordinary Member of the Council of the Governor General of India by the resignation of the Honourable Sir Alexander Edward Miller, KT., C.S.I., Q.C., Her Majesty the Queen, Empress of India, has been graciously pleased to appoint Mr. Mackenzie Dalzell Chalmers, Barrister-at-Law, to be an Ordinary Member of the Council of the Governor General of India.

Mr. Chalmers has, on the forenoon of this day, taken upon himself the execution of his office under the usual salute.

No. 271.—The services of Mr. A. Lucas, of the Indian Civil Service, Bombay Establishment, are placed at the disposal of the Foreign Department.

The 10th April, 1896.

No. 276.—Mr. E. A. Gait, of the Indian Civil Service, Director, Department of Land Records

and Agriculture, Assam, is appointed to officiate as Secretary to the Chief Commissioner of Assam, during the absence on furlough of Mr. P. G. Melitus, C.I.E., or until further orders.

No. 279.—Mr. T. W. Rawlins has been permitted to resign Her Majesty's Indian Civil Service, with effect from the 4th February 1896.

No. 284.—Mr. G. M. Ogilvie has been permitted to resign Her Majesty's Indian Civil Service, with effect from the 31st January 1896.

No. 289.—Mr. M. S. Howell, C.I.E., is permitted to resign Her Majesty's Indian Civil Service, with effect from the 18th April 1896, or the subsequent date on which he may sail from India, or relinquish charge of office in the event of his not taking subsidiary leave.

MEDICAL.

The 6th April, 1896.

No. 296.—The services of Surgeon-Lieutenant L. Rogers, M.B., F.R.C.S., Indian Medical Service (Bengal), are placed temporarily at the disposal of the Chief Commissioner of Assam.

JUDICIAL.

The 10th April, 1896.

No. 505.—In exercise of the power conferred by section 4 of the Punjab Courts Act (XVIII of 1884), as amended by Act XIX of 1895, the Governor General in Council is pleased to appoint Mr. J. Frizelle, of the Indian Civil Service, one of the Judges of the Chief Court of the Punjab, to perform the duties of Chief Judge of that Court during the absence on leave of Mr. C. A. Roe.

POLICE.

The 10th April, 1896.

No. 182.—The services of Lieutenant A. H. Bridges, Indian Staff Corps, 16th Bombay Infantry, are placed at the disposal of the Chief Commissioner of Assam for employment as Assistant Commandant of the North Lushai Military Police Battalion.

J. P. HEWETT,
Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

NOTIFICATION.

CIVIL VETERINARY ADMINISTRATION.

Simla, the 7th April, 1896.

No. 499—36-4.—Mr. M. Kelway Bambar, Clinical Assistant to the Imperial Bacteriologist, Civil Veterinary Department, is granted privilege leave for three months, with effect from the 29th April 1896.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Simla, the 7th April, 1896.

No. 570-G.—Major J. H. Sadler, Indian Staff Corps, officiating Political Agent of the 2nd Class, is appointed to officiate as an additional Political Agent of the 1st Class and Political Agent in Kotah, with effect from the date of assuming charge, and during the absence on furlough of Major C. Herbert, or until further orders.

No. 572-G.—Captain H. L. Showers, Indian Staff Corps, Political Assistant of the 3rd Class, is posted, on return from furlough, as Assistant Commissioner of Ajmere, with effect from the date of assuming charge.

Captain R. B. Berkeley, Indian Staff Corps, officiating Political Assistant of the 2nd Class, is posted as Assistant to the Governor-General's Agent in Rajputana, with effect from the date of assuming charge.

No. 574-G.—Lieutenant-Colonel W. H. C. Wyllie, C.I.E., Indian Staff Corps, Resident of the 2nd Class, and Resident in Mewar, is granted special leave to Europe for six months, under Article 348 of the Civil Service Regulations, with effect from the 25th April, 1896, or the subsequent date on which he may avail himself of the leave.

No. 578-G.—With reference to Notification No. 230 G., dated the 10th February, 1896, the provisional recognition of the appointment of Mr. K. Yamada, as Consul for Japan at Bombay, is hereby confirmed.

No. 1142-I.—In exercise of the powers conferred by sections 6 and 8 respectively of the Indian Christian Marriage Act (XV of 1872) as modified by Act II of 1891, the Governor-General in Council is pleased—

(*a*) to grant a license to the Reverend William B. Boggs of the American Baptist Mission, Secunderabad, authorising him to solemnize marriages within the territories of His Highness the Nizam of Hyderabad other than the Hyderabad Assigned Districts and the Cantonment of Secunderabad; and

(*b*) to appoint the said Reverend William B. Boggs to be a Marriage Registrar within the said territories.

The 8th April, 1896.

No. 585-G.—Subject to the confirmation of Her Majesty's Government, the Governor-General in Council is pleased to recognise the appointment of Muhammad Mahmud, Khan Bahadur, as Consul for Persia at Madras.

No. 1169-I.—In exercise of the powers conferred by the notification of the Government of India in the Foreign Department, No. 3478-I., dated the 9th September, 1892, the Governor-General in Council is pleased to direct the transfer of the following criminal appeal pending before the First Assistant to the Resident at Hyderabad by virtue of his jurisdiction over

the Hyderabad Residency Bazars, to the Civil and Sessions Judge, Hyderabad Assigned Districts:

Criminal Appeal No. 18 of 1896. { Syed Mohi-ud-din and Abdur Rahmon *versus* Crown.

The 9th April, 1896.

No. 596-G.—The services of Colonel M. G. Gerard, C.B., C.S.I., Indian Staff Corps, are replaced at the disposal of the Military Department, with effect from the date of his arrival in India, on return from special duty in connection with the Pamir Delimitation Commission.

No. 1181-I.—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to direct that to section 4 of Act XXXVI of 1858 (*an Act relating to Lunatic Asylums*) as applied to railway lands within the Central India Agency by the notification of the Government of India in the Foreign Department, No. 3474-I., dated the 21st October, 1895, the following shall be added, namely:

"Provided also that if a lunatic is an inhabitant of a Native State in the Central India Agency, the Magistrate may, with the consent of the Native State concerned, make him over to the care of such State."

H. S. BARNES,

Offg. Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT.

NOTIFICATIONS.

ACCOUNTS AND FINANCE.
PUBLIC DEBT.

No. 1401-A.

Simla, the 10th April, 1896.

The Governor General in Council is pleased to direct that the following amendments be made in the Rules laid down in the Notification in this Department, No. 6318-A., dated the 28th December 1894, regarding the registration of Government Promissory Notes in Book Debt Account:

(1) In paragraph 11 of the Notification, substitute the words "each non-transferable certificate issued under paragraph 10" for the words "each such certificate issued."

(2) In Rule 10 of the Rules on the form of Stock Certificate, substitute the words "each non-transferable certificate issued for transmission to the Bank of England" for the words "each such certificate issued."

2. The paragraph and the rule as now corrected will run as follows:

(1) *Paragraph 11.*—No enfacement or renewal fees will be levied in respect of the issue of Stock Certificates; but *each non-transferable certificate issued under paragraph 10* by the Bank of Bengal, Madras or Bombay will be chargeable at the rate of one rupee for every Rs. 5,000 or part of Rs. 5,000.

(2) *Rule 10.*—No enfacement or renewal fees charged for issue of Stock Certificates; but *each non-transferable certificate issued for transmission to the Bank of England* by the Bank of Bengal, Madras or Bombay to be charged at the rate of one rupee for every Rs. 5,000 or part of Rs. 5,000.

ACCOUNTS AND FINANCE.

PAPER CURRENCY.

No. 1636-A.

The 10th April, 1896.

The following papers relating to a proposal to take power from the Legislature to raise from eight to ten crores of rupees the limit up to which the paper currency reserve may be invested in Government securities are published for general information.

By order, &c.,

J. F. FINLAY,

Secretary to the Government of India.

No. 5318-A.

The 7th November 1895.

From—J. F. FINLAY, Esq., Secretary to the Government of India, Finance and Commerce Department,

To—The Secretary, Chamber of Commerce, Calcutta. Madras. Bombay.

I am directed by His Excellency the Governor General in Council to request that the Chamber of Commerce will be good enough to favour the Government of India with an expression of their opinion upon a proposal to take power from the Legislature to raise the limit of the paper currency reserve, which is held in Government securities, from eight to ten crores of rupees.

2. The maximum limit of the invested reserve was raised on the last occasion in 1890 from six to eight crores by Act XV of 1890, and in accordance with the requirements of the Currency Act the increases to the investment from time to time were separately notified, the limit of the investment having been raised to seven crores by the Notification in this Department, No. 5900, dated 19th December 1890, and to eight crores by the Notification No. 4861, dated 3rd December 1891.

3. The considerations involved in the question of an increase in the currency investment were fully discussed in 1890, and the history of the subject was brought down to 1889 in my letter to the Chambers of Commerce, No. 6468, dated 23rd December 1889, a copy of which is enclosed. The following table gives the figures of the circulation of paper currency for all India from 1887-88:

[In lakhs of rupees.]

Month.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.

* Figures added in March 1896.

The above figures indicate that the total circulation of currency notes has steadily increased since the year 1887-88 and has now reached a figure about double that of the year 1889-90. But the Government of India are of opinion that these figures of total circulation show the increase as larger than can be considered to be the normal increase which may, with due regard to the caution desirable in the discussion of the question now under consideration, be counted on as certain to continue. In the first place, the Government balances during the past two years have been unusually high and a great portion of the excess balances, held in the Government Reserve Treasuries in currency notes, is included in the circulation. Secondly, the figures include the notes held by the Presidency Banks at their head offices, but the demands for encashment of notes so held are occasionally so large that a considerable portion of them cannot be treated as permanently in circulation.

4. On the grounds above explained, it is considered that for the present purpose it is desirable, in order to prevent all risk of overestimating the permanent circulation, to exclude the balances of currency notes in the head offices of the Presidency Banks and in the Reserve Treasuries from the total circulation. After such exclusion the figures for 1889-90 and subsequent years in the table in paragraph 3 will stand as follows :

[In lakhs of rupees.]

Month.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.
April	13,20	13,71	17,28	18,72	20,°4	18,64	21,81
May	13,39	13,96	17,41	19,47	19,99	19,00	21,34
June	13,40	13,66	17,90	19,97	19,40	19,09	20,83
July	13,44	13,73	17,37	20,59	19,19	19,10	21,49
August	12,95	14,48	17,61	20,49	18,96	19,49	21,58
September	13,20	15,13	17,69	21,66	19,09	19,°5	22,37*
October	13,51	15,88	19,17	22,12	18,83	20,12	23,04*
November	13,31	15,67	19,01	22,30	18,84	20,65	22,84*
December	13,69	16,59	19,39	22,40	19,66	21,82	23,02*
January	13,62	16,92	18,21	21,75	19,19	22,15	22,52*
February	13,33	17,51	18,44	21,33	18,24	21,65	22,49*
March	13,50	17,62	18,45	21,68	18,49	21,31	...
Average ...	13,38	15,40	18,16	21,04	19,23	20,21	...
Maximum ...	13,69	17,62	19,39	22,40	20,84	22,15	...
Minimum ...	12,95	13,66	17,28	18,72	18,24	18,64	...

From this table it is observed that when the last increase to the investment was discussed towards the end of 1889, the circulation (excluding balances in the Reserve Treasuries and the head offices of the Presidency Banks) amounted to only about 13 to 13½ crores, while during the three years ending 1894-95 the minimum circulation has been well above 18 crores.

5. On a consideration of the figures given above, it appears to the Government of India that the circulation of currency notes has now attained a level about 50 per cent. higher than in the year 1889-90, and that it will be quite safe now to raise the limit of the investment to ten crores. The figures might indeed justify an even greater increase in the investment, but the Government of India do not desire to go to the full limit of safety. An investment of the reserve to the extent of ten crores would represent only about 50 per cent. of the average circulation as given in paragraph 4. The proposed increase would therefore appear to leave a fully sufficient margin to secure the immediate convertibility of the note even during a commercial crisis. As previously explained in paragraph 4 of my letter of 23rd December 1889,† over and above the reserve of coin and securities, the general credit of Government is pledged for the convertibility of the note under section 21 (1) of the Paper Currency Act.

† Copy enclosed.

* Figures added in March 1896.

6. The proposal which His Excellency the Governor General in Council is disposed to make now is to take power from the Legislature to increase the limit of the investment from eight to ten crores, and for the reasons above explained, he considers, subject to the opinions he may receive from the Presidency Banks and the Chambers of Commerce, that this power may be used with safety on some convenient occasion when it may be possible to carry out the operation without affecting the public market.

7. I am to say that His Excellency in Council will be glad to be favoured with the views of the Chamber as early as may be convenient.

No. 5319-A.

The 7th November 1895.

From—J. F. FINLAY, Esq., Secretary to the Government of India, Finance and Commerce Department,

To—The Secretary, Bank of Bengal. Madras Bombay.

I am directed by His Excellency the Governor General in Council to request that the Directors of the Bank will be good enough to favour the Government of India with an expression of their opinion upon a proposal to take power from the Legislature to raise the limit of the paper currency reserve, which is held in Government securities, from eight to ten crores of rupees.

2. The maximum limit of the invested reserve was raised on the last occasion in 1890 from six to eight crores by Act XV of 1890, and in accordance with the requirements of the Currency Act the increases to the investment from time to time were separately notified, the limit of the investment having been raised to seven crores by the Notification in this Department, No. 5900, dated 19th December 1890, and to eight crores by the Notification No. 4861, dated 3rd December 1891.

3. The considerations involved in the question of an increase in the currency investment were fully discussed in 1890, and the history of the subject was brought down to 1889 in my letter to the Chambers of Commerce, No. 6468, dated 23rd December 1889, a copy of which is enclosed. The following table gives the figures of the circulation of paper currency for all India from 1887-88:

[In lakhs of rupees.]

Minimum ...	12,95	13,66	17,28	18,72	18,24	18,64	...

From this table it is observed that when the last increase to the investment was discussed towards the end of 1889, the circulation (excluding balances in the Reserve Treasuries and the head offices of the Presidency Banks) amounted to only about 13 to 13½ crores, while during the three years ending 1894-95 the minimum circulation has been well above 18 crores.

5. On a consideration of the figures given above, it appears to the Government of India that the circulation of currency notes has now attained a level about 50 per cent. higher than in the year 1889-90, and that it will be quite safe now to raise the limit of the investment to ten crores. The figures might indeed justify an even greater increase in the investment, but the Government of India do not desire to go to the full limit of safety. An investment of the reserve to the extent of ten crores would represent only about 50 per cent. of the average circulation as given in paragraph 4. The proposed increase would therefore appear to leave a fully sufficient margin to secure the immediate convertibility of the note even during a commercial crisis. As previously explained in paragraph 4 of my letter of 23rd December 1889,† over and above the reserve of coin and securities, the general credit of Government is pledged for the convertibility of the note under section 21 (1) of the Paper Currency Act.

† Copy enclosed.

6. The proposal which His Excellency the Governor General in Council is disposed to make now is to take power from the Legislature to increase the limit of the investment from eight to ten crores, and for the reasons above explained, he considers, subject to the opinions he may receive from the Presidency Banks and the Chambers of Commerce, that this power may be used with safety on some convenient occasion when it may be possible to carry out the operation without affecting the public market.

7. I am to say that His Excellency in Council will be glad to be favoured with the views of the Directors as early as may be convenient.

No. 6468, dated 23rd December 1889.

From—J. F. FINLAY, Esq., Officiating Secretary to the Government of India, Finance and Commerce Department,

To—The Secretary to the Chamber of Commerce, Calcutta. / Madras. / Bombay.

I am directed by His Excellency the Governor General in Council to request that the Chamber of Commerce, Calcutta / Madras / Bombay, will be good enough to favour the Government of India with an expression of its opinion upon a proposal to increase the portion of the paper currency reserve which is invested in Government securities.

2. When the issue of a Government paper currency was first considered by the Government of India in 1860, it was proposed to fix the limit of the portion of the reserve which might be invested in Government securities at a fixed proportion—two-thirds—of the value of notes in circulation. But it was decided that the safer and sounder principle was to prescribe a fixed sum as the limit, that sum being somewhat less than the smallest aggregate amount of notes which experience had proved to be necessary for the monetary transactions of the country. It was considered that notes to this amount at least would always be outstanding, and that consequently it would not be necessary to keep coin in reserve for the purpose of cashing them. When this principle was adopted it was contemplated that it would be necessary to vary the limit in accordance with the circumstances of the times, and that the maximum sum that might be invested in Government securities would be fixed from time to time by legislation. In the Paper Currency Act of 1861, the sum to be so invested was fixed at four crores of rupees. In 1870, in view of the facts that the note circulation had increased considerably since that limit was fixed, and that the investment in Government securities bore a much smaller proportion to the total reserve than when the Act of 1861 was first brought into operation, the limit was raised to six crores. The minimum circulation of each year from 1862 to 1870 will be found in the statement appended. The maximum limit of investment in Government securities is still six crores of rupees.

3. Since 1870 the note circulation has greatly increased, as will be seen from the statement attached. In that year the minimum circulation was about eight and three-quarter crores of rupees, but since 1880-81 the minimum circulation has never fallen as low as 12 crores; for the last five years the minimum has exceeded 13 crores; and in the present year it approaches 16 crores. There is no reason to doubt that the minimum circulation in the future will continue to be at least 50 per cent. in excess of the minimum of 1870. With a minimum circulation in the present year of say 15¾ crores, the investment of the reserve remaining at six crores, the sum held in coin and bullion amounts to about nine and three-quarter crores.

4. The primary consideration in dealing with this question must be the necessity of securing the immediate convertibility of the note under all circumstances to which we can reasonably look forward. His Excellency in Council has no doubt that the reserve held in coin and bullion at the present time is more than sufficient to secure convertibility under all ordinary conditions, and the question to be decided is whether or not it is necessary to maintain the present high rate of reserve with a view to possible difficulties of the future which may never arise. In connection with this aspect of the case, I am to call the attention of the Chamber to section 21 (1) of the Paper Currency Act, 1882, under which the general credit of Government is pledged for the convertibility of the note. The currency reserve would, therefore, be supplied in case of need by the cash balance at the disposal of the Government of India, and the note would not cease to be convertible, even if the currency reserve was exhausted, so long as the Government of India could spare funds from the general cash balance at its disposal. The proposal which has been under the consideration of the Government of India is to take power from the Legislature to increase the amount of the invested reserve to eight crores of rupees, but it is not intended for the present to increase the investment by more than one crore, any further increase up to the limit of eight crores being made only if and when circumstances are favourable; and it is possible that even the increase of one crore might not be made for some time.

5. I am to say that His Excellency in Council will be glad to be favoured with the views of this Chamber as early as may be convenient.

Statement showing the minimum Currency Note circulation and the reserve in securities on bullion and coin since March 1862.

* From 1862 to February 1876.

Dated 15th November 1895.

From—JOHN MARSHALL, Esq., Secretary to the Chamber of Commerce, Bombay,
To—The Secretary to the Government of India, Finance and Commerce Department.

I am directed to acknowledge the receipt of your letter No. 5318-A. of the 7th instant, with accompaniment, and in reply to say that the subject-matter thereof having received the careful consideration of the Committee of the Bombay Chamber of Commerce, the proposal to take power from the Legislature to raise the limit of the paper currency reserve from eight to ten crores of rupees meets with their entire approval, and the Committee will be glad to learn that early legislative action has been taken to give it effect.

Dated 21st November 1895.

From—A. M. LINDSAY, Esq., Officiating Secretary and Treasurer, Bank of Bengal,
To—The Secretary to the Government of India, Finance and Commerce Department.

In compliance with the request made in your letter No. 5319-A. of 7th instant my Directors have considered the proposal to raise from eight to ten crores of rupees the limit fixed for investment in Government securities of the coin and bullion held as the paper currency reserve, and I have now to submit the views they have adopted.

It is understood that in determining the proportion of the reserve that may be invested in securities, the Government of India are guided to a great extent by the principle followed in the Bank of England Act of 1844, *viz.*, that the amount of notes issued on Government securities shall be maintained at a fixed sum well within the limit of the smallest amount which experience has proved to be necessary for the monetary transactions of the country, and that all additional notes issued shall be backed by an equivalent amount of coin or bullion. This principle is a safe guide in a country like England where a fairly accurate estimate can be formed of the lowest point to which the circulation is ever likely to fall; but in India, the general mass of the people have little confidence in paper money, and it is difficult to say where a run on the reserve might stop.

There is, therefore, under the present method of regulating the fiduciary issue, a possible danger that Government may at times be tempted for the sake of profit to invest in securities a larger proportion of the note reserve than is consistent with safety: but my Directors are pleased to observe that on this as on former occasions the Government of India, in estimating from past experience the smallest future issue, allow a wide margin for possible fluctuations. An investment of the reserve to the extent of ten crores would represent only about 54 per cent. of the minimum circulation of the last three official years excluding the balances of the Reserve Treasuries and the head offices of the Presidency Banks. The proposed increase of securities in the paper currency reserve should therefore leave a stock of coin and bullion sufficient to ensure convertibility of the notes under all circumstances for which it appears necessary to provide.

It is also satisfactory to note that, on this as on former occasions, it is the intention in increasing the securities in the reserve to select some convenient opportunity when it may be possible to carry out the operation without affecting the public market; and no doubts would have been entertained as to the prudence of the proposed measure, were it not that the substitution of securities for coin in the paper currency reserve may interfere with the policy adopted when the Indian Mints were closed to the free coinage of silver.

As to the merits of this policy my Directors express no opinion. They assume that it is the desire of Government to raise gradually, and eventually to fix within convenient limits, our sterling exchange; and I have to point out that, as Government securities are exported and imported, the lock up of two crores of securities in the currency reserve, in whatever form it be effected, must tend to lower or to curtail a rise in sterling exchange, because it will promote imports from, or curtail exports to London. The release of the coin will have a like effect on exchange; because much of the money will sooner or later enter the markets that rule the balance of foreign indebtedness. The arguments that support this view are intricate, but it may suffice to say that the sterling value of the rupee currency on its present footing is regulated, or rather determined,

much in the same way that the values of inconvertible paper currencies are settled: and it is generally admitted that it would be imprudent for any Government with an inconvertible paper currency of depreciated value to make additions to its circulation merely for the sake of realizing interest on these additions, especially if that Government had a heavy foreign debt bearing interest payable in gold. Apart from other considerations, the loss in exchange on remitting interest on the foreign debt might exceed the gain in interest from the addition to the money in circulation: and as the proposed substitution of securities for coin in the paper currency reserve is practically an addition to the monetary circulation made with the object of securing interest profit, it would appear to be contrary to what is generally accepted as sound policy.

While holding these opinions regarding the effect of the proposed measure on sterling exchange, my Directors can conceive of a position of affairs arising under present currency arrangements in which the proposed increase in the monetary circulation would not only be innocuous but desirable. When a currency is interchangeable with sterling money for foreign payment purposes at or about transit cost, as all currencies are where sterling exchange is fixed with convenient limits, the currency is self-regulating. Any deficiency makes it profitable for Banks to import money, and any excess leads to an export of money. But in India the currency has no self-adjusting power. It has no fixed specie export point, while its fixed specie import point (*1s. 4d.* plus transit charges) is far beyond the present range of exchange; and this want of elasticity might create a stringency at a time when the Reserve Treasury balances were low, which would best be met by an addition to the currency such as Government propose to make. The stringency might occur suddenly and require prompt relief, and, under these circumstances, I have to suggest, for the consideration of His Excellency the Governor General in Council, that the power contemplated should be obtained from the Legislature, but should be reserved either for use in an emergency such as above described or until the currency is made automatic.

Dated 23rd November 1895.

From—A. MURRAY, Esq., Officiating Secretary and Treasurer, Bank of Bombay.

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to acknowledge the receipt of your letter No. 5319-A. of the 7th instant, requesting the opinion of the Directors of this Bank upon a proposal to take powers from the Legislature to increase the portion of the paper currency reserve, which is invested in Government securities, from eight crores to ten crores of rupees.

In reply I am directed to say that the subject of your letter has had the careful consideration of my Directors, and that they desire to express their entire approval of the proposal submitted for their opinion. The tables of figures given in your letter, and specially those contained in paragraph 4, seem to my Directors to show that this proposed increase to the Government securities in the paper currency reserve may be adopted with safety, and is as fully warranted as any previous addition which has been made to this portion of the reserve.

No. 5597-A., dated 20th November 1895.

From—J. F. FINLAY, Esq., Secretary to the Government of India, Finance and Commerce Department,

To—The Secretary, Chamber of Commerce, Rangoon / Karachi.

I am directed to forward copy of a letter* No. 5318-A., dated the 7th November 1895, addressed to the Chambers of Commerce in the Presidency Towns regarding a proposal to take power from the Legislature to raise the limit of the paper currency reserve which is held in Government Securities from eight to ten crores of rupees.

* (With enclosures.)

2. I am to request that the Government of India may be favoured with the views of the Rangoon / Karachi Chamber on the subject.

Dated 11th December 1895.

From—J. MATHESON, Esq., Secretary and Treasurer, Bank of Madras,
To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour, by desire of my Directors, to acknowledge receipt of your letter No. 5319-A., dated 7th ultimo, and to say in reply that they are of opinion that the cash balance held in the Currency Department may be reduced by two crores with perfect safety.

I am to say further that my Directors are of opinion that the market would be less disturbed by the transaction if the amount, instead of being invested by purchase of interest bearing promissory notes of the Government of India in the open market, were transferred direct from the Currency to the Treasury Department, as a book debt, when next the Government have occasion to raise a loan for public works. It is presumed that the object of having a portion of the currency money invested in Government bonds is, that coin may be the more readily obtained by the sale of such bonds, which are already negotiable, rather than by the more formal procedure of the issue of a fresh loan.

My Directors are, however, of opinion that a sufficient amount of bonds for this purpose is already held, whereas if a portion were held as a book debt, the amount could at any time be retransferred from the Treasury to the Currency, and so avoid any sudden disturbance of the market by sale of bonds.

The interest bearing Promissory Notes of the Government of India afford no additional security to holders of Currency Notes which are on demand Promissory Notes, and are equally secured with the other notes by the credit of the Government of India.

Dated 10th December 1895.

From—The Secretary to the Chamber of Commerce, Rangoon,
To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to acknowledge receipt of your letter No. 5597-A. of 29th ultimo, with enclosures, having reference to a proposal to raise the limit of paper currency reserve from eight to ten crores of rupees.

I am desired to say that the Committee approve of the proposal.

Dated 16th December 1895.

From—The HONOURABLE MR. G. L. CHAMBERS, Chairman, Chamber of Commerce, Madras,
To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to acknowledge receipt of your letter No. 5318-A., dated the 7th November 1895, asking for an expression of opinion from this Chamber upon a proposal to take power from the Legislature to raise the limit of the paper currency reserve, which is held in Government Securities, from eight to ten crores of rupees.

In reply I have the honour to state that this Chamber sees no objection to the proposal in so far as it will affect the proportion of cash to be held in order to make good the issue of Currency Notes.

The view taken by the Chamber is that the Government, after mature consideration in consultation with the best authorities, can decide what proportion of cash should be held (whether one-half of the Notes in circulation, or any other ratio) in order to convince the public that on presentation of the Notes for payment there will be no danger of their not being paid, even in times of panic, and the Chamber is almost unanimous in thinking that there is no necessity to hold any other security as a guarantee for such payment. For instance, if the Note circulation be at present 20 crores, and if ten crores be held in cash, there is no danger whatever of any fear of non-payment arising in the minds of holders of Currency Notes—even in a commercial crisis, or a great war.

The Currency Note being payable on demand is not, in the opinion of this Chamber, rendered any more secure by Government holding as security for its prompt payment Government Securities which are not payable on demand, or even at any time, except at the option of Government. It seems almost unnecessary to add that if the public for any reason become imbued with the

feeling that Government is about to become unable to meet its engagements, and if in consequence of that feeling there is a rush to realise Currency Notes, then in that case Government Securities, which are unredeemable, will be unsaleable, and will therefore be useless as a reserve for securing the re-payment of the "on demand" liabilities of Government.

The Chamber considers, in fact, that the only security for the re-payment of the Note issue should be actual cash, and that the proper proportion of cash to liabilities can only be determined by experience, and the most important factor in the calculation will always be the state of the financial credit of the Government of India, and finally of the Government of Great Britain. As a matter of fact, Currency Notes are in India at present looked upon by all classes, with comparatively few exceptions, as actual money, and only the best informed people ever trouble themselves about the amount of cash held against them.

With regard to what should be done with the cash not required by the Currency Department, the Chamber is of opinion that it should be paid to the Government of India to enable it to avoid borrowing in future; whereby the general credit of that Government would be strengthened, and the pockets of the tax-payer saved.

The proposal to set free two crores of rupees is one to which objection has been taken in other quarters, on the ground that the Barbour Exchange Scheme would be affected thereby. Although it expresses no opinion upon the wisdom of that scheme, including the closing of the Mints, the Chamber considers that this step having been taken, and the success of the measure having been declared to be dependant upon the contraction of the currency, any fresh action is to be deprecated which would cause it to be said that the scheme had not had a fair trial. It appears to be established that such contraction has not yet taken place owing to the unexpected supply of hoarded rupees—and as this supply must have its limit, the flooding of the market by two crores would appear to be contrary to the recently declared policy of Government.

No. 15, dated 17th January 1896.

From—C. H. CHITHAM, Esq., Acting Secretary, Karachi Chamber of Commerce.

To The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to acknowledge receipt of your letter of 29th November 1895, No. 5597-A., enclosing copy of a letter No. 5318-A., addressed to the Chambers of Commerce in the Presidency Towns, regarding a proposal to take power from the Legislature to raise the limit of the paper currency reserve, which is held in Government Securities, from eight to ten crores of rupees and calling for the views of this Chamber on the subject.

I am instructed by the Managing Committee to state that they see no objection to the increase of the reserve as contemplated, provided it is done gradually and at a favourable time.

No. 239-96, dated 31st January 1896.

From—S. E. J. CLARKE, Esq., Secretary, Bengal Chamber of Commerce,

To—The Secretary to the Government of India, Finance and Commerce Department.

The Committee of the Chamber of Commerce direct me to acknowledge receipt of your letter No. 5318-A., dated 7th November last, calling for an expression of opinion upon a proposal to take power from the Legislature to raise the limit of the paper currency reserve which is held in Government Securities, from eight to ten crores of rupees.

The Committee considered this proposal of sufficient importance to place before the members of the Chamber of Commerce, and to invite their individual opinions thereon. These replies have now been received, and shew that the opinion of members is divided as to the merits of the proposal as well as to the expediency of such a measure being undertaken by the Government of India.

I am to say further that those who are in favour of Government taking the power to increase the paper currency reserve from eight to ten crores of rupees, as suggested, think that such an operation, if attempted, would need to be carried out with very great caution, and only when a favourable opportunity occurred.

LEAVE AND APPOINTMENTS.

The 8th April, 1896.

No. 1576-*Ex.*—The following substantive promotions are made, with effect from 1st April 1896, *vice* Babu Saroda Prosad Ray, retired:

Subadar-Major Gambhir Lama, *Sardar Bahadur*, Indian Army, is granted the honorary rank of Captain. Dated 18th March 1896.

ORGANISATION.

LOCAL CORPS.

No. 370.—With reference to paragraph 2 of G. G. O. No. 670 of 1895, the Governor-General in Council is pleased to announce that the Secretary of State for India has sanctioned, with effect from the 1st April 1896, the extension to the local corps under the Government of India named below of the increase of pay recently sanctioned for the native army:

Deoli Infantry.

Erinpura Infantry.

Bhopal Battalion.

Malwa Bhil Corps.

Meywar Bhil Corps.

Nepal Escort.

Merwara Battalion.

Hyderabad Contingent Infantry.

Hyderabad Contingent Artillery.

2. The concessions are—

(*a*) An increase of Rs. 2 per mensem to the pay of every non-commissioned officer and soldier in the corps above named; also to the native combatant driver establishment of the batteries of the Hyderabad Contingent Artillery. In the case of the drummers, fifers and buglers of the infantry regiments of the Hyderabad Contingent, the increase will be only twelve annas per mensem, as they already receive pay at the rate of Rs. 8-4 per mensem.

(*b*) The grant to recruits enlisted on or after the 1st April 1896 of the annual half-mounting allowance of Rs. 5 admissible under Article 323, Army Regulations, India, volume I, part II, from the date of enlistment, instead of from the date of completing eighteen months' service. This allowance will not be payable to recruits until the completion of the first year's service, when arrears due, together with the allowance for next quarter, will be drawn.

NATIVE ARMY.

No. 371.—It is notified that the designation of the various ranks in the Body Guard of His Excellency the Viceroy have been changed as follows:

Subadar to be Risaldar.

Jemadar to be Jemadar.

Havildar to be Dafadar.

Naick to be Lance-Dafadar.*

Trooper to be Sowar.

* But to retain pay and pension as at present.

PROMOTIONS.

COLONEL'S ALLOWANCE.

No. 372.—Colonel James William Abbott Michell, Indian Staff Corps, is admitted to the colonel's allowance, with effect from the 4th April 1896.

ORDNANCE DEPARTMENT.

Bengal.

No. 373.—Honorary Lieutenant and Assistant Commissary John Leahy to be Deputy Commissary, and to have the honorary rank of Captain, subject to Her Majesty's approval;

Honorary Lieutenant and Deputy Assistant Commissary Henry Myland to be Assistant Commissary;

Conductor John Proudfoot Bennie to be Deputy Assistant Commissary, and to have the honorary rank of Lieutenant, subject to Her Majesty's approval;

Sub-Conductor Edward Pipe, Head Overseer, Small Arms Ammunition Factory, Dum Dum, to be Conductor, *seconded;*

Sub-Conductor George Edward Chapman to be Conductor,

Store Sergeant Frederick James Utting to be Sub-Conductor,—

with effect from the 6th March 1896, *vice* Honorary Captain and Deputy Commissary James Henry Smith, retired.

Bombay Command.

No. 374.—Sub-Conductor Henry James Doyle to be Conductor, and Store-Sergeant John McKenna to be Sub-Conductor, with effect from the 24th March 1896, *vice* Conductor T. Davey, seconded on appointment as Store-keeper in the Gun Powder Factory, Kirkee.

NATIVE ARMY.

No. 375.—In G. G. O. No. 181 of 1896, *for* "31st December 1895" *read* "*1st* January 1896."

No. 376.—*2nd Bengal Lancers*—

Risaldar Ali Muhammad Khan to be Risaldar-Major, Ressaidar Bahram Singh to be Risaldar, Jemadar Ram Singh to be Ressaidar, and Dafadar Mukand Singh to be Jemadar, *vice* Risaldar-Major Hazara Singh, *Bahadur*, transferred to the pension establishment, with effect from the 1st November 1895.

Ressaidar Hira Singh to be Risaldar, Jemadar Sawan Singh to be Ressaidar, and Dafadar Waryam Singh to be Jemadar, *vice* Risaldar Hem Raj, deceased, with effect from the 12th October 1895.

Ressaidar and Woordie-Major Kala Singh to be Risaldar, and Jemadar Wazir Chand to be Ressaidar, *vice* Risaldar Narain Singh, *Bahadur*, transferred to the pension establishment, with effect from the 1st November 1895.

Ressaidar Man Singh to be Woordie-Major *vice* Kala Singh, promoted to Risaldar, with effect from the 1st November 1895.

No. 377.—*6th Regiment of Bombay Cavalry (Jacob's Horse)*—.

Ressaidar Sampuran Singh to be Woordie-Major, *vice* Abdul Hasan Khan, transferred to the pension establishment, with effect from the 1st January 1896.

No. 378.—*2nd (The Queen's Own) Regiment of Bengal (Light) Infantry*—

Jemadar Bisesar Singh to be Subadar, and Drill-Havildar Tapesari Singh to be Jemadar, *vice* Paljhan Singh, transferred to the pension establishment, with effect from the 1st February 1896.

No. 379.—*25th (Punjab) Regiment of Bengal Infantry*—

Havildar Abdul Rahman, from the 28th (Punjab) Regiment of Bengal Infantry, to be Jemadar, *vice* Manzar, deceased, with effect from the 15th February 1896.

No. 380.—*34th (Punjab) Regiment of Bengal Infantry (Pioneers)*—

Jemadar Hari Singh to be Subadar, and Drill-Havildar Jiwa Singh to be Jemadar, *vice* Subadar Gobind Singh, deceased, with effect from the 25th November 1895.

No. 381.—*4th Regiment of Madras Infantry (Pioneers)*—

Havildar-Major Sayyid Abbas to be Jemadar, *vice* Sayyid Abdullah, transferred to the pension establishment, with effect from the 1st January 1896.

RETIREMENTS.

No. 382.—Surgeon-Lieutenant A. E. Ward, Bengal Medical Establishment, is permitted to resign the service, with effect from the 3rd April 1896, subject to Her Majesty's approval.

No. 383.—The undermentioned honorary commissioned officers are permitted to retire from the service, with effect from the dates specified:

Captain and Deputy Commissary William Marr, late of the Public Works Department,—8th November 1895.

Captain and Deputy Commissary Thomas Smith, late of the Ordnance Department,—28th March 1896.

Lieutenant and Deputy Assistant Commissary Alfred Sincock, late of the Commissariat-Transport Department, Bombay,—1st April 1896.

Lieutenant and Deputy Assistant Commissary John Harrington, late of the Commissariat-Transport Department, Bengal,—25th February 1896.

SPECIAL.

No. 384.—In connection with G G. O. No. 981 of 1894, the Governor-General in Council is pleased to direct that, in supersession of previous notifications, the following military officers will be granted the privilege of the Private Entrée at Government House:

All officers in the highest or non-classified list of the Precedence Table.

Generals (Lieutenant, Major, or Brigadier).

The Adjutant-General in India.

The Quartermaster-General in India.

The Surveyor-General of India.

The Director-General of the Indian Medical Service.

The Principal Medical Officer, Her Majesty's Forces in India.

Surgeons-General.

The Director-General of Ordnance in India.

The Director-General, Military Works.

The Commissary-General-in-Chief.

The Accountant-General, Military Department.

The Inspector-General of Imperial Service Troops in India.

The Officer Commanding Presidency District.

The Judge Advocate-General in India.

The Director, Army Remount Department in India.

The Principal Veterinary Officer in India.

The Inspector-General, Civil Veterinary Department.

Aides-de-Camp to the Queen.

Honorary Aides-de-Camp to the Viceroy.

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

Calcutta, the 2nd April, 1896.

No. 180.—The services of Mr. D. K. Macdonald, Assistant Engineer, 2nd Grade, Burma, are temporarily placed at the disposal of the Rangoon Port Trust.

Simla, the 9th April, 1896.

No. 182.—The Governor General in Council is pleased, under section 16 (1) of the Indian Railways Act (IX) of 1890, to sanction the use of locomotive engines and of rolling stock to be drawn or propelled thereby on the Najibabad-Kotdwara Branch of the Oudh and Rohilkhand Railway.

The 10th April, 1896.

No. 183.—With reference to, and in supersession of, Public Works Department notification No. 141, dated the 12th March 1896, Mr. C. Ross, Examiner of Accounts, attached to the Office of the Examiner, Public Works Accounts, Bengal, is appointed to officiate as Government Examiner of Accounts, Assam-Bengal Railway, from date of assuming charge from Mr. Dennys.

No. 184.—Mr. R. Douglass, Executive Engineer, 3rd Grade, Irrigation Branch, Punjab, temporarily transferred to the Superior Accounts Branch in Public Works Department notification No. 356, dated the 8th October 1895, is confirmed in that Branch in the rank of Deputy Examiner, Class I (new classification), with effect from 1st April 1896.

The 9th April, 1896.

No. 181.—The following is published for general information:

No. 226 R. T., dated 21st March 1896.

RESOLUTION—By the Government of India, Public Works Department.

General Rules for railways under construction.

Read—

Sections 3 (4), 16 (2), 47 and 148 (1) of the Indian Railways Act (IX) of 1890.

Government of India, Public Works Department, notification No. 267, dated the 11th June 1890, appointing the Director General of Railways as the officer who is to make General Rules, under section 47 of the Indian Railways Act, 1890, in the case of a railway administered by Government.

Government of India, Public Works Department, notification No. 480½, dated the 30th October 1890, publishing, in the *Gazette of India* of the 8th November 1890, the Government of India Resolution No. 736 R. T., dated the 17th October 1890, and the General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods.

Letter from the Director General of Railways, No. 160 T., dated the 19th March 1896.

OBSERVATIONS.—The Director General of Railways has applied for leave to adopt, on the Najibabad-Kotdwara Branch of the Oudh and Rohilkhand railway, the General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods, which rules were published in the *Gazette of India* of the 8th November 1890 under Public Works Department notification No. 480½, dated the 30th October 1890.

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the General Rules, which are referred to in the foregoing observations, to the Najibabad-Kotdwara Branch of the Oudh and Rohilkhand railway, which has been sanctioned for construction.

ORDER.—Ordered, that the General Rules, which have already been published in the *Gazette of India* of the 8th November 1890, be further notified to the railway servants and to the public by a copy thereof being kept open to inspection, free of any charge, in the office of the engineer in charge of the construction of the railway.

Ordered also, that this resolution be communicated to the Director General of Railways for information and guidance, and that it be published under a notification in Part I of the *Gazette of India.*

W. S. S. BISSET, *Colonel, R.E.,*
Secretary to the Government of India.

GOVERNMENT OF INDIA.

[redacted] REVENUE AND AGRICULTURE.

[redacted]ndia for the Week ending at 8 a.m. on [redacted]day, April 4th, 1896.

Although pressure has been unsteady and has changed considerably from day to day, the general distribution and conditions of pressure have altered very slightly during the week. Throughout the whole period a large area of low and deficient pressure overlay West Bengal, Bihar, and the north of the Gangetic plain, while readings were high in Tenasserim and the west of the Punjab, and relatively high over the Indian Peninsula. Under these conditions of pressure, which were roughly more like the ordinary conditions of the end rather than of the beginning of April, the wind circulation was very steady. Strong southerly winds blew up the Bay into Bengal, hot westerly winds blew down the Gangetic plain into Bihar, and northerly and north-westerly winds prevailed over North-Western India, while on the coasts of the Peninsula variable or land and sea breezes were experienced. The rainfall of the week was very light, except over parts of Assam, where the usual spring thunderstorms gave fairly heavy rain. In consequence there was nothing to interfere with the steady increase of heat as the sun progressed northward, and the temperature returns of the week exhibit an actual increase of temperature, and also an increase relatively to the average.

Daily Summary.—*Sunday, March 29th.*—Pressure had fallen in most places, the decrease being rapid over North-Eastern India and the Gangetic plain. Readings were highest over the Western Punjab, relatively high over Tenasserim, lowest over Bihar and Bengal, and relatively low across the Central Provinces and the head of the Peninsula. Northerly winds prevailed over North-Western India, west-north-westerly winds down the Gangetic plain, southerly winds at the head of the Bay, and variable winds elsewhere. The mean temperature was in defect over the Punjab and Madras, and in excess elsewhere. Snow had fallen in Kashmir, and rain showers over part of Persia, of Baluchistan, of the North-Western Himalayas, and of the Northern Punjab, as well as at Colombo.

Monday, March 30th.—Pressure had been steady in the south, but had decreased elsewhere, the change having been brisk to rapid over a considerable part of the country. The barometer read below the normal average, except over the western desert. The greatest abnormal deficiency was over the north Gangetic plain. West-north-westerly winds prevailed down the Gangetic plain, and southerly winds at the head of the Bay, but elsewhere the directions were variable. The mean temperature was in excess, except over parts of Arakan and of Madras. Showers were reported from parts of the south of the Peninsula, of Ceylon, and of Assam.

Tuesday, March 31st.—Pressure had decreased briskly over part of North-Western India, and had increased briskly over Upper Burma, but elsewhere the changes were unimportant. Readings were lowest over the north Gangetic plain. The winds were practically unchanged. The mean temperature remained excessive, except in parts of Madras. Showers had been received over the north-west and north-east of India and the south of the Peninsula.

Wednesday, April 1st.—Pressure had decreased, except over the Indus Valley. Readings remained low over the Gangetic plain and high in Tenasserim and the west of the Punjab, and the winds were again practically unchanged. The mean temperature was low for the season over the extreme south of the Peninsula, and excessive elsewhere—more especially over the western desert. Showers had again been received in the extreme north-west and north-east and south.

Thursday, April 2nd.—The barometer had ceased to fall, and a very general recovery had set in. The general distribution was, however, unaltered. The

westerly current of air down the Gangetic plain was less marked than on the preceding days, but otherwise the winds were little changed. The mean temperature was relatively low over Assam and the south of the Peninsula, and excessive in all other places—most so over Eastern Rajputana. Rain had fallen in Assam and at Colombo.

Friday, April 3rd.—The barometer had continued to rise in most places, but the low pressure area over Bengal and the Gangetic plain and the high pressure area over Tenasserim were as marked as on previous days. The winds also showed no important alteration. Excessive temperatures continued to prevail, except in Assam and the Carnatic, but the hottest area was moving eastward, and was shown over the Central Provinces. Scattered showers had fallen at several stations, and rain had been general in Assam.

Saturday, April 4th.—The barometric rise had ceased, and a general slight to rapid fall had set in. Gradients had increased, and the low pressure area over the north Gangetic plain was more marked, but the relative positions of the areas of high and low pressure were unchanged. Northerly to westerly winds prevailed over the greater part of Northern India, and southerly winds at the head of the Bay. Excessive temperatures prevailed almost everywhere, the hottest area being Berar. Scattered showers of rain were again reported, of which the most important were 2·01 inches at Poona and 1·25 inches at Silchar.

Temperature.—The week has been one of generally excessive heat. Showers of rain occurred at different times during the week in North-Western, North-Eastern, and Southern India, and these showers had the effect of reducing temperature during their continuance, but directly they ceased excessive temperatures reappeared. Thus, on the 29th of March in the Punjab and Madras temperature was low, but on the 30th the depression of temperature had wholly disappeared from the Punjab. In parts of Madras, on the contrary, relatively low temperatures were recorded until the 2nd, when they also practically ceased. In Assam the heat was excessive until the 1st, when low temperatures appeared, and the depression of temperature continued until the close of the week. In all other parts of India the mean temperature was steadily, and in several places largely, in excess of the normal. The hottest areas were Rajputana, Central India, Berar, and the west of the Central Provinces on the one hand and Central Bengal on the other.

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Province.	March 1896.			April 1896.				Mean variation of week.
	29th	30th	31st	1st	2nd	3rd	4th	
	°	°	°	°	°	°	°	°
Burma	+2·2	+1·6	+2·2	+1·7	+2·1	+1·3	+1·8	+1·8
Bengal and Assam	+4·4	+4·4	+3·2	+4·1	+4·3	+3·7	+3·6	+4·0
North-Western Provinces and Oudh	+2·6	+1·8	+3·0	+5·2	+6·6	+6·8	+4·5	+4·4
Punjab	—3·4	+1·8	+4·2	+5·1	+4·6	+5·3	+3·9	+3·1
Bombay	+2·1	+2·6	+2·4	+2·8	+3·7	+3·3	+2·3	+2·7
Central Provinces and Berar	+4·9	+4·8	+3·9	+4·9	+7·7	+9·7	+5·3	+5·9
Central India and Gujarat	+5·1	+4·4	+4·8	+6·6	+8·4	+9·7	+6·0	+6·4
Sind and Rajputana	+4·0	+3·7	+5·0	+9·0	+8·8	+7·1	+5·8	+6·2
Madras	—1·0	+0·5	+0·2	+0·7	+1·9	+1·6	+2·1	+0·9
Mean for whole of India	+2·3	+2·8	+3·2	+4·5	+5·3	+5·4	+3·9	+3·9

The above shows that in all the provinces the mean temperature was excessive, and that for the whole country the temperature was abnormally high on all days. Between the 29th of March and the 3rd April the excess steadily increased, but on the last day of the week a sudden fall took place.

The following were the maximum temperatures throughout India reported on each day:

March	29th	108·4°	at	Deesa.
„	30th	108·9°	„	Chanda.
„	31st	109·9°	„	„
April	1st	111·0°	„	Deesa.
„	2nd	113·6°	„	„
„	3rd	112·0°	„	„
„	4th	110·5°	„	„

The above shows that the absolutely hottest area was Gujarat and the south of the Central Provinces.

Rainfall.—As has been the case for the past few weeks, the rainfall of India has been mainly confined to the north-west and north-east of India. A few showers have been received in the centre and south, but these have been scattered falls due to local thunderstorms, and almost the only rainfall of importance has been reported from the two regions mentioned above. In the case of North-Western India the rainfall was light, and apparently connected with slight local disturbances originating over Baluchistan and the North-Western Himalayas. Hence the fall was mainly confined to the hills and their immediate neighbourhood. In Kashmir snow fell on the higher hills. In Assam the rainfall took place under normal conditions of wind and pressure, *viz.*, during the prevalence of fresh to strong moist winds over the north of the Bay, while easterly and north-easterly winds were blowing down the Assam Valleys. The rainfall in Assam was much heavier than that at the opposite end of the Himalayan range, and over the hills between the Surma and the Brahmaputra rivers the fall was very heavy. In the extreme south of the Peninsula a fair number of light or moderate showers occurred during the middle of the week. The concluding table gives the rainfall data. From this it will be seen that rain fell during the week in twenty of the rainfall divisions. Of these twenty divisions nine had an average actual rainfall for the week of less than one-tenth of an inch, but in the remaining eleven divisions effective rainfall was received. These eleven divisions are—the three Assam divisions, North Bengal, the Bengal hills, the Punjab hills, North Punjab, Malabar, Baluchistan hills, the East Coast (South), and Madras (South), and the average actual rainfall ranged from 14·78 inches in the Assam hills to 0·13 inch in the East Coast (South). The second column of the table shows the anticipated rainfall for the week under review, and it will be noticed that, except in the case of Tenasserim, Assam, the Bengal hills, and Coorg, the anticipated rainfall is small and less than half an inch. The third column shows the difference between the average actual and average normal rainfall, and that, except in the case of Assam and of Madras (South), the actual rainfall has been practically everywhere in defect. In the case of Assam, on the contrary, all the divisions exhibit an excess. In the Surma division the excess is only trifling, but the Brahmaputra division has received more than twice, and the hills division more than five times the normal amount. In the case of Madras (South) also the normal amount was very largely exceeded.

The three concluding columns of the table exhibit the state of the seasonal rainfall. In Assam (Surma and Brahmaputra), the Western Punjab, Baluchistan, and Madras (South) the rainfall for the period March 1st to April 4th has been about normal, *i.e.*, has differed by less than 20 per cent. from the average, and in Assam (Hills) the rainfall has been excessive, but in all other places the rainfall has been deficient—more particularly so over the Gangetic plain and Burma.

The following are the principal totals recorded during the week under review:—Sylhet 3·45 inches, Silchar 4·55 inches, Cherrapunji 29·56 inches, Gauhati 8·12 inches, Sibsagar 3·72 inches, Alipore (Jalpaiguri) 1·36 inches, Panani (Malabar) 3·21 inches, Allepy (Travancore) 1·60 inches, Saltar (Tinnevelly) 4·67 inches, and Morekolam (Madura) 2·28 inches.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *9th April 1896.*

DENZIL IBBETSON,

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 4th April.*—The rainfall was fair in Madura, Tinnevelly, the Coast stations, Tanjore, and in Malabar; light showers fell in Trichinopoly, the Nilgiris, Salem, Coimbatore and Ganjam; no rain elsewhere. The standing crops are confined to small areas, and are generally fair, but paddy is withering in parts of North Arcot, Anantapur and Nellore. The harvest is going on with moderate yield. Pasture is generally scarce, but fodder is available. Cattle are in good condition. Prices are generally stationary, but are slightly dearer in parts of the Circars and southern districts.

Bombay.—*For week ending 8th April.*—Slight rain in parts of Sind, the Deccan and Karnatak. The standing crops are good. Cotton-picking continues in parts of Ahmedabad and Dharwar, and harvesting of the late crops in parts of thirteen districts. Preparations for next season are progressing in fourteen districts. Fodder is insufficient in parts of Sind. Agricultural stock are in good condition, except in parts of Shikarpur and Broach. Prices are normal, except in parts of Sholapur.

Bengal.—*For week ending 6th April.*—With the exception of a light shower at Rangpur, there was no rain during the week, and consequently little change in the agricultural prospects of the province. Rain is generally wanted for the ploughing of lands and for the indigo and spring rice in the ground, and also for the planting of sugarcane. In some parts of North Bengal and Bihar early rice and millets are being sown. The collection of opium is over, and the harvesting of the spring crop is nearly finished. In Cuttack the harvesting of spring rice has begun. Scarcity of water continues to be reported from Burdwan, the 24-Perganas, Khulna, Pabna and Dacca. The price of common rice continues steady.

North-Western Provinces and Oudh.—*For week ending 8th April.*—The heat is increasing, and rain is much needed in the hill districts to assist the germination of the autumn crop sowings. Harvesting operations have been completed in most districts. Threshing and winnowing are in active progress. The sowing and irrigation of the extra crops continue. The produce of *mahua* (*Bassia Latifolia*) has disappointed expectation. Owing to the prevalence of strong westerly winds the *mahua* crop has been a total failure in Banda and Fatehpur. Mangoes are reported as damaged in some districts. In Naini Tal much damage from jungle fires is reported. Opium collections are nearly finished, and the yield is generally fair. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, the 4th April, were—Banda 65,172, Hamirpur 40,132, Jhansi 27,724, Jalaun 29,990, Allahabad 1,369, Pilibhit 1,801, Garhwal 1,758—total 1,68,046; of this number 25,657 dependants were gratuitously relieved on the works; 3,081 persons also received gratuitous relief under other provisions of the Famine Code. Supplies are ample, but fodder is becoming scarce in places. The Government forests of Bundelkhand have been opened to

free grazing and the free extraction of edible jungle fruits. Scarcity of water is reported in Banda, Hamirpur and Lucknow. Prices are fairly stationary, but show a tendency to fall.

Punjab.—*For week ending 8th April.*—Rain has fallen in the Jullundur, Amritsar, Sialkot, Rawalpindi, Shahpur, Dera Ismail Khan and Gujranwala districts. The canal crops are being cut in Hissar. Reaping of the spring crops is in progress in Delhi and Gurgaon. Ploughing for cotton and sugarcane is in progress in Jullundur, Sialkot, Rohtak and Gujranwala. Sowings of the extra spring and autumn crops in Amritsar, of water-melon, tobacco, barley and cotton in Lahore, and of cotton in Rawalpindi, are in progress. Sugarcane and indigo sowings have been completed in Gurgaon. The condition of the spring crops is good in Mooltan. The crops dependent on rain have failed in Hissar. The prospects and condition of the spring crops are generally reported average on irrigated and below average on unirrigated lands. The stock of food-grains is said to be insufficient in Sialkot, Rawalpindi, Gujranwala and in parts of Shahpur. Cattle are in poor condition in Hissar and Gurgaon, and they are dying for want of fodder in parts of Lahore and Gujranwala. Fodder is scarce in all districts, except Jullundur, Sialkot and Dera Ismail Khan. The stock of fodder is said to be insufficient in some districts. Prices are normal in Ferozepore and low in Delhi, but are high elsewhere.

Central Provinces.—*For week ending 8th April.*—The weather is very hot and occasionally cloudy. Threshing of the winter crops is approaching completion. The land is being prepared for the monsoon sowings. Want of fodder is felt in Seoni and in parts of Saugor. The water-supply is scanty in Seoni and in parts of Wardha. Prices are steady, and in most districts are fairly normal.

Burma.—*For week ending 4th April.*—In Lower Burma reaping of dry-weather paddy continues in Tavoy. Cultivation of paddy on hill clearings is in progress in Thaton. In Upper Burma reaping of dry-weather paddy has commenced in Mandalay and Sagaing. Cultivation of early wet-weather paddy continues in Kyaukse. The condition of the dry-weather paddy crop and of the crops on islands is generally good. The price of paddy has increased considerably in Myaungmya and Amherst, and slightly in Rangoon, Bassein and Thayetmyo, while it has decreased slightly in Prome; elsewhere prices are stationary.

Assam.—*For week ending 7th April.*—The weather is hot. Sowing of the early rice and pressing of sugarcane continue. The condition of cattle is good, except in Cachar. Scarcity of fodder and water is felt in places.

Mysore and Coorg.—*For week ending 8th April.*—MYSORE: No rain. The standing crops are withering for want of rain in Kolar and Chitaldroog. Paddy has been harvested in parts of Tumkur. Prices have risen in Kolar and Tumkur, but have fallen in Hassan, Kadur and Chitaldroog.

COORG.—There are no standing crops. Rain is much needed for the coffee blossom. Fodder and water for cattle are scarce in parts. Prices are normal.

Berar and Hyderabad.—*For week ending 8th April.*—BERAR: The weather is hot and cloudy with strong winds. Threshing of wheat is almost completed. The land is being prepared for the autumn sowings. Scarcity of fodder and water continues. Prices have risen in two districts and fallen in one, but are stationary elsewhere.

HYDERABAD.—No rain during the week. Harvesting of the spring crop is almost completed. The crops on irrigated areas are good. Fodder is getting scarce. The water-supply is decreasing. Prices are normal.

Central India.—*For week ending 8th April.*—Slight rain fell in the Gwalior and Malwa Agencies during the week. Agricultural operations have been completed in Baghelkand, but are in progress in all other Agencies. Owing to the damage done to the crops for want of rain, the probable outturn will be below the average in four Agencies. Cattle are in fairly good condition, except in parts of Bhopal and Gwalior. Pasturage is good and sufficient in all Agencies. Prices are above normal in Baghelkand, Malwa, Goona and in four districts of Gwalior, but are normal elsewhere. The opium crops in Gwalior, Bhopal and Malwa are in fairly good condition. The number of persons employed on relief works in Bundelkhand and Goona are 2,068 and 961 respectively.

Rajputana.—*For week ending 8th April.*—Rainfall slight in Dholepore and Bikanir. Agricultural operations are generally satisfactory, except in Marwar where prospects are poor. The unirrigated crops are suffering in Ajmere-Merwara, and the crops have been damaged in Dholepore for want of rain. Agricultural stock are generally in good condition, but are suffering in Ulwar for want of fodder. Pasturage and fodder are scarce in Shahpura, Ajmere-Merwara, Ulwar, Tonk and in parts of Meywar, and fodder is failing in Dholepore and Bhurtpore, but is sufficient elsewhere. Prices are rising in five States, and falling in two, but are steady elsewhere. In Marwar 3,918 persons are on relief works, and 251 on gratuitous relief, in Shahpura 400 are on relief works, in Merwara 2,341 are on relief works, in Bikanir 2,079 are on relief works, and 297 on gratuitous relief. The number for Jaisalmere has not been reported.

Kashmir.—*For week ending 7th April.*—KASHMIR VALLEY: Slight rain has fallen. Water is ample for irrigation. Prices continue normal.

JAMMU PROVINCE.—*For week ending 1st April.*—Rainfall slight. The spring crops are in fair condition. Fodder is scarce. Prices are stationary.

For week ending 8th April.—No rain. The crops are in fair condition. Fodder is scanty, and cattle are lean. Prices are stationary.

Nepal.—*For week ending 4th April.*—The weather is hot with strong westerly winds. The prospects of the spring harvest are very poor. Operations for the autumn crops are at a standstill for want of rain.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 8th April 1896.

NOTIFICATIONS.

No. 1000 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 4th April 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888 :—

No. 120 of 1896.—Nundo Lall Haldar, sanitary inspector of the port of Calcutta, 25, Anund Khan's Lane, Baniatollah Street, Calcutta, for a sulphur incinerator or fumigator.

No. 121 of 1896.—Adolphe Zalkin Germains, of London, for improvements in globeless chimneys for oil and gas lamps.

No. 122 of 1896.—Carl Bergmann, engineer, of 55, Thalstrasse, Meisen on the Elbe, in the German Empire, for improvements in retting or steeping jute.

No. 1001 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the office of the Secretary, in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying :—

No. 216 of 1895.—Eduard Penning Dupuis, of Halle a Saale, in the German Empire, for an apparatus for the automatic printing and delivery of cards or tickets with the time of issue printed thereon. (Filed 26th March 1896.)

No. 232 of 1895.—Robert Rickic, of Messrs. Rickie & Co., Bangalore Iron Works, Bangalore city, for improvements in sugarcane crushing mills. (Filed 25th March 1896.)

No. 404 of 1895.—Eroom & Co., merchants, 168, Dharamtala Street, Calcutta, for an improved sola pith hat to be called the "musketeer range and shikar hat." (Filed 25th March 1896.)

No. 22 of 1896.—Eagle Pencil Company of the city, county and state of New York, United States of America, for improvements in pencils. (Filed 30th March 1896.)

No. 251 of 1895.—Charles Franklin Goddard, gentleman, of 1410, Marquette Building, Chicago, county of Cook, state of Illinois, United States of America, for threshing machines. (Filed 28th March 1896.)

No. 1002 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 256 of 1891.—William Robinson, electrical engineer, of Boston, in the county of Suffolk and state of Massachusetts, one of the United States of America, for an electric motor car. (From 31st March 1896 to 30th March 1897.)

No. 331 of 1891.—Philip Heary Holmes of Gardiner, county of Kennebec, state of Maine, one of the United States of America, mechanical engineer, for an improved electrical conductor. (From 21st January 1896 to 20th January 1897.)

No. 1003 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the Fourth Schedule to the Inventions and Designs Act (V of 1888) the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorizing others so to do has ceased:—

No. 86 of 1891.—Mr. C. Fairbairn's invention for improvements in apparatus for forging and finishing circular articles (Specification filed 31st December 1891.)

No. 102 of 1891.—The Giffard Gun and Ordnance Company's invention for improvements relating to guns or rifles and other apparatus operated by compressed or liquefied gases. (Specification filed 30th December 1891.)

No. 128 of 1891.—Mr. G. Tompkins' invention for improvements in foot rasps for horses. (Specification filed 29th December 1891.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

No 9 of 1890.—Mr. P Donaldson's invention for an improvement in the manufacture of oils, juices, etc, from seeds or nuts which can be applied to the native oil-mill or *ghánt* or any oil-mill made on the same principle (Specification filed 31st December 1890.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fifth year from the date of the filing thereof—

The sum of R50

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888, should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA"

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

RAILWAY DEPARTMENT—BENGAL.

NOTIFICATION.

Calcutta, the 1st April, 1896.

No. 38.—In accordance with section 42 of Act I of 1894, the following is published for information.

J. G. H. GLASS,
Secretary to the Government of Bengal.

MEMORANDUM OF AGREEMENT made and entered into this day of one thousand eight hundred and ninety-six *Between The Bengal District Road Tramways Company (Howrah Amta) Limited* a Joint Stock Company with limited liability duly incorporated under the Indian Companies' Act 1882 and having its registered office at 34 Jackson's Lane Calcutta (hereinafter called the Company) of the one part and *The Secretary of State for India in Council* (hereinafter called the Secretary of State) of the other part *Whereas* by order of the Government of Bengal acting in the premises for and on behalf of the Secretary of State published in the *Calcutta Gazette* of the twenty-seventh day of March one thousand eight hundred and ninety-five and being Notification No. 111 the Company have been empowered to make a tramway between the Town of Howrah and the Town of Amta within the District of Howrah *vid* Jagatbulabpore upon the guage and in the manner described and in accordance with the provisions contained in the now reciting order and copies of the agreements entered into between the Promoters on behalf of the Company and the local authorities under the provisions of the Bengal Tramways Act 1883 are set out in Parts I and II of the Schedule annexed to the said order. *And whereas* the Company in pursuance of the provisions of clause 10 of the said order have applied to the Government of Bengal for the acquisition by the Government for the Company under the provisions of the Land Acquisition Act I of 1894 of such additional land over and above that which the local authorities have agreed to grant free to the Promoters in terms of the Agreements between them as is required by the Company for the purposes of the Tramway and may be sanctioned by the Government of Bengal as necessary for such purposes and the Government of Bengal in pursuance of section 41 of the said Act I of 1894 have accordingly called upon the Company to enter into such agreement with the Secretary of State as is hereinafter contained. Now these presents witness that it is hereby mutually covenanted and agreed between and by the said parties hereto for themselves their Successors and Assigns in manner following that is to say:—

1. The Company shall pay to the Government of Bengal before the land is transferred to the Company the costs of the said land and all proper costs of the acquisition proceedings including the costs of any references and Appeals to Courts and the charges for the necessary establishment (an estimate of the charges of such establishment which is only to be treated as an approximate estimate and not as limiting the powers of the Secretary of State his Successors or Assigns to employ a larger establishment if found necessary being hereto annexed by way of schedule and marked A) and the Company shall by way of securing such payment and immediately upon the amount being made known to them deposit with the Government of Bengal the amount that may be estimated by the Collector or Officer to be appointed under Act I of 1894 to make the acquisition as the cost of the land and the costs of the said proceedings and the Government of Bengal shall use and apply the moneys so deposited in paying and satisfying the same costs and the Company shall from time to time deposit such further sum as may be required by the Collector to bring the amount in deposit up to the estimated costs of the land and of the acquisition proceedings respectively.
2. On payment or satisfaction in full by application of the moneys deposited of the cost of such land and the proper costs of the acquisition proceedings and by payment of any balance remaining unsatisfied after such application the land shall at the cost of the Company be conveyed and transferred to the Company by the Secretary of State.
3. The land shall be held by the Company subject to all the terms and provisions set out in the above recited order and the time within which and the conditions referred to in section 41 of the said Act I of 1894 on which the work of constructing and making the said tramway are to be executed and maintained shall be the time and the conditions prescribed in the said order and the terms on which the public shall be entitled to use the said work shall be those set out in the said order the Company hereby agreeing with and to the Secretary of State that this agreement shall take effect in all respects as if the terms provisions and conditions referred to in this clause had been particularly set out at length in this agreement in relation to the said land in place of being incorporated herein by reference to the said order

As witness the Seal of the Company and the hands of two of the Directors and the hand of the Secretary of State.

The Seal of the Company has been affixed by and in the presence of

MARTIN & CO.,
Managing Agents

Secretary and Treasurer.

BANK OF BENGAL;
Calcutta, 7th April, 1896.

SURVEY OF INDIA DEPARTMENT, REVENUE BRANCH.

NOTIFICATIONS.

Calcutta, the 6th April, 1896.

No. 1-R.—Mr. J. A. Freeman, Sub-Assistant Superintendent, 2nd grade, is granted privilege leave for two months, under Article 291 of the Civil Service Regulations, with effect from the forenoon of 15th May, 1896, or any subsequent date.

The 8th April, 1896.

No. 2.—Mr. W. A. Wilson, Extra Assistant Superintendent, 1st grade, is granted privilege leave for one month and sixteen days, under Article 291 of the Civil Service Regulations, with effect from the 15th April, 1896, or from any subsequent date he may avail himself of it.

THE YEARLY EXAMINATION OF CANDIDATES FOR 4TH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for 4th grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 1st and 2nd June, 1890, at 10-30 A.M. :—

SUBJECTS.	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity) . . .	100	50
Dictation (spelling, punctuation, etc.) . . .	100	50
Arithmetic (the whole) . .	240	100
Mensuration (*a*) the whole .	60	30
Book-keeping, (*b*) mercantile	100	50
TOTAL .	600	400

Mimimum required in all papers collectively.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) " Book-keeping " by Ball and Hamilton.
" Book-keeping " by double and single entry by W. Inglis (Chambers' Educational Course).

The marks gained by candidates who fail will not be published.

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner. Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed, but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it; but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of ₹10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior or by the instructor under whom he has been educated or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, on a consideration of these certificates, to decide whether the candidate should be registered for the examination or whether his application should be rejected. He will only forward the names of accepted candidates to the Principal, together with their applications in their own handwriting, statement of their ages, and fees. These should be transmitted altogether under one covering letter on the last day allowed by the rule.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full

examination and furnish fresh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

N.B.—The attention of candidates is drawn to the alteration in rule 2 (3). In future no candidate is to apply direct to the Principal for permission to attend the examination, but must send his application through an Examiner of Public Works Accounts, who will decide whether the candidate is to be admitted.
The Principal will attend to no application received direct.

J. S. SLATER,
Principal, Civil Engineering College.

SIBPUR;
The 31st March, 1896.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin,	R18,	or, post free,	R18-12.
½	„	R 9,	„	R9-8.
¼	„	R4-8,	„	R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন	.	১৮৲	বা ডাকমাশুল বিনা	১৮৲০
½ আধ	„	„	৯৲	„ ৯৲০
¼ সিকি	„	„	৪৷৹৲	„ ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876 :—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage.	With postage.
	R a. p.	R a. p.
For the Calcutta Series	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit :—

	For town.	For mofussil.
	R a. p.	R a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 3
„ each of the Madras, Bombay, and Allahabad Series; per copy . . .	0 5 3	0 5 9
„ the Calcutta Series. For the year .	7 2 6	8 6 3
„ each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance :—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	R 20	R 14	R 9
„ three issues . . .	„ 55	„ 39	„ 24
„ six „ . . .	„ 100	„ 68	„ 45
„ nine „ . . .	„ 145	„ 96	„ 64
„ twelve „ . . .	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates :—

	Without postage.	With postage.
	R a. p.	R a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies, R2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

Result of votes on the proposed amendment of Rule 41, submitted in Circular No. 3, dated 29th November, 1895 :—

Subject.	Yes.	No.
Whether Rule 41 shall be amended as proposed in the Circular.	932	8

By order of the Directors,
W. H. RYLAND,
Secretary.

U. S. F. P. FUND OFFICE,
CALCUTTA;
The 27th March, 1896.

Estate John McPherson, deceased.

Notice is hereby given that all creditors and other persons having any claims or demands upon or against the Estate of John McPherson, late of Lackatoora, Sylhet, in Assam, Tea Planter, deceased, who died on the 23rd day of June, 1895, and Letters of Administration to whose estate were on the 19th day of March, 1896, granted by the High Court of Judicature at Fort William in Bengal in its Testamentary and Intestate Jurisdiction to James Mackillican, of No. 7, Church Lane, in the town of Calcutta, the constituted attorney of the absent next of kin of the deceased, are hereby required to send in writing the particulars of their claims or demands to the said James Mackillican, on or before the 15th day of May next, and notice is hereby also given that after that day the said James Mackillican will proceed to distribute the assets of the said John McPherson, deceased, amongst the parties entitled thereto having regard only to the claims of which he shall then have had notice, and that he will not be liable for the assets so distributed, or any part thereof, to any person, of whose claim he shall not then have had notice.

Dated this 31st day of March, 1896.

DIGNAM & CO.,
Attorneys for the said James Mackillican.

6, STRAND, CALCUTTA.

SUPPLEMENT TO

The Gazette of India.

No. 15.] CALCUTTA, SATURDAY, APRIL 11, 1896.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

RETAIL PRICES FOR THE 2nd HALF OF FEBRUARY 1895.

SUPPLEMENT TO

The Gazette of India.

No. 16.] SIMLA, SATURDAY, APRIL 18, 1896.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and Information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, April 11th, 1896.

During the week under review conditions have been generally similar to those reported last week. Pressure has changed considerably from day to day, but throughout all the fluctuations of the barometer the general distribution of pressure has remained fairly constant, the charts having exhibited daily an area of relatively high pressure over Tenasserim, and a large area of low and deficient pressure over the north Gangetic Plain. The only important difference between the distributions of pressure in the present and the past weeks has been in North-Western India, where the barometer has been unsteady, and where a large shallow depression appeared on the 9th, and lasted until the close of the week. Hot and strong westerly winds have blown down the Gangetic Plain during the week, and strong southerly winds have been experienced at the head of the Bay. In other places the winds have been unsteady, and the directions variable, except in the north-west on the three last days of the week, when irregular cyclonic winds were shown there. Temperature has been steadily excessive over nearly the whole country during the week, the only important exception being the southern coast districts of Madras, where on most days there was some depression of temperature below the normal average. The rainfall has been very restricted, and confined almost wholly to Assam and some parts of Bengal and of Upper Burma.

Daily Summary.—*Sunday, April 5th.*—Pressure had decreased almost everywhere, and over the greater part of the country briskly. Readings were lowest in Bihar, highest in Tenasserim and Lower Burma, and relatively high over the west and south of the Peninsula. Pressure was everywhere below the normal average. Strong southerly and south-westerly winds prevailed at the head of the

Bay, and hot westerly winds down the Gangetic Plain. The mean temperature was excessive, except in Assam, Tenasserim, and a few places in the Peninsula, the abnormal excess being greatest in Bengal. Moderate rain had fallen over Assam and Sikhim, and a few light showers in other parts of the country.

Monday, April 6th.—Pressure had increased almost everywhere, and in most places briskly. Readings remained highest in Tenasserim and Lower Burma, and lowest in Bihar. The barometer still read below the normal average everywhere, especially so in the north-east. The winds were practically unchanged. The mean temperature was excessive, except on the South Madras coasts and in the Bombay Deccan. The excess was greatest over North and Central Bengal. Rain had again occurred over Assam and Sikhim, with a few local showers in other parts of the country.

Tuesday, April 7th.—Pressure had again increased in most places—more particularly in the north-east—so that, though readings remained lowest in Bihar and highest in Tenasserim, the pressure differences were smaller. The barometer read about normal over the greater part of the country. With the decrease in the steepness of the barometric gradient, the westerly winds had fallen off down the Gangetic Plain, but in other places the winds were little changed. The mean temperature remained excessive almost everywhere, the abnormal excess being again largest over Central Bengal. Moderate rain was again reported from Assam.

Wednesday, April 8th.—Pressure had changed slightly, and was still relatively uniform, though somewhat lower over Bihar and higher over Tenasserim than elsewhere. Fresh southerly winds continued to prevail over the head of the Bay, but elsewhere the directions were variable, and calms were common. The mean temperature was excessive, except over the Carnatic, the abnormal excess being greatest over Bengal. A few light showers of rain were reported from North-Eastern India.

Thursday, April 9th.—Pressure had decreased briskly over the Punjab and Upper Sind, and had again changed little elsewhere. A large shallow depression was shown over North-Western India, while there were relatively low readings over Bengal and Bihar. Pressure remained highest in Tenasserim. The wind remained southerly at the head of the Bay, and westerly winds were reported again down the Gangetic Plain, but elsewhere the directions were variable. The mean temperature remained excessive, except over the Madras coast districts and the Upper Assam Valley. The abnormal excess was about equally great over Eastern Rajputana and over Central Bengal. A few scattered thunder-showers were reported.

Friday, April 10th.—Pressure had decreased almost everywhere, but the changes were generally unimportant. The depression in the north-west had concentrated somewhat, and was shown in the neighbourhood of Lahore. Pressure was thus lowest over the Punjab, relatively low over Bengal, and high over North Bombay and over Tenasserim. The winds were irregular. A south-easterly gale was blowing at Murree. The mean temperature remained excessive, except in South Madras, and the only rainfall was a shower at Chaman.

Saturday, April 11th.—Pressure had increased over the Punjab and decreased elsewhere. The change was rapid over the North Gangetic Plain, and the low pressure area in that locality had again become strongly marked. Westerly winds prevailed down the Gangetic Plain, southerly winds at the head of the Bay, and variable winds in most other places. The distribution of the mean temperature relatively to the normal was unchanged. Duststorms had given showers to a few places in the north-west, and moderate rain had fallen in Assam.

Temperature.—The excessive heat which prevailed generally throughout India during last week was continued and indeed intensified during the week under review. Practically the only region where the mean temperature has ranged below the normal average during the present week has been the coast district of the Carnatic from Madras southward. At times in Assam a depression of temperature has taken place following on a shower of rain, but these have been only temporary changes from which the temperature has quickly recovered.

The principal abnormal excess of temperature has been shown over Central and North Bengal, but in parts of the Punjab and of Rajputana on some days the excess has been almost as great as in Bengal.

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Province.	April 1896.							Mean variation of week.
	5th	6th	7th	8th	9th	10th	11th	
	°	°	°	°	°	°	°	°
Burma	+1·9	+1·8	+2·1	+2·8	+2·2	+2·0	+2·0	+2·1
Bengal and Assam	+4·9	+4·2	+3·7	+3·9	+3·5	+3·6	+3·9	+4·0
North-Western Provinces and Oudh	+3·8	+1·5	+3·2	+2·4	+3·6	+5·2	+4·3	+3·4
Punjab	+2·8	+3·3	+4·0	+5·0	+6·2	+9·5	+6·3	+5·3
Bombay	+1·6	+0·7	+1·6	+2·9	+3·2	+2·6	+2·9	+2·2
Central Provinces and Berar	+3·0	+3·7	+3·7	+3·4	+3·6	+2·9	+2·1	+3·2
Central India and Gujarat	+3·4	+1·3	+2·9	+2·3	+4·6	+3·1	+3·1	+3·0
Sind and Rajputana	+3·0	+3·3	+3·8	+3·0	+4·4	+5·2	+6·2	+4·1
Madras	+1·6	+1·2	+0·5	+0·5	+1·4	+1·5	+2·2	+1·3
Mean for whole of India	+2·9	+2·3	+2·8	+2·9	+3·6	+4·0	+3·7	+3·2

The above shows that for the whole of India for each day of the week the mean temperature has been excessive, the excess ranging from 2·3° on the 6th to 4·0° on the 10th. The provincial variations exhibit the same results in every province in India, showing an excess both for the week as a whole and for every day of the week.

The following were the maximum temperatures throughout India reported on each day:

April	5th	109·0°	at	Chaibassa.
,,	6th	110·0°	,,	,,
,,	7th	108·5°	,,	Sambalpur.
,,	8th	109·0°	,,	Chaibassa.
,,	9th	109·0°	,,	,, and Sambalpur.
,,	10th	110·4°	,,	Chanda.
,,	11th	110·9°	,,	,,

Rain.—The distribution of rain as regards the different provinces of India has been much the same during the week under review as during the past few weeks. Most of the rainfall has taken place over North-Eastern India, but scattered showers have occurred in different parts of the country. The amount of rain has, however, been generally smaller than was the case last week, and in the north-east much smaller. The rainfall over North-Eastern India occurred under the ordinary set of conditions. Strong damp southerly and south-westerly winds blew at the head of the Bay and carried much moisture into the interior. At the same time dry easterly winds prevailed over Assam, with the result that thunderstorms were of daily occurrence over and near the Assam Hills, and moderate rainfall was received. Over Burma the usual low pressure area of the hot weather was developed, and a well marked air current from the Bay blew up the valley of the Irrawaddy. This current on encountering the higher lands of Upper Burma was forced into ascent, and as a result gave a few light showers to several stations in the northern parts of Burma. The slight rainfall which is reported from other parts of the country fell during local dust and thunder storms, and, except over the Bombay Deccan, was generally insignificant in amount. The rainfall over North-Eastern India mainly occurred during the first four days of the week, the 9th, 10th and 11th having been generally fair, except

in the Assam Valley, where a moderate shower occurred on the 11th. In the Bombay Deccan scattered showers occurred throughout the week. The concluding table gives the rainfall data. From the first column it will be seen that rain of greater or less amount fell in eighteen of the rainfall divisions as compared with twenty in the preceding week. Of these eighteen divisions no less than twelve had an average actual rainfall for the week of less than one-tenth of an inch. Consequently it was only in six divisions, *viz.*, Assam (Surma, Hills, and Brahmaputra), Malabar Coast, the Bombay Deccan, and Madras (South), that effective rainfall was received, all the other divisions being actually or practically without rain. The heaviest actual average reported was 5·76 inches in the Surma division of Assam, followed by 2·59 inches in the hills of Assam, by 1·70 inches in the Brahmaputra Valley, and by 0·26 inch in the Bombay Deccan. The second column of the table giving the average normal rainfall of the week shows that the anticipated rainfall during the present week is comparatively small in all divisions, except in Assam and the Bengal hills. In the great majority of cases, however, this small amount has not been reached, and, except in the Assam divisions, in the Bombay Deccan, and in Khandesh, the actual rainfall has been less than the normal. In the case of the Deccan and of Khandesh the excess is only trifling, but in the case of Assam the excess varies between 0·3 inch and 1·2 inches.

The three concluding columns of the table exhibit the state of the seasonal rainfall. They show that for the period March 1st to April 11th there has been an excess of rain only in Western Rajputana. In Assam (Surma and Hill tracts and Brahmaputra), the Punjab (West), Sind, Baluchistan, and Madras (South) the rainfall of the period has been about normal, *i.e.*, has varied by less than 20 per cent. from the average, and that in all other divisions it has been deficient. Over a large part of the country it has been actually or practically *nil* for the whole period.

The following are the principal totals recorded during the week under review:—Nemotha (Cachar) 7·93 inches, Cherrapunji (Khasia Hills) 15·30 inches, Sibsagar 4·32 inches, Ponani (Malabar) 3·00 inches, Nargund (Dharwar) 1·35 inches, Hukeri (Belgaum) 2·10 inches, Hathkalangda (Kolhapur) 2·00 inches, Ramagiri (Ganjam) 1·18 inches.

Note.—The figures showing the seasonal, actual, and normal rainfall and difference for the Assam hills are not comparable with those given last week, as during the present week additional districts have been added.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *16th April 1896.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 11th April.*—No rain, except light showers in parts of Ganjam, the Nilgiris, and the Southern and West Coast districts. Preparations for next season have commenced. The standing crops are confined to small areas, and are generally fair. The harvest continues with moderate yield. Pasture is generally scarce, but fodder is available. Cattle are in good condition. Prices are practically stationary.

Bombay.—*For week ending 15th April.*—Rain fell in parts of the Deccan and Karnatak. The standing crops have been damaged by blight, insects or insufficient moisture in parts of Karachi, but are otherwise good. Cotton-picking continues in Gujarat, Kathiawar and Dharwar, and harvesting of the late crops in parts of ten districts. Preparations for next season are progressing in sixteen districts. Fodder is insufficient in parts of Sind. Agricultural stock are in good condition, except in Shikarpur and Broach. Prices are normal, except in parts of Sholapur.

Bengal.—*For week ending 13th April.*—Except for a shower at Dacca, there was no rain in the province during the week. The land everywhere is abnormally dry, and the crops on the ground are suffering, and the ploughing and early sowings are retarded. In some parts of North Bengal and in the low-lands of Bihar the sowing of early rice is going on. In Bihar millets are also being sown. There is scarcity of water in parts of Western and Central Bengal. Prices continue almost stationary, but in East Bengal and in Chota Nagpur and the adjacent districts they are higher than at the corresponding period of last year.

North-Western Provinces and Oudh.—*For week ending 15th April.*—The weather is seasonable, but want of rain is greatly felt in the hill districts, where the crops on unirrigated tracts are suffering from drought. Harvesting operations are practically completed, and threshing and winnowing are in active progress. The extra crops are flourishing, and irrigation is in progress where practicable. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, the 11th April, were—Banda 75,681, Hamirpur 39,009, Jhansi, excluding Garoutia from which returns have not been received, 17,315, Jalaun 33,325, Allahabad 2,028, Pilibhit 2,257, Garhwal 1,809—total 1,71,424; of this number 26,924 dependants were gratuitously relieved on the works; 2,893 persons also received gratuitous relief under other provisions of the Famine Code. Supplies are ample. Fodder is scarce in places, and scarcity of water is also reported in Banda, Hamirpur and Lucknow. Prices are generally stationary, but have risen in a few districts.

Punjab.—*For week ending 15th April.*—Rain has fallen in the Rawalpindi, Shahpur, Gujranwala and Dera Ismail Khan districts. The canal crops are being reaped in Hissar. Spring reaping is in progress in Delhi, Umballa, Amritsar, Jullundur, Lahore, Mooltan, Shahpur and Gurgaon. The extra spring sowings have commenced in Jullundur and Amritsar. The autumn sowings are in progress in Amritsar, Sialkot and Mooltan; also sowings of cotton and other crops in Lahore, of sugarcane in Rohtak, of cane and cotton in Gujranwala. Harvesting of gram, barley and mustard is in progress in Dera Ismail Khan. The condition of the spring crop is good in Mooltan. The condition and prospects of the spring crop are generally reported average on irrigated and below average on unirrigated lands. The stock of grain is said to be insufficient in Ferozepore, Sialkot, Dera Ismail Khan, Gujranwala and in parts of Lahore and Shahpur. Cattle are in poor condition in Hissar and Gurgaon. Fodder is scarce in all districts, except Delhi, Jullundur and Rawalpindi. The stock of fodder is said to be insufficient in some districts. Prices are normal in Delhi and Ferozepore, and are falling in Gujranwala; elsewhere prices are high.

Central Provinces.—*For week ending 15th April.*—The weather is abnormally hot and occasionally close. In the north, the threshing of the winter crops is practically completed, and preparations for the autumn sowings have commenced in Chanda and Raipur. Fodder is becoming scarce in Saugor, Seoni, Sambalpur and parts of Raipur and Chanda. The water-supply is scanty in

Burma.—*For week ending 11th April.*—In Lower Burma reaping of dry-weather paddy has been completed in Tavoy. In Upper Burma cultivation of early wet-weather paddy continues in Kyaukse. Reaping of dry-weather paddy has commenced in Sagaing, and of the island crops in Mandalay. The standing crops of dry-weather paddy, early wet-weather paddy and the crops on islands are generally promising. The price of paddy has risen considerably in Pegu, Myaungmya, Thayetmyo and Magwe, and slightly in Prome and Toungoo; elsewhere prices are stationary.

Assam.—*For week ending 14th April.*—The weather is seasonable. Some damage has been done to the standing crops by hailstorms in the Karimganj sub-division. Sowing of early rice continues. Pressing of sugarcane is nearly finished. The condition of cattle is fair. Fodder and water are insufficient in places.

Mysore and Coorg.—*For week ending 15th April.*—MYSORE: The standing crops are withering for want of rain in Kolar and Chitaldroog. Paddy has been harvested in Chitaldroog, and is being sown in parts of Tumkur. Prices have risen in Kadur, but have fallen in Tumkur, Mysore and Chitaldroog.

COORG.—Rainfall moderate. Rain is much needed for the coffee blossom. Ploughing of fields for *ragi* (*Eleusine coracana*) has commenced. Fodder for cattle is scarce. Prices are normal.

Berar and Hyderabad.—*For week ending 15th April.*—BERAR: No rain during the week. The weather is warm and occasionally cloudy. Threshing of wheat continues only in Ellichpur. Land is under preparation for the monsoon sowings. Scarcity of fodder and water prevails in all districts, except Basim. Prices are fluctuating in Akola and Wun, but are stationary elsewhere.

HYDERABAD.—No rain during the week. The spring crop has been harvested in many taluks. Fodder is getting scarce. The water-supply is decreasing. Prices are normal.

Central India.—*For week ending 15th April.*—No rain during the week. Agricultural operations have been completed in Baghelkhand and Malwa and in parts of Gwalior, and are nearly completed in Bundelkhand, but are in progress in all other Agencies. The probable outturn will be below average in three Agencies owing to want of rain, but fairly good in other Agencies. Cattle are in good condition, except in parts of Gwalior and Bhopal. Pasturage is good and sufficient in all Agencies, except in Gwalior. Prices are above normal in Baghelkhand, Malwa and Goona and in a few districts of Gwalior, but are normal elsewhere. Opium is in fairly good condition in Gwalior, Bhopal, Malwa, and the crop has been gathered in Bhopawar. The numbers employed on relief works in Bundelkhand and Goona are 5,730 and 956 respectively.

Rajputana.—*For week ending 15th April.*—Agricultural operations are generally satisfactory, except in Merwara and Jaisalmere where the crops and prospects are poor. The unirrigated crops are suffering in Ajmere-Merwara, and they have been damaged in Dholepore for want of rain. Agricultural stock are generally in good condition, but are suffering in Ulwar and parts of Jaisalmere for want of fodder. Pasturage and fodder are scarce in Shahpura, Ajmere-Merwara, Ulwar, Tonk, Jaisalmere and in parts of Meywar, and fodder is failing in Dholepore and Bhurtpore, but is sufficient elsewhere. Prices are rising in four States, falling in two, and fluctuating in one; elsewhere prices are steady. In Marwar 4,519 persons are on relief works, and 192 on gratuitous relief, in Shahpura 450 are on relief works, in Merwara 2,561 are on relief works, in Bikanir 2,065 are on relief works, and 251 on gratuitous relief, in Jaisalmere 363 are on relief works, and 44 on gratuitous relief.

Kashmir.—*For week ending 14th April.*—KASHMIR VALLEY: Rain has fallen during the week. The prospects of the spring crops are excellent. Rice and maize are being sown. Prices continue normal.

JAMMU PROVINCE.—*For week ending 15th April.*—No rain. Reaping of the spring crops has commenced. Cultivation of cotton and sugarcane is in progress. Cattle are in good condition. Prices are high.

Nepal.—*For week ending 11th April.*—The weather is hot, dry and windy. Indian-corn and early rice cannot be sown for want of rain. Prices are rising.

DENZIL IBBETSON,

GOVERNMENT OF INDIA.

INVENTIONS and DESIGNS.

Calcutta, the 16th April 1896.

NOTIFICATIONS.

No. 1062 P.—An application for an extension of the term of exclusive privilege in respect of the undermentioned invention has been filled under Section 15 of Act V of 1888 in the office of the Secretary appointed under the Inventions and Designs Act, 1888 :—

No. 73 of 1882.—Edward Lennon Cantwell, Civil Engineer, of No. 5, Old Post Office Street, Calcutta, for improvements in the construction of portable sugar-cane mills.

No. 1063 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 11th April 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 123 of 1896.—Gustaf Ferdinand Flodman, engineer, of 85 B, Folkkungagatan, Stockholm, Sweden, for improvements in diaphragm pumps driven by steam.

No. 124 of 1896.—Gerhard Ditmar, manufacturer, of 23, 25, 27, Erdbergstrasse, Vienna, in the empire of Austria, for an improved annular liquid combustible burner for incandescent light.

No. 125 of 1896.—Messrs. Shanks & Co. as assignees of John Shanks, of Tubal Works, Barrhead, in the county of Renfrew, North Britain, sanitary engineer, for improvements in water closets and urinals.

No. 126 of 1896.—Emil Claviez, general-director, of 1, David Street, Leipzig, in the German empire, for an improved process for the manufacture of yarn or thread from paper and apparatus therefor.

No. 1064 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the office of the Secretary, in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying :—

No. 136 of 1895.—Ramsaran Das, son of Piarilal, cloth merchant, Chowrie Bazar, Delhi, for improvements in machines for extracting the juice of the sugarcane. (Filed 12th March 1896.)

No. 181 of 1895.—Ramsaran Das, son of Piarilal, cloth merchant of Chowrie Bazar, Delhi, for an improved machine for extracting the juice of the sugarcane. (Filed 12th March 1896.)

No. 214 of 1895.—The National Opalite Glazed Brick and Tile Syndicate, Limited, of 70—71, Bishopsgate Street, Within, London, for improved or improvements in connection with fancy or ornamental bricks, tiles, slabs, wallings, ceilings and the like. (Filed 26th March 1896.)

No. 219 of 1895.—Samuel Locke Johnston, of Boston, in the county of Suffolk and state of

Massachusetts, United States of America, for improvements in cotton gins and wool burrers. (Filed 2nd April 1896.)

No. 266 of 1895.—Alexander Gray, horse trainer, of Mount Street, Canterbury, in the colony of New South Wales, for an improved apparatus to be used for starting races. (Filed 2nd April 1896.)

No. 362 of 1895.—Lieutenant-Colonel Edward Brooke Anderson, commandant, 24th Regiment, Madras Infantry, stationed at Bangalore, for improvements in permanent and portable cooking ranges. (Filed 28th March 1896.)

No. 402 of 1895.—Peter Ross, conductor, sub-engineer, Public Works Department, Railway branch, and signal and interlocking inspector, North-Western Railway, Lahore, for a method of adjusting disc signal cranks worked with points on railways, to be called, "Disc signal adjustable crank." (Filed 9th March 1896.)

No. 405 of 1895.—Wilhelm Stern, merchant of Antwerp, kingdom of Belgium, 162, Rue de la Province Sud, for improvements in collapsible casks. (Filed 30th March 1896.)

No. 1065 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 13 of 1888.—William Lindsey Henderson, engineer of Khangaum, West Berar, and Frederick Walter Shallis, engineer, of 9, Marine Street, Bombay, for an improved beater cotton gin. (From 27th April 1896 to 26th April 1897.)

No. 155 of 1888.—Ludwig Mond, manufacturing chemist of Northwich in the county of Chester, and Dr. Carl Langer, Ph.D. of Hampstead, N. W., in the county of Middlesex, both in the kingdom of England, for improvements in gas batteries. (From 10th April 1896 to 9th April 1897.)

No. 1066 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the Fourth Schedule to the Inventions and Designs Act (V of 1888) the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, subsection (a) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased :—

No. 282 of 1890.—Mr. W. Lunsford's invention for improvements in cigarette machines. (Specification filed 7th January 1892.)

No. 115 of 1891.—Dr. H. C. Moir's invention for improvements in reversible seats. (Specification filed 8th January 1892.)

No. 244 of 1891.—Major B. A. N. Parrott's invention for an improved safety bolt. (Specification filed 9th January 1892.)

No. 319 of 1891.—Mr. E. Green's invention for improvements in and relating to billiard tables. (Specification filed 6th January 1892.)

Fee in respect of the continuance of an exclusive privilege—

(*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of ₹50 for each of the said inventions.

No. 298 of 1890.—Mr. E. C. Lea's invention for improvements in sewing machines. (Specification filed 9th January 1891.)

Fee in respect of the continuance of an exclusive privilege—

(*b*) After the filing of the specification and before the expiration of the fifth year from the date of the filing thereof—

The sum of ₹50.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888, should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

No. 2758.—In supersession of this Office Notification No. 1599, dated the 3rd March, 1896, the Agent to the Governor-General and Chief Commissioner is pleased to direct that in consequence of the deputation on Foreign Service of Diwan Ganpat Rai, C.I.E., Extra Assistant Commissioner at Sibi, Kazi Muzaffar Khan, a Tahsildar of the 3rd grade, and at present officiating as an Extra Assistant Commissioner in Baluchistan, shall be appointed to be an Extra Assistant Commissioner, substantive *pro tempore*, with effect from the 27th February, 1896.

2. Kazi Muzaffar Khan will continue to carry on the duties of Extra Assistant Commissioner in Lower Zhob.

No. 2759.—Lala Jamiat Rai, head clerk in the Office of the Political Agent and Deputy Commissioner, Quetta-Pishin District, is appointed to officiate as an Extra Assistant Commissioner in Baluchistan, and is posted as Extra Assistant Commissioner at Sibi, with effect from the 27th February, 1896.

No. 2765.—A substantive vacancy having arisen in the Graded List of Extra Assistant Commissioners through the death of Kazi Imamuddin, Lala Udho Dass *waid* Dhanpat Rai, a Tahsildar of the 2nd grade, at present on deputation in Foreign Service, is appointed to be an Extra Assistant Commissioner in Baluchistan, with effect from the 21st March, 1896.

Lala Udho Dass will continue on deputation in Foreign Service.

No. 2766.—On return from the extraordinary leave granted to him in this Office Notification No. 4087, dated the 21st June, 1895, Maulvi Abdul Rahim, Native Assistant to the Agent to the Governor-General, Khojak Pass, is appointed to be an Extra Assistant Commissioner, substantive *pro tempore*, *vice* Lala Udho Dass, *waid* Dhanpat Rai, on deputation in Foreign Service, and is posted to Pishin, with effect from the afternoon of the 21st March, 1896.

The 8th April, 1896.

No. 2872.—With reference to this Office Notifications No 56-A., dated 3rd January, 1896, and No. 1044, dated 8th February, 1896, Munshi Anwar-ud-din, Tahsildar of the 4th grade, was relieved of the post of Officiating Extra Assistant Commissioner in Pishin by Munshi Syed Rasul on the forenoon of the 26th February, 1896, and assumed charge of the Office of Tahsildar of Quetta on the forenoon of 2nd March, 1896.

By Order,

W. M. CUBITT,
First Assistant.

AGENT TO THE GOVR.-GENERAL IN BALUCHISTAN.

NOTIFICATION.

Quetta, the 7th April, 1896.

No. 2774.—With reference to Foreign Department Notification, No 498-G., dated the 25th March, 1896, Lieutenant-Colonel E. A. Fraser, Indian Staff Corps, Political Agent in South-Eastern Baluchistan, availed himself of the one year's leave therein granted to him, with effect from the afternoon of the 18th March, 1896.

By Order,

W. M. CUBITT,
First Assistant.

CHIEF COMMISSIONER OF AJMERE-MERWARA.

NOTIFICATIONS.

Abu, the 28th March, 1896.

No. 190—*III*-1.—In exercise of the powers conferred by section 5 of the Ajmere Courts Regulation (1 of 1877), and with the previous sanction of the Governor General in Council, the Chief Commissioner of Ajmere-Merwara is pleased to appoint Mir Sayyid Hussain, while holding charge of the current duties of the office of Extra Assistant Commissioner, 1st grade, to be a Subordinate Judge of the 1st class in the District of Ajmere-Merwara.

No. 190—*III*-3—Under section 11 of the Ajmere Courts Regulation, 1877, the Chief Commissioner of Ajmere-Merwara, with the previous sanction of the Governor General in Council, is pleased to invest Mir Sayyid Hussain with the powers of a Judge of a Court of Small Causes, to be exercised, while he holds the appointment of Subordinate Judge of the 1st class and within the limits defined below :—

The Ajmere Division of the Ajmere-Merwara District, with the exception of the Kekri parganah, the Goela Thana, the Deoli Cantonment, the jurisdiction as specified in the Notification of June 1877 of the Cantonment Magistrate, Nusseerabad, and the jurisdictions of the Honorary Magistrates of Bhinae, Masuda, Deolia, Bandanwara, Kherwa and Pisangan.

The 4th April, 1896.

No. 363—675-*II*.—In exercise of the powers conferred by Section 6 of the Diwan's Estate Regulation (III of 1887) the Chief Commissioner of Ajmere-Merwara, with the previous sanction of the Governor General in Council, is pleased to appoint Captain R. B. Berkeley, with effect from the date on which he assumed charge of the office of Assistant Commissioner of Ajmere, to be the Agent to administer, on behalf of the Government, the property vested in Her Majesty under the said Regulation.

The 8th April, 1896.

No. 389—328-*VIII*.—Captain H. L. Showers, Indian Staff Corps, Officiating Political Assistant of the 2nd class, is invested, under section 12 of Act X of 1882 (Criminal Procedure Code), with effect from the date of assuming charge of the office of Assistant Commissioner, Ajmere, with the powers of a Magistrate of the 1st class, to be exercised within the Ajmere District.

The 13th April, 1896.

No. 411—390.—Babu Rash Behari Maitra, Assistant Surgeon, Beawar, returned from the privilege leave granted him in this Office Notification No. 27—390, dated the 9th January, 1896, and resumed charge of his duties from first class Hospital Assistant Mohamed Abdul Wahid, on the forenoon of the 28th ultimo.

No. 415—190-*III*.—Mr. Fateh Chand Khabya, Barrister-at-Law, Extra Assistant Commissioner, 1st grade, Ajmere, availed himself on the forenoon of the 30th ultimo of the privilege leave granted him in this Office Notification No. 251—190-III, dated the 19th March, 1896.

By Order,

L. IMPEY, *Captain*,
First Assistant to the Governor-General's Agent, Rajputana, and Chief Commissioner, Ajmere-Merwara.

THE RESIDENT IN MYSORE.

NOTIFICATIONS.

Bangalore, the 7th April, 1896.

No. 1236.—With the approval of the Government of India, the Resident in Mysore sanctions the grant of privilege leave for three months, with effect from the 17th April, 1896, or such subsequent date as he may avail himself of it, to Mr. H. F. Wilkieson, Officiating District Superintendent of Police in the Civil and Military Station of Bangalore.

Mr. F. E. C. Carr, whose services have been placed at the Resident's disposal by the Madras Government, is appointed, with the approval of the Government of India, to officiate as District Superintendent of Police in the Civil and Military Station of Bangalore during the absence on privilege leave of Mr. H. F. Wilkieson, or until further orders.

The 9th April, 1896.

No. 1285.—Mr. H. F. Wilkieson, Superintendent of Railway Police in the Mysore State, assumed charge of his duties on the 11th March, 1896.

By order,

K. D. ERSKINE, *Captain*,
First Assistant to the Resident.

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed, but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it; but if he is

* This term includes employment under Local Boards and foreign bodies if such is pensionable by the British Government.

not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior or by the instructor under whom he has been educated or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, on a consideration of these certificates, to decide whether the candidate should be registered for the examination or whether his application should be rejected. He will only forward the names of accepted candidates to the Principal, together with their applications in their own handwriting, statement of their ages, and fees. These should be transmitted altogether under one covering letter on the last day allowed by the rule.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

N.B.—The attention of candidates is drawn to the alteration in rule 2 (3). In future no candidate is to apply direct to the Principal for permission to attend the examination, but must send his application through an Examiner of Public Works Accounts, who will decide whether the candidate is to be admitted.

The Principal will attend to no application received direct.

J. S. SLATER,
Principal, Civil Engineering College.

SIBPUR ;
The 31st March, 1896.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876 :—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . Rs22-8

	Without postage.	With postage.
	R a. p.	R a. p.
For the Calcutta Series	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.	For mofussil.
	R a. p.	R a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 3
,, each of the Madras, Bombay, and Allahabad Series; per copy . . .	0 5 3	0 5 0
,, the Calcutta Series. For the year .	7 2 6	8 6 3
,, each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	R 20	R 14	R 9
,, three issues . . .	,, 55	,, 38	,, 24
,, six ,, . . .	,, 100	,, 68	,, 45
,, nine ,, . . .	,, 145	,, 96	,, 64
,, twelve ,, . . .	,, 180	,, 120	,, 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.	With postage.
	R a. p.	R a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies, R2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, Rs22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

THOMASON COLLEGE, ROORKEE.

NOTIFICATION.

In para 19 of the Circular, Engineer and Telegraph Classes, dated 1st January, 1896, it is stated that the Civil Engineering Course extends over two years. The Government having determined that this Course shall be extended to three years when the administrative arrangements for such extension are completed, notice is hereby given to intending Candidates, that the Government retains discretion to extend the Course to three years without further notice.

J. CLIBBORN, *Lt.-Col., I.S.C.*,
Principal, Thomason College.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1893.

A Registry Office for men of all grades out of employ is kept up by the Principal, Thomason College, Roorkee. Officers requiring men are requested to apply to Principal.

J. CLIBBORN, *Major, S.E.*,
Principal, Thomason College.

PROPOSED AMENDMENT OF THE INDIAN CONTRACT ACT, 189

The following papers are published for general information:

No. $\frac{3}{413\text{-}43}$, dated Simla, the 13th April, 1894.

From—C. J. LYALL, ESQ., C.S.I., C.I.E., Secretary to the Governme
Home Department,

To—All Local Governments and Administrations, and Registrar,
Calcutta.

I am directed to invite ~~the attention of~~ His Excellency the Governor in Council ~~His Honour the Lieutenant-Governor (and C~~ ~~the Honourable the Chief Justice a~~ your attention

to the cases of *Kinu Ram Dass* v. *Mozaffer Hossain Shaha* and *S Mal* v. *Shib Lal*, which were decided by Full Benches of the High Calcutta and Allahabad and are reported in the Indian Law R Calcutta Series, p. 809, and 14 Allahabad Series, p. 273, respectiv those Courts considered the nature and extent of the liens, sometimes as salvage liens, which have been allowed in favour of persons money upon the property of others for the preservation of such proper

2. It will be observed that neither of the Full Benches in these unanimous, Mitter and Norris, J.J., dissenting in the Calcutta case mood, J., in the Allahabad one. Further, in a later Madras case, *Pichu*, reported in the Indian Law Reports, 11 Madras Series, p. 452, (Kernan and Mutusami Ayyar, J.J.,) expressed their agreement with of the minority of the Calcutta Bench, whilst the view of the Bo Court, as expressed by Sargent, C. J., and Birdwood, J., in the case *Ram Chunder Pai* v. *Hari Kamti*, which was reported in the Indian La 11 Bombay Series, p. 313, and is, so far as is known, the latest ruli Court on this subject, is also distinctly opposed to that adopted by th of the Calcutta Full Bench in their ruling which was delivered in th year.

3. Having carefully considered these cases and the general involved, the Governor General in Council thinks it desirable to consi it would not be well to incorporate into Indian law, by express statu ment, some provisions on this subject, founded on the rule of equ by the English and Irish Courts in the cases referred to by Mr. Jus in his judgment in the Calcutta case, which will enable persons makin which have the effect of preserving property from alienation to acquir circumstances a lien or charge on such property in respect of such pa

4. There has already been some legislation in this direction in In a statutory lien was conferred as far back as 1819 (see Bengal Regul of 1819, section 13, clause *fourth*) in favour of an under-tenant advan to preserve a patni taluk from sale for arrears of the zamindar's re provisions were applied to payments made by any one interested in

section 9, and the Madras Revenue Recovery Act (Madras Act II section 35), and under the Transfer of Property Act, 1882, section 72, mortgagees in possession are entitled to spend such money as is nec the preservation of the mortgaged property from destruction, forfeitu and, in the absence of a contract to the contrary, to add such mo principal money at the rate of interest payable on the principal, and such rate is fixed, at the rate of 9 per cent. per annum.

6. It may also be noted that by section 69 of the Indian Contra of 1872), and by some other enactments, *e. g.*, section 148 (3) of t Municipal Act (XX of 1891), a remedy has been given to persons m ments, under compulsion of law, on behalf of others. That remedy is personal only, and it would seem desirable to extend it to a cha property preserved by means of such payments.

7. The Governor General in Council would be glad to be informe

[after consulting the Hon'ble the Judges of the High Court / the learned Judges of the Chief Court, / the Governor in Counc / the Lieutenant-Governo / the Lieutenant-Governor and Ch / you / the Hon'ble Jud

any objection to the enactment of some such provisions as are in the enclosed draft.

8. I am to add, with reference to the communication from this D No. 399/400, dated the 27th March 1885, High Court / Government of Bengal has also been consulted question.

[To Bengal Government and High Court, Calcutta, only.]

Draft Provisions.

After section 69 of the Indian Contract Act, 1872, the following shall b namely:

69A. If any such payment as is mentioned in the last preceding section ha of preserving any property from alienation, the person making the payment s titled to a charge upon the property so preserved for reimbursement of the su with interest at such rate as the Court may direct.

Such charge shall have priority over all charges on, and rights in, such pro would have been defeated if such alienation had taken effect, and shall be su such charges and rights as would have remained unaffected notwithstanding such

69B. When two or more persons are jointly interested in any property such persons makes any payment in respect thereof to which they are jointly a liable, or to which they ought by law or in equity to contribute either equall definite proportions, the person making such payment shall be entitled to a char interest or respective interests of the other or others of them for reimburseme the proportion or respective proportions of the sum so paid to the payment or they respectively was or were so liable as aforesaid, together with interest such rate as the Court may direct.

69C. If any person, at the request of a person having an interest in any and in order to preserve such property from alienation, pays any charge or de ing such property which such last-mentioned person was bound by law to pay, the ing such payment shall be entitled to a charge on the property so preserved for ment to him of the sum so paid, with interest thereon at such rate as the Court The person entitled to such charge shall have the same priority in respect thereof himself and the other persons interested in such property, as the person wh

Honourable the Judges of the High Court and the Advocate-Gener proposal to incorporate into Indian law some provisions on the subject liens founded on the rule of equity adopted by the English and Iris the cases referred to by Mr. Justice Mitter *in re* Kinu Ram Dass v Hossain Shaha. It will be seen that both the High Court and the General are in favour of the proposed legislation, and His Excellency th in Council sees no reason to dissent from their views.

Extract from the Proceedings of the Government of Madras, Judicial No. 1875 (Judicial), dated 2nd August, 1894.

READ the following papers:

Dated Coonoor, the 4th June, 1894.

From—J. H. SPRING-BRANSON, Esq., Advocate-General, Madras,

To—The Chief Secretary to Government, Madras.

I have the honour to enclose my opinion upon the proposed section 69 of the Indian Contract Act, 1872, as requested in G. O 8th May, 1894, No. 1106.

ENCLOSURE.

OPINION.

1. I am strongly in favour of the proposed statutory enactme persons who make payments which have the effect of preserving pr alienation shall acquire in certain circumstances a lien or charge on su in respect of such payments.

2. It is most desirable that the present conflict of opinions as to w a provision does, or does not, form part of the existing rules of equit put an end to; and that the proposed equity which is admittedly "at because it is reasonable and just—be incorporated into Indian law statutory enactment.

3. The proposed additions to section 69 of the Indian Contract "give effect to a principle which preven in many cases, and in no conceivable c unjustly."*

* Per Mitter, J., *in Kinu Ram Das v. Monaffer Hossain Shaho*, I.L.R., 14 Cal., at p. 815.

No. 1945, dated Madras, the 19th July, 1894.

From—H. W. FOSTER, Esq., Registrar of the High Court of Judicat Side, Madras,

To—The Chief Secretary to Government, Madras.

With reference to G. O., dated 8th May last, No. 1106, Judicial cating, for the opinion of the High Court, a letter from the Governm proposing certain additions to section 69 of the Indian Contract Act,

No. 5827, dated Bombay Castle, the 22nd August, 1894.

From—The HONOURABLE MR. W. LEE-WARNER, C.S.I., Secretary to ment of Bombay,

To—The Secretary to the Government of India, Home Department.

I am directed to acknowledge the receipt of your letter No. $\frac{2 \text{ Judicial}}{414}$, d 13th of April last, forwarding the draft of certain sections which might be to the Indian Contract Act, 1872, with a view to enable persons maki ments which have the effect of preserving property from alienation to ac certain circumstances a lien or charge on such property in respect of su ments, and enquiring whether the Governor in Council, after consult Honourable the Judges of the High Court, sees any objection to the enact some such provisions as are proposed in the draft.

2. In reply, I am to forward herewith, for submission to the Governm India, copy of a letter from the Registrar of Her Majesty's High Court, A Side, Bombay, No. 1658, dated the 2nd August, 1894, and its accompa containing the opinion of the High Court on the draft, and to state that cellency the Governor in Council concurs with the Honourable the Judg approves of the draft provision.

No. 1658, dated Bombay, the 2nd August, 1894.

From—R. D. SETHNA, Esq., Registrar, High Court, Appellate Side, Bom

To—The HONOURABLE MR. W. LEE-WARNER, C.S.I., Secretary to Go of Bombay, Judicial Department.

I am directed to acknowledge the receipt of your letter No. 3396, d 17th May last, forwarding copy of a letter from the Government of India Department, Judicial, and of a draft Bill adding certain sections to the Contract Act, 1872, to enable persons making payments which have the preserving property from alienation, to acquire in certain circumstances a charge on such property in respect of such payments, and requesting tha ernment may be favoured with the opinion of the Honourable the Chief and Judges whether there is any objection to the enactment of some such sions as are proposed in the draft Bill.

2. In reply, I am directed to forward copy of a minute on the draft corded by the Honourable Mr. Justice Jardine, and to say that the Hon the Acting Chief Justice and the Honourable Mr. Justice Fulton concur

Minute by the Honourable Mr. Justice Jardine on the draft Bill, adding sections to the Indian Contract Act, 1872.

I feel that my opinion on a matter which has divided learned Judges in Full Bench is of no special value. But I think the proposed legislation ed on the same principle of equity as section 69 of the Indian Contra and it appears to me to advance the remedy. The four High Courts hav ready dealt with the point, and diverse views having been expressed, it se me desirable that the Legislature should intervene and pronounce.

31st July, 1894. JOHN JARDI

No. 3501 J., dated Calcutta, the 18th August, 1894.

From—H. J. S. COTTON, Esq., C.S.I., Chief Secretary to the Gover Bengal,

To—The Secretary to the Government of India, Home Department.

With reference to your letter No. $\frac{3 \text{ Judl.}}{415}$, dated the 13th April, 1894, annexure, regarding the proposed ment of the Indian Contract Act 1872, I am directed to submit, information of the Government o the accompanying copies of the received from the officers who we sulted by this Government on the and to say that the Lieutenant-G agrees with the opinions therein ex and approves of the enactment such provisions as are contained draft sections 69A to 69C, whi proposed to insert in the Act.

Letter No. 723G., dated the 26th June, 1894, from A. W. Mackie, Esq., District Judge of Rangpur.

No. 315, dated Muzaffarpur, the 17th May, 1894.

From—W. H. PAGE, Esq., District Judge of Tirhut,

To—The Chief Secretary to the Government of Bengal.

I have the honour to acknowledge receipt of your No. 136J.D. of instant, on the subject of the proposed addition of certain sections to the Act (IX of 1872).

2. I have carefully perused the judgments alluded to in the letter Home Secretary to the Government of India, and it is my opinion that the intention of the sections which it is proposed to add be to declare or t the existing law, the enactment of these sections is eminently desirab that principally for the first reason put forward by Mitter, J., in the case (I. L. R., 14, Cal., 809), namely, that in the majority of cases a view of the law would result in injustice; and mere personal decree a defaulting co-sharer, in an estate, which is only saved from sale by a made by another co-sharer would be useless, and that no injustice is l be done to any party by the adoption of the principle laid down in Hossein *versus* Muddunmoonee Shahoon (14, B. L. R., 155).

No. 837, dated Alipore, the 22nd May, 1894.

From—C. A. WILKINS, Esq., District Judge, 24-Parganas,

To—The Chief Secretary to the Government of Bengal.

With reference to Mr. Under-Secretary Levinge's letter No. 132J.D 12th instant, I have the honour to state, for the information of His Ho Lieutenant-Governor, that I see no objection to the enactment of so provisions as are proposed in the draft sections 69A to 69C, which it is p to insert in the Indian Contract Act, 1872.

These sections seem to me to embody the opinion of the majority High Court Judges in India who have dealt with the question of "s charge.

2. There is one analogous case which I think they do not co which I think might well be provided for now. Such a case is now pe my court. It is this—

3. A, a Muhammadan, dies, leaving three sons and three thousand also a debt of Rs. 1,000 due to Z. The sons take their shares, Rs. 1,0 It is at present law that Z may sue any son and take his Rs. 1,00 him only, leaving that son stripped entirely of all that he got from hi It is doubtful whether that son can sue his brothers for contribution.

No. 1323, dated Burdwan, the 30th May, 1894.

From—B. C. SEAL, Esq., District Judge of Burdwan (on leave),

To—The Under-Secretary to the Government of Bengal, Judicial Depa

With reference to your No. 133 J. D. of the 12th instant, desiring pression of opinion on the provisions proposed to be inserted after secti the Indian Contract Act, 1872, I have the honour to state that the provi equitable, and they should be inserted as proposed.

No. 293, dated Calcutta, the 5th June, 1894.

From—T. T. ALLEN, Esq., Superintendent and Remembrancer of Legal

To—The Chief Secretary to the Government of Bengal.

With reference to your No. 130 J. D. of the 12th ultimo, I have th to say that I see no reason to question the advantage of making the p additions after section 69 of the Contract Act.

No. 1131-J., dated Dacca, the 14th June, 1894.

From—H. LUTTMAN-JOHNSON, Esq., Commissioner of the Dacca Divisi

To—The Chief Secretary to the Government of Bengal.

In reply to Under-Secretary Mr. Levinge's confidential letter No. 1 dated 12th May, 1894, asking my opinion in regard to certain addition it is proposed to make to section 69 of the Contract Act, I have the ho say that I agree with the views generally expressed by the Judges wh the various cases referred to in the Government of India's letter No. 3 dated 13th April, 1894, that persons who, by their payments, prese property from alienation, should have a lien on that property, and that common law of India gives them no such lien, it is necessary to give by statute.

2. I am inclined to think that the proposed additions to section 69 be limited to the case of immoveable property.

3. In Eastern Bengal compulsory payments are very frequently m persons interested in landed property to protect it from alienation by the Civil and Revenue Courts, and I think the proposed addition Contract Act are in accordance with what the people of these parts con be justice.

4. I am inclined to think that a lien accruing in the manner descr these additions should be registered. Payments made to protect proper sale for arrears of land revenue might be registered as incumbrances section 41, Act XI, 1859.

acquire a lien on such property in respect of such payments. I may
I do not share the fears of Mr. Justice Wilson as stated at page 832
XIV of the Calcutta Series of the Indian Law Reports. Any mortg
be entitled to make the payment necessary to save the property, and if
to do so, he has only himself to blame.

No. 597, dated Naini Tal, the 21st June, 1894.

From—The Secretary to Government, North-Western Provinces and O
To—The Secretary to the Government of India, Home Department.

With reference to your letter No. $\frac{2 \text{ Judl.}}{416}$, dated 13th April, 1894, wi
was forwarded for an expression of opinion a draft of certain sections pro
be inserted after section 69 of the Indian Contract Act, I am directed t
the opinions of the Hon'ble the Judges of the High Court of Allahabad.

2. The Hon'ble the Chief Justice, in his Minute, dated the 17th M
has gone very fully into the probable effects of the proposed addition to th
law, and has shown that the draft sections as they stand are likely, if
to cause a general insecurity of title, to facilitate the perpetration of f
result in gross injustice in many cases to innocent investors of mone
afford new opportunities for doubtful litigation to an over-litigious peo
Hon'ble Messrs. Justices Tyrrell and Knox are of the same opinion. The
Mr. Justice Blair is also opposed to the draft provisions so far as th
to moveable property; and though he accepts the principle as equitable a
immoveable property, he states his inability to judge of the practicabil
application as it is at present expressed in the draft sections. The Hon
Justice Banerji, while approving of the principle of the proposed legislat
siders that it should be limited to immoveable property, and further tha
such legislation sufficient and effective safeguards should be provided ag
perpetration of fraud and against any interference with the rights of pers
may acquire an interest in immoveable property over which, unknown t
statutory lien may have previously been created This in his opinion w
sitate the establishment of some system of registration of such liens.
ing the proposed legislation mainly as an alleviative of the occasion
quences of the revenue sale laws, he considers that the charge created
proposed law on an estate in land should be strictly limited to the
interest of the defaulter himself in such estate, and that any such charg
not hold good against an auction-purchaser when the estate is sold for a
of land revenue.

3. The Lieutenant-Governor has given the subject careful considera
is constrained to agree with the opinion forcibly set forth in the Minut
learned the Chief Justice that the proposed legislation is likely to incre
and to give rise to doubtful litigation. The chief point with which th
tive Government is concerned is the bearing of the proposed legislatio
revenue sale law of the province, and the degree in which it is likely to
the security which that law at present gives the State for the full reali
the land revenue demand. On this point the Lieutenant-Governor con
imperative that no doubt should be cast on the present statutory pow
State to sell land free of all incumbrances and charges when an arrear of
is due upon it. The learned the Chief Justice shows that as the draft
stand at present they afford opening for argument whether the liens prop
be created would not survive after auction-sale of land for an arrear of
The law should not leave any doubt on this point.

enjoy the repute of being settled law. The latter appears to be the posi
the liens under reference which, as stated in your letter, are ordinarily de
as salvage liens. The decisions cited in paragraphs 2 and 3 of your letter
to support the view taken by the majority of Judges in the two Full
decisions of the Calcutta and Allahabad High Courts that the applicabilit
maritime doctrine of salvage to property in land, or to goods and chatt
now been authoritatively ruled by the highest English Courts for sou
sufficient reasons to have no place in the equity law of England.

5. The fact that the principle has been adopted in a very limited and
tive manner in local Indian enactments concerned with the special sys
land tenure existing in particular provinces is not, in the Lieu
Governor's opinion, a sufficient reason for incorporating it, discarded
apparently is from the settled law of England, in a general and far-reachi
into the Imperial contract law of India. Even if the point at pre
discussion were narrowed to the question whether it would be advisable t
duce into the Land Revenue Act of these provinces a provision somewhat
to those found in the Bengal Sale Act of 1859 or the Madras Revenue
1864, he would hesitate to decide in the affirmative without full enq
to how those provisions had worked in practice, and whether they made m
fraud and chicanery than for the protection of honest persons. An
eventually came to the conclusion that amendment of the local reven
in this point was desirable, and that protection might reasonably be given t
interests than those of a *bonâ fide* mortgagee, he would further have to c
whether the lambardár or other sharer in a pattidari mahal, who paid the
on the separated share of a defaulting pattidar, not in the capacity of a
interested in such share, but in his capacity of a person jointly respons
the land revenue of the entire mahal, should be included or not in such pro
It is not clear at present, and it would probably not be made clear until c
able litigation had taken place, whether the proposed additions to the C
Act, as worded in the draft appended to your letter, would create any
favour of the payer in such circumstances; yet in the particular form i
estates in land exist in this province the case above supposed would
arise.

6. The question therefore of introducing the principle of salvage lien
into the local revenue law of this province would be one of great nic
would require to be most carefully handled. How much more difficult it
to place the principle in a clear and duly limited and properly safeguard
in one of the general Indian codes, or to foresee the effects it may have
expounded by the Courts, the Lieutenant-Governor must leave to the
ment of India to determine. To use the words of Mr. Justice Wilson
Calcutta Full Bench case, he "cannot pretend to foresee what the conse
may be of broadly laying down such a doctrine," but he thinks there are
reasons for not legislating in the manner proposed.

MINUTE.

1. I have carefully read the draft sections 69A, 69B, and 69C, wh
proposed to insert after section 69 of the Indian Contract Act, 1872.

2. It is not necessary for me now to consider whether, having regar
judgments of Bowen, Fry and Cotton, L. L. J., in Falcke *versus* Scotti

title, without facilitating the perpetration of frauds, without resulting in justice in many cases to innocent investors of money, and without afford opportunities for doubtful litigation to an over-litigious people.

3. I propose to confine this Minute to an attempt to show by a few tions that it is necessary to consider very carefully what may be the re bringing upon the Statute Book the proposed sections as they stand. I propose to express any extra-judicial opinion as to the conclusions whic be arrived at by a Court in any of the cases which I shall put by way of tion. I shall with one exception take for the purposes of illustration which Act No. XIX of 1873 and Act No. IV of 1882 or one of those A apply.

Under section 166 of Act No. XIX of 1873 a mahal or a patti in th Western Provinces is liable to be sold by the Collector with the sancti Board of Revenue to satisfy any arrear of land revenue due in respe mahal or patti, and on such sale the purchaser obtains a clear title unaf any then existing mortgage of the mahal or patti or of any share in the patti. It is the whole mahal or the whole patti, and not the share of the in the mahal or patti which may be sold under section 166. That sect fers no power on the Collector to sell separately from the mahal or share in it.

It is clear from a consideration of section 166 of Act No. XIX that such a sale is to be had recourse to only when the Collector and t of Revenue consider that the other processes provided by previous s Chapter V of Act No. XIX of 1873 for obtaining satisfaction of an land revenue will be ineffective.

It is not necessary for present purposes to notice the distinction zamindari, pattidari and imperfect pattidari tenures. Broadly speal mahals to which Chapter V of Act No. XIX of 1873 applies may b according to their tenures into two classes, those of pure zamindari which the respective interests of the shareholders are represented by denominations of the whole and those of bigha-dam tenure, in which the ive interests of the shareholders are represented by the areas of the lan possession of the shareholders respectively, personally or by tenants. case the whole mahal is liable to be sold in satisfaction of any arre revenue due in respect of the mahal, and in each case the shareholders ly and severally liable for the payment of the whole of the land revenue in respect of the mahal.

In mahals of pure zamindari tenure the legal possession of the whole of of the mahal belongs to each one of the shareholders, and in tha such shareholders resemble joint tenants and have a joint interest in every part of the mahal.

In mahals of bigha-dam tenure the shareholders are not in joint p of the mahal, that is, there is no unity of possession in the unit mah shareholders in a mahal of bigha-dam tenure have several possession several title to, their respective shares. They are in fact neither join nor tenants in common. They are several and separate proprietors, the several proprietor of his separated and several share and hold in The fact that in some mahals of bigha-dam tenure there are common la not alter the position. The interest and title of the shareholder in such

the provisions of that section will apply to them. If the provisions o tion will not apply to such statutory charges, it follows that a sale under section 166 of Act No. XIX of 1873 will be subject to any suc charge or charges as may be upon it or any part of it, and in cours it may happen that such charges will equal or exceed in amount the v mahal, and the Government will be left without the remedy by sale of for the recovery of an arrear of land revenue. Section 167 of Act of 1873 seems to be limited in its application as to "incumbrances" brances created by contract between parties.

The charge under section 69A. takes "priority over all charge rights in, such property which would have been defeated if such alie taken effect."

The charge under section 69B. does not apparently take priority charges upon the property, but it may be intended to be a charge taki over all subsequent charges upon the property.

The question as to the priority of the charge under section 69C i ly determined by that section.

6. There is no provision requiri ng these statutory charges to be or indicating that they may be registered, or if they may, the manner and the procedure according to which they may be registered.

When one of these statutory charges has been created and is exis subsequent *bonâ fide* purchaser or mortgagee for value and without not charge hold or take subject to the charge? If such charges are not t tered, how is such a purchaser or mortgagee to have notice of the f charge if he is dealing with an ignorant or a knavish vendor or mortga

Is it proposed to keep up in these Provinces any register in the office or elsewhere which will show in respect of what shares of inte mahal one or more of these statutory charges is subsisting, and is suc to be open to public inspection?

If such statutory charges are to affect a subsequent *bonâ fide* pu mortgagee for value and without notice of the charge, how is it propo tect him from the result of the fraud of his vendor or mortgagor in no ing to him or wilfully concealing from him by a false representation the there is one of those statutory charges upon the property? Such an u charge might make the purchaser's title or the mortgagee's security Must every intending purchaser and every intending mortgagee of a s mahal before paying or advancing his money make enquiry of the Colle District as to whether any payment to which section 69A, 69B, or 69 of any arrear of land revenue due in respect of the mahal has been m twelve years? How could the Collector say that no such payment had be How could a Collector, or how could his subordinates, know in every c money it was with which an arrear of land revenue had been paid? the intending purchaser or intending mortgagee be certain of the titl statutory charges are to affect a *bonâ fide* purchaser or mortgagee for without notice?

If such charges are not to affect a subsequent *bonâ fide* purchase gagee without notice, of what practical use will they be as a security t who obtains the statutory charge?

What is there to prevent A and B in each of the cases put fraudulent and proving by evidence, which the mortgagee is not in a position to that the payments were made under circumstances which created a ch one or other of the proposed sections in favour of B. Respect for the chaser or the money-lender or for the law relating to perjury might n the occurrence of such frauds.

If such charges are to be registered, what is the document intended shall be registered? Is it to be a receipt, setting out the fa given by the Tahsildar or the Collector? If it is, how is the Tahsil Collector to be certain that the statements made to him are true? I kept in mind that the charge under section 69A will take priority ov subsisting mortgages on the property, and that a shareholder may defeat or delay his mortgagee and may attempt to make evidei purpose.

Will not the creation of such statutory charges, whether the registered or not, cause great complications of title in respect of all d of property?

7. How is it to be determined by a Court whether a payme section 69 of the Contract Act, 1872, applies of an arrear of land reven effect of preserving a mahal from alienation by a sale by the Colle a proclamation of an intended sale of the mahal had been issued und 169 of Act No. XIX of 1873 when the payment was made? payment have been made prior to the issue of such a proclamation, I p order to make out a case under section 69A it would be necessary Collector and the Members of the Board of Revenue as witnesses, the to prove that in his opinion a sale was the only effective process at h under Act No. XIX of 1873 for the realisation of the arrear, and the M the Board of Revenue to prove that under the circumstances spoke Collector the Board of Revenue would have sanctioned a sale of the m place.

Until a series of judicial decisions shall have settled such questio confidently be assumed that in the majority of cases in which a payme section 69 of the Indian Contract Act, 1872, applies, of an arrear of lan is made, the person making the payment will assert and try to enforce under section 69A, and a large amount of litigation will be the result.

8. How would section 69A apply in the following case? The shareholders, A, B, C, D and E in a mahal of bigha-dam tenure. of each is under a separate mortgage granted by the owner of the makes default in payment of his quota of the land revenue. B, C, have paid their respective quotas. The Board of Revenue sancti being had of the mahal to satisfy the arrear due. After such san before sale B pays the quota due by A. Does B get a first charg over A's share, but over his own and the respective shares of C, D an does B's charge take priority over the interest of his mortgagee as w the interests of the mortgagees of A, C, D and E respectively, who ha any notice that any arrear was due? It is to be remembered that in which I have put all these interests would have been defeated if the been sold for the arrear of land revenue which B paid. What would i case be the position between B and his mortgagee if B had covenant mortgage that all the land revenue of the mahal should be duly pa

C's charge, and what would be the result and the decree in each of su
Would the man who was first in the legal field get his decree for redem
would all the other suits consequently fail? Could E maintain a sui
C to redeem C's charge so far only as it affected E's interest, and wh
be the decretal amount upon payment of which E would be entitled
his own share in the mahal discharged from C's charge? Would it be
amount of the arrear of land revenue which C had paid, or some and wha
tion of it? In answering that question it has to be borne in mind tha
made no default in payment of his quota of the land revenue. If E, in
free his own share from C's charge, has to pay off the whole charge of
E get the charge which C had? Can D then bring a similar suit again
having got his decree, can D's mortgagee bring a similar suit against
similar and successive suits be brought by the remaining parties interes
the circle of suits has been completed to the great advantage of lega
tioners and the possible ruin of the parties.

If section 85 of Act No. IV of 1882 applied to any one of such s
A, B, C, D, E and their respective mortgagees could be joined in one
as to determine the rights of all parties, what would be the decree and h
priorities of redemption, and—on failure to redeem—of foreclosure, be
for in the decree?

9. I shall now put two questions which relate to the construction ex
of section 69B. A, B and C are shareholders in a mahal of pure zaminda
but are not co-sharers in each other's share. All three are by reason o
146 of Act No. XIX of 1873 jointly and severally liable for the paymen
land revenue of the mahal. Are they "jointly interested" in the propert
the mahal or in any share in the mahal so as to make the payment by one
of the quota of land revenue due by another of them a payment upon
charge under section 69B would arise? What would be the answer if th
of this illustration were one of bigha-dam tenure?

10. What would be the effect of section 69C in the following cas
stranger to the mahal, pays an arrear of land revenue at the request of
faulting shareholder, in order to preserve the mahal from alienation by a
the Collector in respect of the arrear due by B. Would section 69C g
charge on the whole mahal or only on B's share in it?

It must be remembered that the right of sale given by section 166
No. XIX of 1873 is a right to sell the mahal or the patti and not a right
a particular share in the mahal or patti. If section 69C applied to such
it may be that the charge which A would get would be a charge on B
only, for that is the property in which B has an interest, and not the is
of the Government on the whole mahal or patti.

If A gets under section 69C a first charge on B's share only or a fir
on the whole mahal, is it clear that such charge could be enforced? The
ment could have enforced the charge which it had only under the proce
by means of the processes of Chapter V of Act No. XIX of 1873. The
es at the disposal of the Government are epitomised in section 150 of
XIX of 1873. How could A avail himself of the processes or proc
Chapter V of Act No. XIX of 1873? If A could enforce his charge by
cedure and processes of the Civil Courts, the charge would not be the
any of its incidents as the charge which the Government had. Is

Legislature has thought it advisable to protect the public in Englar unregistered charges upon chattels personal that are capable of transf delivery, where the possession of the chattel remains with the pers the charge or making the pledge. I may refer those interested in th subject to the 17 and 18 Vict. C. 36; 29 and 30 Vict. C. 96; 41 an C. 31; and 45 and 46 Vict. C. 43; and to the reported cases decided or other of those statutes. The two earlier statutes have been repeale the two later statutes a bill of sale (whether it be security for money l *must be registered within seven days of its execution,* and an affidavi registered with it, stating the execution and the true date thereof, the and occupation of the grantor, and the residences and occupations of t ing witnesses; *and the bill of sale must be re-registered every five ye* withstanding the wholesome stringency of the Bills of Sale Acts every has practised at the Bar in England must be aware of the daily occu cases in which frauds on creditors, on purchasers, and on mortgage tempted, in too many cases successfully, by fictitious charges on cha sonal, against which the registration of the bill of sale is in many cases tion. The case, which at the commencement of this paragraph I put illustration, is one only of the number which may arise under section endless and ever-varying transactions of commercial and daily life. course and as the law stands in India the carriage and horses on the judgment debt and costs would be released from attachment an sell them with a good title to any one.

If what I have written is not sufficient to suggest some of the da difficulties to be apprehended from the enacting of section 69C as it without any adequate safeguards for the protection of the public being then a cargo of jute, one hundred maunds of wheat, indigo or any artic merce in the godown of the producer or in a merchant's warehouse in be substituted for the carriage and horses of the illustration.

The application of section 69C would not be confined to cases in decree for money had been satisfied, as in the illustration. It may be ap by those who consider the question that section 69C may apply in m cases, as, for example, to a case in which a distress upon the article of for rent has been satisfied by a payment made at the tenant's request b party.

What will be the effect on trade should one or two judicial decisi the public of the bearing of section 69C, and that a charge under that s attach to articles of commerce, the ownership in which articles not un passes by successive sales through different hands in the course of a da

12. As the person who obtains one or other of these statutory not given the right to the possession of the property to which the charg and as the ownership of the property apparently will not pass by virt charge to the person who obtains the charge, it may be presumed that of Act No. IV of 1882 will not apply to such a charge in the case of a immovable property subject to such charge, and that the principle of tion will not apply to such a charge in the case of a transfer of any of property subject to such charge.

13. It is easy to put the questions which I have suggested in th and many more, not affecting Act No. XIX of 1873, which will arise o application of the proposed sections to every-day occurrences. I do

principles of law, or the application of well-known principles of law to trans
to which they have not hitherto been applied, is an experiment hazard
proportion to the variety of the transactions of daily and of commercial
which, wittingly or unintentionally on the part of the Legislature, the
may apply such principles. Such an experiment as that in the present c
that it may not lead to unforeseen and unintended results, requires a pr
and a wider knowledge of such transactions and of the laws prevailing in d
parts of India than I possess.

17th May, 1894. JOHN EDGE.

NOTES AND MINUTES OF THE HONOURABLE JUDGES.

By the HONOURABLE MR. JUSTICE TYRRELL.—I strongly appr
views and opinions expressed in the Minute of the learned Chief Justice
deprecate the proposed alteration in the Indian Contract Act.

21st May, 1894. W. T.

By the HONOURABLE Mr. JUSTICE KNOX.—I have read the Minut
Chief Justice and fully agree with him that the proposed legislation will on
to litigation, and the sections as they stand will involve landholders in trou
therto unknown. In these Provinces I have heard nothing which leads
believe that legislation in this direction is sought for. So far from hel
keep alive the village communities, the changes will, in my opinion, te
disintegrate them. The person who will profit is the money-lender wh
made good his footing, or a co-sharer more powerful than his brethre
present, when such a man pays in a bad year for his brethren in distr

69A, if it pass into law.

21st May, 1894. GEO. EDW. KNOX.

By the HONOURABLE MR. JUSTICE BLAIR.—I am of opinion that no
or lien can be imposed on portable property without seriously hampering th
dom of commercial dealings, and opening the door to numerous frauds.

I think it impossible for me to judge of the practicability of the appl
of the proposed legislation to immovable property, till the *modus opera*
actually before me. The principle, if workable, is of course equitable.

21st May, 1894. H. F. BLAIR.

By the HONOURABLE MR. JUSTICE BANERJI.—Having regard to th
flict of opinion which exists among the Judges of the different High Cou
the subject to which the proposed legislation is directed, and the present un
state of the law in regard to it, it seems to me to be highly desirable tha
unsatisfactory state of things should be remedied by the legislature, a
legislation proposed by the Government should be undertaken.

or at the request of another, advances money in protecting the landed p of another from alienation, where such alienation was threatened or im in consequence of the default of a person other than the person making th ment, should acquire a charge on the property of the defaulter, which h preserved from such alienation. But I think it would be inequitable to charge over the property or interests of a person other than the de and this is apparently what section 69A, as applied to Act No. XIX o would do. In this respect it seems to me that the proposed measure go far. It is also absolutely necessary that any legislation, which may be taken on the subject, should provide sufficient and effective safeguards the perpetration of fraud and an interference with the rights of persons wh innocently dealt with the property of the defaulter. Such safeguards h been provided in the sections under consideration, and I fully concur wi learned Chief Justice in the observations made by him in his able and e tive Minute as to the practical difficulty of working those sections as th stand. These however seem to me to be matters of detail, which sho carefully considered by the legislature.

I am also of opinion that the measure proposed is a much larger or what is necessary or desirable. It is proposed to confer a statutory cha property of every description including movable property. As regards m property, such a charge will, in the majority of cases, defeat the title of who may, after the creation of the charge, deal with such property in goo without notice. Even if it be provided that the charge shall not prevail transferees for value without notice, it will be very difficult, if not impossib persons dealing with movabe property, to protect themselves by making in In my opinion movable property should be totally excluded from the s the proposed legislation.

I am further of opinion that the provisions of section 41 of Act No. 1882 should be expressly declared to be applicable to the proposed st charge, and for the protection of innocent transferees some system for the tration of the charge should be provided.

It also seems to me that much of the objection to the measure m minimized if it be provided that the charge created by the proposed secti not take effect against a purchaser at a sale for an arrear of land reve whom section 167 of Act XIX of 1873 applies. I think I may suggest fo sideration, whether the proper place for these sections, if they are to be part of the statute law, is not the Transfer of Property Act.

With these few observations, while fully approving of the principle proposed legislation, I concur in the remarks contained in the Minute learned Chief Justice.

21st May, 1894. P. C. BANERJI.

By the HONOURABLE MR. JUSTICE BURKITT.—I concur with Mr. Knox's Minute and have nothing to add to it.

21st May, 1894. W. R. B.

Court, Punjab, enclosing notes recorded by the Judges of the Chief the Punjab on the proposed amendment of the Indian Contract Act.

2. Sir Dennis Fitzpatrick desires me to say that the question is for judicial officers than for the Local Government, and, as he has time to go into it, he offers no opinion upon it.

No. 2924-G., dated Lahore, the 25th June, 1894.

From—A. E. MARTINEAU, Esq., C.S., Officiating Registrar, Chief Court

To—The Officiating Junior Secretary to Government, Punjab.

With reference to your endorsement No. 525, dated the 20th A Home—Judicial, forwarding for opinion of the Judges a draft on the amendment of the Indian Contract Act, 1872, I am desired to forward notes recorded by Messrs. Benton, Rivaz, Channing, Stogdon, Chatterjee, Judges.

Memo. with reference to the amendment of the Contract Act, section 6

It is somewhat difficult to understand how the proposed enact work in with the provisions of the Registration and Transfer of Prop Section 1 of the Contract Act and 2 of the Transfer of Property A these Acts generally independent of other legislation. I think that the legislation would greatly increase the difficulties of the investigato especially where joint estates were to be dealt with, and that in man would be impossible with any amount of care to determine the exte charges with which the property might be encumbered. After a tra taken place, negotiated with all possible care, I can foresee an intermin of litigation with a view to discover what charges of the nature propo created have arisen out of the joint or other previous management appears to me, would be an evil of no ordinary dimensions far outw importance any benefit that might be anticipated.

Joint management and joint interests prevail almost universally in try. Legislation with regard to them is difficult, and it should be u with the utmost caution. Wide sweeping measures introducing novel are much to be deprecated. The remedy should be carefully adjusted the evil found to exist. In territories where under-tenures prevail and ers of them are liable to be injuriously affected by sales for the real revenue or other charges which have the effect of wiping out prio encumbrances and tenures, I understand that the evil which is ever result to the innocent has been, to some extent at least, provided for b tion. If the remedy be insufficient, it might be extended with all due meet the particular cases.

In this part of India we have hardly any under-tenures, and sale realization of revenue are almost unknown. Here, as everywhere else, abundance of joint management and co-ownership. Almost every t joint property gives rise to one or more suits arising out of disputed claims to pre-emption. It is exceedingly common for some of the to leave their ancestral lands in the hands of other co-sharers, and not to reclaim their shares for twenty or forty years. These habits give ris are known as abandonment cases, in which the principal issue is wh plaintiff should be presumed to have abandoned his ownership having

against the charges. This is most inequitable. The new proposals appears to me, work most unfairly; they would run counter to the ineradicable habits of the people, and give rise to the bitterest discont

We should only interfere with joint management, it appears to me clearest possible case is established. In any interference with it, hav to the desirableness of promoting good feeling between co-sharers persons jointly interested, we should by all means avoid the possibility charges of a lasting character. The proverb "Short accounts make lon is exactly in point, and the present state of the law leaves very little plained of. If a person interested in the payment of money makes relating to land for another which that other is bound by law to pay, h recourse to his personal remedy and recover from him personally or by land in ordinary circumstances. If the person liable to pay be insolvent, but the case is a rare one, and to me it appears that this rare case is th to be remedied. If anything were done to remedy it on the lines of th of land salvage, the operation of the new law should in my opinion be a very strict law of limitation not extending beyond three years, and should be made for enabling an investigator of title to discover wh charges there were with certainty by the enforcement of their regi otherwise.

I have so far been considering the matter with special reference tural estates, but, without any limitation of the interest which would en son to intervene and create a charge in his favour, it seems impossible to limit to the scope of the amendments, nor to predict what disastrous re be produced by its general application to other property, say for instanc tates or the property of partnerships. The Privy Council case cited an in I. L. R., 11 Bombay, are quite sufficient illustrations of the dangero quences which may result. In the latter case the Court accepted th of salvage lien as applicable to co-owners, but did not apply it to the it, because it was clear that the co-owners had been wrongfully exclud plaintiff from the possession and management of their own property.

My opinion therefore is that any new legislation on the subject haps be dispensed with, and that if there should be any amendment it should not be of a general character, but limited to special case defined, and that moreover its operation should be confined within cert and easily ascertained limits by the rules of limitation and registration to it.

A. H. BEN

30th April, 1894.

I see no objection to the proposal.

Proposed amendment of Contract Act.

The proposed legislation seems to me advisable, if the objects at

the owner of such property, is in actual enjoyment of the rents and pro
ing therefrom, there should be a rebuttable presumption that the payı
made from the rents and profits, and that no charge arose from such pa

F. C. CHANN

1st June, 1894.

Opinion on the proposed amendment of the Indian Contract Act

The proposed sections seem to me to be sound in principle, and I
objection to their insertion in the Contract Act. Sections 69A and
be practically inoperative in the Punjab, as such cases as are contemp
them are of very rare occurrence.

I would enact that the request referred to in section 69C must be
ing, signed by the person having an interest in any property. An oral
is easily alleged, easily supported by false evidence, and with diffic
proved.

A. W. STOGD

22nd June, 1894.

Opinion on the proposed amendment of the Indian Contract Act

In my opinion the proposed legislation is both beneficial and necess
is, I think, unobjectionable in principle, and its practical working is no
to inflict any hardship on owners of property and purchasers in good f
valuable consideration.

As the question of principle has been discussed by eminent autho
refrain from a detailed consideration of its various bearings. The case
the subject has been admirably marshalled in the lucid judgment of Mr
Mitter in the Full Bench case of the Calcutta High Court reported in
14 Calcutta, 809, while its juristic aspects have been ably handled by Mr
Mahmúd in I. L. R., 14 Allahabad, 273. The Bombay and Madras
have given their adhesion to the views of these learned Judges. T
might add the forcible observations of the learned author of the Tagore
on the Law of Mortgage contained in pp. 316—319 of the second e
his work. They all seem to me to show that the doctrine of salvage li
posed to be embodied in the intended legislation, should be considere
own intrinsic merits, and applied in India irrespectively of its accep
rejection by the Courts of Equity in England.

On abstract logical grounds it is difficult to see any serious objecti
more extended adoption of the principle. The right is conceded to mo
who have only a temporary interest in property, when they pay revenue,
expense for its preservation. *A fortiori* it should be allowed to co-
whose connection with the property is of an intimate and permanent
and to holders of under-tenures and lessees whose interests are mixe
those of the owner.

By way of analogy reference may be made to a rule in equity whic

example, the revenue assessed on land is a charge on it and has prece all other charges. If the owner has his revenue paid by another, whe put in a worse position if the creditor's money is clothed with the priorit by law to the revenue demand discharged by it? On the other hand creditor has to fall back on simply the owner's personal liability, he benefit of a security he has helped to save for his debtor who, at the sa profits by having a secured debt converted into an unsecured one. Mor ranks with the owner's ordinary creditors so far as his right to recover h from the property is concerned, though the latter could not have held thi able position had the original liability continued, or the property been discharge it. This cannot be equity, for equity is equality. Where th making the payment is a co-parcener, or one having an interest in the who has no option but to pay for the preservation of his own rights, the becomes a glaring one.

I have taken revenue payments simply as a type of those for which lines should be given, for the same reasons apply with more or less favour of others which save property from alienation, *e.g.*, sales in exec decrees and the like, or discharge its just liabilities.

I am further of opinion there is nothing in the principle of the legislation opposed to the ideas and sentiments of the people of this On the contrary, irrespective of its recognition by our Courts of Ju equitable character has long been generally admitted and acted upon a land-owners. The custom of absenteeism which has prevailed from memorial in this part of India has, as one of its main incidents, the liabil absentee owner to re-imburse the holder of land during his absence for t nue paid and other necessary expenses incurred by the latter. It seems been invariably recognized by the conscience of the people that such are a charge on the land, and that the absentee owner is not entitled t his property without first paying the amount to the holder. In the earli ments claims by absentees were numerous, and were settled either by a ment to the holder or by allowing him to hold the whole or part of the l fixed period in order to recoup himself. Sometimes the holder got a on the land for the sum found due to him In the first regular se agreements are frequently recorded on the part of the holders that the would be allowed to recover their land on payment of losses in payment nue, &c. In the revised settlements there is often an express stipula they might take back their land *without* such payment. The wording kinds of agreement clearly assumes that such expenses are a legitimat on the land, which cannot be reclaimed unless they are either paid or Most frequently the holders were co-sharers in the holding, and in so they were simply proprietors in the village. Land tenure in the Pr mostly co-parcenary, and in such tenures the burden of salvage cha oftenest on co-sharers. This burden is doubtless lessened by the abse revenue sale law like that of the Lower Provinces, but on the other ha the revenue system prevailing here the joint responsibilities are far grea

Coming now to the practical working of the principle, I think all intended to give effect to it should exclude cases in which (1) the wrongfully excluded the person for whom the payment is made from t ment of his interest, as in the case reported in I. L. R., 11 Bombay, p such person, being on the spot, is not allowed reasonable facilities acc the circumstances of the case for paying the demand himself (I. Calcutta, 58).

tortious act. The second exception is equally necessary to prevent a or wealthy co-sharer,. lessee or under-tenant from forestalling the o creating money claims as a pretence for excluding the latter from t ment of his share, and finally for running up a bill for payments an beyond his power to pay. Draft sections 69A and 69B should, I amended to embody Exceptions 1 and 2.

Section 69C is, perhaps, the least necessary of all. When such as is mentioned therein, is made, it will be generally in the power of t to take a registered deed securing the charge, or at all events an agr that effect which can afterwards be specifically enforced. The cases rare indeed where this cannot be done. I should not think there is mu sity for enacting this section.

I do not apprehend there will be any serious increase of difficult investigation of titles, if the proposed law is enacted. I think when known, inquiries will be made at the time of transfer, and the facts will tained without much difficulty. At any rate, in my opinion, the ob not sufficient to outweigh the cogent grounds in favor of the propose tion. If it is deemed a serious difficulty, I make a suggestion in this c which might be taken into consideration. A clause might be introduc ing the holder of such a lien to state the particulars to any intending of the property subject to it within a fixed period if notice is given to providing that he should be debarred from setting it up against such in case he fails to comply. It would be analogous to the provision fo notice on intending pre-emptors in section 16 of the Punjab Laws A 1872. The agency of the Court or of the Post Office might be u service of the notice. Of course, it will be difficult to issue it on credit section 69C, as they would not always be known, but this is perhaps tional argument for its omission.

The proposed sections will not, in my opinion, clash with the prov the Registration Act, as the liens will be conferred by operation of la by agreement of parties.

Lastly, I would suggest it for the consideration of the Legislature it would not be an advantage to the public at large if the entire law r liens is consolidated together, either in a separate chapter of the Indian Act or in a separate Act, instead of being scattered as now in various different enactments.

P. C. CHATTER

13th June, 1894.

No. 4445, dated Nagpur, the 2nd July, 1894.

From—C. E. B. CRITCHLEY, Esq., Assistant Secretary to the Chief Con Central Provinces,

To—The Secretary to the Government of India, Home Department.

I am directed to acknowledge the receipt of your letter No. 3 Jud the 13th April last, inviting attention to the cases of Kinu Ram Da

No. 907-3-D.—21, dated Rangoon, the 30th June, 1894.

From—F. C. GATES, Esq., I.C.S., Secretary to the Chief Commissioner

To—The Secretary to the Government of India, Home Department.

In reply to your letter No. 3-419, dated the 13th April, 18 directed to submit the opinions margi upon the proposed incorporation into British India of provisions for givin charges upon property to persons who ments which have the effect of prese property from alienation. The Chie sioner concurs in the opinions of the Juc missioner, Lower Burma, the Rat Library Association, and the Judge of Sir Alexander Mackenzie considers that tration of liens should be made compul out minimum limit of value, because small in themselves may in the course years amount to an appreciable por value of an estate. It seems also worth deration whether the period of limitation for the enforcement of liens s be shortened.

(1) From C. E. Fox, Esq., Government Advocate, No. 108, dated 3rd May, 1894.
(2) From Rangoon Chamber of Commerce, dated 22nd May, 1894.
(3) From H. Thirkell White, Esq., C.I.E., Officiating Judicial Commissioner, Upper Burma, No. 921-20—9, dated 23rd May, 1894.
(4) From R. S. T. MacEwen, Esq., Officiating Recorder of Rangoon, No. 207-58 dated 31st May, 1894.
(5) From D. G. Macleod, Esq., Judge of Moulmein, No. 183-2, dated 1st June, 1894.
(6) From the Bar Library Association, Rangoon, dated 5th June, 1894.
(7) From H. F. Aston, Esq., Officiating Judicial Commissioner, Lower Burma, No. 951-20, dated 16th June, 1894.

2. The proposed section 69A would perhaps be rendered c contained no reference to the preceding section, but ran somewhat annexed draft ; for, although the Government of India intended, if Commissioner rightly understands the proposals, to give the privile only to persons interested in the payments omitted to be made by the the estate, yet the Judicial Commissioner, Lower Burma, seems to sidered that section 69A applied to mere volunteers also. When t drafted, some illustrations might, in the Chief Commissioner's o introduced with advantage.

No. 108, dated the 3rd May, 1894.

From—C. E. FOX, Esq., Government Advocate,

To—The Secretary to the Chief Commissioner, Burma.

In reply to your letter, Judicial Department No. 818-3D.—21, I honour to say that in my opinion it is most desirable that the Indian expressly provide that persons making payments which have the effect ing property from alienation should acquire a lien or charge on such respect of payments, and the proposed additions to the Contract Act be suitable for the purpose.

Dated the 22nd May, 1894.

From—A. D. WARREN, Esq., Secretary to the Rangoon Chamber of C

To—The Secretary to the Chief Commissioner, Burma.

I am desired by the Committee of the Chamber to acknowledge your letter No. 821-3-D.—21, dated the 28th ultimo, having refer proposed amendment of the law relating to liens.

The subject has been carefully considered by the Chamber, a say that the proposed amendments are fully approved, if provision be prevent the giving of fraudulent preferences to creditors.

2. From the cases cited by the Government of India it appears tha is a conflict of opinion as to the present law on the subject, and tha decisions now stand, the law in Bengal and the North-Western Provinces from that in Madras and perhaps in Bombay. In Bengal and the Nort ern Provinces it has been held that, except as provided by legislative ena a person who is interested in the payment of money which another is b law to pay and who, therefore, pays it and thereby preserves the prope alienation, is not entitled to a charge on the property. This ruling is t Full Bench of each of the High Courts concerned. In the Calcutta c ruling of the Court is that of three Judges against two. In the A case, the ruling is that of four Judges against one. The Bombay case c the Government of India is a comparatively early one; the opinion ex therein is an *obiter dictum*. It is an opinion expressed by two Judges v not the advantage of considering the Calcutta and Allahabad cases unde ence. In the Madras case, which was also heard by two Judges, the case was considered, but not the Allahabad case. So far as the authorit Courts on the point under discussion is concerned, it appears that in the cases in which the existence of the lien as a rule of equity was den matter was fully argued and discussed before a Full Bench, and tha Judges out of ten concurred in the decision. In the cases before the and Madras High Courts the rulings are not Full Bench rulings. In case were both the Full Bench decisions on the subject considered. S weight of authority appears to be against the admission of the principl it is now proposed by legislation to affirm.

3. It is not clear on what grounds the proposed legislation is Apparently it is assumed that the change in the law will introduce a equity which has been adopted by the English and Irish Courts. appears not to be the case. In his judgment in the case of *Kinu Ram Mozaffer Hossain Shaha*, Mr. Justice Wilson, expressing the opinion majority of the Full Bench, said:

"I think it is settled that, according to the rules of equity in force land, no such lien as that contended for exists."

In his judgment in the case of *Seth Chitor Mal* v. *Shib Lal*, t Justice of the Allahabad High Court said:

"The doctrine, which apparently had its origin in the Courts in Irel a charge upon land may arise on the principle of Maritime Civil Salvag think, been satisfactorily exploded as a principle of equity by the decision English Courts in the cases of *Leslie* v. *French* and *Faleke* v. *Scottish Insurance Co.*"

In another passage he said:

"In my opinion, justice, equity and good conscience do not requi India to go so far afield as the Irish Courts in order there to seek for an to import into India novel principles of equity based on unsound anal rejected as unsound by Judges of such authority as Bowen and Fry, and not followed by such an authority as the late Lord Justice Cotton.

This judgment, in which three other Judges concurred, was deliver consideration of all the Indian cases which have been quoted on the sub a judgment by Lord Justice Bowen quoted by Mr. Justice Mahmood in now under discussion the principle of English law is thus stated:

"The general principle is, beyond all question, that work and labour

according to certain priorities, the last man of all who is entitled after ever being in possession, redeems, I may say, the estate by paying the landlor otherwise would have recovered the estate, and taken it from everybody payment is what is called salvage-money.

'That is an established equity and a very proper equity. He that pa salvage has a prior incumbrance to every other charge and interest, becau far as any interest is left to anybody beyond the charge, it is acquired b payment in the shape of redemption-money.'

"But this doctrine of salvage lien, founded on the analogy of maritim is decisively rejected in recent English cases, and Lord St. Leonards' quoted above are explained by reference to the peculiar practice in the Iri of conveyancing."

There may be later cases bearing on the subject. But so far as the cited are to the point, it does not appear that the proposed enactment is f on any rule of equity adopted by the English Courts.

4. But although the proposed legislation may not be in accordanc English rules, it may still be considered expedient on general principles a sound rule of justice and equity. Experience in this province does not much assistance in the formation of opinion on this point. But if the q is to be decided on general principles of equity and expediency, the fo remarks of Mr. Justice Wilson in the judgment already quoted seem to consideration:

"If we were at liberty to treat the matter as if it were *res integra*, I hesitate much before adopting such a rule as that pressed upon us. tangle of interests which an estate in this country presents,—zemindari tenures, and under-tenures without limit, every one of them commonly co-ownership, and every share of every interest perhaps subject to mortga I cannot pretend to foresee what the consequences may be of broadly down such a doctrine as we are asked to do."

The proposal now under discussion is to lay down the rule of whi learned Judge could not foresee the consequences. It is not the adoption suggestion that the Legislature should deal with each class of persons as oc requires, conferring such liens and subject to such restrictions as may be d desirable.

5. Again, in the judgment of Mr. Justice Mitter, in the case above c to which much weight has been given, mention is made of the question w a *bonâ fide* purchaser for value without notice would be affected by the pr lien. This is a question which seems to require careful consideration sections which it is proposed to add to the Contract Act do not seem to de this question. If these sections become law, it would seem desirable to a provision on the subject.

6. On the whole, after considering the matter in the light of the av authorities, I am disposed to think that it would be better not to lay dow broad principles embodied in the proposed new sections, but to deal wi case of various classes of persons likely to be affected in the manner sug by Mr. Justice Wilson.

7. I enclose a copy of a note by the Civil Judge of Mandalay, wh consulted by my predecessor on the subject under reference.

Remarks by E. RICHARDSON, Esq., Civil Judge of Mandalay, on Home Secretary'

The difference of opinion is whether such a right does or does not a principle of general equity, and in order to set the question at rest i posed to have legislative sanction to the lien. The point for opinion is such a lien should or should not be created by legislative enactment.

The consensus of opinion is that if the lien does not exist it ough there are several reasons in favour of such a provision of law as will cr a lien. As Mr. Justice Mitter observes: "The foundation for such an that if it be not acted upon it would result in injustice in many cases *adoption does not operate unjustly in any conceivable case.*" It is portion of the remark that should be the guiding principle as to wheth a certain thing should be enacted, and I have tried to conceive the exi cases in which such a law would operate unjustly. Here in Burma we such complex rights in and tenures of land as are to be found in India Burma has a larger variety of titles to land than Lower Burma, but rights of possession, of tenure, and claims to land are simplicity its there may arise cases in which the creation by enactment of such a l proposed by the draft sections for addition to the Contract Act, where sequent owner of land might be injuriously affected, unless there is i into the draft provisions exempting a *bonâ fide* purchaser for valu notice. But for this there would always be a cloud on the title a necessary depreciation of value. This is a point which Mr. Justice M pressly notices, and which Mr. Justice Norris as expressly passes rou former observes: "I may notice, however, that there is another questi calls for decision in these cases, namely, whether a *bonâ fide* purchaser without notice would be affected by a charge of this kind if it exists." the latter states: "I express no opinion upon the question whether a purchaser for value without notice would be affected by a charge of th (Indian Law Reports, Calcutta, XIV, 824 and 825). The question is, one that becomes more important if legislative sanction is given to the of such a charge.

As between co-owners the right may be well enough, though wh are a number of them difficulties may arise. But where an outsider c purchases over the heads of all the co-owners, it is quite possible that owners either in good faith or collusively may set up such a large clain the property for such liens as to raise the amount to be further paid t of such incumbrances so large as to outweigh the value of the property it not worth purchase or *retaining*. What is there, for instance, to pr late owners, one or both of whom is in an insolvent condition (as is lik the case should the property be brought to sale for arrears of revenue), ing that all the revenue for as many years back as limitation or the e limitation will permit has been paid by one or the other of them and is against the estate. The effect in such a case might even be to cause at the instance of the late defaulter and ruinous loss to the misguided purchaser.

Without some provision for *bonâ fide* purchasers without notice posed enactment would be likely to be productive of harm. How bes vide against this would be best left to the professional drafter.

No. 207-58, dated the 31st May, 1894.

From—R. S. T. MACEWEN, Esq., Officiating Recorder of Rangoon.

No. 183, dated the 1st June, 1894.

From—D. G. MACLEOD, Esq., Judge of Moulmein Town,

To—The Secretary to the Chief Commissioner, Burma.

In reply to your letter No. 819-3D.—21 of the Judicial Department the 28th April, 1894, I have the honour to offer the following opinion proposal to amend the Indian Contract Act by the enactment of certain sions for liens in favour of persons expending money upon the property o for the preservation of such property.

The Judges of the High Courts, who have had the matter under c ation in the cases cited, have been equally divided in their decisions on th of persons to claim such liens, and in view of this conflict of opinion I that it is desirable that such rights should be secured by express s enactment, and that the provisions proposed to be inserted in the Indian C Act are sufficient for the purpose.

It appears to me, however, that it would be well that provision shou be made for the registration of such liens, so that persons intending mortgages on the property thus made chargeable may have means of n incumbrances of this kind.

Dated the 5th June, 1894.

From—B. LENTAIGNE, Esq., Honorary Secretary, Rangoon Bar Library tion,

To—The Secretary to the Chief Commissioner, Burma.

As directed by the members of the Rangoon Bar Library Associa have the honour to inform the Chief Commissioner, in reply to your let 820-3--21, dated the 28th April, 1894, that the members of the Association the amendments and additions to section 69 of the Contract Act, as sugg the letter No. 3-419 (Judl.), from the Secretary to the Government of Ind Chief Commissioner of Burma, are a step in the right direction; but the m of the Association desire to point out that the said amendments are ins in so far as they contain no provision for the registration of the charges created thereunder, and that without such a provision the proposed le would be open to the serious objection that it would create incumbra property without giving subsequent purchasers any means of ascertain existence of such incumbrances.

No. 951-20, dated the 16th June, 1894.

From—H. F. ASTON, Esq., Officiating Judicial Commissioner, Lower Bu

To—The Secretary to the Chief Commissioner, Burma.

In reply to your Judicial Department letter No. 816-3D.—21, da 28th April last, inviting an expression of my opinion on the proposal t the law relating to liens, I have the honour to state as follows.

2. I am of opinion that the proposed additions to section 69 of t tract Act, IX of 1872, as worded in the draft appended to these papers give rise to much undesirable litigation in a country where joint owne so common.

3. I would recommend that purely voluntary payments should be e excluded from the proposed new provisions because such voluntary pa

may know their liabilities without coming into Court, and that some rate s be for the same reason mentioned in draft sections 69B and 69C.

5. The first paragraph of draft section 69A. might be as follows:

"If any such payment as is mentioned in the last preceding section is by a person possessing an interest in any property and is, on account of d made by the person liable, necessary for the purpose of preserving such pr from alienation and has the effect of so preserving it, the person obliged to the payment shall be entitled to a charge upon the property so preserved f imbursement of the sum so paid, with interest at 6 per cent. per annum such rate as the Court may direct."

6. In draft section 69B. I would similarly stipulate default on th of the rest of the persons jointly interested as to making a payment for a joint liability exists, as a condition precedent to the person making such ment becoming entitled to a charge upon the interests of the rest.

Draft Section 69A.

When any person who is bound by law to pay any money in respect property has made default and another person interested in such paymen the money and thereby preserves the property from alienation, the person m the payment shall be entitled to a charge upon the property so preserv reimbursement of the sum so paid, with interest at 6 per cent. per ann at such other rate as the Court may direct.

No. $\frac{69L.L.}{413J.}$, dated Shillong, the 3rd July, 1894 (issued, the 7th July, 1894).

From—P. G. MELITUS, Esq., Offg. Secretary to the Chief Commissioner of

To—The Secretary to the Government of India, Home Department.

I am directed to acknowledge the receipt of Mr. Lyall's letter No. 3 J 420, dated the 13th April, 1894, ask an expression of the Chief Commiss opinion on the proposed amendment Indian Contract Act, 1872, on the li the draft annexed to the letter.

1. No. 501J., dated the 10th May, 1894, from the Deputy Commissioner, Sylhet, and enclosure.
2. No. 765, dated the 12th May, 1894, from the District Judge, Sylhet.
3. No. 1028, dated the 8th June, 1894, from the Judge, Assam Valley Districts, and enclosure.
4. No. 1205, dated the 12th June, 1894, from the Deputy Commissioner, Cachar.

In reply, I am to forward copies letters marginally noted, which have received from the officers consulted, and to say that the Chief Commis sees no objection to the proposed amendments.

No. 501J., dated Sylhet, the 10th May, 1894.

From—P. H. O'BRIEN, Esq., I.C.S., Deputy Commissioner of Sylhet,

To—The Secretary to the Chief Commissioner of Assam.

Your No. 57L.L.—2513-16J., dated the 26th April, 1894, on the sub the amendment of the Indian Contract Act.

I have the honour to forward herewith the opinion of the Government er, and to say that I see no objection to the enactment of some such pro as those contained in the draft.

Amendment of the Indian Contract Act.

The proposed legislation will, I think, remedy a great defect in the

share of the revenue. The other co-sharers pay up the arr save the estate for sale.

II.—Two or more persons jointly interested in a property mortgag third party. The mortgagee brings a suit for foreclosure One of the mortgagors defaults in paying his share of the m money, and the other mortgagors pay up the whole amount, a the property from sale or foreclosure.

III.—A house is owned by two or more persons. It is in a dilapidat dition. One of the co-owners does the necessary repairs, a serves it from destruction.

In each of these cases, the co-sharer, co-owner, or the co-mortgag paid up the money or made the necessary repairs brings a suit for cont against the party in default, and obtains simply a personal decree under t ent law, but before the decree was obtained, he sells his share in the p and turns out an insolvent, and the decree in fact becomes ineffectua decree-holder is thus deprived of the money paid or spent by him for the vation of the property, and the judgment-debtor profits at the expens innocent party.

It is clear, therefore, that the present law in India fails to afford a relief in the matter. It causes hardship to the innocent person, and he wrong doer to take advantage of his own wrong. The proposed ame if adopted, will create a charge on the property in favour of the person the money and protect him against the fraud and machination of the othe It will minimise the chances of fraudulent practices, and produce a effect on the administration of justice in the country. In my opinion th good reasons to adopt the proposed rules of equity in our own jurisprude

It might be said that some of the Judges of the High Court enuncia theory that the rule of equity which the Legislature propose to adopt is rule of equity in force in England. Be it as it may, the question does my opinion, arise in the present case. It is an admitted fact that the tances of the two countries (England and India) are not similar in every Hence difference of circumstances must necessarily give rise to differen of equities in the two countries. It is, I submit, not a sound th legislature that a rule of law peculiarly adapted to the circumstances of th try should not be adopted simply for the reason that a country wh have adopted as the standard of our institutions fails to supply us with a rule.

DULAL CHANDRA DEB,
Government P

The 7th May, 1894.

No. 765, dated Sylhet, the 12th May, 1894.

From—R. H. GREAVES, Esq., I.C.S., District Judge of Sylhet,
To—The Secretary to the Chief Commissioner of Assam.

With reference to your letter No. 59L.L.—2730J., dated the 8th forwarding a copy of your memorandum No. 57L.L.—2513-16J., dated April last, with enclosures, asking for an expression of my opinion on posed addition to the Indian Contract Act, IX of 1872, I have the h

2. I asked the Deputy Commissioners of Kamrup and Sibsagar (districts where there are Government pleaders) for their opinions, but I h had a reply from Sibsagar. I send, in original, the reply received fr Deputy Commissioner, Kamrup. Mr. McCabe, while approving generall proposals, points out some practical difficulties in the way of carrying tho posals out, but the same objections are applicable in the cases in which the different enactments mentioned in the letter from the Secretary to th ernment of India, equitable liens similar to that which it is now prop confer under the Indian Contract Act already exist in favour of persons payments to save property from alienation. The difficulties pointed more technical than real, and the doctrine of *caveat emptor* would apply cases referred to in paragraphs 3 and 5 of the Deputy Commissioner's lett

3. As to the supposed case of several persons interested all being wil pay up to save any property from alienation, it seems to me that all are jointly or severally according to the nature and extent of their interest in t perty to the same equitable rights as if one person had paid. The case is ed by the general legal interpretation that the singular includes the plur word person in the proposed sections 69A. and 69C. would apply to all making the payment. I think, however, that section 69B. might be alte meet the supposed case. After "one" in the second line I would ad more," as there is no reason why the privilege accorded should be confi the case of only one person out of several who are jointly interested in payment; the concluding portion of the section would have to be rewritte

---

No. 932, dated Gauhati, the———May, 1894.

From—R. B. McCABE, Esq., I.C.S., Deputy Commissioner of Kamrup,

To—The Commissioner of the Assam Valley Districts.

In reply to your memorandum No. 809, dated the 2nd instant, forw copy of letter No. 3Judl.—420, dated the 13th April, 1894, from the Secre the Government of India in the Home Department, to the Secretary Chief Commissioner, Assam, regarding certain additions to the Indian C Act, I beg to make the following remarks.

2. From an equitable point of view the propriety of the proposed ad cannot be questioned. As far as sales for arrears of revenue are concerne proposed legislation will facilitate the realisation of arrear demands, as th of the person advancing money to save the property from alienation will be secure, and people will consequently be all the more willing to make advances. With regard to private debts also, it seems to me only fair that a man advances money to save foreclosure on a mortgage, he should hav same priority as the person whose claim was satisfied.

3. I would note that the charge proposed to be given to the party m the payment is *de facto* a mortgage, but his title deed will, in most case merely simple receipt for money paid, so that this receipt would override mally registered document of a subsequent mortgagee.

4. The proposed alterations do not define what procedure is to be ad when there are several persons having an interest in the payment of the deb the saving of the property from alienation. In this case, where all are willi pay, whose offer is to be accepted?

5. As far as I am able to judge, the charge intended to be given "equitable mortgage." No formal deed would be [illegible]

2. In addition to the cases referred to in the letter of the Governme India, the recent ruling of the Privy Council in the case of Dakhina Mohan *versus* Saroda Mohan Roy may be noted (I. L. R., XXI, Cal., 142). Su addition as that proposed would, however, set the question at rest, and a moreover desirable in the interests of justice.

No. $\frac{800}{50-94}$, dated Bangalore, the 10th May, 1894.

From—MAJOR C. W. RAVENSHAW, I.S.C., Secretary to the Chief Commi of Coorg,

To—The Secretary to the Government of India, Home Department.

I am directed to acknowledge the receipt of your letter No. $\frac{3\text{-Judicial}}{432}$ 13th April, 1894, enquiring whether the Chief Commissioner sees any obj to the enactment of some such provisions as are proposed in the draft en therewith.

2. In reply I am to say that in the Chief Commissioner's opinion the sions of the draft proposed to be added to section 69 of the Indian Contrac are unobjectionable.

No. 184, dated Hyderabad Residency, the 25th June, 1894.

From—A. L. P. TUCKER, Esq., Secretary for Berar to the Resident, Hyde

To—The Secretary to the Government of India, Home Department.

I am directed to acknowledge the receipt of your letter, No. $\frac{3\text{-Judicial}}{432}$ 13th April last, requesting opinion on the proposal to provide for liens of p expending money upon the property of others for the preservation o property.

(1) No. 480R., dated 12th June, 1894, from Commissioner, Hyderabad Assigned Districts.
(2) No. 1064, dated 5th June 1894, from Judicial Commissioner to Commissioner, Hyderabad Assigned Districts.
(3) No. 1310, dated 2nd May, 1894, from Deputy Commissioner, Wun, to Commissioner, Hyderabad Assigned Districts.
(4) No. 2185, dated 5th May, 1894, from Deputy Commissioner, Akola, to Commissioner, Hyderabad Assigned Districts.

2. In reply I am to forward cop the letters, noted in the margin, c ing the opinions of the Commission Judicial Commissioner, and the I Commissioners of Wun and Akol to state that the Resident concurs opinion favourable to the proposed a ment expressed by the Judicial Co

sioner.

No. 480R., dated Amraoti, the 12th June, 1894.

From—COLONEL, K. J. L. MACKENZIE. C.I.E., Commissioner, Hyderabad ed Districts,

To—The Secretary for Berar to the Resident, Hyderabad.

*(1) No. 1064, dated 5th June, 1894, from Judicial Commissioner.
(2) No. 1310, dated 2nd May, 1894, from Deputy Commissioner, Wun.
(3) No. 2185, dated 5th May, 1894, from Deputy Commissioner, Akola.

With reference to your No. dated 23rd April last, I forward cop the opinions* of officers consulted.

I agree with the Judicial Comm er that the proposed amendment Indian Contract Act is desirable.

No. 1064, dated Amraoti, the 5th June, 1894.

From—F. S. BULLOCK, Esq., C.S., Judicial Commissioner, Hyderabad As Districts,

whole, I do not think they are such as ought to stand in the way of the proposed.

3. I think Mr. Justice Mitter's arguments in the case of Kinu Ran *vs.* Mozaffer Hossain Shaha, page 809 of Indian Law Reports, Calcutta, V XIV, have much force, and that for want of such a provision of law as is pr much injustice would result.

No. 1310, dated Yeotmahl, the 2nd May, 1894.

From—A. ELLIOTT, Esq, Deputy Commissioner, Wun District,

To—The Commissioner, Hyderabad Assigned Districts, through the Judici missioner, Hyderabad Assigned Districts.

I have the honour to acknowledge receipt of your letter No. 4052, date ultimo, forwarding copy of a letter from the Government of India, Home D ment, No. $\frac{3 \text{ Judicial}}{423}$, dated 13th April, 1894, and its enclosure, regarding a pr to provide for liens of persons expending money upon the property of othe the preservation of such property from alienation.

2. In my opinion the draft clauses 69A. and 69B. are fair and mig passed. I do not consider that 69C. is called for or necessary, and it do seem to me to be a logical addition to the original section 69. The person to be a mere lender of money at the request of the person interested property; he does not pay the money because he has an interest in the pa and his payment will save property in which he is interested.

No. 2185, dated Akola, the 5th May, 1894.

From—R. D. HARE, Esq., Deputy Commissioner, Akola District,

To—The Commissioner, Hyderabad Assigned Districts, through the Judici missioner, Hyderabad Assigned Districts.

With reference to your No. 4053, dated 30th April, 1894, I ha honour to state that no objection occurs to me to the enactment set forth draft therewith forwarded.

No. 1552, dated Calcutta, the 18th July, 1894.

From—T. W. RICHARDSON, Esq., Officiating Registrar of the High Judicature at Fort William in Bengal,

To—The Secretary to the Government of India, Home Department.

I am directed to acknowledge the receipt of your letter No. $\frac{2 \text{ Judicial}}{423}$ the 13th April last, in which the attention of the Chief Justice and Judg invited to the various rulings of the different High Courts in India on the of the nature and extent of certain liens, sometimes described as salvag which have been allowed in favour of persons expending money on the p of others with a view to its preservation, and an opinion was asked for as amendment of the Indian Contract Act IX of 1872 in the manner sugge the draft forwarded therewith.

2. In reply I am to say that it appears to the Judges that the pro contained in the additional section 69B., which it is proposed to insert Contract Act, are too wide and open to serious objection on the groun

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE

Weather Review of India for the Week ending at 8 a.m. o Saturday, April 18th, 1896.

The present week unlike its predecessors has been one of large changes ıll the meteorological elements. Considerable changes in the pressure distr ion have accompanied large alterations in the circulation of the winds, while)bserved temperatures and humidities have been very remarkable. During irst three days of the week a slight barometric depression passed north-eastw rom Sind to the North-Western Himalayas, and the ordinary cyclonic wi vith duststorms on the plains and thunderstorms on the hills, which are cl ıcteristic of these conditions at this season, were experienced. On the 1 ıowever, the area of lowest pressure appeared over Bengal, and this las ıntil the close of the week. At the same time pressure rose briskly to rap)ver North-Western India, so that by Friday, the 17th, there existed a press lifference of 0·35 inch between the Indus Valley and Bihar. With the establ nent of these large pressure differences, strong northerly winds set in :xtended over the whole of North-Western and Central India, while the ıt the same time became intensely dry. Of the many low humidities repo he most remarkable were 1 per cent. at 8 A.M. on the 17th at Bhuj 1 per cent. at Deesa. Thunderstorms gave showers to North-Western India he early part of the week, to Malabar at the close of the week, and to No Eastern India throughout the week. On the 18th for the first time si he 25th of March the mean temperature of India fell below the normal avera

Daily Summary.—*Sunday, April 12th.*—Pressure was increasing slig)ver Burma, Assam, and part of the Peninsula; decreasing elsewhere; ar light depression was shown over the western desert. The winds were cycl)ver North-Western India, westerly down the Gangetic Plain, southerly easterly in Bengal, and southerly over the Bay. The force was fresh to st ıt several stations. The mean temperature was slightly below the nor ıverage in the Assam Valley and South Madras, and above elsewhere, ıbnormal excess being greatest over the western desert. A few scattered sho were reported.

Monday, April 13th.—The pressure changes were generally the same a he 12th. The fall had, however, been brisk to rapid in the Punjab, and the)ression over the western desert had moved northward. The winds w)ractically unaltered, and the force was strong to a gale at several stations.

where the barometric fall had been rapid. Pressure was highest in Tenas lowest in the Dehra Dun, and there existed a pressure difference of nearly between those two localities. The winds were westerly and north-westerl greater part of the country, but were southerly over the Bay and betw and east over Bengal. The mean temperature was excessive, excep north of the Punjab, the extreme south of Madras, and Assam. Th excess was over Rajputana. Showers had been received in North-W North-Eastern India and in Baluchistan.

Wednesday, April 15th.—Pressure had increased briskly to rap a large part of North-Western India and over part of the Central Elsewhere it had decreased, and the lowest pressures were repo Central Bengal. The winds were little changed. The mean te was in defect over the Punjab and Assam, and in excess elsewhere- over Bihar and the east of the North-Western Provinces. Showers over North-Eastern India.

Thursday, April 16th.—The barometer had fallen over part of t and of Rajputana, and had risen in other parts of India. The rise rapid over Bengal, and the depression had largely filled up. Reading over the Northern Punjab and over Bihar, while they remained Tenasserim. Southerly and south-westerly winds prevailed over the and more or less variable winds elsewhere. The mean temperature was Assam, Upper Burma, and the Punjab, and high in all other place showers were reported from a few places in North-Eastern and Souther

Friday, April 17th.—Pressure was falling over North-Eastern India in other places. The increase was very rapid in the west of the Punjal ings were highest over the Indus Valley and lowest in Bihar, and the difference was considerable. Northerly and north-north-westerly w vailed over North-Western and part of Central India, while in other p directions were little changed. The mean temperature was in sligh large defect over the Punjab, Rajputana, and Sind. Elsewhere the heat excessive—most so in Central India. Thundershowers had been rec the south-west of the Peninsula.

Saturday, April 18th.—Pressure had decreased over the Indus V south of the Peninsula, and Lower Burma, and increased elsewhere. remained low over Bengal and high over the Indus Valley, and the difference remained considerable. Easterly and north-easterly winds at some central stations, but in general the winds were not much chang low temperature area had extended and covered the greater part Western and Central India. In other places the heat continued excess

of the Punjab. The chart of the 16th showed a check in the develop this area, but during the 17th and 18th it intensified and extended, a the latter date covered a large part of the country. At Sirsa and Bikan the 18th the abnormal depression of temperature amounted to 15°. Duri same time in Bengal there occurred no diminution of the abnormal he that the temperature contrasts over Northern India were very great. Thus at Sirsa the mean temperature on the 18th was 70·9°, that at Chaibass 99·8°, showing a temperature difference of 29° in place of the ordinary ence of about 5°.

The following table gives the variations of the mean temperature fr normal in the different provinces of India:

Province.	April 1896.						
	12th	13th	14th	15th	16th	17th	18th
	°	°	°	°	°	°	°
Burma	+2·2	+1·8	+ 1·4	+1·4	+1·5	+3·0	+ 3·1
Bengal and Assam . .	+4·4	+3·4	+ 2·9	+2·8	+2·3	+4·0	+ 3·7
North-Western Provinces and Oudh	+5·5	+6·6	+ 9·8	+4·6	+1·0	+3·4	− 4·2
Punjab	+4·7	+5·0	+ 5·0	−3·1	−0·4	−4·9	−10·7
Bombay	+2·7	+2·7	+ 2·1	+2·3	+3·2	+2·4	+ 2·0
Central Provinces and Berar	+3·1	+4·3	+ 5·7	+6·0	+5·3	+6·1	+ 1·1
Central India and Gujarat .	+4·6	+6·8	+ 8·4	+6·5	+5·1	+4·8	− 5·5
Sind and Rajputana . .	+7·7	+8·9	+10·6	+1·5	+1·9	−4·1	−10·7
Madras	+2·9	+2·5	+ 3·0	+4·0	+3·7	+3·7	+ 4·1
Mean for whole of India .	+4·2	+4·7	+5·4	+2·9	+2·6	+2·0	−1·9

The gradual increase of temperature relatively to the mean which progress last week continued until the 14th, when the table shows there abnormal excess for the whole country of 5·4°. After that date, howe heat fell off, and on the 18th there was a general defect of 1·9°. The v for the whole country for the week amounted to + 2·8°. The provinc ations disclose large changes of temperature during the week. Thus, North-Western Provinces there was an excess of 9·8° on the 14th, and a de of 4·2° on the 18th; in the Punjab an excess of 5° on the 14th, and a de of 10·7° on the 18th; in Sind and Rajputana an excess of 10·6° on the 14 a deficiency of 10·7° on the 18th.

The following were the maximum temperatures throughout India repo each day:

April 12th . . . . . 111·4° at Chanda.

Rain.—The rainfall of India has again been generally similar in di to that reported during the past few weeks. The principal rainfall has over North-Eastern India, while light or moderate showers have been re North-Western India and in part of the Peninsula. Rain fell in North India on most days of the week, while in the north-west the fall occurr ly during the first three days, and in the Peninsula during the last two da week. In all parts of the country rain accompanied dust and thunde Except in Assam, North Bengal, and the south-west of the Peninsula fall was very light, the average actual fall not exceeding one quarter of The concluding table gives the rainfall data. The first column shows th the week more or less rain fell in twenty-four of the rainfall divisions as with only eighteen in the previous week. Of these twenty-four divisions received effective rain. These divisions were—Tenasserim, Upper B three Assam divisions, Eastern, Deltaic, and North Bengal, the North Provinces (Hill district), the Punjab Hills, the Northern Punjab, the Malab Coorg, and Mysore. In the remaining ten divisions the amount was ant, *i.e.*, the average actual fall was less than 0·10 inch, while in all divisions there was actually no rain. The heaviest rainfall was as n above over North-Eastern India, the Surma division of Assam reporting age actual fall of 8·13 inches, the Hill division of 5·57 inches, the Bra division of 3·53 inches, and the northern division of Bengal of 1·18 inch region with absolutely no rain included roughly West Bengal, the Gange North-Western India (excluding the north of the Punjab), the whole of th parts of India, and the greater part of the centre of the Peninsu second column of the table gives the normal average fall for each for the week under review, and shews that, except in part of B Assam, of Bengal, and of the south-west of the Peninsula, the a ed rainfall is small. The third column gives the difference betw actual and normal, and shows that, except in Assam, North Be Coorg, even this small anticipated fall has not been equalled. I (Surma), however, there was an excess of 5·62 inches, in Assam (Hills) of 3 80 inches, in Assam (Brahmaputra) an excess of 2·02 inches, i (North) an excess of 0·56 inch, and in Coorg a trifling excess of o The largest deficiency is reported from Tenasserim and Arakan, where in years south-westerly winds give a fair amount of rain. During the week the wind in that quarter has been mainly from north-west, and the has consequently been abnormally dry.

The three concluding columns of the table exhibit the state of the rainfall. Between March 1st and April 18th the total rainfall has bee sive over Assam and Western Rajputana, has been about normal varied by less than 20 per cent. from the average) in Baluchistan, and more or less deficient in all other parts of India. In Burma and Ce

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICUL

Weekly Report on the state of the Season and Pr the Crops.

Madras.—*For week ending 18th April.*—Moderate rain on th and in the Nilgiris; scattered showers in a few other districts. Pr next season are commencing. The standing crops are confined t and are generally fair. The harvest continues with moderate yield scarce, but fodder is generally available, and cattle are in go Prices are practically stationary.

Bombay.—*For week ending 22nd April.*—Slight rain in parts and Dharwar. The standing crops have been damaged by blight parts of Karachi, but are otherwise good. Cotton-picking continu Dharwar, and harvesting of the late crops generally in eight distric tions for next season are progressing in fifteen districts. Fodder is parts of Sind. Agricultural stock are in good condition, except in districts. Prices are normal, except in Ahmednagar and Sholapur.

Bengal.—*For week ending 20th April.*—Rain over Northern parts of Eastern Bengal during the week has done good to the s and has expedited the sowing of early rice and jute. Generally rain wanted, and there is little change in agricultural prospects. The s is now over, and the outturn is estimated at about twelve annas f province. The harvesting of spring rice is progressing in Oriss scarcity of water in places in Burdwan, Midnapore, the 24-Parga Pabna and Dacca. The price of common rice is still steady.

North-Western Provinces and Oudh.—*For week ending* The weather continues seasonable. Rain is much needed in the hil assist the germination of the autumn crop sowings. Threshing a are in progress and approaching completion. Injury to the m reported in three districts. The numbers employed on relief works of gratuitous relief on Saturday, the 18th April, were—Banda 80,83 39,320, Jhansi 20,151, Jalaun 25,592, Allahabad 3,066, Pilibhit 2, 1,710—total 1,73,531; of this number 25,351 dependants were relieved on the works and 4,466 persons received gratuitous relie provisions of the Famine Code. The reduction in the number of re in Jalaun is attributed partly to the opening of village relief works wh the effect of reducing the numbers employed on road work contr Public Works Department. The numbers employed on village relief apparently not been fully reported. Supplies are ample. Fodde

the autumn sowings in Amritsar, Sialkot and Mooltan. Sowings of other crops in Lahore, sugarcane, indigo and cotton in Rohtak, an cotton in Gujranwala, are in progress. The sugarcane fields are be in Gurgaon. The melon and sugarcane crops stand in need of rain The condition of the extra spring crop is good in Dera Ismail Khan dition and prospects of the spring crops are generally reported irrigated and below average in unirrigated tracts. The stock of f said to be insufficient in Ferozepore, Sialkot, Gujranwala and parts The standing crops have suffered from high winds in Dera Ismail Peshawar. Cattle are in poor condition in Hissar, Shahpur, Gurgaon and they are dying of starvation in Hissar. Fodder is s districts, except Jullundur, Ferozepore, Sialkot and Dera Ismail K are normal in Ferozepore, but are high elsewhere.

Central Provinces.—*For week ending 22nd April.*—The da but the nights and mornings are cool. Threshing of the winter cr pleted. Fodder and water are becoming scarce in parts. Prices of and wheat are rising in Damoh, Hoshangabad and Raipur respectivel prices are generally stationary.

Burma.—*For week ending 18th April.*—In Upper Burma cultiv weather paddy is nearly completed, and reaping is progressing in seve Some slight damage has been caused by a hailstorm to dry-weath Minbu, but the standing crops generally are in good condition. paddy has risen considerably in Pegu and Amherst and slightly in and Pakokku, while it has fallen slightly in Rangoon and Myaun where prices are stationary.

Assam.—*For week ending 21st April.*—The weather is w damage has been done to low-land paddy in parts of the Sylhet d early rising of the rivers. Sowing of early rice is progressing. Plu has commenced. The condition of cattle is fair. Fodder and wate cient in places.

Mysore and Coorg.—*For week ending 22nd April.*—MYSO rain in parts. The crops are withering in parts of the Kolar and districts. Prices have slightly risen in Chitaldroog and Shimoga, bu in Kadur.

COORG.—Showers have fallen in the district, and coffee has c blossom in some places. Fodder is scarce. Prices of food-grains a

Berar and Hyderabad.—*For week ending 22nd April.*—I weather is very hot and occasionally cloudy. Breaking up of monsoon sowings is in progress. The fodder and water-supply most parts of the province. Prices are steady.

Agencies and in two districts of Gwalior, but have been completed in Agencies. The probable outturn will be below average in four Agencie many districts in Gwalior owing to want of rain. Pasturage is good and in all parts, except in Gwalior. Prices are above normal in Bundelkhand khand, Malwa, Goona and in five districts of Gwalior, but are normal e The opium crop is fairly good in Gwalior and Malwa. The number o employed during the week on relief works in Gwalior, Bundelkhand a was 2,500, 2,272 and 980 respectively.

Rajputana.—*For week ending 22nd April.*—Agricultural oper generally satisfactory, except in Merwara and Jaisalmere where pros poor. The crops are very poor in Jaisalmere. The unirrigated crops a ing in Ajmere-Merwara, and the crops have been damaged in Dholepore of rain. Agricultural stock are generally in good condition, but are su Ulwar and parts of Jaisalmere for want of fodder. Pasturage and fo scarce in Shahpura, Ajmere-Merwara, Ulwar, Tonk, Jaisalmere and in Meywar. Fodder is failing in Dholepore and Bhurtpore, but is suffici where. Prices are rising in seven States, fluctuating in two and fallin elsewhere prices are steady. In Marwar 4,815 persons are on relief w 203 on gratuitous relief, in Shahpura 400 are on relief works, and 30 o tous relief, in Merwara 2,405 are on relief works, in Bikanir 2,083 relief works, and 256 on gratuitous relief, in Jaisalmere 22 are on relief w 43 on gratuitous relief.

Kashmir.—*For week ending 21st April.*—KASHMIR VALLEY.— fallen during the week. The weather is now fine. Water is ample for i The spring crops are excellent. The autumn crops are being sown. continue normal.

JAMMU PROVINCE.—*For week ending 22nd April.*—No rain. Re the spring crops is in progress. Cattle are in fair condition. Pr stationary.

Nepal.—*For week ending 18th April.*—A good shower of rain ha and Indian-corn and rice are being sown. Some damage has been cause wheat and barley crops by hail.

DENZIL IBBETSON,

Offg. Secretary to the Government of

No. 1797-S. R.

GOVERNMENT OF INDIA.

ORDER—By the Government of India, Finance and Commerce Departm

Read the following:

Order of Her Majesty in Council, dated the 22nd February 1896, exempting from tonnage certain merchant ships of the German Empire.

AT THE COURT AT WINDSOR.

The 22nd day of February 1896.

PRESENT:

The Queen's Most Excellent Majesty in Council.

Whereas by an Order in Council, dated the 23rd day of July 1889, made by exercise of the powers conferred upon Her by the Merchant Shipping Act Amendm Her Majesty was pleased, by and with the advice of Her Privy Council, to direct a

1. As regards Sailing Ships that Merchant Sailing Ships of the Germ

such registers or other national papers in the same manner and to th
and for the same purpose, in, to, and for which the tonnage denoted i
of Registry of British Ships is deemed to be the tonnage of such s
nevertheless, that if the Owner or Master of any such German Stean
deduction for engine room in his Ship to be estimated under the r
room measurement and deduction applicable to British Ships inst
German rule, the engine room shall be measured and the deduction c
ing to the British rules; and that, in the event of any such Steamsh
certificate of tonnage or other national paper issued as aforesaid on
day of June 1888, denoting the net registered tonnage of such Ship u
rules, the Ship shall be deemed to be of the tonnage so denoted there

And whereas by section 84 of the Merchant Shipping Act, 1894, it is enacted
it appears to Her Majesty the Queen in Council that the tonnage regulations of tha
adopted by any foreign country, and are in force there, Her Majesty in Council ma
ships of that country shall, without being remeasured in Her Majesty's dominions, b
of the tonnage denoted in their certificates of registry or other national papers in th
to the same extent, and for the same purposes as the tonnage denoted in the Certifi
of a British Ship is deemed to be the tonnage of that ship:

And whereas it has been made to appear to Her Masjesty in Council that the
tions of the Merchant Shipping Act, 1894, have been adopted by the Government
the German Emperor, and such regulations are now in force in the German Emp
into operation on the 1st day of July 1895:

And whereas there still are or may be ships belonging to the German Emp
herein-before recited Order of the 23rd July 1889 may apply, and it is expedient
the same, but to let the said recited Order remain in force so long as there are an
the same may so apply:

And whereas the provisions of section one of the Rules Publication Act,
complied with:

Now, therefore, Her Majesty (in pursuance and exercise of the powers her
tioned) is hereby pleased, by and with the advice of Her Privy Council, to direct th
Ships of the German Empire the measurement whereof shall, after the 1st day of J
been ascertained and denoted in the registers and other national papers of such
deemed to be of the tonnage denoted in their certificates of registry or other nation
same manner, to the same extent, and for the same purposes as the tonnage denote
cate of Registry of a British Ship is deemed to be the tonnage of that ship.

ORDERED, that the Order in Council be published in the *Gazette of India*.

He will remain at the disposal of the Director General of Railways for on the Bezwada-Madras Railway.

No. 187.—The following Resolution by the Government of India, detailin on which the Government are prepared to consider offers for the constr agency of private companies of branch lines forming feeders either to State by the State or to railways worked by companies, is hereby published for gen tion:

No. 514 R. C., dated Simla, the 17th April 1896.

RESOLUTION—By the Government of India, Public Works Departm

Terms on which the Government of India are prepared to consider off construction by the agency of private companies of branch li feeders either to State lines worked by the State or to railways companies.

Read—

Public Works Department Resolution No. 924 R. C., dated 15th Septemb
Also Public Works Department Resolution dated 29th March 1895.

OBSERVATIONS.—Many of the applications made under the abo tions shew that the terms for the construction of branch or feeder lines have not been fully understood.

The Government of India have accordingly resolved to cancel th Resolutions above quoted upon this subject and to issue a fresh Res bodying a summary of the concessions which (the previous assent of a Company concerned having been first obtained) they are now prepar for the construction of branch or feeder railways; such concessions be confined to lines not exceeding 100 miles in length.

2. It should be clearly understood that these concessions are not to the larger or more important railways or to mountain branches, separate negotiations are in all cases necessary.

RESOLUTION.—Branch lines forming feeders, whether to State l by the State or to railways worked by companies, will ordinarily be m main line administrations, who shall have a prior right to construct th

The Government of India will from time to time publish a lis lines for the construction of which they are prepared to receive tender

They will consider and dispose of any application for the inclu

(iii) The proposed railway shall be subject to the provi
Acts of the Legislature applicable to Indian railways.

(iv) The proposed railway shall be built in accordance with t
moving dimensions for the time being prescribed by t
General in Council, and on plans and estimates tha
approved by that authority. The route of the line,
of stations, and other similar details, shall be subject
by the Government.

(v) The line, while under construction, shall be inspected
often as an inspecting officer appointed for that pur
Government may consider desirable with a view to
construction of the line up to the standard agreed upo

(vi) Inasmuch as these railways are chiefly required for the
of country hitherto deficient in means of commun
the anticipated profits may not therefore at once be f
the Government of India are prepared to give financia
as set forth below. Proposals for financial concess
made in one or other of the following alternative forms

(*a*) It may be stipulated that after the opening of the
traffic the Governmen
antee out of the revenu
fixed yearly minimum
rupees on the actual
charged in the capital a
branch railway compa
in rupees in the company's books in India, with such
surplus net profits as may be agreed upon. The m
dend to be guaranteed in each particular case will
consideration of the circumstances, but for the pres
will be entertained that requires a guarantee exce
cent.; or

Under (*a*) the company will receive an absolute guarantee of interest at a rate not exceeding 3 per cent. and a higher return if the net earnings of the branch are sufficient to pay more than the guaranteed dividend.

(*b*) It may be provided that a payment be made to the
pany by the main line
necessary, together wit
company's share of b
ings [see section (6) o
3] to give the branch
dividend of $3\frac{1}{2}$ per cen
on the actual expendit
in the capital account
railway company as entered in rupees in the comp
in India; provided always that the payment so
branch company shall in no case exceed the net
the main line from traffic interchanged with the b
rebate will be granted from the first earnings of re
branch, such payment being calculated at the clos
payments on account, however, subject to adjus
permissible at the close of the first-half of each ye
earnings of the main line from traffic interchanged wi
are assumed to bear the same proportion to the gr
of the main line from such traffic as the net ear
whole system including the branch bear to the gr

Under (*b*) the company will receive a dividend of $3\frac{1}{2}$ per cent. provided that the amount of the net earnings from local and interchanged traffic be sufficient, and a higher return if the net earnings of the branch from its own traffic be sufficient to pay a higher dividend.

from time to time in England converted into rupees at the ave exchange obtained by the Secretary of State for his remittances dur year preceding that in which the outlay shall have been incurred, and expenditure in rupees on which the interest is from time to time to b for the purposes of the guarantee or rebate, as the case may be, total outlay whether in India or England up to any such time as ther

(vii) The general character of the supervision and control exercised by the Government over the branch railway, the provisions of the Railways Acts and the precedin of this Resolution, shall be as follows:

(*a*) No capital expenditure by the branch railway comp allowed as between the Secretary of State and t unless the prior sanction of the Secretary of State sha obtained. The company shall have no power to incre or stock capital without the sanction of the Secreta or to borrow money except within a fixed limit and conditions.

(*b*) The branch railway company, if required, shall k accounts and statistics in forms approved by the State; and shall render, free of cost, all accounts a required by the Government. The accounts and b subject to audit on behalf of Government.

(viii) Funds for the execution of new works, properly chargeabl found necessary after the branch railway has been op lic traffic shall be provided by the branch railway com works and their cost shall be agreed upon betwee railway company and the main line administration befo put in hand. In the event of any difference of op between the branch railway company and the main istration as to the necessity for and the cost of any ne matter shall be referred to the Director General of arbitrator, and his decision shall be final.

(ix) The rates and arrangements in force on State railways of services rendered to all Departments of the State s

3. The following are the principal additional concessions a branch or feeder railways for the construction of which tenders may

(1) The Secretary of State for India in Council, or the Ge India, respectively, will permit the charge of interes be agreed upon in each case, during construction to account of the railway under the terms of the Ind Act of 1894 (57 and 58 Vict., Chapter 12), or the way Companies Act X of 1895.

(2) The land required for the construction of the branch rai provided free of cost. Such grant shall not include b for quarrying, ballast, brickfields and kindred purposes

(3) Electric telegraphs and telegraphic appliances will be maintained by the Government of India at the usua such works.

(4) The results of existing surveys will be made available fre When desired, fresh surveys will be made by the E Department of the Government of India of any bra

responsibility will be accepted by Government for the ac
any survey, plan, estimate or other information supplied.

(5) The branch railway may be constructed by the main lin
istration, and will be maintained and worked by that admi
during the full currency of the contract to be entere
the purpose, at a fixed ratio of expenses to earnings in e
year. The ratio will, when the branch railway is of
gauge as that of the working railway, usually be that
on the whole system as from time to time existing inclu
branch railway, but will not exceed 50 per cent. of the gr
ings of the branch from all sources, and will be in
charges for the use of the main line rolling-stock.

(6) Such expenses on account of the Board of Direction of th
Line Railway Company as may be incurred with the sa
the Secretary of State may be charged—

(*a*) during construction to the Capital Account of th
Line Company ;

(*b*) after opening, and until the minimum dividend under
2 (vi) (*a*) or (*b*) is received by the Branch Line
as part of the working expenses to be met o
stipulated percentage of the earnings of the bra
by the working railway ;

(*c*) and thereafter out of the general receipts of the Bra
Company.

(7) Railway materials for the branch railway will be carried o
lines at the special rates prescribed for such materials
to State railways.

4. The Government of India reserve the right to purchase all suc
railways at the expiry of 21 years, or at subsequent intervals of 10 y
months' notice, the purchase price being 25 times the yearly average ne
not including rebate payments, of the 3 years preceding the purcha
maximum price of 120 and a minimum of 100 per cent. of cost price o
basis.

5. The Government also reserve—

(i) The right to fix and vary from time to time the classification
and maximum and minimum rates for each class of
well as of passengers ; and

(ii) a general control in respect to the number and timing of tra

6. Applications for concessions to construct branch railways under
of this Resolution should be submitted, in the form prescribed by Memo
hereto attached, to the address of the Secretary to the Government
Public Works Department.

7. Applications for fresh surveys to be carried out on the term
in condition 3 (4) above should be submitted in the manner pre
Memorandum B, hereto attached, to the address of the Secretary to
ernment of India, Public Works Department.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.

ORDER.
that this Res

Enclosure No. I (with Form A and Appendices A, B and C) to G
of India Resolution No. 514 R. C. of 1896.

MEMORANDUM A.

from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "design
meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in ca
eants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of application
cations filed in the Secretary's office, are now on sale to the public at one a
annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th
in regard to the preparation of applications, specifications and drawings.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICUL

Weather Review of India for the Week ending at 8 Saturday, May 2nd, 1896.

On most days of the week under review the changes in pressure considerable, but notwithstanding this the general distribution has undergone much change. The lowest pressures have on most oc situated over the Gangetic Plain and the north of the Central Pro relatively high readings have been reported from Tenasserim, from the west coast of the Peninsula, and from the north of the Pun close of the week the area of lowest pressure was suddenly transf westward and was shown over the Central Punjab. This change in of the low pressure area occasioned a change in the winds over t Plain. These winds had been settling into the normal westerly westerly direction, but on the 2nd this direction was suddenly c become strongly easterly. The weather has been showery over p Eastern India, but has been fine in other parts of the country. temperature has been, for the whole country, excessive on each day and, except in Bengal on the 29th of April and the 1st and 2nd of M

low over the central parts of the country and high in Tenasserim and Assam wind has shifted suddenly to south on the Konkan Coast, and some easter were reported blowing up the Gangetic Plain; with these exceptions the wir tions were fairly normal. The mean temperature had risen generally excessive in all provinces. Showers of rain were reported from a few pl East Bengal and Burma, as well as from Murree, Colombo, and Belgaum.

Monday, April 27th.—Pressure had decreased briskly over North- India and the Gangetic Plain and changed slightly in other places. R were lowest over the region represented by the stations of Cawnpore, M and Delhi and were highest in Tenasserim. Abnormal southerly winds co on the Konkan Coast, and south-easterly winds were reported from Verav Karachi. Elsewhere the directions were about the average, except o Gangetic Plain, where the direction was southerly. The mean temperat again excessive in all provinces. Rain had occurred over North Beng Assam, and a few local showers were reported from other parts of the cou

Tuesday, April 28th.—Pressure had decreased everywhere, and at the r of stations the change had been brisk. Readings were lowest over the G Plain and the north of the Central Provinces and highest in Tenasserim wind directions were fairly normal, except over the Gangetic Plain, where th tion had shifted to north-east. The mean temperature, though remaining g excessive, was in considerable defect in parts of Bengal and of Assam. S had been more general, having occurred over the Kumaun Himalayas, Nor East Bengal, and at some stations in Burma and the Peninsula. In Ne East Bengal the rainfall equalled 1 to 1¾ inch.

Wednesday, April 29th.—The barometer had fallen briskly over th of the Peninsula and over Sind, the Punjab, and the west of the North-W Provinces, but had changed slightly elsewhere. Pressure was lowest ov Gangetic Plain and highest over Tenasserim. Westerly winds were appeari the Gangetic Plain, and the directions generally were fairly normal. T temperature area over North-Western India had extended and intensified, part of East Bengal and of Assam the deficiency exceeded 6°. Thunders had occurred fairly generally over part of Bengal, Assam, Burma, and the west of the Peninsula.

Thursday, April 30th.—Pressure had increased almost everywhe change being brisk to rapid over Northern and Central India. Readings w over the Gangetic Plain, the east of the Central Provinces and the west of and were highest in Tenasserim. The winds were southerly in West Beng easterly in Bihar, but elsewhere the directions were about normal. The me perature was low over Assam, East Bengal, and the Bay, and was excessiv other places—most so in Eastern Rajputana. Showers were again reporte the extreme north-east, but they were less heavy and less general than 29th.

Friday, May 1st.—Pressure had changed only slightly, but on the wh inclination was upward. Readings remained lowest over the Gangetic Pla highest over Tenasserim and the Andaman Sea. The winds were more than usual in Bihar and North Bengal, but were fairly normal in direction ge The mean temperature was below the normal average over Assam and Nor East Bengal, but was still excessive elsewhere. Showers had been r over Upper Burma, Assam, East and North Bengal, and the south-west Peninsula.

Saturday, May 2nd.—The barometer had risen briskly to rapid

Temperature.—The main feature in the temperature conditions ha excessive heat, which has prevailed over nearly the whole Indian region t the whole week. On the 28th a decided fall of temperature took place Bengal and Cachar, and the mean temperature at some stations in th fell to considerably below the normal. This area of depressed te extended and intensified during the 29th, but on the 30th it contracted though, during the 1st and 2nd of May, the abnormal depression of te was considerable to large, the extent of the area remained small. T greatest heat (relatively to the normal) varied its position considerab the week. On the 26th it lay near Lahore, on the 27th over Berar, o over the Central Provinces, on the 29th over the Central Provinces, o over Eastern Rajputana, on May 1st over Sind, and on the 2nd over t Punjab.

The following table gives the variations of the mean temperatur normal in the different provinces of India:

Province.	April 1896.					May 1896.	
	26th	27th	28th	29th	30th	1st	2nd
	°	°	°	°	°	°	°
Burma	+1·0	+0·7	+1·5	+0·3	+0·7	+2·3	+1
Bengal and Assam	+1·0	+2·4	+1·4	−1·5	+0·9	−0·3	−1
North-Western Provinces and Oudh	+3·9	+4·6	+3·4	+1·2	+1·8	+3·4	+3
Punjab	+5·9	+4·6	+1·1	+1·6	+3·5	+5·1	+7
Bombay	+3·8	+4·6	+2·3	+0·4	+1·5	+2·1	+2
Central Provinces and Berar	+4·8	+6·0	+5·7	+4·0	+3·5	+2·2	+1
Central India and Gujarat	+5·2	+6·8	+6·2	+4·3	+2·4	+1·6	+2
Sind and Rajputana	+5·4	+6·9	+4·7	+2·3	+4·3	+3·4	+5
Madras	+2·1	+2·5	+3·2	+2·2	+2·5	+3·7	+3
Mean for whole of India	+3·7	+4·3	+3·3	+1·6	+2·3	+2·6	+2

The mean temperature of the whole of India was excessive on of the week, the greatest abnormal excess being on the 27th. The variations show that the mean temperature was about normal in E excessive in all other provinces. In the Punjab, the Central Provinc India, Gujarat, Sind, and Rajputana the abnormal excess for the week than 4°.

The following were the maximum temperatures throughout India r each day:

April	26th	114·4°	at	Chanda.
„	27th	115·3°	„	Ahmedabad.
„	28th	114·5°	„	Amraoti and Dec
„	29th	113·2°	„	Jhansi and Nagp
„	30th	112·4°	„	Chanda.
May	1st	114·9°	„	„
„	2nd	114·7°	„	Jacobabad.

week. The rainfall over North-Eastern India was associated wi southerly winds at the head of the Bay, the average force of the wi whole week at Saugor Island having been over 25 miles per hour. In cases the fall occurred during more or less severe thunderstorms. The ing table gives the rainfall data. This table shows that rain in less amount fell in twenty-six of the rainfall divisions, as comp only twenty-one divisions in the preceding week. Of these twent sions seven had an average actual fall of less than one-tenth of and hence cannot be said to have received effective rain, while nin an average fall exceeding one-tenth. The divisions which received rainfall were—Tenasserim, Upper Burma, Arakan, all the Assam divis Deltaic, Central, and North Bengal, the hill district of Bengal, Oris Bihar, the North-Western Provinces Hills, Malabar Coast, Coorg, M Bombay Deccan, and the central division of Madras. With the ex these divisions the rainfall was hence practically or actually *nil*. Th average fall reported was 5·16 inches in Assam (Surma), followed by in the Assam Hills, by 3·69 inches in East Bengal, by 3·54 inches (Brahmaputra), by 3·40 inches in Tenasserim, and by 2·07 inches Bengal. In addition the divisions of Deltaic and Central Bengal, t Hills, and Coorg all had an average fall of over 1 inch. In the second the table are shown the averages of the different divisions for the w review, and in the third column the differences between the actual a averages. In the case of Tenasserim, East Bengal, Assam (Surma, Brahmaputra), Central Bengal, North Bengal, and Coorg the norma exceeded by amounts, ranging from 0·14 inch in Central Bengal to 1 in Tenasserim. In all other parts of the country the actual average fa than the normal. The greatest abnormal deficiency was in Low Arakan, and the south-east of the Peninsula, where the rainfall of the between half an inch and three-fourths of an inch less than that usually

The three concluding columns of the table exhibit the state of th rainfall. For the period March 1st to May 2nd the total rainfall excessive only in Rajputana (West) and the hills of Assam. It has be *i.e.*, has varied by less than 20 per cent. from the average, in Tenas Assam (Surma and Brahmaputra) and has been more or less in d other parts of India. In Chota Nagpur, Bihar, the plains of the Nort Provinces, the Konkan, Berar, the centre and east of the Central Gujarat, Kathiawar, Central India, and the central parts of the Penin has been practically no rain throughout the whole season.

The following are the principal totals recorded during the w review :—Moulmein 6·05 inches, Naaf (Akyab) 4·03 inches, Bra (Tippera) 8·01 inches, Cherrapunji (Khasia Hills) 7·83 inches, (Kamrup) 10·20 inches, Krishnagar 3·74 inches, Culna (Burdwan) 3· Jalpaiguri 5·08 inches, Kishangunj (Purnea) 1·14 inches, Hosdroog (M 4·89 inches.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULT

Weekly Report on the state of the Season and Pros the Crops.

Madras.—*For week ending 2nd May.*—Moderate rain on the W and scattered showers in parts of the Circars, Deccan and Centr The April rainfall was considerably deficient in the Nilgiris and Centr where rain is now wanted. Preparations for the next crop are proceed Harvesting operations still continue in some parts with moderate yiel is scarce, but fodder is generally available. The condition of cattle good. Prices are rising slightly, especially in the Circars and Souther

Bombay.—*For week ending 6th May.*—Slight rain fell in parts o Satara, Belgaum and Dharwar. Wheat is blighted in one taluka of K *jowar* (*Sorghum vulgare*) and *mung* (*Phaseolus mungo*) have been d adverse winds in one taluka of Thar and Parkar. The standing crop wise good. Cotton-picking continues in the Karnatak, and harve late crops generally in parts of eight districts. Preparations for nex progressing in eighteen districts. Fodder is insufficient in parts of S cultural stock in good condition, except in parts of three districts. normal, except in Hyderabad and Sholapur.

Bengal.—*For week ending 4th May.*—There was general rain Proper during the week, the falls being heavy in the eastern districts a the northern districts. The rain has improved the agricultural prospec and the cultivation of the rice and jute crops is now going on. More badly wanted in parts of South-West Bengal and in Bihar, Chota N Orissa, which have had practically no rain. Spring rice is being ha it has suffered for want of rain. Prospects of indigo in Midnapore shidabad are said to be poor. In Bihar sugarcane and millets are well. The heavy rain has relieved the scarcity of water to some exte still felt in parts of Midnapore, the 24-Parganas and Khulna. The pr mon rice is generally steady.

North-Western Provinces and Oudh.—*For week ending* The weather is getting hotter. Light showers have fallen in two h but more rain is urgently wanted to assist in the germination of crop sowings. In a few of the Eastern districts fields are being p the autumn crops. The extra crops are flourishing everywhere an irrigated where practicable. Slight injury to tobacco, cane and rice b is reported from Farukhabad, Bareilly and Basti. The numbers en relief works and in receipt of gratuitous relief on Saturday, May 2 Banda 1,02,608, Hamirpur 49,063, Jhansi 20,803, Jalaun 24,164

Lucknow, and in the latter district *jhils* and tanks are drying up, ar to be watered from wells. Prices, although fairly stationary, sho to rise in many districts.

Punjab.—*For week ending 6th May.*—No rain. The canal cr threshed in Hissar. Spring threshing has been completed in Um almost completed in Ferozepore. Spring harvesting is almost Ferozepore and Mooltan and is in progress in Sialkot, Lahore and Dera Ismail Khan. The autumn ploughings in the canal villag and cotton sowings in Shahpur, are progressing. The autumn weed cane and cotton in Sialkot and of sugarcane in Gurgaon has Sowings of millet and the extra spring crops in Lahore, of indigo Rohtak, of *jowar* (*Sorghum vulgare*) and cotton in Gurgaon, an cotton in Gujranwalla, are in progress. The spring crops are being Gurgaon. The condition of the standing extra spring crops is goo and Dera Ismail Khan. The melon and sugarcane crops are sufferi and Rawalpindi. The extra spring crops are being watered from w of rain. The condition and prospects of the spring crops are gene average in irrigated and below average in unirrigated tracts. Catt condition in Hissar, Umballa, Shahpur and Rohtak, and are dying in Hissar. They are suffering from scarcity of fodder and water in of fodder in Rohtak. Fodder is scarce in all districts, except Jullu pore, Sialkot, Mooltan and Dera Ismail Khan. Prices are normal and Amritsar and are falling in Gujranwalla, but are rising in parts and are high elsewhere.

Central Provinces.—*For week ending 6th May.*—The weat very hot and is cloudy in places. Preliminary operations for the au are in full swing in many districts. Prices are stationary, but a normal in Chhattisgarh.

Burma.—*For week ending 2nd May.*—In Upper Burma re weather paddy has been completed in Sagaing and has commen Chindwin, Pakokku and Meiktila and is in progress in several o The prospects of the standing crops continue good, but some dam caused to the Indian-corn crop in the Kyabin township of the M The price of paddy has risen slightly in Thongwa, Pakokku and where prices are stationary.

Assam.—*For week ending 5th May.*—The weather is rainy early rice continues. Prospects are unfavourable in Nowgong owin rain. Planting of sugarcane and plucking of tea are progressing. tion of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 6th May.*—MYSOR

Berar and Hyderabad.—*For week ending 6th May.*—BERAR weather is very warm. Land is being prepared for the next autum Scarcity of fodder and water continues. Prices have risen in Wun, steady elsewhere.

HYDERABAD.—Rainfall slight. The crop on irrigated areas is bei vested, but is drying up in places for want of water. Fodder is getting Prices are normal.

Central India.—*For week ending 6th May.*—No rain fell during th Agricultural operations are in progress in Malwa and have been started in but have been completed in other Agencies. The probable outturn will be average in most Agencies owing to want of rain. Cattle are in fairl condition, except in Bhopal, Bundelkhand and Gwalior. Pasturage is go sufficient all over, except in some districts of Gwalior. Prices of food-gra above normal in Baghelkhand, Malwa and Goona and in a few districts of G but are normal elsewhere. The opium crop is in fairly good condition in G Malwa and Goona. The numbers employed on famine relief works in the and Bundelkhand Agencies were 4,000 and 13,286 respectively.

Rajputana.—*For week ending 6th May.*—Agricultural operatic generally satisfactory, except in Merwara where the harvest is poor. Th are very poor in Jaisalmere. The unirrigated crops have been dama Dholepore for want of rain. Agricultural stock are generally in good co but are suffering in one pargana of Bhurtpore, in Ulwar and in parts of Jai for want of fodder. Pasturage and fodder are scarce in Meywar, Shahpura Jeypore, Ulwar and Jaisalmere. Fodder is becoming scarce in Ajmere-M and is failing in Dholepore and Bhurtpore, but is sufficient elsewhere. Pr rising in nine States, fluctuating in one and falling in another, but are elsewhere. In Marwar 3,789 persons are on relief works, and 307 on gra relief; in Shahpura 400 are on relief works, and 25 on gratuitous relief; in M 1,526 are on relief works; in Bikanir 2,349 are on relief works, and 464 gratuitous relief; in Jaisalmere 310 are on relief works, and 42 on gra relief.

Kashmir.—*For week ending 5th May.*—KASHMIR VALLEY.—The is fine. The autumn sowings are still in progress. Water is ample for irr Prices continue normal.

JAMMU PROVINCE.—*For week ending 6th May.*—No rain. Reapin spring crops continues. The autumn sowings have commenced. Cattl fair condition. Prices are falling.

Nepal.—*For week ending 2nd May.*—Some light showers have fall the weather is cooler. Sowing of early rice and Indian-corn is progressin

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMEN

Adulteration of Indian Opium at the Treaty Ports of Chinkiang and

Simla, the 8th May, 1896.

In the discussion, on March 26th last, on the Financial Sta 1896-97, the Honourable Mr. Playfair made an enquiry about adul opium in China in the following terms :

* * * I would also like to enquire whether the attent Government of India has been directed to the remarks appearing in t of the British Consuls in China upon the increased adulteration by th of Indian opium with Tientsin cake, sesamum seed cake, and other c to the prejudice of the reputation of the Indian drug, before it r consumer, and whether the Government will endeavour to induce the China to protect the Indian trade against this pernicious practice.

To this enquiry, by inadvertence, no reply was given : the follow pondence is therefore published for information in the Supplement to t *of India.*

J. F. FINLAY

Secretary to the Government

To—His Excellency the Viceroy and Governor General of India.

I have the honour to transmit herewith to Your Excellency copy

brought to be packed under the supervision of the Customs after it has be
During the interval a door is opened to abuses: the opium thus seized l
found to be adulterated, and it is difficult for a British merchant to pr
such opium is the same as that which has already paid the legal duties.

By Article 4 of the Additional Article to the Chefoo Convention
opium has to be deposited in bond in warehouses or hulks approved
Customs, and after payment of duty and likin (Taels 30 and Taels
chest) is repacked on the spot, the packages being stamped by the C
Each such package is then entitled to receive a transit certificate f
Customs.

I propose informing Mr. Carles that I do not consider it advisable
port the complaint of the merchants if they take upon themselves to mak
conditions than those laid down in the Additional Article to the Chef
vention, more especially that there appears reason to think that the opi
been adulterated in the godowns.

No. 6, dated 30th November 1892.

From—W. R. Carles, Esq., Her Britannic Majesty's Consul at Chinkiang,
To—Her Britannic Majesty's Minister in China.

I have the honour to report to you that recently complaints have been mad
Consulate of the seizure by the Customs of opium on which likin and duty are a
have been paid.

The manner in which opium is treated at Chinkiang is different, I believe,
all other Treaty Ports except Wuhu, and demands some explanation on my part.

So far as I can learn, when the new Opium Regulations were introduced in
was represented to the Customs here and at Wuhu by the merchants (whether
foreign I am unable to ascertain) that the opium trade would be ruined unless
were afforded to merchants of allowing their customers to test the quality of t
offered to them for sale, previous to its being packed in wrappers sealed by the C

The Customs accordingly consented to allow merchants, on the payment of
Tariff duty at the time of importation, to remove the opium to their own godown
is only after its sale to native merchants that the opium is brought to be packe
the supervision of the Customs in packages for which Transit Pass certificates ar
These certificates differ from the form prescribed in the 4th Additional Article
London on the 18th July 1885, in the addition of a clause, in Chinese only, which
all likin and other stations to allow the opium to pass without hindrance as t
duty and *likin* on it have been paid in full, and which further gives the name of th
merchant who has applied for the certificate.

The practice has, I understand, worked very well until recently, but of late the
has made several seizures of opium, which they are satisfied has been adulterate

The fact that the opium has been for some time in godowns where its adu
may have been effected leads the Customs to presume that the adulteration has tak
subsequent to importation, and the lenient practice of the port makes it practicall
sible for the British merchant to satisfy the Customs that the opium brought to
examination is the same as that on which duty and likin have been paid.

Messrs. Duff and Co., who have complained to me and my predecessor of th
of the Customs, assert that the opium is of foreign origin but of a low quality. E
Shanghai, to whom samples of the opium seized have been submitted, while di
to the exact nature of the opium have, with one exception, agreed that it was adu
while the dealer who took a more favorable view said that it was Malwa opiu
such a low grade that it could not be smoked without an admixture of pure opiu
majority agree that there is a large proportion of sesamum seed in the opium,
Chinese authorities assert that sesamum seed is imported from Hankow for the p
being mixed with foreign opium.

Under the circumstances I have not thought it my duty to protest against t

On the ground there would appear to be objections to any modification here in the provisions of the Additional Articles to the Chefoo Agreement. destruction of the Consular archives prior to 1889, I am unable to ascertain wh far these modifications have been approved by the Legation, and I shall be g your instructions regarding them.

I learn privately from the Commissioner of Customs that the Taotai is revert to the stricter practice laid down in the Additional Articles, if the V ities follow the same course, and my own opinion is that it would be desirab entirely to the rules laid down in those Articles, if any abuse of the present continues to occur.

Dated 2nd August 1894.

From—N. R. O'CONOR, Esq., C.B., C.M G., Her Britannic Majesty's Ministe
To—His Excellency the Viceroy and Governor-General of India.

I have the honour to inclose herewith, for Your Excellency's inf

Mr. Carles's No. 17, dated 18th July 1894.

copy of a despatch from He Consul at Chinkiang respect creasing quantities of adulterated opium sent inland under Customs as foreing opium.

No. 17, dated 18th July 1894.

From—W. R. CARLES, Esq., Her Majesty's Consul at Chinkiang,
To—Her Britannic Majesty's Minister in China.

In my despatches No. 6 of the 30th November 1892 and No. 2 of the 1893, I had the honour to report to you on the local adulteration of Indian was afterwards sent inland for consumption as Indian opium, under transit ce the Customs.

At the same time I referred to the prejudicial effect which this abuse, might have on the market for Indian opium.

During the last twelve months the importation of Indian opium to C increased, and its adulteration has to some extent been checked by the reported had been taken by the Customs.

But large quantities of this adulterated opium are still sent into the i Customs certificates for Indian opium.

The chief market is in the large tract of country known as Hsia Ho, w tween the Grand Canal and the sea in the Northern half of this Province.

In that part of the country I learn from the Taotai that it is likely to d Indian opium entirely.

The Commissioner of Customs has been strenuously endeavouring to stop confiscation of such parcels of adulterated opium as are detected by the Cust This action, however, creates a considerable outcry, as the native merchants the adulteration has occurred previous to importation into Chinkiang.

Without a strict observance of the practice prescribed by the Addition the Chefoo Agreement it is impossible to tell how far their story may be tru the opportunities for adulterating opium which the merchants enjoy through not enforcing the deposit of opium in its own warehouses, and granting trans to opium which has been stored in private godowns, it seems more probable teration takes place here.

I have informed the Commissioner of Customs that I am quite ready to su any way that I can in preventing adulterated opium from being passed off as have spoken to the Taotai of the strong objections which exist to its impropo an official guarantee of genuineness owing to the rule approved by our respec ments not being enforced.

No. 5071 Ex., dated 10th October 1894.

2. It is understood that the opium referred to is Malwa opium, a
to request that the Government of India may be favoured with an expr
opinion by His Excellency the Governor in Council (after communicat
the merchants interested in the opium trade) as to whether the adulte
opium, before it is sent into the interior of China, interferes with the opiu
and whether steps should be taken to stop it.

No. 518, dated 22nd January 1895.

From—The HONOURABLE MR. J. NUGENT, Chief Secretary to the Government of
To—The Secretary to the Government of India, Finance and Commerce Departme

I am directed to acknowledge the receipt of Mr. Baker's letter No. 5071 E
10th October 1894, forwarding copies of the correspondence received from Her
Majesty's Minister in China, on the subject of the adulteration of opium importe
Treaty Port of Chinkiang and sent inland for consumption under Customs certi
Indian opium, and requesting that the Government of India may be favoured
expression of the opinion of this Government (after communication with the
interested in the opium trade) as to whether the adulteration of opium, before
into the interior of China, interferes with the opium trade, and whether steps
taken to stop it.

2. In reply I am directed to forward herewith copy of a memorandum from
missioner of Customs, Salt, Opium and Abkari, No. 165, dated 11th January 189
its accompaniments, which contain the opinion of the various merchants consult
subject, and to state that His Excellency the Governor in Council concurs in
expressed by the Commissioner that the proper course to prevent Indian opium
reputation amongst the consumers in China, is to remove the facilities afforde
adulteration at Chinkiang and Wuhu by the system which now obtains at those
by substituting for that system the practice in force at the other Treaty Ports.

No. 165, dated 11th January 1895.

Memo. by T. D. MACKENZIE, Esq., Commissioner of Customs, Salt, Opium and Abka

In returning the papers received with the above the Commissioner of Custo
Opium and Abkari, has the honour to submit, for the information of Governmen
his memorandum No. 5253, dated 25th October last, to the Collector of Land
Customs and Opium, Bombay, and that officer's reply, No. 401 C., dated 9th i
original, together with the accompaniments thereto. Mr. Mackenzie sees no
alter the view expressed in his memorandum of 25th October to Mr. Campbell.

No. 5253, dated 25th October 1894.

Memo. by T. D. MACKENZIE, Esq., Commissioner of Customs, Salt, Opium and Abkar

Forwarded to the Collector of Land Revenue, Customs and Opium, Bombay,
of report after consulting such merchants as are able to give an opinion on the
raised. It appears to the Commissioner *primâ facie* that the proper course to
Indian opium getting a bad name in China is to urge that the facilities given for it
ation at the Chinese ports named in the correspondence should be withdrawn.

No. 401 C., dated 8th January 1895.

From—J. M. CAMPBELL, Esq., C.I.E., Collector of Land Revenue, Customs a
Bombay,

To—The Commissioner of Customs, Salt, Opium and Abkari, Bombay.

I have the honour to return herewith the papers received under your ende
No. 5253, dated 25th October last, and to enclose the replies of the various mer
Bombay whom I have consulted on the subject under reference.

2. It will be observed that in their replies the merchants do not suggest
adulteration of Indian opium at the ports of Chinkiang and Wuhu has so far cau
appreciable injury to the trade in that commodity. They merely confine themselv
general statement that such adulteration is likely to have an injurious effect on

Dated 27th November 1894.

From—E. J. ABRAHAM, Esq., Bombay,

To—The Collector of Land Revenue, Customs and Opium, Bombay.

In reply to your letter of the 19th instant, I beg to state that in my opinio teration of Indian opium before it is sent to the interior of China interferes wit sumption and trade of opium, because the quantity mixed is of inferior quality value than Indian opium.

I think if steps are taken to stop this practice our trade will be benefited.

Dated 17th December 1894.

From—MESSRS. DAVID SASSOON & Co., Bombay,

To—The Collector of Land Revenue, Customs and Opium, Bombay.

We have the honour of acknowledging receipt of your letter of 7th instant (N of 1894), conveying information of the advantage taken by certain Chinkiang m the privilege accorded to the trade by the Customs authorities at that port to re for testing and sale to adulterate the opium in the interval between such remo return for packing under Customs supervision.

In reply to your enquiry, we are decidedly of opinion that such adulteration opium is injurious to the trade, and we think steps should be taken to stop the

Dated 22nd November 1894.

From—MESSRS. SASSOON J. DAVID & Co., Bombay,

To—The Collector of Land Revenue, Customs and Opium, Bombay.

We have the honour to acknowledge receipt of your No. 13471-C. of 1894, 19th instant, which was addressed to us as J. David & Co., perhaps by an oversig of Sassoon J. David & Co., and in reply to your enquiry whether the adulteratio before it is sent into the interior of China in the manner explained in your lette with the opium trade, and whether steps should be taken to stop it, we beg to e opinion as follows:

There is no doubt that the adulteration complained of is most detrimen interests of exporters of Indian opium like ourselves, and for this reason. T which prevails in Chinkiang and Wuhu of allowing the merchant to remove which has paid duty and likin to his own godown, and of only bringing it to under the supervision of the Customs after it has been sold, offers ample oppor inducement to mix Chinese opium of inferior quality and value with the Indian o Chinese opium by itself, as is well known, is liable to certain duties and imposts the Indian drug is free after once paying the Customs and likin dues. By a Indian with this Chinese opium on which full likin duties have not been paid, s the latter is in fact smuggled, and there is in consequence so much evasion of le

But from the point of view of the exporter of Indian opium, the quality seriously suffers by the facility thus unwittingly offered of making a mixture wh it is passed off as Indian opium, is not really so. The mark of superiority which to this time borne would be seriously damaged by the practice recently expose demand for the real Indian drug would gradually grow less and less on account being thus spoiled.

Now, if strong measures are taken to put a stop to the system in vogue at and Wuhu, the inducement to adulteration would immediately cease. The merc not consider it worth while; in fact he will not have the opportunity to mix t drug which is subject to so many duties and which in consequence would be so m to mix with the Indian drug.

We do not see why Chinkiang and Wuhu should not be placed under the sa

No. 337 E., dated 14th February 1895.

From—W. J. CUNINGHAM, Esq., C.S.I., Secretary to the Government of India,
To—Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiar
of China, Peking.

I am directed to acknowledge, with thanks, the receipt of Your E
letters, dated the 11th December 1892 and 2nd August 1894, regardi
ation of opium imported into the Treaty Port of Chinkiang and sen
consumption under Customs certificates as Indian opium

2. The Governor General in Council apprehends that the continu
tion into the interior of adulterated opium purporting to be Indian i
injure the reputation of the Indian drug among the Chinese consume
have a prejudicial effect on the trade in the future. I am, therefore,
that, if Your Excellency sees no objection, the authorities in Chin
pressed to take steps towards removing the facilities afforded for the a
of the opium at Chinkiang and Wuhu.

Dated 5th April 1895.

From—N. R. O'CONOR, Esq., C.B., C.M.G., Her Britannic Majesty's Minister in C
To—His Excellency the Viceroy and Governor General of India.

I have the honour to acknowledge the receipt of Your Excellency'
No. 337-E, dated the 14th February, respecting the adulteration of In
at Chinkiang, and in reply beg to state that I have instructed Her
Consul at that port to take advantage of any opportunity that may of
ing upon the local authorities the necessity of reverting to a stricter e
of the provisions of the additional Article of the Chefoo Convention w
to the suppression of the existing abuses.

Dated 7th June 1895.

From—Sir N. R. O'CONOR, K.C.B., C.M.G., Her Britannic Majesty's Envoy Extr
Minister Plenipotentiary at the Court of China,
To—His Excellency the Viceroy and Governor General of India.

With reference to Despatch of the 5th of April last, I have the
transmit to Your Excellency her
Mr. Carles's No. 15 of May 22nd, 1895. of a Despatch which I have rec
Her Majesty's Consul at Chinkiang respecting the adulteration of op
port.

No. 15, dated 22nd May 1895.

From—W. R. CARLES, Esq., Her Britannic Majesty's Consul at Chinkiang,
To—Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary at
China.

With reference to your Despatch No. 5 of the 5th ultimo, instructing me
vantage of any opportunity that may present itself for impressing upon the Ta
Customs authorities the stricter enforcement of the provisions of the additi
to the Chefoo Agreement relative to opium, I have the honour to report tha
measures adopted of late by the Customs to guard against the issue to adulte
of certificates as Indian opium have not been without a beneficial effect.

The import last year, 4,179 chests, was 810 chests in excess of that of 1893,
ed that of any year since 1887. The import for the first four months of the c
is little below that of the same period in 1894.

It is, however, impossible to secure that certificates be not granted to
opium, unless the regulations are strictly enforced which provide that the r

The confiscation of some packages of adulterated opium last year has d check the adulteration of opium with sesamum seed. The presence of na more difficult to detect and prove.

So general was the practice of adulteration with sesamum seed that a Ch stated it to be his belief that pure Indian opium would find no market in this ne The increased demand for Indian opium is a proof that he was mistaken as to tion of pure foreign opium.

It is believed that little adulteration now takes place, except that sometin is steeped in sesamum seed oil in order to increase its weight.

Last year, of 4,140½ chests of Malwa imported, 3,520 chests were sent transit pass, and labels were issued by the Customs for a quantity representin to be sold retail in Chinkiang and the neighbourhood. There was thus a bal chests left for consumption in Chinkiang itself, which, though it appears a supply for the needs of this large town, is very much larger than in previous y

I am of opinion that the present practice of the Customs encourages to a the sale of foreign opium, but the effectiveness of the check on adulteration de entirely upon the experience and carefulness of the Customs employé, in ch Opium Department.

No. 1515 E., dated 5th August 1895.

From—W. J. CUNINGHAM, Esq., C.S.I., Secretary to the Government of India, Foreign Department,

To -Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary a Court of China.

I am directed to acknowledge, with thanks, the receipt of Your Despatches, dated the 5th April and 7th June 1895, regarding the of Indian opium at the Treaty Port of Chinkiang.

2. It is stated in Mr. Carles's report* that the effectiveness of maintained on adulteration und ent system at Chinkiang depe entirely upon the experience and care of the Customs Officer in ch Opium Department, and that it is impossible to prevent the grant of covering adulterated opium as long as the regulations of the Additi of the Chefoo Convention are not strictly enforced.

* Enclosure to Despatch dated the 7th June 1895.

3. I am, therefore, directed to enquire whether, in Your Excellen there are any objections to the strict enforcement of the provisions of th Article at Chinkiang as well as at Wuhu where a similar system is sa and to observe that, if there are no such objections, the Governo Council considers that the practice at these two ports should be b conformity with the regulations.

Additional Article to the Agreement between Great Britain and China, sig on the 13th September 1876.

The Governments of Great Britain and of China, considering that the proposed in Clauses 1 and 2 of Section III of the Agreement between Grea China, signed at Chefoo on the 13th September 1876 (hereinafter refer "Chefoo Agreement"), in relation to the area within which *likin* ought not on foreign goods at the open ports, and to the definition of the foreign Se require further consideration; also that the terms of Clause 3 of the same se sufficiently explicit to serve as an efficient regulation for the traffic in opium, ing the desirability of placing restrictions on the consumption of opium, have present Additional Article.

1. As regards the arrangements above referred to and proposed in Clau

3. It is agreed that the aforesaid import and *likin* duties having been paid, the shall be allowed to have the opium repacked in bond under the supervision of the C and put into packages of such assorted sizes as he may select from such sizes have been agreed upon by the Customs authorities and British Consul at the entry.

The Customs shall then, if required, issue gratuitously to the owner a transit cate for each such package, or one for any number of packages, at the optio owner.

Such certificate shall free the opium to which it applies from the imposition further tax or duty whilst in transport in the interior, provided that the package been opened, and that the Customs seals, marks, and numbers on the packages h been effaced or tampered with.

Such certificates shall have validity only in the hands of Chinese subjects, a not entitle foreigners to convey or accompany any opium in which they may be in into the interior.

4. It is agreed that the Regulations under which the said certificates are to be shall be the same for all the ports, and that the form shall be as follows:

"*Opium Transit Certificate.*

"This is to certify that tariff and *likin* duties at the rate of taels per chest of 100 ca been paid on the opium marked and numbered as under; and that, in conformity with the Additio signed at London the of 1885, and appended to the Agreement between Gre and China signed at Chefoo the 13th September 1876, and approved by the Imperial Decree prin back hereof, the production of this certificate will exempt the opium to which it refers, wherever it found, from the imposition of any further tax or duty whatever, provided that the packages are and the Customs seals, marks, and numbers have not been effaced or tampered with.

"Mark.	No.	
X	—	10 packages.

"Port of entry,

"Date "Signature of Commissioner of Customs."

5. The Chinese Government undertakes that when the package shall ha opened at the place of consumption, the opium shall not be subjected to any tax tribution, direct or indirect, other than or in excess of such tax or contribution may hereafter be levied on native opium.

In the event of such tax or contribution being calculated *ad valorem*. the sa value for value, shall be assessed on foreign and native opium, and in ascertaining purpose the value of foreign opium the amount paid on it for *likin* at the port of en be deducted from its market value.

6. It is agreed that the present Additional Article shall be considered as form of the Chefoo Agreement, and that it shall have the same force and validity as if inserted therein word for word.

It shall come into operation six months after its signature, provided the rati have then been exchanged, or if they have not, then on the date at which such e takes place.

7. The arrangement respecting opium contained in the present Additional shall remain binding for four years, after the expiration of which period either Gov may at any time give 12 months' notice of its desire to terminate it, and such notic given it shall terminate accordingly.

It is, however, agreed that the Government of Great Britain shall have the terminate the same at any time, should the transit certificate be found not to confe opium complete exemption from all taxation whatsoever whilst being carried from of entry to the place of consumption in the interior.

In the event of the termination of the present Additional Article the arra with regard to opium now in force under the Regulations attached to the Treaty

In witness whereof the undersigned, duly authorised thereto by their res ernments, have signed the present Additional Article, and have affixed thereto

Done at London in quadruplicate (two in Chinese and two in English), th day of 1885, being the day of the year of the reign of Kwang-Su.

full allowance being made for the Steamer being in advance of her published timing. Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any Steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a Steamer not belonging to one of the regular lines.

N.B.—The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late-fee at 7 P.M. precisely; after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up at 7-30 P.M.

On the day of despatch of the Mail for the Australasian Colonies and the Far East *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8 P.M., and late letters and papers fully prepaid will be received up to 8-30 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 7 P.M., and late letters and papers will be received up to 7-30 P.M. for despatch by any Foreign Mails despatched the same night. The late-fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS.

Presidency Postmaster, Calcutta.

POSTAL NOTICE.

Commencing from Friday, the 22nd May, 1896, and until further notice, the Foreign Mail Steamer will leave Bombay every Friday, the Mails closing in Calcutta every Tuesday. The last Wednesday Mail closes at the General Post Office on the 13th May current. The first Tuesday Mail will close on the 19th May, 1896.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876 :—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . ₹22-8

SANITARY.

No. 129.

The 15th May, 1896.

DRAFT REGULATIONS UNDER THE PILGRIM SHIPS ACT, XIV OF 1895.

The following proposed notifications under section 5, sub-section (*1*), and section 19, sub-section (*1*), and the following draft of certain rules which it is proposed to make under section 58, of the Pilgrim Ships Act (XIV of 1895), is published, as required by the said Act, for the information of all persons likely to be affected thereby, and notice is hereby given that the draft will be taken into consideration by the Governor General in Council on or after the 15th July 1896.

2. Any objection or suggestion which may be received from any person with respect to the draft before the date aforesaid will be considered by the Governor General in Council.

Proposed Notification No. I.

In exercise of the power conferred by section 19, sub-section (*1*), of the Pilgrim Ships Act (XIV of 1895), the Governor General in Council is pleased to order that every pilgrim ship shall contain, in the first or upper between-deck, at least twelve superficial feet and seventy-two cubic feet, and, in the second or lower between-deck, at least sixteen superficial feet and ninety-six cubic feet, of space available for each pilgrim.

Proposed Notification No. II.

In exercise of the power conferred by section 5, sub-section (*1*), of the Pilgrim Ships Act (XIV of 1895), the Governor General in Council is pleased to direct that, in the computation of pilgrims for the purposes of the said Act and the rules thereunder, two persons of the age of one year and upwards and under the age of twelve years shall, unless otherwise expressly provided, count as one pilgrim.

Proposed Notification No. III.

In exercise of the powers conferred by section 58 of the Pilgrim Ships Act (XIV of 1895), the Governor General in Council is pleased to make the following rules:

1. In these rules "the Inspector" means the officer appointed by the Local Government under section 8, or the person authorised by such officer as aforesaid under section 9, of the Pilgrim Ships Act (XIV of 1895), hereinafter referred to as "the Act," and "Section" means a section of the said Act.

2. The Inspector shall, on receiving the notice required by section 8, himself proceed, or give written authority to some competent person on his behalf, to inspect the ship, her provisions, medical stores, equipments, ventilation, fittings, etc., and shall satisfy himself by such inspection that they meet all prescribed requirements.

3. The certificates A and B required under sections 11 and 12 shall be given in Forms Nos. I and II appended to these rules and that required under section 24 in Form III.

4. No certificate under section 12 shall be granted between May 20th and September 20th in any year in respect of a ship of a tonnage of less than 500 registered tons, or which is not capable of steaming at least eight knots an hour in ordinary monsoon weather; nor shall such a certificate be given unless all the arrangements required by these rules have been made to the entire satisfaction of the Inspector.

5. The Inspector shall see that in all cases where the number of pilgrims exceeds 100, the Medical Officer of the ship is present at the official inspection and that such Medical Officer has had an opportunity of satisfying himself as to the completeness of the arrangements made for the accommodation and care of the pilgrims under these rules; and shall require such Medical Officer to furnish a certificate to that effect in Form X and to sign the second of the certificates prescribed by rule 57.

Boats, anchors and cables.

6. (*1*) Every pilgrim ship shall be provided with boats, two of which shall be life-boats, according to the following scale:

Registered tonnage of steam-ship.	Number of boats not less than	Minimum cubic contents of life-boats Feet.	Minimum cubic contents of all the boats of the ship.
Less than 800 tons ...	5	330	1,750
800 tons and less than 1,000 tons.	6	330	2,045
1,000 tons and less than 1,250 tons.	6	900	2,545
1,250 tons and less than 1,500 tons.	6	908	3,000
1,500 tons and upwards ...	7	918	3,600

NOTE.—The cubic contents of the boats in the above table are ascertained by multiplying their outside length, their outside width and their inside depth together, and then the product by 0·6.

(*2*) Every boat shall be supplied with two fresh water breakers, two small tin-lined lockers fitted under the side seats in the stern and each capable of holding about 50 lbs. of biscuit, and a tightly spread canvas cover.

(*3*) Every boat shall be provided, to the satisfaction of the Inspector, with masts, sails, painters, oars, rowlocks or tholes, rudder and tiller, boat hooks, plugs and breakers, all properly secured.

(*4*) A hatchet or tomahawk shall be kept in each end of every life-boat in good order and secured by a lanyard; a life-jacket or belt for each oarsman, and one for the cockswain, shall also be provided: and a life line in loops shall run round the outside of the boat and be securely made fast.

7. Boat drill shall be practised at least once a week.

8. Every pilgrim ship shall be provided with three bower anchors of such weight, and with cables of such length, size and material as are, in the judgment of the Inspector, sufficient.

Instruments for purposes of navigation.

9. Every pilgrim ship shall be provided with—

(*a*) not less than three good ship's compasses and two boat's compasses and with a record of the deviation of her compasses on every point, entered in the log-book;

(*b*) Admiralty or Indian Government charts and sailing directions suitable for the voyage she is about to undertake;

(*c*) Not less than two chronometers and not less than two sextants or quadrants and barometers, one of the latter being a mercurial barometer;

(*d*) A deep sea lead-lined and lead.

Apparatus for extinguishing fires and precautions against fire.

10. (1) Every pilgrim ship shall be provided with—

(*a*) hose capable of being connected with the engines of the ship, and adapted for extinguishing fire in any part thereof; and

(*b*) fire-buckets in the proportion of three for every 100 tons of tonnage up to 600, and two for every 100 tons above 600: Provided that not more than 50 fire-buckets need under any circumstances be carried.

(2) If fire-annihilators or fire-engines are carried, they shall be placed by the Master in charge of one of the principal officers of the ship and the ship's carpenter, who shall be held responsible that they, with the buckets and other fire apparatus, are kept in a state fit for immediate use.*

11. As soon as possible after leaving port, the officers and crew shall be divided into parties and assigned to stations in case of fire; and fire-drill shall be practised at convenient times and at least once a week.

12. Immediately before leaving port, the passengers shall be called on to deliver up whatever lucifer matches, gunpowder or other inflammable articles they may have with them.

13. No naked lights shall on any account be used in the hold or store-rooms or in the between-decks, except under trustworthy superintendence. No person shall be allowed to read in bed with a naked light. Smoking between-decks is strictly prohibited.

14. Cases containing spirits shall never be opened in the hold, but may be hoisted on deck for the purpose.

Appliances for saving life and making signals of distress.

15. Every pilgrim ship shall be provided, to the satisfaction of the Inspector, with a supply of life-buoys, with lines attached, of which not less than six shall be kept readily available on deck, and with inextinguishable lights fitted for attachment to the life-buoys. Every pilgrim ship shall also be supplied with an approved lifebelt or other similar approved article of equal buoyancy suitable for being worn on the person, for each person on board, and such lifebelts or other articles as aforesaid shall be so placed, to the satisfaction of the Inspector, as to be readily accessible.

EXPLANATION.—An "approved lifebelt" means a belt which does not require to be inflated before use, and which is capable of floating in water for 24 hours with at least 15 lbs. of iron suspended from it.†

* Fire-engines should be worked once a week to keep them in proper order.

† Lifebelts should be cut out 2 inches under the armpits, and so fitted as to remain securely in place when put on.

16. Life-buoys shall be secured by toggle and becket or any similar method allowing of ready release, but shall not be lashed or seized to the vessel.

17. Every pilgrim ship shall carry such quantity of rockets and blue lights or other signals as the Inspector may deem adequate.

Fittings and other appliances to be provided in the upper and between-decks.

18. The Inspector shall see that sufficient ventilators are provided for the between-decks to give each pilgrim 10 square inches of ventilation area exclusive of hatches and side scuttles, and so placed as to afford an equable diffusion of air through all parts. The ventilators of the second between-deck must act separately from those of the first between-deck, and, if pilgrims are carried on a second or lower between-deck, such lower between-deck shall be ventilated by artificial ventilation, such as Blackman's ventilator or a thermantidote approved of by the Inspector. The Inspector shall also see (i) that all air-holes affording a means of communication between the hold and the between-decks, are closed so as to shut off, as completely as possible, the escape of foul air from the bilge, or steam from the cargo, into the between-decks; (ii) that the foul air from the hold and the between-decks respectively is carried in separate shafts above the uppermost deck; and (iii) that all ventilating shafts and tubes for the hold are so arranged as to act quite independently of those for the between-decks.

19. In the absence of hollow iron masts or other means of ventilating the hold, there shall be fitted at least four cowl-headed tubes (of a size to be approved by the Inspector) leading from the lower hold to the open air on the upper deck.

20. Every cowl-headed tube shall be provided with a strong plug for use, if necessary, in bad weather.

21. Such provision shall be made for affording light to the between-decks as the circumstances of the case may in the judgment of the Inspector require. The pilgrims shall, moreover, have the free and unimpeded use of the whole of every hatchway situated over the space appropriated to their use, and over each hatchway there shall be erected such a booby-hatch or other substantial covering as shall, in the opinion of such Inspector, afford the greatest amount of light and air and of protection from sun and wet as the case will admit of.

22. The upper deck of every pilgrim ship shall be either of wood, or of iron or steel sheathed with wood and caulked.

23. Each hatchway shall be provided with a large tarpaulin tent which can in bad weather be spread well over it and securely fastened so as to keep out rain and let in fresh air, and in fine weather be rolled up and put out of the way; and shall, except where arrangements exist for lowering the derrick boom in a way which will serve the purpose, also be fitted with a strong iron or wooden A-shaped frame for the support of such tent.

24. Every pilgrim ship shall have poop, quarter deck, waist and forecastle awnings complete and in good order, and six windsails distributed as the Inspector may direct. The

awning and windsails shall be kept up so long as the weather does not render this impossible.

25. Strong ladders 2½ feet wide with hand rails of a convenient height shall be provided for every hatchway used as such and not merely as a ventilator; and, as additional means for women and children to hold on by, knotted hand-ropes shall be fastened conveniently near the ladders.

26. Hooks for hanging the required number of lanterns shall be fixed at convenient distances apart.

27. The space to be occupied by pilgrims must be kept clear from obstruction of any kind whatever, thoroughly clean and dry; and nothing, except lifebelts with the consent of the Inspector given under rule 15, shall be slung up or stowed away between the beams. Every day while the pilgrims are on deck the between-decks shall be carefully cleaned and scrubbed with dry sand mixed with suitable disinfectants.*

28. Bamboos, ropes or strong rails shall be securely fastened fore and aft to the midship stanchions on the between-deck.

29. Only the necessary fittings properly secured and timber, cargo and live-stock for consumption on the voyage shall be allowed on the upper deck, which shall, save as aforesaid, be exclusively reserved for the pilgrims.†

30. A set of water-vessels, such as buckets and tin mugs, required by topasses or others for use in the latrines, shall be exclusively set apart for such purposes; and they shall be marked or painted so as to be clearly distinguishable from those used for cooking or drinking purposes.

Food, fuel and water-supply.

31. Every pilgrim ship shall be supplied in accordance with the following scale with food, fuel and water, of good quality, conveniently stored and in quantity sufficient to supply the pilgrims on board during the intended voyage (including such detention in quarantine as may be probable):

For each pilgrim daily—

Rice	1 lb.	Tamarind	1 oz.
Flour or ships' biscuit	4 oz.	Condiments, chillies, garlic, coriander seed or turmeric	½ ,,
Pulse, dall	4 ,,	Salt	½ ,,
Ghee or oil	1 ,,	Firewood, dry	2 lbs.
Onions	2 ,,	Drinking water from iron tanks	1 gal.
Pumkins, yams, or other vegetables	2 ,,		

Provided that, in the case of drinking water, the allowance hereby prescribed shall be provided for each pilgrim irrespective of his age.

A table of the rations of food and water in Persian, Urdu and Gujarati shall be posted up in a public place on the ship to be approved of by the Inspector.

32. Excepting fuel and water, which shall always be found by the ship, the articles in the above scale need not be provided for those pilgrims who have satisfied the officer appointed in this behalf under section 18 that they have on board sufficient food for their own use.

33. Every pilgrim ship shall, in addition to the requirements of the two last foregoing rules, have on board, either as cargo or stores, food sufficient, in the opinion of the Inspector, to provide for the pilgrims in the event of an accident to the ship's machinery.

34. (*1*) Every pilgrim ship shall be provided with caboose accommodation sufficient to cook for the total number of pilgrims on board, and such accommodation shall in no case consist of less than two cabooses or cooking ranges placed on deck, properly housed and covered, to which the pilgrims shall have free access between the hours of 6 A.M. and to 9 P.M.

(*2*) All cooking ranges shall be made of substantial plate-iron lined inside with bricks and raised at least four inches from the deck, with an outlet or chimney at top for the escape of smoke. Each range shall contain five or six cooking places, and the Master shall see that fires adequate for cooking are kept lighted at them from 6 A.M. to 9 P.M. An additional range shall be provided for every 200 pilgrims carried in excess of 100. Cooking on board in pilgrims' private stoves is prohibited.

(*3*) The Inspector may require the Master to provide such number as such Inspector may think necessary of Muhammadan cooks, not exceeding three per hundred pilgrims (exclusive of pilgrims who have on board their own supplies and desire to cook for themselves).

35. The crew of the ship shall not be allowed to use the cooking ranges or latrines set apart for pilgrims while pilgrims are on board, but shall be provided with a separate cooking range and latrine.

36. Each ship shall be fitted with a condenser or distilling apparatus of sufficient capacity to produce at least one gallon of drinking water a day for every person on board of whatever age, including the crew.

37. No certificate under section 12 shall be granted unless the condenser can not only supply the minimum quantity of water prescribed under rule 36 for each person on board, but also yield every 24 hours 500 gallons of pure cold water fit to drink.

38. The tanks for storing drinking water on board shall not be placed near the latrines. They shall be protected from all filth, and shall be so closed that the distribution of the water can be effected only by means of pumps or from taps with lock and key fitted to the tanks.

39. The water of any tank pronounced bad by the Medical Officer of the ship shall be immediately rejected and pumped out and the tank cleaned out before being refilled.

40. If there is any doubt as to the quality of the drinking water stored, or as to the possibility of its pollution, either at its source or in the course of the voyage, it shall be well boiled; and it shall be thrown into the sea as soon as it is possible to obtain a purer supply. All water taken on board at any port and intended to be issued as drinking water shall invariably be boiled before it is distributed.

* Calvert's powder in the proportion of 10 per cent. should be used.

† Pilgrims should be encouraged to use the upper deck as much as possible.

41. Every condenser or distilling apparatus shall have a separate engine for working the circulating cold-water pump, and under no circumstances shall this engine be used for any other purpose than that of feeding the boiler of the condenser.

42. The arrangements for discharging the circulating water from the condenser shall be such that it can be delivered into buckets or connected with a hose for the purpose of washing decks, or extinguishing fire, as well as discharging over the ship's side. A suitable hose and connection shall also be provided.

43. Either upright or horizontal boilers may be used for condensers. Each boiler shall be furnished with a steam-gauge indexed to double the working pressure, a glass water-gauge and two separate gauge-cocks, one safety valve and two mud-hole doors for the purpose of cleaning.

44. The boilers and all machinery connected with condensers shall be properly covered in, and every wooden bulkhead in the vicinity of the boilers or condensers shall be covered with sheet lead weighing 4½ lbs. per square foot and securely fastened to such bulkhead.

45. All the piping in connection with the condenser, especially the main suction and the condensed water discharge-pipe, shall be laid in position safe from accident or otherwise securely encased.

46. The Inspector shall satisfy himself by actual experiment that the condenser is capable of performing the work required of it.

47. The Chief Engineer or some other competent person, to be approved by the Inspector, shall be appointed to have charge of the distilling apparatus and machinery connected therewith during the voyage.

48. No ship shall put to sea before the decks have been cleared of any loose straw, hay or other inflammable material, and all the cargo has been properly stowed away.

Cargo.

49. No petroleum as defined in the Petroleum Act (XII of 1880), or explosive as described in the Explosives Act (IV of 1884), nor any inflammable oils, spirits, jute or coal (except such coal as is required for the voyage and the return voyage to India), nor any commodity likely, by reason of its quantity, quality or mode of stowage, to be prejudicial to the safety of the pilgrims, shall be taken as cargo or part of the cargo.

Allotment of upper deck space.

50. No cabin shall be provided for any pilgrim on the upper deck unless space remains unallotted on that deck after providing the accommodation required for the permanent and temporary hospitals, latrines, and six superficial feet for every pilgrim carried in the between-decks. Such space as remains unallotted after making provision for these requirements may be reserved for the accommodation of pilgrims in cabins containing not less than 12 superficial and 72 cubic feet of space. No pilgrim shall be furnished with reserved accommodation on the upper deck except in a cabin.

51. The deck space may be distributed between the 1st and 2nd class pilgrims as the Master or owner may desire: provided that each pilgrim of the lowest class has six feet of deck space provided for him.

Amount and distribution of baggage.

52. Pilgrims' heavy baggage shall be registered and numbered under the supervision of the Master the day before the ship sails, and shall be deposited in the hold before the ship leaves her moorings. Pilgrims shall be allowed to keep with them only such articles as are absolutely necessary: Provided that they do not exceed one maund (82 lbs.) in weight for each adult pilgrim or, in the case of those who, in accordance with the provisions of section 18, are allowed to provide their own food for the entire voyage, one maund and-a-half.

Hospital accommodation, medical stores, and arrangements for maintaining health, cleanliness and decency.

53. *(1)* The hospital accommodation required under section 21 shall be provided on the upper deck either in the poop or in a deck-house. A permanent hospital shall be provided containing not less than six bunks, and having a deck area of at least 144 superficial feet and dimensions of not less than 864 cubic feet. On every pilgrim ship on which there are 50 or more female pilgrims, there shall be a separate permanent hospital, containing not less than two bunks with a deck area of at least 72 superficial feet and dimensions of not less than 288 cubic feet, which shall be reserved for the use of women and children under 12 years of age. The hospitals shall be lighted and ventilated to the satisfaction of the Inspector and shall be provided with permanent raised floors or platforms at least four inches off the deck. They shall be made as secure as any other deck-house, and the roof shall be well caulked and covered with painted canvas.* No case of small-pox, cholera, yellow fever or plague shall on any account be treated in a permanent hospital.

(2) Materials shall be carried for the construction on the upper deck of a separate temporary hospital for the treatment of such cases of sickness as it may be considered desirable specially to segregate (such as small-pox, cholera, yellow fever or plague) and for any general outbreak of sickness in the event of the permanent hospital accommodation becoming insufficient. The part of the upper deck upon which such hospital shall, if required, be erected, shall be pointed out and measured off by the Inspector. The frame-work of the hospital shall be either of iron (in pieces that can be easily fitted together) or of wooden spars or bamboos. The roof shall be tented, and both that and the side walls shall be made of stout canvas and be perfectly water-tight, due provision being at the same time made for ventilation. The superficial area

* The fittings used in constructing permanent hospitals should be of iron in preference to wood.

of the floor* shall be not less than 144 square feet, and the floor shall be raised at least 4 inches from the deck. In cases of sickness of the kind referred to in this rule, only the Medical Officer and the person or persons charged with the duty of looking after the patients shall have access to them, and, except the Medical Officer and medical attendants referred to in rule 69, none of those who have had access to such patients shall be permitted to come into contact with the other persons on board.

54. A suitable dispensary to be approved by the Inspector shall be provided on the upper deck.

Medical stores, etc.

55. The following articles shall be provided according to the following scale and supplied gratuitously to the pilgrims on board at the discretion and by the direction of the Medical Officer, namely:

For any number of pilgrims not exceeding 100 (proportionate quantities to be provided for pilgrims in excess of that number)—

Sago	5 lbs.
Arrowroot in tin case	10 ,,
Preserved milk† (1 lb. tins)	1 dozen.
Liebig's extract of meat in 2 oz. tins or jars	1 lb.
Sugar	5 lbs.
Rum	1 quart bottle.

56. The following medicines and medical appliances shall be provided on the scale indicated below in the case of each at the discretion and by the direction of the Medical Officer:

(Weights and measures of the British Pharmacopœia.)

Names of medicines, etc.	Scale for 100 passengers.	Notes.
		Miscellaneous articles for one hundred pilgrims.
Acidum, boricum	2 oz.	
,, carbolicum (cryst.)	1 ,,	
,, nitro-hydrochloricum dilutum	1 ,,	Fresh carbine lymph, 6 tubes.
,, sulphuricum dilutum	1 ,,	Adhesive plaster (in tin case), one yard.
,, tartaricum	2 ,,	Calm 6, two yards.
Æther sulphuricus	½ ,,	Funnel, delta.
Alumen (in powder)	2 ,,	Lint, four ounces.
Ammonii carbonas	2 ,,	Bandages (roller), half a dozen.
Argenti nitras	½ ,,	Paper for powders, etc., one quire.
Borax	½ ,,	Corks for bottles, 1 dozen.
Calomel	½ ,,	Cotton-wool (country), 1 lb.
Chlorodyne	2 ,,	Hæmostatic (metal), one.
Chloroformum	1 ,,	Note.—The preparations of ammonia, ether, chloroform, iodine, and all acids should be in well-stoppered bottles.
Cocaine solution, 10 per cent.	½ ,,	Chloroform should be in blue glass or covered from light by dark paper.
Copaiba	1 ,,	
Creasotum	½ ,,	
Glycerinum	1 ,,	All the drugs, etc., must be properly labelled with the quantities marked on each label.
Hydrargyrum cum creta	½ ,,	"Poisons" should be specially distinguished by labels with the word "Poison" on them.
Iodoformum	1 oz.	
Ipecacuanha valsid, fluid extract	½ ,,	
Linimentum camphoræ compositum	2 ,,	*Disinfectants.*
Lini farina	2 lbs. in tin case.	Sulphur, 50 lbs.
Liquor ammoniæ	1 oz.	Corrosive sublimate, 5 ,,
Liquor ammonii acetatis	6 ,,	Pure Phenic acid, 20 gallons.
Liquor epispasticus fortior	½ ,,	Fresh slaked lime, 20 lbs.
Liquor morphinæ hydrochloratis	½ ,,	Sulphuric acid, 15 ,,
Chrysarobinum	½ ,,	Calvert's Carbolic acid powder, 15 ,,
Magnesii carbonas	½ ,,	Methylated alcohol, 25 gallons.
Magnesii sulphas in tins	5 lbs.	Hydrochloric acid, 1 gallon.
Oleum Caryophilli	½ oz.	
,, menthæ piperitæ	½ ,,	
,, ricini	2 pints.	Impermeable bags of india-rubber or tarred canvas, six for each ship.
Phenacetin	½ oz.	

Corrosive sublimate, 5 lbs. Pure Phenic acid, 20 gallons. Fresh slaked lime, 20 lbs. Sulphuric acid, 15 ,, Calvert's Carbolic acid powder, 15 ,, Methylated alcohol, 25 gallons. Hydrochloric acid, 1 gallon.

* For flooring sheet iron is the best material.

† The contents of a pound tin of preserved milk mixed with half a gallon of water make good milk.

(Weights and measures of the British Pharmacopœia.)

Names of medicines, etc.	Scale for 100 passengers.	Notes.
Pilula aloes et ferri	2 doz.	*Instruments for each ship.*
,, aloes et assafœtidæ compositæ	2 ,,	
,, colocynthidis et hyoscyami	2 ,,	Boxes chip for ointments (1 oz. each) 12
,, plumbi cum opio B. P.	4 ,,	Dispensing bottles (1 oz. each) 12
,, scillæ compositæ	4 ,,	Glass measures, 2 oz. 2
Potassii bromidum	1 oz.	,, ,, 2 drachms 2
,, chloras	1 ,,	Pestle and mortar (brass) 1
,, nitras	2 ,,	,, ,, ,, wedgwood 1
,, permanganas	2 ,,	Scales and weights (grains) 1
Pulvis ipecacuanhæ, 5 gr. powders	2 doz.	Spare weights for ,, 1 set.
,, ipecacuanhæ compositus 10 5 gr. powders	4 ,,	Splints (common) 2 pr.
Pulvis jalapæ compositus	1 oz.	Silver catheters (No. 8 size) 1
Quininæ sulphas in 2 gr. pills	4 doz.	India-rubber catheters, Nos. 2, 4, 6 and 10. 4
Quininæ sulphas in bulk	2 oz.	Spatula 1
Salol	½ ,,	Scissors (shop) 1
Sanapis (in powder)	4 ,,	Penknife 1
Sodii bicarbonas	1 ,,	Syringe, ear, pewter 1
Spiritus ætheris nitrosi	2 ,,	,, Pneuma patent 1
,, rectificatus	8 ,,	,, Urethral (male) 1
Tinctura aconiti	½ ,,	,, female 1
,, capsici	½ ,,	Infusion pot 1
,, digitalis	½ ,,	Pocket dressing case (to contain 1 probe, 1 director, 1 female catheter, 1 clinical thermometer (in case), 1 pair of scissors, 1 dressing forceps plated, 6 suture-needles, 1 artery forceps, 1 Symes' abscess knife, 1 straight and 1 curved bistoury in 1 handle, 1 lancet (bleeding), silk thread for sutures (20 grams).
,, ferri perchloridi	1 ,,	
,, iodi	½ ,,	
,, nucis vomicæ	1 ,,	
,, opii	1 ,,	
,, scillæ	1 ,,	
,, zingiberis	1 ,,	
Tragacanthæ powder	1 ,,	
Unguentum hydrargyri	½ ,,	
,, simplex	2 ,,	
,, sulphuris	2 ,,	
,, zinci	1 ,,	
Vaselinæ	2 ,,	
Vinegar	1 pint.	
Vinum antimoniale	½ oz.	
,, ipecacuanhæ	1 ,,	

Table showing the quantities of medicines, etc., to be supplied according to the above scale for more than 100 pilgrims.

Number of pilgrims.	Quantity.	
Above 100 to 250	½ more than	the quantity prescribed according to scale per 100 pilgrims, and so on.
,, 250 to 350	Twice	
,, 350 to 450	Thrice	
,, 450 to 550	Four times	
,, 550 to 650	Five times	

57. The following certificates showing that medicines, etc., have been duly supplied and received according to the above scale shall be produced before the Inspector at the time of his inspection:

(1) Certified that we have supplied medicines, etc., for —— pilgrims proceeding to —— in the S. S —— according to the above scale, [or we have supplied medicines, etc., in making up deficiencies in existing stock up to the above scale.]

Dated *Chemists.*

(2) Certified that I have carefully compared the above list with the medicines, etc., examined by me on board the pilgrim ship ——, and am satisfied that they are all correct.

Medical Officer.

Dated *Ship* *Health Officer.*

58. (1) Every pilgrim ship shall carry a disinfecting stove approved by the Health Officer of the Port in British India at which the voyage is to commence.

(2) Articles of bedding, carpets and clothes used by patients who have been affected with cholera, as well as by persons who have had access to such patients, shall be immediately disinfected. Such of these articles as have little or no value shall be thrown into the sea, or, if the ship is in a port or canal, be destroyed by fire. All such articles as are not destroyed shall be carried to the disinfecting stove in impermeable bags sprinkled with a solution of corrosive sublimate.

(3) The excreta of the sick shall be collected in vessels containing a disinfecting solution and the latrines in which these vessels are emptied shall be thoroughly disinfected after each operation.

(4) Articles which have come into contact with persons suffering from cholera, shall be thoroughly disinfected in the following manner:

(a) Articles so contaminated or suspected of being so contaminated shall, unless they are liable to be destroyed by exposure to heat, be disinfected in the disinfecting stove under pressure, the stove being maintained at a temperature (to be tested during each operation) of 220° Fahr. and the articles exposed to this temperature for 15 minutes.

(b) Articles liable to be destroyed by exposure to the heat of a disinfecting stove, such as metals, leather, tables, lockers, etc., shall be disinfected by being washed with a disinfecting solution.*

(5) Ships on which cases of cholera have occurred shall be disinfected in the following manner:

(a) The cabins† and all parts of the ship occupied by cholera patients or those suspected to be suffering from cholera shall be emptied, and all articles removed disinfected as above.

(b) The interior sides, bulkheads, floors and decks of the ship shall be washed with the corrosive sublimate solution with the addition of 10 per cent. of alcohol (*i.e.*, one gallon of methylated alcohol to every 10 gallons of the corrosive sublimate solution mentioned above),‡ and, two hours after washing, scrubbed, and then thoroughly washed down with plenty of water.

(c) The hold of the ship shall be strewn from time to time with a sufficient quantity of iron sulphate to neutralize the sulphuretted hydrogen, and the water in the hold shall then, unless the ship is in dock, be pumped out, and the hold washed with sea-water and sprinkled with the corrosive sublimate solution.

59. Pilgrims shall air their clothing, blankets, etc., as often as required to do so by the Medical Officer.

60. The following articles and appliances shall be supplied on the scale shown below:

Iron boilers with covers—	
For rice (large) . .	According to the number of pilgrims to be fed by the ship.
„ dall or curry (small) .	
Iron ladles—	
For rice (large) . .	According to the number of pilgrims to be fed by the ship.
„ dall, etc. (small)	
Iron spoons, tinned	4 — To each pilgrim ship.
Curry-stones, with mullers	4
Sieves for cleaning rice, etc.	6
Gallon measure	1
Half-gallon measure	1
Quarter-gallon measure	1
Scales and weights or A spring balance	1
Block-tin saucepans, for hospital use exclusively, from 1 pint to 1 gallon	3
Hatchets for cutting wood	2
Knives	2
Safety lanterns with lock and key to each .	Besides 3 for hatchways, 2 „ latrines, 1 „ hospital, and 1 „ Surgeon, which are to burn all night, there shall be one additional lantern for every 100 pilgrims on board, and each such lantern shall burn for three hours every night.
Oil with wicks, or candles to fit lantern.	Sufficient for seven lanterns to burn at least ten hours, and for the rest to burn at least three hours of every night of the voyage.
Soap	1 lb. per pilgrim.
Buckets (galvanised iron) .	2 for every 100 pilgrims.

* One of the following disinfecting solutions should be used:

(a) Corrosive sublimate in the following proportion:—

Corrosive sublimate, ½ oz.

Hydrochloric acid, 1 oz.

Water, 3 gallons.

Fuchsin or eosin, 5 grains.

(b) Pure phenic acid five parts in 100 parts of water.

(c) Fresh slaked lime.

The different disinfecting solutions are useful for the following purposes:

(a) Linen, clothes and articles soiled by the evacuations of cholera patients should be put into the corrosive sublimate solution.

(b) Persons in attendance on the sick should use the corrosive sublimate solution, when washing themselves, in the proportion of one part of the solution to 2,000 parts of water.

(c) Phenic acid should be used to disinfect articles which cannot be exposed to a temperature of 220° Fahr. or to contact with sublimate solutions, such as metals, instruments, etc.

(d) Slaked lime is specially useful to disinfect the evacuations of cholera patients; in the absence of slaked lime phenic acid will answer the same purpose. When slaked lime is used for disinfecting liquids, it should be used in the proportion of three lbs. of lime to ten gallons of the liquid to be disinfected.

† For the purpose of fumigating cabins and confined spaces one ounce of sulphur should be burnt for every 30 cubic feet of the space to be fumigated, the cabin or other space being completely closed during the operation and kept so for twelve hours.

‡ The washing should commence from the top, horizontally and downwards, so that the whole surface becomes covered with a coating of the solution in fine drops.

Tubs (large) for bathing or washing	4	To each pilgrim ship.
* Tubs (smaller) for latrine use	4	
* Tin pots for latrine	12	
Tin pots for pilgrims suffering from sea-sickness	12	
Canvas bathing screens for the use of women	2	
A dirt-shoot, moveable	1	
Deck-scrapers	12	
Sand	1 ton.	
Holystones or hand bricks	50	
Swabs or squeezers	18	
Brooms (country)	50	

* All these should be specially marked for privy use.

61. (*1*) Every pilgrim ship shall be fitted with not less than two latrines, apart from those for the use of the crew, sufficiently screened from public view and readily accessible. If there be any females among the pilgrims, one latrine shall be screened off and set apart for the exclusive use of females. There shall be an additional latrine for every 100 pilgrims, or fraction of that number in excess of 100, and if there be more than 100 female pilgrims on board, the number of latrines reserved for their use shall be increased in the proportion they bear to the total number of pilgrims. The latrines shall be provided with seats at the rate of not less than three for the first 100 pilgrims and three for every additional 100 pilgrims. No latrine shall be allowed either between-decks or in the hold.

(*2*) Every latrine shall be firmly secured in a convenient and accessible place on the upper deck and close to the bulwarks. It shall not project over the side of the ship, but shall be so placed that the soil-shoot of the latrine floor may lead directly out of a port or other opening, and well clear of the ship's side. Every latrine shall be divided into separate and private compartments. Each compartment shall be not less than three feet by two in size and shall have a separate entrance with door and be fitted with a seat, or a pair of foot-boards having a free opening or hole in the centre. Every such opening shall communicate directly with the floor beneath common to all openings. The floor continued into the shoot, and having a good fall towards it, shall be made either of a continuous sheet of metal or of wood continuously lined with sheet lead or zinc. The floors and shoots of the latrines shall be painted with coal tar liberally laid on. There shall be a troughed opening at each of the ends or sides of the latrines a little above the level of the floor, but below that of the seats of foot-boards, to enable the floors to be freely flushed from the outside. Every compartment shall be well ventilated by means of such openings as will not interfere with privacy; and shall be sufficiently lighted by means of a lantern so placed in the latrine as to throw light into it.

(*3*) All latrines shall be kept in good order, and cleaned and disinfected three times a day. They shall be constantly flushed by pipes laid on to them, the deck immediately about them being enclosed with a ridge of wood, about two inches high to prevent the water used for flushing from finding its way to other parts of the deck.

(*4*) Not less than two sweepers shall be employed on every pilgrim ship, and one additional sweeper shall be employed for every 100 pilgrims in excess of 100 up to a maximum of five sweepers when the total number of pilgrims does not exceed 1,000. For every 100 or fraction of 100 pilgrims in excess of 1,000 one additional sweeper shall be employed up to a maximum of eight sweepers.

(*5*) Every pilgrim vessel shall be provided with at least two urinals.

62. Every ship shall be provided with not less than one place for washing on each side of the deck, sufficiently screened from public view, whereof a full proportion, as prescribed in the case of latrine accommodation, shall be set apart exclusively for females. A sufficient number of hand-pumps shall also be provided for supplying sea-water for purposes of ablution.

Medical Inspection.

63. The medical inspection of female pilgrims shall be carried out either by lady doctors or, under the supervision of the Medical Officer appointed by the Local Government under section 32, by women appointed by the Local Government in this behalf.

64. No articles found by the Medical Officer referred to in the last foregoing rule to have been contaminated by persons suffering from cholera or choleraic indisposition, or from a disease which in his opinion is dangerously infectious or contagious, or suspected by him to have been so contaminated shall be taken on board a pilgrim ship until they have been disinfected under his orders in the manner prescribed by rule 58.

65. No pilgrim otherwise entitled shall be prevented from embarking save for the causes specified in section 32, sub-section (*2*).

Issue of tickets and refunds of passage money.

66. The ticket which every pilgrim is, under section 35, entitled to receive—

(*a*) shall be of cardboard, and not less than 4½ inches long by 3 inches wide,

(*b*) shall specify the name of the holder, or, if the holder be a female, the name of the pilgrim whom such female is accompanying, and

(*c*) shall specify the cost in words in Urdu, or in some other vernacular language approved by the Local Government.

The cost of a ticket shall not include any taxes other than the fixed dues leviable at Camaran and Jeddah.

67. (*1*) Every intending pilgrim, who, having purchased a ticket, has not been permitted to embark under the provisions of section 32, sub-section (*2*), or who, having been received on board a pilgrim ship, has been removed from it in accordance with the provisions of section 33, sub-section (*2*), or who is from other unavoidable cause, such as the detention of any member of his family under either of the provisions aforesaid, prevented from proceeding to the Hedjaz, shall be entitled to receive back from the owner or agent of the ship the amount paid by him as passage money.

(*2*) It shall be the duty, in the case of pilgrims at Bombay, of the Protector of Pilgrims appointed under the Protection of Pilgrims Act, Bo 1887, and in the case of pilgrims at any other Pr

port, of such officer as the Local Government may appoint in this behalf, to see that refunds of passage money are promptly made to intending pilgrims entitled to them under this rule.

(3) The officer making an inspection under section 32 or section 33, shall, in case of such refund becoming due, impress on the pilgrim's ticket the words "Not permitted to proceed on voyage;" and such pilgrim shall thereupon be entitled, on presentation of the ticket so cancelled at the office of the owner or agent, to a refund of the passage money paid by him.

The Master, Owner, etc.

68. Besides complying with the foregoing rules so far as they concern him, the Master shall give the notice required under section 8 in Form No. IV appended to these rules, and shall produce, before the Inspector at the time of his inspection, a certificate in the following form:

"Certified that it is proposed to issue tickets to pilgrims and to provide accommodation as follows:

"On the voyage of the pilgrim ship proceeding to——

Class of pilgrims.	Maximum number of pilgrims to be carried.	Special accommodation and privileges to be reserved for each class.
Class I ...		
" II .		
Pilgrims of the lowest class.		

Dated ——

(Signed) ——

Master.

Ship ——

69. In the event of a ship being engaged to carry more than 100 pilgrims, the owner, agent or Master shall appoint to it a Medical Officer licensed under rule 70. Such owner, agent or Master may make an application to the Local Government, in Form No. V appended to these rules, for a licensed Medical Officer to proceed in medical charge of the pilgrims with the ship, and the Local Government shall comply with such requisition. A second Medical Officer licensed under rule 70 shall be similarly appointed, if the number of pilgrims exceeds one thousand. The owner, agent or Master shall also in the case of a ship engaged to carry more than 100 pilgrims appoint at least one male and, if there are any female pilgrims to be embarked, also one female attendant to assist the Medical Officer. In addition to the above attendants a compounder shall be engaged by the owner, agent or Master, if the ship is to carry more than 400 pilgrims. Such compounder and attendants must be approved of by the Health Officer at the port of departure and arrangements shall be made to the satisfaction of the Inspector for providing them with adequate accommodation on boardship.

70. The Master shall afford the Medical Officer every facility for examining the provisions, water and medical stores, and for making himself generally familiar with the arrangements made for the accommodation of the pilgrims about to be carried.

71. The Master shall cause the statements required by sections 22 and 25 to be prepared in Form No. VI appended to these rules.

72. The bond required by section 31 when a ship clears from any port in British India other than Aden for any port in the Red Sea shall be executed in Form No. VII appended to these rules.

73. Before sailing the Master shall obtain from the Port Health Officer a bill of health as prescribed in Form No. VIII appended to these rules.

74. The Master shall post up in the between-decks and in such other places accessible to the pilgrims as may be convenient copies of the Act and of these rules and all notices which he may be required so to post by the Commissioner of Police or other authorized officer at the port of first departure. All such copies shall be in English, French or German, and in Persian, Urdu and Gujarati. The Master shall afford every facility to the Port Officer, or other duly authorized officer or person, for making the official inspection of the ship, her equipment, ventilation, fittings, provisions, and medical stores, and shall himself be present at such inspection.

75. The Master shall be jointly responsible with the Medical Officer for the care of the pilgrims on the voyage. He shall see that the special accommodation and privileges, if any, to which the pilgrims are entitled are reserved to them without hindrance or diminution throughout the voyage; that the space in the upper and between-decks is not encroached upon; that all rules and regulations for securing cleanliness and order are carried out, and, as far as possible, that all reasonable requisitions of the Medical Officer are complied with.

76. The Master shall appoint one of the officers of the ship to the charge of the provisions and stores, to see to the punctual issue according to scale of the day's rations and water, and to assist the Medical Officer generally.

77. The Master shall, in the event of any pilgrim who is unaccompanied by any near relation, dying on the voyage, if the ship returns direct from the Hedjaz to any British Indian port, take charge of the effects of the deceased and make them over, on the ship arriving in such port, with such particulars as to the name and residence of the deceased as he may have been able to gather, to the Commissioner of Police in Bombay, Madras or Calcutta, and elsewhere to the Magistrate of the District, or, in his absence, the Magistrate in charge. If the death occurs on the voyage to the Hedjaz, and the ship does not return direct to British India, the Master shall make over the effects, with particulars as above, to the British Consul at Jeddah.

78. The Master shall cause the supplementary statement, required by section 24 when additional pilgrims are taken on board at an intermediate port, to be prepared in Form No. VI appended to these rules, the heading being altered to "Supplementary statement required by section 24 of the Pilgrims Act, 1895."

The Medical Officer.

79. (*1*) Besides complying with the foregoing rules so far as they concern him, the Medical Officer of every pilgrim ship required by the Act to carry a Medical Officer shall be licensed by the Local Government and appointed by or on behalf of the owner of the pilgrim ship. Every person desiring to obtain a license to act as such Medical Officer shall apply for a license to the Local Civil Administrative Medical Officer of the province in which the port of first departure lies. At Jeddah such license may be granted, for the return voyage only, by the British Consul at that port.

(*2*) The license shall be renewable yearly, and shall be in Form No. IX appended to these rules.

(*3*) No person shall be eligible for appointment as a Medical Officer who is unable to write either English or French or German or Italian.

80. The Medical Officer shall, if not already attached to the ship, immediately on his being appointed to it, proceed on board, report himself to the Master, examine and check the medicines and medical stores, and inform himself generally as to the arrangements made for the accommodation of the pilgrims.

81. The Medical Officer shall also report himself personally to the Inspector with a view to receiving any instructions which that officer may have to give him in connection with his duties and the official inspection of the ship.

82. The Medical Officer shall be present at the final inspection, and after it has been held and the ship and her arrangements approved, he shall, if satisfied regarding the arrangements for the care and comfort of the pilgrims made in accordance with the rules, furnish a certificate to that effect in Form No. X appended to these rules.

83. The Medical Officer shall provide himself with all the necessary instructions and forms required for the voyage.

84. The Medical Officer shall attend any Medical Officer appointed to inspect the pilgrims before embarkation under section 32, or after embarkation under section 33, and shall, with a view to special care or precautions on the voyage, watch those who may appear to be in an infirm or sickly state, and make a note regarding them in his diary.

85. The Medical Officer shall not leave the ship after the medical inspection has been completed. He shall see that the place set apart for the accommodation of the pilgrims is not encroached upon; that all the pilgrims have access to the upper deck; that good drinking water is readily accessible and duly supplied; that the latrines are attended to by the ship's topasses; that a supply of water is at hand for use in the latrines; that suitable hours have been fixed, in communication with the officer in charge of the stores, for the regular issue of daily rations to such of the pilgrims as have to be fed by the ship; and generally that every proper care is taken to secure cleanliness and good sanitary arrangements on board.

86. The Medical Officer shall satisfy himself that any additional passenger waiting to be taken on board at an intermediate port is not suffering from, or shows no signs or symptoms of, choleraic indisposition, or any disease which is, in his opinion, dangerously infectious or contagious.

87. The Medical Officer shall be jointly responsible with the Master for the care of the pilgrims on the voyage, and shall co-operate with the Master and officers of the ship for the welfare of the pilgrims.

88. During the voyage from any port in British India (except Aden) the Medical Officer shall for the first five days daily inspect the pilgrims and observe them individually to assure himself that none of them is affected with cholera, small-pox, yellow fever or plague.

89. The Medical Officer shall, if he has any doubt as to the quality of the drinking water, draw the attention of the Master, in writing, to the provisions of rule 40.

90. The Medical Officer shall, should any case of infectious or contagious disease occur, satisfy himself that disinfection is performed in the manner prescribed by rule 58 and shall record in his diary the fact that he has done so.

91. (1) The Medical Officer shall keep up regularly, from day to day throughout the voyage, the following records in connection with his duties, *viz.*:

(*a*) a Medical Diary of the principal events of the voyage, briefly and accurately recording all facts in connection with the medical history of the pilgrims, including a record of any advice he may give to the Master, and of compliance with, or neglect of, such advice;

(*b*) an Admission and Discharge Book of every case brought under treatment in Form No. XI appended to these rules;

(*c*) a Register of Deaths in Form No. XII appended to these rules.

(2) These records shall be written in either English, French, German or Italian.

92. On arrival at the port of debarkation in the Red Sea, the Medical Officer shall submit his diary and returns to the Consular authority there for transmission to the Government of India, and forward simultaneously a copy of them to the Inspector at the port in British India from which the voyage commenced, and on arrival at any British Indian port to the Chief Customs-officer, or to any officer authorized under section 25 to receive the statements referred to in that section.

No. I.

Certificate (A) under section 11 of the Pilgrim Ships Act, 1895.

I,
duly appointed and authorised to grant certificates under section 11 of the Pilgrim Ships Act, 1895, do hereby certify that the ship , register tonnage tons, being a pilgrim ship within the meaning of the said Act, and now riding at anchor at , and ready to proceed on a voyage to ,

is seaworthy, properly equipped, fitted, and ventilated, and that she is capable of carrying pilgrims.

No. II.

Certificate (B) under section 12 of the Pilgrim Ships Act, 1895.

I, , duly appointed and authorised to grant certificates under section 12 of the Pilgrim Ships Act, 1895, do hereby certify that the ship of , being a pilgrim ship within the meaning of the said Act, and having on board pilgrims, lists of whose number and sex have been furnished by , the Master of the said ship, and ready to proceed on a voyage to , the intermediate ports at which she is intended to touch being , has the proper complement of officers and seamen; that she is principally propelled by steam; that (in cases when tonnage or steam-power have been prescribed) she is of the prescribed tonnage and steam-power: that she has sufficient and suitable cooking, hospital, washing and latrine accommodation on board; that the provisions, fuel and pure water and other stores prescribed for such ships by the rules under the said Act are of good quality and properly stowed or packed, and are sufficient according to the scale for the time being fixed by the said rules; and that the said provisions, fuel and water are sufficient for days, the probable duration of the said voyage and also sufficient to provide the pilgrims with food in the event of an accident to her machinery; that is to say, water and fuel sufficient for the whole number of pilgrims and provisions sufficient for pilgrims, the remaining, *viz.*, pilgrims, finding their own provisions.

I also certify [in the case of a ship to carry more than 100 pilgrims] that she has on board the Medical Officer, [or Officers as the case may be], required by section 27 of the Act, and the attendants prescribed by rule 69 of the rules thereunder.

I also certify that the Master of the said ship holds Certificate A as required by section 11 of the Pilgrim Ships Act, 1895, and that there is no cargo on board contrary to the provisions of rule 49 of the rules thereunder.

I do further certify that the full space required by the said Act has been appropriated to pilgrims on board.

No. III.

Supplementary Certificate B under section 24 of the Pilgrim Ships Act, 1895.

I, , duly appointed and authorised to grant certificates under section 12 of the Pilgrim Ships Act, 1895, do hereby certify that the number of additional pilgrims taken on board the pilgrim ship from the port of is ; that the provisions, fuel and pure water (over and above what is necessary for the crew), and the other stores prescribed for such ships by the rules under the said Act, are of good quality and properly stowed or packed, and are sufficient according to the scale for the time being fixed by the said rules, and that the said provisions, fuel and water are sufficient for days, the declared duration of the said voyage and also sufficient to provide the pilgrims with food in the event of an accident to her machinery; that is to say, water and fuel sufficient for the whole number of pilgrims on board, and provisions sufficient for pilgrims, the remaining, *viz.*, pilgrims, finding their own provisions.

Dated at this day of 189 .

NOTIFICATION.

EMIGRATION.

Simla, the 11th May, 1896.

No. 707—2-21.—In exercise of the powers conferred by section 106 of the Indian Emigration Act (XXI of 1883), as amended by Act I of 1896, the Governor General in Council is pleased to declare that the following provisions of the said Act and of the rules thereunder shall not apply in the case of Natives of India departing from the ports of Bombay or Karachi under agreements made with, or on behalf of, Her Majesty's Government to labour for hire in British East Africa on or in connection with the Railway from Mombassa to or towards Lake Victoria Nyanza, namely:

(*a*) Sections 7, 8 (with Schedule I), 15, 20, 21 (with Schedule II), 22, 23, 24, 25, 27, 28, 29, 35 (*1*), 36, 37, 38, 41 to 48 (both inclusive), 49 (*1*), 54 to 63 (both inclusive) and 73 of the said Act; and

(*b*) Rules 1 to 12 (both inclusive), 21, 22, 24 to 26 (both inclusive), 31 to 34 (both inclusive), 36 to 84 (both inclusive), 85 to 190 (both inclusive), 208, 209, 210 and 211 of the rules thereunder:

Provided that no such Native of India as aforesaid shall be permitted to embark, in pursuance of this Notification, from the port of Bombay or from the port of Karachi, as the case may be, unless an Emigration Agent for British East Africa shall have been appointed, under section 14 of the said Act, for such port; and

Provided, also, that prior to embarkation every agreement made with any such Native of India as aforesaid shall be executed in duplicate, one copy being furnished to the intending emigrant; that the agreement shall contain all the particulars specified in section 31 of the said Act; and that the terms of the agreement shall be such as shall have been approved by the Governor General in Council.

2. In exercise of the powers aforesaid, the Governor General in Council is further pleased to direct that the remaining provisions of the said Act and of the rules thereunder, not specified above, shall apply in the case of such Natives of India departing as aforesaid, and that such of these provisions as are specified below shall apply in the modified form hereafter indicated in the case of each, that is to say:

Section 26. (*1*) The Emigration Agent shall supply the recruiter with a written or printed statement, signed by the Agent, and countersigned by the Protector of Emigrants, of the terms of agreement which the recruiter is authorized to offer on behalf of Her Majesty's Government to intending emigrants.

(*2*) The statement shall be both in English and in such Vernacular language or languages as the Protector shall in each case direct.

(*3*) The recruiter shall give a true copy of the statement to every person whom he invites to emigrate, and shall produce the statement for the information of any Magistrate or officer in charge of a Police-station, when called upon to do so by the Magistrate or officer.

Section 30. Every recruiter who has engaged any person to emigrate, or the Emigration Agent by whom such recruiter has under section 26, sub-section (1), been authorized to act, shall appear before the Protector of Emigrants with that person and with any persons intending to accompany that person as his dependents.

Section 31. The Protector shall thereupon examine the person, apart from the recruiter or Emigration Agent as the case may be, with reference to his agreement; and, if it appears that he was competent and willing to enter into the agreement and understood its nature, that he has not been induced to enter into it by any coercion, undue influence, fraud, misrepresentation or mistake, and that its terms are in conformity with law and are such as have been approved by the Governor General in Council, shall confirm the agreement by signing it and also the duplicate copy thereof to be furnished to the intending emigrant and, subject to the provisions of section 33, register in a book to be kept for the purpose, in such form as the Governor General in Council, from time to time, by rules made under this Act, prescribes, the name, sex, name of the father, caste, occupation and age of the intending emigrant, and the name of the village or place of which

he is a resident, and such other particulars (if any) concerning him and his dependents (if any) as the Governor General in Council, from time to time, by rules made under this Act prescribes.

Sections 32, 33 and 34. In these sections all references to a "registering officer" shall be deemed to be omitted.

Section 35. (2) An agreement to emigrate shall not be of any effect until the particulars concerning the intending emigrant and his dependents (if any) have been registered, and the agreement has been signed and confirmed by the Protector.

(3) When the particulars concerning any intending emigrant and his dependents (if any) have been registered and an agreement has been signed and confirmed by the Protector, the intending emigrant shall be deemed to be registered under this Act as an emigrant.

(4) Any number of intending emigrants desiring to emigrate on the same terms, may execute one instrument of agreement:

Provided that the Protector may, if he thinks fit, refuse to sign and confirm such an agreement and require each of the intending emigrants to enter into a separate agreement.

Section 52. If it appears that during the journey to the port of embarkation any emigrant has suffered any ill-treatment, the Protector of Emigrants may order the Emigration Agent to pay to the emigrant a reasonable sum by way of compensation.

Section 71. Before any emigrant-vessel clears out of any port, the master of the vessel shall obtain from the Protector of Emigrants at the port, and from the Emigration Agent for the country to which the emigrants are to be conveyed, certificates, signed by the Protector and Emigration Agent, respectively, to the effect that the Protector and Agent have, in respect of all the emigrants embarking at that port in the vessel, done all that is required by the foregoing provisions of this Act, or by the rules made under this Act, so far as the said provisions and rules are applicable, to be done on the part of the Protector and Agent, respectively, and that all the directions for the security, well-being and protection of emigrants which are contained in this Act or in the rules made under this Act, so far as the said provisions and rules are applicable, have in the case of the vessel been complied with.

Section 74. It shall be the duty of every master licensed under this Act to see that all the provisions of this Act, and the rules made under this Act, so far as the said provisions and rules are applicable, are observed on board his vessel during the voyage from British India to the country to which the emigrants are to be conveyed.

Rules 13, 16, 17, 20 and 20 A.—In these rules, for the words "registering officer" the word "Protector" shall be deemed to be substituted, and the heading of Colonial Emigration Form No. 4 shall be deemed to be as follows:

Register of Emigrants recruited on behalf of Her Majesty's Government for British East Africa during the year 18 .

Recruited by _____ for _____

Rules 27, 28 and 29.—In these rules the references to sections 36 and 37 of the Act shall be deemed to be omitted.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

Hore, M.B., Indian Medical Service (Bengal), is appointed to officiate as Medical Officer of the Mewar Bhil Corps, with effect from the date of assuming charge, and during such time as Surgeon-Major R. Shore, M.D., may officiate as Medical Officer, Kotah and Jhalrapatan, or until further orders.

No. 806-G.—Assistant Surgeon J. A. Lobo, in charge Civil Hospital, Lushie, is appointed to officiate as Residency Surgeon in the Persian Gulf, with effect from the 27th April, 1896, and during such time as Surgeon-Captain P. J. Lumsden may officiate as Medical Officer of the Deoli Irregular Force and of the Haraoti and Tonk Political Agency, or until further orders.

No. 812-G.—Mr. A. Elliott, Civil and Sessions Judge, Hyderabad Assigned Districts, is appointed to hold charge of the current duties of the office of Judicial Commissioner, Hyderabad Assigned Districts, in addition to his own duties with effect from the 13th May, 1896, and during the absence on privilege leave of Mr. R. Obbard, of the Indian Civil Service, or until further orders.

No. 813-G.—Surgeon-Major R. Shore, M.D., Indian Medical Service (Bengal), officiating Medical Officer, Kotah and Jhalrapatan, held charge of the current duties of the office of Political Agent in Kotah, in addition to his own duties, from the 16th to the 29th April, 1896, both days inclusive.

The 15th May, 1896.

No. 820-G.—The Governor-General in Council is pleased to recognise the appointment of Mr. Adolf Rehling as Acting Consul at Rangoon for the Austro-Hungarian Empire, during the absence of Mr. G. A. Schmidt.

No. 823-G.—The Governor-General in Council is pleased to recognise the appointment of Monsieur E. Rastoul as Acting Vice-Consul for France at Aden, during the absence of Monsieur H. Guès.

No. 826-G.—With reference to the notification in the Foreign Department, No. 1873-G., dated the 15th October, 1895, the Governor-General in Council is pleased to recognise the confirmation of Monsieur Gustave Rat as Consular Agent for France at Karachi.

No. 829-G.—Major J. A. Bell, Indian Staff Corps, Commandant of the Deoli Irregular Force, is appointed to hold charge of the current duties of the office of Political Agent in Haraoti and Tonk, in addition to his own duties, with effect from the 1st May, 1896, and during the absence on privilege leave of Mr. A. L. P. Tucker, of the Indian Civil Service, or until further orders.

No. 1590-I.—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1889), the Governor-General in Council is pleased to appoint Mr. R. G. MacGill, while officiating as Superintendent of Railway Police, His Highness the Nizam's Dominions, to be a Magistrate of the first class within and for the railway lands in His Highness the Nizam's territory, excepting the lands occupied by the Southern Mahratta Railway, and also to invest him with power to try cases summarily under the Code of Criminal Procedure as applied to those lands.

No. 1248-F.—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879) and of all other powers enabling him in that behalf, the Governor-General in Council is pleased to make the following orders in respect of criminal proceedings within the district of Southern Waziristan, including the Bhittanni country and the Gomal Pass, against British subjects other than (*a*) European British subjects, and (*b*) persons jointly charged with European British subjects:

(1) The Political Officer, Wano, for the time being shall exercise within the limits of the above-named district the powers of a District Magistrate and a Court of Session as described in the Code of Criminal Procedure, 1882.

(2) The Commissioner of the Derajat for the time being shall exercise the powers of a Court of Session and a High Court as described in the said Code in respect of all offences over which magisterial jurisdiction is exercised by the Political Officer, Wano, provided that the Political Officer, Wano, shall not commit any accused person for trial to the Commissioner acting as a Court of Session.

(3) The Commissioner of the Derajat for the time being shall exercise the powers of a High Court as described in the said Code in respect of all offences under which the jurisdiction of a Court of Session is exercised by the Political Officer, Wano, except that when an accused person is sentenced to death, the said powers of a High Court as a court of appeal, reference and revision shall be exercised not by the Commissioner of the Derajat, but by the Lieutenant-Governor of the Punjab and its Dependencies, and no sentence of death passed by the Political Officer, Wano, shall be carried out till it has been confirmed by the said Lieutenant-Governor.

(4) In the exercise of the jurisdiction of a Court of Session conferred on him by this notification, the Political Officer, Wano, may take cognizance of an offence as a court of original criminal jurisdiction without the accused person being committed to him by a Magistrate, and shall, when so taken cognizance of any offence, follow the procedure prescribed by the Code of Criminal Procedure, 1882, for the trial of warrant cases by Magistrates.

H. S. BARNES,
Offg. Secretary to the Government of India.

FINANCIAL. (FUNDS).

No. 2.

INDIA OFFICE;

London, 2nd April, 1896.

To His Excellency The Right Honourable The Governor General of India in Council.

MY LORD,

I forward herewith, for the information of your Excellency in Council, a Report and Abstract of Valuation by Mr. Willis Browne, F.I.A.,* of the Assets and Liabilities under the Indian Civil Service Family Pension Regulations as at the 30th of September 1893, together with observations thereon by Mr. William Sutton, F.I.A.†

The Indian Civil Service Family Pension Regulations: second quinquennial valuation of.

* Dated 18th July 1895.

† Dated 13th January 1896.

2. For the purpose of this valuation interest at the rate of 4½ per cent., as heretofore, has been used, but a lower interest is now being considered as regards the valuation of the Military Family Pension Regulations; and, as it was never intended that the pensions provided by these rules should bring any charge on the revenues of India beyond the prescribed Government contributions, the rate to be adopted on the next occasion will depend upon a consideration of the market rates of the day as specified in the constitution of the Regulations.

3. It will be observed that Mr. Sutton is of opinion that no serious attempt should now be made to appropriate any portion of the surplus of 26,716*l.*, which represents over 23¾ per cent. of the value of the liabilities. It appears that more than three-fourths of the surplus is produced by the subscriptions of unmarried officers, but this result was fully anticipated by the late General Hannyngton, who inaugurated the scheme, and neither Mr. Willis Browne nor Mr. Sutton advocate any special reduction at the present time of the subscriptions of unmarried officers.

4. In his Despatch dated the 15th of May 1890, No. 3, paragraph 8, Lord Cross stated that he was not satisfied that the principle of using a surplus to lessen the effect

on the payments in India of a fall in the value of silver was a sound one, and he remarked that the question of adopting the principle (originally advocated by Mr. Sutton) that the rupee payments in India should vary annually according to the value of the rupee, in order that the equivalent of the fixed contributions in sterling may be paid by the subscribers in India, would be considered in connection with the reports of the Actuaries on the Military Service Family Pension Regulations which were then under his consideration. In his subsequent Despatch, dated the 11th of December 1890, No. 10, His Lordship decided that the official rate of exchange should from the 1st of April 1891 be adopted with reference to the Military Service subscribers, but no orders have since been given in respect of the Civil Service Regulations.

5. I see no reason why a different treatment should be meted out to the two funds. I direct, therefore, that on and after the 1st of October next the contributions in India (subscriptions and marriage donations) under the Civil Service Regulations be recovered at the official rate of exchange for each year. Donations payable by instalments must be dealt with according to Lord Cross' Despatch, dated 25th June 1891, No. 5, paragraph 5.

6. Having considered in Council the question what reduction in the existing subscriptions should now be made in consequence of the surplus, I have decided that, as a temporary measure until the next valuation, the present rates shall be reduced in England and in India by 27½ per cent. with effect from the 1st of October next. Marriage donations cannot be included in this reduction. Tables V. and VI. regarding monthly contributions should stand as noted on the margin.*

* *Tables V. and VI.—Monthly Contributions.*

7. In accordance with the terms of Lord Cross' Despatch, dated the 11th of December 1890, No. 10, the *pro formâ* accounts for the half-year commencing on the 1st of October next should be rendered in sterling and should not in future be balanced, the details only of receipts and payments during the half-year being furnished. Those details will be embodied in the *pro formâ* account which is made up and balanced half-yearly in this Office.

8. I forward tables prepared by Mr. Willis Browne showing the rupee values, at various rates of exchange, of the reduced *sterling* subscriptions.

9. As suggested by Mr. Willis Browne a charge of 200*l.* a year will be made on account of the management of the fund in this country from the 1st of October next, and from the date at which the present annual charge of 350*l.* in India shall represent 2½ per cent. on the gross receipts and disbursements in India that percentage should be adopted in the place of the present fixed charge.

10. The publication in the *Gazette of India* of the orders contained in this Despatch, and of Messrs. Willis Browne's and Sutton's reports should not be delayed beyond the beginning of September next.

I have the honour to be,

My Lord,

Your Lordship's most obedient, humble Servant,

(Signed) GEORGE HAMILTON.

ENCLOSURES.

No. 1.

Indian Civil Service Family pensions.

Valuation as at 30th September 1893.

This is the second quinquennial valuation, and the results are indicative of financial prosperity.

In accordance with the instructions issued at the date of the Fund's inception, I have made the valuation on the supposition that all monies received bear interest at the rate of $4\frac{1}{2}$ per cent. per annum. The Fund is at present in its infancy, and, were the rate of interest reduced, the contributions would of course have to be proportionately augmented.

The personal state of the Fund has considerably altered since the date of the last valuation, as will be seen from the following comparative statement:—

As at the Date of the last Valuation.						As at the Date of the present Valuation.					
Married Officers.			Bachelors.			Married Officers.			Bachelors.

										27	29
								31		28	12
										29	1
											226

The number of married officers represents between 24 and 25 per cent. of the total number of subscribers, as against 12 per cent. at the date of the last valuation, and the

percentages of married members in the various classes compare with those obtaining five years back in the following manner :

At the Date of the last Valuation.		At the Date of the present Valuation.	
Class.	Percentage of Married to Total Number of Subscribers in the Class.	Class.	Percentage of Married to Total Number of Subscribers in the Class.
V.	Between 9 and 10 per cent.	V.	About 12 per cent.
IV.	About 33 per cent.	IV.	About 47 per cent.
III.	No officers in Class III.	III.	About 44 per cent.

Of the 97 married officers,—

4	contracted marriage at an age between				21	and	22
6	"	"	"		22	"	23
18	"	"	"		23	"	24
16	"	"	"		24	"	25
12	"	"	"		25	"	26
14	"	"	"		26	"	27
11	"	"	"		27	"	28
5	"	"	"		28	"	29
4	"	"	"		29	"	30
1	"	"	"		30	"	31
2	"	"	"		31	"	32
4	"	"	"		32	"	33

The above facts in no way lead me to suppose that the amounts of "rate-in-aid" estimated by me and explained in my last report are incorrect, and I have accordingly adopted the same for the purposes of the present valuation, *viz.*, £5·323 for each daughter and £4·5 for each son.

The annual charge for expenses of management as at present fixed, *viz.*, 350*l.*, bears the following proportions to the respective yearly amounts of receipts and payments in India :

Year ending	Receipts and payments together.	Percentage.
	£	
30th September 1889	4,385·3	8·0
30th September 1890	5,124·9	6·8
30th September 1891	5,673·5	6·2
30th September 1892	6,006·0	5·8
30th September 1893	6,862·6	5·1

In the Indian Military Service Family Pension Fund a fixed charge is made of 2½ per cent. on the gross receipts and disbursements in India, and I recommend that the same method be adopted in respect to this Fund from the date at which the present annual charge shall represent that percentage on the Indian receipts and disbursements. Also, as in the case of the Military Fund, I recommend a charge of 200*l.* per annum for this Office, to commence forthwith. In these circumstances I value the charges of management at 7,375*l.*

The value of the incumbent pensions is estimated at 8,285*l.* There were no pensioners at the date of the last valuation.

The value of future subscriptions for existing wives is estimated at 79,805*l.*, being 2,587*l.* less than the value of their contingent pensions estimated at 82,392*l.*

The value of future subscriptions for existing children is estimated at 16,445*l.*, being in excess by 1,930*l.* of the value of their contingent pensions.

The amount of capital in hand is 41,698*l.*, which, together with the outstanding contributions and contingent assets, brings the total up to 139,283*l.* On the other hand, the total value of the liabilities, including the sum of 7,375*l.* for charges of management, amounts to 112,567*l.*, leaving a balance in favour of the Fund of 26,716*l.*, which represents over 23¾ per cent. of the value of the liabilities.

It is necessary to examine into the cause of this very large surplus, and I have in consequence valued the assets and liabilities appertaining to married officers only with a view of ascertaining how far the surplus is due to the contributions of unmarried officers in excess of the amount required to supplement the subscriptions of married officers for the purpose of providing pensions to their children. The result I find to be as under:

	£
Capital due to married officers, plus "rate-in-aid" required ...	17,292
Value of contingent assets	96,250
Outstanding contributions	960
	£114,502

	£
Value of liabilities—incumbent and contingent	105,192
Management charges	3,739
Surplus	5,571
	£114,502

Thus it is seen that the surplus represents about 5 per cent. of the total value of the liabilities. This is as it should be, and is, in my opinion, no more than necessary to provide a margin of safety. It is evident, therefore, that the rates of contribution, so far as we can judge from the experience at hand, are such as to justify their retention. The large surplus is due chiefly to the subscriptions of unmarried officers, which, as pointed out in my report on the last quinquennial valuation, are, as a matter of course, larger than required at the present time, but which, when the state of membership shall become normal, or thereabouts, will not be found in excess of the requirements of the time. When the Fund shall have arrived at that state in which the approach of a full complement of married officers may be anticipated, the percentage of liabilities represented by the surplus will decrease, supposing always that the experience now in our possession will continue to prevail. I should not, therefore, be justified in recommending any permanent reduction in the rates of subscription beyond the amount of excess capital we have already in hand together with a sum representing the present value of the annual income to be derived temporarily from unmarried officers in excess of the income required. This, I think, we might be justified in making use of. Hitherto we have applied this excess income as a relief in mitigation of the ruling low rate of exchange.

It has already been decided in the case of the sister fund, *viz.*, that appertaining to the Military Service, that no rate of exchange should be allowed to enter into the calculations, and that the contributions should be paid at the rate fixed for the financial year. The adoption of this principle in respect to the contributions of members of the Indian Civil Service Family Pension Fund was advocated in paragraph 8 of Financial (Funds) Despatch to India, No. 3 of 1890, and I think the time has now arrived for the final settlement of the question. If the decision be identical with that pronounced in the case of the sister fund, it becomes necessary to consider the manner in which the surplus may best be utilized. It is pointed out by the Director of Funds that the rates of subscription fall very heavily on married subscribers in receipt of absentee allowance, and he has furnished a statement that leaves no room for doubt that such is the case, assuming always that these officers have no means other than their pay.

The amount of capital already in hand, which is due to the income derived from unmarried members in excess of the income required, I estimate to be 24,781*l.*, and the present value of the excess income to be hereafter derived, and which will gradually decrease until it shall have disappeared in about the year 1908, I estimate at about 25,181*l.* Thus we have a sum of about 50,000*l.* that we may apply, *if considered advisable,* to the reduction of subscriptions payable during furlough.

If the rates of subscription during furlough were to be reduced all round by one-half, I estimate that we should require a present sum of about 69,500*l.* Hereafter should the fund be found more prosperous financially than is now anticipated, this even might be taken into consideration, but at present it would, in my opinion, be very unwise to adopt such a course. To reduce the rates of subscription of married officers during furlough for *wives only* would, I estimate, cost about 51,000*l.* I may allude to the fact that, as the excess income from unmarried members can only be looked for temporarily, and that any reduction in the rates of subscription whilst on furlough will probably be considered a permanent reduction, I have, in estimating the amount required, valued the reduction not on an annuity appertaining to the Society in its present state, but as a perpetuity. Nevertheless, in respect to the present abstract of valuation, the surplus will, in the event of the concession proposed being granted, be reduced by 3,089*l.* only. This value appertains to present married officers only, but, as in the case of the valuation of their subscriptions and of the contingent pensions to existing wives and children, it applies throughout the period of their existence, duly taking into account promotions from class to class.

In the alternative, I am of opinion that the favourable rate of exchange now ruling might without causing a deficit be continued until the date of the next quinquennial valuation or that the full sterling rates of subscription both in England and in India might be reduced by 27½ per cent. until such time as by valuation it may be shown necessary to increase them. In the latter case the increase would be gradual and the full sterling rates would become payable only when the surplus arising from excess unmarried subscriptions shall have been absorbed.

In addition to the favourable rate of interest the benefits conceded by the Government of India are as follows:

Pensions of Widows.

Class of Husband at date of death.	Amount of Pension per Annum.
	£
V.	150
IV.	110
III.	120
II.	60

Pensions of Orphan Children.

Age.	Amount of Pension per Annum.
	£ s. d.
0 to 6	6 5 0
6 to 12	12 10 0
12 to 21 for boys	25 0 0
12 till marriage for girls	

Additional Pensions to Motherless Orphans.

Age.	Amount of Pension per Annum.
	£
0 to 6	75
6 to 12	50

To Orphan Daughters.

A donation of 250*l.* on marriage.

These benefits I have valued as under:

Incumbent Pensioners.

	£
Widows' pensions	7,647
Daughters' pensions	233
Daughters' pensions (if motherless)	18
Daughters' marriage donation	79
Sons' pensions	176
Sons' pensions (if motherless)	21

Contingent Pensioners.

Wives' pensions	18,057
Daughters' pensions	3,091
Daughters' pensions (if motherless)	124
Daughters' marriage donations	1,380
Sons' pensions	1,747
Sons' pensions (if motherless)	116
	£32,689

It will be understood that, as in the case of the benefits provided by the subscribers, no potential liabilities have been valued, but only those liabilities appertaining to existing wives and children. In respect to potential liabilities provided by the subscribers, I may point out that there are corresponding potential assets, and consequently their valuation is not needed until they come into existence. Suffice it to say that the Government liability will gradually increase up to an estimated annual sum of 35,000*l.*, being the maximum fixed by the Secretary of State for India in Council.

The financial outlook of the Fund is, as anticipated by its founder, the late General Hannyngton, one of continued and steady progress.

WILLIS BROWNE.

18th July, 1895.

FREDK. TREVOR,
Director of Funds.

No. 2.

Indian Civil Service Family Pensions.

MY LORD, 13th January 1896.

I have now the honour to submit the opinion I have arrived at with regard to Mr. Willis Browne's Report and Valuation of this Fund as at 30th September 1893, and the suggestions made by him in this report.

1. In the first place, I have to call attention to the important fact that it appears from the report and from the printed Regulations of the Fund, that the rate of exchange at present in operation is 1*s.* 8*d.* per rupee, and that I gather, in consequence of this, the loss in sterling has been some 6,000*l.* to 7,000*l.*, by which amount the sterling amount of the Fund at 30th September 1893 would be so much richer had there been no loss incurred on exchange. It will be remembered that I had the honour to submit recommendations on this subject in connection with the Indian Military Service Family Pension Fund, and I observe that Viscount Cross, a former Secretary of State for India, refers to the matter in the Despatch addressed by him on 15th May 1890, to the Governor-General of India in Council. It is difficult to supply any reason why there should be different treatment meted out to the two Funds, and with this remark I beg leave to pass on.

2. The figures appended to Mr. Willis Browne's report purport to be a valuation balance sheet as at 30th September 1893, bringing out actuarial surplus of 26,716*l.* It will be observed, however, apart from the liability under incumbent claims, that the contingent liability is very small according to the valuation. There does not, however, appear to be any reserve made for the additional children which the existing married members will certainly bring on the Fund. The report alludes to this matter, and apparently it is taken for granted that the value of potential liabilities is properly met by the payment of contributions when called upon.

3. As pointed out in Mr. Willis Browne's report, the Fund is still in its infancy, and the fact that there is a valuation surplus is no matter for surprise. Under these circumstances, the apparently rapid growth of this surplus would appear to indicate that the scale of contributions is fixed somewhat too high, and that a general inquiry into this matter should first be made before any serious attempt is made to appropriate any portion of this surplus. I would, therefore, suggest that an inquiry of this nature should be made in connection with the valuation at the end of the present quinquennial period, as it is not intended, being a compulsory fund, that is, a fund to which the Civil members of the Indian Service are compelled to belong, to accumulate a large surplus which, from the nature of the case, can only be practically participated in by the existing members.

4. I would further beg leave to suggest that, in connection with the investigation I have recommended in (3), the funds should be separately stated for the widows, the sons and the daughters, and the corresponding out-go for each; so that there will in future, for these separate funds, be a separate account for each. There should also be a separate item set out in each of the children's funds, for the receipts from the bachelors paid into them. The advantage of such a course is apparent; the state of the various funds would be clearly shown—what they should be and what they are—and the question of adjusting them would, in the future, be greatly simplified.

5. Pending the complete inquiry into the rates of contribution referred to in this report, I would beg leave to recommend that, for the five years from this date, the full sterling rates of subscriptions, both in England and India, be reduced by 27½ per cent. (twenty-seven and one-half per cent.).

I have, &c.,

W. SUTTON.

The Secretary of State for India.

REWARDS.

GOOD CONDUCT MEDALS.

No. 577.—The following correction is made in G. G. O. No. 496 of 1896:

Under the heading "Without gratuity" *for* "Sergeant William Fairbairne, Ordnance Department," *read* "Sergeant William Fairbairn, Ordnance Department."

ORDER OF MERIT.

No. 578.—The Governor-General in Council is pleased to sanction the admission to the 3rd class of the Order of Merit of the undermentioned non-commissioned officer and sepoys of the Indian Army serving with the Armed Forces in British Central Africa:

NO. 2167, NAICK ATMA SINGH, 45TH (SIKH) REGIMENT OF BENGAL INFANTRY;

NO. 259, SEPOY PERTAB SINGH, 35TH (SIKH) REGIMENT OF BENGAL INFANTRY;

NO. 470, SEPOY SUNDAR SINGH, 36TH (SIKH) REGIMENT OF BENGAL INFANTRY.—

For conspicuous gallantry in action during the expedition against the slave-trading Chief Zarafi, in Central Africa, on the 27th October 1895, on which occasion, under a very heavy fire from the enemy, they brought Havildar-Major Nihal Singh, who was lying mortally wounded in the open, into a place of safety.

Subsequently sepoy Pertab Singh volunteered to bring a dooly from camp, about two miles distant, and succeeded in doing so, running the gauntlet of a heavy fire from the enemy the whole way.

NO. 2815, SEPOY NARAYAN SINGH, 19TH (PUNJAB) REGIMENT OF BENGAL INFANTRY.—For conspicuous gallantry in action on the 22nd August 1895, during a reconnaissance into the country of the slave-trading Chief Zarafi, in Central Africa, on which occasion, when a party of Atonga and Makua regulars fell back in confusion before the enemy, he fixed his bayonet, dashed up the hill to their assistance, and charged the enemy, killing one man and wounding another and putting the rest to flight, thereby preventing a panic amongst the native African troops.

NO. 2680, SEPOY SHAM SINGH, 15TH (SIKH) REGIMENT OF BENGAL INFANTRY;

NO. 3005, SEPOY MAHTAB SINGH, 45TH (SIKH) REGIMENT OF BENGAL INFANTRY.—

For conspicuous gallantry in action during the expedition against the slave-trading Chief Zarafi, in Central Africa, on the 27th October 1895, on which occasion, observing the difficulties under which three of their comrades were labouring in bringing

in the Havildar-Major, who was mortally wounded, they abandoned cover and dashed forward into the open, in order to assist them by drawing the fire of the enemy upon themselves.

VOLUNTEER CORPS.

No. 579.—His Excellency the Governor-General of India has been pleased to confer the Volunteer Officers' Decoration upon the undermentioned officer of the Indian Volunteer Force, who has been duly recommended for the same, under the Royal Warrant of 24th May 1894 (India Army Circulars of 1894, clause 101):

W. S. S. BISSET, *Colonel, R.E.,*
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 9th, 1896.

During the week under review pressure conditions have been abnormal over Northern and Central India, and the unusual distribution has resulted in large variations from the average in the winds and weather. Throughout the week the barometer read considerably below the normal average over the Central Provinces and the head of the Peninsula, and above the average over North-Eastern India and over the submontane districts lying along the line of the Himalayas. These conditions in pressure resulted in the production of gradients for easterly winds over the Gangetic Plain, and winds from the eastward were reported, extending from Bengal to the Punjab, on most days of the week. The presence of easterly winds in this locality at this time is the more remarkable, because the Gangetic Plain is usually in the present month the seat of very strong hot westerly winds. Another circumstance which helped to increase the extent and velocity of the current from the east was the appearance on the 8th and 9th of a well marked low pressure area over the Punjab. This depression occasioned a cyclonic circulation of the winds over North-Western India, and the easterly winds on its northern side formed a prolongation of the easterly current prevailing up the Gangetic Plain. Notwithstanding that these easterly winds brought with them a much higher humidity than that formerly prevailing, there occurred hardly any rain over Upper India either on the hills or plains. In North-Eastern India, on the contrary, where strong southerly winds from the Bay were constantly reported, rainfall occurred daily and in several places in large amounts. The mean temperature of the whole country exceeded the normal average on all days, but in Bengal on the 5th, 8th, and 9th; in Burma on the 8th; and in Madras on the 5th there was some deficiency. The greatest abnormal excess was over North-Western India.

Daily Summary.—*Sunday, May 3rd.*—The barometer had risen over part of North-Western India and over the Bay area, and had fallen elsewhere. Readings were lowest over the Central Punjab and highest over Tenasserim. The winds were southerly over the Bay, south-easterly and easterly over Bengal, and up the Gangetic Plain, and generally between north-west and west in other parts of the country. The mean temperature was low in Malabar and part of North-Eastern India, and excessive elsewhere—most so over the Punjab and Rajputana. General showers had been received over Assam and the south-west of the Peninsula, and scattered showers over South-East Bengal, Lower Burma, Madras, and Kashmir.

Monday, May 4th.—Pressure had changed irregularly, and—except in parts of Bengal and of Assam, where the rise had been brisk—generally slightly. Pressure was low over the south-east of the Punjab and the Gangetic Plain and was high in Assam, Tenasserim, and the north-west of the Punjab. Gradients were rather steep between the Assam Valley and the east of the North-Western Provinces. Calms and variable breezes were reported over the south-east of the Punjab, but in other places the winds were similar to those reported on the 3rd. The mean temperature was lower than usual over the south of the Peninsula and part of North-Eastern India, and excessive elsewhere. Thunder-showers had occurred over a large part of Bengal and Assam and at some stations in the Peninsula.

Tuesday, May 5th.—Pressure had increased in nearly all places, but the general distribution was almost unchanged. Calms continued to be reported from the south-east of the Punjab, southerly winds from the Bay, easterly

and south-easterly winds from Bengal and the Gangetic Plain, and westerly to north-westerly winds in most other places. Both in the south of the Peninsula and in North-Eastern India the area of depressed temperature had increased in size and intensity, while the abnormal excess in the north-west had also increased, so that large contrasts of temperature were shown. Rain was again reported generally from a large part of Bengal and Assam and scattered showers from Burma and the Peninsula.

Wednesday, May 6th.—The barometer had fallen over the greater part of the country. Pressure was low over the western desert and the Central Provinces and high in Assam, Tenasserim, Ceylon, and Malabar. Gradients were slight. The wind directions were practically unchanged. Calms were reported within the low pressure area over the Central Provinces. The low temperature areas both over Southern and over North-Eastern India were decreasing in size and intensity. The hottest area was the west of the Punjab. A fair amount of rain was reported from Burma, but only a few scattered showers from Bengal and the Peninsula.

Thursday, May 7th.—Pressure had changed slightly and irregularly. Readings remained low over the Punjab and over the Central Provinces and high over Assam, the south of the Bay, and Malabar, and gradients were somewhat steeper than on the 6th. The wind directions exhibited very little alteration. The low temperature areas had practically disappeared, and the mean temperature was almost everywhere excessive. Only a few scattered light showers were reported.

Friday, May 8th.—Both the depressions had suddenly developed and exhibited well-defined centres,—one over the Indus Valley, the other over the east of the Central Provinces. Pressure remained high over the west of the Peninsula and the south of the Bay, and the increase in the barometric gradient noticed on the 7th had been continued. The winds were cyclonic in the immediate neighbourhoods of the two depressions. In other respects there was not much change. Temperature had decreased over Bengal, and the mean temperature was in slight to large defect over that province. There was also slight deficiency over Burma and the south of the Peninsula. Dust and thunder storms giving rain had occurred over Lower Burma, Assam, Bengal, the submontane stations of the North-Western Provinces, the hill stations in the north-west, Western Rajputana, and a large part of the Peninsula.

Saturday, May 9th.—Pressure had changed irregularly. The barometer had risen over the east of the Central Provinces, and the depression there had almost filled up; it had, on the contrary, fallen over the Punjab, and the depression there had intensified. Readings remained highest in the extreme south-west and south-east, and gradients continued rather steep. The wind was still cyclonic in the north-west. The mean temperature was in slight to large defect over Bengal, in moderate defect over the south of the Peninsula, and in slight defect over Lower Burma. In all other places it was in excess. Thundershowers had occurred over Bengal, Assam, Lower Burma, and at a few stations in other parts of the country.

Temperature.—The distribution of the temperature was directly related to the distribution of rainfall. Rain occurred mainly over North-Eastern India and to a slight extent over the south of the Peninsula, and in both these regions a deficiency of temperature was recorded on most days, while in other parts of India the rainfall of the week was actually or practically *nil*, and the mean temperature was in consequence throughout excessive. The day of most generally excessive heat was May 7th, when Madras, Bogra, Kindat, Akyab, Thayetmyo, and Moulmein were the only stations which did not exhibit an excess of temperature. In the Punjab, Sind, and Rajputana the excess of heat towards the close of the week was very remarkable and averaged about $7\frac{1}{2}^{\circ}$. The absolutely greatest excess reported during the week was at Rawalpindi on the 9th, when the actual mean temperature was 15° above the normal. On this date the night temperatures were exceptionally high over North-Western India.

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Province.	May 1896.							Mean variation of week.
	3rd	4th	5th	6th	7th	8th	9th	
	°	°	°	°	°	°	°	°
Burma	+1·5	+1·8	+2·3	+0·3	+0·1	−0·2	+0·5	+0·9
Bengal and Assam	+1·7	0	−2·3	+0·8	+3·6	−0·9	−3·2	0
North-Western Provinces and Oudh	+5·6	+4·5	+4·8	+4·6	+4·9	+2·9	+0·5	+4·0
Punjab	+6·4	+5·9	+6·0	+6·5	+7·5	+7·5	+8·2	+6·5
Bombay	+1·8	+1·8	+2·1	+2·9	+3·1	+2·1	+1·1	+2·1
Central Provinces and Berar	+2·5	+4·1	+5·9	+5·7	+6·2	+5·6	+4·4	+4·9
Central India and Gujarat	+2·8	+3·4	+4·5	+4·7	+5·0	+4·4	+3·8	+4·1
Sind and Rajputana	+5·6	+4·5	+5·4	+5·3	+5·3	+7·5	+7·0	+5·8
Madras	+1·4	+0·6	−0·9	+0·8	+2·4	+1·3	+1·3	+1·0
Mean for whole of India	+3·3	+3·0	+3·1	+3·5	+4·2	+3·4	+2·6	+3·3

On each day of the week the mean temperature of the whole of India exceeded the normal average, the abnormal excess being greatest (4·2°) on the 7th and least (2·6°) on the 9th. On three days of the week, *viz.*, the 3rd, 6th, and 7th the mean temperature of all the provinces was above the normal, but on the remaining four days normal or slightly deficient temperatures were reported from some part of the country. The provincial variations show that for the week the mean temperature was about normal in Burma, Bengal, and Assam, in slight excess in Madras, in moderate excess in Bombay, in considerable excess in the North-Western Provinces, the Central Provinces, Central India, and Gujarat, and in large excess in the Punjab, Sind, and Rajputana.

The following were the highest temperatures throughout India recorded on each day:

May 3rd	114·9°	at	Chanda.
„ 4th	114·7°	„	Jhansi.
„ 5th	114·6°	„	Sirsa.
„ 6th	116·1°	„	Jacobabad.
„ 7th	116·9°	„	Montgomery.
„ 8th	117·1°	„	Jacobabad.
„ 9th	118·4°	„	Montgomery.

Rain.—The rainfall of the week under review has been of the normal character, and has occurred in all places during thunder and dust storms. The rainfall over North-Western India accompanied the appearance of a cyclonic disturbance at the close of the week. It was generally light and scattered, but was slightly heavier on the hills than on the plains. The rain in North-Eastern India was associated with strong southerly winds over the head of the Bay and easterly winds over Assam and Bengal. On the 6th and 7th the wind at Saugor Island fell off considerably in strength, and accompanying this there occurred a very marked decrease in the amount and extent of rainfall over Bengal and Assam. In the south of the Peninsula the rainfall took place, as scattered showers accompanying irregular and generally slight changes of pressure. Over the central parts of India and over a considerable portion of North-Western India, there was no rainfall of importance. The concluding table gives the rainfall data. Rain fell during the week in no less than thirty-nine of the rainfall divisions, showing that the rainfall area was of larger extent than for several weeks past. Of these thirty-nine divisions eight reported an average actual fall of less than one-tenth of an inch, but this leaves thirty-one divisions which

received effective rain, a result which compares favourably with the nineteen divisions which last week were in this category. The thirty-one divisions included the following regions, *viz.*, the whole of Burma, the whole of Assam, the whole of Bengal (including Bihar and Chota Nagpur), North Oudh, the submontane, and hill districts of the North-Western Provinces, the hills of the Punjab, the greater part of the south of the Peninsula, the Bombay Deccan, and the East Coast (North). The regions which were practically or actually without rain included roughly the Gangetic Plain, the whole of the north-west of India, except the hills, and the whole of the central parts of the country. The heaviest average actual fall during the week was 3·29 inches in the hills of Assam, followed by 2·97 inches in North Bengal, by 2·93 inches in Tenasserim, by 2·89 inches in Coorg, by 2·83 inches in Assam (Surma), by 2·44 inches in Malabar, and by 2·10 inches in the East Coast (North (*a*)). The second column of the table gives the average normal rainfall of the divisions and shows that the rainfall of the week ordinarily ranges from about 4 inches in Assam to a few hundredths of an inch in the central parts of the country. The third column shows the variations of the actual from the normal rainfall of the week. Over the greater part of the country the average actual rainfall has been short of the normal, but in Tenasserim and Central Burma, in Deltaic, Central, and North Bengal, in Bihar, in Oudh (North), in Malabar, in Madras (South-Central), in Coorg, in Mysore, and in the East Coast (North) there has been greater or less excess. The most marked deficiency was in Arakan, East Bengal, Assam (Surma), and the Bengal Hills, where the abnormal deficiency exceeded 1 inch.

The three concluding columns of the table exhibit the state of the seasonal rainfall. The figures here given exhibit some improvement as compared with previous weeks. The division of Rajputana (West) is still the only one showing any decided excess, but Tenasserim, Assam (Surma, Hills, and Brahmaputra), North Bengal, Bihar (South), Malabar, Coorg, and the East Coast (North) all show about a normal fall. The principal deficiency is shown over the Gangetic Plain, the central parts of the country, the north of the Bombay Presidency, and the Peninsula, except the south-western divisions.

The following are the principal totals recorded during the week (May 3rd to May 9th):—Thaton 5·06 inches, Netrakona (Mymensingh) 5·18 inches, South Sylhet (Sylhet) 5·98 inches, Mankachar (Garo Hills) 7·54 inches, Bongong (Jessore) 4·41 inches, Culna (Burdwan) 4·46 inches, Rungpur 7·31 inches, Araria (Purnea) 4·80 inches, Trivandrum 6·81 inches. These returns show that there were no very heavy falls of rain throughout the whole country.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *14th May 1896.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 9th May.*—Moderate rain fell on the West Coast and in most parts of the Circars, Central, and Southern districts. Preparations for the next crop are proceeding slowly. Some harvest still continues with moderate yield. Pasture is scarce, but fodder is available. The condition of cattle is generally good. Prices are almost stationary, though slightly dearer in a few districts.

Bombay.—*For week ending 13th May.*—Slight rain fell in parts of Sholapur, Satara and Dharwar. The standing crops are good. Harvesting of the late crops continues in eight districts. Preparations for next season are progressing generally. Fodder is insufficient in parts of Sind. Agricultural stock are in good condition, except in parts of four districts. Prices are normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 11th May.*—There was rain in almost all districts during the week. It has done good to the standing crops and has facilitated the ploughing of lands and the sowing of the early rice and jute crops, but more rain is wanted in Bihar, Orissa and Chota Nagpur. The spring rice is still being harvested, but a poor outturn is expected. Prospects of indigo and sugarcane have improved. Want of drinking water is still felt in parts of the Burdwan and Presidency divisions. The price of common rice continues abnormally high in East Bengal and Chota Nagpur as compared with last year.

North-Western Provinces and Oudh.—*For week ending 13th May.*—The weather is somewhat unsettled. Storms accompanied by rain and hail are reported from the hill districts and most of the sub-montane districts. The rain has been beneficial, and preparations for the autumn crop sowings have begun in several places. Slight damage to the extra crops by hail and hot winds, and to mangoes by storms and hot winds, is reported in a few districts, but generally the extra crops are doing well, and prospects are good. Cane and indigo are being irrigated where practicable. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, May 9th, were—Banda 1,17,554, Hamirpur 41,371, Jhansi 32,301, Jalaun 24,649, Allahabad 5,625, Pilibhit 2,258, Garhwal 1,575—total 2,25,333; of this number 29,526 were dependants gratuitously relieved on the works, and 6,124 persons received gratuitous relief under other provisions of the Famine Code. The numbers employed on village works were—Banda 25,682, Hamirpur 10,249 and Jalaun 6,724. The figures for Jhansi have not been reported. Ordinary works in Moradabad are being extended by the District Board to provide labour which is getting scarce. A few cases of emigration of tenants are reported from the Sandila tahsil of the Hardoi district owing to the bad harvest and loss of cattle. Test works will shortly be opened there. Supplies are still sufficient. Fodder is becoming scarce in places and dearer in price. Water is also deficient in Bijnor and Banda. Prices generally show a tendency to rise.

Punjab.—*For week ending 13th May.*—Rain has fallen in Rawalpindi, Dera Ismail Khan, Peshawar and Karnal. People are in distress for drinking water in Hissar. The canal crops are being threshed in Hissar, and the crops have mostly been winnowed and stored in Delhi. Threshing operations are almost completed in Ferozepore, and the spring harvesting in Sialkot, Mooltan and Dera Ismail Khan. Spring threshing in Amritsar and spring harvesting in Lahore and Rawalpindi are in progress. Weeding of sugarcane in Jullundur and Gurgaon and of sugarcane and cotton in Sialkot is also progressing. Sowings of cotton and millets in Lahore, of cotton in Shahpur, of indigo and cotton in Rohtak, of *jowar* (*Sorghum vulgare*) and cotton in Gurgaon, of cane, cotton and millets in Gujranwalla, are in progress. Sowings of the autumn crops in Mooltan continue, also harvesting of tobacco in Gurgaon. The condition of the extra spring crops is good in Amritsar, Lahore and Dera Ismail Khan and average in Rohtak, but not good in Rawalpindi and Peshawar. The sugarcane and melon crops are suffering for want of rain in Umballa. The extra spring crops are being watered from wells in Jullundur. The condition and prospects of the spring crops are generally reported average in irrigated and below average in unirrigated tracts. The stock of food-grains is insufficient in parts of Lahore and Shahpur, but fair in Peshawar and sufficient elsewhere. Agricultural stock and cattle are in poor condition in Hissar, Umballa, Shahpur and Rohtak. Cattle are dying of starvation in Hissar and are getting lean for want of water in Umballa and of fodder in Rohtak. Fodder is scarce in all districts, except Jullundur, Ferozepore, Sialkot, Mooltan, Rawalpindi, Dera Ismail Khan and Peshawar. Prices are normal in Ferozepore, Amritsar and Dera Ismail Khan, but are rising in Umballa and Karnal and are high elsewhere.

Central Provinces.—*For week ending 13th May.*—The weather is very hot and at times cloudy with light falls of rain in Narsinghpur, Raipur and Sambalpur. The land is being prepared for the autumn sowings. Scarcity of water and fodder prevails in several districts. The price of gram and rice has slightly risen in Damoh. Prices are above normal in Seoni and Chhattisgarh, but are stationary elsewhere.

Burma.—*For week ending 9th May.*—In Upper Burma ploughing and harrowing for the main wet-weather paddy crops have commenced in the Lomaing township of the Mandalay district, and ploughing for the early sessamum and cotton in Sagaing, early sessamum in Minbu, and maize and early sessamum in Pyinmana. The prospects of dry-weather paddy and early wet-weather paddy are generally good, but rain is wanted for the dry-weather paddy crop in Yamethin. The price of paddy has risen considerably in Bassein and slightly in Rangoon, Prome, Pakokku and Minbu; elsewhere prices are stationary.

Assam.—*For week ending 12th May.*—The weather is seasonable. Sowing of the early rice and planting of sugarcane are progressing. Prospects of tea are fair. The condition of cattle is good. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 13th May.*—MYSORE.—Good rain fell throughout the State, except in Kadir, Shimoga and Chitaldroog where it was slight. Prospects are favourable. The standing crops are in good condition. Prices have fallen in Bangalore and Tumkur, but have risen in Chitaldroog.

COORG.—Rain fell throughout the province. Coffee has blossomed. Fodder and water for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 13th May.*—BERAR.—The weather is very hot with high winds during the day. Preparation of the land for the autumn sowings is in progress. Scarcity of fodder and water continues in all districts. Prices of food-grains are fluctuating in Wun, but are stationary elsewhere.

HYDERABAD.—Rainfall moderate. The crops on irrigated areas are being harvested in some places, but they are drying up for want of water in others. Fodder is getting scarce. Prices are normal.

Central India.—*For week ending 13th May.*—Slight rain fell in Bundelkhand and Baghelkhand during the week. Agricultural operations are completed in Gwalior, Bundelkhand and Baghelkhand, and are in progress in Malwa and have been started in Bhopal and Goona. Cattle are in fairly good condition, except in parts of Bhopal and the Bundelkhand Agency. Pasturage is good everywhere, except in Goona and in a few districts of Gwalior. Prices are above normal in Bundelkhand, Baghelkhand, Malwa, Goona and in a few districts of Gwalior, but are normal elsewhere. The opium crop is in fairly good condition in Gwalior and Malwa. The numbers of persons employed on relief works in the Gwalior and Bundelkhand Agencies were 4,000 and 8,065 respectively.

Rajputana.—*For week ending 13th May.*—There was slight rain in Tonk, Karauli and one tehsil of Ulwar. Agricultural operations are generally satisfactory, except in Merwara where the harvest is poor. Ploughing for the autumn crops has commenced in Meywar and Kotah. The crops are very poor in Jaisalmere, and the unirrigated crops have been damaged in Dholepore for want of rain. Agricultural stock generally are in good condition, but are suffering in Ulwar and parts of Jaisalmere for want of fodder. Pasturage and fodder are scarce in Kherwara, Tonk, Shahpura, Jeypore, Ulwar, Jaisalmere and parts of Meywar and Kotah. Fodder is becoming scarce in Ajmere-Merwara and is failing in Dholepore and Bhurtpore, but is sufficient elsewhere. Prices are rising in seven States, but are steady elsewhere. In Marwar 4,042 persons are on relief works, and 372 on gratuitous relief; in Shahpura 379 are on relief works, and 39 on gratuitous relief; in Merwara 2,259 are on relief works; in Bikanir 2,263 are on relief works, and 348 are on gratuitous relief; in Jaisalmere 351 are on relief works, and 42 on gratuitous relief.

Kashmir.—*For week ending 12th May.*—KASHMIR VALLEY.—Rainfall moderate. The prospects of the spring crops are excellent. Autumn sowings are still in progress. Prices continue normal.

JAMMU PROVINCE.—*For week ending 15th May.*—Report not received.

Nepal.—*For week ending 9th May.*—Seasonable showers have fallen, and the weather is cloudy. The sowing of Indian-corn and early rice is completed.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

No. $\frac{8}{69-1}$

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture, (Civil Veterinary Administration),—dated Simla, the 11th May, 1896.

Read—

The Annual Administration Report of the Civil Veterinary Department in India for the official year 1894-95.

RESOLUTION.

The report for the year 1894-95 on the working of the Civil Veterinary Department in India has been, as usual, divided into two parts, the first being the Military and the second the Revenue Section. The statistics show an improvement in the working of almost every branch of the Department. The number of Government horse and donkey stallions has been increased from 390 and 325 to 394 and 361 respectively; 13,435 mares have been covered by Government horse and pony stallions as compared with 11,861 last year; the number of district horse and pony stallions was increased from 100 to 144, and they covered 5,212 mares as compared with 2,290 last year.

2. One of the most noticeable features of the report is the change of opinion which seems to be taking place regarding the employment of stallions of the Trotter and Hackney strain, and the increasing tendency to substitute for them Arabs and thorough-breds. The Department has been hampered in its endeavour to import an increasing number of thorough-bred English stallions by the difficulty of obtaining them of the required size and quality at the prices hitherto offered. Failing this source of supply, it is anticipated that good thorough-bred sires may be obtained from Australia, and a limited number of such stallions are being imported as an experimental measure. They compare favourably in many respects with thorough-bred English importations, and are obtainable at lower prices. Owing to more liberal treatment of the importers the best Arab stallions available in the Bombay market are now secured by the Civil Veterinary Department.

3. There was a satisfactory decrease in the cost of feed and keep of stallions, which appears to be the result of careful management and close supervision.

4. Some redistribution of stallions, especially in the Bombay Presidency, will probably be desirable if the figures of the average number of mares covered per stallion employed are reliable. The increase in the number of mares covered is considerable, particularly in Baluchistan, and it is probable that more stallions could with advantage be sent to this Agency, especially from the Deccan and Guzerat.

5. The reported result of coverings is, however, unsatisfactory in the North-Western Provinces, Guzerat, and Sind; and indeed throughout India the number foaled is small. This may in part be due to the incompleteness of the statistics, and the efforts which have already been made, not without success, to improve the accuracy of the returns, should be strenuously continued.

6. The best remounts were produced by thorough-bred English and Arab stallions. The number purchased during the year shows a slight decrease compared with the previous year. This is attributed to a smaller demand on the part

of the Remount Department rather than to any falling off in the supply. The number of remounts reported to have been purchased at Fairs and Shows during the year is 1,613, but the age of many of them was probably below the remount standard of four years. The Army Remount Department is credited with 326 remounts, but nearly all were young stock.

7. The reports of the provincial officers show that the system of branding mares is popular in districts where its object is understood. Certificates of barrenness can now be obtained with greater facility than formerly, and this mitigates one of the hardships hitherto complained of.

8. Considerable progress has been made in mule-breeding during the year, but there is room for a great increase in the number of donkey stallions. The Inspector-General is to be congratulated on the success of his endeavours to obtain good indigenous stallions. The stock produced by the Punjabi donkey stallion is excellent, and compares favourably with that sired by the Jack of Southern Europe.

9. The supply of mules is, however, still inadequate, particularly of those required for Ordnance purposes, for which high prices are paid, but which cannot be obtained in sufficient numbers. Improvement might perhaps be effected by a system of branding pony-mares for the special production of Artillery mules. The attention of the Inspector-General is directed to this important matter.

10. The Section of the Report regarding Horse Fairs and Shows gives much valuable information. Copies of the Annual Report are supplied to all regiments of Native Cavalry, and the information on this subject should be of material use to the officers of such regiments.

11. An interesting feature of the year's work is the great advance made in horse-breeding in Native States, and the Inspector-General has been able to initiate important improvements, many States having abolished their home-studs in favour of the system at present followed by the Civil Veterinary Department.

12. The Instruction Farm at Babugarh was instituted principally with the object of ascertaining whether it could be made self-supporting by using brood-mares in agricultural operations and producing from them a certain number of stock. The system has not proved successful, and it is doubtful whether horses and mares will ever be used to any great extent for agricultural purposes in this country. In other respects, however, the results are satisfactory, for not only have several important experiments in fodder crops been made, but there is a profit on the working of the farm.

13. The Section of the Report devoted to the Bacteriological Laboratory is of much interest; and some of the investigations of the Imperial Bacteriologist, which have been for the most part limited to enquiry into "*surra*", have already proved of value to the Remount Department. Dr. Lingard has worked under considerable difficulties owing to the want of proper accommodation, but arrangements have now been made for the completion of the Laboratory and other necessary buildings at Mukhtesar.

14. Provincial horse-breeding has shown marked progress. The number of stallions maintained shows a satisfactory increase, and more than double as many mares were covered this year as last. The comparatively new system under which horse and pony stallions are maintained by District Boards promises exceedingly well. This system should result in a gradual improvement in the undersized mares which cannot at present be covered by Government stallions. The class of pony-stallion obtained for District Boards appears well suited for the purpose, and the result should in a few years have a marked effect on horse-breeding in India.

15. The treatment of equine diseases is a matter of great importance, particularly in Bombay where the Remount Department purchase so many horses. The Government of India in a recent Resolution (No. 4-45-1, dated 16th March 1896) have made suggestions for the more efficient working of the Glanders and Farcy Act throughout India; and the Local Government have arranged to increase the inspecting agency in the town of Bombay.

16. The Section of the Report dealing with cattle-disease shows that, except in Burma, little practical work has been done in connection with the investigation and prevention of cattle-disease. Proposals are now under the consideration of Local Governments for the organisation of a subordinate civil veterinary establishment, and until this question is settled, but little progress can be expected. The time of the Civil Veterinary Department officers is at present so fully occupied with the supervision of horse-breeding operations that they are unable to devote much attention to this important branch of their duties. Many veterinary dispensaries are however doing excellent work, and treatment of animals at these institutions is becoming more popular, the number of patients treated everywhere showing an increase, and the percentage relieved and cured being higher.

17. Veterinary instruction appears to be progressing satisfactorily. The veterinary colleges and schools fulfil an important function in supplying trained assistants for the subordinate veterinary service. The men sent to these institutions from the Remount Depôts turn out excellent salutris, and the scheme for training farriers at Lahore is already producing good results.

The production of text books, in the vernacular, by teachers at the Lahore Veterinary College, has supplied a real need, as but for the publication of these works no text books would have been available for the instruction of students.

18. The Government of India desire to endorse the tribute paid by the Inspector-General to the officers of the Department for the excellent work done by them during the year under review, and they also wish to acknowledge Veterinary Colonel Queripel's careful administration and the zeal and energy shown by him in the conduct of the important work which has been committed to his charge.

ORDER.—Ordered, that a copy of the foregoing Resolution be forwarded to the Local Governments and Administrations noted in the margin, for information.

The Government of Madras.
" " Bombay.
" " Bengal.
" " North-Western Provinces and Oudh.
" " Punjab.
The Chief Commissioner, Central Provinces.
" " Burma.
" " Ajmere-Merwara.
" Resident, Hyderabad.

Ordered also, that a copy be forwarded to the Foreign Department for favour of communication to the Agents, Governor-General, Rajputana and Baluchistan.

Ordered also, that a copy be forwarded to the Military Department for information and favour of communication to the Director, Army Remount Department, the Commissary-General-in-Chief, and the Adjutant-General in India, for the information of His Excellency the Commander-in-Chief and Officers Commanding Regiments of Native Cavalry.

Ordered also, that a copy be forwarded to the Inspector-General, Civil Veterinary Department, for information.

Ordered also, that a copy be published in the Supplement to the *Gazette of India*.

[True Extract.]

DENZIL IBBETSON,
Offg. Secy. to the Govt. of India.

INVENTIONS and DESIGNS.

Calcutta, the 14th May, 1896.

NOTIFICATIONS.

No. 1279 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 9th May 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 147 of 1896.—Harry Stafford Beyts, merchant and commission agent, residing at 97, Elphinstone Circle, Bombay, for an extract from myrabolams.

No. 148 of 1896.—Harry Stafford Beyts, merchant and commission agent, residing at 97, Elphinstone Circle, Bombay, for an extract from *Turwat* bark.

No. 149 of 1896.—Harry Stafford Beyts, merchant and commission agent, residing at 97, Elphinstone Circle, Bombay, for an extract from *Divi Divi* beans.

No. 150 of 1896.—Harry Stafford Beyts, merchant and commission agent, residing at 97, Elphinstone Circle, Bombay, for an extract from *Rhea* bark.

No. 151 of 1896.—Harry Stafford Beyts, merchant and commission agent, residing at 97, Elphinstone Circle, Bombay, for an extract from *Babul* bark.

No. 152 of 1896.—Anant Baburao Paranjape and Gopinath Janardan Athalye, mechanical engineers, Sholapur, for a self-acting warping machine for handlooms.

No. 153 of 1896.—Bhawani Das, late Secretary, Bijnor Agricultural Society, Bijnor, for a three-roller double squeeze sugarcane pressing machine to be called the "Shahinshah."

No. 154 of 1896.—Sidney Lawrence, engineer, of 159, Queen Street, Melbourne, in the colony of Victoria, Australia, for improvements in mechanism for and mode of marine propulsion.

No. 155 of 1896.—Gaston Ragot, engineer, of 163, Avenue Van Volxem at Forest-Brussels in the kingdom of Belgium, for improvements relating to the production of acetylene gas, and to the utilisation of the same for lighting purposes.

No. 156 of 1896.—John Isaac Thornycroft, engineer, of Church Wharf, Chiswick, in the county of Middlesex, England, for improvements in water-tube boilers.

No. 157 of 1896.—William Thornley, engineer, of Marrickville, in the colony of New South Wales, for an attachment for kerosine lamp burners designed to be used without chimneys.

No. 158 of 1896.—Thomas Henry Bradbury, mechanical engineer, of Johannesberg, in the district of Heidelberg, in the South African Republic, for a new or improved method or process for sharpening rock drills and apparatus employed therein.

No. 159 of 1896.—Adolph Schmidt, of 49, Koelnische Strasse, Cassel, in the German

empire, director of the Aktiengesellschaft für Trebertrocknung, for improvements in the dry distillation of wood, wood waste and like materials and in apparatus therefor.

No. 160 of 1896.—Sidney Pattisson, gentleman, of 20, Edwardes Square, Kensington, county of Middlesex, England, for improvements in saddles for velocipedes.

No. 161 of 1896.—William Henry Coward, engineer, of Hastings Villa, Bexley Road, Erith, in the county of Kent, England, for improvements in crushing and grinding mills.

No. 162 of 1896.—William Henry Coward, engineer, of Hastings Villa, Bexley Road, Erith, in the county of Kent, England, for improvements in apparatus for concentrating, grading or classifying crushed ore and other matters.

No. 163 of 1896.—Vivian Edward DePenning, of the firm of DePenning and DePenning, patent agents of Calcutta, for an automatic punkah-pulling machine.

No. 164 of 1896.—Edward Dwight Kendall, gentleman, of Sowaren, in the county of Middlesex, and state of New Jersey, United States of America, for an improved process for the recovery of gold and silver from solutions.

No. 1280 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the office of the Secretary in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying :—

No. 295 of 1895.—Charles Alfred Reed, a permanent-way inspector, in the service of the East Indian Railway Company, and residing at Jamalpore, in the district of Monghyr, Bengal, India, for an automatic safety distant signal-locking apparatus. (Filed 27th April 1896.)

No. 329 of 1895.—Frank Wright, gas engineer, of No. 21, Old Queen Street, Westminster, in the county of London, for improvements in adjusting gear for coin freed fluid meters. (Filed 30th April 1896).

No. 382 of 1895.—Samuel Cleland Davidson, merchant, of Sirocco engineering works, Belfast, Ireland, for improvements in apparatus for limping or withering tea leaf, or for drying vegetable or other substances. (Filed 30th April 1896.)

No. 33 of 1896.—William Augustus Bailey, a lieutenant in Her Majesty's Indian Staff Corps, and at present cantonment magistrate, Cawnpore, for improvements in and relating to portable and other latrines. (Filed 30th April 1896.)

No. 1281 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid

for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 83 of 1889.—George Bakewell Dewhurst, of the firm of Messieurs G. and R. Dewhurst, of Great Marlborough Street, Manchester, county of Lancaster, England, manufacturers and merchants, for improvements in apparatus for marking folded piece goods with trade marks and other marks and devices, and for printing and colouring such marks and devices at a single operation. (From 21st May 1896 to 20th May 1897.)

No. 148 of 1889.—Charles Joseph Van Depoele, electrician, residing at No. 57, Center Street, in the city of Lynn, county of Essex and state of Massachusetts, one of the United States of America, for improvements in carbon contacts or commutator-brushes for use with dynamo-electric generators and electro-dynamic motors. (From 10th July 1896 to 9th July 1897.)

No. 254 of 1889.—Sandford James Kilby, late Superintendent, Customs Preventive Service and Salt Department, Calcutta, for a combined weighing stand platform and hopper for facilitating the weighing and discharging of salt and other commodities. (From 28th May 1896 to 27th May 1897.)

No. 264 of 1889.—Ambrose Shere Massey, civil and mechanical engineer and partner in the Napier Works, Madras, for the construction of a share point or cap for ploughshares. (From 7th May 1896 to 6th May 1897.)

No. 274 of 1889.—Charles Swindell, bank cashier, of No. 12, Kenwood Road, Sheffield, in the county of York, England, for improvements in chimney or ventilating caps. (From 23rd May 1896 to 22nd May 1897.)

No. 334 of 1891.—Charles Arthur Marchant, overseer, Public Works Department, for an improved style of dredger. (From 15th June 1896 to 14th June 1897.)

No. 142 of 1892.—Henry Parkes, chemist, of 237, Friern Road, Dulwich, in the county of Surrey, England, and John Cunninghame Montgomerie, manufacturer, of the "Water of Ayr" and "Tam O' Shanter" Hone Works, Dalmore, Stair, in the county of Ayr, Scotland, for improvements in the extraction of gold and silver from ores or compounds containing the same. (From 19th August 1896 to 18th August 1897.)

No. 166 of 1892.—James Gresham, director of Gresham and Craven, Limited, of Craven Iron Works, Salford, Manchester, in the county of Lancaster, England, engineers, for improvements in injectors and in their application to locomotives. (From 13th March 1897 to 12th March 1898.)

No. 178 of 1892.—James Gresham, director of Gresham and Craven, Limited, of Craven Iron Works, Salford, Manchester, in the county of Lancaster, England, engineers, for improvements in and relating to apparatus for applying sand to locomotive driving wheels. (From 13th March 1897 to 12th March 1898.)

No. 1282 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-

section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased :—

No. 198 of 1891.—Mr. E. C. Marc's invention for improvements in machinery for obtaining fibrous material from ramie and other plants. (Specification filed 8th February 1892.)

No. 221 of 1891.—Mr. R. G. Westphalen's invention for improvements in the manufacture of metallized plates or roofing-fabric of asbestos or other fibrous material. (Specification filed 5th February 1892.

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of ₹50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888, should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,

Offg. Secy. under the Inventions and Designs Act, 1888.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail steamer, full allowance being made for the Steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any Steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a Steamer not belonging to one of the regular lines.

N.B.—The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late-fee at 7 P.M. precisely; after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up at 7-30 P.M.

On the day of despatch of the Mail for the Australasian Colonies and the Far East *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8 P.M., and late letters and papers fully prepaid will be received up to 8-30 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 7 P.M., and late letters and papers will be received up to 7-30 P.M. for despatch by any Foreign Mails despatched the same night. The late-fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS.
Presidency Postmaster, Calcutta.

POSTAL NOTICE.

Commencing from Friday, the 22nd May, 1896, and until further notice, the Foreign Mail Steamer will leave Bombay every Friday, the Mails closing in Calcutta every Tuesday. The last Wednesday Mail closes at the General Post Office on the 13th May current. The first Tuesday Mail will close on the 19th May, 1896.

JOHN OWENS,
Presidency Postmaster.

CALCUTTA GENERAL POST OFFICE,
The 15th May, 1896.

CEMETERY NOTICE.

I hereby give notification in accordance with Revised Rules for Cemeteries, Home Department Notification, Ecclesiastical, No. 103, dated the 20th June, 1885, Rule XIX, that the undermentioned tombs in St. Mary's Cemetery, Fort Saint George, Madras, are in a ruinous condition and that if no person will undertake to repair them within three months from this date, they will be made level with the ground and slabs contained will be placed over the grave in simple masonry, or be inserted in the wall of the Cemetry:—

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin, R18, or, post free, R18-12.

½ „ R 9, „ R9-8.

¼ „ R4-8, „ R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮৲ বা ডাকমাশুল বিনা ১৮৲০

½ আধ „ „ ৯ „ ৯।০

¼ সিকি „ „ ৪৷৷৶ „ ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার সার্টীফীকেট দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ সিবপুরের বোটানিক বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

	Without postage.	With postage.
	R a. p.	R a. p.
For the complete Series, *including postage* . . .		R22-8
For the Calcutta Series	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.			For mofussil.		
	R	a.	p.	R	a.	p.
For the Calcutta Series; per copy	0	8	9	0	10	3
,, each of the Madras, Bombay, and Allahabad Series; per copy	0	5	3	0	5	9
,, the Calcutta Series. For the year	7	2	0	8	6	3
,, each of the Madras, Bombay, and Allahabad Series. For the year	4	4	6	4	11	3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue	R 20	R 14	R 9
,, three issues	,, 55	,, 36	,, 24
,, six ,,	,, 100	,, 68	,, 45
,, nine ,,	,, 145	,, 96	,, 64
,, twelve ,,	,, 180	,, 120	,, 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.			With postage.		
	R	a.	p.	R	a.	p.
Bengal Law Reports, for one year	20	0	0	22	8	0
Single copies R2 per copy.						
Full Bench Rulings, Parts I and II	20	0	0	22	8	0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

CODE OF REGULATIONS FOR EUROPEAN SCHOOLS IN THE BENGAL PRESIDENCY.

No. $\frac{3 \text{ Edn.}}{141-54}$.

Extract from the Proceedings of the Government of India in the Home Department (Education),—under date, Simla, the 8th May 1896.

READ—

Home Department Resolutions No. $\frac{1 \text{ Education}}{50-69}$, dated the 7th February 1895, and No. $\frac{4 \text{ Education}}{113-117}$, dated the 19th February 1895, appointing a Committee to revise the Code of Regulations for European Schools in the Bengal Presidency.

Read also—

The Report of the Committee referred to above, dated the 22nd October 1895.
Further report of the Committee, dated the 17th January 1896.

RESOLUTION.

The Code of Regulations for European Schools in the Bengal Presidency, which was drafted by a Committee appointed by the Government of India in 1881, was brought partially into operation in 1883, and, after it had been further

considered by Local Governments and Administrations and by a conference of Educational Officers, was approved by the Governor General in Council in 1885. In 1888 it was decided (Home Department Resolution No. $\frac{\text{to Education}}{386-398}$, dated 21st September 1888) to defer the further revision of the Code for five years, during which it might be worked with any subsidiary Provincial rules which Local Governments might consider necessary to introduce on their own responsibility. In the Home Department Resolution of the 7th February 1895, cited in the preamble, it was observed that, as more than six years had elapsed since the date of the Resolution of 1888, the Government of India were of opinion that the results of the experience gained in the different Provinces should be compared and turned to account. The Governor General in Council accordingly appointed a Committee, composed of the gentlemen named in the margin, to consider what amendments were necessary in the Code. The Government of India indicated that the most important matters which had been brought to their notice in connection with the Code as requiring consideration were the alleged unsuitability of the uniform course of studies prescribed by the Code; the need, which the inquiries of the Calcutta Pauperism Committee and Sub-Committees tended to establish, for importing into the course more recognition of industrial training; the extension of the principle of making grants-in-aid on a system independent of the results of the examination of individual scholars; and the questions of the grant of teachers' certificates and the training of pupil teachers. The Committee were, however, invited to make recommendations upon any other matter in regard to which they considered that the Code stood in need of revision.

PRESIDENT.

Sir A. Croft, K.C.I.E., M.A., Director of Public Instruction, Bengal.

MEMBERS.

The Venerable the Archdeacon of Lucknow.
W. N. Boutflower, Esq., B.A., Inspector of European Schools, North-Western Provinces and Oudh.
F. Haden Cope, Esq., M.A., Inspector of Schools, Punjab.
H. A. Bamford, Esq., Inspector of European Schools, Bengal.
R. Carter, Esq., B.A., Rector of St. Paul's School, Darjeeling.
The Reverend Brother Fabian, Director of the Society of Christian Brothers.
E. Marsden, Esq., B.A., Inspector of Schools, Coorg.

2. The Report of the Committee and the revised Code drafted by them were received by the Government of India in October last, and a subsidiary report dealing with the chapter of the Code relating to Training Colleges was forwarded in the middle of January. The Report with the revised Code has been very thoughtfully and thoroughly drawn up, and the thanks of the Governor General in Council are due to Sir A. Croft and the other members of the Committee for the care and attention which they have devoted to the work entrusted to their charge. Except in regard to certain details which are noticed later on, His Excellency in Council approves and accepts the conclusions of the Committee on the matters discussed by them. The chief questions of a general nature which have been dealt with in the Report, and provided for in the Code, are the discontinuance of aid to "private-adventure" schools; the substitution for the existing system, under which grants are determined by the results of the examination of individual scholars, of a system under which grants will be based on the attendance in the various classes in the three years preceding each determination of the grant; the recognition, for grant purposes, of classes in the high sections of schools preparing for various public examinations other than the High School examination; the provision to be made for the better education of the poor; and the improvement of the teaching agency. These subjects have all, in the opinion of the Government of India, been ably and adequately treated, and the Governor General in Council approves the principles regarding them adopted by the Committee.

3. It does not appear to the Government of India to be necessary to circulate the revised Code for the opinion of Local Governments and Administrations before directing its introduction. The alterations made in existing rules will have the effect in nearly all cases of extending the discretion of Local Governments: and in determining the personnel of the Committee, the Government of India had endeavoured to select, in communication with the Local Governments, gentlemen experienced in the working of the rules in the various Provinces and acquainted with the requirements of the community to which the Code relates. It is undesirable to delay the introduction of the reforms which have been

suggested, and His Excellency in Council accordingly desires that, subject to the following remarks, the revised Code of Regulations for European Schools in the Bengal Presidency (a copy of which, together with the Report of the Committee, is appended to this Resolution) may now be provisionally adopted by the Local Governments and Administrations concerned.

*Article 3.**—The term European was defined in the old Code to mean, for the purposes of the Code, any person of European descent, pure or mixed, who retains European habits and modes of life. The Committee have left the definition unchanged, as they were not agreed as to the advisability of modifying it, but in paragraph 50 of their Report they have suggested, in view of a case of hardship which came to their notice in Calcutta, that Local Governments should be permitted, if they desire to do so, to admit Native Christians to the benefits of the Code under certain conditions. After full consideration the Government of India are not prepared to act upon this suggestion, which would, in their opinion, involve a serious departure from the principles on which aid to the education of Europeans and Eurasians was based. It would be impossible to follow the precedent thus set of allowing a special indulgence in any other case in which Natives who had adopted a particular religion might object to attending the ordinary schools. Cases of hardship such as that cited must, if the area covered by the Code be considered, be exceedingly few, and on the whole the Governor General in Council is decidedly of opinion that the Code should be restricted to its original exclusive purpose.

Article 7 (h).—The Government of India accept the conclusion of the Committee, embodied in article 7 (*h*), that no grants shall in future be made to schools conducted for private profit, but this provision will not apply to any such schools already receiving a grant under the Code so long as they remain in possession of their present proprietors.

Article 14 (d).—The existing article 14 (*c*) requires that the studies shall be conducted in accordance with a time-table, of which a copy must be submitted to the Education Department. The Committee enlarged the scope of the rule so as to require that school time-tables must be approved by the Education Department in respect of the subjects of study as well as in respect of hours, and they explained (paragraph 50 of their Report) that they had adopted this change on the ground that it is desirable to give the Inspector of Schools power to prohibit the introduction into the school course of any subjects which the staff is not competent to teach. It appears, however, to the Government of India that it is unnecessary to give to the Inspector so wide a power as this. Where, as will no doubt generally be the case, the system of payment-by-results has been superseded, there will, it seems to the Governor General in Council, be little danger of schools introducing into their course subjects which the staff is not competent to teach, and moreover, as the Committee point out, the influence of the periodical examinations will regulate the amount of attention paid to various subjects. The Government of India have accordingly removed the addition made by the Committee, and the provisions of the article will remain similar to those in the existing Code. The object which the Committee had in view will, it seems to the Government of India, be sufficiently met by the rule contained in article 22 of the revised Code.

Article 19.—This article leaves the determination of the question whether schools shall follow the course indicated in Schedule I-A. or Schedule I-B. to the Education Department. In paragraph 18 of their Report, however, the Committee recommend that the decision should rest with the Local Government, and that, the decision having been made, it should be applied to all the schools of the Province. The Government of India approve the view that the decision of the question in each Province should rest with the Local Government, and Article 19 has been modified in accordance with this view. The article lays down that the courses prescribed in Schedule I may be modified by the Local Government: and on this understanding Schedules I-A. and I-B. in the provisional form drafted by the Committee are accepted by the Government of India.

* [The numbering of the articles is that in the Code as revised by the Committee.]

Articles 27—34.—The conclusion of the Committee is that the system should be generally adopted under which grants to schools declared efficient are given almost exclusively on the attendance and classification of the scholars and are not determined by individual examination. This is the part of their proposals, so much the most important and significant, that it may be well briefly to reproduce in this Resolution the reasons for the change. To use their own words, the Committee condemn the system of payment-by-results on the grounds "that it discouraged the attainment of a high degree of excellence in scholarship, that it ignored the work done by teachers for dull and backward pupils, and that it put forward mediocrity in as large a number of subjects as possible as the highest goal of the teachers' efforts." The system, which the Committee recommend in its place, has been successfully tried in Bengal, and they advise its general adoption for these reasons :—

(1) that the finances of schools are no longer liable to be disorganised by fluctuation in the grant resulting from the chances of the annual examination, but that its amount can be anticipated by the Managers from year to year with something like certainty; (2) that the amount of grant is determined by general considerations of the size and proficiency of each school, and therefore bears some fair proportion to its utility and cost; (3) that it leaves the teachers free from anxiety as to the results of a particular examination, and enables them to cultivate the intelligence of the scholars, as well as their memory, by steady adherence throughout the year to those methods of instruction which experience and authority have pronounced to be the best; (4) that it allows fuller scope than is possible under a system of annual examinations by fixed standards, for individual teachers to vary the methods or the subjects of instruction according to the capacity of the scholars and to push forward promising pupils along lines in which they show ability; (5) that it encourages attention being paid to dull and backward scholars, since teachers can now afford to work slowly and thoroughly, making sure of each step before attempting the next; (6) that in Provinces where the Inspector's other duties leave him sufficient time for the purpose, it enables him to substitute frequent and friendly supervision for a single annual examination, thus allowing him to gain a much clearer insight into the condition of each school, and to apply criticism, advice and example to the removal of defects.

The Government of India have given their careful consideration to these arguments, and to all the objections that have been adduced against the change. In their judgment the Committee have established their case. Their arguments are weighty, and the soundness of those arguments has been proved by the experience in Bengal. With the reservation contained in article 34 to meet the case of schools which, in the opinion of the Local Government, should not be brought under this system of grant-in-aid, this change is therefore heartily approved by the Government of India.

Article 38.—The Government of India agree in the view expressed by the Committee in paragraph 30 of their Report regarding this article that poor schools should not be excluded from the operation of the rule that the grant earned under Section II of Chapter II of the Code should, if it exceeds the income of the school from all other sources, be reduced by the amount of such excess. There is, however, in article 33 a provision which will enable a Local Government to aid poor schools by special grants, and these grants are not to be taken into account in making reductions under article 38. The Governor General in Council feels assured that Local Governments will be careful to secure that poor schools which deserve encouragement shall receive it by means of such special grants.

Articles 51—57.—The Committee observe (paragraph 33 of their Report) that the existing rules regarding teachers' certificates, which require that the head teacher of every school and every assistant teacher in charge of a class above Standard IV shall be certificated, do not in practice ensure the holders of certificates giving satisfactory proof of their capacity as teachers. They have, therefore, recommended a system of granting letters of recognition, which are in effect simply licenses to teach, in the first place, and subsequently issuing proficiency certificates to those who qualify for them under article 68. The Governor General in Council feels some doubt whether the recommendations of the Committee will by themselves effect the improvement desired, and the matter will require further consideration hereafter by Local Governments in connection with the subject of Training Colleges; but His Excellency in Council has no objection to the system proposed by the Committee being introduced

provisionally at present. It appears to the Government of India that the condition stated in the form of the "Letter of Recognition for Teachers" (Schedule III) drafted by the Committee, that the letter may at any time be cancelled at the discretion of the Inspector, would not be fair to the teacher and is hardly consonant with article 57 which authorizes "the Department" to cease to recognize a teacher for incompetency. The Government of India consider also that, in case of alleged misconduct, a recognized teacher ought to have the opportunity of defending himself, which is given to a certificated teacher under article 63 of the existing Code. The last sentence in the form of letter of recognition, as drafted by the Committee, has accordingly been struck out, and words providing that before the Department ceases to recognize a teacher owing to distinct incompetence he shall have an opportunity of giving an explanation have been added to article 57.

4. The Committee have submitted a separate report upon the question of the Training Colleges. The chapter on Training Colleges in the existing Code has remained a dead letter, no such College having ever come into existence. The members of the Committee had not come fully prepared to advise on the subject of a Training College, and circumstances prevented their bestowing on the matter as much deliberation as it required. Eventually, they were not able to come to an agreement and the result was a divided report upon the subject. The delegates from Bengal have supported a scheme for a Practising School, at which the actual art of tuition, and that alone, would be taught, while other members advocate measures for forming a College, at considerable expense, where teachers would undergo, in addition, for a comparatively prolonged period, a continued education and a general training in habits of study, observation and reasoning. Under both schemes the teaching institution would be undenominational but, inasmuch as practically all European Schools in India are maintained by denominational bodies, who may require that their teachers should have received religious instruction of a particular character, it would probably be necessary to attach to the training institutions boarding establishments or hostels which would be under the private management of the different denominations. There is no more important matter connected with European education in India than the improvement of the teachers employed in it, as has indeed been admitted in the scheme of vernacular instruction by the institution of normal schools. But, in view of the fact that the question was not fully discussed by the Committee, and that the members of the Committee who represented Local Governments were not all instructed as to the course of action they should take in discussing it, the Governor General in Council has determined not to pass orders upon this portion of the Report until he has received and considered the opinions of Local Governments and Administrations upon it. The scheme for a Training College to consist of a Practising School having a staff of teachers sufficient in number and fully competent to carry on both the ordinary work of the school and the training of students, which was put forward by Sir A. Croft and Mr. Bamford and is supported by Mr. Carter and Brother Fabian, is at least cheap and tentative. It may, however, the Government of India fear, be found unsuitable for some Provinces, and they will be glad to learn what the views of the Local Governments and Administrations are as to the relative merits of this scheme and of the scheme which has the support of the Archdeacon of Lucknow, Mr. Boutflower, and Mr. Haden Cope. The Governor General in Council will be glad to learn in particular whether, in the opinion of Local Governments and Administrations, an institution of this nature should be maintained by the Government, the bodies interested in European education being responsible for the maintenance of the boarding establishments attached to it, or whether it might be feasible to devise a scheme under which the management of the institution might be left entirely in the hands of the different bodies interested in European education. Before advising His Excellency in Council in the matter Local Governments and Administrations will no doubt communicate with the leaders of the different denominational bodies and ascertain their attitude to the maintenance of a common institution, and the conditions under which they would subscribe to it. While, however, the Governor General in Council is unable to dispose of this question without further

communication with Local Governments and Administrations, it appears to His Excellency in Council that the unanimity of opinion of the four members of the Committee, who have had experience of European education in Bengal, in favour of the scheme put forward by Sir A. Croft and Mr. Bamford, and the special circumstances of Bengal, where the higher education of Europeans is believed to be in a more satisfactory condition than in the other Provinces of Northern India, suggest that an attempt might be made to deal with the matter independently in that Province. The Governor General in Council anticipates that it might be possible to find in Bengal a school in which the experiment could be tried. His Excellency in Council would, therefore, be glad if His Honour the Lieutenant-Governor would consider whether it would be possible to deal with the question separately as regards Bengal and to carry out in that Province experimentally the scheme of Sir A. Croft and Mr. Bamford.

Chapter VIII, Articles 98—106.—The Government of India approve generally the provisions of this chapter, but they are of opinion that it is unnecessary to publish in the Government Gazette the names of children who are successful at the Primary School and Middle School examinations. The words "and gazetted" have therefore been omitted from the first paragraph of article 103.

Chapter IX.—The Government of India approve the provision for high scholarships which is made in this chapter. The Committee propose, however, in paragraph 49 of their Report, that a certain proportion of the scholarships now awarded on the results of the Entrance examination should be reserved for European candidates passing the High School examination, the remaining scholarships for the Entrance examination being retained for Native candidates only. Though it is desirable to encourage the adoption of the High School course, the Government of India do not think that it would be expedient to find the money for scholarships by discontinuing a certain number of Entrance scholarships. Such a measure might be misunderstood as involving the limitation of scholarships for Natives in order to provide for Europeans, while the exclusion of Europeans from all scholarships awarded on the results of the Entrance examination appears also undesirable. In order to provide for High School scholarships, therefore, Local Governments and Administrations should either redistribute the grant for scholarships to European Schools so as to give a portion for High School studies, or specially increase the grant for the purpose.

5. There are certain other matters noticed by the Committee, which are not contained in the articles of the Code, to which it is necessary to refer.

In paragraph 21 of their Report, the Committee recommend that steps should be taken to secure, as far as possible, uniformity in the conditions of admission to the different Departments of the public service by prescribing a common examination in all subjects except those specially required for particular Departments. The present system is, the Government of India have little doubt, detrimental to the public service and the inconveniences to educational institutions, resulting from it, which the Committee bring to notice, also make it, in the opinion of the Governor General in Council, very desirable to seriously consider whether some form of relief cannot be devised. In the United Kingdom an examination passed at the schools themselves is accepted as sufficient to render a separate examination, such for instance as the preliminary examination at some of the Universities, unnecessary. It seems to the Government of India possible that the difficulties of the schools might be materially lessened if the proficiency in general education of candidates for the public service could be tested in some such way—leaving the special subjects, proficiency in which is demanded by departmental considerations, for a separate examination. Before, however, taking any steps (such as the suggested appointment of a Committee) with a view to the amalgamation of the several examinations for admission to Imperial and Provincial Departments, the Government of India will be glad if Local Governments and Administrations will consider paragraph 21 of the Committee's Report and intimate in a separate communication how far they would be prepared to give effect to the proposal in regard to the local examinations held under their orders and what system they would adopt in order to do so.

6. The Government of India approve the recommendations of the Committee in paragraphs 23—26 of their Report, the object of which is to increase the facilities open to poor European and Eurasian children for the acquisition of a good general education, and also to give such a character to their education as will more fully fit them on leaving school to earn a livelihood in various industrial occupations. The proposals are excellent, but, as money will be required to give effect to them, it is for Local Governments and Administrations to ascertain how far it can be found by private enterprise and liberality or supplied by Government aid. There will probably also be difficulty for some time to come in securing competent teachers for technical instruction. The Government of India, however, commend the proposals of the Committee to the closest attention of Local Governments. In doing so the Governor General in Council desires to express his emphatic concurrence with the views expressed by the Committee as to the object to which technical instruction should be directed. It is undoubtedly of advantage to a boy to learn the use of the carpenter's or the blacksmith's tools, but it is essential, in the opinion of His Excellency in Council, that it should be understood firstly that a system of training in the use of such tools is not in substitution for, but is only supplementary to, the general training of the mental faculties, and that it must therefore not displace any essential portion of the ordinary educational course, and secondly that such instruction is not the teaching of a trade. The Government of India are entirely in accord with the Committee in the opinions which they have expressed that technical training given at school cannot, and ought not, to be intended to fit boys to earn a living in the calling, in the rudiments of which they are instructed, and anything that might tend to encourage the idea that special trades could be taught at school would, in the opinion of the Government of India, conflict with what they have laid down above as the first essential of a system of technical training, and be fatally at variance with a wider and truer conception of technical science and education.

7. Paragraph 27 of the Report deals with the affiliation of industrial classes attached to European Schools to a higher institution of a technical kind. The Committee propose that these classes should be affiliated to the Apprentice Department of the Sibpur Engineering College in the same way that technical schools in Bengal are affiliated. This proposal will doubtless receive full consideration from the Government of Bengal. It will not apparently cover the case of schools for Europeans and Eurasians in other Provinces: but the Government of India will be glad if other Local Governments and Administrations will consider whether they cannot also arrange that similar classes should be affiliated to a higher technical institution.

8. Finally, the Government of India concur in the view expressed by the Committee in paragraph 31 of their Report that, for the reasons there explained, the introduction in India of a system of compulsory education of the children of European and Eurasian parents need not at present be considered.

ORDER.—Ordered, that a copy of this Resolution, together with a copy of the Committee's Reports and of the revised Code of Regulations for European Schools in the Bengal Presidency, be forwarded to all Local Governments and Administrations in the Bengal Presidency for information and guidance; to the Governments of Madras and Bombay and the Chief Commissioner of Burma for information; to the Public Works Department for information; and the Foreign Department for information and communication to the Chief Commissioner of Ajmere and the Agent to the Governor General in Central India.

Ordered also, that the papers referred to above be published in the Supplement to the *Gazette of India*.

[True Extract.]

J. P. HEWETT,
Secretary to the Government of India.

Report of the Committee appointed to revise the Code of Regulations for European Schools in Bengal.

REPORT OF THE COMMITTEE APPOINTED TO REVISE THE CODE OF REGULATIONS FOR EUROPEAN SCHOOLS IN BENGAL.

The Committee appointed under the Resolutions of the Government of India in the Home Department, No. $\frac{2}{60-69}$, dated the 7th February 1895, and No. $\frac{4}{103-107}$, dated the 19th idem, have the honour to submit the following Report.

2. **Number of Meetings.**—We held sixteen meetings; beginning our work on the 20th February 1895, and sitting daily until the 9th March, when we separated. The Minutes of each day's proceedings are appended to this Report. We also subjoin, in parallel columns, the articles of the existing Code, and those of a Revised Code drawn up so as to embody our several recommendations; corresponding articles being placed opposite one another.

3. **Course of Proceedings.**—The order of our proceedings was as follows: We began with the consideration of certain general questions which had been raised in the correspondence laid before us, or were brought forward in the course of our discussions. After each of these general topics had been fully discussed, and the principles relating to them expressed in resolutions, articles were drawn up embodying our conclusions. Lastly, all the remaining articles of the Code were considered in detail, and such changes as were deemed to be necessary were introduced.

The general questions above referred to were the following:—

A.—The discontinuance of aid to 'private-adventure' schools (Chapter I of the Revised Code).

B.—The substitution for the system in force under the existing Code, under which maintenance grants to schools are determined by the results of the examination of individual scholars, of the system recently adopted in Lower Bengal, under which grants are determined, without examination, by the attendance and the classification of scholars (Chapter II).

C.—The recognition, for grant purposes, of classes in the High Sections of Schools, preparing for various public examinations other than the High School Examination; and, connected with this, the question of the substitution, as far as possible, of a common examination for the several examinations now held for admission to the various departments of the Public Service (Chapter II).

D.—The provision to be made for the better education of the poor; including, as connected questions, (1) the promotion of technical instruction, (2) compulsory education (Chapter II).

E.—The introduction into the Code of regulations for the transfer of scholars from one school to another (Chapter IV).

F.—The substitution, in place of the certificates of various grades now granted to teachers, of a common 'Letter of Recognition' to be issued to all teachers judged to be deserving of such recognition

(Chapter V).

G.—The award of special certificates to all teachers who prove themselves to be thoroughly proficient in the art of teaching (Chapter V).

H.—The revision of the rules for Pupil-Teachers (Chapter V).

I.—The revision of the rules for Training Colleges (Chapter VI).

K.—The revision of the rules for Building Grants (Chapter VII).

L.—The best means of encouraging the more general adoption of the High School Course (Chapter VIII).

The foregoing subjects have been arranged, for the sake of clearness, in the order in which they stand in our Revised Code, though this was not the order in which they were discussed. In the subsequent paragraphs of this Report that deal with each topic, a reference will be made to the day's proceedings in which the subject was considered. (Thus 'XII, 2' will mean that a reference to the subject will be found in the second paragraph of the twelfth day's proceedings.)

4. **Scope of the Report.**—The scope of the present Report corresponds to the order of proceedings stated above. We begin with a discussion of the general questions involved, and a statement of the articles in which our conclusions are embodied; and then proceed to explain the reasons for the changes we have proposed in the remaining articles of the Code.

5. **A.—Private-Adventure Schools.**—The arguments for and against the recognition of schools of this class are fully stated in paragraphs 14—19 of the Report of the Committee appointed in 1881 to draft the European Code. Though a majority recommended that such schools should not be recognised in the Code, the former Committee were not unanimous on the point, and the Government of India decided in favour of their recognition, adding that "the Government is bound to avail itself at present of every educational agency, that may offer itself, provided the education afforded by it is satisfactory." Having regard to the large extension and systematic development of European education that has been brought about by the introduction of the Code, and in view of the fact that there is now no lack of schools under responsible managers, we are unanimously of opinion that the recognition by Government of any private-adventure schools that may hereafter come into existence will neither be necessary, nor, having regard to the admitted defects of such schools, desirable. The tendency in such schools is to begrudge expenditure upon assistant teachers, school buildings, apparatus, etc., which may be necessary for carrying on the school properly, in order to make as much profit as possible Again, it is impossible to remove the head teacher, however unsatisfactory he may be, when he is also proprietor of the school, as is usually the case. We have therefore added (Article 7, *h*), to the list of schools ineligible for grants, "*any school which is conducted for private profit, or which,*" though nominally under a committee of management, "*is farmed out by the managers to the teachers.*" At the same time, we have safeguarded existing interests by providing, in a note to the same article, that private-adventure schools now receiving grants under the Code may continue to receive them, though this concession will not be continued in the event of such schools passing into the hands of new proprietors. (VI, 2).

The number of schools affected by these provisions is hardly more than half a dozen in the whole Presidency of Bengal.

6. **B.—Methods of determining Grants. The 'Results' System.**—In accordance with the explicit instructions of the Government of India, the method

of 'payment by results' was that adopted by the previous Committee for the determination of grants to schools (paragraphs 9 and 21 of their report). This system was then, and had been from the beginning, a characteristic feature of the English 'Revised Code.' But after a time, and with the growth of experience, complaints and objections against the results-system began to be heard both in England and in India. Though it was allowed to have imparted a much-needed stimulus to schools of an inferior class, it was declared to be radically bad, alike for scholars and for teachers. The work of the school had to be done, not so much with the object of imparting a sound education, as with that of making a good show on the examination-day by careful study of the questions which the Inspector was likely to set; in other words, the steady cultivation of the intelligence was neglected in favour of inferior methods, adapted to secure the ready production of answers to questions of a certain style. The system, again, allowed no credit for slow or backward scholars, who, though they could not succeed in passing, nevertheless took up in good schools a large share of the teacher's time, or else in bad schools were neglected. Further, the annual examination was necessarily very limited in its range, and the test applied was therefore such as the whole class, dull and clever boys alike, could be expected to satisfy; and thus mediocrity was encouraged. The teachers, knowing how much depended on the chances of the examination, were harassed by anxiety as to the result; and when the time of the Inspector's visit approached, the regular and orderly instruction of the scholars, on sound and accepted methods, gave place in many cases to a period of feverish haste in which they underwent the final cramming for the examination. "The Code," it was declared by a witness before the Royal Commission of 1887, "drives the teacher, and the teacher has in turn to drive the boys;" and the pace was not consistent with healthy progress. "Hurry and worry," in the words of an experienced Indian schoolmaster, were "the watch words of the present system." In short, the Code was condemned because it forced all the teaching into one groove; because it destroyed, or at any rate unduly checked, individuality and variety in the teaching; and above all because of the over-pressure it tended to create beyond the powers of ordinary boys.

7. **System of Class-Examination.**—Meanwhile the Government of India had approached the question from another side. Much time, they pointed out in May 1886, was lost in the individual examination of scholars—a method in no way needed to determine whether a school was efficient; and the Local Governments were urged to consider the question of replacing individual by class examinations. Under the latter system, it was considered, the proficiency of a class as a whole, and the character and value of the methods by which it had been taught, could be ascertained by the Inspector, not only with equal certainty, but in a much shorter time and with much less expenditure of labour than the existing system required. The saving of time that would thus result might also make it possible to administer the Code efficiently with a reduced inspecting staff, and thus economy would be secured. The question was discussed by the Conference of Inspectors which met at Mussoorie in May 1887. While admitting that the time of the Inspectors would be economised by the proposed arrangement, they were of opinion that "the method of collective examination fails to attain the most important object of inspection, the improvement of the teaching and the gradual raising of the standard of instruction. A

careful individual examination of the scholars is a valuable lesson to the teachers, pointing out the defects in the method of teaching, and showing how to remedy them,"—a conclusion which is at variance with our own experience. They also laid stress on the high value attached by parents to the "scholars' registers"—an integral part of the system of individual examination; and this was held to be a bar to the introduction of a system under which those records of the progress of individual scholars could no longer be issued.

The Government of India, however, were not fully satisfied with these reasons, though admitting their general force. In the Resolution of the 13th August 1886, they pointed out that "the general retention of this [the existing] system must lead to delay in the completion of the examination, to extreme variations in the commencement of the period known as the school year, and possibly to a demand for increased inspecting agency, and therefore to increased expenditure." They therefore directed that the system of collective examination should be given a trial in one or two of the less important subjects in selected schools.

8. **System of Fixed Grants in Bengal.**—A departure from the method of individual examination was at length made in the Lower Provinces by the selection of a few schools, whose permanent character was established, for the application of the system of fixed grants. The grant made to each school was equal to the average annual grant earned during the three preceding years, and it was sanctioned for a term of five years, subject to revision at the close of that period. The annual grant was also made conditional upon the Inspector's certifying to the continued efficiency of the school. Any school thus placed on the special list might, with the consent of the Department, present all its scholars for examination at the close of the school year. The results of the examination of each scholar would, in such a case, be communicated to the Managers, but would not be taken into consideration by the Inspector when reporting on the efficiency of the school; nor would they affect the grant. These provisions were embodied in the Bengal Code as "revised Article 33."

9. **Success of the System.**—The results, as regards the five schools placed on the special list, were altogether successful. It was reported to the Government of Bengal in 1893:—"Of the five schools to which the new system has already been applied, two were highly efficient when they were admitted to the special list; two others, although not so good, were decidedly above the average in merit; the fifth was, and had been ever since the introduction of the Code, a very inferior school. Since the change, the two excellent schools have fully maintained their efficiency; the next two have improved, and are making very satisfactory progress; while the last of the five has completely changed in character, and is now doing very good work. The teachers in all the five schools have expressed their gratitude for the relief from constant anxiety about the grant which the new system has bestowed, and their sense of an increased power of doing good work consequent, partly upon this relief, partly upon the change in the style of examination, and partly upon the freedom which they are now allowed to exercise in the classification of the scholars."

10. **Proposals for Extension of the System.**—The success of the new system, thus partially introduced, was therefore such as to encourage the

Education Department in Bengal to press for its extension. A further argument was adduced in support of the proposal. This was based on the difficulty that had been found to exist in working two systems side by side; one in which scholars were individually examined by the Inspector for passes in successive standards, and their progress recorded year by year in the "scholars' registers"; the other, in which passes and scholars' registers no longer found a place. The inconvenience of this double system was forcibly pointed out in a report, dated February 1893, by our colleague, Mr. H. A. Bamford, Inspector of European Schools in Bengal. We quote at length some paragraphs of this Report, because the arguments therein adduced, regarding the proper value to be attached to the system of individual examination, seem to us to apply with equal force to European education in other Provinces of India. The report runs as follows:—

6. Notwithstanding these beneficial effects, however, the non-individual character of the examination has to some extent placed the fixed-grant schools at a disadvantage when compared with those in which individual examination is retained. Frequent complaints are received from the parents of scholars attending the special-list schools that their children are now no longer able to earn the much-coveted pass; and these complaints are often accompanied by threats of withdrawal, sometimes by the actual fact.

7. This results from the very exaggerated notions which prevail outside the schools concerning the value of the tests under the old style of examination, and which the regulations of the existing Code largely tend to foster. The individual examinations are regarded as satisfactory tests of progress; whereas they are, in reality, of far too meagre a character for that purpose. They are necessarily brief, and therefore test only a very small portion of the year's work; they must be uniform in difficulty and final (*i.e.*, no second chance can be given if a scholar fails in any subject), because the results are used for comparison and as a basis for the calculation of the grants; and they therefore consist merely of trials whether certain definite questions can be answered, instead of being investigations into the quality and extent of the whole year's work. These circumstances in their turn limit the scope of the examinations to facts which the whole class may reasonably be expected to know, and to processes which every child in the class may be reasonably expected to accomplish; since the inclusion of anything beyond would, in such a brief examination, make "passing" almost entirely a matter of chance, in the best and in inferior schools alike. The examinations being of such a paltry character, there could be no greater encouragement to sham and superficial teaching than the fictitious value commonly associated with them in the minds of the parents; for the indisputably readiest means of obtaining these passes is by special coaching having that end solely in view, rather than by following sound educational methods. Evidence of this is found in the fact that the very high percentages of passes are not generally obtained by the schools which are doing the best work, but by those wherein the art of cramming has been cultivated to the highest perfection.

8. It is clear, therefore, that these individual examinations neither give a stimulus to sound education, nor afford a good test of what is actually being done. Taken in combination with "payment by results," however, the joint influence might perhaps be expected to be at least certain to raise the very bad schools to a moderate degree of efficiency; but even this has not always been the case, for there are one or two schools working under the Code which have never made any noteworthy advance, in spite of bad reports and diminutive grants year after year. In fact, I have noticed that the inefficiency of backward schools has rarely, if ever, been much affected by either adverse reports or small grants; and, on the contrary, that when improvement has taken place, whatever share in this was due to the Inspector's influence could generally be distinctly traced to his frequent supervision of the classes, on occasions other than that of the annual examination.

9. These informal visits, when properly conducted, are of far more value in every way than the annual examinations; so much so, indeed, that the latter might with very great advantage be entirely discontinued, in order to afford more opportunities for paying them. On such occasions, a little questioning here and there by a competent Inspector quickly gives an insight into the whole range of subjects studied by a class, and so enables him to discover the weakest

points. By watching the teacher at work on these, and by enquiring into the methods which have been practised in teaching them, it is rarely difficult to find out the cause or causes of failure. The Inspector can then give whatever help or advice appears to be necessary, and illustrate his precepts by giving a short lesson to the class himself. In my own experience, whenever I have been able to follow up visits of this kind by a few others, at occasional intervals, for the purpose of supervising progress and of giving such further help as might be required, the result has always been most gratifying. Unfortunately, other and peremptory demands upon my time have not always permitted me to supplement my advice in this way; and in some of these cases the teachers, either from not perfectly grasping what they were required to do, from forgetfulness, or in some instances from indolence, have slipped back into their old ways, and my labour has been fruitless.

10. Were I able to reduce the work outside the schools, and to devote the whole of my time inside the schools to this friendly supervision, I could, without the help of an Assistant Inspector, visit every school, say from three or four to seven or eight times (according to their needs) during the year, with the result that I should know far more of their internal working than can possibly be learnt by two officers under the existing system, and, what is of much greater importance, be of incalculably more benefit to the schools. The need for individual examination (in addition to that given by the teachers themselves at frequent intervals in all good schools) is amply met, at three important stages of the school course, by the existing primary and middle scholarship and the high-school examinations. These afford thoroughly sound tests of individual progress, and have the full confidence of both parents and teachers.

11. The complete change of system suggested in the last paragraph could be introduced by the extension of the fixed-grant system to all the schools. A partial extension would give great relief, provided that supervising visits were substituted for the ordinary examinations in all the schools to which the new system was applied. But, owing to ignorant prejudice, there is a serious objection to the two systems being in force at the same time. As stated in paragraph 6 above, the schools now on the special list have suffered because the scholars attending them were no longer able to earn passes, and this in spite of the fact that these schools have in reality been much more thoroughly examined than the schools receiving grants under the old system. During the co-existence of the two systems it has proved extremely difficult to make parents understand the true position of the fixed-grant schools, and to enlighten them as to the comparative worthlessness of the individual passes which they prize so much; and it is probable that schools where the pupils are not individually examined will not only continue to be seriously handicapped so long as that style of examination is retained elsewhere, but that the prejudice against them would be still greater were their formal examination discontinued. Partly for this reason, but still more because I am fully convinced, after many years' consideration, that every school would benefit by the change, I urgently recommend that the fixed-grant system should be universally applied throughout Bengal.

11. **Method of carrying it out.**—In order to carry out the foregoing scheme, it was proposed that grants to schools in Bengal should be annual, and determined by a method of which the following is an outline:—

(1) Each school was to be classed by the Inspector as high, middle, or primary, according to the standard up to which there was a real and likely to be a permanent demand for instruction, and for teaching which the staff of the school was competent.

(2) The scholars were to be classified, according to their progress, in different sections—infant, primary, middle and high; and it would be the Inspector's duty to see that no scholars were placed in a higher section than they were fit for.

(3) The grant was to be based upon the average attendances made in each section during the preceding calendar year.

(4) Separate graduated scales were proposed for each section, in accordance with which the annual grants were to be made; thus

in the infant section, R15 for each of the first ten pupils in average attendance, R12 for each of the second ten, and R8 for each of the remainder; the scales rising in amount with each section, until in the high section they reached R120 a year for each of the first five pupils, R90 for each of the second five, and R50 for the remainder.

(5) All grants were to become due at the beginning of the official year, and to be payable in one sum, thus saving a vast amount of bill-work.

(6) Additional grants were proposed for free-scholars, at different rates for day-scholars and for boarders.

(7) Special grants might also be made, of whatever amount and payable at whatever time the Local Government might think fit.

The proposed scales were drawn up with reference to the average attendances of the three preceding years, and were intended to approximate as closely as possible to the average grants then being paid to efficient schools of each class.

12. **Extension of the System in Bengal.**—The Government of Bengal expressed in May 1893 their entire approval of the foregoing proposals, and authorised the immediate introduction of the system. The scales of grants were also provisionally approved, but were to be tested by working out the actual results. It was therefore ordered that the attendances of the calendar year 1893 should be calculated in the way proposed, in order that the scheme might be introduced with effect from the 1st April 1894. Accordingly, the grants for the year 1894-95, based on the attendances for 1893, and with some slight modifications in the original scales, were finally sanctioned in June 1894; and a revised form of Article 33 of the Code, embodying the scheme as finally adopted, was published for general information by a Notification in the *Calcutta Gazette*. The post of Assistant Inspector had been abolished on the provisional introduction of the new system in 1893.

13. **The 'Results' System condemned.**—Having given careful attention to the alternative systems upon which aid to European schools may be regulated, we have come to the unanimous conclusion that the system of determining grants by the results of individual examinations is based on an unsound principle, and should no longer be maintained in any of the Provinces that we represent. Our reasons in support of this conclusion will be found by referring to the discussion of the subject included in the second day's proceedings, paragraph 4, and to the foregoing paragraphs in which the success that has attended the introduction of the system into Lower Bengal has been dealt with. The system of payment by results was condemned (II, 4) on the grounds "that it discouraged the attainment of a high degree of excellence in scholarship, that it ignored the work done by teachers for dull and backward pupils, and that it put forward mediocrity in as large a number of subjects as possible as the highest goal of the teachers' efforts." The managers of schools, it was also urged, had undertaken a work which all admitted to be desirable in the interests of the State, namely, the education of European children. On this they expended much time, labour and money; and so long as they discharged that duty to the best of their ability, they might reasonably claim Government aid in return for their expenditure. The amount of

aid should be measured by the general usefulness of the schools, and not by the varying chances of single examinations. Failure at an examination, though it did not necessarily imply bad teaching, yet under the results system was without exception heavily penalised. The true inference might on the contrary be that a school which failed at the examination needed more, and not less, aid; and in any case, fluctuations in the grant and uncertainty as to its amount paralysed honest effort. Our general opinion was expressed in the Resolution, "*That the present system, under which grants are given on the results of the individual examination of scholars, be abrogated.*" (II, 4.)

14. **The Bengal System recommended.**—The Resolution just quoted proceeds:—"*That the Committee are unanimous in approving the principle of the system followed in Lower Bengal, under which grants to schools declared efficient are given almost exclusively on the attendance and the classification of scholars, and are in no way determined by individual examination.*" (II, 4.) The general advantages of this system are (1) that the finances of schools are no longer liable to be disorganised by fluctuations in the grant resulting from the chances of the annual examination, but that its amount can be anticipated by the Managers from year to year with something like certainty; (2) that the amount of the grant is determined by general considerations of the size and proficiency of each school, and therefore bears some fair proportion to its utility and cost; (3) that it leaves the teachers free from anxiety as to the results of a particular examination, and enables them to cultivate the intelligence of the scholars, as well as their memory, by steady adherence throughout the year to those methods of instruction which experience and authority have pronounced to be the best; (4) that it allows fuller scope than is possible under a system of annual examinations by fixed standards, for individual teachers to vary the methods or the subjects of instruction according to the capacity of the scholars, and to push forward promising pupils along lines in which they show ability; (5) that it encourages attention being paid to dull and backward scholars, since teachers can now afford to work slowly and thoroughly, making sure of each step before attempting the next; (6) that in Provinces where the Inspector's other duties leave him sufficient time for the purpose, it enables him to substitute frequent and friendly supervision for a single annual examination, thus allowing him to gain a much clearer insight into the condition of each school, and to apply criticism, advice and example to the removal of defects.

It may also be remarked that the general objections that have been raised to the system of determining grants by an annual examination, as lowering the aim of instruction and making the teachers look to examination as the point of chief importance, apply equally to collective and to individual examination. The system which we recommend is free from that objection. Instead of making education subordinate at all points to examination, inspection will under the proposed system be entirely subordinate to education, in that its object will be the discovery of both the good and the bad points in the method of teaching, so that whatever is good may receive due encouragement, and that every possible assistance may be given to the remedying of defects.

15. **Objections to the System considered.**—It may be objected that as the grants depend not only upon the attendance of scholars, (which can be accurately determined from the registers), but also upon their classification,

and as the scale of grants increases in passing from a lower section of the school to a higher, there will be a tendency on the part of school managers to place scholars in classes for which they are doubtfully qualified, in order to earn higher grants for them; and that in the absence of annual examinations, no sufficient check can be applied to this tendency. It will be seen, however, that no larger grant can be earned (Article 29) for any scholar by promotion to a higher class, unless he also passes into a higher section; and further (Article 17) that no scholar can be promoted from the Primary to the Middle, or from the Middle to the High Section of a school without passing the Primary or the Middle School Examination (Chapter VIII). For promotion from the infant to the primary section, it is true, there is no departmental examination to be passed; but the Inspector will have no difficulty in rightly placing these scholars. In other cases, it is not fraudulent promotion but ignorant promotion that has to be guarded against; and it will be an important part of the Inspector's duty to be on the look-out for wrong classifications, and to restore scholars to the classes for which they are fit. No question of the amount of grant will be involved, but only a question of orderly instruction.

Again, it may be urged that as grants are to be given merely for the attendance of scholars, without consideration of the number of subjects they are taught, there will be a tendency to reduce the subjects of instruction to a bare minimum, and thus the range of instruction will be reduced and it quality will deteriorate. Under the present system, it will be remembered extra grants are given for scholars passing in 'class' and in 'special' subjects, in addition to those earned for passing in the 'elementary' subjects. Under the proposed system, the subjects of instruction are similarly divided into compulsory and optional; but no additional grants are awarded for the latter. Optional subjects therefore, it may be argued, will not be taken up. The answer to this objection is to be found in the competition which exists between school and school. Mathematics, Latin, French, Science, Drawing and the like have their practical value as parts of school education, and parents send their children to schools where the best education is given. The optional subjects also form part of the departmental examinations held at different stages — primary, middle and high — not only for the award of scholarships (Article 107 of the Code), but also for the promotion of scholars from a lower to a higher section (Articles 17 and 98); and this condition supplies a sufficient motive for taking up the optional subjects. It has not been found (see IV, 7) that the Bengal rules regarding grants-in-aid have had the effect of reducing the number of subjects taught in any school, even as regards singing and drawing, which are not included among the subjects of examination, and are therefore outside the influence of the causes named in the preceding sentence. From another point of view, it will not be disadvantageous to limit the number of optional subjects taught in any school to those which the staff can efficiently teach; since the desire for additional grants occasionally leads schools, under the existing system, to attempt subjects beyond their powers. We have guarded against this danger in the revised Code by providing (Article 14, *d*) that the subjects of study in every school shall be subject to the approval of the Department.

The foregoing considerations relating to the primary, middle, and high school examinations supply an answer to another objection that may be raised, namely, that the system which we recommend leaves too much freedom to

teachers, who might in certain cases be disposed, in accordance with their individual preferences, to pay too much attention to some subjects and too little to others. We believe that, quite independently of the control of the Inspector over the time-table (Article 14, *d*), the necessary steadying influence will be supplied by the periodical examinations.

16. **Alternative provision made for other Systems of Aid.**—While we were unanimous in approving the principle of the foregoing system of grants-in-aid, two of our members, Mr. Haden Cope and Mr. Marsden, urged that provision should be made for alternative methods, under which grants should either be fixed for a term of years, or be determined by the results of examination, if it should happen that a Local Government considered that the time had not yet come for the introduction of the system followed in Bengal and now recommended by us. The discussion on this point will be found in the second day's proceedings, paragraph 4, and is here summarised.

Mr. Marsden, Inspector of Schools, Bangaloro and Coorg, advocated the system of fixed grants; the amount of each grant to be settled for a term of years after a careful consideration of the educational needs of the locality, the standard of the school, the class of pupils in attendance, the income of the school, and the Government funds available. The system was recommended by its simplicity, and it was in favour alike with managers of schools and with the Department; with the former as securing them in the possession of a fixed income, and with the latter as avoiding needless and laborious calculations This system was already recognised in Article 33 of the existing Code, and, while admitting the advantages of the Bengal system, he hoped that it would continue to be recognised.

Mr. Haden Cope, Inspector of European Schools in the Punjab, considered that it was desirable to provide a means of passing from the old system to the new without serious disturbance of existing rates of aid. He pointed out (1) that instruction grants were much higher in the Punjab than those formerly current in Bengal, so that the new Bengal scales would probably be inadequate for the former Province; and (2) that as some Punjab schools took up more class and special subjects than others, they earned a higher average rate of instruction grant; and therefore the application of a uniform scale of grants would work unequally, benefiting some schools and injuring others. He accordingly proposed to lay before the Committee a scheme, based partly upon attendance and partly upon the individual examination of scholars, which, as being intermediate between that of the present Code and the new Bengal system, might pave the way for the adoption of the latter at a future date by those Provinces which felt that its immediate introduction might unduly dislocate present arrangements.

We considered the introduction of a provision to meet the two foregoing cases to be advisable; and we added to the Resolution quoted above in paragraphs 13 and 14 the following rider (II, 4) :—

> *If however, in the opinion of any Local Government the time has not arrived for the introduction of the system we advocate, it shall be open to such Local Government to adopt either the system of fixed grants described in Article 33 of the Code of 1889, or, alternatively, a system under which the grant shall be settled for a term of years, based partly upon attendance and partly upon the indivi-*

dual examination of scholars, subject to the proviso that the grant may be reduced during the currency of the term, after due notice given to the Managers, if the Inspector finds that the efficiency of the school has diminished; that at the end of the term the grant shall be revised, the amount of the grant for the new term being settled by the Inspector's estimate of the efficiency of the school, as determined by his periodical inspections, subject, in this case, to the condition that if the school is dissatisfied with the amount of the new award, it shall be entitled to claim a re-examination of the school by the individual method, and a re-adjustment of the grant in accordance with the results of such examination.

It will be seen that this Resolution defines with some precision the character of the second of the two alternative systems of aid proposed in it; but no further action was taken thereon. Detailed articles giving effect to that system were afterwards laid before the Committee by Mr. Haden Cope (IV, 15); but they were not discussed. A proposal to take them into consideration was brought forward by Mr. Cope at the seventh meeting (paragraph 3); but an amendment was carried, the mover of the proposal alone dissenting, to the effect that as the Committee had unanimously approved of the principle under which grants were now awarded in Bengal, it was unnecessary to discuss in detail the articles of any other system. At the same time it was decided to retain in the Code provision, not merely for a system of fixed grants, but also for grants based on the results of examination, in the event of any Local Government preferring to abide by one or other of these systems, in preference to that which we now recommend. It was intended by the Committee that, if a system either of result-grants or of fixed grants was introduced into any Province, it should be within the competence of the Local Government to settle its details and to frame articles accordingly. We have provided for this in Article 34 of the Revised Code, which runs as follows:—

"*In substitution of the grants which may be earned under these rules, grants either determined by the results of examination, or fixed in amount for a term of years, may be given to schools which for any reason it is thought undesirable to bring under the preceding articles. The conditions under which these grants will be given shall be determined by the Local Government.*"

The general provisions for the award of grants under the proposed system will be found in Articles 27 to 38.

17. **Cost of the New System.**—It has been stated above (close of paragraph 10) that the scales adopted in Bengal were so framed that the average grants for efficient schools might approximate as closely as possible to those earned under the old rules. Equality of average grants is of course consistent with inequality in individual cases; some schools will gain, while others will lose; and in passing from one system to another it is desirable that some liberality should be shown, so as to reduce, as far as possible, the number of schools that are hit by the new system. The adoption of the new scales in Bengal resulted in an increase of the annual grants to 56 schools from ₹1,07,707 to ₹1,14,508; an addition of ₹6,801, or 6·3 per cent. The general result was that 35 schools gained increased grants and 18 suffered a loss, while three grants were unchanged. In order to facilitate the transition from the old to the new rates, the general rule was adopted

of giving to each school for the first year half the grant earned under the old system *plus* half of that to which it would be entitled under the new ; the full introduction of the new system being deferred until the following year.

We have reproduced without alteration in the Revised Code (Articles 29 and 30) the scales adopted in Bengal. We are aware, however, that the scales for each Province will have to be separately worked out in reference to current rates of grant and other conditions; and for this purpose the Bengal scales will serve as a useful guide. We have made provision for an alteration in the rates of aid in the Note to Article 30.

18. **Modification of Schedule I of the Code**—The allotted portions for a year's work given under the head of "Standards of Examination" in Schedule I were fair enough when all that was demanded of the teachers was that a certain definite amount of work should be gone through by the end of the year. They were at liberty to give any collateral information, or to pause in the day's lesson in order to pay particular attention to points of interest arising in it; but they were not required to do this, and they were required to finish their work within a given time. Under the new system the teachers are expected to work with broader views: to aim not so much at bringing their pupils to acquire a knowledge of certain particular facts and processes, as at training them to observe carefully whatever comes before them, and to reason about what they see and learn. With this wider purpose added to their work, teachers cannot be expected in all cases to cover the same ground as before, even though a sounder system of teaching may be expected to make good at the end what was apparently lost at the outset in laying a sure foundation. Hence it becomes desirable to modify Schedule I in two directions. First, so to reduce it in extent as to prescribe for each year such an amount of work as an ordinarily good teacher under average conditions may reasonably be expected to accomplish. Secondly, to alter it in character, so that it may serve as a guide throughout the year rather than as a goal at the end. What is needed in the altered circumstances is a continuous plan of work rather than a final standard of examination. We have accordingly drawn up a second schedule, included in the Revised Code as Schedule I-B, so as to conform to the conditions just stated It also introduces, and gives importance to, subjects which are not included in the present course as defined in Schedule I (now to be known as Schedule I-A), and for the teaching of which no payment can be made under the existing rules.

These two Schedules, I-A and I-B, present therefore two different plans for regulating the work of schools. The former defines the standard which each class is expected to arrive at by the end of the year, and no mention is made of the process — the course of studies — by which that end is to be attained. Under the latter, it is chiefly the process of working, the steps by which a certain end is to be accomplished, to which attention is paid. With schools working according to Schedule I-A, the Inspector has little else to do except to see how the scholars acquit themselves at the annual examination; with those working according to Schedule I-B, his business is to guide and control their course of instruction throughout the year. These schedules have nothing to do directly with the systems by which grants-in-aid are determined; but the former must be followed if the system of payment by the results of examin-

ation is retained; whereas either schedule may be followed in other cases. We consider that Schedule I-A may legitimately be retained even by Provinces which reject the results-system of payment. The annual examination by the Inspector may still be regarded as valuable, even though it be no longer employed to determine the amount of the grants. Thus in two Provinces, both alike adopting the method of payment by average attendance, schools will be led, by different routes and at different rates of progress, to the same, or nearly the same, goal at the Primary, at the Middle and at the High School examination. The standards of these examinations, according as one or other course of instruction is followed, will be compared, and their differences pointed out, in a later paragraph, when considering Articles 101—106 of the Revised Code. The Local Government will decide which schedule shall be adopted; and that decision having been made, it will be applied to all the schools of the Province. At the same time, there is no reason why a Province adopting Schedule I-A should not also draw up for itself courses of instruction, in the form of Schedule I-B, leading up to the annual standards of examination of the former schedule.

It will be seen that Schedule I-B, which was submitted by three of the members for the consideration of the Committee, while it has received the general approval of the full Committee, is regarded as being open to modification in details. The leading teachers in Bengal were consulted regarding the new schedule during its production; but as it was laid before us only a few days before the Committee dispersed, it was not possible to consult educational authorities and Head Masters in other Provinces, as to the probable effect of the course of instruction therein prescribed upon the work of the schools. A representation to this effect, made by three members of the Committee, will be found in the eleventh day's Proceedings (paragraph 2). Our colleagues were disinclined, without further examination of the schedule, to express any opinion as to the suitability of its details, while at the same time they were able to accord to it a general approval as a model that might well be kept in view, if any deviation from the present courses of instruction were sanctioned. We have, therefore, adopted the schedule as a model, the details of which may, if thought desirable, be modified by any Local Government adopting it. Our discussion on this point led to the subjoined Resolution (XI, 2) :—

> *That while it is necessary to retain Schedule I (to be called Schedule I-A) in the Code, so as to prescribe fixed standards of examination for those Provinces in which the annual examination of scholars is retained, it is also desirable to introduce a second schedule (to be called Schedule I-B), explaining in detail the courses of study to be followed, in order to serve as a guide to teachers. It will be open to any Local Government adopting Schedule I-B, to introduce into it such modifications as they may think desirable.*

In Schedule I-A we have introduced (XIII, 2) certain changes which we regard as desirable, in order to remove objections which have been raised to it. Further modifications by the Local Government, both of Schedule I-A and of Schedule I-B, are also provided for in Article 19 of the Revised Code.

19. **Summary of Recommendations.**—The general result of our recommendations under this head is therefore as follows. On the one hand we are unanimous, first, in condemning the system of 'payment by results' as commonly understood, that is, payment on the results of a single annual examination; and secondly, in recommending the system adopted in Bengal,

under which grants to schools declared efficient are determined, year by year, by the attendance and classification of the scholars in the preceding calendar year. Provision for the new method of aid is made in Articles 27—33 of the Revised Code. On the other hand, we provide in Article 34 for the retention of the existing system of payment on the results of examination, or for the payment of grants fixed for a term of years, in the event of any Local Government preferring either of these systems to that which we recommend. We have not, however, thought it necessary to specify in the Revised Code the rates to be paid for attendance grants and examination grants under the results-system, or how the amount of the grant is to be determined if the fixed-grant system is adopted. These points will be for the Local Government to settle; but should the results-system be retained in any Province, it will probably be sufficient to accord renewed sanction to the existing rates of aid, prescribed in Articles 21—30 of the present Code.

Lastly, we have drawn up and given a general approval to a second Schedule (I-B), prescribing detailed courses of instruction, in addition to the original Schedule (I-A) defining standards of examination. Those schools to which the system either of fixed grants or of grants based on average attendance is applied, may work in accordance with either schedule. Those schools the grant to which is determined by the results of examination will be confined to Schedule I-A.

20. **C.—The Recognition of Additional Courses of Study in the High Sections of Schools.**—There has of late years been a growing demand, particularly in boys' schools, for scholars who have worked through the primary and middle standards to be prepared for examinations other than either the High School or the Entrance Examination. Some boys wish to be prepared for the London Matriculation Examination, some for the Admission Examination to the Thomason Engineering College at Rurki, and others for one or other of the various examinations for admission into the different Departments of the Public Service. Up to the present, teaching of this kind has not been generally recognised by the Code. The work, however, is of very great utility, and we are of opinion that the schools taking it up have as strong a claim to Government help in carrying it out as other schools have for teaching the High School or the Entrance Course. It was unanimously resolved, "*That in the High Section of a school may be included, for the purposes of Article 16, scholars reading beyond Standard VII for the High School Examination, the Matriculation Examination of the London or any British University, the Entrance Examination of any Indian University, the examination for admission to an Engineering College or to the Forest School at Dehra Dun, any examination which may be prescribed by the Government for admission to the Imperial or Provincial Service, or any other examination which, in the opinion of the Local Government, may deserve to be so recognised; and that the examinations recognised for this purpose by any Local Government should be specified in a note to Article 16 of the Provincial Code.*" (IV, 14.) In accordance with the terms of this Resolution, provision has been made in Article 17 of the Revised Code for including in the High Section scholars who are studying not only for the High School Examination, but for "such other examinations as may be specially recognised for this purpose by the Local Government."

21. **Examinations for the Public Service.**—Closely connected with the subject last dealt with is the large number of independent examinations for

admission to the several Departments of the Public Service (every Department having one of its own), and the effect of this upon schools which prepare candidates for them. In most of these examinations the test of general education is of about the same degree of difficulty, and the subjects of examination do not differ very widely. There is, however, so much variation in detail—for example, in the branches of mathematics set, or the portions of history selected—that what would be a good preparation for one examination would not serve for another. The result is that boys of the same social class and the same educational attainments, and attending the same school, must study the same subjects in different classes if they are preparing for different examinations. In each of two High Schools in Lower Bengal, there are nearly a dozen classes thus preparing for different examinations, not including those of the Calcutta University; and most of these are for admission into Departments of the Public Service. These classes are small, generally consisting of two or three boys in each, so that if all the classes could be formed into one, the united class would not be too large to be taught by a single teacher. On account of the necessary subdivision, both schools have a larger staff of teachers than they would otherwise require, although they neither do nor can attempt to provide special teachers for each of these small classes. As far as the schools are concerned, the result is increased expenditure for teachers, and a great strain upon the staff, while the number of classes in charge of each master prevents the teaching from being as effective as it ought to be. (V, 7.)

It appeared to the Committee that if it were found possible to hold a common examination in general subjects at the same time for all branches of the Public Service, with additional special papers in the different subjects required by particular Departments, it would not only be an incalculable boon to High Schools and their scholars, but would save much trouble and expense to Government. On this subject one head-master writes:—

"An examination similar to the admission examination for the Engineering College at Rurki might be made common for all departments.

If any department did not demand the amount required by the above standard, the candidates for that department might be instructed to answer certain particular questions only.

Similarly if any department such as the Forest Department or Survey or Secretariat required subjects of examination other than the above, the papers on these subjects might be given at the time when other candidates would be working on subjects not required by these departments: *e.g.*, the Secretariat and Subordinate Accounts candidates might have précis writing, book-keeping and letter-drafting, while candidates for the Forest Department have botany and chemistry, the Survey and Rurki candidates geometrical, topographical, or freehand drawngg, and the Subordinate Executive candidates law.

Setting aside the advantage to Government of thus simplifying the examination, one great advantage to the candidates of a common examination would be that if a candidate for admission to a particular department failed for any cause to enter that department, but qualified for another in which there was a vacancy and for which he was an eligible candidate, he might enter that department, without further delay and waste of time, either for himself or the department.

It seems to me therefore not impossible to frame a plan for a common examination which would serve as a test for admission to the departments I have mentioned, if not to all, and a test that would be as advantageous to Government as it would be convenient to candidates and to the schools in which they were prepared."

Another head-master writes in a similar strain, but suggests a slightly different plan:

"I would draw your attention to the fact of the diversity of these Government examination and the consequent useless multiplication of work on the part of the Professors, who

instead of being able to devote themselves to a large class, are constrained to teach such a large number of subjects covering different matter, that their work is needlessly increased. If it were possible to organise these examinations on a simpler basis, so that the common subjects covered the same ground, a more efficient training could be given to the students, as the College staff would be able to devote more time to each subject. Another advantage following from this would be that if a candidate, owing to the small number of yearly vacancies, did not secure success in the examination for any particular department, his chances of succeeding in the examination of another department would not be so hopeless as at present."

We do not think it necessary to discuss these proposals in detail, or to offer any proposals of our own, because we believe that, should the Government be pleased to take any action in this direction, the question can only be dealt with by a Committee appointed for the purpose. Our unanimous opinion is conveyed in the following Resolution:—*That Government be requested to take steps to secure, as far as possible, uniformity in the conditions of admission to the different Departments of the Public Service, by prescribing a common examination in all subjects, except those specially required for particular Departments.* (V, 7.)

22. **D.—The Education of the Poor.**—At an early stage of our proceedings we took into consideration the question whether sufficient and suitable provision was made for the education of poor European and Eurasian children, and if not, how it could be improved. Our object was not merely to increase the facilities open to poor children for the acquisition of a good general education, but also to give such a character to their education as might more fully fit them to earn a livelihood, after leaving school, in various industrial occupations. The conclusion that we came to was that improvement should be aimed at along two main lines; first, the increased provision of boarding schools, and secondly, the encouragement, in schools for the poor, of a deviation from the ordinary course of study by giving special grants for instruction in subjects of a technical or practical character.

23. **Provision of Boarding Schools.**—We are unanimous in attaching a very high value to well-conducted boarding schools for the poor; and we earnestly desire to see their number increased, whether by the direct agency of Government, or by private effort assisted by Government. Such schools not only secure continuous education by enforcing regularity of attendance—the chief difficulty now met with in the education of the poor; but they remove the scholars from the ordinary surroundings of their home-life, which are often of a questionable kind; and the steady discipline which they enforce tends to strengthen and improve all that is best in a boy's character. For this purpose, and in order especially to confirm the scholars in habits of order, promptitude and obedience, the *quasi*-military form of discipline which prevails in many institutions seems to possess a high value. In large establishments like the Lawrence Military Asylum at Sanawar, for example, the services of European stewards sergeants or matrons can generally be secured, and the boarders will thus be removed from the (often demoralising) influence of native servants Our conclusions are embodied in the following Resolution (III, 3):—

That the Committee recommend, as one of the best means of educating poor European and Eurasian children, the establishment of boarding schools in which they would be at all times under close and careful supervision, and as far removed as possible from contact with native servants.

24. Character of the Education in Schools for the Poor.—The best form of education for poor boys must be determined by regard to the occupations which will be open to them after they leave school. Some, it is true, may be employed in offices; but appointments of this class will for the most part fall to the lot of those whose general education has been carried to a higher standard than we now have in view. A few will find employment in shops. But it may ordinarily be assumed, as a result of the acute competition that exists for every form of clerical employment, and for other reasons as well, that a large proportion, if not the majority, of the scholars whose case we are considering will take to some form of active, out-of-door, or industrial pursuit,—some occupation in which bodily strength and manual dexterity are essential. It is true that Anglo-Indian parents, even of the lower classes, often regard with distaste the notion of their sons doing any manual work. The pressure of circumstances is gradually weakening this objection; and as experience shows that boys of European extraction, born and bred in this country, can be turned into good workmen if their energies are directed into the proper channel from a sufficiently early age, it is reasonable to expect that if encouragement is given to European schools to open industrial classes, the manual training that they offer will be of solid value in after years to the scholars who attend them. Our recommendations, based chiefly on the Proceedings of the third and fourth days' meetings, are governed by this principle. We recommend that special grants be given for the encouragement of training in such subjects as promote physical strength and manual aptitude, provided they also have educational value, in other words, that they admit of a graduated series of exercises and are calculated to develope moral qualities, such as industry and patience, in the scholar. The leading Resolution stands as follows (III, 4) :—

That the best means of promoting the education of the poor is to give additional grants to schools, where in the opinion of the Department necessary, for instruction in special subjects of a practical character, likely to improve the position of the scholars in after-life.

That in accordance with the foregoing Resolution, grants may, where necessary, be made to schools for instruction in—

Drill and gymnastics,
Drawing,
Object-lessons leading up to elementary instruction in Physical Science,
(For girls) Household duties;

and in such subjects as the following:—

Short-hand and type-writing.
Modelling in clay.
Carpentry.
Blacksmith's work.

Such grants may include grants for apparatus.

Drill and gymnastics, drawing, practical notions about elementary physics, or (for girls) household duties, are of great and recognised value as parts of education in every class of life, but possess special importance in the education of those who will have to live by their hands chiefly. They strengthen the physical frame, or they train the hand and eye, or they implant habits of observation; and thus they form, if not a necessary, at least a very useful and important, equipment for every workman who means to succeed in his calling, quite independently of the particular trade that he may follow. We have, therefore, placed them first in our list.

25. Technical Instruction.—Following these in our recommendations come other subjects, having a closer and more direct connexion with technical instruction as the term is commonly understood. Short-hand and type-writing, it is true, are not of this class; but they have an immediate commercial value, while at the same time they can be sufficiently taught in schools; and accordingly they have been included in our list. Modelling in clay, again, may be regarded, like drawing, as a part of general education, since its first object is to develope the faculties of accurate perception and imitation; but at the same time a knowledge of the art will be of direct service to a future pattern-maker in a workshop. As to carpentry and blacksmith's work, our object in including them among the subjects of instruction may be best explained by the following words, with which the last-quoted recommendation concludes:—

> *That, in recommending the foregoing grants, the Committee have in view the educational value of instruction of the kind specified, both in cultivating the faculty of observation and in promoting aptitude for industrial occupations; but they are of opinion that it is neither possible nor desirable to introduce into schools the teaching of special trades as means of livelihood.*

The training that we contemplate, in the carpenter's and blacksmith's shops which we hope to see attached to large boarding schools, is not intended to fit boys to earn a living in those callings (which we consider to be quite out of the question), but rather to enable them to acquire rudimentary skill in the use of tools which may afterwards avail them when they enter a workshop. Like the Slöjd system, to which reference is made below, it is to be used as "a means of developing physical powers and of forming character and habit, rather than of attaining utilitarian ends." In advocating technical instruction, we employ the term as meaning nothing more than such a training as will give a boy a favourable start in any industrial occupation to which he may afterwards turn his hand. And even though he does not become a mechanic, the training that we recommend will be of permanent service to a boy of this class, not only in the various odd jobs to which he will have to turn his hand in the affairs of his daily life, but also, we consider, in the formation of his character.

A proposal was made at one of our meetings (IV, 3, 4) that the curriculum of all such special subjects should, for the purposes of the Code, be clearly defined. The proposal, however, met with little support. While we cordially agree in the principle that lay at the bottom of the proposal, namely, that any form of manual work permitted by the Schedule should have a definite character and aim, and should give no encouragement to desultory labour, we consider it desirable that the greatest possible freedom should be conceded in this matter to school-managers, so that the alternative courses may be framed in conformity with the special aims and requirements of different schools, or the special aptitude of teachers in different lines of practical work. We think it will answer every purpose if the courses are approved by the Inspector as being progressive towards a definite object, and suitable in scope, design, and amount of work. We have, therefore, not attempted to define the curriculum of these special subjects.* It will be seen that we contemplate the inclusion, at the dis-

* The following works from Cassell & Co.'s Polytechnic Series have been recommended to us by the Principal of the Engineering College, Sibpur, as containing a suitable course for schools in workshop practice:—
(1) "Forty Lessons in Carpentry Workshop Practice," by C. F. Mitchell.
(2) "Forty Lessons in Engineering Workshop Practice" (such portions as can be gone through without machinery).

oretion of the Local Governments, of other subjects in addition to those named in the Resolution and in the corresponding article (33, *c*) of the Code, as qualifying for special grants. "Telegraphy" is one such subject that came under discussion; "the maintenance of bands in large schools" is another, and the aptitude for a musical training which Europeans and Eurasians often display seems to show that many of them might earn, if properly trained, a respectable livelihood as musicians.

26. **Cost of Industrial Classes.**—This is a matter regarding which we have no experience of our own to guide us. We therefore asked the advice of Mr. J. S. Slater, Principal of the Civil Engineering College, Sibpur, who has favoured us with the following estimate, based on the requirements of a class of ten boys:—

Carpenter's Shop.

	R
Cost of tools, etc., for ten boys	500
Instructor in carpentry, monthly	30
Cost of materials for instruction, per annum . .	300

Blacksmith's Shop.

Five forges, masonry	150
Five bellows at R40 each	200
Five anvils at R50 each	250
Tools	200
Instructor, monthly	50
Materials, etc., for ten boys, per annum . .	300

Mr. Slater adds that if a European school opens a class for blacksmiths, it should also be in a position to teach elementary surveying and levelling, and the outlay required for this purpose would probably amount to R500.

27. **Affiliation of Industrial Classes.**—Rules exist in Bengal for the affiliation of technical schools to the Apprentice Department of the Sibpur Engineering College. The advantages conferred by affiliation are the following. An affiliated school is entitled to obtain tools and machinery from Sibpur at the cost of manufacture; it is subject to periodical inspection by the Principal of the Sibpur College; and its pupils, after going through the full course of the school, are entitled to appear at the first or the second year's examination of the College, and if they pass, to join the College in the second or third year class. It is suggested that similar privileges should be conceded to classes for carpentry and smith's work attached to European schools; thus establishing a close and useful connexion between these classes and the Apprentice Department of the College, saving the Scholars one year or two years (as the case may be) of their time, and opening up to them paths leading to profitable employment.

We append a statement of the workshop course of the Apprentice Department of the Sibpur College in the first two years:—

FIRST YEAR.

Carpenters' Shop.—Apprentices are made acquainted with and shown how to use and handle properly the tools ordinarily employed for the purposes of carpenters' and joiners' work. They are taught the method of preparing wood, setting out, and forming the various joints.

The practical application of the foregoing instruction is brought to bear by employing them in making tools, boxes, doors, windows, roof-trusses and other framings required for buildings and other engineering works.

SECOND YEAR.

Blacksmiths' and Boiler-makers' Shop.—Apprentices are taught to use and handle correctly the different tools, to lay and manage the fires, to draw down, bend, jump, weld, split, punch, chamfer, and temper. After this they are set to make small forgings of tools, bolts, nuts, hooks, and shackles, and also of parts of trusses, as well as other forgings of parts of machines. In the boiler-makers' shop they are familiarised with the use of riveting tools and the process of riveting, and learn to punch and shear correctly with the machines for that purpose.

The class-work for the Apprentice Department in the same two years is given in outline below:—

First year.—Arithmetic, Euclid, and Algebra; carpentry; printing scales and geometrical drawing.

Second year.—Algebra, Trigonometry and Mensuration; estimating; building materials; surveying with chain and compass, and levelling; orthographic projection.

The foregoing courses, in workshop practice and class work respectively, indicate the standards up to which the industrial classes attached to European schools should work. Any pupil passing either of these examinations, and being within the prescribed limit of age, would thus save one year or (if both examinations have been passed) two years in the college course.

28. **Place of Special Subjects in the Code.**—We have provided for two ways in which the special subjects, referred to in the preceding paragraphs, may be introduced into schools. In the first place, they may be taught in addition to the ordinary subjects of Schedule I; and we have made provision, in Article 33 (*c*), for special grants being given to schools for the poor which teach these subjects outside the regular routine, provided that additional expenditure is incurred on account of such instruction, and that the ordinary grant is considered insufficient. Or again, in the second place, these subjects may be taught in substitution for one or more of the subjects specified in Schedule I; and in Article 20 we have permitted such a substitution to be made without loss of grant, subject to the previous sanction of the Department (IV, 3). We were led to this conclusion by the example of the Free Boarding Schools at Allahabad, of which an account is given in the third day's Proceedings, paragraph 3. After passing Standard IV, the scholars are divided into two classes. Those who show such intellectual capacity as to render it likely that they will profit by a higher education, are admitted as day-scholars of the High Schools, receiving, out of school hours, additional instruction in short-hand and type-writing; while the remaining children, who form the majority, devote more of their time—the boys to various kinds of manual work, the girls to household work; while they also receive further instruction in such subjects of the school course as will be of most practical use to them, without closely following the schedule of the Code. It is to meet cases of this kind that the provisions of Article 20 have been introduced. We are also of opinion that schools which thus deviate from the scheduled course, after passing Standard IV, should be classed as Middle Schools (VII, 2).

29. **The Slöjd System.**—The introduction of this system, which is rapidly growing in popularity, into European schools, especially those for the poor,

would be in full accordance with the principles that we have advocated above. It would indeed form a fitting introduction to the technical classes which we hope to see established. Slöjd, or Sloyd, it may not be out of place to mention, is the name given to a system of educational handiwork in wood, metal, cardboard, leather, etc., suitable for boys and girls of the age of ten and eleven or upwards. Each child is required to produce a series of useful articles called 'models', in which rounded work and the square work of the carpenter are duly alternated; and each model introduces, with careful regard to the graduation of difficulties, some new tool or fresh exercise. The chief tools used are the saw, the plane, and the chisel, with the knife as the initial tool. It is claimed on behalf of this system that it should be placed, as a subject of school instruction, on the same footing as arithmetic, reading, or writing; and should, therefore, be taught in every school, since its educational value is very high. It specially aims at teaching thoroughness, and educating children to put their very best work into whatever they do. At the same time the manual training which a Sloyd pupil undergoes is of great practical value to him in after-life; if he becomes an artisan, he has nothing to unlearn. "Sloyd trains hand and eye, gives general dexterity, developes the body, . . . begets a spirit of independence and self-reliance, developes patience, strengthens the will." In a word, it is to be used as a means of developing physical powers and of forming character and habit, rather than of attaining utilitarian ends.*

The question of giving encouragement to this system was considered at one of our meetings (IV, 4). While its value was fully recognised, the great difficulty in the way of its introduction was said to lie in the absence of teachers trained to the work,—the same difficulty, in fact, that has attended the attempts which have been made to introduce Kindergarten teaching. We have, therefore, made no special reference to the Sloyd System in the Code.

30. **Reduction of Grants to Schools for the Poor.**—By Article 40 of the existing Code it is provided that if the annual grant earned by a school exceeds the income of the school from all sources other than the grant, it shall be reduced by the amount of such excess; in other words, that the grant-in-aid shall not exceed the income of the school from other sources. The policy of applying this provision to schools for the poor was strongly contested at two of our meetings (III, 3; IV, 9). An instance was cited in which the grant earned by a free school had been reduced by about one-half under the provisions of this article. The case of such schools, it was urged, was altogether different from that of schools in which fees were charged. It was a great hardship on the Managers, while faithfully carrying out the object which the Government declared to be essential, namely, the education of poor European children, to deny them the grant they might earn under the Code, unless they could raise an equal amount from the charitable public. It was clearly hard upon the poor, and in itself a matter of doubtful propriety, to make the education of their children dependent on the generosity of the rich. The article, in fact, invited school managers to drive away poor children from their doors, after a certain limit had been reached, by making it uncertain whether any grant would be given for their education. Schools for the poor

* Taken from "Sloyd Facts," George Philip and Son, London.

ought, it was contended, to be definitely withdrawn from the operation of this article.

These arguments impressed us; but we were not convinced that it was desirable to definitely exclude poor schools from the provisions of the article. The result would be to weaken or destroy one of the most potent arguments by which managers of schools for the poor can appeal to the generosity of the public, namely, that unless a liberal response is made, the school will suffer. The Government is not the only party responsible for the education of the poor. That responsibility is shared in an equal degree by the wealthier members of the community, and we do not think it desirable to introduce into the Code any provisions which would tend to weaken it.

At the same time we are aware that, as in the instance cited above, the enforcement of the rule may sometimes give rise to extreme difficulty and hardship when, owing to accidental or temporary causes, subscriptions to a large free school fall off. We, therefore, wish to draw special attention to the remedy that can be applied in such cases by Local Governments under Article 32 of the existing Code (Article 33 of the Revised Code). Special grants may be given under this article to schools for the poor, on any ground which may appear sufficient to the Local Government; and it is expressly provided that grants so made shall not be taken into account in making reductions on account of deficient income. The liberality of the public in supporting schools for the poor is so well established that the occasion, it is thought, will seldom arise; but if it does arise, we think it very desirable, in order to prevent great and sudden loss to these useful schools, that the remedy provided by the Code should be applied.

31. **Compulsory Education of the Poor.**—The compulsory education of poor European and Eurasian children has been suggested by the Punjab Government as a subject for discussion by the Committee. After consideration of the question, we came to the conclusion (III, 5):—

> *That in the opinion of the Committee it is unnecessary to recommend that any steps be taken to enforce the attendance of children at school.*

We were led to this conclusion on the following grounds. As stated above (paragraph 21), experience shows that it is not so much non-attendance as irregular attendance which is the great obstacle to the proper education of children of the poorer classes. Home supervision is imperfect, and the children play truant without notice or correction. Clothes or boots give out, and until they are replaced the children cannot go to school. A system of compulsory education would not effectually meet these cases. Again, such a system to be properly worked requires a staff of officers corresponding to the 'attendance officers' employed by the School-Boards in England; and the resulting expense would certainly be considerable. Nor again would it be possible to employ such officers any where except in large towns. Finally, we are of opinion that if education is compulsory, it must ultimately be made free, as in England; and we are not prepared to recommend so far-reaching and costly a change.

32. **E.—Transfer Rules.**—Rules regulating the admission of scholars in Bengal from one European school to another were first given in the Bengal notes to the Code in the edition of 1889-90. Complaints had been made that not a few parents were in the habit of neglecting to pay school fees until they

had accumulated to a considerable sum, and of removing their children to another school when they were pressed for payment, there to repeat the same practice. Again, it often occurred, at the end of the school year, that teachers were greatly hampered in making the annual re-arrangement of the classes. If a scholar who was unfit to be promoted was kept back in his old class, the removal of the scholar to another school would often be threatened, and, if the teacher did not give way against his better judgment, carried into effect. The competition for scholars between school and school was so keen that it rarely, if ever, happened that a teacher refused admission to a scholar removed in the above circumstances. A mutual understanding between the schools was several times suggested, but was never carried out. The new rules were framed to meet the difficulty; the two most important provisions being that no scholar was to be admitted into another school without a transfer certificate stating that there were no fees due to the last school, and that no newly admitted scholar was to be placed in a standard higher than that in which he would have been, had he remained in his former school. As the same or similar rules were introduced into all the Provincial Codes, and have in every case worked with most beneficial results, the Committee thought it desirable that they should be transferred from the provincial notes to the body of the Code. They have accordingly been inserted as Chapter IV, containing Articles 45 to 50.

Before doing this, it was necessary to decide whether the transfer certificate should be (1) forwarded from school to school directly, or (2) handed over to the parent or guardian of the scholar, by whom it should be presented when applying for the admission of the scholar into another school; one or other of these plans having been followed in different provinces. The second course involves less trouble to the teachers of both the new and the former school; and though it was pointed out that a teacher might be deterred from expressing his honest opinion about a bad boy upon a document which must be handed over to the boy's parent or guardian, the Committee over-ruled the objection, and decided that the certificate should be given to the parent or guardian of the scholar. (XIV, 2.)

33. F.—**The substitution of Letters of Recognition for the present Teachers' Certificates.**—The rules now in force regarding teachers' certificates require that the head teacher of every school, and every assistant teacher in charge of a class above Standard IV, shall be certificated. This requirement was met, when the rules first came into operation, by giving the needful certificate unconditionally to every teacher, required by the rules to hold one, who was at that time employed in the schools. All certificates issued afterwards have been given according to certain definite rules, except in special cases. These rules specify that any pupil teacher who has satisfactorily completed his apprenticeship; any person over seventeen years of age who has passed either the Matriculation Examination of a recognised University, or the High School Examination in at least four out of the five compulsory subjects, failing only in the second language; or any person who has passed one or other of certain higher examinations; is eligible for a provisional teacher's certificate. These provisional certificates are made permanent after certain varying terms of service with credit.

The system thus briefly described would not work badly, if fairly good teachers could always be got for those appointments in which certificates are

necessary. There is no scarcity of candidates who are, under the rules, eligible for the required certificates, but most of them have either never taught before, or have had a very limited experience of the work; and it is rare to find one who has proved himself able to teach satisfactorily. The schools, however, must be staffed, and under the rules certain posts must be filled by certificated teachers. If, therefore, teachers up to a proper standard of efficiency cannot be found for these posts, those of an inferior standard must be accepted; and certificates must be granted, even although the recipients may know nothing about teaching. It is true that these certificates are only "provisional," and that "service with credit" is the condition to be fulfilled before they will be made permanent; but this is of little value in actual practice, because of the low standard which must be taken in estimating whether a teacher's work is creditable or not, if a deadlock is to be avoided. If even a moderate standard were taken, few provisionally certificated teachers would receive the permanent certificate in a time at all approximating to that allowed for the purpose under the rules. The teachers may and often are doing their best; but they have much to learn which can only be gained by careful study and lengthy experience before they can be expected to teach well. To permit the provisional certificate to remain in force for an indefinite period would be to place it practically on a level with the permanent certificate; while to cancel it would generally cast the holder out of the profession, only to have his place filled by another beginner who would probably be his inferior at the outset, and possibly no better at the end of the probationary period. The existing rules have therefore not only permitted the award of teachers' certificates to mediocrity, they have forced it; and consequently the certificates are not and never have been sufficient evidence that their holders are capable teachers.

34. **Summary of Arguments.**—The weak points in the present rules regarding teachers' certificates are the necessity for issuing certificates to a sufficient number of teachers to fill certain appointments, thereby forcing their issue whether they are deserved or not; and the fact of eligibility for the certificates being made to depend, not upon proficiency in the art of teaching, but merely upon the passing of certain examinations. The result of these rules has been the degradation of the certificate, so that instead of being official evidence of a teacher's worth, it is merely an official permission for the holder to have charge of a certain class or classes, or to be the head teacher of a particular grade of school. The Committee consider that mere licenses to teach ought not to be styled Teachers' Certificates, and therefore they propose to issue for this purpose in future "Letters of Recognition" only, and to grant such a letter of recognition to all teachers now engaged in the schools. It was discussed (II, 2) whether, on the issue of the Letter of Recognition to existing teachers, the old certificates should or should not be recalled, and it was eventually decided to leave them for what they were worth in the possession of their holders. The resolution embodying these decisions runs as follows:—

> *That the certificates required by Section IV of Chapter III of the Code be no longer issued, but that in their place licenses to teach, in a form to be hereafter prescribed, be issued to teachers accepted for that purpose by the Department; with the proviso that the present holders of certificates under that Section be allowed to retain them.* (II, 2.)

Effect is given to this resolution in Articles 53 to 57 of the Revised Code. The form of the "Letter of Recognition for Teachers" approved by the Committee is given in Schedule III of the Revised Code.

35. **G.—The Award to Teachers of Special Certificates of Proficiency.**—The Bengal proposals for the revision of the Code included, in addition to the above, the introduction of a new certificate for teachers, to be issued only to those who give proof of their practical ability as teachers by doing continued good work for a certain time and by teaching before the Inspector, and proof of their theoretical knowledge by passing an examination in school organisation and the art of teaching. The proposals also included a provision for recording on the certificate such examinations as the holder might pass either before or after its issue.

The Committee fully approved of the proposals in general outline, and expressed their belief as to the value such a certificate would be to its possessor, the stimulus it would give to teachers to improve the quality of their teaching in order to gain it, and the effect this would have in remedying, though perhaps only to a slight extent, the serious defect in the present educational system of the absence of a training institution for teachers of European schools. The Committee having agreed that the new certificate should be styled "Certificate of Proficiency in the Art of Teaching," resolved:—

> *That a Certificate of Proficiency in the Art of Teaching be issued to any licensed teacher who may satisfy certain conditions (to be hereafter settled) on the general lines of Mr. Bamford's proposals with that object.* (II, 2.)

36. **Qualifications for the Certificate.**—In discussing the conditions regulating the issue of the Proficiency Certificate (XI, 5), it was agreed that none but recognised teachers (as defined in Article 53 of the Revised Code) who have passed either the Middle School Examination, or some other examination which, in the opinion of the Department, is not inferior to it in point of difficulty, should be permitted to become candidates for the certificate. The Middle School Examination was selected for this purpose because the Committee considered that no one engaged as a teacher ought to be unable to pass it; and a higher examination was not chosen in order to give every teacher, from the highest to the lowest, an opportunity of qualifying for the certificate. Many junior teachers will now be glad to work up for it, who would have been prevented from doing so by a higher preliminary examination; and some of those who qualify for the certificate will probably be stimulated by its possession to prosecute their studies so as to fit them for teaching more advanced work, as the mere possession of the certificate does not entitle the holder to teach in any particular section of a school. (See the note to Article 68 of the Revised Code.)

In order to qualify for the certificate, candidates must teach for two years to the satisfaction of the Inspector. During this period the Inspector will, at his visits to those schools in which candidates for the certificate are engaged, carefully note the progress of the classes under their charge, the methods employed in teaching them, the discipline exercised by the teachers, etc.; and he will not only criticise the work in a friendly way, but

will also give advice where necessary. He will then be in a position at the end of the probationary period to know whether the candidate may be considered to have satisfactorily passed this test. The candidate will also be required to prepare five lessons, two of which must be given to the satisfaction of the Inspector, who will select the particular lessons to be given. He will further be required to gain 50 per cent. of the possible marks in the paper on "School Management and the Art of Teaching" set at the High School Examination. This paper is set specially for teachers, and may be taken by candidates who sit for this paper only.

The rules regarding Proficiency Certificates are given in Article 68 of the Revised Code.

37. **H.—Pupil-teachers. Their Training and Instruction.**—The existing rules regarding pupil-teachers chiefly deal with the conditions under which they may be appointed, the annual examinations they must pass, and the grants to be paid on their account. Nothing whatever is said of their training in the art of teaching; and the only mention of the instruction they are to receive is the stipulation in Article 52 that every pupil-teacher "shall receive one hour's instruction daily from a duly qualified teacher." The successful completion of the pupil-teacher's apprenticeship does not depend in any way upon the work actually done by him in school, but upon his passing an examination in each year of his engagement. As was stated before the Committee, the pupil-teacher system, under such rules, is nothing more than a cheap method of staffing schools, without regard to efficiency. Young boys and girls fresh from the upper part of the school are placed in charge of classes, without any notion of how they ought to set about their work beyond that which may possibly be supplied by their natural intelligence. The head teacher and the rest of the staff are generally fully occupied with classes of their own, so that the pupil-teachers get very little advice about class-management, little if any instruction in the art of teaching, and practically no supervision of their work. (II, 3.)

The Committee regard the training of boys and girls in the art of teaching as the chief aim of the pupil-teacher system, and as the only object of Government in giving grants on account of pupil-teachers. Managers of schools will generally find it a saving to engage pupil-teachers; but this economy should be regarded as a beneficial accompaniment of rather than as the motive for their employment, and should always be limited to such saving as can be effected without any sacrifice of efficiency.

Fully agreeing as to the defects of the present system, the Committee resolved:—

That it is desirable to make definite provision for the instruction of pupil-teachers, and for training them in the art of teaching. (II, 3.)

Effect is given to this by providing that pupil-teachers can only be employed in suitable schools, where proper arrangements are made for their training in the art of teaching, for their supervision while teaching, and for their instruction in their own studies [Article 59 (*a*) of the Revised Code]; and by framing definite rules for such training and instruction (Article 61).

In order to see that this training is carried out, the Inspector will take careful note of the work of the pupil-teacher with his class throughout the year, whenever he has the opportunity. He will also, near the close of the year, hear the pupil-teacher give to his class one of three lessons previously prepared for the occasion. The pupil-teacher's progress in his own studies will be tested by examining him in certain of the papers set at the High School Examination. These three tests must be satisfactorily passed every year in order that the year's work may be approved (Article 62).

38. **Age and Preliminary Qualifications of Candidates.**—It was the general feeling of the Committee that it would be of advantage to raise the age-limit and the preliminary qualifications of candidates for pupil-teacherships, whenever the circumstances of the Province might admit of this being done. The intellectual and moral development of children in India, and the growth of their observing faculties, are slower and later in India than in England; and few boys and girls under 15 years of age are sufficiently advanced in character to exercise usefully the functions of a pupil-teacher. The raising of the age-limit from 14, as at present, to 15, would also give the candidates an opportunity of being better grounded, and therefore better fitted for the much more independent manner in which they will, as pupil-teachers, have to prosecute their studies.

Regarding the preliminary qualifications, passing Standard VI is what is at present required. The fact that individual examination has been condemned, and will probably be largely discontinued, necessitates the selection of some other standard of attainment, and the Middle School Examination affords in these cases the only means of testing the proficiency of candidates at or about that stage. Even where individual examination is retained, the Middle School Examination is better for the purpose than the brief examination in Standard VI held by the Inspector on the occasion of his annual visit. The former is the close of a definite stage in a scholar's career; it is conducted by a Board of Examiners simultaneously for a whole Province; and each subject is much more thoroughly tested. The more advanced course of study is also an advantage, as giving a better foundation for that which has afterwards to be mastered by the pupil-teacher.

Mr. Cope said that, however desirable it might be that candidates for pupil-teacherships should be older and more advanced than at present, he feared there might be difficulties in the way of raising the age-limit and the preliminary qualifications in the Punjab.

The Committee accordingly resolved:—

That it is desirable to raise the preliminary qualifications and the age of candidates for pupil-teacherships, wherever the circumstances of the Province permit.

If, however, in the opinion of any Local Government, this resolution is not suited to the circumstances of the Province, it shall be within the competence of such Local Government to introduce into the articles, to be hereafter framed in accordance with the resolution, any modifications which they may think advisable. (II. 3.)

To carry this resolution into effect, we have provided in Article 51 that boys and girls proposed for pupil-teacherships shall not be under 15 years

of age at the time of their engagement [*b* (1)]; that they shall have passed the Middle School Examination in the first or second class; and that they shall further satisfy the Inspector of their proficiency in reading, hand-writing, and dictation, and, in the case of girls, in needle-work also [*b* (2)]. The latter requirements are prescribed in addition to passing the Middle School Examination, because the subjects mentioned are not tested at that examination.

Provision is made in a note to Article 59 for an alteration of the conditions as to age and preliminary qualifications, should the Local Government think it desirable to do so.

39. **Course of Studies.**—The standards of examination for pupil-teachers given in Schedule II of the present Code cover an extensive course of studies for each year. The Committee consider that, with the limited time which pupil-teachers have at their disposal, it is desirable that their studies should be confined to fewer subjects, in order both to relieve the strain at present felt, and to enable them to study this limited range of subjects more thoroughly. They are also of opinion that a special examination for pupil-teachers is not necessary, and that a small selection of subjects from the High School course for each of the three years of apprenticeship would exactly answer the purpose, and would save the time of the Inspector which he would otherwise have to devote to a special examination. Article 62 (*d*) has therefore been framed in accordance with these views. It prescribes the High School course in Arithmetic, History and Geography as the special subjects for the first year; English and Mathematics for the second year; and a Second Language, School Management and the Art of Teaching for the third year.

It is not intended that pupil-teachers shall study nothing but Arithmetic History and Geography in the first year, and so on. They will during that year naturally continue their studies in the subjects of the second and third year also, giving particular attention, however, to the special subjects for the first year. In the second year, the pupil-teachers' attention will be similarly divided between the courses for the second and the third year; while in the third year, their whole attention can be given to the subjects of examination for that year. The subjects have been arranged so that those which the pupil-teachers are likely to find the easiest are the first in which they shall be examined, and the most difficult the last.

A note to Article 62 (*d*) gives power to the Local Government to modify the standards of examination prescribed in the article, in those cases in which the power of altering the conditions as to age and preliminary qualifications, given in note 2 to Article 59, has been exercised.

Article 64 permits a pupil-teacher to take up the same course in the following year, if he fails to make the required progress in teaching or in his studies [Article 62 (*b*), (*c*) and (*d*)]. This condition is intended to meet the case of those pupil-teachers who work steadily, but can only make slow progress. In case of a second such failure in the same stage, the pupil-teacher will cease to be recognised by the Department.

40. **Grants to Pupil-Teachers.**—We have thought it advisable to frame a fixed scale of grants on account of pupil-teachers, in place of the different

grants payable under the present Code. This scale is given in Article 65 of the Revised Code. Under the existing rules, a pupil-teacher who passes in all subjects, including the three which are optional, can earn R180 in the first year, R205 in the second year, and R230 in the third year of his apprenticeship. Optional subjects, however, have been taken up by very few pupil-teachers; and if we exclude the grant for these, the possible grant is only R120 in the first year, R145 in the second year, and R170 in the third year. According to the scale given in the Revised Code, the grant on account of a pupil-teacher who satisfactorily completes his first-year course is R100, his second-year course R150, and his third-year course R200; half the grant in each case being paid to the pupil-teacher and half to the managers, as in the present rules. The grants under the new rules will, therefore, be R20 less than those ordinarily earned under the present rules in the case of pupil-teachers in their first year, R5 more in their second year, and R30 more in their third year. Thus while the new scale gives a rather higher grant on the average to pupil-teachers who complete their apprenticeship, it is smaller at the outset, and higher at the end. This is intentional, as past experience has shown that many who become pupil-teachers do not complete their apprenticeship, either from failing to pass, or from voluntarily abandoning the teaching profession; and it is but right that higher grants should be paid to pupil-teachers in the later stages, since the longer they continue, the more likely they are to become teachers. For the same reason, the expenditure on pupil-teachers under the new rules will probably be smaller than at present, though pupil-teachers who finish their course will have earned a larger grant.

A new provision is made in Article 65, whereby the grant payable to Managers on account of a pupil-teacher is not forfeited by the failure of the pupil-teacher to pass in the papers set at the High School Examination [Article 62 (*d*)], if the rest of the pupil-teacher's work has been satisfactorily performed. This is only a matter of justice to the Managers, as they must have done their duty to the pupil-teacher throughout the year, or he would have been unable to pass the other tests prescribed in Article 62 (*b*) and (*c*).

41. **Other changes.**—Note (1) to Article 59 requires the engagement of a pupil-teacher to date from the 1st of January. Hitherto there have been great variations in the date of engagement, giving rise to inconvenience in arranging for the simultaneous examination of the pupil-teachers. The new rule will do away with this objection, while there will be no difficulty attending its introduction.

Article 63 provides that any pupil-teacher whose health or physical condition becomes such as to permanently incapacitate him in any way for the duties of a teacher, shall cease to be recognised as a pupil-teacher.

42. A Supplementary Report on Training Colleges will be forwarded afterwards.

43. **K.—Rules for Building Grants to Schools.**—The rules for building grants are found in Chapter V of the present and Chapter VII of the Revised Code (XI, 6; XII, 1). The new provisions that we have introduced are contained in Articles 85 to 89 of the Revised Code, and run as follows:—

85. The sum to be allotted annually for building grants to schools will be fixed provisionally for a term of years. The amount will be notified by the Local Government

to the Department. It will not in ordinary circumstances be reduced, though it may be increased, for any year during that term.

86. Every application for a grant must be submitted to the Department not later than the 31st December, if the grant is to be admissible for sanction during the following financial year. It must contain a certificate from the Managers that the funds at their disposal will, when added to the grant applied for, be sufficient to meet the full cost of the work. If the application is in accordance with the rules and is found to be in other respects deserving of support, it will be included in the list of "approved applications." If not so included, the reasons shall be notified to the Managers.

87. After consideration of all the "approved application," the Department will submit to the Government, by the 31st March following, its recommendations for the distribution of the allotment among the applicant schools.

88. When a grant is sanctioned, the Managers shall be informed whether it will be payable in full from the allotment for the year, or if not, in what years and by what instalments.

89. In the case of an application for a repair grant under Article 83 (b), the Managers will be required to show that the necessity for such a grant has not arisen from the neglect of current repairs in previous years.

The new articles are adopted with little change from the rules which have been current in Lower Bengal for the last two years, where they have been found to work well. The most important of the provisions is that of Article 85, which states that the sum to be allotted annually for building grants will be fixed provisionally for a term of years, will be notified beforehand by Government to the Department, and will not in ordinary circumstances be reduced during that term. We consider this a most salutary provision. It is of the utmost importance, both to the Department and to Managers of schools, when a building project is in contemplation, to have a clear idea beforehand of the amount of money that will be available for this and similar undertakings. Whether a project shall be pushed forward or postponed will often depend upon the knowledge which the Department has of the total sum of money at its disposal; and with such knowledge in its possession it will be enabled to give the most serviceable advice to school managers. The subsequent provision in Article 88 that a grant, if sanctioned, may be spread over a term of years, makes it easy to work with a fixed allotment. In the case of large grants, school managers are in general quite content to have the amount paid in instalments running over three or even four years. It is essential for them to know what grant they may finally count upon; but if they have the assurance of Government on that point, they can either borrow the money from other sources on advantageous terms, or they can make the necessary arrangements with the contractors.

It is not apprehended that the fixing of the allotment will involve any increased expenditure. The amount would in general be fixed by the average expenditure of the previous few years, modified, when necessary, by any knowledge that the Government might have of projects actually in contemplation. In Bengal, for example, the present allotment (R30,000 a year) is equal to the amount included under that head in the Provincial Contract; and that amount was settled by reference partly to past expenditure, and partly to future requirements as far as they could then be foreseen. The amount, when fixed, would be regularly included in the departmental estimates; and proposals

for its distribution, after consideration of all the "approved applications," would be submitted to Government before the beginning of the financial year. The rules also provide, should the necessity arise and should financial conditions be favourable, for making a special grant to meet the case of any large undertaking, for which the ordinary allotment would be insufficient (Article 85).

44. **Building Grants to Schools not under the Code.**—A case has arisen in Lower Bengal in which a school, not receiving a maintenance grant under Chapter II of the Code, but recognised by the Department as efficient, has applied for and received a building grant. In this case the school had declined a maintenance grant because it wished to preserve fuller freedom as to the course of instruction, etc., than the Code permitted; though its scholars were regularly sent up to the Scholarship examinations. The Managers had to execute a Trust Deed on receipt of the building grant; and the Specimen Form of Trust Deed (see Appendix IV of the present Code) contains a provision that a school to which a building grant is made shall be open to the inspection of the Department. The Managers in the present instance demurred to being brought under the Code by the mere fact of their having obtained a building grant. The objection was allowed by the Local Government, and the clause was struck out. We have thought it advisable to make definite provision for such cases; and we have accordingly added to Article 91 of the Revised Code a note that, "in the case of a school not receiving a maintenance grant, the inspection shall be limited to ascertaining that the buildings are maintained in good repair, that the sanitary arrangements are satisfactory, and that the school is properly conducted." In Article 92 we have also provided that the Trust Deed, of which the standard form used in Lower Bengal is given in the Appendix to the Code, shall be subject to any modifications that the Local Government may wish to introduce.

45. **Acquisition of Land for Schools.**—It was brought to our notice that schools, especially those in crowded localities in large towns, are frequently hampered by the difficulty of acquiring land for further extensions, whether of the building or of the play-ground. The importance that we have attached to the encouragement of drill, gymnastics and manly sports brings this difficulty into special prominence. It was suggested (III, 3) that Government might give valuable help to schools by enabling them to acquire adjoining property, by compulsory powers, for the enlargement of the play-ground or for other similar purposes. We are in doubt whether the acquisition of land for the use of schools under private management can properly be described as having been made "for a public purpose," as required by the Act; but we consider the matter so important that we have thought it desirable to bring it to the notice of Government. Our views are expressed in the following Resolution (IV, 5):—

That in consideration of the difficulties arising, especially in crowded neighbourhoods, from the want of land required for the extension of schools and of play-grounds, it is desirable in the opinion of the Committee that the right of Government to acquire land for public purposes should be extended so as to include the acquisition of plots of ground, to be afterwards transferred on suitable terms to the schools concerned.

46. **L.—The more general Adoption of the High School Course.**—In discussing the relative merits of the High School and the Entrance course as regards their suitability for scholars in European Schools, we all agreed with the opinion common among teachers as to the superiority of the former. It

is unquestionable that a more extensive, and a much more thorough knowledge of English is required for passing the High School than for passing the Entrance Examination, and that, taking the subjects all round, a higher number of marks must be gained in order to pass; while it is generally accepted that the examiners take a higher standard in awarding marks, and that the examination altogether is a better and more searching test than that afforded by the Entrance Examination.

In spite of this recognised superiority (perhaps, to some extent, in consequence of it), there is in nearly every Province a very evident preference shown by scholars and their parents for the Entrance Examination, particularly where boys are concerned. If we take Bengal alone as an instance, we find that during the last five years the number of candidates from European Schools averaged 22·4 at the High School Examination, as against 123 at the Entrance. Again, the number of European Schools from which they were presented averaged 8·4 against 15·6. One reason for this is that while the High School Examination is more difficult than the Entrance Examination, passing it does not prove nearly so serviceable afterwards in getting a situation. In commercial circles the former examination is almost unknown, and therefore a boy is not asked if he has passed it, nor is his certificate of having passed it of much use, when he seeks a situation; whereas having passed the Entrance Examination always tells in his favour. Other circumstances which militate against the popularity of the High School Examination are its non-recognition in some cases, particularly in England, as equivalent to the Entrance Examination; the fact that no scholarships are awarded on the results of the examination; and the need for the revision of the syllabus given in Schedule I (IV, 13). In reference to the last point, and in order to express the opinion of the Committee that the High School course should be studied in European Schools in preference to that for the Entrance Examination, it was resolved:—

> *That it is desirable to afford encouragement to High Schools to take up the High School course under the Code rather than the Entrance course of an Indian University; and with that view to revise Schedule I-A of the Code, in order to remove certain objections which have been found to prevent schools from adopting the High School course* (V, 4).

Effect was given to the latter portion of this Resolution by making the changes in Schedule I-A, detailed at the end of the Proceedings of the Thirteenth meeting.

47. **Encouragement to be offered by Government.**—Time will eventually establish the High School Examination upon a right footing as regards the esteem in which it will be held by employers; but the Committee are of opinion that a just appreciation of the examination would be hastened, and a strong inducement would be offered to both scholars and schools to immediately take up the High School course, if it were made quite clear that candidates for admission to the Public Service would gain some definite advantage by passing the High School in preference to the Entrance Examination. We therefore resolved:—

> *That, in the opinion of the Committee, more complete effect should be given to the repeated declaration of Government that preference*

would be given to the High School Certificate over the Entrance Examination Certificate, as a qualification for admission to the Public Service (V, 6).

48. **Recognition of the High School as equivalent to the Entrance Examination.**—By some Indian Universities, the High School Examination has been definitely recognized as equivalent to the Entrance, as qualifying a candidate for admission to the next higher examination of the University; but this equivalence has not been recognised outside India. It was mentioned above that boys proceeding to Edinburgh to study medicine are exempted from the Preliminary Examination if they have passed the Entrance Examination, while the High School Examination is not recognised for this purpose. The British Medical Council are also prepared to accept the Entrance certificates of Indian Universities, for the admission of students to certain courses in Medicine and Dentistry, provided the standard includes certain particular subjects, such as Logic or a second European language. These subjects are not now included in the standard of the Entrance Examinati n, but they are optionally included, under our revised Schedules, in that of the High School Examination. It is therefore probable that, if a representation to this effect were made by authority, the Medical Council would accept the latter certificate in lieu of the Entrance, on being assured that it is accepted as equivalent by the Universities concerned. In order to meet such cases it was resolved :—

That in the opinion of the Committee it is desirable that the Secretary of State should be moved, through the Government of India, to address the governing bodies of those Institutions which at present accept, for certain purposes, the Entrance Examination certificates of an Indian University, with the object of inducing them to accept, for the same purposes, the High School certificates issued by the Education Departments of those Provinces in which the Universities have recognised or may hereafter recognise them as equivalent to the Entrance Examination certificates (V, 5).

49. **Provision of High School Scholarships.**—As a further means of encouraging the adoption of the High School in preference to the Entrance course in European Schools, the Committee consider that a certain proportion of the scholarships now awarded on the results of the Entrance Examination, should be reserved for European candidates passing the High School Examination, the remaining scholarships for the Entrance Examination being retained for Native candidates only. If this is sanctioned, it will be for the Local Governments to decide in what proportion the scholarships now given by them shall be divided between the two examinations. In discussing this question, it was pointed out (IV, 13) that European candidates who have in other respects qualified for Entrance scholarships are not infrequently debarred from holding them by the rule which requires that these scholarships can only be held by candidates who can read and write one of the Indian vernaculars with facility. The Resolution regarding the transfer of scholarships from the Entrance to the High School Examination runs as follows (V, 8) :—

That a certain proportion of the scholarships now awarded by the Local Governments on the results of the Entrance Examination be reserved

for candidates passing the High School Examination; such proportion to be determined by each Local Government.

Boys who continue their studies after passing the High School Examination will probably have many different objects in doing so. Some may wish to prepare for the higher examinations of one of the Indian Universities, others may be striving to gain admission into some department of Government Service, others may be working with a view to enter some profession, and others again may intend to pass through one of the English Universities. It is therefore desirable that scholarships gained on the results of the High School Examination should not be confined to students reading for the University Examinations, as in the case of the Entrance Scholarships. Accordingly the Committee resolved, in continuation of the preceding Resolution (V, 8) :—

That scholarships so reserved for European scholars should be tenable no only as at present by students reading for the University Examination, but by students pursuing a recognised course of study in any institution within the Province approved for this purpose by the Local Government.

Provision for giving effect to the two foregoing Resolutions is made in Articles 107 to 109 of the Revised Code.

50. The Remaining Alterations in the Code.—The reasons for the other more important changes in the Code are given below :—

ARTICLE 3.—This article stands unchanged, although the Committee discussed (VI, 2) the question whether the term "European," as used in the Code, should not be so widened in meaning as to include those Native Christians who have entirely adopted European habits and modes of life, and who are therefore completely cut off from all association with their own countrymen.

As an instance of the working of the present rule, the President related the circumstances of a recent case in which it involved hardship. At the last Scholarship Examination for European schools, a Native boy was disqualified by birth for a scholarship which he had otherwise gained. He belongs to a family which has been Christian for two generations back. He has spoken English all his life, and has been brought up exactly like a European, in the European part of Calcutta, associating only with Europeans. His parents will not consent to send him to any but a Christian School, and there are no schools for Native Christians of the same social standing. He is thus practically debarred from the educational privileges open to Natives, while the terms of Article 3 shut him out from those open to Europeans.

It was pointed out that in cases of this kind, not only does the boy lose the scholarship, but the school which he attends suffers also, as it can draw no grant on his account. [See Article 26, Note (1).]

While fully recognising the real hardship in such cases, we are not agreed as to the desirability of attempting to remove it by modifying the article. We desire, however, to draw the attention of Government to the difficulty, and to suggest that Local Governments may be permitted to make

special arrangements for the admission of Native Christians to the benefits of the Code, if they desire to do so, under some such conditions as the following :—

(1) That they have adopted in every respect European habits and mode of life ;

(2) That they habitually speak the English language at home ;

(3) That they are recommended for the privilege by the Managers of a European school into which they have been admitted as scholars ;

(4) That the Inspector, after any further inquiry that he may consider necessary, recommends their admission to the full benefits of the Code.

ARTICLE 4.—This article is an enlargement of Article 12 of the present Code. The word "Managers" as used in the Code is defined in this place so that the explanation may precede the use of the term.

ARTICLE 5.—In the corresponding article (4) of the present Code, maintenance grants alone are referred to, and the general conditions upon which these were to be given were stated. Building grants, which are not mentioned in the corresponding article of the present Code, have been included in the revised article, and we have made no reference to conditions, as these are fully specified afterwards.

ARTICLE 7.—A new clause (*c*) has been added to the original article (6), affirming the provisions, expressed or implied, of the present Code, that grants are not given on account of either non-Europeans, or of children under three years of age. Another new clause (*h*) has also been added, excluding private schools from the privilege of Government grants-in-aid. This question has been discussed in paragraph 5 of the Report.

ARTICLE 8.—A new clause (*f*) has been added to the original article (7), requiring the proposed annual expenditure to be stated when an application is made for a grant-in-aid. This information is required that the need for Government aid may be ascertained.

ARTICLE 9.—A certain portion of the old article (8) had to be omitted on account of the changes in the rules for the calculation of maintenance grants. (See Section II of Chapter II.)

It was thought desirable to add a new clause to this article providing that, when an application for grant-in-aid is rejected, the grounds of rejection shall be communicated to the managers.

ARTICLE 10.—This is a new article intended to guide the Inspector in determining the amount of the temporary grant to be awarded to schools newly brought under the Code, and in fixing the time when such schools should begin to receive grants under the ordinary rules.

ARTICLE 11.—A slight alteration has been made in the original article (9).

Article 10 of the present Code has been cancelled as unnecessary, since Article 14 of the Revised Code provides that none but efficient schools shall receive grants.

ARTICLE 13.—This is a new article intended to avoid any difficulty which might otherwise arise as to the interpretation of one or other of the articles of the Code.

Article 13 of the present Code has been cancelled as unnecessary.

ARTICLE 14.—A change has been made in the wording of the preamble, and alterations in and additions to the succeeding clauses have also been made as follows:—

Clause (*b*) has been remodelled and expanded in order to more clearly define what the conditions concerning school premises, buildings, boarding arrangements, furniture and apparatus must be, in order that they may be considered satisfactory. The note to Article 87 of the present Code has been inserted as Note 3 to this clause.

Clause (*c*), corresponding with clause (*d*) in the present Code, has been modified in accordance with the changes in the rules regarding teachers given in Chapter V.

Clause (*d*), corresponding with clause (*c*) in the present Code, has been enlarged so as to indicate that school time-tables must be approved by the Department, and that such approval shall apply to the subjects of study as well as to their arrangement. The last provision is desirable in order that the Inspector may have the power to prohibit the introduction into the school course of any subjects which the staff is not competent to teach.

Clause (*e*) is new, as are also the Notes 1, 2, and 3, which follow. The clause adds "satisfactory teaching" to the other conditions which schools must fulfil in order that they may earn grants. The three notes declare the procedure when an aided school fails to satisfy one or more of the conditions set forth in the article.

ARTICLE 15.—Clause (*d*) has been enlarged so as to indicate by whom the audit of the school accounts may be made. The new clause (*e*) has been added to emphasise the fact that Government aid is given on the condition of thorough inspection.

ARTICLE 16.—This article introduces an important change. In the corresponding article (16) of the present Code, the classification of schools as primary, middle, or high, depends solely upon what classes have, up to the time of classification, been taught in the school. The revised article makes classification dependent upon fitness; that is, upon the more or less advanced character of the instruction for which there is a real and permanent demand, upon the standard up to which the school staff is competent to teach, and upon the number of classes for which that staff is sufficient.

The requirements of the Primary, Middle, and High School Examinations, as detailed in Chapter VIII, have been adopted as the standards of education to be considered in applying the new rules for classifying schools.

ARTICLE 17.—This article concerns itself with the division of schools into sections—infant, primary, middle and high. The word "department" is used in the present Code to designate a division of a school, but, as this word is continually used throughout the Code in another sense, the word "section" has been

substituted for it in the Revised Code. The Infant, Primary and Middle Sections defined in the revised article correspond exactly with the Infant, Primary and Middle Departments of the present Code; but the High Section is made more comprehensive than the High Department was. The High Section includes those scholars studying beyond Standard VII, not only for the High School Examination, as is the case with the High Department of the present Code, but also for such other examinations as may be specially recognised for this purpose by the Local Government. This widening of the studies permissible in High Sections is dealt with in paragraph 20 of this Report.

A new and most important rule is introduced at the end of the article. By it a scholar may not be promoted from the Primary to the Middle Section of a school, or from the Middle to the High Section, until he has passed, in one case the Primary, and in the other the Middle School Examination, unless in the opinion of the Inspector peculiar circumstances justify such promotion. The peculiar circumstances which the Committee had in view were the cases of boys who were quite fit for promotion, but were prevented from attending the examination from some unavoidable cause such as sickness; and also those exceptional cases where a boy's failure to pass might be due to his weakness in one subject only, and consequently, where he would benefit more by promotion than by being kept back. The main object of the new rule is to ensure thorough grounding before passing on to the more advanced work: but, incidentally, it will be useful in checking the not unnatural tendency to force on boys into classes for which they are unfitted, in order that they may earn the larger grant paid for scholars in the higher section.

ARTICLE 18.—This new article defines the standard up to which schools of each class may teach, and is intended to prevent teachers from attempting work for which they are unfitted, and to check the formation of additional classes where the teaching staff would be insufficient to conduct them properly.

In the second paragraph, provision is made for exceptions to the rule being allowed under special circumstances. In making this provision the Committee had in view such instances as (1) schools on behalf of which it is claimed that promotion to a higher class would be justified under the conditions laid down in Article 16, in which case the Inspector, before coming to a decision, might permit the higher work to be taught for a time as an experiment; and (2) schools in out-of-the-way places, where an occasional scholar might be permitted to be taught beyond the ordinary limits if the teacher was competent, and if it could be done without detriment to the teaching of the rest of the school.

ARTICLE 19.—This article has been modified on account of (1) the publication of an additional course, B, in Schedule I, (2) the permission granted in Article 17 to substitute for the high school course the preparation for certain other examinations, and (3) the important variation from the ordinary course of instruction in schools for the poor, provided for in Article 20.

ARTICLE 20.—This new article embodies our unanimous opinion that schools for the poor should be permitted, without loss of grant, to vary from the ordinary course of instruction given in Schedule I, by substituting, for a part of the work therein specified, an approved course of training in one or more kinds of practical work. (See III, 3 and IV, 3.)

The concession is safeguarded by requiring, before any deviation from the ordinary course is made, that the approval of the Department shall be obtained both to the portion of the old course to be omitted, and to the details of the new course or courses to be substituted. We believe that this concession will enable the managers of schools for the poor to provide a more suitable and serviceable education for the scholars concerned, than could possibly be given by rigidly adhering to any definite course that could be prescribed. The capabilities and the future needs of children attending different schools vary considerably, and the course of instruction ought to vary accordingly. (See also paragraphs 24—28 of this Report.)

ARTICLE 21.—This is simply a re-arrangement of the matter given in the original article for schools working under Course A of Schedule I.

ARTICLE 22.—This article is new, as it concerns schools following Course B; and in this case, provision is made for prohibiting the teaching of any or all of the optional subjects in schools where they are not likely to be properly taught, or where such teaching would prejudicially affect the teaching of the compulsory subjects.

ARTICLE 23.—This new article has been framed in accordance with the terms of the following resolution :—

> *That, in the opinion of the Committee, the restriction now imposed upon Managers of schools, in the note to Article 18 and in Article 25(a), with regard to the classification of scholars, is no longer necessary; and that, subject to the control of the Inspector the Principal Teacher of a school shall be at liberty to place a scholar in different standards for different subjects. It shall, however, be in the power of any Local Government to place such restrictions upon the classification of scholars as it may think expedient.* (VIII, 1.)

We thought it desirable that teachers should be granted a certain amount of freedom in classifying their scholars, instead of being bound down by the rigid rule now in force, according to which a scholar must be taught every subject in the same class. For average scholars, of course, the present rule is no hardship; but in nearly every class there are a few scholars who, although perhaps on a level with the rest in many subjects, are much ahead of or behind them in the remainder. During lessons in these subjects, scholars who are ahead of the class have little or no interest in what is going on, and so fall into inattentive and lazy habits, and waste their time. On the other hand, scholars behind the class must either be themselves neglected, or be the cause of the rest of the class being neglected, by taking up an undue amount of the teacher's time and attention. The new article is intended to remedy this state of things, by permitting boys to study each subject in that class for which they are best fitted. The application of the new rule will not result in a general shuffle of the boys amongst the classes at each change of lessons, as it is only in those subjects where previous knowledge is essential before taking each new step, such, for example, as Latin or Euclid, where a change of class would usually be of advantage. The article gives the Inspector power to control the re-classification, so that it shall not be carried out to an injudicious extent by inexperienced teachers. Power is also given to any Local Government, which

may consider this change in the rules unsuited to the circumstances of the Province, to impose such general restrictions upon classification as it may think expedient. Freedom of classification is now permitted by the English Code, and it is believed to be even more necessary in India.

The important bearing of classification upon the amount of the grants under the new rules in Section II of Chapter II, necessitated the framing of a definite rule for determining to what particular class a scholar should be held to belong, who receives instruction in different subjects in different classes. A note has therefore been added to Article 22, stating that such scholar's name shall be entered in the lowest of those standards in which he may be placed for Reading, Arithmetic, and English Grammar and Analysis, this arrangement being considered by the Committee the best for the purpose.

ARTICLE 24.—The only important change introduced into this article is the provision that when two school meetings, occupying together not less than four hours of secular instruction, are held on the same day, the time may be distributed unequally between them, the only restriction being that the minimum time given to secular instruction at the shorter of the two shall be one hour. This modification of the original rule will permit an hour to be given to continuous religious instruction at an early morning meeting of two hours' duration, and will be greatly appreciated.

Clause (*c*) of the corresponding article (20) of the present Code has become a note to Article 26 in the Revised Code, that being a more appropriate place for it.

ARTICLE 25.—In the corresponding article (19) of the old Code, a school was required to hold 400 school meetings during the year, in order that the full grants under this section might be earned. In many schools, particularly those in the hills, this limit has been found difficult of attainment. In illustration of this, the boys at St. Paul's School, Darjeeling, attend two meetings a day for six days in the week throughout the whole of the school term, March to November, except for a few days at Easter and on incidental holidays. At the Darjeeling Girls' School a casual holiday has been unknown for months at a stretch. It is unlikely that the change will affect any schools except those where it has been found difficult to make up the full 400 meetings, for in other schools it has never been the practice to stop when they reach the limit, which clearly indicates the absence of any desire to be content with the minimum requirements of the Code in this respect. The Committee were entirely agreed in accepting 380 meetings as a reasonable minimum, in place of the 400 meetings now required.

Note (1) declares that the school year shall ordinarily correspond with the calendar year. As annual examinations are now no longer necessarily held, and indeed will probably be largely discontinued, the old rule could no longer be retained. A great advantage will result from the school year being the same in different schools, as scholars who are transferred from one school to another will no longer find themselves placed in a class which has studied the year's course for a longer or shorter time than themselves.

Provision is made for the retention of the old rule, if thought expedient, in cases where an annual examination on a fixed date is still held.

Note (2) is new, and provides for the case where a grant has to be calculated under the new rules for a school which has not been under the Code for a full year.

ARTICLE 26.—This is a new article, the object of which is to obtain, for the calculation of grants, figures which will indicate as nearly as possible the normal daily attendance in the schools. This end is attained by calculating the average attendance at 350 of the best attended school meetings during the year, and thereby eliminating from the calculation those days of exceptionally low attendance which frequently occur in every school from bad weather, prevalent sickness, or other similar causes. The figures so obtained are termed in the revised rules "ordinary attendance." All the members approved of the new article except Messrs. Boutflower and Cope, who dissented on the ground that it would tend to diminish the interest of the teachers in securing as regular an attendance of scholars as possible. The members forming the majority maintained that this need not be feared, as the teachers could not afford to be lax in this respect at the beginning of the year, not knowing how the attendance might be affected during the year from causes beyond their control; and there would always, up to the end of the year, be a strong inducement to get as high an attendance as possible, in order to improve the average of the best 350 meetings.

Note (1) to this article gives the substance of clause (*c*) of Article 20 in the old Code, and it also explicitly provides for the exclusion of non-Europeans from all calculations of attendance.

Note (2).—We consider that necessary absence from school for any of the three purposes mentioned in the note ought not to affect the school grant. We have accordingly provided that attendances may be credited in these cases.

ARTICLES 27 to 34 embody the new rules for distributing grants-in-aid to day-schools, the principles of which are discussed in paragraphs 6 to 19 of this Report.

ARTICLE 36.—This article defines the conditions under which grants are made to night-schools. Clauses (*a*) and (*b*) are reproductions of Article 35 (*a*) and (*b*) of the old Code, except that the latter portion of Article 35 (*b*), not being required under the new grant-in-aid rules, has been omitted. Clause (*c*) of the new article provides for the adoption of any suitable graduated course of studies which may be approved by the Inspector.

ARTICLE 37 gives the scale for calculating maintenance grants to night-schools, corresponding in principle to those for calculating such grants to day-schools.

Section IV of Chapter II in the present Code, relating to grants to boarding schools, disappears in the Revised Code, certain portions of it having been cancelled, and the remainder transferred to other parts of the new Code as follows. Articles 36 and 37 have been cancelled. The note to Article 37 has become a note to Article 14 (*b*). Article 38 has become Article 32, the maximum grant to each boarder being raised from R5 to R6, so as not to interfere with the present maximum in force in the North-Western Provinces, and the words "in the province" being inserted after "residing in places." Article 39, slightly modified, has become Article 31, the maximum of R5 being here also raised to R6 for the above-named reason.

ARTICLE 38.—This article and Note (1) thereto are reproductions of the old Article 40 and its note, slightly altered in form. The way in which the article affects schools for the poor has been already considered in paragraph 31. Note 2 was added to avoid inflicting hardship upon schools taught by members of religious orders who receive no fixed salaries, by permitting, for the purpose of this article, an addition to be made, in the accounts of the income of the school, of a sum equivalent to the difference between the actual expenditure upon such teachers, and the amount which would fairly remunerate them at the current market rate. The sum thus added is to be entered below the balanced statement of actual income and expenditure.

ARTICLES 39 AND 40 are modified forms of Articles 41 and 42 of the old Code.

Article 43 of the old Code is cancelled, as scholars' registers are not required under the new grant-in-aid rules.

ARTICLE 42.—A slight alteration of the last sentence in the first paragraph of the old article (45) was necessitated, on account of the annual examination having been superseded by visits of inspection under the new rules for grant-in-aid. The first sentence in the second paragraph has been omitted, and a statement has been substituted defining the persons authorised to make entries in the log-book, in whose custody the book is to remain, and what persons have the right to inspect it.

ARTICLE 43.—This article provides for the distribution of the work among the school staff being recorded in the log-book, in addition to the information required by the original article.

ARTICLE 44.—The last sentence of the corresponding article (47) of the old Code has been omitted, as it is unnecessary for the Inspector to make an entry in the log-book every time he visits a school.

Chapter VI of the present Code (Scholarships) contains rules regarding both scholarships and the examinations upon the results of which they are awarded. It was decided (XIV, 3) that the rules regarding the examinations should be given in a separate chapter, which should also contain the rules for the High School Examination; and that the Primary Scholarship and Middle Scholarship Examinations should in future be styled Primary School and Middle School Examinations, the majority of the candidates attending them being ineligible for scholarships, and many of those who are eligible not being presented with any hope of gaining a scholarship. The results of the examinations will still be used for the award of scholarships, although that is no longer their chief purpose. The articles for this new chapter (Chapter VIII of the Revised Code—Primary, Middle, and High School Examinations) were discussed and approved at the fourteenth meeting of the Committee, and comprise Articles 98 to 106.

ARTICLE 98 defines the purpose of these examinations and their scope; and a note to the article calls attention to Article 17, in which it is specified that promotion from the primary and middle sections of a school to those above will ordinarily depend upon passing the Primary and the Middle School Examinations.

ARTICLE 99 deals with the times when and the places where the examinations shall be held. Under the new rule regarding the school-year

given in Note 1 to Article 25, the school-year will usually be drawing to a close at the time fixed for these examinations.

ARTICLE 100 gives the substance of Article 105 of the present Code.

ARTICLES 101 TO 103 apply to examinations in those Provinces where Schedule I-A has been adopted.

ARTICLE 101 gives the substance of Article 106 of the present Code, and adds a reference to Schedule I-A for the subjects of the High School Examination.

ARTICLE 102 prescribes the marks which must be gained to pass the examinations. The rules regarding the Primary and the Middle School Examinations are those given in Article 107 (*b*) of the present Code, those regarding the High School Examination are new, as none are to be found in the present Code.

ARTICLE 103 gives the rules regarding the classification of the successful candidates found in Article 107 (*c*) and Article 29 of the present Code.

ARTICLES 104 TO 106 apply to examinations in those Provinces where Schedule I-B has been prescribed.

ARTICLE 104 gives for each of the three examinations the subjects of examination and the conditions which must be fulfilled in order to pass. Among the latter is the new regulation that, in the case of each optional subject taken up by a candidate, no marks will be counted unless at least 30 per cent. of the possible marks in that subject have been gained. The object of this rule is to discourage the teaching of a smattering in one or more of the optional subjects, in the hope that a few marks may be gained which will swell the total and so help towards gaining the minimum marks required for a pass. Under the new rule it will not be any advantage, but the reverse, to attempt the teaching of any subject if it is not taught well.

ARTICLE 105 deals with the additional subject for teachers, School Management and the Art of Teaching.

ARTICLE 106 gives the rules for classifying successful candidates. To encourage thoroughly good work, the article provides that candidates who gain 75 per cent. of the possible marks in any subject shall be gazetted as having gained honours in that subject.

The chief alterations made in the chapter on Scholarships are first, the transfer of all the matter referring to the Primary and Middle Scholarship Examinations to the new Chapter VIII above referred to, as already explained; and secondly, the provision made in Articles 107 to 109 for high scholarships, in addition to middle and primary scholarships as at present. The question of awarding high scholarships is discussed in paragraph 57 of this Report.

ARTICLES 107 TO 109 are enlargements of the corresponding articles (102 to 104) of the present Code.

The substance of Articles 105, 106, and 107 of the present Code has been transferred to the new Chapter VIII as already explained. The last sentence of Article 107 (*b*) of the present Code has been cancelled. No candidate who failed to gain 33 per cent. of the marks in English and Arithmetic, or 45 per cent. of the aggregate marks, would have the slightest chance of gaining a scholarship; and therefore the rule is not required.

ARTICLE 110.—It is sometimes held that boys and girls do not compete for scholarships on equal terms; and the fact that girls have to spend a considerable time upon needlework, a subject which is not at present tested at the examination for scholarships, gives strong support to the assertion.

The question of introducing needlework into the Primary and the Middle School Examinations was discussed at some length by the Committee (XVI, 5), who were unanimously of opinion that its introduction would stimulate the teaching of the subject and would be welcomed by the schools. We were not agreed, however, as to the possibility of conducting the test fairly were it to be introduced, or as to the effect which the necessary restriction of the test to small samples of work would have upon the training of the girls in useful practical work. It was accordingly resolved:—

> *That the introduction of Needlework in the Primary and Middle School Examinations should be left to the discretion of Local Governments.*

As a means of doing away with any unfair competition between boys and girls on account of needlework another plan suggested itself, namely, to divide the scholarships in a certain proportion between boys and girls. We have therefore provided in Article 110 that "it shall be open to the Local Government to allot a certain number of scholarships, before the examination, to boys and to girls respectively."

ARTICLE 111.—This article has been adopted from the Bengal notes to the present Code, where it appears as a note to Article 109.

Articles 114 and 115 vary in form from the corresponding articles (111 and 112) of the present Code, but are the same in effect.

The Schedules and the Appendix to the Code are, in the dual Code forwarded herewith, printed upon opposite pages (the present Code to the left, and the Revised Code to the right) and not in half-column like the body of the Code.

It was not thought necessary to reproduce Schedules II, III and IV of the present Code, dealing with "Standards of Examination for Pupil Teachers," "Training Colleges—Subjects of Examination," and "Form of Scholar's Register," as these have been cancelled in the Revised Code. In the case of the Appendix, also, only the revised Form of Trust Deed has been printed.

CODE OF REGULATIONS

FOR

EUROPEAN SCHOOLS IN BENGAL, 1889-90.

CHAPTER I.

[PRELIMINARY.]

1. A sum of money is annually granted by Local Governments and Administrations for European education in India. This grant is administered by the Education Department of each Local Government or Administration, hereinafter called the Department.

2. The object of the grant is to aid local exertion in maintaining efficient schools for European children, and training colleges for teachers in such schools.

3. The term 'European' is used in this Code to signify any person of European descent, pure or mixed, who retains European habits and modes of life; but the Local Governments shall in all cases of doubt decide the proper application of the term. The term 'scholar' is used to signify European scholar.

(See Article 12.)

4. Aid to maintain schools is given by monthly and annual grants to the managers, conditional upon the attendance and proficiency of the scholars, the qualifications of the teachers, and the state of the schools.

5. Every school aided by Government under the provisions of this Code shall be conducted in accordance with the following regulations:—

(*a*) It shall not be required, as a condition of any child being admitted into or continuing in the school as a day-scholar, that he shall attend or abstain from attending any Sunday school or any place of religious worship, or that he shall attend any religious observance or any instruction in religious subjects in the school or elsewhere, from which observance or instruction he may be withdrawn by his parent, or that he shall, if withdrawn by his parent, attend the school on any day exclusively set apart for religious observance by the religious body to which his parent belongs.

CHAPTER I.

PRELIMINARY.

1. A sum of money is annually granted by Local Governments and Administrations for European education in India. This grant is administered by the Education Department of each Local Government or Administration, hereinafter called the Department.

2. The object of the grant is to aid local exertion in maintaining efficient schools for European children, and training colleges for teachers in such schools.

3. The term 'European' is used in this Code to signify any person of European descent, pure or mixed, who retains European habits and modes of life; but the Local Governments shall in all cases of doubt decide the proper application of the term. The term 'scholar' is used to signify European scholar.

4. Every school to which aid is given shall be under the management of a governing body, hereinafter called the managers, who shall be responsible for the maintenance and control of the school, and for the fulfilment of all the conditions upon which the grant is made.

5. Aid is given in the form of (*a*) maintenance grants, under the provisions of Chapters II and VI, or (*b*) building grants, under the provisions of Chapter VII.

6. Every school aided by Government under the provisions of this Code shall be conducted in accordance with the following regulations:—

(*a*) It shall not be required, as a condition of any child being admitted into or continuing in the school as a day-scholar, that he shall attend or abstain from attending any Sunday school or any place of religious worship; or that he shall attend any religious observance or any instruction in religious subjects in the school or elsewhere, from which observance or instruction he may be withdrawn by his parent; or that he shall, if withdrawn by his parent, attend the school on any day exclusively set apart for religious observance by the religious body to which his parent belongs.

Code of Regulations for European Schools in Bengal, 1889-90.

(*b*) The time or times during which any religious observance is practised, or instruction in religious subjects is given, at any meeting of the school, shall be either at the beginning or at the end, or at the beginning and the end of such meeting, and shall be inserted in a time-table to be kept permanently and conspicuously affixed in every school-room; and any day-scholar may be withdrawn by his parent from such observance or instruction without forfeiting any of the other benefits of the school.

(*c*) The school shall be open at all times and in all its departments to the inspection of the departmental Inspector, so, however, that it shall be no part of the duties of such Inspector to enquire into any instruction in religious subjects given at such school, or to examine any scholar therein in religious knowledge, or in any religious subject or book.

No grant is made for or in respect of—

(*a*) any instruction in religious subjects;

(*b*) any school which is not subject to the inspection of the Department;

(*c*) any school in which the number of non-Europeans exceeds 25 per cent. of the total number of scholars, or such smaller percentage as the Local Government may, by special order, prescribe for any particular school or place;

(*d*) any school with an average daily attendance of less than 12 European scholars, unless, in the opinion of the Department the circumstances of the school are such that it is likely to be maintained in efficiency;

(*e*) any school or department of a school which the Local Government declares to be unnecessary or unsuited to the requirements of the locality;

(*f*) any school the income of which from all sources is sufficient, in the opinion of the Local Government, to maintain it in efficiency.

7. No school shall be placed on the list of those to which grants may be made until an application is sent to the Department of the province in which the school is situated. The application shall contain the following particulars, according to a form supplied by the Department:—

(*a*) Class of school.

(*b*) Names and qualifications of the teachers.

Code of Regulations for European Schools in Bengal, 1895.

(*b*) The time or times during which any religious observance is practised or instruction in religious subjects is given, at any meeting of the school, shall be either at the beginning or at the end, or at the beginning and the end of such meeting, and shall be inserted in a time-table to be kept permanently and conspicuously affixed in every school-room; and any day-scholar may be withdrawn by his parent from such observance or instruction without forfeiting any of the other benefits of the school.

(*c*) The school shall be open at all times and in all its departments to the inspection of the departmental Inspector, so, however, that it shall be no part of the duties of such Inspector to enquire into any instruction in religious subjects given at such school, or to examine any scholar therein in religious knowledge, or in any religious subject or book.

7. No grant is made:—

(*a*) on account of instruction in religious subjects;

(*b*) to any school which is not subject to the inspection of the Department;

(*c*) on account of non-European scholars or of scholars under three years of age;

(*d*) to any school in which the number of non-Europeans exceeds 25 per cent. of the total number of scholars, or such smaller percentage as the Local Government may, by special order, prescribe for any particular school or place;

(*e*) to any school with an average daily attendance of less than 12 European scholars, unless, in the opinion of the Department, the circumstances of the school are such that it is likely to be maintained in efficiency;

(*f*) to any school or department of a school which the Local Government declares to be unnecessary, or unsuited to the requirements of the locality;

(*g*) to any school the income of which from all sources is sufficient, in the opinion of the Local Government, to maintain it in efficiency;

(*h*) to any school which is conducted for private profit, or which is farmed out by the managers to the teachers.

NOTE.—To any school now receiving a grant under the Code, which would be debarred from such grant by the operation of clause (*h*), this clause shall not apply so long as the school remains in the possession of its present proprietors.

8. No school shall be placed on the list of those to which maintenance grants may be made until an application is sent to the Department. The application shall contain the following particulars, according to a form supplied by the Department:—

(*a*) Class of school.

(*b*) Names and qualifications of the teachers.

Code of Regulations for European Schools in Bengal, 1889-90.

(c) Number of scholars in each standard (Schedule I).

(d) Scale of fees.

(e) Probable income from all sources, other than the grant.

The Inspector shall thereupon visit and report on the school.

8. If the application is approved, the Department will inform the managers from what date the school will be regarded as coming under the Code, and in what month the Inspector will make his annual visit. The month will remain unaltered, unless the Department informs the managers of a change. Notice of the day of the Inspector's annual visit will be given beforehand to the managers.

9. The Inspector may visit an aided school at any other time without notice.

10. No grant is sanctioned except on a report from the Inspector, unless some unforeseen cause makes it impossible for him to visit and report upon the school.

11. The managers of a school must appoint a correspondent with the Department, and must at once give notice to the Department of any change of correspondent.

12. By managers are meant those who have the financial and general control of the school.

CHAPTER II.

GRANTS FOR THE MAINTENANCE OF SCHOOLS.

SECTION I.—*Preliminary.*

13. Except when otherwise stated, all the grants in the Code are annual grants.

14. Before any grant is made to a school the following conditions must be satisfied :—

(a) That the school is conducted in accordance with Article 5.

(b) That the school premises are healthy, well lighted, drained, and ventilated; are properly furnished and supplied with suitable offices, and contain sufficient accommodation for the scholars attending the school.

NOTE (a).—The Inspector may call upon the Civil Surgeon to furnish him with a report upon the sanitary arrangements of the school.

Code of Regulations for European Schools in Bengal, 1895.

(c) Number of scholars in each standard (Schedule I).

(d) Scale of fees.

(e) Probable annual income from all sources other than the grant.

(f) Proposed annual expenditure, under the following heads :—rent and taxes, teachers, servants, furniture and apparatus, books and stationery, repairs, miscellaneous.

The Inspector shall thereupon visit and report on the school.

9. If the application is approved, the Department will inform the managers from what date the school will be regarded as coming under the Code, and the amount of grant temporarily awarded.

If the application is rejected, the grounds of rejection shall be notified by the Department to the managers.

10. The amount of the temporary grant referred to in the preceding article shall be fixed at 75 per cent. of the amount which, in the judgment of the Inspector after visiting the school, it would be likely to earn. As soon as the permanent character of the school is established, it shall be made subject to the provisions of Section II of Chapter II.

11. The Inspector may visit an aided school at any time with or without notice.

(Cancelled.)

12. The managers of a school must appoint a correspondent with the Department, and must at once give notice to the Department of any change of correspondent.

The correspondent must in every case be approved by the Department.

(See Article 4.)

13. The interpretation of any article in this Code shall rest with the Department.

CHAPTER II.

GRANTS FOR THE MAINTENANCE OF SCHOOLS.

SECTION I.—*Preliminary Conditions.*

(Cancelled.)

14. Grants are continued to such schools only as satisfy the following conditions :—

(a) That the school is conducted in accordance with Article 6.

(b) That the school premises are properly drained, and healthy in other respects; that the buildings are well constructed and safe; that the rooms are properly lighted, ventilated, and (if need be) warmed, and that they are, as far as possible, well arranged for teaching; that in

Code of Regulations for European Schools in Bengal, 1889-90.

NOTE (b).—For the present 12 square feet in each class-room will be required for every scholar in average daily attendance,* or, if more than one class is taught in the same room, 16 square feet.

(*c*) That the studies are conducted in accordance with a time-table, of which a copy shall be submitted to the Department. Any subsequent change in the time-table must be communicated to the Department.

(*See note to Article 37.*)

(*d*) That the staff of teachers is sufficient, and in day-schools that the principal teacher is certificated. In night schools the principal teacher need not be certificated.

(*e*) The [illegible] have been approved by the Director of Public...

[*See Article 14* (*c*).]

* The average daily attendance for any period is found by adding together the attendances of all scholars for that period, and dividing the sum by the number of full meetings within the same period; the quotient is the average daily attendance.

Code of Regulations for European Schools in Bengal, 1896.

the case of boarding schools, proper arrangements are made for boarders; that the school is provided with all necessary offices, and that these and the premises generally are kept clean; that it contains sufficient accommodation for the scholars attending the school; and that it is properly supplied with furniture, books, maps, and other apparatus.

NOTE (1).—The Inspector may call upon the Civil Surgeon to furnish him with a report upon the sanitary arrangements of the school.

NOTE (2).—Rooms used for teaching purposes should provide 12 square feet per scholar where only one class is taught, and 16 square feet per scholar where more classes than one are taught in the same room; the calculation being made for each room on the average daily attendance of scholars taught in that room. The average daily attendance for any period is found by adding together the attendances of all scholars for that period, and dividing the sum by the number of full meetings within the same period; the quotient being the average daily attendance.

NOTE (3).—The sleeping space allotted to each boarder must be declared by competent medical authority to be sufficient for the purposes of health. In administering this article, the Department will endeavour to secure a provision, for each child under 12, of not less than 40 superficial feet and 400 cubic feet; and, for each child above 12, of not less than 48 superficial feet and 480 cubic feet. When a boarding school is hereafter erected with the aid of a building grant (Chapter VII), the internal space provided for each boarder must be in accordance with the measurements stated in this article.

(*c*) That the staff of teachers is sufficient and competent, and that each teacher has received from the Inspector the Letter of Recognition specified in Article 53, as a teacher for that section of the school in which he is to work.

(*d*) That the studies are conducted in accordance with a time-table, of which a copy shall be submitted to (and approved by) the Department; (such approval to apply to the subjects of study as well as to their arrangement.) Any subsequent change in the time-table must be communicated to (and approved by) the Department.

(*e*) That the scholars are satisfactorily taught in accordance with the provisions of Article 19.

NOTE (1).—Any aided school which shall be proved to have violated the condition laid down in (*a*) above shall receive no further aid from the Department.

NOTE (2).—Schools shall only be considered efficient when they satisfy the conditions laid down in (*b*), (*c*), (*d*), and (*e*) ove.

NOTE (3).—Should an aided school cease to be efficient, the managers shall be warned of the fact, and the grounds on which it is considered to be inefficient fully stated. A reasonable time, to be determined by the Department, shall then be allowed for improvement, after the lapse of which, further Government aid will be withheld should the school be still inefficient.

Code of Regulations for European Schools in Bengal, 1889-90.

15. Every school receiving a grant shall comply with the following conditions :—

(*a*) Any changes in the school staff and management during the course of the year shall at once be communicated to the Department.

(*b*) All returns called for by the Department shall be duly made.

(*c*) The admission, daily attendance, and withdrawal of the scholars shall be registered by, or under the supervision of, the principal teacher.

(*d*) Accounts of income and expenditure shall be kept by the managers, regularly audited, and submitted to the Department annually.

16. Schools and departments of schools aided under this Chapter shall be classed as Primary, Middle, or High, according to the highest standard of instruction (Schedule I) taught in them.

Those teaching to a standard not above IV shall be classed as Primary; those teaching to a standard above IV and not above VII as Middle; those teaching to the final standard of the Schedule shall be classed as High Schools.

NOTE.—If from any cause the managers of a school desire to raise its grade, they must submit a fresh application under Article 7, otherwise the school will receive no grant for the classes added to change its grade.

Code of Regulations for European Schools in Bengal, 1895.

15. Every school receiving a grant shall comply with the following requirements :—

(*a*) Any change in the constitution of the governing body, or any addition to or reduction in the school staff, shall be at once reported to the Department.

(*b*) All returns called for by the Department shall be duly made.

(*c*) The admission, daily attendance, and withdrawal of the scholars shall be registered by, or under the supervision of, the principal teacher.

(*d*) Accounts of income and expenditure shall be kept by the managers, regularly audited by a competent person not in any way connected with the school, and submitted to the Department annually.

NOTE.—The condition as to audit by an independent person need not be insisted on in the case of small schools, or schools in out-of-the-way places.

(*e*) The school shall be open to inspection throughout all its departments, in order that the Inspector may satisfy himself that the conditions specified in Article 14 are complied with.

16. Schools aided under this chapter shall be graded by the Department as Primary, Middle, or High, after inquiry by the Inspector as to :—

(*a*) the standard [primary, middle, or high as determined by the requirements of the primary school, middle school, and high school examination respectively] up to which there is a real, and likely to be a permanent, demand for instruction in the school;

(*b*) the competence of the school staff to teach up to that standard, and its sufficiency for the number of classes in the school.

17. Scholars shall be arranged in sections or divisions as follows :—

In any school the scholars below Standard I shall form the Infant Section of that school. Scholars studying in Standards I to IV shall form the Primary Section. Scholars studying in Standards V to VII shall form the Middle Section. Scholars studying beyond Standard VII for the high school examination, or such other examinations as may be specially recognised for this purpose by the Local Government,* shall form the High Section. Except with the previous consent of the Inspector, no scholar shall be promoted or admitted to the middle section of a school unless he has passed the primary school examination, nor to the high section unless he has passed the middle school examination.

*NOTE.—The following examinations have been recognised for this purpose by the Local Government :—

Code of Regulations for European Schools in Bengal, 1889-90.

17. The subjects of instruction in aided schools shall be as follows:—

(*a*) In the primary and middle departments, the elementary class, and special subjects of Schedule I.

(*b*) In the high department, the subjects prescribed for the final examination of Schedule I.

18. In primary and middle schools and departments the following order of instruction must be observed:—

Elementary subjects (reading, writing, and arithmetic) must be taught to every scholar in a school.

Class subjects must be taught to every scholar in a class.

Special subjects may be taught to individual scholars.

NOTE.—All scholars reading the same standard in elementary subjects form one class.

(*Compare note to Article 18.*)

Code of Regulations for European Schools in Bengal, 1895.

18. Schools graded as primary shall, ordinarily, only be entitled to teach scholars in the infant and primary sections. Schools graded as middle shall, ordinarily, only be entitled to teach scholars in the infant, primary, and middle sections. Schools graded as high shall be entitled to teach scholars in the infant, primary, middle and high sections.

In special circumstances, a primary or middle school may be permitted by the Inspector to teach one or more scholars belonging to a higher section than the grade of the school would otherwise warrant.

If the circumstances of a school change, it may be raised or lowered in grade.

* 19. The subjects of instruction in aided schools shall be in accordance with either Course A or Course B of Schedule I, as may be determined by the (Department); but scholars in the high section may be prepared for any of the examinations specified in the note to Article 17, instead of the high school examination, and the course in the middle and primary sections may, if necessary, be modified by the provisions of Article 20.

The courses prescribed in Schedule I may be modified by the Local Government.

20. Schools for the poor may, with the previous sanction of the Department, substitute a course of training in various kinds of useful practical work, such as those specified in Article 33 (*c*), for one or more of the subjects included in Schedule I, without reduction of grant.

21. In schools working up to the standards of examination prescribed in Schedule I-A., the Elementary subjects, reading, writing, and arithmetic, are compulsory. Among the Class subjects, needlework is compulsory for girls; the rest are optional, but such of them as are selected to be taught in any class should generally be taught to all the scholars in that class. The Special subjects are all optional, and may be taught either to selected scholars, or to whole classes.

22. In schools working in accordance with the course prescribed in Schedule I-B, the Compulsory subjects therein specified must be taught to every scholar, as one of the conditions necessary for the recognition of the school as "efficient," except in schools for the poor where a variation from the ordinary course of instruction has been sanctioned, as provided for in Article 20. Optional subjects are not allowed to be taught without the sanction of the Inspector, who will require to be satisfied, in the case of each such subject, that the teacher or teachers concerned are competent to teach it properly, and that its introduction into the curriculum of the school will not prejudicially affect the teaching of the Compulsory subjects. Optional subjects thus sanctioned may be taught either to selected scholars, or to whole classes.

23. Subject to the control of the Inspector, the principal teacher of a school shall ordinarily be at liberty to place a scholar in different standards for different subjects. It shall, however, be in the power of any Local Government to impose such restrictions upon the classification of scholars as it may think expedient.

NOTE.—In schools where the principal teacher is permitted to freely classify his scholars in the manner described in this article, every scholar's name shall appear in the attendance register of the lowest of those standards in which he may be placed for Reading, Arithmetic, and English Grammar and Analysis.

Code of Regulations for European Schools in Bengal, 1889-90.

SECTION II.—*Grants to Day Schools.**

19. A school which has held not less than 400 full school meetings during the year may receive aid under this section.

If a school has held less than 400 full school meetings during the year, a proportionate reduction shall be made in the grants payable under this section, and in the number of attendances required under Article 23.

NOTE (1).—The school year is reckoned as ending with the last day (inclusive) of the month preceding that fixed for the Inspector's annual visit (Article 8).

NOTE (2).—School meetings held before the school comes under the operation of the Code (Article 8) will not be counted for the purposes of this article.

20. By a "full school meeting" is meant a period of two hours of secular instruction on the same day—

(*a*) In infant schools and departments a period of one hour and a half of secular instruction shall be considered as a full school meeting.

(*b*) In no case can more than two school meetings be counted on the same day.

(*c*) Attendances may not be reckoned for any scholar under three years of age.

21. For every scholar in average daily attendance during the school year the following attendance grants may be claimed by the managers :—

For the first 25 . Rs. 12 per scholar.
For the next 25 . „ 6 „

For children who are not presented for examination by standards, a uniform attendance grant shall be made at a rate not exceeding Rs. 12 for each child, provided the Inspector is satisfied with the arrangements for their instruction. Of this grant Rs. 3 will be withheld in the case of girls if satisfactory instruction is not given in needlework.

22. The managers may also claim the following sums calculated on the average daily attendance :—

(*a*) A sum, at the discretion of the Inspector, not exceeding Rs. 100 when the number does not exceed 25, and Rs. 3 for each additional scholar, for discipline, organisation, apparatus, and method of instruction.

* This section applies to all day schools in which the standards described in Schedule I are taught. For special rules for boarding establishments connected with day schools, see Articles 38, 39.

Code of Regulations for European Schools in Bengal, 1895.

SECTION II.—*Calculation of Maintenance Grants.*

A.—Day Schools.

24. By a "full school meeting" is meant a period of two hours of secular instruction on the same day; or, if two school meetings are held on the same day, neither of them being for a period of less than one hour of secular instruction, they shall be reckoned as two "full school meetings" if they include together not less than four hours of secular instruction. In no case may more than two school meetings be counted on the same day.

In the infant section of a school, a period of one hour and a half of secular instruction shall be considered as a full school meeting.

25. To be entitled to the full grants under this section, a school shall have held not less than 380 full school meetings during the year.

If a school has held less than 380 full school meetings during the year, a proportionate reduction shall be made in the grants payable under this section.

NOTE (1).—The school year shall ordinarily correspond with the calendar year; but if an annual examination on a fixed date be retained, the school year may be reckoned as ending with the last day (inclusive) of the month preceding that fixed for the Inspector's annual visit.

NOTE (2).—This article shall not be binding in the case where a full year has not elapsed since the school was placed under the Code (Article 9).

26. By the term "ordinary attendance" in the following articles shall be understood "the average attendance at 350 of the best attended school meetings during the year," unless the Local Government declares that it shall mean "the average daily attendance during the school year."

NOTE (1).—Attendances may not be reckoned either for non-Europeans, or for scholars under three years of age.

NOTE (2).—Scholars who are necessarily absent from a school meeting for attendance at any public examination, at class firing, or at battalion drill, may be credited with attendances at such school meeting.

(*Articles 21 to 31 of the old Code are cancelled.*)

Code of Regulations for European Schools in Bengal, 1889-90.

(*b*) Annas 8 (or Re. 1), if singing by ear (or from notes) is taught to the satisfaction of the Inspector.

(*c*) Annas 8, if systematic training in drill or gymnastics is given to boys above eight years of age without extra charge.

NOTE.—The Inspector will bear in mind, in reporting on the organisation and discipline of a school, the results of any visit without notice (Article 9) made in the course of the year To meet the requirements respecting discipline, the managers and teachers will be expected to satisfy the Inspector that all reasonable care is taken in the ordinary management of the school to bring up the children in habits of punctuality, of good manners and language, of cleanliness and neatness; and also to impress upon the children the importance of cheerful obedience to duty, of consideration and respect for others, and of honour and truthfulness in word and act.

23. For scholars who are presented for examination by Standards I to VII of Schedule I, and who have attended 240 full school meetings during the year, the managers may claim the following instruction grants :—

(*a*) Each elementary subject—Rs. 4 for every scholar passing in that subject.

(*b*) Each class subject—Rs. 4 for every scholar passing in that subject, if 50 per cent. of the scholars examined in it satisfy the Inspector.

(*c*) Each special subject—Rs. 4 for every scholar passing in that subject.

(*d*) Object lessons—Rs. 2 for every scholar present on the day of examination in the classes to which such lessons are given to the satisfaction of the Inspector.

NOTE (1).—No child under six years of age shall be presented for examination by standards.

NOTE (2).—No scholar shall be examined in any subject unless the time-table has provided for continuous instruction in that subject throughout the year.

NOTE (3).—When a scholar has been transferred from one school to another in the course of the year, his attendance at the former school will be counted if shown in his scholar's register (Article 43). If a scholar is transferred from a school in a province where scholar's registers are not kept, his attendance at the former school will be counted if certified to by the principal teacher of that school.

NOTE (4).—The results of the examination of each scholar shall be communicated to the managers.

24. (*a*) No instruction grant may be claimed under Article 23 on account of any scholar who fails to pass in two elementary subjects.

(*b*) No grant may be claimed for class subjects under Article 23 (*b*) on account of any class in which the number of passes in elementary subjects falls below 40 per cent. of the whole number of scholars presented in those subjects. If the number of such passes falls below 60 per cent., the grant shall be reduced by one-half.

(*c*) No grant may be claimed for special subjects under Article 23 (*c*) on account of any class in which the number of passes in elementary subjects was below 60 per cent. of the whole number of scholars present in those subjects.

25. (*a*) Any scholar presented for examination must be presented under the same standard in all subjects

(*b*) For any scholar who, having passed in all the elementary subjects of any standard in one year, passes in all the elementary subjects of the standard next but

Code of Regulations for European Schools in Bengal, 1895.

Code of Regulations for European Schools in Bengal, 1889-90.

one above it in the following year, the managers may claim double the grants allowable under Article 23.

(*c*) If a scholar fails in any subject, he may in the following year be presented either by the same or by any higher standard; if presented again by the same standard, he is eligible for grants in those subjects only in which he has not previously earned a grant.

(*d*) If a scholar fails in two successive years in the same elementary subject, no grant shall be given on his account for class or special subjects.

NOTE.—This rule shall only apply when the child is eligible for grants in both years.

26. All the scholars on the rolls at the time of the Inspector's annual visit must be presented for examination; but those scholars who have not made the prescribed number of attendances shall not be considered in calculating the percentage of passes under Article 24. If any scholar is (without a reasonable excuse) withheld from examination in any subject, he shall be considered to have failed in that subject.

27. For any scholar in a high school, whose name has been on the rolls of that school not less than one full year, and who is presented for examination by the final standard of Schedule I, the managers may claim the following instruction grants :—

(1) Rupees 80 for every scholar passing in three compulsory subjects.

(2) Rupees 120 for every scholar passing in four compulsory subjects.

(3) Rupees 160 for every scholar passing in all the compulsory subjects.

(4) Rupees 25 for each pass in an optional subject.

No grant can be claimed for optional subjects on account of any scholar who fails to earn a grant in the compulsory subjects.

28. A scholar who does not pass in all the compulsory subjects may be again presented for examination in the following year. If he then passes, the managers may claim on his account the full grant payable under Article 27, less any amount that may have been earned by him in the preceding year.

29. Persons who are not eligible for grants under Article 27 may be admitted to the examination by the final standard of Schedule I. The examination shall be held at the times and places indicated in Chapter VI for the scholarship examination. The names of the successful candidates shall be arranged in two divisions. Those who obtain 60 per cent. of the marks in the compulsory subjects shall be placed in the first division, and those who obtain 40 per cent. in the second division.

30. If a school in which instruction is given beyond Standard VII adopts as a final standard any other than that of schedule I, it shall be in the power of the Local Government to give a fixed monthly grant to the school on account of such instruction in addition to any grants earned under the preceding articles.

Code of Regulations for European Schools in Bengal, 1895.

(*See Article 108.*)

Code of Regulations for European Schools in Bengal, 1889 90.

31. During each year the school shall receive monthly a sum equal to one-twelfth of the total amount earned during the preceding year, as determined by the Inspector at the annual examination.

If a school is closed before the end of the school year, the grant will cease from the date on which the school is closed.

NOTE.—If a school has been open for less than twelve months (Article 19), the denominator of the fraction shall be the number of months during which the school has been under the Code.

Code of Regulations for European Schools in Bengal, 1895.

27. Maintenance grants may be of three kinds:—

(*a*) Ordinary grants.
(*b*) Free-scholar grants.
(*c*) Special grants.

28. The Ordinary and Free-scholar grants are annual grants for the year beginning on the 1st April; they are to be calculated, according to the scales given below, upon attendances made during the calendar year (January to December) last completed; and are payable to the school in one sum on or after the 1st April, unless otherwise ordered by the Local Government.

Special grants to be of whatever amount, and payable at whatever time and in whatever manner, may appear to the Local Government to best meet the circumstances of each particular case.

29. The following are the scales for the calculation of Ordinary grants:—

A. For the Ordinary grant to the Infant Section in Day Schools.

Rupees 20 for each of the first ten scholars in ordinary attendance.
Rupees 15 for each of the second ten scholars in ordinary attendance.
Rupees 10 for each of the remaining scholars in ordinary attendance.

B. For the Ordinary grant to the Primary Section in Day Schools.

Rupees 25 for each of the first twenty scholars in ordinary attendance.
Rupees 20 for each of the second twenty scholars in ordinary attendance.
Rupees 15 for each of the remaining scholars in ordinary attendance.

C. For the Ordinary grant to the Middle Section in Day Schools.

Rupees 40 for each of the first twenty scholars in ordinary attendance.
Rupees 30 for each of the second twenty scholars in ordinary attendance.
Rupees 20 for each of the remaining scholars in ordinary attendance.

D. For the Ordinary grant to the High Section in Day Schools.

Rupees 120 for each of the first five scholars in ordinary attendance.
Rupees 90 for each of the second five scholars in ordinary attendance.
Rupees 50 for each of the remaining scholars in ordinary attendance.

Code of Regulations for European Schools in Bengal, 1889-90.

(*See Article 39.*)

(*See Article 38.*)

32. A special grant, to be determined by the Local Government, may, on the recommendation of the Inspector, be made (*a*) to schools in places where there is a small or poor European population; (*b*) to schools newly established or newly brought under the Code; (*c*) for any other reasons which the Local Government may consider sufficient.

NOTE.—This grant shall not be taken into account in making reductions under Section V.

Code of Regulations for European Schools in Bengal, 1895.

30. The following are the scales for the calculation of Free-scholar grants:—

Rupees 2 for each free day-scholar in average attendance.

Rupees 8 for each free boarder in average attendance.

NOTE.—The scales given in this and in the preceding article may be modified as thought necessary by the Local Government.

31. In lieu of the grant for each free boarder specified in Article 30, a special grant may be made to orphanages and other schools in which free scholars are maintained, in aid of the boarding charges of scholars educated therein, provided that the amount of such grant does not exceed (*a*) one-half of the total cost of their maintenance, (*b*) the rate of Rs. 6 a month for each boarder.

32. A special grant, to be fixed by the Department, may be made to boarding schools in aid of the boarding charges of children residing in places in the province where there is no school of a standard suited to their requirements, provided that the Magistrate of the district certifies, after inquiry, that the parents or guardians of such children are too poor to pay the full boarding charges. The amount of this grant shall not exceed Rs. 6 a month on account of each such boarder.

NOTE.—No grant shall be made under this Article on account of scholars reading beyond Standard VII.

33. Special grants, to be determined by the Local Government, may, on the recommendation of the Inspector, be made:—

(*a*) to schools in places where there is a small or poor European population;

(*b*) to schools newly established or newly brought under the Code;

(*c*) to schools for the education of the poor, to provide materials for and instruction in drill, gymnastics and athletics, drawing, object-lessons leading up to elementary physics, household duties (in girls' schools only), and in such other subjects, including short-hand and type-writing, modelling in clay, carpentry, and smith's work, as the Local Government may for this purpose approve, and for the apparatus required for instruction in these subjects; provided that additional expenditure is incurred on account of such instruction, and that the ordinary grant is considered insufficient;

(*d*) to orphanages and other schools in which free scholars are admitted, (1) by way of compensation for any reduction of their grants under the operation of Article 38; and (2) on account of fees for the admission of poor scholars to the examinations specified in Chapter VIII;

(*e*) to practising schools attached to training colleges, for the payment of their teachers;

(*f*) for any other reason which the Local Government may consider sufficient.

NOTE.—These grants shall not be taken into account in making reductions under Section III of this chapter.

Code of Regulations for European Schools in Bengal, 1889-90.

33. In substitution of the grants which may be earned under these rules, special fixed grants may be made with the sanction of Government to certain schools. Accordingly, schools whose permanent character is established may be put by the Department on a special list, and such schools shall receive a fixed grant annually for a term of five years and payable at a fixed date each year. In the absence of agreement to the contrary, such schools must conform to the rules laid down in this Code, and the annual grant shall be conditional upon the Inspector certifying to the continued efficiency of the school. Any school on the special list may, with the consent of the Department, present all its scholars for examination at the close of the school year, and the results of the examination of each scholar shall be communicated to the managers. The results of this annual examination shall not, however, be taken into consideration by the Inspector when reporting upon the efficiency of the school.

Code of Regulations for European Schools in Bengal, 1895.

34. In substitution of the grants which may be earned under these rules, grants, either determined by the results of examination, or fixed in amount for a term of years, may be given to schools which for any reason it is thought undesirable to bring under the preceding articles. The conditions under which these grants will be given shall be determined by the Local Government.

SECTION III.—*Grants to Night Schools.*

34. Grants may be given to night schools for boys, provided that the scholars admitted to the school are certified by the managers to be beneficially and necessarily employed during the day.

35. The rules for grants to day schools (Section II) shall apply also to night schools, with the following changes :—

(*a*) By a "full school meeting" is meant a period of not less than one hour of secular instruction.

(*b*) The number of full school meetings in the year must be not less than 80, and to qualify for an instruction grant a scholar must attend not less than 50 full school meetings.

(*c*) The attendance grants shall ordinarily be at one-third of the rates prescribed in Article 21, but the Local Government may, for special reasons, fix other rates for particular schools or places.

(*d*) The number of class and special subjects to be taught in each school shall be determined by the Inspector. For the purpose of calculating the grants, all such subjects shall be treated as special subjects.

(*e*) Any scholar who has passed by Standard V may, with the sanction of the Inspector, substitute for the full course prescribed for day schools a special course consisting of Arithmetic and one or more of the following subjects :—

Mathematics Elementary Science Drawing	of Standards VI and VII.
Mathematics Drawing Elementary Physics Ditto Chemistry	of the final Standard of Schedule I.

B.—Night Schools.

35. Grants may be given to night schools for boys, provided that the scholars admitted to the school are certified by the managers to be beneficially and necessarily employed during the day.

36. The grants are given under the following conditions :—

(*a*) By a "full school meeting" is meant a period of not less than one hour of secular instruction.

(*b*) The number of full school meetings in the year must be not less than 80.

(*c*) A night school may adopt any graduated course of studies suitable to its requirements subject to the previous approval of the Inspector.

37. Grants to night schools are calculated on the following scale :—

Rupees 12 for each of the first twenty scholars in average attendance.

Rupees 8 for each of the remaining scholars in average attendance.

Code of Regulations for European Schools in Bengal, 1889-90.

To such scholars the provisions of Article 25 (*a*) shall not apply.

(*f*) Any other subject sanctioned by the Department may be taken as a special subject, provided that a graduated course of teaching it is submitted to and approved by, the Inspector.

SECTION IV.—*Grants to Boarding Schools.*

36. Grants may be given under this section to boarding establishments, in addition to the grants payable under Section II to the day schools with which they are connected.

37. A yearly grant, not exceeding Rs. 3, may on the report of the Inspector, be made for each boarder, according to the average number in residence during the year, if the organisation, discipline, sanitation, and domestic arrangements are satisfactory.

NOTE.—The sleeping space allotted to each boarder must be declared by competent medical authority to be sufficient for the purposes of health. In administering this article the Department will endeavour to secure a provision, for each child under 12, of not less than 40 superficial feet and 400 cubic feet, and for each child above 12, of not less than 48 superficial feet and 480 cubic feet. When a boarding school is hereafter erected with the aid of a building grant (Chapter V), the internal space provided for each boarder must be in accordance with the measurements stated in this article.

38. A special grant, to be fixed by the Department, may be made to boarding schools in aid of the boarding charges of children residing in places where there is no school of a standard suited to their requirements, provided that the Magistrate of the district certifies, after enquiry, that the parents or guardians of such children are too poor to pay the full boarding charges. The amount of this grant shall not exceed Rs. 5 a month on account of each such boarder.

NOTE.—No grant shall be made under this article on account of scholars reading beyond Standard VII.

39. A special grant may be made to free schools and orphanages in aid of the boarding charges of scholars educated therein, provided that the amount of such grant does not exceed (*a*) one-half of the total cost of their maintenance, (*b*) the rate of Rs. 5 a month for each boarder.

SECTION V.—*Reduction of Grants.*

40. If the amount earned under Sections II and III exceeds the income of the school from all sources other than the grant, it shall be reduced by the amount of that excess.

NOTE.—In calculating the income of the school under this Article boarding fees shall not be included.

41. Any grant may be withheld or reduced if the conditions of Articles 14 and 15 are not observed, or if, on the Inspector's report, there appears to be any serious reason for so doing. In

Code of Regulations for European Schools in Bengal, 1895.

(*Articles 36 and 37 of the old Code are cancelled.*)

[*See note 3 to Article 14 (b).*]

(*See Article 32.*)

(*See Article 31.*)

SECTION III.—*Reduction of Grants.*

38. If the amount earned under Section II of this chapter exceeds the income of the school from all sources other than Government grants, it shall be reduced by the amount of that excess.

NOTE 1.—In calculating the income of the school under this Article boarding fees shall not be included.

NOTE 2.—In the accounts of any school in which members of a Religious Order are employed as teachers and receive no fixed salaries, the managers shall be entitled, for the purpose of this article, to add on each side of the account, but below the balanced statement of actual income and expenditure, an amount equivalent to the difference between the salaries of such teachers actually paid and their salaries calculated at the current market rate; these amounts to be styled respectively "contributions not actually received," and "salaries not actually paid." The final decision as to the current market rate of such salaries shall rest with the Department.

39. Any grant may be withheld or reduced if the conditions of Articles 14 and 15 are not observed, or if, on the Inspector's report, there appears to be any sufficient reason for so doing.

Code of Regulations for European Schools in Bengal, 1889-90.

every such instance an enquiry, at which the manager shall be allowed full opportunity of explanation, shall be made by the Department, the result of which shall be communicated to the managers. If the defects are capable of immediate or early removal, the managers shall, on the first occasion, be allowed a reasonable time, to be fixed by the Department, to remedy them, and if they are remedied, the grant shall not be withheld or reduced.

42. If the income of any high school from all sources is large enough, in the opinion of the Department, to render the full grant, claimable under Section II, unnecessary for the efficient maintenance of the school, a reduction shall be made in its amount. The proportion of the full grant that may be claimed shall be fixed from time to time by the Department, and shall be notified beforehand to the managers.

SECTION VI.—*Registers.*

48. Every scholar in a school receiving grants must be provided with a "scholar's register"* (see Schedule IV), showing his age, attendance, and proficiency at every stage of his school course. This register must be deposited with the principal teacher on admission to the school, and must be shown to the Inspector when required. When a scholar leaves school, the principal teacher must enter in his scholar's register the number of attendances made up to the date of leaving, and must, when application is made for it, deliver up the scholar's register to the principal teacher of any other school into which the scholar may be admitted.

44. In every school receiving grants the managers must provide out of the school funds—

(*a*) the Code for the year;

(*b*) registers of admission and attendance;

(*c*) a log-book, stoutly bound;

(*d*) a portfolio to contain official letters.

45. The principal teacher must from time to time make an entry in the log-book, showing the visits of managers, the progress of the various classes, and other facts concerning the school or its teachers, such as commencements of duty, caution, illness, etc., which are likely to be required for future reference. The remarks of the Inspector, after his annual visit, when communicated to the managers, must be copied *verbatim* into the log-book.

Every entry in the log-book must refer to facts; general expressions of opinion are to be excluded. No entry once made in the log-book may be removed, nor may it be altered otherwise than by a subsequent entry.

* Scholar's registers, as well as transfer certificates (Article 16), can be obtained at the Catholic Orphan Press, 4, Portuguese Church Street, Calcutta.

Code of Regulations for European Schools in Bengal, 1895.

A copy of the Inspector's report shall, in such case, be communicated to the managers, who shall have an opportunity of making to the Department any representation that they may think fit on such report.

40. If the income of any school from all sources, is large enough, in the opinion of the Department, to render the full grant claimable under Section II of this chapter unnecessary for the efficient maintenance of the school, a reduction shall be made in its amount.

CHAPTER III.

REGISTERS.

(*Cancelled.*)

41. In every school receiving grants, the managers must provide out of the school funds:—

(*a*) the latest edition of the Code;

(*b*) an admission register;

(*c*) attendance registers;

(*d*) a log-book, stoutly bound;

(*e*) a portfolio to contain official letters and documents.

42. The principal teacher must from time to time make entries in the log-book, showing the visits of managers, the progress of the various classes, and other facts concerning the school or its teachers, such as commencements of duty, cautions, illnesses, etc., which are likely to be required for future reference. Such communications from the Inspector as he may direct to be inserted in the log-book must be copied *verbatim* therein.

The only persons authorised to make entries in the log-book are the principal teacher and the Inspector. The log-book shall be kept in the custody of the principal teacher, but shall be open at all times to the inspection of the managers. No entry once made in the log-book may be removed, nor may it be altered otherwise than by a subsequent entry.

NOTE.—A visitor's book may be kept for the remarks of other persons visiting the school.

Code of Regulations for European Schools in Bengal, 1889-90.

46. At the commencement of each school year the name of every teacher and pupil-teacher who is to form part of the school staff for the year must be entered in the log-book and signed by the correspondent. Any subsequent change in the staff must be recorded in the log-book.

47. The Inspector will examine the log-book and portfolio at every visit. At every visit paid without notice, he will make an entry in the log-book of such particulars as require the attention of the managers.

[*See Bengal provincial notes, Article 15 (d).*]

Code of Regulations for European Schools in Bengal, 1895.

43. At the commencement of each school year the name of every teacher and pupil-teacher who is to form part of the school staff for the year, and the distribution of the work among them, shall be entered in the log-book and signed by the principal teacher. Any subsequent change in the staff or in the distribution of the work shall be recorded in the log-book.

44. The Inspector is authorised to examine the log-book and portfolio at any time.

CHAPTER IV.

Transfer Rules.

45. No school shall admit a scholar from another school without a transfer certificate signed by the principal teacher of the school in which the scholar has last been reading. Application for the certificate shall be made by the parent or guardian of the scholar, and it must be issued or refused without any avoidable delay. The only ground on which it may be refused is non-payment of fees. If the certificate is refused, the grounds of refusal shall be stated in writing. A duplicate certificate may be demanded, and shall be issued on payment of a fee of one rupee.

46. If a scholar has been expelled from a school for gross misconduct, the transfer certificate shall bear the words "Expelled for misconduct."

47. A principal teacher may provisionally admit a scholar into the school under his charge when the certificate has been refused, if he considers the grounds of refusal to be insufficient, on condition that he at once informs the Inspector of the circumstances; and the Inspector's decision shall be final.

48. The certificate shall be in the following form:—

"Certified that _____
was in _____
School, _____, to _____,
on which date _____ left with a _____
character. All sums due* to the school on _____
account have been (*a*) _____.
____ was reading in the _____ Standard, and
has been (*b*) _____ promotion to the
_____ Standard. The date of _____ birth,
according to the Admission Register, is _____.

Principal Teacher.

Dated _____.

Note.—Sums due to the school shall include all payments for which provision is made in the rules of the school, provided such rules have been communicated to the parents or guardians of the scholars.

The following explanatory notes will not appear on the certificate:—

(*a*) *Paid in full*, or *Remitted*, or *Satisfactorily arranged for.*

(*b*) *Promised* or, *Refused.* (This, and the next blank space, to be filled up only if the transfer certificate is given at the end of the school year.)

Code of Regulations for European Schools in Bengal, 1889-90.

CHAPTER III.

TEACHERS.

SECTION I.—*Preliminary.*

48. The recognised classes of teachers in day schools are (1) pupil-teachers; (2) assistant teachers; (3) certificated teachers; (4) special teachers.

49. When vacancies occur in the office of teacher in the course of a school year, persons who do not fulfil the conditions laid down in this chapter may be temporarily employed in place of the teachers causing the vacancies.

*57. The following words have been added by the Government of India after the word "displayed," "but before doing so shall allow the teacher an opportunity of explaining."

SECTION II.—*Pupil-teachers.*

50. Pupil-teachers are boys or girls employed to serve in a day school on the following conditions:—

(*a*) That the school, in the opinion of the Department, is suited for the purpose.

(*b*) That the pupil-teachers—

(1) are not less than 14 years of age at the date of their engagement;

(2) have passed Standard VI in all the elementary subjects in English, and in two other class subjects, of which, in the case of boys, one must be mathe-

Code of Regulations for European Schools in Bengal, 1896.

49. No child admitted to a school under the foregoing certificate shall be placed in any class higher than that for which the certificate shows him to be qualified, except with the previous sanction of the Inspector.

50. All transfer certificates received by a school must be filed and submitted to the Inspector at his visits. Each certificate shall bear a serial number, which shall be entered against the scholar's name in the Admission Register.

CHAPTER V.

TEACHERS.

SECTION I.—*Preliminary.*

51. Teachers in aided schools must be either Recognised Teachers, or Pupil-teachers. Recognised Teachers may or may not hold the Proficiency Certificate.

52. When vacancies occur in the office of teacher, persons who do not fulfil the conditions laid down in this chapter may, with the consent of the Inspector, be temporarily employed in place of the teachers causing the vacancies.

SECTION II.—*Recognised Teachers.*

53. Recognised Teachers are teachers who have received from the Inspector an official letter, in the form prescribed in Schedule III, recognising them as teachers in a certain capacity.

54. Any person engaged as a teacher in an aided school at the time when this revised edition of the Code was published, and who had at that time received official recognition as a teacher in some particular capacity, will continue to be recognised as a teacher in that capacity.

55. No teacher shall be permanently employed in any higher section of a school than that for which he has received official recognition.

56. Persons without experience in teaching may, with the consent of the Inspector, be temporarily employed, until an opportunity has been afforded for judging of their fitness for official recognition.

57. The Department will cease to recognise any person as a teacher in any particular capacity if, while acting in that capacity, distinct incompetence is displayed.

SECTION III.—*Pupil-teachers.*

58. Pupil-teachers are boys or girls recognised by the Department as having been engaged by the managers of an aided school for the purpose of teaching, and of being taught and trained, in accordance with the regulations given in this section.

59. Before recognising boys and girls as pupil-teachers, the Department will require to be satisfied on the following points:—

(*a*) That the school in which it is proposed to engage them is suited for the purpose; and that proper arrangements can and will be made for their efficient instruction in their own studies, for

Code of Regulations for European Schools in Bengal, 1889-90.

matics, and in the case of girls, one must be needle-work;

(3) produce certificates of health, physical fitness, character, and conduct.

(*c*) That the managers enter into an agreement in the terms of the memorandum prescribed in Schedule V.

NOTE.—The Inspector will test the aptitude of the candidates for pupil teacherships, and will pay special attention to distinctness of utterance.

51. If all the foregoing conditions have been satisfied, and if the pupil-teacher is approved by the Department, the engagement is complete. The Department is not a party to the engagement, but confines itself to requiring that the pupil-teacher shall be presented to the Inspector year by year for examination by the prescribed standards (Schedule II.)

52. Every pupil-teacher shall be required to undergo a course of three years' instruction, and to pass the examinations specified in Schedule II. During this period he shall teach daily in the school classes for not less than two and not more than four hours, and shall receive one hour's instruction daily from a duly qualified teacher.

Code of Regulations for European Schools in Bengal, 1895.

the thorough supervision of their work while teaching, and for their training in the art of teaching.

(*b*) That the boys and girls who are proposed for pupil-teacherships:—

(1) are not less than 15 years of age at the time of their engagement;

(2) have passed the middle school examination in the first or the second class, and further satisfy the Inspector of their proficiency in reading, handwriting, and dictation, and in the case of girls, in needle-work also;

(3) produce a satisfactory certificate of health and physical fitness for the work from a Civil Surgeon or other approved medical practitioner, and one of good character and conduct from some responsible person.

(*c*) That the managers enter into an agreement in the terms of the memorandum given in Schedule II.

NOTE (1).—The engagement of a pupil-teacher shall begin on the 1st of January. If on that date it is not yet known whether a candidate for a pupil-teachership has passed the middle school examination, he may be admitted provisionally as a pupil-teacher.

NOTE (2).—It shall be in the power of the Local Government to alter the conditions as to age and preliminary qualifications specified in clauses (*b*) (1) and (2) of this article.

60. The Department is not a party to the engagement; but confines itself to requiring, as a condition of continued recognition, that the pupil-teacher shall teach, be taught, produce the prescribed certificates, and be presented for examination, in accordance with the terms of Articles 61 and 62.

61. Every pupil-teacher shall:—

(*a*) be engaged for three years;

(*b*) teach a class daily (except on holidays) for not less than two, and not more than four hours, under competent guidance and supervision;

(*c*) give a specially prepared lesson once a week before the principal teacher (or some other competent teacher), who shall criticise the lesson. The pupil-teacher's notes and the principal teacher's remarks on the lesson to be preserved for the Inspector's perusal, in books specially kept for the purpose;

(*d*) study for at least two hours daily (except on holidays) under the personal supervision and guidance of a duly qualified teacher.

62. In order that a year's service may be approved by the Department, every pupil-teacher will be required:—

(*a*) to produce, before beginning the work of the year, a satisfactory certificate of health and physical fitness for the work from a Civil Surgeon or other approved medical practitioner, and also one of good character and conduct. The latter certificate must, in the case

Code of Regulations for European Schools in Bengal, 1889-90.

58. For each pupil-teacher passing with credit in the subjects specified in Schedule II, the managers of the school shall receive the following sums :—

	Rs.
For the art of teaching—In the first year .	50
In the second year .	75
In the third year .	100
For the remaining compulsory subjects . .	70
For each optional subject	20

Half the amounts earned under this Article shall be paid by the managers to the pupil-teacher, in addition to any salary specified in the memorandum of agreement.

54. The amounts stated in the preceding Article are maximum grants, to be given only if the results of the examination are thoroughly satisfactory, and they may be reduced, on the report of the Inspector, by an amount not exceeding one-third.

55. No grant shall be paid on account of a pupil-teacher who fails to pass in the compulsory subjects of Schedule II. He will be re-examined by the same standard in the following year.

56. If a pupil-teacher fails twice during his course in the compulsory subjects, he shall cease to be recognised as a pupil-teacher.

Code of Regulations for European Schools in Bengal, 1895.

of pupil-teachers who have already worked as such for one or more years, be signed both by the principal teacher of the school in which they have served and by the correspondent on behalf of the managers ;

(*b*) to teach throughout the year to the satisfaction of the Inspector ;

(*c*) to give, to the Inspector's satisfaction, a lesson selected by him out of three previously prepared by the pupil-teacher. The lesson to be given near the close of the year, but before the date fixed for the high school examination.

The foregoing conditions having been satisfied—

(*d*) to pass in the following subjects at the high school examination :—

(1) at the close of the first year—in Arithmetic, History, and Geography ;

(2) at the close of the second year—in English, Algebra, and Euclid ;

(3) at the close of the third year—in a second language, and in School Management and the Art of Teaching.

NOTE.—In cases in which the Local Government exercises the power given under Note (2) of Article 59, it may also modify the standards of examination above prescribed.

63. Any pupil-teacher who fails to produce a satisfactory certificate of health and physical fitness, and also of good character and conduct, as required in Article 62 (*a*), shall not continue to be recognised as a pupil-teacher.

(*See Article 65.*)

64. Any pupil-teacher who fails to satisfy the conditions required in Article 62 (*b*), (*c*), or (*d*) will, on the first occasion of such failure, be permitted to continue working as a pupil-teacher, but will in the following year take up the same

Code of Regulations for European Schools in Bengal, 1889-90.

(*See Articles 53, 54 and 55.*)

57. The number of pupil-teachers to be employed in any school shall not exceed one for every 35 scholars in average daily attendance, nor shall it exceed three for the principal teacher, and one for each qualified assistant teacher.

58. At the close of their engagement, pupil-teachers are perfectly free in the choice of employment. If they wish to continue in the work of education, they may, under the conditions of Article 64, become teachers in primary or middle schools or departments, or may be admitted into training colleges (Chapter IV).

SECTION III.—*Assistant Teachers.*

59. Persons who, not having qualified for certificates under Section IV, have passed the examination for middle scholarships, or an examination of equal difficulty, may be recognised as assistant teachers.

60. Assistant teachers under this section may be employed only in primary schools or departments.

SECTION IV.—*Certificated Teachers.*

61. Certificates are of three grades, and may be either permanent or provisional. A provisional certificate consists of an entry of the teacher's name in a register kept by the Department.

(*a*) A first-grade certificate qualifies the holder to be the principal teacher in a high school.

(*b*) A second-grade certificate qualifies the holder to be the principal teacher in a middle school, or an assistant teacher in a high school.

(*c*) A third-grade certificate qualifies the holder to be the principal teacher in primary school, or an assistant teacher in a middle school or department.

A provisional third-grade certificate qualifies the holder to be the principal teacher of a primary school, only if (*a*)

Code of Regulations for European Schools in Bengal, 1895.

studies, and be presented for examination in the same subjects, as in the year in which the failure occurred, that year not being reckoned as part of the three years' engagement. Any pupil-teacher who fails to satisfy the conditions required in Article 62 (*b*), (*c*), or (*d*) a second time in the same stage, will cease to be recognised as a pupil-teacher.

65. For each pupil-teacher who satisfies the whole of the conditions required in Article 61 and in Article 62 (*a*), (*b*), and (*c*), the managers of the school shall receive a grant as follows:—

	Rs.
At the end of the first year's course .	50
At the end of the second year's course	75
At the end of the third year's course .	100

If the conditions specified in Article 62 (*d*) be also satisfied, an equal amount shall be paid to the pupil-teacher.

The grants payable to managers on account of pupil-teachers shall be paid, even if the latter fail to pass the examination specified in Article 62 (*d*).

66. The number of pupil-teachers to be employed in any school shall not, except with the special permission of the Department, exceed one for every 35 scholars in average daily attendance; nor shall it exceed three for the principal teacher, and one for each qualified assistant teacher.

67. A pupil-teacher is perfectly free in the choice of employment after the completion of his apprenticeship. If he wishes to remain a teacher he will receive recognition either as the principal teacher of a primary school, or as an assistant teacher in the middle or the primary section of a school.

(*Articles 59 to 78 of the old Code are cancelled.*)

Code of Regulations for European Schools in Bengal, 1889-90.

he has completed his engagement as a pupil-teacher, or (*b*) has passed with credit the first year's examination at a training college, or (*c*) has served with credit for two years as an assistant teacher.

62. Teachers at any stage shall be entitled to receive certificates from the Department, provided they satisfy the Department that they have received a training, or passed examinations equivalent to those required under the following articles.

NOTE.—Teachers who are members of religious orders are exempted from the necessity of being certificated under the rules of this Code.

63. A certificate may at any time be suspended, reduced, or cancelled, but in every case the Department shall give the teacher an opportunity of explanation. A provisional certificate of any grade will be cancelled or reduced if three successive reports from the Inspector are unsatisfactory.

64. A pupil-teacher who has passed the final examination specified in Schedule II shall receive a provisional third-grade certificate. After not less than one year's service with credit, this certificate shall be made permanent.

NOTE.—"A year's service with credit" in this and the following articles implies one year's service as a Teacher with a favourable report from the Inspector at the end of the year.

65. Any one who, without having served an engagement as a pupil-teacher, has completed his seventeenth year, and has passed the matriculation examination of a recognised University or passed in four compulsory subjects, failing only in the second language, at the final examination for High Schools in Schedule I, may receive a provisional third grade certificate. This certificate shall be made permanent, in the first case after three years' service with credit, and in the second case after two years' service with credit.

66. Any holder of a permanent third-grade certificate who has served with credit for one year under the certificate, and who has passed the High School examination in the first division, shall, on passing in the additional subject—school method—be entitled to a provisional second-grade certificate After two years' further service with credit, this provisional certificate shall be made permanent.

67. Any one who has completed his eighteenth year and passed the First Arts examination may receive a provisional third-grade certificate. After two years' service with credit, this provisional certificate shall be made permanent.

68. Any holder of a permanent third-grade certificate who has served with credit for two years under that certificate, and has also passed the First Arts examination, shall be entitled to a provisional second-grade certificate. After two years' further service with credit, this provisional certificate shall be made permanent.

69. Any graduate who has completed his twenty-second year may receive a provisional second-grade certificate. After two years' service with credit, this certificate shall be made permanent.

70. Any holder of a permanent second-grade certificate who has served for at least two years

Code of Regulations for European Schools in Bengal, 1896.

Code of Regulations for European Schools in Bengal, 1889-90.

with credit under that certificate, and who is also a graduate, may receive a provisional first-grade certificate. After two years' service with credit, this certificate shall be made permanent.

71. It shall be open to the Department in exceptional cases to grant a provisional certificate of the first-grade to any graduate who has completed his twenty-fifth year. After two years' service with credit, this certificate shall be made permanent.

NOTE.—A degree conferred without examination does not qualify the holder for a certificate under Articles 68—70.

72. It shall be open to the Department in exceptional cases to grant certificates to persons not entitled to such certificates under any of the foregoing rules.

SECTION V.—*Special Teachers.*

73. Special teachers are persons who are employed to teach particular subjects, and who are not entitled to certificates under Section IV. The sanction of the Department must be obtained before a special teacher is appointed.

Code of Regulations for European Schools in Bengal, 1895.

Section IV.—Proficiency Certificates.

68. A certificate of skill and ability as a teacher (hereinafter styled "Proficiency Certificate") will be issued by the Department, in the form prescribed in Schedule IV, to any recognised teacher who, having passed either the middle school examination, or any other examination which, in the opinion of the Department, is not inferior to it in point of difficulty, shall further:—

(*a*) have taught a class (or classes) for two years to the satisfaction of the Inspector;

NOTE.—Neither the class-teaching of a training college student nor that of a pupil-teacher can be accepted for the purpose of this test, as such teaching is done under constant guidance and supervision.

(*b*) have given before the Inspector, and to his satisfaction, two lessons selected by him from a list of five previously prepared by the candidate;

(*c*) have gained 50 per cent. of the possible marks in the paper on "School Management and the Art of Teaching" at the high school examination.

NOTE.—The possession of this certificate does not entitle the holder to teach in any higher section than that specified in his Letter of Recognition.

The Chapter on Training Colleges is omitted, as it will be the subject of a supplementary report afterwards.

Code of Regulations for European Schools in Bengal, 1889-90.

Code of Regulations for European Schools in Bengal, 1895.

CHAPTER V.

Building Grants.

91. Grants may be given under this chapter to managers of schools in aid—

(*a*) of erecting, enlarging, or furnishing school buildings;

(*b*) of executing extensive repairs;

(*c*) in special cases, of paying off debts incurred in erecting or enlarging school buildings.

NOTE.—Expenditure in the purchase of buildings may be treated as expenditure on the erection of buildings.

92. Except in the case provided for in Article 91 (*c*), no grant shall be made in consideration of former expenditure on school buildings.

(*See Article 101.*)

(*See Article 96.*)

93. Grants under this chapter shall not ordinarily exceed one-half of the total cost. In places where there is a small or poor European population, the maximum grant shall not exceed two-thirds of the total cost.

CHAPTER VII.

Building Grants.

83. Grants may be given under this chapter to managers of schools, other than those excluded under Article 7, in aid:—

(*a*) of erecting, enlarging, or furnishing school buildings;

(*b*) of executing extensive repairs;

(*c*) in special cases, of paying off debts incurred in erecting or enlarging school buildings;

NOTE.—Expenditure in the purchase of buildings may be treated as expenditure on the erection of buildings.

(*d*) Of acquiring land for school purposes.

84. Except in the case provided for in Article 83 (*c*), no grant shall be made in consideration of former expenditure on school buildings.

85. The sum to be allotted annually for building grants to schools will be fixed provisionally for a term of years. The amount will be notified by the Local Government to the Department. It will not in ordinary circumstances be reduced, though it may be increased, for any year during that term.

86. Every application for a grant must be submitted to the Department not later than the 31st December, if the grant is to be admissible for sanction during the following financial year. It must contain a certificate from the managers that the funds at their disposal will, when added to the grant applied for, be sufficient to meet the full cost of the work. If the application is in accordance with the rules, and is found to be in other respects deserving of support, it will be included in the list of "approved applications." If not so included, the reasons shall be notified to the managers.

87. After consideration of all the "approved applications," the Department will submit to the Local Government, by the 31st March following, its recommendations for the distribution of the allotment among the applicant schools.

88. When a grant is sanctioned, the managers shall be informed whether it will be payable in full from the allotment for the year, or if not, in what years and by what instalments.

89. In the case of an application for a repair grant under Article 83 (*b*), the managers will be required to show that the necessity for such a grant has not arisen from the neglect of current repairs in previous years.

90. Grants under this chapter shall not ordinarily exceed one-half of the total cost. In places where there is a small or poor European population, the maximum grant shall not exceed two-thirds of the total cost.

Code of Regulations for European Schools in Bengal, 1889-90.

94. Before a grant is sanctioned for the erection of school buildings, the Department must be satisfied—

(*a*) that the European population of the locality is sufficiently large to render the existence of the school necessary, and to give a reasonable probability of its permanence;

(*b*) that the school is suited to the requirements of the locality;

(*c*) that the school is likely to be maintained in efficiency;

(*d*) that the school will be open to inspection;

(*e*) that the site, plans, estimates, and specifications are suited to the school, and the title and trust deeds in due form.

95. The trust-deed must declare the building to be granted in trust for school purposes only. It must also provide for the legal ownership of the premises, for the proper maintenance of the building, and for the inspection and management of the school.

(*See the note to Article 101.*)

NOTE.—This article does not preclude the managers from using the building for other purposes when not required for the purposes of the school

(*See Article 99.*)

96. No grant is finally sanctioned until a certificate is received from the managers, setting forth that the funds in their hands will, when added to the grant, be sufficient to meet all claims and to close the account.

97. Advances may be made from time to time out of the sanctioned grant on receipt of a report from the Public Works Department that the work is proceeding satisfactorily.

98. The grant is not paid in full until—

(*a*) a report is received from the Public Works Department certifying that the building has been satisfactorily completed; but exceptions may be made to this rule by the Local Government;

(*b*) the trust-deed is duly registered and a copy lodged with the Department.

Code of Regulations for European Schools in Bengal, 1895.

91. Before a grant is sanctioned under the preceding articles, the Department must be satisfied:—

(*a*) that the European population of the locality is sufficiently large to render the existence of the school necessary, and to give a reasonable probability of its permanence;

(*b*) that the school is suited to the requirements of the locality;

(*c*) that the school is likely to be maintained in efficiency;

(*d*) that the school will be open to inspection;

NOTE.—In the case of a school not receiving a maintenance grant, the inspection shall be limited to ascertaining that the buildings are maintained in good repair, that the sanitary arrangements are satisfactory, and that the school is properly conducted.

(*e*) that the site, plans, estimates, and specifications are suited to the school, and the title to the property is clear.

92. In making an application for a building grant, the managers shall undertake to execute a trust-deed in the standard form given in the appendix to the Code, or such other form as may be sanctioned by the Local Government.

93. The trust-deed must provide for the legal ownership of the premises, for the proper maintenance of the building, and for the inspection and management of the school, and must declare the building or the land, on account of which a grant is to be made, to be held in trust for school purposes only.

NOTE (1).—The execution of trust-deeds need only be insisted upon in the case of the erection or purchase of buildings, or in other cases, where the Local Government considers such a document necessary.

NOTE (2).—This article does not preclude the managers from using the building for other purposes when not required for the purposes of the school.

94. If any building, towards the erection, purchase, or repair of which a grant has been made by the Government, is subsequently diverted to other than educational purposes, the Government shall have a prior lien upon the building for the recovery of the grant, and a provision to this effect shall be made in the trust-deed.

(*See Article 86.*)

95. Advances may be made from time to time out of the sanctioned grant on receipt of a report from the Public Works Department that the work is proceeding satisfactorily.

96. The grant is not paid in full until:—

(*a*) a report is received from the Public Works Department certifying that the building has been satisfactorily completed; but exceptions may be made to this rule by the Local Government;

(*b*) the trust-deed is duly executed, registered, and forwarded by the managers to the Department for safe custody.

Code of Regulations for European Schools in Bengal, 1889-90.

99. If any building, towards the erection, purchase, or repair of which a grant has been made by the Government, is subsequently diverted to other than educational purposes, the Government shall have a prior lien upon the building for the recovery of the grant, and a provision to this effect shall invariably be made in the trust-deed or in some other binding document.

100. The trustees must undertake to refund the amount of any grant made for furniture if the school ceases to exist within three years from the date of payment.

101. All applications for grants must be submitted to the Department not later than the 1st of October in any year if the grant is to be provided for in the budget estimates of the following financial year.

NOTE.—The execution of trust-deeds need only be insisted upon in the case of the erection or purchase of buildings; or in other cases, where the Local Government considers such a document necessary.

Code of Regulations for European Schools in Bengal, 1895.

(See Article 94.)

97. The managers must undertake to refund the amount of any grant made for furniture if the school ceases to exist within three years from the date of payment.

(See Article 86.)

[See Article 93, Note (1).]

NOTE.—The provisions of this chapter shall apply to training colleges, and to hostels attached to them.

CHAPTER VIII.

PRIMARY, MIDDLE, AND HIGH SCHOOL EXAMINATIONS.

98. The primary, middle, and high school examinations are held for the purpose of enabling the progress of scholars to be thoroughly tested at certain definite stages of their school career, namely, on completing the course of instruction for primary standards, for middle standards, and for high school classes, respectively. In the primary school examination, questions will, in each subject, be set upon the work done in that subject in all standards up to and including Standard IV. In the middle school examination, the questions will be upon the work of all standards up to and including Standard VII. The scope of the high school examination is clearly defined, for Schedule I-A in that schedule, and for Schedule I-B in Article 104.

NOTE.—Under the terms of Article 17, passing the primary and the middle school examinations is the condition upon which promotions may ordinarily be made from the corresponding sections to those above.

(See Article 108.)

99. These examinations shall be held annually, near the close of the calendar year, upon such dates and at such centres as may be appointed by the Department.

[See Article 107 (a).]

NOTE.—Certificates shall be given to all who pass these examinations.

(See Article 105.)

100. A fee shall be charged for admission to the examinations, the amount of which shall be determined by the Department.

NOTE.—Provision is made in Article 33(*d*) for the award of special grants for the payment of such fees in the case of poor scholars.

(See Article 106.)

101. In provinces where the schools work up to the standards of examination prescribed in Schedule I-A, the examinations shall comprise the following subjects:—

A.—PRIMARY SCHOOL EXAMINATION.

(For scholars who have done the work of Standards I to IV prescribed in Schedule I-A.)

English	Language and Grammar	150	200
	Dictation	50	
Arithmetic			175
Geography			125
	TOTAL		500

B.—Middle School Examination.

(For scholars who have done the work of Standards V to VII prescribed in Schedule I-A.)

(*See Article 106.*)

English	275
Second Language	150
History and Geography	175
Arithmetic	175
Geometry and Algebra, or (for girls only) Domestic Economy	150
Elementary Science	75
Total	1,000

C.—High School Examination.

(As prescribed in Schedule I-A.)

[*See Article 107 (b).*]

102. To pass the primary school and middle school examinations, candidates must gain 25 per cent. of the possible marks in English and Arithmetic, and 30 per cent. of the possible aggregate.

To pass the high school examination, candidates must gain 33 per cent. of the possible marks in each of the compulsory subjects, and 40 per cent. of the possible aggregate.

[illegible] prescribed by the Government of India.

[*See Article 107 (c).*]

103. The names of those who pass the primary school and middle school examinations shall be arranged in three classes in order of merit, (and gazetted). Those who gain 60 per cent. of the possible aggregate shall be placed in the first class; those who gain 45 per cent. but less than 60 per cent., in the second class; those who gain 30 per cent. but less than 45 per cent., in the third class.

The names of those who pass the high school examination shall be arranged in two classes in order of merit, and gazetted. Those who gain 60 per cent. of the possible marks in compulsory subjects shall be placed in the first class; those who gain 40 per cent. but less than 60 per cent., in the second class.

(*See Article 29.*)

104. In provinces where the schools work in accordance with the course laid down in Schedule I-B, the examinations shall comprise the following subjects :—

A.—Primary School Examination.

(For scholars who have done the work of Standards I to IV prescribed in Schedule I-B.)

Compulsory Subjects.

Subject.	Course.	Full marks.	Notes.
1. Analysis and Grammar.	The course prescribed for Standard IV.	80	
2. Dictation .	About 12 lines of printed matter moderately difficult for Standard IV.	80	30 marks for spelling. 20 marks for hand writing.
3. Composition and Explanation of passages.	Exercises in composition, such as writing out the substance of a story read out by the Superintendent of the Examination, the description of some familiar place or object, an account of some well-known event, a letter on a given subject, etc.	100	50 marks for composition. 50 marks for explanation and paraphrasing.
	The explanation of words and phrases from a prescribed text-book, and paraphrasing from the same.		
4. Arithmetic .	The course prescribed for Standard IV.	200	

Code of Regulations for European Schools in Bengal, 1895.

Optional Subjects.

1. Geography .	The course prescribed for Standards III and IV.	100
2. Latin or French.	The course prescribed for Standard IV. A full vocabulary to be given in the question paper.	70

Candidates may take up one or both of the optional subjects. In order to pass the examination, 30 per cent. of the possible marks must be gained in each of the four papers in the compulsory subjects; and 30 per cent. of the possible marks in compulsory and optional subjects taken together must be gained in the aggregate. Marks for an optional subject will not be counted, if they fall below 30 per cent. of the possible marks in that subject.

In every paper, 10 per cent. of the possible marks may be deducted for want of neatness.

B.—Middle School Examination.

(For scholars who have done the work of Standards V to VII prescribed in Schedule I-B.)

Compulsory subjects.

Subject.	Course.	Full marks.
1. English—		
(a) Analysis and Grammar.	The course prescribed for Standard VII.	50
(b) Certain prescribed Text-Books.	Explanation and paraphrasing of passages.	100
(c) Composition	Letter.	150
	Essay.	
	Paraphrasing of unseen passages.	
	Explanation of idiomatic phrases of common occurrence.	
	Correction of "Indian-English."	
2. Arithmetic .	The course prescribed for Standard VII.	200

Optional subjects.

1. Latin or French.	(a) The prescribed Text-Book and questions arising therefrom.	100
	(b) Unseen passages.	
	(c) Grammar.	100
	(d) Composition.	
2. Geography .	The course prescribed for Standard VII.	100
3. History . .	The course prescribed for Standard VII.	100
4. Algebra . .	The course prescribed for Standard VII.	100
5. Euclid . .	The course prescribed for Standard VII.	100
6. Science . .	One of the courses prescribed for Standard VII.	100
7. Domestic Economy (for girls only).	The course prescribed for Standard VII.	100

Candidates may take any number of optional subjects up to five; but if five are taken, one of these must be a second language. In order to pass the examination, 30 per cent. of the possible marks must be gained in each division of the subject English, and in Arithmetic; and 30 per

cent. of the possible marks in the compulsory and optional subjects taken together (*i.e.* 80 per cent. of 1,100 marks) must be gained in the aggregate. Marks for an optional subject will not be counted, if they fall below 80 per cent of the possible marks in that subject.

In every paper, 10 per cent. of the possible marks may be deducted for want of neatness.

C.—High School Examination.

Compulsory Subjects.

Subject.	Course.	Full marks.
1. English . .	(a) Grammar	50
	(b) Composition	100
	(c) Text-Books in prose and poetry, prescribed each year.	150
2. Arithmetic. .	The whole	200

Optional Subjects.

1. Second Language—Latin,	(a) Text-Book, with questions on accidence, syntax, and allusions 100	200
	(b) Translation of sentences from English into Latin . 70	
or	(c) Unseen passages for translation into English . 30	
French.	(a) Text-Book, with questions on accidence, syntax and allusions 100	200
	(b) Composition of simple continuous prose and original letters 70	
	(c) Unseen passages for translation into English . 30	
2. Geography .	As defined by its treatment in Chisholm's Geography for India and Ceylon, excluding the appendix.	100
3. The History of England, and	As defined by its treatment in Ransome's "Short History of England."	100
The History of India.	From Baber, as defined by its treatment in Hunter's "Brief History of the Indian People."	
4. Algebra . .	The course prescribed for Standard VII.	100
	Quadratics of one unknown quantity and problems thereon, easy indices and surds.	
5. Euclid . .	Books I to IV, and deductions thereon.	100
6. Science . .	(a) Physics, as defined in Lewry's graduated course of Natural Science, Part I, and pages 1—160 of Part II, or.	100
	(b) Physiology, as defined in Huxley's "Elementary Physiology."	
7. Logic . .	Deductive, as defined in Jevons's "Elementary Lessons in Logic."	100
8. Political Economy.	As defined in Mrs. Fawcett's "Political Economy for Beginners."	100
9. Domestic Economy (for girls only).	Dr. Mann's "Domestic Economy and Household Science."	100

Note (1).—The text-books are named in order to define the extent of the subjects, and not as indicating that they are better than other works of the same class.

Note (2).—The marks may be altered, or omitted, at the discretion of the Local Government.

Code of Regulations for European Schools in Bengal, 1889-90.

Code of Regulations for European Schools in Bengal, 1895.

Additional Subject for Teachers.

Subject.	Course.	Full marks.
School Management and the Art of Teaching.	School organisation (time-table, etc.), discipline, registers, returns.	200
	Methods of teaching the subjects ordinarily found in the curriculum of schools.	
	The arrangement of courses of lessons in these subjects.	
	Notes of lessons.	
	The art of questioning and of dealing with answers.	
	Periodical examinations and the use to be made of the results.	

Candidates may take any number of optional subjects up to five; but if five are taken, one of these must be a second language. In order to pass the examination, 30 per cent. of the possible marks must be gained in each division of the subject English, and in Arithmetic; and 30 per cent. of the possible marks in the compulsory and optional subjects taken together (*i.e.*, 30 per cent. of 1,100 marks) must be gained in the aggregate. Marks for an optional subject will not be counted, if they fall below 30 per cent. of the possible marks in that subject.

105. The Additional Subject forms no part of the high school examination, this paper being intended for teachers only. Passes in this subject will be published along with the results of the high school examination.

106. The names of those who pass the primary, middle, and high school examinations shall be arranged in three classes in order of merit, and gazetted. Those who gain 60 per cent. of the possible aggregate shall be placed in the first class; those who gain 45 per cent. but less than 60 per cent. in the second class; and those who gain 30 per cent. but less than 45 per cent. in the third class. Candidates who gain not less than 75 per cent. of the possible marks in any subject shall be gazetted as having gained honours in that subject.

CHAPTER VI.

SCHOLARSHIPS.

102. Scholarships are of two grades, primary and middle; the number of each grade will be determined by the Local Government. Both boys and girls are eligible for scholarships, which will in every case be awarded after a competitive examination.

NOTE.—The nomenclature of the scholarships may be altered by the Local Government.

103. Primary scholarships are tenable for three years in a school of a higher grade than primary. Middle scholarships are tenable for five years in a technical school, or for two years in a school teaching up to the final standard of Schedule I or

CHAPTER IX.

SCHOLARSHIPS.

107. Scholarships are of three grades—primary, middle, and high. The number of each grade, and their value, will be determined by the Local Government. Scholarships will be awarded on the results of the examinations detailed in the preceding chapter, and will be tenable only in institutions which are recognised by the Department as efficient, which observe the transfer rules (Chapter IV), which are open to inspection,* and which are not excluded by the terms of Article 7 (*d*).

* In the case of schools receiving no maintenance grants, it will be sufficient to inspect the attendance registers, the admission register, and the transfer certificates.

NOTE 1.—All boys and girls who are Europeans as defined in Article 8 are eligible for scholarships, if not excluded by age.

NOTE 2.—The nomenclature of the scholarships may be altered by the Local Government.

108. Primary scholarships are tenable for three years in a school of a higher grade than primary. Middle scholarships are tenable for two years in a high school, for three years during apprenticeship as a pupil-teacher, or for five years in a

Code of Regulations for European Schools in Bengal, 1889-90.

the University Entrance examination. Scholarships are tenable only in schools recognised by the Department as efficient. The value of the scholarships shall be determined by the Local Government.

NOTE.—If the holder of a middle scholarship enters into an engagement as a pupil-teacher within one year after passing the scholarship examination, the scholarship shall be tenable for three years from the date of engagement.

104. Candidates for primary scholarships must be under 12 years of age, and for middle scholarships under 15 years of age, at the date of examination.

105. A fee, to be determined by the Department, shall be charged for admission to the examination for scholarships.

NOTE.—The Local Government may dispense with the levy of these fees in any class of scholarship examination.

106. The examination for primary and middle scholarships shall comprise the subjects of Standards IV and VII respectively, and shall be conducted by means of printed papers. Marks shall be allotted to the several subjects of examination as follows:—

Primary Scholarships.

English	Language and Grammar 150 Dictation . . . 50	200
Arithmetic		175
Geography		125
	TOTAL	500

Middle Scholarships.

English	275
Second Language	150
History and Geography . . .	175
Arithmetic	175
Geometry and Algebra or Domestic Economy (*for girls only*) . .	150
Elementary Science . . .	75
TOTAL	1,000

107. At the discretion of the Local Government the following rules may be applied:—

(*a*) Certificates shall be given to all the candidates who pass the examination, whether they obtain scholarships or not. There is no limit of age in the case of candidates for certificates only.

(*b*) To pass the examination a candidate must obtain 25 per cent. of the marks in each of the compulsory subjects—English and Arithmetic—and 30 per cent. of the aggregate number of marks obtainable.

To qualify for a scholarship a candidate must obtain 33 per cent. in English and Arithmetic, and 45 per cent. of the aggregate.

(*c*) The names of those who pass the examination shall be gazetted, and shall be arranged in three classes, each in order of merit. Those who obtain 60 per cent. of the aggregate number of marks obtainable shall be placed in the first class; those who obtain 45

Code of Regulations for European Schools in Bengal, 1895.

technical school. High scholarships are tenable for two years by students pursuing a recognised course of study in any institution within the province approved for this purpose by the Local Government.

109. Candidates for primary scholarships must be under 12 years of age, for middle scholarships under 15 years of age, and for high scholarships under 17 years of age, on the 31st of December in the year of examination.

NOTE.—The limits of age may be changed by the Local Government.

(*See Article 100.*)

(*See Article 107.*)

(*See Article 101.*)

(*See Note to Article 99.*)

(*See Article 105.*)

(*Cancelled.*)

(*See Article 103.*)

Code of Regulations for European Schools in Bengal, 1889-90.

per cent. but less than 60 per cent., shall be placed in the second class; those who obtain 30 per cent., but less than 45 per cent., shall be placed in the third class.

108. For the purposes of this chapter, each province shall, if necessary, be divided into circles, and a certain number of scholarships allotted to each circle, to be competed for by candidates from schools situated in that circle. In November of each year (or some other month to be fixed by the Department), the examination shall be held simultaneously at certain centres previously selected. The examination papers shall be the same for all centres.

(*See Bengal note to Article 109.*)

109. A scholarship may be reduced or withdrawn in cases of misconduct, of continued absence, or of failure to pass by the prescribed standards.

110. A scholarship may be transferred from one school to another with the sanction of the Department.

CHAPTER VII.

Revision of the Code.

111. The Local Government may, subject to the control of the Governor General in Council, alter the scale of grants and of scholarships, and may, with the previous approval of the Governor General in Council, cancel or modify any Articles of this Code, or introduce new Articles.

112. The schedules and notes appended to the Code shall have the same effect as the Articles of the Code, and shall be subject to the provisions of Article 111.

Code of Regulations for European Schools in Bengal, 1895.

110. For the purposes of this chapter, each province may, if necessary, be divided into circles, and a certain number of scholarships allotted to each circle, to be competed for by candidates from schools situated in that circle. It shall be open to the Local Government to allot a certain number of scholarships, before the examination, to boys and to girls respectively.

111. A scholarship-holder must be present at 75 per cent. of the school meetings held in each month in order to earn the full amount of his scholarship. If the attendances fall below 75 per cent. of the possible, a proportionate reduction will be made in the amount of the scholarship.

112. A scholarship may be reduced or withdrawn in cases of misconduct, of continued absence, or of insufficient progress in studies.

113. A scholarship may be transferred from one school to another with the sanction of the Department.

CHAPTER X.

Revision of the Code.

114. The Local Government may, with the previous approval of the Governor General in Council, cancel or modify any articles or schedules of this Code, or may introduce new articles.

115. In accordance with the foregoing article, Local Governments will issue their own Provincial Codes, with such further notes, instructions and appendices as they may consider necessary; and such notes, instructions and appendices will, in each province, have the same effect as the articles of the Code.

Code of Regulations for European Schools in Bengal, 1889-90.

SCHEDULE I.

STANDARDS OF EXAMINATION (PRIMARY).

Subjects.	Lower Division.		Upper Division.	
	Standard I.	Standard II.	Standard III.	Standard IV.
Elementary Subjects.				
(1)* Reading	To read a short paragraph from a book not confined to words of one syllable.	To read a short paragraph from an elementary reading-book.	To read a passage from a more advanced reading-book, or stories from English or Indian history.	To read a short passage of prose or poetry from a more advanced reading-book.
	To recite 20 lines of easy poetry, and to know their meaning. *Accuracy of pronunciation to be considered.*	To recite 30 lines of poetry, and to know their meaning.	To recite with intelligence and expression 40 lines of poetry, and to know their meaning. *Spelling to be tested.*	To recite 50 lines of poetry, and to know their meaning.
(2) Writing	To copy in manuscript characters a line of print; to write to dictation a few common words.	To write a passage of not more than three lines from the same book, slowly read over once, and then dictated word by word. *Before examination, the passage shall be read over again.*	To write six lines from one of the reading-books of the standard, slowly read over once, and then dictated a few words at a time.	To write eight lines from a reading-book, slowly read over once and then dictated in sections.
		Copy-books to be shown	Copy-books to be shown, with improved writing.	Copy-books to be shown with improved writing.
(3) Arithmetic†	Notation and numeration up to 1,000. Simple addition and subtraction of numbers of not more than three figures. In addition, not more than five lines to be given. Multiplication table to 6 × 12.	Notation and numeration up to 100,000. The four simple rules. Multiplication table to 12 × 12 and the 16 times table.	The compound rules in English and Indian money.	A.—For boys—Reduction and the compound rules in all weights and measures of common use; G. C. M. and L. C. M.; addition and subtraction of vulgar fractions. B.—For girls—Reduction and the compound rules in all weights and measures of common use; bills of parcels.
Class Subjects.‡				
(4) English	.....	To point out nouns and verbs in the passages read or written.	To point out the parts of speech in the passages read or written.	Easy parsing; to show by examples the use of the parts of speech.
(5) Needlework § (for girls only).	Threading needles; hemming.	Seaming; plain knitting with two needles.	Stitching and sewing on strings; knitting with two needles, plain and purled rows alternately.	Plain darning; herring-boning; knitting with four needles, plain and purl.
(6) Geography	.....	To know the points of the compass and the meaning and use of a map. Explanation of simple geographical terms by reference to a map or diagram.	The outlines of the geography of India with special reference to the province. To draw a ground-plan of the school-room, showing the position of the furniture. Shape and size of the earth.	The outlines of the geography of Asia and of the British Isles. To draw a ground-plan of the school compound and the principal objects in it, with its approaches. Diurnal motion of the earth; day and night.
Object Lessons.				
	A progressive course of lessons on common objects, such as familiar animals, plants, and substances used in ordinary life.			

N.B.—The clauses in italics apply to all succeeding standards.

* Reading with intelligence will be required in all the standards, and increased fluency and expression in successive years. In Standards III to VI, two sets of reading-books should be provided, of which one should be geographical, historical or biographical. The Inspector may examine in any of those books, and may test the intelligence of the reading by questions on the meaning of what is read.

† (*a*) The Inspector may examine scholars in arithmetic in any standard lower than that in which they are presented, and in mental arithmetic suited to their respective standards. The object of the exercise in mental arithmetic is to encourage dexterity and correctness in computation, and to anticipate, by means of rapid and varied oral practice with small numbers, the longer problems which have to be worked out in writing. Such exercises should from the first deal with concrete as well as with abstract numbers.

(*b*) In those schools in which arithmetic is taught up to the fourth standard in a different order from that here defined, the subjects in the first three standards may, with the previous sanction of the Inspector, be re-arranged accordingly.

‡ No grant will be given for a class subject in any standard in girls' schools unless needlework is taken up.

§ In each standard a simple garment must be shown containing the stitches required in that and lower standards.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I.—A.

1. STANDARDS OF EXAMINATION (PRIMARY).

Subjects.	Lower Division.		Upper Division.	
	Standard I.	Standard II.	Standard III.	Standard IV.
Elementary Subjects.				
(1) Reading*	To read a short paragraph from a book not confined to words of one syllable.	To read a short paragraph from an elementary reading-book.	To read a passage from a more advanced reading-book, or stories from English or Indian history.	To read a short passage of prose or poetry from a more advanced reading-book.
	To recite 20 lines of easy poetry, and to know their meaning. *Accuracy of pronunciation to be considered.*	To recite 30 lines of poetry, and to know their meaning.	To recite with intelligence and expression 40 lines of poetry, and to know their meaning. *Spelling to be tested.*	To recite 50 lines of poetry, and to know their meaning.
(2) Writing	To copy in manu-script characters a line of print; to write to dictation a few common words.	To write a passage of not more than three lines from the same book, slowly read over once and then dictated word by word. *Before examination, the passage shall be read over again.*	To write six lines from one of the reading-books of the standard, slowly read over once, and then dictated a few words at a time.	To write eight lines from a reading-book, slowly read over once and then dictated in sections.
		Copy-books to be shown.	Copy-books to be shown, with improved writing.	Copy-books to be shown, with improved writing.
(3) Arithmetic†	Notation and numeration up to 1,000. Simple addition and subtraction of numbers of not more than three figures. In addition, not more than five lines to be given. Multiplication table to 6 × 12.	Notation and numeration up to 100,000. The four simple rules. Multiplication table to 12 × 12 and the 16 times table.	The compound rules in English and Indian money.	A.—For boys—Reduction and the compound rules in all weights and measures of common use; G. C. M and L. C. M.; addition and subtraction of vulgar fractions. B.—For girls—Reduction and the compound rules in all weights and measures of common use: bills of parcels.
Class Subjects.‡				
(4) English	.....	To point out nouns and verbs in the passages read or written.	To point out the parts of speech in the passages read or written.	Easy parsing; to show by examples the use of the parts of speech.
(5) Needlework § (for girls only).	Threading needles; hemming.	Seaming; plain knitting with two needles.	Stitching and sewing on strings; knitting with two needles, plain and purled rows alternately.	Plain darning; herring-boning; knitting with four needles, plain and purl.
(6) Geography	.....	To know the points of the compass and the meaning and use of a map. Explanation of simple geographical terms by reference to a map or diagram.	The outlines of the geography of India with special reference to the provinces.	The outlines of the geography of Asia and of the British Isles.
			To draw a ground-plan of the school room, showing the position of the furniture. Shape and size of the earth.	To draw a ground-plan of the school compound and the principal objects in it, with its approaches. Diurnal motion of the earth: day and night.
(7) Drawing	A course approved by the Inspector.			
	Object Lessons.			
	A progressive course of lessons on common objects, such as familiar animals, plants, and substances used in ordinary life, or a progressive course of lessons leading up to the teaching of physical science.			

N.B.—The clauses in italics apply to all succeeding standards.

* Reading with intelligence will be required in all the standards, and increased fluency and expression in successive years. In Standard III and upwards, two sets of reading-books should be provided, of which one should be historical or biographical. The Inspector may examine in any of those books, and may test the intelligence of the reading by questions on the meaning of what is read.

† (a) The Inspector may examine scholars in arithmetic in any standard lower than that in which they are presented, and in mental arithmetic suited to their respective standards. The object of the exercise in mental arithmetic is to encourage dexterity and correctness in computation, and to anticipate, by means of rapid and varied oral practice with small numbers, the longer problems which have to be worked out in writing. Such exercises should from the first deal with concrete as well as with abstract numbers.

(b) In those schools in which arithmetic is taught up to the fourth standard in a different order from that here defined, the subjects in the first three standards may, with the previous sanction of the Inspector, be re-arranged accordingly.

‡ No grant will be given for a class-subject in any standard in girls' schools unless needlework is taken up.

§ In each standard a simple garment must be shown containing the stitches required in that and lower standards.

Code of Regulations for Europeans Schools in Bengal, 1889-90.

SCHEDULE I—(contd).

STANDARDS OF EXAMINATION (MIDDLE).

Subjects.	Standard V.	Standard VI.	Standard VII.
		Elementary Subjects.	
(1) Reading . .	To read a passage from a more advanced book. Allusions to be explained in the case of passages previously read.	To read a passage from a more advanced reading-book. Allusions to be explained in the case of passages previously read.	To read a passage from a modern English poet, and another from a modern English prose writer.
	To recite 60 lines of poetry or 80 lines of prose, and to know their meaning.	To recite 80 lines of poetry or 40 lines of prose from a standard writer, and to know their meaning	To recite 100 lines from a modern poet or 50 lines from a modern prose writer, and to know their meaning.
	Reading may be tested by passages from a newspaper, or from a book not comprised in the school course.		
(2) Writing . .	To write to dictation a passage of ten lines not previously read in the class. Copy-books to be shown.	To write a short narrative or letter Copy-books and exercise-books to be shown.	To write a letter or narrative, or a short essay on some subject comprised in the school course for the year. Exercise-books to be shown.
		Spelling, hand-writing, and composition to be considered.	
(3) Arithmetic. A.—For boys .	Vulgar fractions; simple proportion; practice; decimal fractions.	Proportion; interest; square and cubic measures.	Discount; stocks; profit and loss exchange; square root.
	Progressive exercises in mental arithmetic.		
B.—For girls .	G. C. M. and L. C. M.; vulgar fractions (simple); proportion (simple).	Vulgar fractions; proportion; practice; decimal fractions.	Interest; square measure.
	Progressive exercises in mental arithmetic.		
		Class Subjects.*	
(4) English . .	To parse and analyse a simple sentence.	To parse and analyse a short complex sentence, and to know the method of forming English nouns, adjectives, and verbs from each other.	Grammar and analysis of sentences; prefixes and terminations; easy derivations.
(5) Needlework (for girls only) .	Gathering; stroking; setting in; marking on coarse material; knitting socks or stockings; plain darning and mending stockings; patching old garments.	Pleating; frilling; setting on frills; sewing on buttons and buttonholing; knitting a full-sized stocking; improved darning and mending; cutting out plain under-garments.	Running tucks; marking on finer materials; knitting a stocking with thickened heels; Swiss darning; cutting out any garment which can be made by children at this standard.
(6) Geography (including physical geography).	The outlines of the geography of Europe; special knowledge of the geography of India. To draw outline maps of Europe and India.	The outlines of the geography of Africa, America, and Australasia; special knowledge of the geography of the British Isles. To draw outline maps of Africa and America, and with greater detail, maps of the British Isles. Phases of the moon; tides.	The outlines of the geography of the world: special knowledge of the geography of the British colonies and dependencies. To draw maps of the great continents.
Latitude and longitude; annual motion of the earth; the seasons.			General circumstances which determine climate; wind; rain; dew.
(7) History . .	The outlines of the history of England from the Norman conquest to Richard III.	The outlines of the history of England from Henry VII to Anne.	The outlines of the history of England from George I to Victoria, and of India (British period).
(8) Mathematics† .	(1) Algebra; notation, and the first four rules.	(1) Algebra; the first four rules, resolution into factors, G. C. M. and L. C. M., easy fractions.	(1) Algebra, to simple equations involving two unknown quantities.
		(2) Geometry; Euclid to I-20, with easy deductions.	(2) Geometry; Euclid, Book I, with easy deductions.

* No grant will be given for a class subject in any standard in girls' schools unless needlework is taken up.

† In girls' schools mathematics may be taken up as a special subject. In order to earn a grant for mathematics in Standards IV and VII, scholars must satisfy the Inspector in both algebra and geometry.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I—A (contd).

2.—STANDARDS OF EXAMINATION (MIDDLE).

Subjects.	Standard V.	Standard VI.	Standard VII.
		Elementary Subjects.	
(1) Reading . .	To read a passage from a more advanced book. Allusions to be explained in the case of passages previously read.	To read a passage from a more advanced reading-book. Allusions to be explained in the case of passages previously read.	To read a passage from a modern English poet, and another from a modern English prose writer.
	To recite 60 lines of poetry or 30 lines of prose, and to know their meaning.	To recite 80 lines of poetry or 40 lines of prose from a standard writer, and to know their meaning.	To recite 100 lines from a modern poet or 50 lines from a modern prose writer, and to know their meaning.
	Reading may be tested by passages from a newspaper, or from a book not comprised in the school course.		
(2) Writing . .	To write to dictation a passage of ten lines not previously read in the class. Copy-books to be shown.	To write a short narrative or letter. Copy-books and exercise-books to be shown. *Spelling, hand-writing and composition to be considered.*	To write a letter or narrative, or a short essay on some subject comprised in the school course for the year. Exercise-books to be shown.
(3) Arithmetic. A.—For boys .	Vulgar fractions; simple proportion; practice; decimal fractions.	Proportion; interest; square and cubic measures.	Discount; stocks; profit and loss; exchange; square root.
	Progressive exercises in mental arithmetic.		
B.—For girls .	G. C. M. and L. C. M.; vulgar fractions (simple); proportion (simple).	Vulgar fractions; proportion; practice; decimal fractions.	Interest; square measure.
	Progressive exercises in mental arithmetic.		
		Class Subjects.*	
(4) English . .	To parse and analyse a simple sentence.	To parse and analyse a short complex sentence, and to know the method of forming English nouns, adjectives and verbs from each other.	Grammar and analysis of sentences; prefixes and terminations; easy derivations.
(5) Needlework (for girls only).	Gathering; stroking; setting-in; marking on coarse material; knitting socks or stockings; plain darning and mending stockings; patching old garments.	Pleating; frilling; setting on frills; sewing on buttons and buttonholing; knitting a full-sized stocking; improved darning and mending; cutting out plain under-garments.	Running tucks; marking on finer materials; knitting a stocking with thickened heels; Swiss darning; cutting out any garment which can be made by children at this standard.
(6) Geography (including physical geography).	The outlines of the geography of Europe; special knowledge of the geography of India. To draw outline maps of Europe and India. Latitude and longitude; annual motion of the earth; the seasons.	The outlines of the geography of Africa, America and Australasia; special knowledge of the geography of the British Isles. To draw outline maps of Africa and America, and with greater detail, maps of the British Isles. Phases of the moon; tides.	The outlines of the geography of the world; special knowledge of the geography of the British colonies and dependencies. To draw maps of the great continents. General circumstances which determine climate; wind; rain; dew.
(7) History . .	The outlines of the history of England from the Norman conquest to Richard III.	The outlines of the history of England from Henry VII to Anne.	The outlines of the history of England from George I to Victoria, and of India (British period).
(8) Mathematics† .	(1) Algebra; notation, and the first four rules.	(1) Algebra; the first four rules, resolution into factors, G. C. M. and L. C. M., easy fractions.	(1) Algebra, to simple equations involving two unknown quantities.
		(2) Geometry; Euclid to I. 26, with easy deductions.	(2) Geometry, Euclid; Book I with easy deductions.

* No grant will be given for a class subject in any standard in girls' schools unless needlework is taken up.

† In girls' schools mathematics may be taken up as a special subject. In order to earn a grant for mathematics in Standards VI and VII, scholars must satisfy the Inspector in both algebra and geometry.

Code of Regulations for European Schools in Bengal, 1889-90.

SCHEDULE I—A (contd.)

STANDARDS OF EXAMINATION (MIDDLE)—*contd.*

SUBJECTS.	Standard V.	Standard VI.	Standard VII.
(9) Elementary science.*	(a) The build of the human body; the names and positions of the organs of alimentation, circulation, and respiration.	(a) The same, together with the processes of alimentation, circulation, and respiration.	(a) The same, together with the study of the eye, ear, and nose.
	(b) Gravitation, weight, and specific gravity.	(b) The common pump, barometer, and thermometer; palleys and levers.	(b) Elementary properties of light and heat.
(10) Domestic economy (for girls only).		A course to be prescribed hereafter.	
		(*For "Drawing" see special subjects below.*)	
		SPECIAL SUBJECTS.	
(12) An Indian vernacular†	(1) To read and translate into English a passage from the book or portion of the book read during the year.	(1) Improved reading and translation into English. Translation into the vernacular of short and easy sentences.	(1) To read and translate a passage from a book comprised in the school course. To translate, in writing, a short passage from an easy English reader.
	(2) To write the letters of the alphabet, and words of one or two syllables.	(2) To write, from the dictation of the teacher, an easy passage from the book or portion of the book read during the year.	(2) To write, from the dictation of the Inspector or teacher, a passage from a book comprised in the school course.
	(3) Inflections of nouns and pronouns.	(3) Inflections; easy syntax.	(3) Easy grammar.
(13) European language.	*A.—Latin.*	*A.—Latin.*	*A.—Latin.*
	Grammar to the end of regular verbs. Translation of easy sentences into English.	Irregular verbs and leading rules of syntax, knowledge of a first reading-book; translation of simple English sentences.	Grammar; Cæsar de Bello Gallico, Book I, or some other book approved by the Inspector. Somewhat longer sentences to be translated from English.
	B.—French and German.	*B.—French or German.*	*B.—French or German.*
	Grammar to the end of regular verbs. Ten pages of an easy reader. To write from dictation a few common words.	Inflexions and easy syntax. Improved reading and translation. Dictation.	Grammar; reading and translation of a text-book approved by the Inspector. Translation of easy sentences from English.
(14) Botany‡	Characters of the root, stem, leaves, and parts of the flower, illustrated by specimens of common flowering plants. The phenomena of the movements of plants by twining, climbing, and catching hold of objects by tendrils or other contrivances.	The phenomena of the ripening of the flower into fruit. The various forms of fruits and the structure of seeds, *e.g.*, a bean and grain of wheat or rice. The various contrivances to effect distribution. The phenomena of germination. The comparison of a fern and a moss with a flowering plant.	Structure of wood, bark, and pith, cells vessels, and tissues. Functions of the stem, root, and leaves. The food of plants, and the manner in which a plant grows. The elements of classification according to natural characters, illustrated by familiar plants.
(15) Drawing	*Free hand.*—Easy outlines of common objects, from the flat, combining straight and curved lines; conventionalised leaves, flowers, etc. All exercises to be drawn of the same size as the copies.	*Free hand.*—The same as for Standard V; but drawings to be increased or reduced in size proportionally. *Geometry.*—The bisection of straight and curved lines; the drawing of perpendiculars from or through any given points; drawing parallel lines, construction and division of angles, division of lines into equal or proportional parts; construction of triangles and quadrilaterals of given linear dimensions or given angles; and, as tests of accuracy, the copying of simple geometrical figures, (*e.g.*, combinations of squares, triangles, circles, etc.)	*Free hand.*—Copying of designs, in outline, for needlework, metal work and architectural ornamentation (excluding the human figure). *Geometry.*—Elementary constructions necessary for geometrical pattern drawing; constructions for a circle passing through three points, or touching three lines; of tangents to two circles; simple cases of inscription and circumscription, reduction or enlargement of figures; construction of irregular polygons when sides and angles are given; and construction (by a general method) of regular polygons.

N. B.—The clauses in italics apply to all succeeding standards.

* Instruction in the science subjects should be given mainly by experiment and illustration. If these subjects are taught to children by definition and verbal description only, such instruction will not be accepted as qualifying for a grant.

† An Indian vernacular may be taken as a class subject, the decision resting with the Department, and in boys' schools may be made compulsory at the option of the Local Government.

‡ The instruction in botany shall be given, as far as possible, with the object of cultivating the scholar's powers of observation.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I-A—(contd.)

STANDARDS OF EXAMINATION (MIDDLE)—*contd.*

Subjects.	Standard V.	Standard VI.	Standard VII.
(9) Elementary science*.	(a) The build of the human body; the names and positions of the organs of alimentation, circulation, and respiration.	(a) The same, together with the processes of alimentation, circulation, and respiration.	(a) The same, together with the study of the eye, ear and nose.
	(b) Gravitation, weight, and specific gravity.	(b) The common pump barometer, and thermometer; pulleys and levers.	(b) Elementary properties of light and heat.
(10) Domestic economy (for girls only).	A course to be prescribed hereafter.		
(11) Drawing	A course approved by the Inspector.		
	Special Subjects.		
(12) An Indian vernacular†.	(1) To read and translate into English a passage from the book or portion of the book read during the year.	(1) Improved reading and translation into English. Translation into the vernacular of short and easy sentences.	(1) To read and translate a passage from a book comprised in the school course. To translate, in writing, a short passage from an easy English reader.
	(2) To write the letters of the alphabet, and words of one or two syllables.	(2) To write, from the dictation of the teacher, an easy passage from the book or portion of the book read during the year. Code of Regulations for European Schools in Bengal, 1889-90.

SCHEDULE I.—contd.

STANDARD OF EXAMINATION (HIGH).

(*Final Examination*).

For Boys only.	For Girls only.
Compulsory Subjects.	
1. English.—A play of Shakespeare and a work of a standard prose writer.* A manual of English literature.†	1. The same.
2. Latin, French, German or an Indian vernacular:—Translation of passages from the prescribed text-book*; translation of easy passages in prose from a book not previously read in the class; translation of sentences from English Grammar.	2. The same.
3. Arithmetic and Book-keeping†	3. Arithmetic.
4. Mathematics.—Algebra, to quadratic equations. Euclid, Books I–IV with easy deductions. Mensuration.†	4. The History of England and of India.
5. Political Economy†	5. Domestic Economy.‡
General and Physical Geography†	General and Physical Geography.
Optional Subjects.	
6. Drawing‖	6. Drawing.
7. Elementary Physics†	7. Music (as in the final examination for pupil-teachers (Schedule II).
8. Elementary Chemistry†	8. Botany.
9. An Indian vernacular, if not taken up as a compulsory subject.	9. The same.
10. The History of England and of India.	
Additional Subject (for Teachers only).	
School Method§	School Method§

* The text-books in English and in the second language shall be published in the Code not less than one year in advance.

† The following list of text-books is intended to show the amount of work to be done in each subject; other books may be used in place of those named:—

English Literature—Collier's *History of English Literature*, pp. 101-218 and 358—539.

Book-keeping.—Ingli's *Book-keeping by single and double entry*. Chambers' Educational Course.

Mensuration—Todhunter's *Mensuration for Beginners*. The course prescribed for the Entrance Examination of the Calcutta University.

Political Economy—Mrs. Fawcett's *Political Economy for Beginners*.

Physical Geography—Blanford's *Physical Geography*.

Elementary Physics—Balfour Stewart's *Lessons in Elementary Physics*, omitting the chapters on sound, electricity and magnetism.

Elementary Chemistry—Roscoe's *Lessons in Elementary Chemistry*, omitting the chapters on organic chemistry.

Botany—Oliver's *First Book of Indian Botany*, Part I, and Chapters I and IV of Part II.

‡ A text-book on Domestic Economy will be published shortly.

§ The nature and extent of this subject is defined in the first year's course for Training Colleges for men, Schedule III.

‖ The course in Drawing will consist of—

(a) *Freehand*—As in Standard VII.

(b) *Plane Geometry*—As in Standard VII.

(c) *Model*—Drawing (unshaded) of common objects, such as are ordinarily found in a dwelling-house or school.

(d) *Perspective*.—The delineation in parallel and angular perspective of geometrical plane figures and regular solids (*e.g.*, square, circle, cone, pyramid, prism, cylinder, etc.)—no exercise to involve accidental vanishing points.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I-A—(contd.)

3.—STANDARD OF EXAMINATION (HIGH).

For Boys only.	For Girls only.
Compulsory Subjects.	
1. English.—A play of Shakespeare and a work of a standard prose writer.* A manual of English literature.†	1. The same.
2. Latin, French, German, or an Indian vernacular:—Translation of passages from a prescribed text-book*; translation of easy passages in prose from a book not previously read in the class; translation of sentences from English Grammar.	2. The same.
3. Arithmetic—the whole	3. The same.
4. Mathematics:—Algebra to quadratic equations. Euclid, Books I—IV with easy deductions; Mensuration of plane surfaces, including the theory of surveying with the chain.	4. Domestic Economy†.
5. The History of England and of India, and General and Physical Geography.	5. The same.
Optional Subjects.	
6. Drawing†	6. Drawing†.
7. Elementary Physics†	7. Music†.
8. Elementary Chemistry†	8. Botany†.
9. Latin or French or German or an Indian vernacular. } if not taken up as a compulsory subject.	9. The same.
10. Political Economy†	
11. Book-keeping†	
12. Plane Trigonometry, as far as the solution of triangles	
Additional Subject (for Teachers only).	
School Method†	School Method.†

* The text-books in English and in the second language shall be published not less than one year in advance.

† The extent of the work in these subjects will be defined by the Local Government.

Code of Regulations for European Schools in Bengal, 1889-90.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I—*contd.*

B.

I.—COURSE OF STUDIES IN INFANT CLASSES.

LOWER DIVISION.

The children should be taught to recognise the letters of the alphabet and to read easy words of two letters at sight. Printing the easy letters is very good practice.

The children should be practised in counting various objects, in order to form ideas of number. Small numbers such as three and four should be used at first, and the children should gradually learn to count up to ten.

Simple lessons on form, position, colour, and easily recognised qualities should be regularly given, followed after a time by simple object lessons with the special purpose of training the children to notice these qualities, etc, for themselves.

Singing (by ear), exercising, and marching, should be practised between other lessons, as a relief from them, and should occupy a large part of the children's time.

Girls should be taught how to thread a needle, and how to use a thimble.

UPPER DIVISION.

Reading	Should be practised from a very simple reader until the children can recognise easy words of three or four letters at sight.
Poetry	Simple poetry, such as nursery rhymes, should be learnt by repeating them after the teacher. Care should be taken to make the children understand what they learn.
Spelling	The spelling of easy familiar words to be learnt, and the children should be exercised in writing these words as well as spelling them orally.
Handwriting	Great attention must be given to the proper formation of the letters, capital and small and the figures 1 to 9.
Transcription	Easy passages from the simple reader in use.
Dictation	Easy words which the children have previously learnt to spell.
Counting	The children should be gradually trained to count higher numbers at least up to twenty.
Arithmetic	The addition of two concrete numbers each less than ten should be practised, beginning with the smallest, and gradually introducing the higher ones. Addition tables should be gradually introduced.
Object Lesson	As in the Lower Division.
Singing	As in the Lower Division.
Needlework	The children should be taught to hem on coarse material, *e.g.*, a duster.

Code of Regulations for European Schools in Bengal, 1889-90.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I—B—*contd.*

II.—COURSE OF STUDIES FOR THE PRIMARY STANDARDS.

SUBJECTS.	STANDARD I.	STANDARD II.	STANDARD III.	STANDARD IV.
		COMPULSORY SUBJECTS.		
Reading . .	Easy reading books not confined to words of one syllable, approved by the Inspector.	Approved reading books of suitable progressive difficulty.	Approved reading books of suitable progressive difficulty.	Approved reading books of suitable progressive difficulty.
Poetry . .	At least four lines to be learnt weekly, by repetition after the teacher. *In this, as in all the higher standards, the scholars should be made to thoroughly understand the poetry before it is learnt; and revision should frequently take the place of learning new verses.*	At least four lines to be learnt weekly, by repetition after the teacher.	The class to learn by themselves at least eight lines weekly, which have been previously repeated after the teacher.	The class to learn by themselves at least twelve lines weekly, which have been previously repeated after the teacher.
Handwriting .	May be practised either on slates or on paper. In either case, double lines should be used, from about a quarter to five-sixteenths of an inch apart. *Neatness and cleanliness should be insisted upon in this and all higher standards.*	Copy books to be used. Other writing may be either on slates or on paper. Writing in this standard also should be between double lines, say from three-sixteenths to a quarter of an inch apart.	Both copy and exercise books to be used. The writing to be between double lines or otherwise, as found desirable, in each individual case.	Both copy and exercise books to be used. The writing to be between double lines or otherwise, as found desirable in each individual case.
Transcription .	Prose from the readers in use in alternation with dictation.	Poetry and Prose.	Poetry and prose.	Poetry and prose.
Dictation .	Passages from chapters in the readers previously studied.	Passages from chapters in the readers previously studied.	Passages from chapters in the readers previously studied.	Passages from chapters in the readers previously studied.
Composition .	As introductory training, the children should be encouraged to make their answers to questions usually take the form of a complete statement, and *the teacher should on all occasions carefully and persistently correct errors and defects in their speech, particularly faulty idioms peculiar to India, not only in this but in all the following standards.*	Answering questions about familiar scenes and objects in whole sentences. Nouns or verbs being given, the children to form sentences containing them sometimes orally sometimes in writing.	A simple letter on a given easy subject. A written exercise at least once a week, *e. g.*, the reproduction by the children, in their own words, of the substance of a short story which has been read or told to them, or an account of some familiar incident. A special lesson at least once a week for the discussion between class and teacher of the faults found in the above exercise.	In Standard IV, the children should be frequently exercised in writing out the sense of a simple piece of poetry, *well within their comprehension*, in their own words.
Spelling . .	Words met with in the readers: words commonly used by the children: and all words used in connection with the work of the class. This subject should be taught incidentally in connection with every lesson (more particularly reading and those involving writing) as well as by special lessons. *All new words should be repeatedly written.*	Words met with in the readers: words commonly used by the children: and all words used in connection with the work of the class. This subject should be taught incidentally in connection with every lesson (more particularly reading and those involving writing) as well as by special lessons. *All new words should be repeatedly written.*	Words met with in the readers: words commonly used by the children: and all words used in connection with the work of the class. This subject should be taught incidentally in connection with every lesson (more particularly reading and those involving writing) as well as by special lessons. *All new words should be repeatedly written.*	Words met with in the readers: words commonly used by the children: and all words used in connection with the work of the class. Code of Regulations for European Schools in Bengal, 1889-90.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I—B—*contd.*

II.—COURSE OF STUDIES FOR PRIMARY STANDARDS—*contd.*

SUBJECTS.	STANDARD I.	STANDARD II.	STANDARD III.
		COMPULSORY SUBJECTS—*contd.*	
Tables . .	Addition tables. Multiplication tables up to at least 6×12, with a thorough understanding of their meaning. The above must be regularly practised, *even after they are well known.*	Regular practice in the addition and multiplication tables (including "16 times"). Tables of English and Indian money to be learnt and understood.	Regular practice in the addition and multiplication tables. The tables of English and Indian weights and measures given in the notes below to be learnt.
Notation and Numeration.	Numbers up to four figures.	Numbers of six figures	Millions . . . .
Arithmetic .	Simple addition, simple subtraction, and simple multiplication by the numbers which correspond with the mutiplication tables learnt.	All back work to be regularly practised. The remaining work connected with the four simple rules. Reduction of English and Indian money from one denomination to the one above or below; and other very easy problems requiring the application of the four simple rules, either separately or combined, to concrete numbers. To clearly understand the meaning of such expressions as *one*-fourth, *one*-seventh, *one*-half, etc., and know how to find such a part of a given number.	Regular practice in the four simple rules. Reduction and the compound rules in English and Indian money. Reduction from one denomination to the next above or below in any of the prescribed tables of weights and measures. Easy bills of parcels. Easy problems in the "unitary method," and in all the rules which have been studied.
Mental Arithmetic.	Very easy problems requiring the application to concrete numbers of the rules which have been mastered.	Problems involving the application to concrete numbers of the rules which have been studied.	Problems involving the application of the rules which have been studied.
Analysis and Grammar.	.....	Practice in the division of short and easy sentences into Subject and Predicate; *after a time* making use of these terms to distinguish the two parts. The recognition of nouns, adjectives, personal pronouns, verbs (not including parts of the verb 'to be') and adverbs; preceded in each case by the reason for classifying them as one or the other. *Only easy exercises involving no peculiar difficulties should be given.*	The division into Subject and Predicate of longer sentences containing enlargements of the subject and extensions of the predicate, the scholars in all such cases to be required to point out the principal word in the subject, and the verb in the predicate. The recognition of the verb 'to be,' pronouns other than personal, conjunctions, and prepositions; and the full parsing of nouns, pronouns, adjectives and adverbs. *Peculiar difficulties should be avoided in the exercises.*

Code of Regulations for European Schools in Bengal. 1898-90.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I—B—*contd.*

II.—COURSE OF STUDIES FOR THE PRIMARY STANDARDS—*contd.*

SUBJECTS.	STANDARD I.	STANDARD II.	STANDARD III.	STANDARD IV.
		COMPULSORY SUBJECTS—*concld.*		
Geography	.....	The shape of the earth. Division of its surface into land and water, and the sub-divisions of each, as well as mountains, table-lands, plains, etc., rivers and lakes. *A fixed form of definition should never be given until a clear idea of the thing to be defined has been formed for some time.* The eight principal points of the compass. Rough plans of the school compound and immediate neighbourhood, etc., should be drawn on the black board by the teacher, and on slates or paper by the children, with the object of teaching the latter to understand a map.	Revision of work in Standard II. *India.*—Its boundaries, a general knowledge of its surface, *i.e.*, to know what portions are mountains, table-lands, or plains: the chief river basins, and the course of the main stream in each; the character of the various parts classified as cultivated land, jungle, or desert: the occupations of the people as determined by the productions in different districts, treated in a general way (no lists of names only). A few of the chief towns in each of the large districts, and any interesting facts connected with them. *In this and in all the higher standards, sketch maps of the countries studied should be constantly practised.* The earth's rotation on its axis, and its revolution round the sun. In this standard no mention should be made of the inclination of the earth's axis to the plane of its orbit.	Revision of the work of previous standards. *England and Wales.*—The study of "About England" (published by George Bell & Son). Latitude and Longitude.
Object Lessons	To be given in each class at least once a week. A list of the lessons, in the order in which they are given, must be preserved for submission to the Inspector. The following is intended as a guide to the work under this head. The teacher should give oral lessons, amply illustrated, on the animals, plants, and the things in general by which we are surrounded: on common properties, such as hardness, softness, brittleness, tenacity, porosity, etc., met with in familiar substances: on the use of various substances as determined by their qualities: on the various states or forms in which substances are found, solid, liquid, and gaseous, and instances of familiar changes in certain substances from one state to another: elementary notions of physical science connected with such subjects as heat, gravity, atmospheric pressure, etc.: very elementary ideas of human anatomy and physiology, etc. The lessons must be adapted in point of difficulty to the successive stages of mental growth of the scholars, and the teacher should first aim at the cultivation of the perceptive powers and the communication of useful knowledge. As the children become more advanced, attention should gradually be more and more devoted to the training and exercise of their reasoning faculties. On all occasions, but particularly when giving object lessons, the teacher should endeavour to do as little as is expedient himself, and to make the children do as much as possible themselves: he should lead his pupils, but should let *them* discover.			
Needlework (*for girls only*).	Hemming on coarse materials, *e. g.*, a holland apron; the hem to be turned down by the teacher. The children to be taught to secure the thread both at the beginning and at the "ending off" of the work. Plain knitting with two needles, *e. g.*, a pair of garters. Cross stitch on coarse canvass in straight lines.	To practise all work previously learnt. Hemming on finer material, *e. g.*, a handkerchief. The children to learn to turn down the hem. Knitting plain and purl, *e. g.*, a comforter. Cross stitch on canvass forming a simple design up and down, *e.g.*, the border of a mat, or a kettle holder.	To practise all work previously learnt. To learn to make a simple petticoat or some other garment of similar difficulty, in which hemming, running, and felling are shown. To learn to knit a pair of ribbed cuffs. To learn to mark the simple letters of the alphabet on canvass.	To practise all work previously learnt. To learn to make a flannel banian or a flannel petticoat, introducing herring-bone stitch. To learn to knit a pair of baby's socks. To learn to mark all the letters of the alphabet on canvass. *In this and in the higher standards, the girls should be taught to mend their own clothes, and to darn their own stockings.*

Code of Regulations for European Schools in Bengal, 1889-90.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I—B—*contd.*

II.—COURSE OF STUDIES FOR THE PRIMARY STANDARDS—*contd.*

SUBJECTS.	Standard I.	Standard II.	Standard III.	Standard IV.
		OPTIONAL SUBJECTS.		
Latin				(*a*) Regular nouns of the five declensions. (*b*) Regular adjectives. (*c*) Declension of nouns and adjectives singly and in combination. (*d*) Regular Comparison of adjectives. (*e*) Personal pronouns. (*f*) General rules for gender. (*g*) Exercises consisting of easy simple sentences for translation from Latin into English and from English into Latin, introducing a few common verbs of which the translation should be given by the teacher. (*h*) Conjugation of the verb "*sum*." In this standard *invariably* (and in the higher standards also, if necessary) the teacher should require the boys to give the English for each word in repeating the declensions. He should also continually exercise the boys in giving the English for individual cases of Latin nouns and adjectives, taking care that every possible translation is given in doing so; and in like manner require the Latin to be given for the English equivalents.
French				(*a*) Use of the indefinite and definite article singly and compounded with *de* and *à*, demonstrative and possessive pronouns. (*b*) Formation of the gender and plural of nouns and adjectives, avoiding difficult exceptions. (*c*) Chief rules for the position of adjectives and for the agreement of nouns and adjectives. (*d*) Simple comparison of adjectives. (*e*) Cardinal and ordinal adjectives up to 100 (simply). (*f*) Chief uses of *de*, *à*, *dans*, *en*, and adverbs of quantity, *si* with *oui*, and *voilà*, *c'est* and *ce sont*, *monsieur*, *madame*, etc.

Code of Regulations for European Schools in Bengal, 1889-90.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I—B—*contd.*

II.—COURSE OF STUDIES FOR THE PRIMARY STANDARDS—*concld.*

SUBJECTS.	STANDARD I.	STANDARD II.	STANDARD III.	STANDARD IV.
		OPTIONAL SUBJECTS—*contd.*		
French—*contd.*				(*g*) Personal pronouns (used in the nominative only) and simple interrogative pronouns. (*h*) Conjugation of *avoir*, and *être* simply, interrogatively and negatively. (*i*) Simple exercises in the above grammar, French into English and English into French (vocabulary given). *N. B.*—The kind of exercises and their scope should be such as are found in Chardenal's First French Course, pages 1-55, exercises 1-114.
Drawing .	A graduated course in *Freehand* approved by the Inspector.			
Singing by note .	A course in *Tonic Sol-fa* approved by the Inspector.			
Drill . .	A course approved by the Inspector.			

Code of Regulations for European Schools in Bengal, 1889-90.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I—B—*contd.*

III.—COURSE OF STUDIES FOR THE MIDDLE STANDARDS.

SUBJECTS.	STANDARD V.	STANDARD VI.	STANDARD VII.
		COMPULSORY SUBJECTS.	
Reading . .	Approved reading books of suitable progressive difficulty.	Approved reading books of suitable progressive difficulty.	In this standard it will probably be unnecessary to use any books for reading in addition to the text-books required for the Middle Scholarship Examination.
Poetry . .	The practice of studying and committing to memory suitable poetry at least once a week must be provided for in the time-table.	The practice of studying and committing to memory suitable poetry at least once a week must be provided for in the time-table.	The study of the poetry prescribed for the Middle Scholarship Examination. A considerable portion of this, if not the whole, should be committed to memory.
Handwriting .	Both copy and exercise books to used. Proper formation of the letters to be still insisted upon and great attention to be paid to neatness.	Both copy and exercise books to be used. Good writers to be allowed to form a running hand. Great attention to be paid to neatness.	Legibility and neatness to be insisted upon. Copy books not to be used unless absolutely necessary.
Dictation . .	Passages from chapters in the readers previously studied.	Unseen passages to be frequently given for dictation in addition to those previously studied.	Should be occasionally practised if the class is found to be weak in spelling.
Composition .	Letter writing. The reproduction in the scholars' own words of a description or a story either read by themselves, or read or related to them by the teacher. The description of something which has shortly before been the subject of a lesson.	Letter writing. The reproduction in the scholars' own words of a description or story either read by themselves, or read or related to them by the teacher. The description of something which has shortly before been the subject of a lesson. The description of some scene or incident which has come within the range of their experience.	Letter writing. The reproduction in the scholars' own words of a description or a story either read by themselves, or read or related to them by the teacher. The description of something which has shortly before been the subject of a lesson. The description of some scene or incident which has come within the range of their experience. Paraphrasing and easy essay writing.
Spelling . .	This subject should be taught incidentally along with all the work of the class, and, if necessary, by special lessons for the purpose. The importance of *repeatedly writing* new words must not be overlooked.	This subject should be taught incidentally along with all the work of the class, and, if necessary, by special lessons for the purpose. The importance of *repeatedly writing* new words must not be overlooked.	This subject should be taught incidentally along with all the work of the class, and, if necessary, by special lessons for the purpose. The importance of *repeatedly writing* new words must not be overlooked.
Tables . .	The tables of weights and measures should be frequently revised.	The tables of weights and measures should be frequently revised.	The tables of weights and measures should be frequently revised.
Notation and Numeration.	Exercises should be occasionally given.	Exercises should be occasionally given.	Exercises should be occasionally given.
Arithmetic .	Regular practice in all the work of the previous standards, *particularly in the four simple rules.* Vulgar fractions; Decimal fractions; Easy Compound Proportion (on the Unitary method).	Regular practice in all the work of the previous standards. Practice; more difficult Compound Proportion; Square Root; Interest, Simple and Compound; Calculations connected with rectangular areas, and with the capacities of rectangular solids or rectangular spaces of three dimensions.	Regular practice in all the work of the previous standards. Percentages; Profit and Loss; Discount; Exchange; Stocks.

Code of Regulations for European Schools in Bengal, 1889-90.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I—B—*contd.*

III.—COURSE OF STUDIES FOR THE MIDDLE STANDARDS—*contd.*

SUBJECTS.	STANDARD V.	STANDARD VI.	STANDARD VII.
	COMPULSORY SUBJECTS—*contd.*		
Mental Arithmetic	Problems involving the application of the rules which have been studied.	Problems involving the application of the rules which have been studied.	Problems involving the application of the rules which have been studied.
Analysis and Grammar.	The analysis of more difficult forms of the simple sentence, and of easy compound and complex sentences, special attention being paid to the relation of the subordinate to the principal sentence. The parsing of an easy complex sentence.	More difficult analysis and parsing.	More difficult analysis and parsing. Prefixes and Affixes.
Geography	Revision of the work of previous standards. The general geography of Europe, Asia, Africa, America, Australia, and Oceania, as treated in those chapters of Longman's Junior School Geography, which treat of continents. Elementary ideas upon the cause of wind. The monsoons. Water, ice, steam, fog, mist, cloud, dew, rain, hail, snow.	Revision of the work in previous standards. The remaining countries of Europe and Asia as treated in Longman's Junior School Geography. Seasons, climate, phases of the moon, tides.	Revision of the work of all previous standards. A fuller knowledge of India, *viz.*, the physical features in detail; the political divisions with the more important sub-divisions; British territory, protected native states, independent states, foreign territories; aboriginal tribes and their distribution. The chief productions and where found: the chief manufactures and where carried on: the most important towns; distribution of the population; the means of communication; trade with foreign countries treated on broad lines.
History	From the earliest times to the accession of James I, defined in point of detail by the treatment of this period in "Gardiner's Outlines of English History," pages 1—194. NOTE.—The Teachers may in this and in the higher standards use any other suitable text-book. Gardiner's is only mentioned in order to define the extent in point of detail to which this subject should be studied. A similar remark applies to all text-books mentioned.	English History from the accession of James I to the accession of George III, similarly defined in extent by the treatment of this period in Gardiner's "Outlines," pages 195—326.	Revision from the accession of Henry VII. English History from the accession of George III to the present time, as defined in extent by the treatment of this period in Gardiner's "Outlines," page 326 to the end.
Needle work (*for girls only*).	To practise all work previously learnt. To learn to cut out and to make a child's chemise requiring gathering, stroking, and the making of button-holes. To practise marking the letters of the alphabet on coarse calico. To knit larger socks. *In this and in the higher standards the girls should be taught to mend their own clothes, and to darn their own stockings.*	To practise all work previously learnt. To learn pleating and frilling. To cut out and make a pinafore with a pleated frill at the bottom and a gathered frill at the neck. To knit a pair of stockings for a child of 10 or 12 years old. To mark ordinary articles of dress.	To practise all work previously learnt. To learn "whipping." To cut out and make a little frock with a whipped frill at the neck, and having two tucks at the bottom, with feather or coral stitch worked thereon. To knit a full-sized pair of stockings. To darn a long slit in cotton or linen.
Object Lessons.	To be given at least once a week. A list of the lessons given must be preserved for submission to the Inspector. Experiments and illustrations should be very freely introduced; and the teachers should distinctly understand that the object of the lessons is not so much to impart knowledge, as to encourage the scholars to observe for themselves, and to cultivate, as far as possible, their reasoning powers. In furthering this object, the teachers should refrain from telling more than is expedient, and, as far as possible, lead the scholars to discover for themselves As a guide to the teacher in selecting subjects for these lessons, the following may be mentioned as examples:— lessons connected with the Physical Geography studied by the class; lessons connected with one of the Science Courses; lessons connected with any industry carried on in the district. The teachers should give lessons which deal with portions of such subjects as physical science, physiology etc., in connected series, arranged in logical sequence.		

Code of Regulations for European Schools in Bengal, 1889 90.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I—B—*contd.*

III.—COURSE OF STUDIES FOR THE MIDDLE STANDARDS—*contd.*

SUBJECTS.	STANDARD V.	STANDARD VI.	STANDARD VII.
	OPTIONAL SUBJECTS.		
Algebra	Algebraical notation. Substitution of numerical values. Addition and subtraction. The use of brackets. Regular practice in removing brackets, and in placing expressions within brackets. Multiplication. To learn the following results:— $(a \pm b)^2 = a^2 \pm 2ab + b^2$. $(a+b)(a-b) = a^2 - b^2$. and to practise the application of this knowledge to similar expressions. Easy division. To learn the factors of $a^2 \pm 2ab + b^2$ and $a^2 - b^2$; and to practise the application of this knowledge to similar expressions. Practice in the expression of arithmetical operations by the use of algebraical symbols.	Revision of the work done in Standard V. More difficult division. Resolution into factors. Easy simple equations involving one unknown quantity, and easy problems therein. Highest common factor and least common multiple. Easy fractions.	Revision of the work done in Standards V and VI. Simultaneous equations of two unknown quantites, and easy problems therein. Square root.
Euclid	The study of Book I, Propositions 1 to 8, with the definitions, axioms and postulates required in doing so. Easy exercises on these propositions.	Revision of the work done in Standard V. Book I—Propositions 9—32 with the rest of the definitions, etc. Easy exercises on the above propositions.	Book I and exercises thereon.
Domestic Economy.	The study of "Domestic Economy and Household Science" by Robert James Mann, M. D., pages 1—64, *taught as far as possible by oral lessons.*	Revision of the work done in Standard V. The study of Dr. Mann's "Domestic Economy," pages 64—129, *taught as far as possible by oral lessons.*	Revision of the work done in Standards V and VI. The study of Dr. Mann's "Domestic Economy," pages 130—231, *taught as far as possible by oral lessons.*
Latin	(*a*) Revision of the work done in Standard IV. (*b*) Declension of ordinary irregular, defective and variable nouns and adjectives. (*c*) Rules for gender in detail. (*d*) Comparison of adjectives and adverbs. (*e*) Cardinal and ordinal numeral adjectives. (*f*) The regular verbs in the active and passive voices, the deponent verbs, the compounds of the verb *sum* with *possum*. (*g*) Principal parts of verbs in common use. (*h*) The syntax of the concords, and of the common uses of the nominative, vocative, accusative and dative cases. (*i*) Translation of simple sentences from Latin into English, and from English into Latin, bearing on the above grammar. The English (or the Latin, as the case may be) of all new words should be given.	(*a*) Revision of the work done in Standards IV and V. (*b*) The conjugation of the irregular verbs fero, eo, volo, fio, and their compounds. (*c*) A reading book of simple prose, such as Bennett's First Latin Reader or Epitome Historiæ Sacræ (about 15 pages of either.) (*d*) Translation of easy sentences from English into Latin, illustrating the rules of syntax met with in the prescribed portion of the text-book. The Latin of all new words in these exercises should be given.	(*a*) Revision of the work done in Standards IV, V and VI. (*b*) The remainder of the accidence not done in the previous standards. (*c*) The Middle School Examination text-book. (*d*) The remaining rules of syntax required for the study of the text-book, and illustrative exercises on these rules, not taken from the text-book. The Latin of the less obvious words should be given. Continuous prose should be avoided in setting these exercises. (*e*) Easy unseen passages.

Code of Regulations for European Schools in Bengal, 1889-90.

Code of Regulations for European Schools in Bengal, 1895.

SCHEDULE I—B—*contd.*

III.—COURSE OF STUDIES FOR THE MIDDLE STANDARDS—*contd.*

SUBJECTS.	STANDARD V.	STANDARD VI.	STANDARD VII.
		OPTIONAL SUBJECTS—*contd.*	
French	(*a*) Revision of work done in Standard IV. (*b*) Regular conjugation of verbs; also interrogatively and negatively; peculiarities demanded by pronunciation. (*c*) Plural and gender of commonly used nouns and adjectives. (*d*) Chief rules for gender (*e*) Chief uses of personal pronouns as direct and indirect objects. (*f*) The remainder of the pronouns. (*g*) Translation of simple sentences from English into French, illustrating the above grammar; less common words being given. (*h*) About 400 lines of a very easy French prose reader with questions on accidence and easy syntax.	(*a*) Revision of work done in Standards IV and V. (*b*) The conjugation of the chief irregular verbs. (*c*) About 800 lines of easy French prose. (*d*) Easy sentences illustrating such constructions as are met with in the reader.	(*a*) Revision of work done in Standards IV, V, and VI. (*b*) Middle School Examination text-book. (*c*) Rules of syntax met with in the text-book to be illustrated by similar exercises of English into French; easy continuous English prose into French; simple letter-writing and simple idioms.
Science	Science should be taught chiefly by oral lessons; experiments and illustrations being as freely used as possible. A text-book is of little value in the absence of such teaching. The text-books named below indicate the extent of the work, but others may be used in their stead. *Course A.—Lovvy's "Graduated Course of Natural Science," Part I.* Pages 1 to 44.	Revision of the work of Standard V, and pages 45 to 98.	Revision of the work of Standards V and VI, and pages 99 to the end.
	Course B.—Foster's "Primer of Physiology." Pages 1 to 50	Revision of the work of Standard V, and pages 51 to 103.	Revision of the work of Standards V and VI, and pages 103 to the end.
Drawing	*Freehand.*—The copying of more difficult figures should be practised, and greater attention should be paid to the finish (*lining in*) of the drawings—clean lines and an entire absence of "smudge" being insisted upon. *Perspective.*—At least sufficient instruction should be given in perspective to enable the scholars to understand the broad principles connected with the vanishing of receding parallel straight lines, and the foreshortening of circles in planes at an angle with the picture plane, to enable the scholars to draw with intelligence the outlines of simple geometrical solids and other easy objects from the actual objects themselves. If possible, a little geometrical perspective should be taught. *Model Drawing.*—Regular practice should be given in carefully graduated exercises, introducing at first easy rectilineal figures, such as a cube, or a parallelopiped; next, figures containing circular outlines such as a cylinder, or a cone; next, figures containing octagons, triangles, and more difficult rectilineal combinations; next, objects with irregular curves in their outlines, such as a water jug, a hat; and lastly, combinations of the foregoing.		
Singing by note	A course in *Tonic Sol-fa* approved by the Inspector.		
Drill	A course approved by the Inspector.

Standards of Examination for Pupil-teachers.

SCHEDULE III.

Training Colleges. Subjects of Examination.

SCHEDULE IV.

Form of Scholar's Register.

SCHEDULE V.

I.—FORM OF MEMORANDUM OF AGREEMENT.

(ARTICLE 490.)

MEMORANDUM OF AGREEMENT between[1] _____

_____

_____

hereinafter called *the Managers*, on behalf of the Managers of the _____ School, and[2] _____ hereinafter called *the Surety*, the[3] _____ of _____ hereinafter called the *pupil-teacher*.

The Managers, for themselves, their executors, administrators, and assigns agree with the Surety, h—[4] executors, administrators, and assigns as follows :—

1. The Managers agree to engage the pupil-teacher to serve under a certificated teacher during the usual school hours, in keeping and teaching the said school for not less than two hours and not more than four hours daily during the engagement. Sunday is expressly excluded from the engagement.

2. This engagement shall begin on the first day of[6] _____ 18 , and subject to the proviso in paragraph 5, shall end on the last day of[7] _____ 18 .[8]

3. The pupil-teacher shall be paid as wages[9] _____ per[10] _____ in the first year, and this sum shall be increased by _____ per[10] _____ in each subsequent year of the engagement ; but such increase may be stopped, at the discretion of the Managers of the said school for the time being, for the unexpired remainder of any year after receipt of notice from the Department that the pupil-teacher has failed to pass the examination or to fulfil the other conditions required of a pupil-teacher, according to the standard of the preceding year, as prescribed in the articles of the Code of the Department applicable to the case.

4. The Managers shall also pay to the pupil-teacher one-half of the amount received from the Department on his account under the provisions of article 53 of the said Code. This payment shall be over and above all payments made as wages under paragraph 3 of this agreement.

5. *Provided* always that if the pupil-teacher fails to pass an examination for any year as specified in paragraph 3 of this agreement, this engagement shall, on the application of the Managers and with the consent of the Department, end on the last day of _____ 18 .[11]

When this engagement is so extended the course of study and the wages of the pupil-teacher in the remainder of the year succeeding that in respect of which the pupil-teacher failed, shall be the same as in the last mentioned year, and that year shall not be reckoned in calculating any payment to be made under paragraph 7 of this agreement.

6. The pupil-teacher, while the school is not being held, shall receive without charge, from a duly qualified teacher, special instruction for at least one hour a day. Such special construction, and any instruction in secular subjects given to the pupil-teacher during school hours, shall be in the subjects in which the pupil-teacher is to be examined during this engagement pursuant to the said articles.

7. The pupil-teacher shall be liable to dismissal without notice for idleness, disobedience, or immoral conduct of a gross kind respectively ; and this engagement shall be terminable on either side by a written notice of six months, or in lieu of such notice by the payment on either side of a sum equal to half the wages payable under paragraph 3 to the pupil-teacher for the year in which the engagement is terminated ; such payment to be recoverable as a debt by the party entitled to receive it and to be over and above the settlement of all other accounts between the parties.

8. The pupil-teacher enters into this engagement freely and voluntarily on h—[12] own part and with the privity and consent of the Surety.

9.[13] The Surety agrees with the said Managers, their executors, administrators, and assigns to clothe, feed, lodge, and watch over the pupil-teacher during the continuance of this engagement in a manner befitting the same.

(Cancelled.)

SCHEDULE II.

I.—FORM OF MEMORANDUM OF AGREEMENT.

(ARTICLE 59c.)

MEMORANDUM OF AGREEMENT between[1] _____

_____

_____

hereinafter called *the managers*, on behalf of the managers of the _____ School,[2] _____ hereinafter called *the pupil-teacher*, and[3] _____ hereinafter called *the surety*, the[4] _____ of the pupil-teacher.

The managers, for themselves, their executors, administrators, and assigns, covenant with the pupil-teacher, and with the surety, h_____[5] executors, administrators, and assigns, and the pupil teacher and the surety for himself, h.s executors, administrators, and assigns, covenant with the managers, their executors, administrators, and assigns, as follows:—

1. The pupil-teacher is engaged to teach a class daily, except on holidays, for not less than two and not more than four hours, under the regular guidance and constant supervision of a competent teacher, approved for that purpose by the Inspector.

2. The pupil-teacher shall study for at least two hours daily, except on holidays, those subjects of secular instruction in which h_____[6] is to be examined during this engagement pursuant to Article 62 of the Code; such study to be personally directed and supervised by a competent teacher approved by the Inspector, who shall also give to the pupil-teacher, without charge, whatever instruction is necessary for the proper study of the said subjects.

3. The managers shall pay to the pupil-teacher as wages[7] _____ per[8] _____ in the first year, and this sum shall be increased by[7] _____ per[8] _____ in each subsequent year of the engagement; but if the pupil-teacher should fail to satisfy the conditions specified in Article 62 (*b*) (*c*) and (*d*) of the Code, the annual increment may be stopped for the year following such failure, at the discretion of the managers.

4. The wages paid to the pupil-teacher under paragraph 3 of this agreement shall be over and above any Government grant which may be received by the pupil-teacher under the provisions of Article 65 of the Code.

5. This engagement shall begin on the 1st of January 18__, and shall end on the 31st of December 18[9]__ ; provided always that if the pupil-teacher fails to satisfy the conditions required in Article 62 (*b*) (*c*) and (*d*) of the Code, and is permitted to continue working as a pupil-teacher under the terms of article 64, this engagement shall be extended one year each time such permission is granted. When this engagement is so extended, the year in which the failure which was the cause of the extension took place shall not be reckoned in calculating any payment to be made under paragraph 6 of this agreement.

6. The pupil-teacher shall be liable to dismissal without notice for idleness, for disobedience, or for immoral conduct of a gross kind; and this engagement shall be terminable on either side by a written notice of six months, or in lieu of such notice by the payment on either side of a sum equal to half the wages payable to the pupil-teacher under paragraph 3 for the year in which the engagement is terminated; such payment to be recoverable as a debt by the party entitled to receive it, and to be over and above the settlement of all other accounts between the parties.

7. The pupil-teacher enters into this engagement freely and voluntarily on h—[10] own part, and with the privity and consent of the surety.

8.[11] The surety agrees with the said managers, their executors, administrators and assigns to clothe, feed, lodge, and watch over the pupil-teacher during the continuance of this engagement in a manner befitting the same.

Signed[12] the _____ day of _____ 18_____.

APPENDIX.

FORM OF TRUST DEED.

Full names, addresses and descriptions of the Trustees or Managers of the school.

THIS INDENTURE made the day of 189 , between

hereinafter called the said Trustees, of the one part, and THE SECRETARY OF STATE FOR INDIA IN COUNCIL, hereinafter called the said Secretary of State, of the other part. WHEREAS the piece or parcel of land hereinafter described and expressed to be hereby assured is now vested in the said Trustees as Managers and Trustees of the

Name of school.

School, AND WHEREAS by the present Code of Regulations for European Schools issued by the Government of India it is *inter alia* declared under the head of "Building Grants" (Chapter VII, Articles 83 to 97) as follows:—

"Grants may be given to managers of schools other than those excluded under Article 7 in aid:—

(*a*) of erecting, enlarging, or furnishing school buildings;

(*b*) of executing extensive repairs;

(*c*) in special cases, of paying off debts incurred in erecting or enlarging school buildings;

"NOTE.—Expenditure in the purchase of buildings may be treated as expenditure in the erection of buildings.

(*d*) of acquiring land for school purposes.

Before a grant is sanctioned under the preceding articles, the Department must be satisfied:—

(*a*) that the European population of the locality is sufficiently large to render the existence of the school necessary, and to give a reasonable probability of its permanence;

(*b*) that the school is suited to the requirements of the locality;

(*c*) that the school is likely to be maintained in efficiency;

(*d*) that the school will be open to inspection;

NOTE.—In the case of a school not receiving a maintenance grant, the inspection shall be limited to ascertaining that the buildings are maintained in good repair, that the sanitary arrangements are satisfactory, and that the school is properly conducted.

(*e*) that the site, plans, estimates, and specifications are suited to the school, and the title to the property is clear.

"If any building towards the erection, purchase, or repair of which a grant has been made by the Government, is subsequently diverted to other than educational purposes, the Government shall have a prior lien upon the building for the recovery of the grant, and a provision to this effect shall invariably be made in the trust deed."

AND WHEREAS the said Trustees have applied to the said Secretary of State for a grant in aid of

Here state the purpose for which the money is required.

AND WHEREAS the Director of Public Instruction, Bengal, acting for and on behalf of the said Secretary of State, has satisfied himself that the site plans, estimates, and specifications of the said buildings are suited to the school, and that the title to the said land forming the site is in order, and has accordingly sanctioned a grant of Rs. to be paid to the said Trustees on their completing the said buildings to his satisfaction and in accordance with the plan and specifications aforesaid, in consideration of their executing in favour of the said Secretary of State such conveyance or assurance as in hereinafter contained, NOW THIS INDENTURE WITNESSETH that in pursuance of the said agreement in this behalf, and in consideration of the said grant-in-aid or sum of Rs. to be hereafter paid as aforesaid by the said Secretary of State to the said Trustees, they the said Trustees do, and each of them doth, hereby grant, convey, and assign unto the said Secretary of State, his successors and assigns, all that piece or parcel of land situate in the registration district of , sub-district of , and thannah of , containing by estimation an area of , and bounded on the north by , on the south by , on the east by , on the west by , together with all and singular the buildings and erections now being, or which may hereafter be thereon, expressly including the said buildings to be erected as aforesaid, and all rights, easements, and appurtenances whatsoever usually held or occupied herewith, or reputed to belong or be appurtenant thereto, and also all furniture, fixtures, fittings, maps, and other school apparatus, school-books, and chattels, for the time being in and belonging to, or used or to be used for the said school, and all the estate, right, title, interest, claim, and demand of the said Trustees into and upon the said hereditaments and premises, TO HAVE AND TO HOLD the said piece or parcel of land, hereditaments, chattels, and effects, and all other the premises expressed, to be hereby assured unto and to the use of the said Secretary of State, his successors in office, and assigns, according to the nature and tenure thereof respectively, upon the trusts nevertheless and to and for the intents and purposes following, that is to say upon trust to permit the same hereditaments and premises to be used as a school for the education of European children, the said school to be managed and conducted in all respects in accordance with the rules and regulations for the time being in force of the Education Department in Bengal, and to be always open at all times to the inspection of the Director of Public Instruction in Bengal for the time being, or of any officers of Government appointed for that purpose, and upon further trust in case the said Trustees or their successors in that office shall at any time fail to maintain and keep in good and substantial order and repair and condition the buildings to be erected in the said hereditaments and premises, to the end that the same may be always efficient for use for the purposes of the said school, or if the said school shall at any time cease to exist, or cease to be conducted in accordance with the foregoing rules, then and in any of such cases to forthwith make sale and absolutely

dispose of the said hereditaments and premises, and apply the proceeds of such sale, after payment thereout of all costs and expenses attending the same, in or towards recouping or reimbursing to the said Secretary of State, his successors, or assigns, the said grant-in-aid or sum of Rs. , and pay the surplus, if any, to the said Trustees parties hereto, or other the Trustees or Trustee for the time being of the said school. In witness whereof the said parties to these presents have hereunto set their respective hands and seals, the day and year first above written.

FROM

SIR ALFRED CROFT, K.C.I.E.,
President of the European Code Revision Committee,

TO

THE SECRETARY TO THE GOVERNMENT OF INDIA,
HOME DEPARTMENT.

Calcutta, the 17th January 1896.

SIR,

IN continuation of my letter dated the 30th September 1895, submitting the first portion of the report of the Committee appointed, under the Resolution in the Home Department, No. $\frac{1}{80-89}$, dated the 7th February 1895, to revise the Code of Regulations for European Schools in Bengal, I have the honour to submit the following further report on the subject of Training Colleges.

2. It is necessary at the outset to explain the circumstances which have led to this separation of the report into two parts. At the time when the Committee met in February 1895, the revision of the chapter of the Code relating to Training Colleges had not been suggested by any Local Government. It had, in fact, been a dead letter from the beginning; and when, in the course of their deliberations, the Committee reached the consideration of this chapter, the reasons for its failure were clearly recognised. It was not merely that the actual provisions of the chapter were believed to be inadequate, and inapplicable to the conditions of European education in India, though this also was fully recognised by the Committee. A cause more deep-seated, and more difficult of cure, lay in the admitted necessity of a denominational training for those who were to become teachers. Practically all European schools in India are maintained by different denominational bodies; and these bodies will not accept teachers trained in an institution in which the religious instruction is either different from that which they profess, or is altogether wanting. On the other hand, the annual demand for teachers is far too small to make it possible for each denomination, or even each of the leading groups of denominations, to set up a Training College of its own. This difficulty appeared to be both permanent and insurmountable. When, therefore, we came to the consideration of the chapter, it was actually proposed by one member (Proceedings, XII-3) that the chapter should be omitted from the Code, on the ground that as it stood it was unsuitable, while no possible revision of it was ever likely, on account of the denominational difficulty, to result in a workable scheme.

3. At the same time the crying need of some means of improving the quality of the teachers in European schools was admitted and deplored. I would invite special attention to the statement laid before the Committee by

the Ven'ble Archdeacon Brook Deedes, which is printed in the Proceedings of the Meeting of the 5th March (XII-2), and which insists, among other things, on the necessity of supplying aided schools with more efficient teachers. This was followed up by a Resolution (XII-3) expressing the urgent need that existed for the establishment of a Training College, and the necessity, arising from the denominational difficulty, of its being established and maintained by Government on an undenominational basis, acceptable to all classes of the European community.

4. It was at this stage that the Committee hit upon the device which, they believed, would afford the only possible means of surmounting the difficulty in question. It was that of separating the Training College and practising school from the boarding establishments; keeping the former undenominational, and allowing the latter to be set up and maintained, with due provision for the religious and moral instruction of the resident students, by such of the different denominations as wished to take advantage of the establishment of the Training College. The Training College might either be established by private effort, and aided under the revised rules, or (as the Committee thought the only practicable course in present circumstances) it might be established as a Government institution. In either case, the hostels should be under private management, and should, if approved by the Department, be eligible for Government grants (XII-4).

5. Though this appeared to the Committee to promise a successful and felicitous solution of the difficulty, and encouraged them to proceed with the revision of the chapter relating to Training Colleges, they were now met by a difficulty of another kind. As before intimated, none of the Committee had come prepared with proposals for the revision of this chapter, and the time at their disposal was rapidly drawing to a close. By previous agreement it had been decided, owing to other engagements, that the Committee should, if possible, finish their sittings on the 9th March. Mr. Haden Cope, who had had much experience as Principal of the Lahore Training College, undertook (XIII-1) to draw up, for the consideration of the Committee, articles to be embodied in the Code. This was on the 6th March; the articles were drafted and printed on the following day; and on the 8th March (XV-2) they came up for discussion and, with certain modifications, were adopted. These articles will be found at the close of this letter (Appendix A) under the heading "Chapter VI—Training Colleges." The articles are explained in Appendix B, under the heading "Training Colleges," in a series of paragraphs which would have formed part of the original report, had it not been for the new questions which afterwards arose, and which I now go on to explain.

6. From what has preceded, it will be clear that the time and attention which the Committee were able to devote to the important subject of Training Colleges was very far short of that which they had given to the other portions of the Code. In fact, it will be seen from the Proceedings of the 8th March (XV-2), when the revised articles relating to Training Colleges were being considered, that Mr. Bamford raised a preliminary objection to the adoption of the scheme of studies therein proposed, mainly on the ground that the Committee had not anticipated the revision of the rules on that subject, and were therefore not in a position to arrive at a mature judgment on so important a matter. When I returned to Calcutta from Darjeeling in July, by which

time the revised Code and report were nearly ready for circulation to the members of the Committee, I had several conversations with Mr. Bamford on the whole question of the provisions relating to Training Colleges in the Code. The result was that I found myself in entire agreement with him in considering the provisions of the revised Code on that subject to be open to grave objection, partly on the ground of expense both to the management and to the students, but chiefly as failing in that which the Committee regarded as the most essential point, namely, the efficient training of the students in the practical side of their work. As to the first point, the original proposals contemplated the establishment of a Training College, with a separate building fully equipped, and a complete staff of Professors, in addition to a practising school. According to the alternative scheme which Mr. Bamford and I had now worked out, nothing would be required beyond a practising school, with one or at the most two special teachers in addition to the ordinary school staff. The consequent reduction of expenditure seemed to us to make the future establishment of a Training College on these simple lines more easy and more probable. As regards the second point, the course of studies laid down by the Committee appeared to us likely, from its extent, to interfere unduly with the real object of the College as accepted by the Committee and defined in the revised Code (Article 72), namely, "to teach the students how to teach". The chief portion of their time, we considered, ought to be devoted to practical training in the art of teaching and school management; while the long list of new subjects prescribed in the revised Code threatened seriously to curtail the time that could be given to these essential matters.

7. Actuated by these considerations, I took upon myself the responsibility, when circulating the draft report on the whole Code for the approval of the Committee, to ask them to withhold their comments on the chapter relating to Training Colleges, inasmuch as revised proposals were about to be placed before them for consideration. Accordingly, on the 24th August, I circulated to the Committee a paper (Appendix C) embodying the new proposals which Mr. Bamford and I had framed. In paragraph 1 of that paper we explain why we have thought it necessary to invite further consideration of the case. In paragraph 2 a caution is based on what is believed to be a serious defect in the system of Training Schools in the United Kingdom, namely, the excessive attention which they pay to the study of fresh subjects, and the comparative indifference with which the practical acquisition of the art of teaching is regarded. Mr. Bamford, who was for some years on the staff of an English Training College, is able to speak with authority on this point.

In paragraphs 3 to 6 we give an outline of our own proposals. Their main features are first, that three-fourths of each student's day should be spent either in the school-room or on subjects directly connected with the work of the school-room, while one-fourth and no more is to be devoted to increasing his own store of substantive knowledge or to familiarising him with subjects that he has already learnt or practised; secondly, that the course should be reduced from two years, as originally proposed by the Committee, to six months; and thirdly, that for carrying out these proposals, no separate Training College is required, all that is necessary being a well staffed practising school, such as the alternative scheme equally demands, with one or two additional rooms and

teachers for the instruction of students outside the class-rooms, together with a good library and other necessary appliances.

The advantages that we consider likely to follow from the adoption of our proposals are stated in paragraph 7. They are briefly that the scheme proposed would involve less expenditure both to the founders of the college and to the pupils, and would therefore be more likely to come into practical operation; and further that the great attention to be paid to practice in the art of teaching would render the students more efficient as teachers.

In paragraph 8 are set forth the changes that would be necessary in the articles of the revised Code relating to Training Colleges if the plan was adopted. The complete chapter embodying these changes is given in Appendix D.

8. Our revised proposals met with by no means full acceptance. It is true that the four members from Bengal were unanimous in preferring them to the scheme originally adopted by the Committee. Mr. Carter wrote briefly on the 28th August, just before his departure from India on six months' leave, expressing his "entire approval" of the revised scheme. The Revd. Brother Fabian wrote at greater length to the same effect on the 5th December. But the Ven'ble Archdeacon Brook Deedes, Mr. Boutflower, and Mr. Haden Cope have, in their notes dated respectively the 25th September, the 14th October, and the 19th November, expressed decided objections to the revised proposals and their strong preference for the Committee's original scheme. These notes with Brother Fabian's are printed at length in Appendix E.

9. I proceed to give a brief account of these opinions, adverse and other. The Ven'ble Archdeacon Deedes "cannot persuade" himself "that a six months' course will be sufficient to form capable and efficient teachers out of such material as is available in India: or that such students as will enter the College will be capable of learning how to teach without at the same time receiving much additional instruction in the subjects, the elements of which they will have to impart to others. The average boy or girl who has read up to the VIIIth Standard or has passed the University Entrance Examination, and who, desiring to take up teaching as a profession, would seek to enter the Training College, is, as a rule, a quite *uneducated* person, with a range of reading limited strictly to the books in which he has been examined, with no general information and no taste for independent study. He has still to be taught to think and to reason. To give to such a person merely a course of instruction in the art of teaching (with at the most 1½ hours a day for independent study) would be in my opinion labour lost. He will never make an efficient teacher until he has acquired a far more substantial education."

He considers that it is necessary to have in the proposed Training College "a continuation school of the best kind, aiming not so much at imparting a certain amount of information as at the general culture of the mind and the formation of habits of study, observation and reasoning."

Mr. Boutflower agrees with the Archdeacon in thinking that the proposed college should also be a "continuation school," namely, "a school of a higher grade than any now in existence." He bases his opinion not only on the inadequacy of the High School standard in itself, but also and chiefly on the inferiority of the schools in the North-Western Provinces, their "very meagre

and defective equipment," and the absence, owing to various causes, of any prospect of improvement. The original proposals of the Committee appeared to him to be particularly valuable, because the need for such a school was met by the advanced course of instruction which the Training College was to give. A further objection—which, as Mr. Boutflower points out, is common to both schemes—is the absence of any provision for instruction in psychology. "Yet surely," he urges, "it must be admitted that one whose duty it will be to develope the intellect and to train the will ought to know something of the laws by which the mind and the will act."

Mr. Haden Cope considers it a mistake to suppose that the Training College was intended to be a continuation school merely, since the Committee's scheme contemplated much attention being paid to the science and art of teaching, and was not open to the charge of neglecting that important subject. He also considers that in giving the students under training so much practice with the school classes, we virtually hand over the work of the school to prentice hands, and that their gain would be the children's loss. A practising school so constituted and taught would not, he thinks, be popular with parents, and could therefore not make sure of filling its classes to the extent desirable in a practising school. He also objects to the classes being handed over to a fresh set of teachers every six months, in the middle of the year's work. Lastly, he agrees with Mr. Boutflower in condemning the absence of provision for the teaching of psychology.

The Revd. Brother Fabian supports the revised proposals on the grounds (1) that the Committee's original scheme, with its multiplicity of subjects to be studied, leaves no room for the practical training of a teacher; (2) that by reason of its simplicity and its smaller cost, the revised scheme is much more likely to become a reality; (3) that it also meets the new requirements of the Code regarding the grant of Proficiency Certificates to teachers who exhibit practical skill and ability in their work; and (4) that the shortness of the course will prove an attraction to large numbers of teachers. Brother Fabian does not think it proved, considering the present character of the High School Examination, which must be passed before admission to the College, that anything like a continuation school is necessary. He also sees a real danger in the original proposals of the Committee, namely, that the two years' course would hold out inducements to many, who had not the least intention of becoming teachers, to join the Training College with the object of securing an advanced education at a nominal cost. What is now required, he thinks, is "something simple in its organisation, inexpensive, and immediate in its remedial effects;" and the simpler the original plan, the easier it will be to extend or modify it hereafter.

As before stated, Mr. R. Carter expresses his entire approval of the revised proposals.

10. At this stage, and without further comment, the question in dispute might very well be left for the decision of the Government of India. It is, however, necessary to state that after careful consideration of the adverse criticisms, I have arrived at the conclusion (and herein Mr. Bamford agrees with me) that on one important point we can safely meet them. We propose to extend the course from six months to ten, and to make it concurrent with the

school year, less vacations. This extension of the course will render it possible to make a substantial increase in the time to be devoted by the students each to his own separate studies ; and we think that the direction which these studies should take should be determined by reference to his strong as well as to his weak points, further study in both directions being insisted on or encouraged. We also think it desirable to introduce a new provision, namely, to authorise a certain number of actual teachers (so far as the accommodation of the college will permit) to join the college for any term from two to six months at any part of the year as "gallery spectators" merely ; taking no part in the instruction of the classes, but listening to the lessons given in the class-rooms whether by the regular staff or by pupils under training, and to the criticism and other lectures given by the staff to the pupils of the Training College outside the class-rooms. They may also prepare, in their own hours of study, notes of lessons to be criticised by the masters along with those of the regular pupils. This additional provision seems to us to promise the following advantages. Many teachers are not able, nor do they need, to leave their schools for a whole year, while it may be well within their power to make temporary arrangements for their absence for a few months. Coming to the college with the actual experience that they have gained in their own schools, they will be in a position to profit by the lessons that they witness and receive, at whatever part of the training school course such lessons may begin; they will unlearn bad or imperfect methods and acquire those which it is the business of the Training College to impart. Thus they will be in a far better position to compete for the "Proficiency Certificate," which is to be awarded (Revised Code, Chapter V, Section IV) to those recognised teachers who can satisfy the Inspector as to their practical skill and ability as teachers. It is needless to add that we hope to see a large number of teachers qualifying for this certificate, and that we attach great value to any means by which its acquisition can be facilitated.

11. I hesitate to criticise the other objections that have been raised to our revised proposals by the three members who have found themselves unable to accept them, since any such criticism would be open to the objection that the circumstances in which this letter is written preclude the possibility of any rejoinder being made. Subject to that reservation, I may perhaps be permitted to submit the following remarks :—

(1) Mr. Haden Cope thinks that a school which is so largely taught by pupils under training would be neither popular nor successful. I can only say that this view is not confirmed by our experience in Bengal, where the model schools attached to vernacular training schools are among the most successful and well-attended in the Province. The objection seems, moreover, to be applicable to any scheme whatever in which a practising school is attached to a Training College.

(2) Mr. Boutflower and Mr. Haden Cope deplore the absence from the revised proposals—the former indeed considers that it finds no place even in the original scheme—of any provision for definite instruction in psychology. Considering the age at which pupils pass the High School Examination, and the standard of education which they have reached, I venture to think that formal in-

struction in psychology, understood as the science of the intellect the emotions and the will, would be quite out of place in the Training College course. In the first place it is too abstract, and in the second, its fundamental principles are too unsettled to form the subject of categorical instruction. There are, however, certain applications of the science of psychology, and I may add of the science of ethics also, a knowledge of which is not only essential to every teacher, but forms a necessary part of any scheme of training school instruction. They are briefly, the laws of the development of the intellect, and the laws of the formation of character; and when we speak of school method, we necessarily include the practical applications of both these. Among the former, the chief are the law of association and the law of attention. Though possibly he may not know them by these names, every capable teacher works on these principles, and knows how essential they are to the acquisition of knowledge and the cultivation of the memory. The scope of the latter, the formation of character, is conterminous with discipline in its highest and widest sense. It is not only well understood, but is a commonplace of every Code, that schoolmasters are to lose no opportunity of teaching their pupils, by example as well as by precept, the value of truth, diligence, respect to superiors, gratitude, kindness to inferiors, habits of discipline, and other points of morality, without which education is imperfect and may be positively injurious. To these may be added the necessity of patience, good temper and firmness in the teacher. Now while it may be granted that the head of a Training College may be expected to know something more of psychology and ethics than is involved in a practical acquaintance with the rules and methods based on the foregoing principles, intellectual or moral, yet I venture with diffidence to say that the important point for teachers is to know and be able to practise good methods of instruction and discipline; the appreciation of which, and the recognition of their value, depend not so much on a knowledge of the formal sciences involved, as on the common-sense and conscience of those who have been subject to discipline at school, and who are now in their turn to become teachers. But neither with a six months' course, nor certainly with the extended course now proposed, would it be possible altogether to ignore the psychological basis of the teacher's methods. I propose, however, in order to meet any reasonable objection on this ground, to amend Article 70 (*c*) of our revised proposals (Appendix D) as follows:—

"(*c*) That the college is staffed with a sufficient number of good teachers, fully competent to conduct the work of the school, to train and teach the students in the manner explained in Article 74, and to give such instruction as may be necessary in the principles underlying sound methods of teaching."

12. Such a Training College as the revised proposals contemplate might be either a Government, or an aided and denominational institution, since the religious difficulty would not arise in either case. The articles framed in accordance with these proposals have been drawn up, as the original articles were, on the supposition that it would be an aided institution. It is believed that, given a simple and inexpensive scheme for Training Colleges, the admitted need for improvement in the class of teachers will surely lead to the establishment of an institution of the kind. Even if persons qualified to undertake the management of a Training College are not now to be found in India, they could be readily appointed; and thus the opening of a Training College on the proposed lines, with the liberal aid from Government provided by the rules, would not present an insuperable difficulty. It was not thought possible to work the original scheme except on the condition of a single college for the whole of Northern India, so as to provide a sufficient number of pupils to justify its maintenance. The revised scheme might, it is believed, be successfully worked with only such a number of pupils as each Province might be able to supply; and the staff of the college might be expanded or contracted according to its needs. Thus, also, the difficulties arising from inter-provincial control, both executive and financial, would be obviated.

13. In Article 79 of our revised proposals (Appendix D) we have modified the condition under which the Government grant to a Training College may be given up to a maximum of 75 per cent. In the original proposals of the Committee (Appendix A, Article 82) the grant was made subject to a limit of Rs. 1,500 a month. We consider that a more reasonable condition to impose would be that which we propose to introduce, namely, "provided that the Department is satisfied that the college has been conducted with due regard to economy."

14. In Appendix F are specified the further changes in the articles for Training Colleges, which are rendered necessary by the proposals contained in the foregoing paragraphs.

I have the honour to be,

SIR,

Your most obedient Servant,

A. CROFT,

President of the Code Revision Committee.

Appendix A.

CHAPTER VI.—TRAINING COLLEGES.

(As originally adopted by the Committee).

CODE OF REGULATIONS

FOR

EUROPEAN SCHOOLS IN BENGAL, 1889-90.

CHAPTER IV.

TRAINING COLLEGES.

SECTION I.—*Preliminary.*

74. A training college includes—

(a) a college for boarding, lodging, and instructing candidates for the office of teacher.

(b) a practising school, in which such candidates may learn their profession.

75. No grant shall be made to a training college unless the Department is satisfied with the premises, management, and staff.

CODE OF REGULATIONS

FOR

EUROPEAN SCHOOLS IN BENGAL, 1895.

CHAPTER VI.

TRAINING COLLEGES.

SECTION I.—*Preliminary.*

69. A training college includes :—

(a) a college in which theoretical instruction is imparted in the art of teaching and in other subjects necessary to a teacher ;

(b) a practising school, receiving aid under Chapter II of this Code, in which such instruction is practically applied.

70. No grant will be given to a training college until the Department is satisfied on the following points :—

(1) That the practising school is thoroughly efficient: namely, that it is well equipped with all necessary school appliances, furniture, and apparatus, such as maps, diagrams, pictorial sheets, apparatus for teaching object-lessons, arithmetic, geography, and all the subjects usually taught in schools: that it is likely to be maintained in a state of efficiency: that it is well and fully staffed with experienced teachers, capable not only of teaching classes on modern methods, but also of supervising and correcting the work of training college students: that it teaches up to the high standard examination : that it contains in each of its classes a sufficient number of pupils for practising purposes: and that it is in every way fit to be a practising school.

(2) That a suitable and well-arranged building, sufficiently near to the practising school, is provided for the college; and that it is fully equipped with modern furniture, school appliances, and a good educational library.

(3) That the college has a thoroughly efficient teaching staff, able to give model lessons in all the subjects usually taught in schools, and to supervise the work of the students in the practising school; and that at least one member of the staff is competent to give instruction in the principles underlying modern methods of education.

Code of Regulations for European Schools in Bengal, 1889-90.

76. The grant to a practising school shall be made under the conditions specified in Chapter II.

SECTION II.—*Admission to Training Colleges.*

77. Candidates for admission to a training college are selected by the authorities of each college on their own responsibility, and are admissible to the college, provided that they produce satisfactory certificates of moral character.

78. No grant will be payable to a training college on account of any student who on admission does not satisfy the following conditions :—

(*a*) That he is at least 17 years of age.

(*b*) That the state of his health is satisfactory, and that he is free from any infirmity or bodily defect likely to interfere with the profession of a teacher.

(*c*) That he signs a declaration signifying *bonâ fide* intention to follow the profession of teacher.

(*d*) That he has passed the final examination for high schools specified in Schedule I, or for pupil-teachers in Schedule II.

Code of Regulations for European Schools in Bengal, 1895.

(4) That the college is provided with a proper laboratory, and with the fittings and apparatus necessary for teaching Physics to a standard somewhat higher than that prescribed for the high school course, and also for teaching Elementary Chemistry.

(5) That proper arrangements are made for the teaching of drill, music, and singing.

(6) That the scheme of studies is that laid down in Section III of this chapter, or such other as the Department may approve.

(7) That approved arrangements are made for the boarding and the home supervision of students, in hostels or otherwise.

[*See Articles 33 (e) and 69 (b).*]

SECTION II.—*Admission to Training Colleges.*

71. A candidate for admission to a training college must produce a satisfactory certificate of moral character, and must also satisfy the following conditions :—

(*a*) That he is at least 18 years of age.

(*b*) That the state of his health is satisfactory, and that he is free from any infirmity or bodily defect likely to interfere with the profession of a teacher.

(*c*) That he has passed the high school examination (see Chapter VIII) or is considered by the Inspector to be educated up to that standard.

SECTION III.—*Course of Studies.*

72. The special object of a training college is to teach the students how to teach. Consequently, throughout the course of studies it must be steadily kept in view that the students are to be trained in the practical methods of teaching, and, in order that this may be successfully done, in the principles of that science on which the art of teaching is based. The method of instruction must in no way be made to approximate to that of an Arts college, in which the object in view is entirely different. Students of a training college will be expected to have, on entering the college, a general knowledge of the subjects which they will have to teach as school-masters, and these subjects will merely be revised, and the students' knowledge of them, where necessary, brought up to date.

73. Every student will be required to devote a certain prescribed time to :—

(*a*) listening to teachers in the practising school, and observing and noting their methods;

Code of Regulations for European Schools in Bengal, 1889-90.

Code of Regulations for European Schools in Bengal, 1895.

(*b*) teaching in the practising school, from previously prepared notes, under the supervision of one of the teachers;

NOTE.—A report on each student's work will be submitted by the supervising teacher to the Principal of the college.

(*c*) teaching a prescribed number of lessons before the staff and students of the college, who will, on the conclusion of each lesson, criticise it, the Principal afterwards summing up his opinion of it.

74. The course of studies will occupy two years. The scheme of studies will be as follows, details of what is required in each subject being indicated in the notes appended to this article:—

(*a*) The Science and Art of Teaching, under which head are included all departments of school management.

(*b*) English—A special course of reading in English Literature selected by the Inspector; reading; composition; analysis and grammar; some knowledge of the origin and growth of the language, and of its etymology.

(*c*) Arithmetic—The whole.

(*d*) Geography—Physical, commercial, and general or political.

(*e*) History—A selected period of modern English History.

(*f*) Algebra—To the end of quadratic equations, special attention being given to problems.

(*g*) Euclid—The first four books, special attention being given to riders and to alternative methods of proof, and to the conditions under which algebraical proof is admissible.

(*h*) Physical Science—The study to be continued in the direction of the standard required by an Indian University for its First Arts or Intermediate examination.

(*i*) A Second Language, if thought desirable.

(*j*) Political Economy or Logic, as may be thought desirable in consultation with the Inspector, who shall finally decide the point.

(*k*) Domestic Economy—For women students.

(*l*) The Kindergarten System—For women students.

(*m*) Elementary Physiology, if thought desirable and practicable.

NOTE (1).—*Science and Art of Teaching.*—A book on this subject, approved by the Department, must be studied, but it is on no account to be merely got up as a subject of examination. The chief aim of the combined course of study and training is to give the students an adequate knowledge of the principles governing sound and scientific school methods, and the power to apply these principles to their future work as teachers; and at the same time to enable them to handle and control a class, and to acquire a good manner in teaching, a suitable demeanour, and the use of correct language.

Code of Regulations for European Schools in Bengal, 1889-90.

Code of Regulations for European Schools in Bengal, 1895.

NOTE (3).—*English.*—The prescribed course should be used, not merely as a study in literature, but also for practice in reading with correct pronunciation, modulation, emphasis and the like. Constant practice in grammar, analysis and paraphrasing is essential.

NOTE (3).—*Arithmetic.*—Students are expected to be proficient in arithmetic when they join the college; and the teaching will take the form of revision and practice, with a view to ascertaining that the students employ correct methods of working. They will also be practised in explaining the reasons of the processes employed.

NOTE (4).—*Geography.*—Revision, map-drawing both on paper and on the black-board, and the supplementing of the student's knowledge where necessary. The intimate connexion of geography with history should be insisted on, and much attention paid to commercial geography.

NOTE (5).—*History.*—A general knowledge of English and Indian History is pre-supposed. In studying the selected period, attention should be drawn to such portions as are specially likely to be interesting and attractive to children.

NOTE (6).—*Algebra.*—Revision, special attention being given to methods of working, and to neatness, accuracy, and completeness, in setting out the work.

NOTE (7).—*Euclid.*—Revision, with thorough practice in easy riders. Special attention to be paid to neatness, accuracy, and the setting out of the work.

NOTE (8).—*Physical Science.*—The subject must be taught mainly by experiment, and the students must be accustomed to handle the apparatus adroitly and to perform all experiments themselves.

NOTE (9).—*Domestic Economy.*—This must include the practical application of the instruction given, wherever such is possible.

NOTE (10).—*Kindergarten System.*—This must not be attempted unless there is in the college or school a teacher who thoroughly understands both the system and the principles on which it is based, and unless the college or school possesses everything necessary for illustrating its methods, and for teaching it in a thoroughly satisfactory and practical manner.

NOTE (11).—*Elementary Physiology*—Must be taught largely by reference to good models and diagrams, with plenty of suitable illustrations.

NOTE (12).—*General.*—Every lesson delivered in a training college or practising school should be given in such a way as to serve as a model for imitation by the students. That is to say, every teacher should on all occasions be most careful to observe the principles and to follow the methods which are inculcated in the lectures on the Science and Art of Teaching.

Every teacher in a training college should be careful to instruct the students in the best methods of teaching those subjects for which he is responsible.

SECTION III.—*Examinations.*

79. Every student admitted to a training college under the conditions specified in Article 78, who has been in residence for eight months of the year, and who has spent in that year at least 75 hours under proper supervision in the practising school, shall be presented at the close of the year for examination by the standards fixed for first and second year students respectively in Schedule III.

80. The yearly examinations will be conducted by the Department. After each examination the names of the successful candidates will be arranged in two divisions—the first in order of merit, the second in alphabetical order.

81. The place taken by each student in the examination will be recorded on the certificates granted by the Department under Articles 82—85.

82. Any student who has been admitted to a training college after completing his engagement as a pupil-teacher, and who has passed the first year's examination of the college, shall be entitled to receive a permanent third-grade certificate.

SECTION IV.—*Examinations.*

(Articles 79 to 85 of the old Code are cancelled.)

Code of Regulations for European Schools in Bengal, 1889-90.

After passing the second year's examination of the college, he shall receive a provisional second-grade certificate.

83. Any student of a training college who, without having completed an engagement as a pupil-teacher, has passed the first year's examination of the college, shall be entitled to receive a provisional third-grade certificate. After passing the second year's examination of the college, he shall receive a permanent third-grade certificate.

84. After two years' service with credit, the provisional certificates granted under Articles 82 and 83 shall be made permanent; and the permanent third-grade certificates granted under the same Articles shall be exchanged for provisional certificates of the second grade.

85. Any holder of a provisional second-grade certificate under the preceding Article shall, after two years' service with credit under that certificate, receive a permanent certificate of the second-grade.

Code of Regulations for European Schools in Bengal, 1895.

75. Examinations will be held in the college from time to time by the Principal and his staff, and at the end of each student's course by the Inspector, with particular reference to clause (*c*) below. The object and scope of all these examinations will be to see that the students possess :—

(*a*) an adequate knowledge of the subjects ordinarily taught in schools;

(*b*) an adequate knowledge of the best methods of teaching those subjects;

(*c*) the power to apply this knowledge in practice.

NOTE.—The Inspector will test each student's knowledge of methods, and his skill in using them, by the tests prescribed with that object for candidates for the proficiency certificate in Article 68 (*b*) and (*c*). The details of the other examinations and the College time-table are to be settled, when occasion arises, in consultation with the Department.

76. At the termination of his college course each student shall receive from the Department a letter certifying that he has received the complete training college course of instruction in the science and art of teaching; and if the student has satisfied the Inspector in either or both of the tests prescribed in Article 68 (*b*) and (*c*), this fact also shall be stated in the letter.

SECTION V.—*Hostels and Boarding Arrangements.*

77. All students under training must reside in approved hostels or boarding houses, unless specially exempted by the Inspector on the recommendation of the Principal.

78. No hostel will be approved unless the following conditions are satisfied :—

(*a*) That the building is healthy, and sufficiently commodious to allow of quiet, uninterrupted home-work.

(*b*) That the rules of the hostel, and the arrangements for the general supervision of the students, including their moral training, comfort, and recreation, are approved by the Department.

NOTE.—It is very desirable that every hostel or boarding house should have a reading and recreation room, properly supplied with papers and magazines, especially periodicals bearing on educational subjects.

Code of Regulations for European Schools in Bengal, 1889-90.

SECTION IV.—*Grants.*

86. The managers of a training college shall be entitled to a grant of Rs. 750 for each student passing the annual examination in the first division, and of Rs. 500 for each student passing in the second division.

87. On the recommendation of the Inspector, a grant not exceeding Rs. 100 may be made on account of a student who fails to pass the annual examination; but this grant will not be made more than once for the same student.

88. The managers shall receive monthly a provisional grant of Rs. 35 for each student on the rolls during that month.

89. After the annual examination, the managers shall receive the amounts payable under Articles 86 and 87, less the amounts actually paid under Article 88. If the amounts paid under Article 89 exceed the amounts payable under Articles 86 and 87, the excess shall be deducted from the first, or (at the discretion of the Department) any subsequent grants payable in the following year under Article 88, or be otherwise refunded to the Department.

90. The amount specified under Article 86 will not be payable on account of any student who has resided for less than eight months during the year. Exceptions to this rule may, at the discretion of the Department, be made in special cases, provided that no grant will be payable for any student who has resided for less than six months, or who has spent less than 75 hours under proper supervision in the practising school. In the case of students so excepted, a reduction not exceeding Rs. 200 will be made in the amount of the grant.

Code of Regulations for European Schools in Bengal, 1895.

79. When the above conditions are complied with, grants may be given to hostels or boarding houses, at such a rate for each boarder in residence as may be fixed for each school, with reference to its locality, and to other material conditions affecting its necessary expenditure; provided that such rate does not amount to more than 75 per cent. of the cost of each boarder.

80. Special grants may be given to hostels or boarding houses towards the provision of necessary furniture or fittings, under the general conditions of Chapter VII of this Code.

81. Government may, in special cases, pay both the tuition and the boarding fees of students who have been educated in orphanages or schools admitting free scholars, and who show a special aptitude for teaching and are likely to adopt it as a profession.

SECTION VI.—*Grants.*

82. The managers of a training college shall be entitled to receive a monthly grant equal to 75 per cent. of the average monthly expenditure on the college in the preceding year, subject to a maximum of Rs. 1,500 a month.

Appendix B.

TRAINING COLLEGES.

Extract from the Draft Report on the Articles originally adopted by the Committee.

1. Training Colleges. Their necessity.—The Government of India explicitly stated in December 1887, in a letter to all Local Governments on the subject of discipline and moral training, that "no money is better spent than that allotted to the support of efficient training schools and colleges for teachers," and that "in the truest interests of education, the cost of providing thoroughly good training schools and colleges for teachers of English as well as of Vernacular schools should be regarded as a first charge in the educational grant." These orders were repeated in a more emphatic form in a Resolution of the 17th August 1889.

Though the Resolutions just quoted had reference primarily to Native education, yet the need of training colleges for European teachers is admitted to be equally clear. A good deal has been done in providing normal schools for Native teachers, but nothing has yet been done for the training of Europeans, although every one closely connected with the education of Europeans in India is aware that one great and continual hindrance to improvement is the difficulty of getting good teachers for the European schools. Since there is no training college for European teachers, the only way in which such teachers can learn their work is by getting appointed to the charge of a class, and then improving as best they can by the example of others and their own experience, and profiting by whatever help they can get. Teachers worthy of imitation, however, are rare in India; and it is seldom that fellow-teachers are capable of giving sound advice to a beginner, so that bad habits are generally acquired, and little if any satisfactory progress is made.

In the discussion by the Committee on the great necessity for action in this direction, it was observed by one of our number that "one of the worst defects in aided schools was the incompetence of the junior teachers. So small were the salaries offered, that persons of mediocre intellectual capacity had to be employed, without the requisite training for their work. At the best they made the children learn their lessons well enough to answer direct questions from the text-book, and they enforced discipline. They could not teach thoroughly, or stimulate a child's faculties, or use its natural curiosity as a leverage; in fact, more often than not, they repressed the latter. Thus the education given in Indian aided schools was inferior to that given in English board schools; but while the latter was free, the Anglo-Indian parent had often to make great sacrifices to obtain the former for his children."

The unanimous opinion of the Committee was expressed in the following resolution:—

> *That this Committee wish to bring to the notice of Government the increasing difficulty which non-domiciled Europeans find in sending their children home, the increasing keenness of the struggle for a livelihood which domiciled Europeans have to face, and consequently the increased importance of providing the means of sound education in India for both these classes. They there-*

fore consider that the education of European children merits the special aid and support of Government. They would also point to the fact that, as far back as 1854, the desirability of establishing Training Schools or Colleges was acknowledged by the Government, that from that time to the present the necessity for their establishment has become more and more evident, but that, as yet, nothing has been done to provide a College for the training of teachers for European children. One of the greatest difficulties of schools arises from the want of competent teachers, who can rarely be got except by bringing them at great expense from England. The Committee are therefore of opinion that the establishment of a thoroughly efficient Training College for men and women, to be employed as teachers in the European schools of the Presidency, is a matter of pressing necessity.

2. The Denominational Difficulty.—The existing Code contains provisions, not to be objected to as illiberal, for the grant of aid to training colleges; but no such college has yet been established or even regarded as possible. The obvious difficulty is the denominational one. The European schools are maintained by different denominations of Christians; each of which requires that its teachers should be trained in its own tenets, and would be unwilling either to send its own teachers to be trained, or to employ others who had been trained, under different religious influences. It follows that each denomination having schools under its control would require a training college of its own. Such a scheme would be impracticable, because the number of teachers annually required by each denomination is so small as to put separate training colleges for them out of the question.

The only solution of the difficulty that presented itself to the Committee was the establishment of a Government Training College open to all denominations alike. We therefore adopted the following Resolution:—

That, in view of the difficulties that have attended the establishment of training colleges by private agency, due to the fact that every such college must be denominational, the Committee are further of opinion that for the successful establishment of a training college, the work must be undertaken by Government on an undenominational basis, acceptable to all classes of the European community.

3. Separation of the Boarding Establishments from the College.—It will at once be urged that the proposal that Government should establish a training college on an undenominational basis, only shifts the difficulty one step further on. Government may establish such a college; but inasmuch as all students must, during the period of training, be subject not only to moral control but to specific religious instruction, none would be allowed to attend a college from which such instruction was necessarily excluded. If students of a training college could be allowed to live where they pleased, that is to say, if the proposed institution were a day training college, this difficulty would not arise; but in the opinion of the Committee it is essential, or at any rate most desirable, that provision for the boarding and home supervision of the students should be made, in addition to that for their secular instruction, so that the whole college life of the students may be under good influences and

proper control. The only way in which it appears possible to meet the difficulty is to make separate provision for the secular instruction of students, and for their lodging and their moral and religious training. Provision for the former can be made by Government, both efficiently and in the only way likely to prove satisfactory to all. Provision for the latter can be made, equally efficiently and equally satisfactorily, by the different denominations, in the shape of hostels or boarding-houses under their own control, but subject, as regards their rules and other arrangements, to the approval of Government. The views of the Committe are expressed in the following Resolution :—

> *That in the opinion of the Committee the home supervision of students, as being one of the most important elements in their moral education and discipline, forms an essential part of the training required for the work of a teacher ; and it is therefore desirable that provision for their boarding and lodging, under the same control as their instruction, should, if possible, be made in any training college that may be established. The Committee, however, recognising the difficulties that have hitherto prevented the establishment of a training college and boarding establishment combined, consider it desirable to frame rules separately (1) for a college in which instruction alone shall be given, and (2) for one or more hostels in which the students under instruction may be lodged. The training college might either be established by private effort, as provided for in the revised rules, or (as the Committee think the only practicable course in present circumstances) it might be established by Government. In either case, the hostels should be under private management, and should, if approved by the Department, be eligible for Government grants. Such a course appears to the Committee to be likely to meet in a satisfactory way the requirements of different denominations, as regards the supply of teachers to their schools.*

4. **Cost of a Government Training College.**—Even though such a college as we contemplate, open to students of all denominations, might be established by Government, yet we have grave doubts whether the number of teachers annually required by the schools of any single Province would be large enough to justify the establishment of Provincial colleges. We therefore recommend that a single training college be established for all the Provinces comprised in the Presidency of Bengal, as we have little doubt that the number of teachers required by all these Provinces together would be amply sufficient for the purpose. We are of opinion that the cost of one such college to which both men and women could be admitted, with its attached practising school, would not exceed ₹40,000 per annum. If this amount were divided between Lower Bengal, Assam, the North-Western Provinces, the Punjab and the Central Provinces, only a moderate charge would fall upon each Province.

5. **Preliminary conditions.**—In accordance with the terms of the Resolution given in paragraph 3 above, Article 69 of the Revised Code states that a training college includes (*a*) a college in which theoretical instruction is imparted in the art of teaching, and in other subjects necessary to a teacher, (*b*) a practising school, receiving aid under Chapter II of the Code, in which

such instruction is practically applied; and it omits any provision for boarding and lodging the students. The rules given in this chapter refer to training colleges established by private effort, so that it was necessary to stipulate that the practising school should be an aided school, to ensure its being open to inspection throughout all its departments, and conducted entirely in accordance with the Code.

Article 70 of the Revised Code provides that the college and practising school shall be thoroughly efficient and suited to their purposes; and that proper arrangements shall be made for the boarding and home supervision of the students, before a grant is given to a training college.

Article 71 requires candidates admitted to a training college to be of good moral character, not under 18 years of age, and in good health; and further requires that they shall have been educated up to the standard of the High School Examination. These conditions of admission vary from those prescribed in the present Code (Article 78) in two particulars. The minimum age for admission has been raised from 17 to 18. At this transition period of life, a year makes a great difference in boys and girls, both as regards mind and character; and it is considered that students of the more advanced age will be better able to appreciate and to benefit by the course of training. The signing of the declaration that the candidate intends to become a teacher has been omitted as useless.

6. Course of Studies for Training College Students.—Article 72 of the Revised Code gives a general outline of the character of these studies and their object. Article 73 gives details of the course of training in teaching which the students must receive, namely, observing good teachers at work, teaching classes under proper supervision, and giving special lessons which will be criticised by fellow students and the college staff. Article 74 states that the training college course will occupy two years, which corresponds with the ordinary period of training in English training colleges. In addition to this, the article contains a detailed scheme of studies for the students. Some objection was offered to the insertion of this scheme on two grounds. It was said that as the Committee had not anticipated the revision of these rules, and had therefore not given previous consideration to the subject, they were not in a position to arrive at a mature judgment in such an important matter; and secondly, that the course under discussion was certain, from its extent, to interfere with the real work of the college, namely, the training of the students in the art of teaching and in school management. It was suggested that in place of the detailed course before the Committee, an article should be inserted stating that the course of studies would be decided upon whenever a definite proposal should be made for the establishment of a training college, as this plan would enable the scheme of studies to be prepared with due deliberation. Or alternatively, if the Committee desired something indicative of the character of the course to be inserted, the article might consist of a general statement, naming the subjects which it was thought necessary to include, without entering into details; and adding two important qualifications, first, that a certain definite portion of the students' working time (say three-fourths) was the minimum to be devoted directly to the study of the art of teaching and school-management, mainly in its practical side, and secondly, that no other study which might interfere with this, the primary object of the college, would be permitted. After some

discussion on this point, it was decided by the majority of the Committee that the course originally proposed should be inserted in the Code, as the terms of Article 70 (6) permitted of its modification to any extent by the Local Government, whenever a training college should be established. (XV, 2.)

7. **Examinations.**—Article 75 provides for the testing of students in their knowledge of the subjects which they will afterwards have to teach, in their familiarity with the best methods of teaching, and in their skill in putting the latter into practice. Article 76 deals with the letter which each student is to receive at the end of his term of study, certifying that he has gone through the Training College course, and stating what progress he has made towards gaining the Proficiency Certificate (Article 68).

8. **Hostels and Boarding Arrangements.**—The rules on this subject are given in Articles 77 to 81. Exemption from the ordinary rule of living in an approved hostel may be granted by the Inspector on the recommendation of the Principal of the college. (Article 77.) This will permit students to live at their own homes, when they reside within a convenient distance of the college, and when the home surroundings are unobjectionable.

Article 78 details the conditions which must be satisfied before a hostel can be approved for the purpose of the preceding article.

Article 79 makes provisions for grants to hostels, at a rate not to exceed 75 per cent. of the cost of each boarder.

Article 80 provides for the award of furniture grants under the general conditions of Chapter VII of the Revised Code.

It was thought desirable to arrange for the payment, in special cases, of the tuition and boarding fees of students who have been educated in orphanages or schools admitting free scholars, who show an aptitude for teaching, and who are likely to become teachers; as such students might otherwise be debarred from the advantage of a college training. This has been provided for in Article 81.

9. **Grants to Training Colleges.**—We are of opinion that a training college ought to receive a grant equal to three-fourths of its expenditure in the preceding year, subject to a maximum of R1,500 a month; and that this grant should be paid monthly. Article 82 has been framed to this effect.

Appendix C.

Revised Proposals relating to Training Colleges.

(Chapter VI of the Revised Code.)

1. The revision of the chapter on training colleges was practically forced on the Committee by the passing of the resolution which appears on page 42 of the Proceedings. Up to that time, many of the members appear to have been individually of opinion that while the existing rules were altogether unsuitable, and were never likely to result in the establishment of a training college, yet as there was but little chance of a training college being established under any rules at the present time, it would be a waste of time to discuss the articles on the subject. But when it was discovered that we were all agreed as to the need of immediate action, and when a resolution had been passed bringing this necessity to the notice of Government, it was felt that we were bound to revise the rules on Training Colleges so that they might be in accordance with our views on the subject. Up to that time, however, little if any consideration had been given to many of the important questions involved. We fortunately hit upon the plan of separate boarding houses for different denominations, and this may be accepted as a very satisfactory solution of a long-standing difficulty; but our conclusions on other points were somewhat hastily arrived at. To us at any rate, some of these conclusions appear on afterthought to be very far from the best possible. We therefore invite the attention of our colleagues to the subject once more, and submit the following statement of our views for their consideration, and for the favour of their opinion upon the entire scheme therein proposed, both as a whole, and in points of detail.

2. Before any other subject connected with the training of teachers can be discussed with profit, it is necessary to decide what course of training and instruction will be best for the students, as the whole character of the institution will depend upon this decision.

English training colleges are little more than continuation schools for pupil-teachers, as about seven-eighths of the time of the students is devoted to subjects having no reference whatever to the art of teaching or school management. In two of these colleges, the students teach in the practising school for a fortnight each year, which amounts to 100 hours in the two years, counting 5 hours a day and 5 days in the week. The college terms amount to 40 weeks in the year: but Government examinations, and private study immediately before and in preparation for them, occupy about four out of the forty. The ordinary working time is therefore 36 weeks a year. During this period, the students who are not occupied in the practising school receive two lectures a week, of an hour each, upon the theory of teaching and school management; and they also attend criticism lessons two hours a week. During the two years' course, therefore, the time occupied in lectures on the theory of education amounts to 136 hours (2 hours a week for 34 weeks in the year), an equal time being also given to criticism lessons. This gives a total of 372 hours devoted to training in the art of teaching and school management during the two years' course, the remaining time being entirely

occupied with the study of the ordinary subjects of education. The short time thus devoted to the training of the students is rendered less effective, particularly as regards the practical work, by the wide intervals during which the attention of the students is given entirely to other work. A student who teaches for a fortnight in the practising school, and then never enters the school again for twelve months, remembers when his turn comes round very little of what he had previously learnt. With regard to criticism lessons, which are lessons given by students and afterwards criticised by masters and by fellow-students, a student rarely gives more than two of these in the course of the two years; so that after giving one, he has to wait many months before he has the opportunity of putting into practice any hints which he may have gathered from the criticism. The above facts partially explain what would otherwise appear most strange, namely, that students in English training colleges usually attach far more importance to every other subject of study than to learning how to teach. They see little or no advantage in what is done toward that end, except in the case of the criticism lessons; and they begrudge the short time they are compelled to spend in the practising school, and still more the time given to lectures on teaching and school management. The study of the working of English training colleges is therefore more useful in pointing out what to avoid than what to follow.

3. After careful consideration of the subject we have come to the following conclusions. Since training how to teach and how to conduct a school is the special object in view, as large a portion of the students' time as is compatible with steady progress should be definitely devoted to that particular purpose. This training can only accomplish its end when conducted in connection with practical work; and the more closely precept is associated with practice, the more effective will be the result. A considerable part of the training can be best carried out in the school-room itself; and the rest, that which it would be impossible or inconvenient to conduct in the presence of the scholars, should have direct reference to work in the school-room which the students either see going on or take part in. The training should be continuous: there should be no break during which the students might lose interest, or forget what they have learnt.

To carry out these principles, we propose that the students shall attend the training college for six hours a day, except on holidays. The full time of six hours will be divided into three portions, the first of three hours, and the second and third of one and a half hours each. These three parts of the day will be devoted to different kinds of work. The first part will always be spent in the school-room, and the second and third outside the school-room, but in the same building. The second part of the day will always be occupied in work bearing directly upon that of the school-room; and the third in the study of other branches of education, chiefly those subjects in which it is desirable that the students should be proficient but which they cannot easily master by themselves, or those for the study of which the students would find it difficult to get proper help and instruction after leaving the training college.

Acting on this plan, a course extending over twenty weeks (or, counting holidays, half a year) might be made to give a much more thorough training than the two years' course of an English training college. Not only would considerably more time be actually given to the training, namely, 450 hours (20

weeks, 5 days a week, 4½ hours a day) against 372, but more would be accomplished in the same time owing to the more effective way in which that time would be spent. There would be no opportunity either to lose interest or to forget.

It is unnecessary to enter into minute details regarding the course of training, but we go on to give a general outline of what we consider a good plan of procedure. At the beginning of the course, say for the first two weeks, the students while in the school-room will only be required to watch the teachers at work with their classes, and to note their methods and the way in which the work generally is conducted. The second part of every day will be devoted to the discussion of what the students have seen done in the school-room, with the object of leading them to understand the chief points which distinguish good from bad teaching.

During the next period, say for 10 or 11 weeks, the first part of every day will be occupied by the students one by one giving lessons in turn, the rest making notes. Occasionally, the lesson will be given by one of the masters instead of by a student. The second part of the day will be largely occupied in the criticism of these lessons by the students and by one or more masters, both the good and the bad points in the lessons being discussed. Some time will still be left in the second part, and in this time one of the masters will give a short lesson to the students on some point connected with class teaching or discipline, associating his subject as much as possible with the actual work of the school-room; or occasionally, the time will be occupied in the discussion of notes of lessons prepared by the students in their own hours of study at the hostel.

During the last 7 or 8 weeks of the course, all the classes in the practising school will be taught by students for the full three hours of the first part of the day, each student being so employed for a week at a time, and keeping to the same class for that period. The master of each class will be present, and note the work of the student in charge. The students not in charge of classes will be occupied in observing, and in making notes upon, such lessons, given as above by the students, as the Principal may select for the purpose, generally going to a different class at the end of each lesson. At the close of the three hours, each student who has been teaching will receive from the master of the class brief hints about his work. After each student has been employed in teaching for a week, his class will be taken by another student, and he will occupy himself along with the rest in observing and noting on the work of his fellow-students in charge of classes. The second part of the day will continue to be occupied by criticism of the lessons and a short lecture.

The above routine provides 4½ hours' work for the first and second parts of the day. For the third part of the day, a time table should be arranged for practice and instruction in reading aloud, recitation, English composition, singing by note, drill, and the reading and study of a short selected course of English literature, the students being taken all together in a class for these subjects. By dividing the whole time into suitable periods, each of the above subjects could be taken at least once a week, and a little time could be spared for the students to work independently, but with the help of the masters, either at any of the subjects ordinarily taught in schools in which they might be

backward, or in drawing, or in the study of science or a second language. These subjects would be chiefly studied in the evening at the hostel, any knotty points being reserved for explanation by the masters during the third part of the next day.

4. For the course of training and instruction we have described, nothing would be required but a practising school. Suitable class-rooms would be required for the students to witness the teaching; and one, or perhaps two, additional rooms would be required for their instruction outside the school-room during the second and third parts of the day. A library and other necessary appliances would also have to be provided. No separate staff would be employed; as the training of the students would be carried on exclusively by the staff of the practising school, specially increased for that purpose. The number of masters to be employed would be that required for an ordinary school, namely, a principal teacher and as many assistant teachers as there are classes, together with one or possibly two additional teachers. Good teachers fully competent for the work would have to be employed.

5. The students would be boarded and lodged in hostels, conducted under the rules given in Articles 77 to 81 of the Revised Code.

6. We approve of the conditions of admission given in Article 71 of the Revised Code, except that we would add to clause (*c*) the words "or that he has been a recognised teacher for twelve months on the date of the introduction of this code, and is certified by the Inspector to be likely to benefit by the training."

7. The following are the advantages which we believe would result if the above proposals were adopted :—

(*a*) The plan proposed would involve far less cost to the management, both in the staff of teachers required, and in the necessary buildings. No separate college building, with its expensive fittings and apparatus, would be required. A well furnished practising school would serve every purpose.

(*b*) As a necessary result of the above, there would be a far greater likelihood of the establishment of a training college under this system, than under one which, with every attention to economy, might still be regarded as involving a prohibitive rate of expenditure.

(*c*) The reduction of the course from two years to six months would effect a proportionate reduction in the expenses of the students. Many teachers who might be unwilling to sacrifice their pay or unable to get leave of absence for the longer period, or who could not afford the charges, would be able and glad to avail themselves of the shorter and cheaper course of training.

(*d*) The students would be more efficiently trained as teachers.

8. If the proposals are accepted, the following alterations are suggested in Chapter VI of the Revised Code :—

ARTICLE 69—To read as follows :—

A training college consists of a practising school working under the Code, having a staff of teachers sufficient in number and fully

competent to carry on both the ordinary work of the school and the training of students according to the following rules, and having also the requisite accommodation for doing so.

ARTICLE 70.—After the words "satisfied on the following points:—" to run as follows:—

(*a*) *That the building is well suited for the purpose: namely, that it satisfies the conditions of Article 14 (b); that a sufficient number of the rooms in which classes are taught are large enough for the students to be present and to watch the teaching of a class, and are in other ways adapted to that purpose; and that there are sufficient and suitable additional rooms, in which the students can receive their further teaching and training.*

(*b*) *That the college is satisfactorily furnished and equipped with all necessary school appliances, with scientific and other apparatus, and with a good educational and reference library for the use of the students.*

(*c*) *That the college is staffed with good teachers, fully competent to conduct the work of the school and to train and teach the students in the manner explained in Article 74, and sufficient in number for that purpose.*

(*d*) *That the school satisfies the conditions of Article 14.*

(*e*) *That the classes are sufficiently large to serve the students for practising purposes.*

(*f*) *That approved arrangements are made for the boarding and the home supervision of the students, in hostels or otherwise.*

ARTICLE 71.—Insert a comma after "(see Chapter VIII)", and add to clause (*c*) the words "; *or that he has been a recognised teacher for twelve months on the date of the introduction of this Code, and is certified by the Inspector to be likely to benefit by the training.*"

For Articles 72, 73, and 74, substitute the following:—

ARTICLE 72.—*The course of studies will occupy 20 weeks, during which time the students will be required to attend for six hours a day except on holidays.*

ARTICLE 73.—*The college day of six hours will be divided into three parts, devoted to different kinds of work; the first of three hours' duration, and the second and third of one and a half hours' each. The first part of the day, thus divided, will be spent by the students in the school-room; the second part will be spent outside the school-room, in work connected with their training in the art of teaching and school-management; and the third part in class work upon other subjects, or in private study, under the superintendence and with the help of the masters.*

ARTICLE 74.—*The 20 weeks of training will be divided into three periods, approximating in length to those mentioned below:—*

During the first period, about two weeks, the students will occupy the first part of the day in listening to the teachers giving lessons

and in taking notes of their methods. In the second part, one or more of the masters will discuss with the assembled students what they have observed in the school, with the object of leading them to understand the chief points which distinguish good from bad teaching.

During the second period, about ten weeks, the first part of the day will be occupied by the students giving lessons in turn, the rest of the students and one or more of the masters taking notes. As a variation, a lesson will occasionally be given by one of the masters instead of by a student. In the second part, the lessons so heard will be criticised by both students and masters. A short lesson may also be given to the students on some point connected with teaching, or notes of lessons which the students have previously prepared and submitted for inspection may be discussed.

During the third period, about eight weeks, all the classes in the school will be taught exclusively by the students, a week at a time, during the first part of the day. Each student will teach the same class throughout the week. When his turn comes round again, a different class will be given to him. The students not engaged in teaching will visit different classes for different lessons, as arranged by the Principal; and they, the Principal, and possibly another master, will take notes in preparation for the work of the second part of the day. The master in charge of each class will remain with his class during the whole time it is thus taught by a student, and will take notes upon each of the lessons. At the end of the three hours he will give the student who has been teaching his class such brief hints and advice as may be suggested by his notes. The second part of the day will continue to be occupied by the criticism of the lessons given before the students, and a short lecture, as in the second period of the course.

ARTICLE 75.—*During the whole twenty weeks, the third part of the day will be largely devoted to class instruction and practice in reading aloud, recitation, English composition, singing by note, drill, and the reading and study of a short selected course in English literature. In this part of the day, also, opportunities will always be afforded to the students to obtain help from the masters in subjects such as drawing, science, or a second language or in subjects of ordinary instruction in which they may be backward.*

ARTICLE 75 of the Revised Code, as it now stands, to be omitted.

ARTICLE 76 to be added to Section III, thus doing away with the present Section IV.

SECTION V to become SECTION IV.

ARTICLES 77 and 78 to stand.

ARTICLES 79, 80, and 81 to be transferred to Section V (the present Section VI—Grants), with the following alterations in Article 79 :—

Omit "above" in the first line, and after the word "conditions" insert "*specified in Article 78.*"

Substitute "*college*" for "school."

SECTION VI to become SECTION V.

ARTICLE 82 to become Article 79.

ARTICLE 79 (revised as above) to become Article 80.

ARTICLE 80 to become Article 81.

ARTICLE 81 to become Article 82.

As the Training College is now the practising school, the grants to the college cover the grants to the school. It will be necessary therefore to omit Article 33 (*e*), Article 33 (*f*) becoming Article 33 (*e*).

CALCUTTA;
24th August 1895.

A. CROFT.

H. A. BAMFORD.

Appendix D.

CHAPTER VI.—TRAINING COLLEGES.

(Embodying the Revised Proposals.)

CODE OF REGULATIONS FOR EUROPEAN SCHOOLS IN BENGAL, 1889-90.

CHAPTER IV.

TRAINING COLLEGES

SECTION I.—*Preliminary.*

74. A training college includes—

(*a*) a college for boarding, lodging, and instructing candidates for the office of teacher.

(*b*) a practising school, in which such candidates may learn their profession.

75. No grant shall be made to a training college unless the Department is satisfied with the premises, management, and staff.

76. The grant to a practising school shall be made under the conditions specified in Chapter II.

SECTION II.—*Admission to Training Colleges.*

77. Candidates for admission to a training college are selected by the authorities of each college on their own responsibility, and are admissible to the college, provided that they produce satisfactory certificates of moral character.

CODE OF REGULATIONS FOR EUROPEAN SCHOOLS IN BENGAL, 1895.

CHAPTER VI.

TRAINING COLLEGES.

SECTION I.—*Preliminary.*

69. A training college consists of a practising school working under the Code, having a staff of teachers sufficient in number and fully competent to carry on both the ordinary work of the school and the training of students according to the following rules, and having also the requisite accommodation for doing so.

70. No grant will be given to a training college until the Department is satisfied on the following points:—

(*a*) That the building is well suited for the purpose: namely that it satisfies the conditions of Article 14 (*b*); that a sufficient number of the rooms in which classes are taught are large enough for the students to be present and to watch the teaching of a class, and are in other ways adapted to that purpose; and that there are sufficient and suitable additional rooms, in which the students can receive their further teaching and training.

(*b*) That the college is satisfactorily furnished and equipped with all necessary school appliances, with scientific and other apparatus, and with a good educational and reference library for the use of the students.

(*c*) That the college is staffed with good teachers fully competent to conduct the work of the school and to train and teach the students in the manner explained in Article 74, and sufficient in number for that purpose.

(*d*) That the school satisfies the conditions of Article 14.

(*e*) That the classes are sufficiently large to serve the students for practising purposes.

(*f*) That approved arrangements are made for the boarding and the home supervision of the students, in hostels or otherwise.

(Cancelled.)

SECTION II.—*Admission to Training Colleges.*

71. A candidate for admission to a training college must produce a satisfactory certificate of moral character, and must also satisfy the following conditions:—

(*a*) That he is at least 18 years of age.

Code of Regulations for European Schools in Bengal, 1889-90.

78. No grant will be payable to a training college on account of any student who on admission does not satisfy the following conditions :—

(*a*) That he is at least 17 years of age.

(*b*) That the state of his health is satisfactory, and that he is free from any infirmity or bodily defect likely to interfere with the profession of a teacher.

(*c*) That he signs a declaration signifying *bond fide* intention to follow the profession of teacher.

(*d*) That he has passed the final examination for high schools specified in Schedule I, or for pupil-teachers in Schedule II.

Code of Regulations for European Schools in Bengal, 1895.

(*b*) That the state of his health is satisfactory and that he is free from any infirmity or bodily defect likely to interfere with the profession of a teacher.

(*c*) That he has passed the high school examination (see Chapter VIII), or is considered by the Inspector to be educated up to that standard; or that he has been a recognised teacher for 12 months on the date of the introduction of this Code, and is certified by the Inspector to be likely to benefit by the training.

SECTION III.—*Course of Studies.*

72. The course of studies will occupy 20 weeks, during which time the students will be required to attend for six hours a day except on holidays.

73. The college day of six hours will be divided into three parts, devoted to different kinds of work; the first of three hours' duration, and the second and third of one and a half hours' each. The first part of the day, thus divided, will be spent by the students in the school room; the second part will be spent outside the schoolroom, in work connected with their training in the art of teaching and school-management; and the third part in class work upon other subjects, or in private study, under the superintendence and with the help of the masters.

74. The 20 weeks of training will be divided into three periods, approximating in length to those mentioned below:—

During the first period, about two weeks, the students will occupy the first part of the day in listening to the teachers giving lessons and in taking notes of their methods. In the second part, one or more of the masters will discuss with the assembled students what they have observed in the school, with the object of leading them to understand the chief points which distinguish good from bad teaching.

During the second period, about ten weeks, the first part of the day will be occupied by the students giving lessons in turn, the rest of the students and one or more of the masters taking notes. As a variation, a lesson will occasionally be given by one of the masters instead of by a student. In the second part, the lessons so heard will be criticised by both students and masters. A short lesson may also be given to the students on some point connected with teaching, or notes of lessons which the students have previously prepared and submitted for inspection may be discussed.

During the third period, about eight weeks, all the classes in the school will be taught exclusively by the students, a week at a time, during the first part of the day. Each student will teach the same class throughout the week. When his turn comes round again, a different class will be given to him. The students not engaged in teaching will visit different classes for different lessons as arranged by the Principal; and they, the Principal, and possibly another master, will take notes in preparation for the work of the second part of

Code of Regulations for European Schools in Bengal, 1889-96.

Code of Regulations for European Schools in Bengal, 1896

the day. The master in charge of each class will remain with his class during the whole time it is thus taught by a student, and will take notes upon each of the lessons. At the end of the three hours he will give the student who has been teaching his class such brief hints and advice as may be suggested by his notes. The second part of the day will continue to be occupied by the criticism of the lessons given before the students, and a short lecture, as in the second period of the course.

75. During the whole twenty weeks, the third part of the day will be largely devoted to class instruction and practice in reading aloud, recitation, English composition, singing by note, drill, and the reading and study of a short selected course in English literature. In this part of the day, also, opportunities will always be afforded to the students to obtain help from the masters in subjects such as drawing, science, or a second language, or in subjects of ordinary instruction in which they may be backward.

76. At the termination of his college career, each student shall receive a letter from the Department, certifying that he has received the complete training college course of instruction in the science and art of teaching, and, if the student has satisfied the Inspector in either or both of the tests prescribed in Article 68 (*b*) and (*c*), this fact also shall be stated in the letter.

SECTION V.—*Hostels and Boarding Arrangements.*

77. All students under training must reside in approved hostels or boarding houses, unless specially exempted by the Inspector on the recommendation of the Principal.

78. No hostel will be approved unless the following conditions are satisfied :—

(*a*) That the building is healthy, and sufficiently commodious to allow of quiet, uninterrupted home-work.

(*b*) That the rules of the hostel, and the arrangements for the general supervision of the students, including their moral training, comfort, and recreation, are approved by the Department.

NOTE.—It is very desirable that every hostel or boarding house should have a reading and recreation room, properly supplied with papers and magazines, especially periodicals bearing on educational subjects.

SECTION IV.—*Grants.*

86. The managers of a training college shall be entitled to a grant of Rs. 750 for each student passing the annual examination in the first division, and of Rs. 500 for each student passing in the second division.

87. On the recommendation of the Inspector, a grant not exceeding Rs. 100 may be made on account of a student who fails to pass the annual examination; but this grant will not be made more than once for the same student.

88. The managers shall receive monthly a provisional grant of Rs. 35 for each student on the rolls during that month.

SECTION V.—*Grants.*

79. The managers of a training college shall be entitled to receive a monthly grant equal to 75 per cent. of the average monthly expenditure on the college in the preceding year: provided that the Department is satisfied that the college has been conducted with due regard to economy.

80. When the conditions specified in Article 78 are complied with, grants may be given to hostels or boarding houses, at such a rate for each boarder in residence as may be fixed for each college with reference to its locality, and to other material conditions affecting its necessary expenditure; provided that such rate does not amount to more than 75 per cent. of the cost of each boarder.

Code of Regulations for European School Bengal, 1889-90.

89. After the annual examination, the managers shall receive the amounts payable under Articles 86 and 87, less the amounts actually paid under Article 88. If the amounts paid under Article 89 exceed the amounts payable under Articles 86 and 87, the excess shall be deducted from the first, or (at the discretion of the Department) any subsequent grants payable in the following year under Article 88, or be otherwise refunded to the Department.

90. The amount specified under Article 86 will not be payable on account of any student who has resided for less than eight months during the year. Exceptions to this rule may, at the discretion of the Department, be made in special cases; provided that no grant will be payable for any student who has resided for less than six months, or who has spent less than 75 hours under proper supervision in the practising school. In the case of students so excepted, a reduction not exceeding Rs. 200 will be made in the amount of the grant.

Code of Regulations for European Schools in Bengal, 1895.

81. Special grants may be given to training colleges and to hostels or boarding houses towards the provision of necessary furniture or fittings, under the general conditions of Chapter VII of this Code.

82. Government may, in special cases, pay both the tuition and the boarding fees of students who have been educated in orphanages or schools admitting free scholars, and who show a special aptitude for teaching and are likely to adopt it as a profession.

Appendix E.

Notes on the Revised Proposals for Training Colleges.

I.—BY THE VENERABLE ARCHDEACON DEEDES.

1. I am of opinion that a decided blot in the arrangements of Training Colleges in England has been pointed out, in the very limited time devoted in them to instruction in and practice of the art of teaching: and that in any Training College established in India provision should be made for a much larger proportion of time to be allotted to these subjects: and that it should in every way be made evident that this is the final cause of the establishment of such an institution.

2. I cannot, however, persuade myself that a six months' course will be sufficient to form capable and efficient teachers out of such material as is available in India: or that such students as will enter the College will be capable of learning how to teach without at the same time receiving much additional instruction in the subjects, the elements of which they will have to impart to others. The average boy or girl who has read up to the VIIIth Standard or has passed the University Entrance Examination, and who, desiring to take up teaching as a profession, would seek to enter the Training College, is, as a rule, a quite *uneducated* person, with a range of reading limited strictly to the books in which he has been examined, with no general information and no taste for independent study. He has still to be taught to think and to reason. To give to such a person merely a course of instruction in the art of teaching (with at the most 1½ hours a day for independent study) would be in my opinion labour lost. He will never make an efficient teacher until he has acquired a far more substantial education.

3. If it be said that such an education should be acquired elsewhere than within the walls of the Training College, I venture, with much deference to men of far wider educational experience than myself, to differ. And this on two grounds, *viz.*:—

1st, because we have in India no means of giving such an education. Even if our students were limited (which would be impossible) to such as had taken a University degree they would in most cases be little better qualified as teachers: they would have crammed a few more subjects for examination, and would have imbibed considerably more self-satisfaction: there would be more to unlearn as well as to learn.

2nd, because, in my opinion, a good teacher will be better formed if the art of teaching is imparted *pari passu* with the art of learning. Otherwise, after having been mechanically crammed with so much information, the student will in the same mechanical way cram the method of imparting it to others.

4. For the above reasons, while I agree that in the Training College a far larger proportion of time and attention should be devoted to the art of teaching than appears to be customary in England, I believe that an efficient Training College must necessarily be to a considerable extent a continuation school

of the best kind, aiming not so much at imparting a certain amount of information as at the general culture of the mind and the formation of habits of study, observation, and reasoning.

5. I therefore greatly prefer the original proposals of the Committee to those now circulated by Sir A. Croft and Mr. Bamford: and I feel so sure that a mere six months' course in the art of teaching would fail to effect the object in view that I would rather see no College established than one on the limited lines now suggested.

BROOK DEEDES,
Archdeacon of Lucknow.

NAINI TAL;
The 25th September 1895.

II.—BY W. H. BOUTFLOWER, Esq.

After carefully considering the revised proposals with regard to a Training College put forward by the President and Mr. Bamford, I regret to have to record my dissent from them for reasons which have been forcibly urged by the Archdeacon of Lucknow with whose note on the subject I entirely concur.

In my opinion, not only is a Training College required for these Provinces but also a school of a higher grade than any now in existence. Our schools for European children do not teach beyond the Higher Standard, a standard very little above the Entrance Examination. Even Natives brought up in families where English is spoken have been known to pass this examination at 14 years of age, and a clever European child would, in my opinion, have little difficulty in passing the Higher Standard at 15. In these Provinces it is held that the general education of a youth requires to be carried on for two years after passing the Entrance Examination before his professional education should be begun. In the case of European children who wish to adopt the profession of a teacher, this is at present impossible, for the followng reasons:—The Arts Colleges, which are all situated in the plains, have no boarding houses for Europeans, and many parents would refuse to allow their sons, not to speak of their daughters, to attend classes in company with Native youths. Moreover it is very desirable that the education of Europeans at this age should, if possible, be carried on in the hills where they will not be deterred by the heat from taking a proper amount of physical exercise.

But a more pressing reason, in my opinion, than the inadequacy of the Higher Standard Examination, for carrying on the general education of those who are to be teachers beyond this standard, is the very meagre and defective equipment of the schools of these Provinces. At not one of these schools are object lessons given on a systematic plan and with sufficient apparatus; in only one school is there any apparatus for teaching elementary physics, not one can exhibit specimens of the products of foreign countries, very few have libraries or gymnasia, and in all there is a marked absence of that stimulus to and provision for, healthy forms of intellectual amusement during play hours, which, from an educational point of view, is as necessary as good class teaching. Nor is there the faintest prospect of improvement. Managers cannot raise funds by means of higher fees, as the parents of the fee-paying children are mostly persons in receipt of rupee salaries, without any compensation allowance,

and with incomes slowly but surely diminishing in value as the rupee falls and fresh taxes are levied, while every year the number of indigent children, for whom education has to be provided chiefly at their expense, is increasing. At the same time the Local Government has been obliged to reduce its allotment to European education owing to the financial pressure.

We cannot, therefore, hope to raise the standard of education in the schools of these Provinces, which, as far as I can foresee, must decline, owing to want of funds, as the number of indigent children to be educated increases. If this standard is insufficient as regards general culture for the profession of a teacher the only remedy apparently is the establishment of a higher grade of school, The original proposals of the Committee appeared to me particularly valuable because they provided for the establishment of such a school, while, at the same time, I regret that a lower age limit for admission was not fixed upon. That the Archdeacon's contention as to the unfitness of children whose general education has not gone beyond the Higher Standard to be trained as teachers is well founded, may, I think, be shown from the reports of the Royal Commission on Elementary Education of 1888. It will be generally admitted that candidates for admission to Training Colleges in England are little, if at all superior in intelligence and general culture to the average boy or girl who has passed only the High Standard Examination. Yet the Commissioners unanimously recommended that the course of study should be extended to three years for selected students, if it were feasible, and that day students should be allowed facilities for continuing their study at a local Arts College; and on page 277 it is stated that "the great mass of testimony is that Training Colleges are unable to do all that they should for their students on account of the unprepared and crude state in which they receive them." This would seem to be the reason why so large an amount of time is devoted to the general education of the students in English Training Colleges. In the new scheme it is proposed to give only an hour and-a-half daily for six months to the general education of the students, and part of this time is to be spent in instruction in reading aloud, recitation, singing by note, and drill.

I also observe that there is no provision for instruction in psychology,—a subject which also seems to have been omitted in the original scheme. Yet surely it must be admitted that one whose duty it will be to develop the intellect and to train the will ought to know something of the laws by which the mind and the will act. A Training College which ignores psychology appears to me to have as little chance of success as a Medical School would have which ignored physiology. Without some elementary knowledge of the principles of the science, I do not see how it is possible for anyone to obtain an intelligent grasp of the theory of education, and this has been the actual experience of a Principal of a Girls' School in these Provinces, who lately informed me that she used to read what she considered instructive articles on education to her untrained assistants, but had given up doing so as they were unable to follow the reasoning employed.

For the above reasons, I think that we should be running considerable risks in adopting the revised proposals now before us. It would be extremely unsatisfactory if a competent person could not be induced to undertake the post of Principal on account of the ill-prepared condition of the candidates for

admission and the impossibility of proceeding further with their general education, or if School Managers still had to import their teachers from England—contingencies which seem to me not unlikely to happen.

NAINI TAL; *The 14th October 1895.* W. H. BOUTFLOWER.

III.—BY F. HADEN COPE, ESQ.

I have carefully read and considered the Memorandum on Training Colleges put forward by Sir Alfred Croft and Mr. Bamford, and I have the following remarks to offer.

1. I do not think that the Committee ever contemplated making a Training College in this country merely a continuation school, and I think that the curriculum proposed shows this.

In the Central Training College at Lahore, of which I was for some years Principal, our students' time was spent as follows:—Lectures were given in the College on the Science and Art of Teaching, throughout the course; Model Lessons were also given by the members of the staff, and, after the students had been in the College a few weeks, they gave lessons themselves either to classes of the Model School, brought into the College for that purpose, or to their fellow-students representing classes, and these lessons were afterwards criticized by the students and the Principal then summed up, and, if necessary, showed how the lesson should have been given in a model lesson on the following day. Through the whole of their course the students attended the Model School regularly, at first merely to watch and take notes on the teaching, and afterwards in charge of the classes, teaching under the class-masters, all good men, who sent in reports of the teachers' work to me as well as guided them in their teaching. Ours was a ten months' course, and I found it insufficient. As well as this the men revised the ordinary subjects of a school curriculum, especially with reference to teaching those subjects, but they were not taught anything new.

Our plan was, therefore, not very different from that proposed by the two members of the Committee whose memorandum I am now considering, and this is the plan I thought the Committee intended should be followed when drawing up the scheme of studies passed in Calcutta. We did not, however, divide the students' time definitely into parts, nor do I think it advisable or even practicable to do so.

So far, it will be seen, I agree with the memorandum put forward; because it contains very little beyond what we passed in Calcutta.

2. I must now state my objections to the new proposals.

In the first place, and I consider this most important, it appears to be taken for granted that it would be possible to fill a practising school of the kind proposed with boys and girls in sufficient numbers *and in all the classes* for practising purposes. From my own experience I doubt extremely if this could be done, especially in the higher classes. Parents do not like their children being taught first by one student and then by another, and under the proposed arrangement, every child would be taught for three hours

a day by a man who was learning his work, leaving, at the utmost, two hours for the child to be taught by his class master. Now it is a well-known fact that children in model schools or practising schools, and this would have to be both, are, although generally above the average in brightness and intelligence, not so far advanced, or shall I say, not so fully prepared, in special courses, as those in ordinary board schools. In this country, where so much depends on the results of examinations, this fact tends to make model schools in a measure unpopular. I do not think, therefore, that we could fill a practising and model school on the terms of instruction proposed, although it might be possible to subsidize an orphanage for the purpose. If this were done the religious difficulty would probably come in.

Again, we must remember that the classes of the practising school under the proposed arrangement would have to be taken over by a fresh set of men every six months. When the second set of college students came in, there would not be a single class to which *the beginnings* of any subject, the most difficult probably of all teaching to young teachers, could be taught. A start would have to be made in each subject just where a class happened to be, for it would be impossible, without an unworkably complex organization, to have six months' courses for the children, since this would mean the doubling of each class and consequently the numbers required for practising purposes, and so far more than doubling the difficulty of filling the practising school, since one set of these classes would be betwixt and between for all examinations and for all promotions in other schools. Also many more masters would be needed if we had two classes in each standard and two sets of students under training at one and the same time. The difficulty might be met by having only one course of training a year; but this would mean a great waste of teaching power and of money, to have hostels standing empty, and masters (the extra masters) idle for half of every year.

But I have yet a stronger objection than these which I have put forward. I am convinced that no teaching can be considered satisfactory, and that no training can be thorough unless the student knows thoroughly the science on which the art is based. It is entirely against all our educational principles to teach a rule without its reason; yet this seems to me to be what is proposed in this scheme. Everything is to be sacrificed to "Practical work." Now no one is more thoroughly convinced of the absolute necessity of practical, and continuous practical work than I am, but, at the same time, I would not neglect the teaching of the principles which should guide us in that work. I hold that for a man to be a really good intelligent and scientific teacher he must know the child's mind on which he has to work, and that knowledge of his materials and tools is as necessary to him as that of anatomy, physiology, *materia medica* and so forth to a doctor. In short, some knowledge of psychology must be given to the man up for training as a teacher. This it would be impossible to do in the short time proposed. It seems to me that the proposal put forward would result in a species of "cram" in method, which I hold is undesirable.

That the students turned out would be better teachers than they would have been had they not attended such a course as that proposed, I do not doubt, but that they would not be "trained" men I feel convinced.

The gentlemen who put forward the scheme I am now considering believe that if their proposal was adopted four advantages would result—

(*a*) That the scheme would be less costly than the one originally proposed and accepted by the Committe while sitting. This it undoubtedly would be.

(*b*) That this being so there would be a greater chance of the establishment of a Training College under this system. This is also true as far as expenditure goes, but the likelihood of a Training College as proposed being established under this scheme is more than counterbalanced, in my opinion, by the fact that we should not be able to fill the practising school.

(*c*) There would be a proportionate reduction in the expenses of the students. This is also true. But the question is, would this course be worth attending, judging by the amount of "training" it would give them? On this point I have very grave doubts.

(*d*) The students would be more effectively trained as Teachers. To this I entirely disagree. I do not think they would be "trained," they would be more or less crammed by being instructed in method without being made sufficiently acquainted with the principles underlying it and the facts on which these principle are based.

As I am unable to agree to the scheme as proposed it is unnecessary for me to criticize the proposed changes in the Code as passed by the Committee. To call the proposed school a Training College would be a misnomer; it would be merely a practising school.

The gentlemen who have drawn up the scheme appear to have not looked at the question from the children's, parents', or managers' point of view; also they have given no estimate of the probable cost.

Personally I should infinitely prefer to see more of the public money spent on the training of pupil teachers than on a scheme of this kind. In facts what it seems to me would be preferable to this, and would not cost much would be for Government to institute at different centres short courses of lectures, to be given by experts of course, on the Principles and Practice of Teaching, to have these at times when teachers could easily attend, say in the holidays, to allow all teachers to attend, either free or at very low fees, and others at enhanced fees, and to have each course followed by an examination. Then certificates might be given to those who had attended the course and passed the examinations, and would be of two kinds. One, and the higher given to those who had served as pupil teachers or teachers to the satisfaction, of the Inspector of the Province, and the other, and lower, to those who had merely attended the lectures and passed the examination with a view of taking up teaching work.

I much regret not being able to agree with Sir Alfred Croft and Mr. Bamford in their proposals, having as I have the greatest respect for their opinions, based as they are on a long and wide and varied experience of educational work, but at the same time, my own views on the question are strong.

F. HADEN COPE,

The 19th November 1895. *Inspector of European Schools, Punjab.*

IV.—BY THE REVEREND BROTHER FABIAN.

I am of opinion that the scheme for training colleges now put forward by Sir Alfred Croft and Mr. H. A. Bamford is more suitable and feasible than that adopted by the Code Revision Committee and that it brings us nearer to the era of training colleges:—

(1) Because the course originally proposed by the Code Revision Committee requires instruction, to be followed by examination, in such a multitude of subjects, that the attention of the masters and the students would, I fear, be almost entirely devoted to their studies and diverted from that which is the real object of the training college, namely, training in the art of teaching. This effect has evidently resulted from the system followed in England, which is very similar to that proposed by the Committee.

(2) Being less elaborate and less expensive, the scheme proposed by Sir Alfred Croft and Mr. H. A. Bamford is likelier to become a reality in India at an early date than the one adopted by the Committee, and, consequently, a vast amount of benefit is likely to have been derived from it, if adopted, long before the other would have come into operation.

(3) By the change in the method of awarding Teachers' Certificates the Committee recognised the great defect that exists in most Indian schools at present, namely, a want of practical skill among teachers in imparting knowledge; for the awarding of certificates will, in future, depend less on a teacher's literary abilities than on his ability to teach, the former being of course included in the latter, as far as a sound knowledge of the subjects to be taught is concerned. An arrangement then, that would aim at developing this skill as early as possible, would be the remedy for the defect alluded to above, and the correlative of the principles involved. The course proposed by Sir Alfred Croft and Mr. Bamford seems to me to be that remedy.

(4) For the reasons given by Sir Alfred Croft and Mr. H. A. Bamford in the memorandum setting forth their views on the subject a comparatively short course of training is likely to be welcomed by the majority of the teachers, and to be largely availed of by them; and thus, in a short time, a large proportion of them would have received a really useful and practical training, such a training as would enable any one possessing in himself the elements of self-help to attain success in his profession afterwards, especially when to this is added the stimulus to private study which the new method of awarding certificates is sure to give.

It might be urged as an argument against the adoption of the "Six months' course" scheme that candidates for the teaching profession in India are, as a rule, rather below the average in their studies; and that, for them, the training college should partake largely of the nature of a continuation school. This might have been so in the past, when schools rarely taught beyond the seventh Standard, and when the utmost concern of the teacher was to pilot his pupils

safely through the results examination. But now that the Primary and Middle School examinations, so well calculated to insure thorough, effective teaching, have superseded the examination for results, and that the High School Examination will probably be invested with attractions and privileges which it did not possess before, better material will be forthcoming in future. The High School Examination is by no means a meagre test of a boy's abilities; neither is it an examination to encourage "cram." The extent of knowledge required is considerable, and the questions set are of such a nature as to call for considerable thought on the part of candidates in applying this knowledge. A boy who has passed the High School Examination must certainly, then, be possessed of more than a little intelligence.

But assuming that a training college such as that proposed by the Code Revision Committee were to be established at once, how far would it benefit those actually engaged in teaching? How many teachers would care, or could afford, to sacrifice their salaries for two years? Few, if any. Again, the extensive course of instruction offered by the college, and the cheap terms on which it could be obtained, would probably attract many pupils who, having passed the High School Examination, would be on the look-out for a good opportunity of continuing their education at a nominal cost to themselves, and who, when the two years had expired, would in many cases take to other and more congenial occupations. The six months' course would obviate all this. Those actually engaged in teaching could easily arrange to get trained, while pupil teachers and scholars who had passed the High School Examination would scarcely seek admission, owing to the technical nature of the College, if they had not previously made up their minds to take to teaching as a permanent calling.

As a scheme of this kind must, in any case, be to some extent tentative at first, it will be easy to extend or otherwise modify the course afterwards should it be found necessary to do so; but what I should say is wanted just now is something simple in its organization, inexpensive, and immediate in its remedial effects.

The 5th December 1895. BROTHER FABIAN.

Appendix F.

CHAPTER VI.—TRAINING COLLEGES.

(*Revision of Appendix D in accordance with the further proposals contained in this letter.*)

Article 70 (*c*).—After the words "that the college is staffed with" insert the words "*a sufficient number of*;" and for the words which follow "manner explained in Article 74," substitute "*and to give such instruction as may be necessary in the principles underlying sound methods of teaching.*"

Article 72.—For "20 weeks" substitute "*ten months.*"

Article 74.—For "20 weeks" substitute "*ten months.*"

For "two weeks" substitute "*one month.*"

For "ten weeks" substitute "*four months.*"

For "eight weeks" substitute "*five months.*"

Article 75.—For "20 weeks" substitute "*ten months.*"

Add the following:—

NOTE.—*On joining the college, each student will be required to select a certain subject or subjects for private study outside the college course, being guided in his choice by the Principal. As much help as possible in such studies will be given by the members of the college staff during the third part of the day referred to in the above Article; and the progress made by the students in their private studies will be noted at regular intervals, and recorded.*

Add the following new Articles:—

Article 77.—Local Governments are authorised to make any changes which they may think advisable in the distribution of time and the duration of the college day, specified in the preceding articles of this section.

Article 78.—As far as the accommodation will permit, teachers will be allowed to join the college at any part of the college year for a period of not less than two or more than six months, provided that they attend with regularity, for the purpose of listening to the lessons given in the class rooms, whether by the regular staff or by the students under training, and to the criticism and other lectures given by the staff to the students outside the class rooms. They will also be allowed to prepare notes of lessons to be criticised by the masters along with those of the regular students. Teachers attending in this way will take no part in the instruction of the school classes, but be spectators only.

Articles 77 to 82 to be re-numbered 79 to 84.

BY THE GOVERNOR-GENERAL IN COUNCIL.

A PROCLAMATION.

Simla, the 22nd May, 1896.

No. 958-*E*.—Whereas by a Declaration in regard to Siam and the Upper Mekong signed and made on the fifteenth day of January 1896, it was agreed between Her Majesty the Queen, Empress of India, and the President of the French Republic that the thalweg of the Mekong river should be the boundary between the possessions or spheres of influence of Great Britain and France, respectively:

Know all men, and it is hereby proclaimed, that the thalweg of the Mekong river from the mouth of the Nam Huok northwards as far as the Chinese frontier is the limit of the possessions or spheres of influence of Great Britain and France, respectively.

Also know all men, and it is further proclaimed, that the Governor-General in Council is hereby pleased to order that all lands and territories whatsoever situate within Her Majesty's possessions between the thalweg of the Mekong river as aforementioned and the existing frontier of the Shan State of Keng Tung shall henceforward form part of the said Shan State of Keng Tung.

By Command,
H. S. BARNES,
Offg. Secretary to the Government of India.

NOTIFICATION.

Simla, the 22nd May, 1896.

No. 1307-*F*.—The following extract from the "London Gazette" of the 24th April 1896 is republished for general information:

Chancery of the Order of
Saint Michael and Saint George,
Downing Street, April 23, 1896.

THE Queen has been graciously pleased to give directions for the following appointments to the Most Distinguished Order of Saint Michael and Saint George:

To be Honorary Members of the First Class, or Knights Grand Cross of the said Most Distinguished Order—

SHAHZADA HABIBULLA KHAN, of Afghanistan.

SHAHZADA NASRULLA KHAN, of Afghanistan.

H. S. BARNES,
Offg. Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Simla, the 19th May, 1896.

No. 842-G.—Brigade-Surgeon Lieutenant-Colonel A. F. Dobson, M.B., Indian Medical Service (Madras), Residency Surgeon at Bangalore, is granted special leave for six months, under Article 348 of the Civil Service Regulations, with effect from the 25th May, 1896, or the subsequent date on which he may avail himself of the leave.

No. 843-G.—Surgeon-Major R. Ross, Indian Medical Service (Madras), Medical Officer of the 19th Madras Infantry, and on special duty in Bangalore, is appointed to officiate as Residency Surgeon at Bangalore, with effect from the date of assuming charge, and during the absence on special leave of Surgeon-Lieutenant-Colonel A. F. Dobson, M.B., or until further orders.

The 22nd May, 1896.

No. 959-E.—In exercise of the power conferred by section 3 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), the Governor-General in Council is pleased to appoint the Assistant Political Officer for the time being at Keng Tung to exercise all the powers of a Political Agent under the said Act for the Siamese Provinces of Müang Nan, Müang Phrê and Müang Thön.

No. 960-E.—With reference to section 13 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), the Governor-General in Council is pleased to direct that the Assistant Political Officer at Keng Tung may, in exercise of the powers of a Political Agent conferred upon him by the notification of the Government of India in the Foreign Department, No. 959-E., dated the 22nd May, 1896, give over any person arrested and forwarded in accordance with the provisions of section 12 of the said Act to be tried by the ordinary Courts of the State in which the offence was committed or is alleged to have been committed by such person.

No. 856-G.—With reference to the notification of the Government of India in the Foreign Department, No. 612-G., dated the 29th November, 1894, the Governor-General in Council is pleased to recognise the confirmation of Mr. R. J. Black as Consul for the Austro-Hungarian Empire at Madras.

No. 860-G.—With reference to Foreign Department notification, No. 65-G., dated the 15th January, 1896, Mr. Hormasji Cowasji, Acting Consul for Portugal at Aden, resumed charge of his office on the 17th April, 1896.

No. 863-G.—The Governor-General in Council is pleased to recognise the appointment of Mr. S. Schmuck as Acting Consular Agent for Russia at Aden, during the absence of Mr. P. Bonenblust.

No. 866-G.—The Governor-General in Council is pleased to recognise the appointment of Mr. H. Parfitt as Acting Consular Agent for the Austro-Hungarian Empire at Karachi, *vice* Mr. A. E. Hoare, resigned.

No. 1678-I.—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to make the following rules for the regulation of nuisances in each of the Hyderabad Contingent stations of Aurangabad, Jalna, Mominabad, Hingoli, Raichur and Bolarum (hereinafter referred to as cantonments):

1. (i) The Cantonment Committee (hereinafter referred to as "the Committee") may provide for the performance by its agents of the duties usually performed by sweepers in respect of any building or land, or of any privy, drain, cess-pool, or other receptacle for offensive matter, pertaining to any building or land with the consent of the occupier of the building or land or without such consent if the occupier fails to make arrangements to the satisfaction of the Committee for the performances of such duties.

(ii) When the Committee has undertaken to provide for the performance by its agents of such duties as aforesaid, the persons employed by it to perform the same may enter on the property at all reasonable times so far as may be necessary for the proper discharge of these duties, and the Committee, by any person authorized by it in this behalf, may enter on the property at all reasonable times for the purpose of ascertaining that such duties have been duly performed.

2. (i) The Superintendent of Police, and in the Cantonment of Aurangabad the Cantonment Magistrate, may by notice in writing require the owner of any building to provide, in such manner as the Committee directs, any privy or cess-pool, or additional privies or cess-pools which should, in the opinion of the Committee, be provided for such building.

(ii) The Superintendent of Police, and in the Cantonment of Aurangabad the Cantonment Magistrate, may by notice in writing require any person employing more than twenty workmen or labourers to provide such latrines and urinals as the Cantonment Committee may think fit, and to cause the same to be kept in proper order and to be daily cleaned.

(iii) The Superintendent of Police, and in the Cantonment of Aurangabad the Cantonment Magistrate, may by notice in writing require the owner or occupier of any building or land to have any privy provided for the same shut out by a sufficient roof and wall or fence from the view of persons passing by or dwelling in the neighbourhood, or to remove or alter, as the Committee directs, any door or trap-door of a privy opening on to any street or drain.

3. (i) The Superintendent of Police, and in the Cantonment of Aurangabad the Cantonment Magistrate, may by notice in writing require the owner or occupier of any building or land to repair or alter, or put in good order any privy, drain or cess-pool, or to close any cess-pool belonging thereto.

(ii) The Superintendent of Police, and in the Cantonment of Aurangabad the Cantonment Magistrate, may by notice in writing require any person who constructs any new privy, drain

or cess-pool without his permission in writing, or contrary to his directions or regulations, or who constructs, rebuilds or opens any privy, drain or cess-pool which has been ordered to be removed or stopped up or not to be made; to remove the privy, drain or cess-pool, or to make such alteration therein as he may think fit.

4. The Superintendent of Police, and in the Cantonment of Aurangabad the Cantonment Magistrate, may by notice in writing require any person who, without his permission in writing, newly erects or rebuilds any building over any public sewer, drain, culvert, water-course or water-pipe vested in the Cantonment authority to pull down or otherwise deal with the building as he thinks fit.

5. The Superintendent of Police, and in the Cantonment of Aurangabad the Cantonment Magistrate, may by notice in writing require any owner or occupier on whose land any drain, latrine, urinal, cess-pool or other receptacle for filth or refuse for the time being exists within fifty feet of any spring, well, tank, reservoir or other source from which water is or may be derived for public use to remove or close the same within one week.

6. The Superintendent of Police, and in the Cantonment of Aurangabad the Cantonment Magistrate, may by notice in writing require the owner or occupier of any building or land to cleanse, repair, cover, fill up or drain off any private tank, well, reservoir, pool, low marshy ground or excavation therein which appears to the Committee to be injurious to health or offensive to the neighbourhood.

Provided that if, for the purpose of effecting under this section any drainage, it is necessary to acquire any land not belonging to such owner or occupier or to pay compensation to any other person, the Cantonment authority shall provide the land or pay the compensation.

7. (i) When any notice under these rules requires any act to be done for which no time is fixed by these rules, the notice shall fix a reasonable time for doing the same.

(ii) When the owner or occupier of any building or land fails to comply with the terms of any notice under these rules requiring him to do any act in, or in respect to, that building or land, the Superintendent of Police, and in the Cantonment of Aurangabad the Cantonment Magistrate, may, after six hours' notice, cause the act to be done by the officers subordinate to him.

8. (i) Where under these rules the owner or occupier of property is required by the Committee to execute any work and default has been made in complying with the requirement, and the Committee has executed the work, the Committee may recover the cost of the work from the persons in default.

(ii) As between themselves and the Committee both owner and occupier shall be deemed to be in default for the purpose of this section, but that one of them shall be deemed to be primarily in default upon whom as between landlord and tenant the duty of doing the required act would properly fall either in pursuance of the contract of tenancy or by law.

(iii) When the person primarily in default is the owner, and the Committee has recovered the whole or any part of the cost from the occupier, or he has paid the same upon its demand, he may deduct the sum so recovered or paid from the rent from time to time becoming due from him to the owner, or otherwise recover it from such owner.

(iv) Provided that no occupier shall be required to pay under sub-section (iii) any sum greater than the amount for the time being due from him to the owner, either in respect of rent due at the date of such demand as aforesaid or thereafter accruing, unless he has refused, on application to him by the Committee, truly to disclose the amount of his rent and the name and address of the person to whom it is payable; but the burden of proof that the sum so demanded by the Committee from the occupier exceeds the rent due at the time of the demand, or which has since accrued due, shall be on the occupier.

(v) All money recoverable by a Committee under this section may be recovered either by suit or on application to the Magistrate having jurisdiction within the cantonment by distress and sale of the moveable property of the person from whom the money is recoverable, and if payable by the owner of the property shall, until it is paid, be a charge on the property.

(vi) Nothing in this section shall affect any contract between an owner and an occupier.

9. (i) Any person aggrieved by any order made by the Superintendent of Police, and in the Cantonment of Aurangabad by the Cantonment Magistrate, under the above rules may appeal within three days from the date thereof to the Cantonment Committee, and no such order shall be liable to be called in question otherwise than by such appeal.

(ii) The Committee may, for sufficient cause, extend the period hereby allowed for appeal.

(iii) The order of the Committee confirming, setting aside, or modifying the order appealed against shall be final. Provided that the order appealed against shall not be confirmed, set aside, or modified until the appellant and the Cantonment Magistrate have had reasonable opportunity of being heard.

FORM 2.—*Receipt.*

FORM 3.—*Pass Book.*

FORM 4.—*Cantonment Fund Cheque.*

FORM 5.—*Register of payments from the—— Cantonment Fund.*

FORM 6.—*Imprest Register of the——Cantonment Fund.*

FORM 7.—*Cash Book of the——Cantonment Fund.*

FORM 8.—*Budget Estimate of receipts into, and expenditure from, the—— Cantonment Fund for the year ——.*

FORM 8, APPENDIX A.—*Detailed list of establishments provided for in the ——Cantonment Fund Budget Estimate for the year——.*

FORM 8, APPENDIX B.—*Detailed list of expenditure provided for in the ——Cantonment Fund Budget Estimate for the year——, other than that included in Appendices A, C and D.*

FORM 8, APPENDIX C.—*Details of Budget Estimate for Original Works (Construction of Buildings, Roads, Latrines, etc) in the ——Cantonment for the year ——.*

FORM 8, APPENDIX D.—*Details of Budget Estimate for Maintenance and Repairs in the——Cantonment for the year——.*

1. (*1*) The Cantonment Fund may be applied to the following purposes within the cantonment, namely:

Application of the Cantonment Fund.

(*a*) the payment of any expenses directed by or under any enactment for the time being in force to be debited to the Fund;

(*b*) the maintenance of the police force employed in the cantonment, including charges of every description required for the efficient discharge of their duties therein;

(*c*) the provision and maintenance of an office for the Cantonment Authority;

(*d*) the payment of the salaries of all Cantonment establishments;

(*e*) the survey of buildings and lands;

(*f*) the management and improvement of lands and other property placed by the Government under the management of the Cantonment Authority, including—

(*i*) the construction and maintenance of roads (other than those maintained from Imperial or Provincial Funds),

(*ii*) the lighting, watering and cleansing of roads, and

(*iii*) the maintenance of public parks and gardens and the planting and tending of trees;

(*g*) the provision and maintenance or aiding of public hospitals, dispensaries and schools;

(*h*) the provision and maintenance of public markets and slaughter-houses;

(*f*) the carrying out of a proper system of conservancy throughout the cantonment for all its inhabitants other than classes of troops for whom conservancy is provided from public revenues other than the Cantonment Funds, including—

(*iv*) the pay of the public conservancy establishments,

(*v*) the construction of public latrines and other conservancy works, and

(*vi*) the purchase of all necessary conservancy carts, utensils and other appliances;

(*k*) the carrying out of proper systems of water-supply and drainage and of other sanitary measures, including public vaccination and the prevention of the spread of infectious or contagious disorders and generally the maintenance of the cantonment in a thoroughly sanitary condition;

(*l*) the burial, burning or other lawful disposal of the corpses of paupers and unknown persons;

(*m*) the abatement of nuisances;

(*n*) the taking of a census; and

(*o*) generally the payment of all expenses incurred—

(*vii*) under any rules made under section 26 of the Cantonments Act, 1889, or

(*viii*) under any enactment extended to the cantonment under section 25 of the Cantonments Act, 1889, or

(*ix*) under any other law for the time being in force.

(*2*) The Cantonment Fund may, with the general or special sanction of the Local Government, be applied to any of the purposes mentioned or referred to in clauses (*a*) to (*o*), both inclusive, of this rule, within or without British India, beyond the limits of the cantonment, in cases in which, in the opinion of the Local Government, the application of the Fund beyond those limits is for the benefit of the inhabitants of the cantonment or of any military force ordinarily quartered therein or of any detachment of any such force.

Estimates and sanctions.

Money not to be paid unless expenditure sanctioned.

2. No money shall be paid from the Cantonment Fund unless the expenditure is either—

(*a*) provided for in the sanctioned Budget Estimate, or by re-appropriation under rule 5, or

(*b*) sanctioned by the Local Government after consultation with the General Officer of the Command, and

(*c*) in the case of expenditure on Public Works unless detailed estimates have been prepared and sanctioned.

Responsibility for administering funds.

3. The responsibility for administering the funds provided in the sanctioned Budget Estimate or sanctioned under rule 2, clause (*b*), shall rest with the Cantonment Authority, under the direction of the General Officer of the Command.

Submission and sanctioning of Budget Estimates.

4. (*1*) On the first day of June in each year or on such other date as the General Officer of the Command may direct, the Cantonment Authority shall submit to the Officer Commanding the district a Budget Estimate of the receipts (including the grant-in-aid, if any,) into and expenditure from the Cantonment Fund for the ensuing financial year.

Such estimate shall be framed in accordance with Form 8 in the schedule, or in such other form as may be from time to time prescribed by the Comptroller-General with the previous sanction of the Governor-General in Council.

(*2*) The Officer Commanding the district may revise such estimates, and shall submit them to the General Officer of the Command.

(*3*) The General Officer of the Command may further revise such estimates, and shall submit them to the Local Government through the Accountant-General by the 20th November.

(*4*) The Local Government may sanction such estimates, with or without modification.

(*5*) The sanction of the Local Governments to such estimates shall be communicated by it—

(*a*) to the Accountant-General, and

(*b*) to the General Officer of the Command, for intimation to the Officer Commanding the district and the Cantonment Authority.

Re-appropriation.

5. (*1*) The Cantonment Authority may,—

(*a*) with the previous approval of the General Officer of the Command, re-appropriate any sum from one major head of the Budget Estimate to another, or,

(*b*) with the previous approval of the Officer Commanding the district, re-appropriate any sum from one minor head or sub-head of the Budget Estimate to another minor head or sub-head under the same major head:

Provided that no allotment to any major head shall by re-appropriation be varied by more than ten *per cent.* of its original amount, except with the previous sanction of the Local Government.

(*2*) A copy of every order made under clause (*a*) or clause (*b*) of this rule shall be sent by the General Officer of the Command, or the Officer Commanding the district, as the case may be, to the Accountant-General.

Payments.

Examination of, and order for payment of claims.

6. (*1*) Every claim for payment from the Cantonment Fund must be presented—

(*a*) to the President of the Cantonment Committee, or,

(*b*) if so directed by the General Officer of the Command, to the Secretary to the Cantonment Committee, or,

(*c*) if there is no Cantonment Committee, to the Commanding Officer of the cantonment,

and must be supported by a voucher duly receipted and, if necessary, bearing a stamp.

(2) The President, Secretary or Commanding Officer, as the case may be, must check and examine every such claim, and if it be found correct, and supported by a voucher as aforesaid, shall sign an order for payment thereof.

(3) If payment is to be made from the imprest the order for payment shall be "Pay in cash rupees (in words)," if payment is to be made by cheque, such order shall be "Pay by cheque No. , dated rupees (in words)," the blanks being filled up when the cheque is signed.

Payments how made.

7. Payments must be made,—

(a) if the sum does not exceed twenty rupees, in cash, and

(b) if the sum exceeds twenty rupees, by cheque.

Cheque.

8. (1) Money may be drawn from the Cantonment Fund only by means of cheques written in Form 4 in the schedule.

(2) No cheque shall be current for more than three months from the date on which it was drawn.

After the expiration of that period payment will be refused at the treasury, and the person in whose favour the cheque was drawn will therefore have to bring it back to be re-dated. No fresh cheque will be issued, the lapsed cheque will simply be re-dated, and the alteration initialled by the official whose duty it would be to sign the cheque under rule. A note of the fact of re-dating shall be entered in the register of payments against the original transaction.

(3) All cheques must be signed,—

(a) if there is a Cantonment Committee,—

(i) where the sum does not exceed one hundred rupees, by the Secretary, or,

(ii) where the sum exceeds one hundred rupees, by the President, and

(b) if there is no Cantonment Committee, by the Commanding Officer of the cantonment.

(4) Cheques drawn in favour of a Government officer must be made payable to order, and cheques drawn in favour of any other person must be made payable to bearer.

(5) All cheque forms must be bound in books with counterfoils.

(6) Every such book must bear a number; and each officer authorised by clause (3) of this rule to sign cheques must notify to the treasury the number of the book which he from time to time brings into use.

(7) On each cheque form there shall be entered the number of the book in which the form is contained and a consecutive number.

(8) There shall be noted on the outside of each cheque book an order to keep the book under lock and key in the personal custody of the officer who is authorised to use the book for the purpose of signing cheques; and when such officer is relieved, he must take a receipt for the number of cheques made over to the relieving officer and must send to the treasury a specimen of the signature of the relieving officer.

Imprest.

9. (1) The Cantonment Authority shall, if it has not already done so, draw from the treasury a sum not exceeding fifty rupees, to form an imprest for the purpose of meeting petty payments.

(2) The amount of petty payments met out of the imprest must be recouped by cheque on the last day of each month, and, if necessary, during the month also, so that the full amount of the imprest, *plus* any sum received too late for remittance to the treasury on the last day of the month, will always be shown in the monthly accounts as being in the hands of the Cantonment Authority.

Overdrafts.

10. Overdrafts on the Cantonment Funds shall be allowed only if approved of by the General Officer of the Command and sanctioned by the Local Government.

Receipts.

Entry and acknowledgment of receipts.

11. (1) All money received for credit to the Cantonment Fund must be entered in a register of receipts kept in Form 1 in the schedule, and, with the exception of grants-in-aid and fines, must be acknowledged by receipts in Form 2 in the schedule.

(2) Such receipts must bear printed numbers in a consecutive series, and the number of each receipt must be entered in the second column of the register of receipts.

Responsibility of Cantonment Authority as to receipts.

12. The Cantonment Authority shall be responsible for making such arrangements as will secure—

(1) that all money received for credit to the Cantonment Fund is duly brought to credit in the accounts;

(2) that all money so received, with the exception of grants-in-aid and fines, is acknowledged by receipts in Form 2; and

(3) that whenever a receipt is given, the foil and counterfoil are correctly filled up.

Account of the imprest.

Account of the imprest.

13. An account of the imprest shall be kept in Form 6 in the schedule, and the expenditure recorded in it must be entered in a register of payments kept in Form 5 in the schedule, when a bill for the recoupment of the amount is made out and the amount is drawn from the treasury by a cheque.

Bills for expenditure.

Expenditure to be entered in bills.

14. (1) All expenditure must be entered in a bill of one of the following kinds, namely:

(a) Establishment Pay Bill—for the pay of members of the Cantonment establishment;

(b) Travelling Allowance Bill for travelling allowances of members of the Cantonment establishment; and

(c) Contingent Bill for all charges other than pay and travelling allowances of

members of the Cantonment establishment.

(2) Every Establishment Pay Bill must be prepared in Civil Account Form.

(3) Every Travelling Allowance Bill must be prepared in Civil Account Form.

(4) Every Contingent Bill must contain full details of the charges incurred.

Note.—Copies of Civil Account Code forms may be obtained on payment from the Accountant-General.

Claims by contractors or tradesmen.

15. (1) Claims for supplies or services by contractors or tradesmen must be paid on bills as presented by them.

(2) When such claims are paid by cheque, the payment must be entered at once in the register of payments (Form 5), and when they are paid in cash, the payment must be entered in the imprest register (Form 6).

When the bills for supplies or services by contractors or tradesmen are in the vernacular, a brief abstract should be endorsed in English, stating the amount, the name of the payee, and the nature of payment in terms of article 9 (*b*) of the Civil Account Code.

Petty charges to be met from the imprest.

16. (1) All petty charges to be met from the imprest must be entered in bills prepared in Civil Account Form.

(2) Such bills must be supported—

(*a*) in the case of all payments for telegrams and in the case of any other payment exceeding ten rupees, by the original vouchers on which the payments were actually made; and,

(*b*) in other cases, by a certificate that the receipts of the payees have, as far as possible, been obtained, and have been so destroyed, defaced or mutilated that they cannot be used again.

(3) The certificate referred to in clause (*b*) of this rule must be signed by the Secretary to the Cantonment Committee, or if there is no Cantonment Committee, by the Commanding Officer of the cantonment.

Charges incurred direct by Cantonment Authority.

17. All charges incurred direct by the Cantonment Authority and paid by cheque must be entered in bills prepared in Civil Account Form.

Certificate on certain bills.

18. The following certificate must be recorded at the foot of every such bill prepared in Civil Account Form, namely:

"I certify that the expenditure charged in this bill could not, with due regard to the interests of the cantonment, be avoided. I have satisfied myself that the charges entered in this bill have been really paid."

This certificate must be signed by the Secretary to the Cantonment Committee, or, if there is no Cantonment Committee, by the Commanding Officer of the cantonment.

In the case of expenditure on Public Works, the usual completion certificate will be furnished.

Entry of cheques in accounts.

Entry of payments by cheque.

19. All payments made by cheque must be entered in the register of payments (Form 5), the vouchers being numbered in a monthly consecutive series.

Deduction of amount of cancelled cheques.

20. If any cheque is cancelled, its amount must be deducted from the expenditure by a *minus* entry in the appropriate columns of the register of payments (Form 5). The deduction will then pass into the Cash Book (Form 7) through the daily total of payments carried into it.

Accounts and returns.

Cash Book.

21. The Cantonment Authority shall keep a Cash Book in Form 7 in the schedule. The Cash Book must be balanced monthly, and the balance shown in it must be reconciled with that shown in the Pass Book (Form 3), as follows:

Balance as per Pass Book	...	...	
Add—			
Amount of imprest	...	...	
Money received too late for remittance to treasury ...	...	...	
		Total ...	
Deduct—Outstanding cheques, as per details below:			
Balance as per Cash Book	...	...	
Cheques outstanding on—			
No.	date	Amount	
		Total ...	

Entry of Budget Estimates in registers of receipts and payments.

22. (1) In the registers of receipts and payments (Forms 1 and 5) the amounts sanctioned in the Budget Estimate for the year must be entered at the top of columns for the heads for which separate estimates are made.

(2) If, during the year, or in any revised estimate that may be sanctioned for the year, any addition to or alteration in the estimates is made, it must be noted in the appropriate register in red ink, with *plus* or *minus* signs, the orders for the addition or alteration being cited.

Totalling of registers of receipts and payments, and watching of budget grants.

23. (1) At the end of each month the figures in the registers of receipts and payments (Forms 1 and 5) must be added up, the totals up to the end of the last preceding month being added to those of the month just expired, and grand totals being made from the 1st April last preceding.

(2) If the grand total under any head in the register of payments shows that the budget grant is likely to be exceeded, application must at once be made for orders under rule 2, clause (*b*), or rule 5, as the circumstances may require, to cover the excess.

Documents to be sent to Accountant-General.

24. As soon as possible within ten days after the end of each month, the Cantonment Authority shall send to the Accountant-General, for purposes of audit—

(*a*) extracts from the registers of receipts and payments for the month, prepared in

the same detail as those registers, and showing the Budget Estimates, each receipt and payment, the monthly totals, the totals to the end of the last preceding month and the grand totals;

(*b*) the foils of all receipts granted during the month;

(*c*) all paid bills;

(*d*) all cancelled cheques (if any); and

(*e*) a statement of the balances, in the following form:

Balance at end of last month ...	
Receipts during the month, as per accompanying schedule ...	
Total ...	
Expenditure during the month, as per accompanying schedule ...	
BALANCE AT THE END OF THE MONTH	
Detail of Balance—	
Balance in treasury, as per Pass Book	
Cash received too late for remittance to treasury	
Imprest in hands of Cantonment Authority	
Deduct—Outstanding cheques, as per details below:	
Net balance as above	
Cheques outstanding on—	
No. date Amount	
Total ...	

Annual consolidated account.

25. (*1*) The Cantonment Authority shall prepare annually a consolidated account showing the receipts into and payments from the Cantonment Fund, classified under the major heads, minor heads and sub-heads contained in the monthly accounts.

(*2*) The total of the details under each head of receipts and payments, as given in the said consolidated account, must agree exactly with the figures appearing against the entry "From 1st April to date" under the same heads in the extracts forwarded to the Accountant-General for the month of March last preceding.

(*3*) The said consolidated account shall be forwarded to the Accountant-General, who will agree the figures with his own classified abstract and then forward the account to the General Officer of the Command with the following endorsement, namely,—

"Examined and found correct.

*Signed*_____ Accountant-General."

Classification.

Classification of receipts and expenditure.

26. (*1*) All receipts into, and expenditure from, the Cantonment Fund shall be classified, in the monthly and annual accounts, in accordance with Form 8 in the schedule.

(*2*) All expenditure must be classified in the monthly accounts under the appropriate major heads, minor heads and sub-heads with reference to the nature of the charge, whether specific budget provision exists or not; and no expenditure which from its nature properly falls under one of the other prescribed heads shall be classified under the head "Miscellaneous" on the ground that there is no specific budget provision for the charge.

N B.—Every permanent advance to a Cantonment Fund receiving a grant-in-aid under rule 28 will be held outstanding in the military accounts until the Fund becomes self-supporting, and the advance will then merely be shown as a balance in the hands of the Cantonment Authority. C. A. Apper Rule;

The Cantonment Fund.

Sums to be credited to Cantonment Fund.

27. There shall be placed to the credit of the Cantonment Fund the following sums, namely:

(*a*) all sums directed by the Cantonments Act, 1889, section 21, sub-section (*1*), or by or under any other enactment for the time being in force to be placed to the credit of the Fund; and XIII c

(*b*) All grants-in-aid and other sums received by the Cantonment Authority in aid of the Fund.

Making and distribution of grants-in-aid.

28. (*1*) The Secretary to the Government of India in the Military Department shall, from time to time, notify to the General Officer of the Command the annual sum, if any, which will from time to time be placed at his disposal by the Government of India as a grant-in-aid to the Cantonment Funds in his command.

(*2*) The General Officer of the Command shall distribute the said sum among the said funds in such proportions as he may think fit.

Remittance to Treasury and Pass Book.

All moneys to be remitted to treasury.

29. The Cantonment Authority shall remit to the treasury all moneys received for credit to the Cantonment Fund.

Procedure for remittances to treasury.

30. (*1*) Remittances to the treasury may be made either daily or weekly as may be most convenient:

Provided that all moneys in hand on the last working day of each month must be remitted on that day.

(*2*) All remittances must be accompanied by a chalan or invoice and by a Pass Book in Form 3 in the schedule.

(*3*) Whenever a remittance is made, the officer in charge of the treasury must acknowledge the receipt of the money by entries in the Pass Book, and must enter on the charge side of the Pass Book particulars of cheques paid up to date as recorded in his register.

(*4*) The Pass Book must be sent to the treasury on the last working day of each month,

whether or not there are any moneys to be remitted to the treasury on that day. The officer in charge of the treasury must then close the Pass Book for the month and enter therein in words the balance in hand and sign the entry.

Supervision of Pass Book by Cantonment Authority.

31. (1) The Cantonment Authority shall examine the Pass Book from time to time, and shall immediately call the attention of the officer in charge of the treasury to any discrepancy that may appear between the credits or debits shown therein and those shown in the Cantonment registers.

(2) The Pass Book shall be written up only by the officer in charge of the treasury or by some member of his establishment, and no entries or marks shall be made therein by the Cantonment Authority or by any member of the Cantonment establishment.

Abstract statement of estimated income and expenditure.

Abstract statement of estimated income and expenditure.

32. The General Officer of the Command shall, on receiving the sanction of the Local Government to the Budget Estimates for the several Cantonment Funds in his Command, forward to the Government of India in the Military Department, to the Commander-in-Chief in India and to the Local Government, for information, an abstract statement of the estimated income of and expenditure from all such funds.

Submission of proposals as to taxation.

Submission of proposals as to taxation.

33. All proposals made by the Cantonment Authority for the imposition, abolition or modification of any tax shall be submitted to the General Officer of the Command for transmission to the Local Government.

Establishments.

Strength and cost of establishments.

34. In determining or altering the strength or cost, or both of any Cantonment establishments, the Cantonment Authority must obtain the previous approval of the General Officer of the Command:

Provided that any alteration which merely involves the employment of temporary establishments for a period not exceeding three months may be made without such approval:

Provided also that every alteration shall be subject to the provisions of rules 2 and 5:

Provided also that the powers of sanction of the General Officer Commanding to the creation of appointments or to alterations in the pay of appointments are subject to the same limits as the powers of Local Governments in respect of appointments, the cost of which is Provincial.

Explanation.—The word "establishments" in this rule does not include police employed in cantonments beyond the limits of a Presidency-town, the strength and cost of such police being determined by the Local Government, with the sanction, or subject to the control, of the Governor-General in Council in pursuance of the following enactments, namely,—

the Cantonments Act, 1889, section 12, XII

Act XXIV of 1859, section 8,

Act V of 1861, section 2,

Bengal Act VII of 1869, section 4,

the Bombay District Police Act, 1867, section 3, Bom 186

the Bombay District Police Act, 1890, section 4. Bom 189

Definitions.

Definitions.

35. In these rules,—

(1) "General Officer of the Command" means the General Officer Commanding the Forces in a Command; and "Command" means one of the principal portions into which the army of India is for the time being divided; and Cf. of 116 S.

(2) "treasury" means the Government treasury or sub-treasury or the bank or office prescribed by or under section 22 of the Cantonments Act, 1889, for the custody of the Cantonment Fund. XII

(3) "Accountant-General" means Civil Accountant-General or Comptroller.

Henry Macan Mason.
Francis Stevenson.
Alfred Astley Pearson.

Dated 19th February 1896.

George Hawkes.

Captains to be Majors.

Dated 11th February 1896.

Devereux Walter Hickman.
Robert Vernon Garrett.
George Steuart Goldsmid.

Dated 12th February 1896.

Ernest Henry Rivett-Carnac.
Thomas Patrick Geoghegan.
John William Currie.
Robert Irvin Scallon, D.S.O.
Frank Gun Delamain.

Dated 23rd February 1896.

George Arthur Gott.

Lieutenants to be Captains.

Dated 14th January 1896.

John Mary Camilleri.

Dated 1st February 1896.

Philip John Miles.
Creighton McCrea Poulter.
Alexander Harry Dennys.

Dated 7th February 1896.

Francis Clifton Muspratt.
Leslie Napier Younghusband.
Charles Astley Fowler.
Frederick Lewis Moore.
Walter Willis Chitty.
Ernest George Rule Wilkins.
Arthur Henry Williams.
Robert Cobb Lye.
Arthur Grant.
Alfred Horsford Bingley.
Alfred Robertson Ditmas.
Edmund Waller.
Frank Murray.
Reginald Edward Foley.
Arthur Blanchard Hawley Drew.
Arthur Langston Pilleau.
Roderick Mackenzie Edwards.
Harry Davis Watson.
Ethelbert William Carrick.
Frederick Alexander Smith.
Thomas Aylett Harrison.
Robert Bruce Berkeley.
Herbert Lance Richardson.
Robert Balmain Low, D.S.O.
Donald Forbes Stuart.
Hugh Newcome Weymouth.
Vincent Alexander Ormsby.
Charles Ellis Hay Erskine.
John Noble Jephson.
Cecil Pender Griffiths Griffin.
Guy Hudleston Boisragon, V.C.
Herbert Graham Stainforth.
Nevile Cracroft Taylor.
Colin Hennessey Read Coles.

Dated 28th February 1896.

Frederick Justin Nelson.
Archibald Francis Pinkney Paxton.
Charles Francis Dobbie.
Arthur Guy Welman Moore.

To be Lieutenants.

Lieutenant Hubert George William Chandler, from the Middlesex Regiment. Dated 11th June 1894, but to rank from 22nd October 1891.

Lieutenant Edward O'Brien, from the Royal Irish Regiment. Dated 2nd July 1894, but to rank from 30th May 1893.

Second-Lieutenant Charles Philip Wynter, from the Suffolk Regiment. Dated 19th September 1893.

Lieutenant James Robert Gaussen, from the Hampshire Regiment. Dated 21st June 1894, but to rank from 31st January 1894.

Lieutenant Robert Holme Bankes Anderson, from the Durham Light Infantry. Dated 10th June 1894, but to rank from 11th April 1894.

Second-Lieutenant Leslie Swinton Browne. Dated 5th March 1895.

The 22nd May, 1896.

No. 245.—The following is published for general information:

No. 96 I., dated Simla, the 19th May 1896.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Administration Report of Irrigation Works in the Madras Presidency for 1894-95.

OBSERVATIONS.—There are ten Major Works in the Madras Presidency, of which nine are classed as Productive, and one, the Rushikulya project, as

Protective. All of the productive works are in operation with the exception of the Periyár project, which is still under construction, and the construction estimates of seven of them have been closed.

The number of Minor Works for which Capital and Revenue Accounts are kept was raised during the year from 24 to 26 by the inclusion of the Ganjam minor rivers system and the Nandyar channel in the Trichinopoly district. Of these Minor Works twenty-two are irrigation systems, and four are tidal canals intended for navigation only. They are all in operation with the exception of the Munnyeru, Dondapad, Sagileru, and Nandyar channel projects and the Ganjam-Gopalpur tidal canal, and the construction estimates of all have been closed with the exception of the following six projects: the Buckingham Canal, the Cumbum tank, and the Palar, Poiney, Cheyáru, and Lower Coleroon anicut systems.

2. The Capital Outlay incurred on the Major and Minor Works during and up to the end of 1894-95 was as follows:

	Number of Works.	During the year 1894-95.							Total direct and indirect to end of 1894-95.
		Works.	Establishment.	Tools and Plant.	Suspense Account.	Total direct charges.	Indirect charges.	Total direct and indirect charges.	
1	2	3	4	5	6	7	8	9	10
Major Works.		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Protective Irrigation Works (Account head 35).	1	2,45,747	52,613	11,366	...	3,09,726	26,702	3,36,428	40,10,884
Irrigation Works not charged against Revenue (Account head 49).	9	10,67,083	2,39,215	1,11,723	—807	14,17,214	49,659	14,66,873	6,30,22,149
Minor Works and Navigation.									
Works for which Capital and Revenue Accounts are kept (Account head 43).	23*	3,24,597	72,866	11,659	...	4,09,122	12,824	4,21,946	1,60,38,589
TOTAL ...	33	16,37,427	3,64,694	1,34,748	—807	21,36,062	89,185	22,25,247	8,30,71,622

* Exclusive of the Ganjám minor rivers system, the Nandyar channel and the Védáranniyam Canal, for which complete Capital Accounts to end of 1894-95 have not yet been prepared.

3. Under Major Works, the Capital Outlay was incurred chiefly on the Kistna, Periyar, and Rushikulya projects. The Capital Outlay on the Kistna delta system was Rs. 4,29,197, including indirect charges, and was incurred on various improvements to head-works, canals and distributaries.

The Capital Outlay on the Periyar project amounted to Rs. 9,82,563, including indirect charges. The work in the head-works subdivision was again impeded by an outbreak of cholera at the beginning of the year, but good progress was made nevertheless with the dam. Its average height was raised from 68 feet to 115 feet, the addition representing 1,552,656 cubic feet of material.

The boring of the water-shed tunnel was completed and the masonry work at the mouth of the tunnel put in hand. In the Madura Division 36 miles of canals and 70¾ miles of distributaries were completed up to the end of the year.

The Capital Outlay on the Rushikulya project was Rs. 3,36,428, including indirect charges. The Russellkonda reservoir dam and head sluice were completed, and water was let down the whole length of the Rushikulya Canal in August 1894.

Under Minor Works the principal Capital Outlay incurred was on the Sagileru project and on the Buckingham Canal.

On the Sagileru project the Capital Outlay was Rs. 84,085, including indirect charges. Good progress was made with the anicut, head and scouring sluices and supply channel, and materials were collected for a few masonry works.

On the Buckingham Canal the Capital Outlay was Rs. 1,67,452, including indirect charges. Seven locks were completed and some improvements and diversions were in progress.

4. Of Major Works the length of completed main canal was 2,054 miles and of distributaries 5,652. The aggregate length of navigable channels of both Major and Minor Works was 1,294 miles.

5. The following statement shows the revenue receipts and working expenses of each work in operation for which Capital and Revenue Accounts are kept :

Serial number.	System.	Capital outlay.	Gross Revenue Receipts, 1894-95.			Working Expenses.			Net actual revenue.	Deduct receipts less maintenance charges on account of old irrigation.	Net revenue attributable to outlay of Government capital.	Percentage of return.
			Irrigation revenue.	Miscellaneous receipts.	Total.	Direct.	Indirect.	Total.

	TOTAL FOR 1893-94 ...	1,34,06,370	17,39,681	1,27,874	18,67,555	3,69,902	8,018	3,97,920	13,69,635	7,18,088	7,00,635	5'20

(a) Exclusive of the revenue of the year derived from the system in the Trichinopoly district and inclusive of Rs. 6,50,197, the revenue of the previous year brought into account in 1894-95.

6. Comparing the results of the year's working with the figures of 1893-94, the gross revenue derived from Major Works shows a satisfactory increase of Rs. 14,28,463. There was also an increase of Rs. 34,318 in the working expenses, so that the increase in the net revenue amounted to Rs. 13,94,145; of which Rs. 12,38,272 was due to old irrigation and the balance Rs. 1,55,873 is attributable to outlay of Government capital. The net revenue from Major Works is equivalent to a return of 7·61 per cent. on the Capital Outlay as compared with 7·45 per cent. in the previous year.

7. The net revenue derived from Minor *Irrigation* Works was Rs. 6,71,831, representing a return of 9·45 per cent. on the Capital Outlay as against 11·57 per cent. in 1893-94.

Of the four Minor *Navigation* Works, the Buckingham Canal alone paid its working expenses, the gross revenue exceeding them by Rs. 7,891. The net deficit on the other three works was Rs. 3,336, or Rs. 546 more than in 1893-94.

8. The total irrigation revenue from Major Works during 1894-95 amounted to Rs. 1,02,73,852, inclusive of Rs. 6,50,297 brought into the accounts of the year on account of the irrigation revenue of the previous year of the Cauvery Delta system. But as the revenue information for the Trichinopoly portion of the Cauvery Delta system was not received in time, the amount credited in the accounts of the Public Works Department for 1894-95 was only Rs. 1,00,27,139. Of this, Rs. 95,43,645 represented the share of land revenue on account of water supplied from the canals, and the balance Rs. 4,83,494 was the irrigation share of enhanced land revenue.

9. The statement below shows the irrigation receipts and the areas irrigated under first and second crops:

System.	Revenue derived from irrigated lands.		Area charged as irrigated.		Rate per acre.	
	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.
1	2	3	4	5	6	7

Total Irrigation Works not charged against Revenue	1,00,27,139	86,05,260	2,520,599	2,460,192	3·9	3·5
Minor Works.						
I.—Irrigation.						
Total ...	17,08,877	17,39,681	463,064	471,676	3·7	3·7
GRAND TOTAL ...	1,17,36,016	1,03,44,941	2,983,663	2,931,868	3·9	3·5

The area under Major Works charged as irrigated exceeded the area of the previous year by 60,407 acres, and there was a corresponding increase of Rs. 3,67,998 in the revenue assessments.

10. The following table gives details of the average water-rate per acre for first and second crops under Major Works, excluding areas irrigated free of charge:

—	First crop.						Second crop.
	Government lands.		Zemindari lands.		Inam lands.		
	Wet crop.	Dry crop.	Wet crop.	Dry crop.	Wet crop.	Dry crop.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Godavari delta	4·01	2·11	4·06	2·45	4·01	2·56	2·53
Kistna	4·08	3·28	3·88	2·68	4·08	3·35	2·88
Penner anicut	4·52	3·16	...	...	4·07	3·25	2·57
Sangam	4·59	3·74	...	...	3·87	3·27	2·91
Karnul-Cuddapah Canal	4·10	1·87	...	...	3·90	2·33	2·92
Barur tank	3·76	3·80	4·00	...	4·00	3·67	1·26
Cauvery delta	4·69	3·00	...	...	3·96	3·11	3·71
Srivaikuntham anicut	6·25	3·42	3·93	3·06	4·00	3·50	3·23
Rushikulya project	1·94	2·27	2·11	...	2·07	1·98	1·11

11. The area irrigated under first crop on the Major Works was 2,235,404 acres and under second crop 227,957 acres, making a total of 2,463,361 acres. These figures are less than those shown in column 4 of the table in paragraph 9, as the latter includes the extent of "waste charged."

Of the total area of 2,463,361 acres, 2,390,653 acres were irrigated by flow and 72,708 acres by lift, or about 97·05 per cent. and 2·95 per cent., respectively.

12. The following statement shows the details of the working expenses, including the old maintenance charges for each of the Major Systems and for the Minor Systems in the aggregate:

Systems.	1894-95.					1893-94.
	New works and repairs.	Establishment.	Tools and plant.	Indirect charges.	Total.	Total.
Major Works.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Godavari	2,11,002	3,25,053	45,582	35,044	6,48,501	6,24,380
Kistna	2,17,534	2,63,048	37,233	23,500	5,42,215	5,93,819
Penner	24,787	29,818	...	3,182	57,787	57,443
Sangam	33,129	35,121	182	3,777	72,209	77,223
Karnul	75,092	29,326	1,078	3,374	1,09,680	1,42,842
Barur	2,831	1,830	...	201	4,862	4,912
Cauvery	85,918	3,20,662	108	39,666	4,52,354	3,55,830
Srivaikuntham	15,221	19,109	...	1,989	36,319	37,907
Rushikulya	11,239	4,003	48	376	15,666	10,919
Total Major Works ...	7,08,483	10,35,770	84,231	1,11,109	19,39,593	19,05,275
Per acre irrigated ...	...	...	...	...	0·79	0·77
Minor Works and Navigation ...	2,39,785	1,11,791	4,348	10,850	3,66,774	2,97,930
Grand Total ...	9,48,268	11,47,561	88,579	1,21,959	23,06,367	22,03,205

The cost of maintaining the Major Works during the year was 19·00 per cent. of the gross revenue and 23·4 per cent. of the net revenue derived from them, against 21·6 per cent. and 27·6 per cent., respectively, in the previous year.

13. The charge for establishment in column 3 of the statement in the last paragraph is made up as follows:

—		Major works.	Minor works and navigation.	Total.
		Rs.	Rs.	Rs.
Revenue management	Direction and execution	5,89,307	12,986	6,02,293
	Collection charges ...	2,90,123	44,919	3,35,042
	Total ...	8,79,430	57,905	9,37,335
Maintenance of works	... ...	1,56,340	53,886	2,10,226
	Grand Total ...	10,35,770	1,11,791	11,47,561

The cost of revenue management on the Major Works was 8·6 per cent. of the gross revenue realized from them.

14. The estimated value of the crops irrigated by the Major Works and the Minor Works in operation and for which Capital and Revenue Accounts are kept was 669 lakhs of rupees. Eighty-nine per cent. of the total area irrigated by these works was under rice crop.

15. The following table gives the details regarding navigation on the four principal canals:

—	Length of navigable canals.	Receipts.	Expenditure.	Value of goods.	Ton-mileage.	Passengers.
	Miles.	Rs.	Rs.	Rs.		
Godavari delta canals ...	493	1,03,892	81,261	2,30,52,554	11,967,929	256,612
Kistna delta canals	307	37,222	64,921	1,19,75,805	12,583,540	117,337
Karnul-Cuddapah canal ...	190	1,457	10,102	2,39,050	151,365	32
Buckingham canal	262	1,07,784	62,885	1,78,53,374	25,975,977	93,825
Total for 1894-95 ...	1,252	2,50,355	2,19,169	5,31,20,783	50,678,811	467,806
Total for 1893-94 ...	1,242	2,41,542	2,27,655	5,40,74,418	45,552,974	486,368

16. The following table gives details regarding works for which neither Capital nor Revenue Accounts are kept:

Class.	Area, first and second crops.	Irrigation revenue.	Rate per acre	Outlay, direct and indirect, and collection charges.	Rate per acre.
	Acres.	Rs.	Rs.	Rs.	Rs.
I. Works under Public Works Department for which a continuous record of expenditure is kept individually...	230,949	8,02,518	...	...	...
II. Other works under Public Works Department	1,328,053	37,52,115	...	...	...
III. Works under the Revenue Department	1,675,631	38,84,222	...	...	...
Total, 1894-95 ...	3,234,633	84,38,855	2·61	a)17,59,321	0·54
Total, 1893-94 ...	3,373,871	90,69,303	2·54	17,46,915	0·49

(a) Inclusive of Rs. 3,56,484, the outlay incurred by Civil officers and not included in the accounts of the Examiner of Public Works Accounts.

The total area irrigated was made up of 2,467,109 acres of first crop and 767,524 acres of second crop, and the irrigation revenue was Rs. 6,30,448 less than in the previous year. The decrease occurred chiefly under works in the Cuddapah, Anantapur, Chingleput, North Arcot, Madura and Tinnevelly districts owing to deficient rainfall.

17. The following statement shows the outlay on Agricultural Works, *i.e.*, river conservancy and embankments:

	Rs.	Rs.
Original Works	83,869	
Repairs	2,13,265	
		2,97,134
Establishment		64,423
Tools and plant		4,032
Total ...		3,65,589

The receipts realized from the plantations along the river embankments amounted to Rs. 26,979 against Rs. 43,777 in the previous year.

18. Six investigating parties were at work on the Tank Restoration scheme, the expenditure on which during and up to the end of the year was as follows :

	Expenditure during 1894-95.					Expenditure to end of 1894-95.
	Works.	Repairs.	Establishment.	Tools and plant.	Total.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Execution	2,41,375	1,19,657	82,355	5,392	4,48,774	41,24,193
Investigation	216	...	55,341	579	56,136	12,25,470
Total ...	2,41,591	1,19,657	1,37,696	5,971	5,04,910	53,49,663

Up to the end of the year 31,377 square miles had been completely investigated and estimates for 4,315 works to the amount of Rs. 45,66,193 had been sanctioned.

19. The following figures relate to the discharge of some of the principal canals which are not supplied mostly from storage works, and the areas irrigated from them :

	Area actually irrigated, first crop.	Maximum discharge as designed.	Maximum discharge during the year.	Average discharge at head.	Acres irrigated per cubic foot per second of average discharge.
	ACRES.	CUBIC FT. PER SECOND.	CUBIC FT. PER SECOND	CUBIC FT PER SECOND.	FIRST CROP.
Godavari	654,126	(a) 8,516	13,176	7,006	93·36
Kistna	544,812	8,120	9,184	4,508	114·20
Penner	64,508	2,300	1,004	371	173·87
Sangam	70,517	4,800	5,361	670	105·25
Karnul	25,832	1,468	935	563	45·88
Cauvery	855,258	Not known.	28,460	11,252	76·01

(a) Previous to the construction of the extra vents built in 1887-88 to the Dowlaishweram head sluice.

20. During the year the investigation of the Mellavagu, Atmakur and Manchikalla projects in the Kistna Northern Division were put in hand.

21. The report was received by the Government of India on the 4th February 1896, and is accompanied, in addition to the usual appendices, by a descriptive note of the Kistna Delta system illustrated by photo. prints.

ORDER.—Ordered, that copies of this review and of the report be forwarded to the Revenue and Agricultural Department for information.

Ordered also, that copies of this review be forwarded to the Government of Madras and to the Local Governments and Administrations in the Public Works Department noted in the margin, for information.

The Governments of Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces and Burma.
The Agents to the Governor General in Rajputana and Baluchistan.

Ordered further, that this review be published in the *Gazette of India*, and that copies of the review be forwarded to Her Majesty's Secretary of State for India.

W. S. S. BISSET, *Colonel, R.E.*,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 16th, 1896.

During the past week pressure has been very unsteady over India, and the barometric changes from day to day have been large. This has been particularly the case over North-Western India, where a series of depressions has appeared and disappeared accompanied with brisk to rapid rises and falls of the barometer. Another marked feature in the weather has been the exceptionally low pressures which have existed over the central parts of the country. This abnormal distribution has resulted in easterly winds over the Gangetic Plain. These winds held during the first five days of the week, but on Friday a barometric rise occurred over the Peninsula accompanied with a fall over Northern India, and as a consequence the low pressure area was transferred northward. A considerable change then occurred in the winds, and on the 15th and 16th some examples of the ordinary hot north-westerly winds were reported from the Gangetic Plain. Rain fell during the first few days of the week over North-Eastern, North-Western, and Southern India, but on the 14th it practically ceased in the north-west and in the south, but the fall continued in the north-east until the close of the week. The mean temperature of India was excessive throughout, the amount of the excess gradually increasing from the 12th onward, and on the 15th and 16th amounting to as much as 3½°. Burma, Bengal, and the North-Western Provinces had each one day during the week with a lower temperature than the normal, but on all other days in these three provinces and on all days in the remaining provinces the mean temperature was steadily excessive.

Daily Summary.—*Sunday, May 10th.*—The barometer was rising almost everywhere, the increase in the north-west being brisk to very rapid. The depression over the Punjab had filled up considerably and passed north-eastward to the neighbourhood of Lahore and Ludhiana. Readings were highest over the west of the Peninsula, Ceylon, and Tenasserim, and lowest over the Punjab. The winds were westerly and north-westerly over the Peninsula, southerly over the north of the Bay, and easterly over Bengal and the Gangetic Plain. The mean temperature was low over Bengal, Orissa, and Ganjam, and excessive elsewhere. Scattered dust and thunder storms occasioned rain over parts of North-Eastern, North-Western, and Southern India. The largest amount received was 1·58 inches at Jessore.

Monday, May 11th.—Pressure continued to rise almost everywhere, the change continuing brisk to rapid over Northern India. The depression over the Punjab had ceased to exist, but a trough of low pressure ran north-north-eastward from Vizagapatam to Mooltan. Readings were highest in the west of the Peninsula and Ceylon. The winds were generally westerly and north-westerly over the Peninsula and the central parts of the country and were south-easterly to easterly over Northern India. The mean temperature was low over

Bengal and the north of the Punjab, and generally excessive elsewhere. Thunder and dust storms had again given rain to North-Western, North-Eastern, and Southern India. The heaviest fall reported was 1·33 inches at Ranchi.

Tuesday, May 12th.—Pressure was falling over the greater part of the country. The general distribution was very little changed, but a well defined centre of depression was shown over the east of the Central Provinces. The winds remained westerly and north-westerly over the Peninsula and easterly over Northern India. The mean temperature was in defect of the normal over Lower Bengal, the Gangetic Plain, and the Northern Punjab, and in excess elsewhere. Rain had fallen in moderate amounts over East Bengal, and as light showers over Burma, Assam, Orissa, the Gangetic Plain, the North-Western Himalayas, and the south of the Peninsula. The largest amount was 1·49 inches at Barisal.

Wednesday, May 13th.—The barometer had fallen everywhere, the decrease having been brisk to rapid all over Central and Northern India. A small depression was shown over the Western Punjab, and a large low pressure area over the Gangetic Plain, West Bengal, and the Central Provinces. The winds were cyclonic in the north-west, but were practically unchanged elsewhere. The mean temperature was low over the Delhi and Meerut districts, but was high in nearly all other places. Showers had been received fairly generally over North-Eastern India and at one or two stations in the Gangetic Plain and the Peninsula. The heaviest fall was 1·00 inch at Silchar.

Thursday, May 14th. —The barometer had fallen, except over the Peninsula. The fall had been brisk in the north-west. Slight depressions were shown, one over the Western Punjab, a second over the south of the Central Provinces, a third over West Bengal, and a fourth over the Irrawaddy Valley Readings were highest over the west of the Peninsula, and gradients were steep in that region. The winds were again cyclonic in the north-west, and the only change of importance was a shift to south-west over the Gangetic Plain. The mean temperature was excessive at all stations, except one or two in Orissa and Lower Burma. Rain had occurred over East Bengal, Assam, Burma, and the extreme south of the Peninsula. The heaviest amount reported was 1·42 inches at Tinnevelly.

Friday, May 15th.—The barometer had changed only slightly. A depression was shown over the western desert, and a trough of relatively low pressure over the Gangetic Plain, while readings were highest over the west of the Peninsula. Gradients were steeper than usual, but the general distribution of pressure was less abnormal than of late. North-westerly winds were reported from Cawnpore and Allahabad, and calms from several stations in Northern India, but otherwise the winds were little changed. The mean temperature was almost everywhere excessive. Showers had occurred in North-Eastern India.

Saturday, May 16th.—Pressure had increased over Sind, the Bombay Presidency, and Malabar, and had decreased elsewhere. A depression was shown over the Central Punjab, and a second over West Bengal, while readings were relatively low over the Gangetic Plain. Pressure was highest over the west of the Peninsula, and gradients were steep over Southern and Central India. The winds were very variable over the Punjab, Gangetic Plain, and West Bengal, but were

unchanged elsewhere. The mean temperature was low over Lower Burma, but was excessive all over India. Rain had fallen over North Bengal, Assam, and Burma. In parts of Burma the rainfall was moderately heavy.

Temperature.—At the commencement of the week the mean temperature, though generally excessive, exhibited some areas of deficient heat. On the 10th these areas covered Bengal, Orissa, Ganjam, and the Northern Punjab; on the 11th Bengal and the Northern Punjab; and on the 12th Lower Bengal, the Gangetic Plain, and the Northern Punjab, but on the 13th these areas practically ceased to exist, and, except locally at one or two stations, the heat was excessive throughout the whole Indian region. These temperature conditions lasted during the 14th and 15th, but on the 16th a brisk to rapid fall of temperature occurred over Lower Burma, and a well marked cool area appeared there.

The absolutely greatest excess of temperature relatively to the normal on each day was as follows:

May 10th	. . . . .	Sirsa . .	+8·3°
„ 11th	. . . . .	Sibsagar . .	+6·8°
„ 12th	. . . . .	Dhubri . .	+6·3°
„ 13th	. . . . .	Salem . .	+6·7°
„ 14th	. . . . .	Secunderabad .	+7·2°
„ 15th	. . . . .	Sirsa . .	+9·1°
„ 16th	. . . . .	Mooltan . .	+9·8°

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Province.	May 1896.							Mean variation of week.
	10th	11th	12th	13th	14th	15th	16th	
	°	°	°	°	°	°	°	°
Burma	+0·8	+2·2	+3·1	+1·6	+1·4	+0·9	−1·3	+1·2
Bengal and Assam . .	−0·7	+0·2	+1·5	+1·9	+2·6	+3·5	+3·4	+1·8
North-Western Provinces and Oudh	+1·8	+2·3	−0·3	+0·9	+2·1	+4·7	+6·1	+2·5
Punjab	+4·0	+0·2	+0·5	+0·9	+3·9	+6·6	+7·2	+3·3
Bombay	+2·0	+1·4	+1·0	+2·1	+2·1	+1·0	+1·4	+1·6
Central Provinces and Berar	+3·1	+0·6	+2·3	+3·8	+3·7	+3·8	+3·1	+2·9
Central India and Gujarat .	+1·6	+1·5	+2·5	+2·8	+3·2	+3·4	+2·1	+2·4
Sind and Rajputana . .	+2·9	+1·4	+2·7	+3·1	+4·3	+4·6	+4·5	+3·4
Madras	+1·3	+2·1	+2·7	+3·2	+3·2	+3·3	+4·4	+2·9
Mean for whole of India .	+1·9	+1·3	+1·8	+2·3	+2·9	+3·5	+3·4	+2·4

On each day of the week the mean temperature of the whole country exceeded the average. On the 11th, 13th, 14th, and 15th the mean temperature was excessive in all provinces, but on the 10th, 12th, and 16th slightly deficient temperatures were reported from some parts of the country. The provincial variations show that the heat was most excessive over the Punjab, Sind, and Rajputana, and least so in Burma.

The following were the highest temperatures throughout India recorded on each day:

May 10th	114·9°	at	Montgomery.
„ 11th	113·4°	„	Chanda.
„ 12th	111·7°	„	Khammamett.
„ 13th	113·4°	„	Chanda.
„ 14th	116·1°	„	Jacobabad.
„ 15th	117·1°	„	„
„ 16th	117·1°	„	„

Rain.—During the past week rain in greater or less amount has fallen throughout Burma, Assam, Bengal, the Gangetic Plain, and the Punjab, as well as in part of the south of the Peninsula, while in other parts of the Peninsula, over the central parts of the country, and over North-Western India, excepting the Punjab, the weather has been fine. In Burma the rainfall occurred first in the upper parts of the country, and generally accompanied thunderstorms and nor'-westers, but subsequently the fall extended to Lower Burma, and at the close of the week moderate steady rain was reported from that region. In Bengal and Assam the weather was showery, and most of the rainfall occurred during thunderstorms, while in the Gangetic Plain and the Punjab this was invariably the case. In the south of the Peninsula thunderstorms were also the principal cause of rain. In North-Eastern India, including Burma, Assam, and Bengal, rain fell throughout the week; in the Gangetic Plain the showers mainly occurred during the first-half of the week; and in the Punjab and the south of the Peninsula in the beginning of the week. The concluding table gives the rainfall data. Rain fell during the week in forty out of the fifty-seven rainfall divisions, which was about the same proportion as was reported last week. Of these forty divisions there were thirteen, which received an average fall for the week of less than one-tenth of an inch, so that the number of divisions which received effective rainfall was only twenty-seven, which is four less than was the case last week. The average actual rainfall was heaviest, 5·44 inches, in Tenasserim; this was followed by 3·58 inches in Assam (Surma), by 2·52 inches in Lower Burma, by 2·45 inches in North Bengal, and by 2·32 inches in Assam (Hill Tracts), while Upper Burma, East Bengal, Deltaic Bengal, the Bengal, Hills, and Assam (Brahmaputra) had average falls exceeding 1 inch. These were the heaviest amounts recorded. The area of effective rainfall included all the Burma, Assam, and Bengal divisions, Northern Oudh, the west submontane division of the North-Western Provinces, the hill division of the North-Western Provinces, the hill and northern divisions of the Punjab, Malabar, Madras (South-Central and South), and the East Coast (North and South). Except in these divisions the rainfall of the week was actually or practically *nil*. The second column of the table shows the normal average rainfall for the week. The amounts range from about 5½ inches in Tenasserim to only a few hundredths in the extreme north-west of India. The third column shows that over by far the greater part of the country the actual rainfall of the week has been less than the normal. In Tenasserim, Deltaic Bengal, Central Bengal, Orissa, and the North-Western Provinces (Submontane, West) there has been a trifling excess, and in North Bengal, the Northern Punjab, and Southern Madras there has been a moderate excess, but in all other places there

has been greater or less deficiency. This deficiency exceeds 2 inches in Arakan, and 1 inch in Central Burma, Assam (Hill Tracts and Brahmaputra), the Bengal Hills, Malabar, and Coorg.

The three concluding columns of the table exhibit the state of the seasonal rainfall. There is now no division showing any decided excess, the actual and normal amount for Rajputana (West) being now almost exactly the same. The following divisions, however, exhibit about a normal fall, that is, a fall differing by less than 20 per cent. from the average, *viz.*, Tenasserim, Assam (Surma, Hills, and Brahmaputra), North Bengal, and Rajputana (West). The above shows that compared with last week the condition of the seasonal rainfall is slightly less satisfactory than it then was. The principal deficiency is shown over the Gangetic Plain, the Central Provinces, and the northern parts of the Bombay Presidency, where little or no rain has been received throughout.

The following are the principal totals recorded during the week:—Bilin (Thaton) 9·40 inches, Mogok 5·23 inches, Brahmanbaria (Tippera) 8·39 inches, Sunamgunj (Sylhet) 8 84 inches, Magura (Jessore) 5·06 inches, Bhagatpore (Jalpaiguri) 7·44 inches, Omalur (Salem) 3·25 inches, Dindigul (Madura) 4·13 inches.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *21st May 1896.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 16th May.*—Rainfall moderate in parts of the Circars, Central, and Southern districts; no rain in the Deccan and Carnatic. The rainfall to date is generally deficient. Agricultural operations are proceeding slowly. Harvesting operations still continue with moderate yield. Pasture is scarce, but fodder is available. The condition of cattle is generally good. Prices have risen in parts of the Circars and in a few other districts, but elsewhere prices are generally stationary.

Bombay.—*For week ending 19th May.*—Slight rain fell in parts of Satara, Belgaum and Dharwar. The standing crops are good. Cotton-picking continues in parts of Ahmedabad, and harvesting of the late crops is in progress in five districts. Preparations for next season are progressing generally. Fodder is insufficient in parts of Sind. Agricultural stock are in good condition, except in parts of five districts. Prices are normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 18th May.*—General rain has fallen in Bengal and scattered showers are reported from the east of Bihar and from Orissa and Chota Nagpur. The rain has much improved the standing crops and has largely supplied the want of drinking water. Ploughing is in progress, and the autumn rice and jute are being sown in some districts; the winter rice is also being sown. More rain is generally wanted, except in East and North Bengal and in parts of Central Bengal where there has been sufficient rain for the present. The price of common rice is said to be on the increase in several districts, especially in those of Central and Eastern Bengal.

North-Western Provinces and Oudh.—*For week ending 20th May.*—Unsettled weather continued during the week. Storms accompanied by rain and hail are reported from the hill, Western, Central and sub-montane districts. Slight injury to the extra crops has been caused by hail in Azamgarh. Preparations for the autumn crop sowings are in progress. Cane, indigo and the extra crops are doing well, but indigo has been damaged by insects in Budaun. Irrigation is being carried on where practicable. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, May 16th, were—Banda 1,17,815, Hamirpur 48,646, Jhansi 35,595, Jalaun 31,479, Allahabad 6,437, Pilibhit 2,423, Garhwal 1,806, Almora 912—total 2,45,113; of this number 31,824 dependants were gratuitously relieved on the works, and 6,835 persons received relief under other provisions of the Famine Code. The numbers employed on village works were—Hamirpur 19,719 and Jalaun 2,093; the Banda and Jhansi figures have not been reported. Supplies are generally sufficient, but are somewhat short in Hardoi and Kheri. Fodder is becoming scarce in places and dearer in price in Hamirpur. Cattle are said to be suffering for want of fodder. Water is reported deficient in Bijnor, Banda and Lucknow. Prices continue to rise; they vary from a maximum of 11 seers the rupee for wheat to 16 seers the rupee for gram.

Punjab.—*For week ending 20th May.*—Rain has fallen in all districts, except Amritsar, Sialkot, Mooltan, Peshawar, and Gujranwalla. The spring crops are being harvested in Hissar, Lahore, Shahpur and Gurgaon. Threshing operations still continue in Ferozepore, Sialkot, Rawalpindi and Dera Ismail Khan. Weeding of the autumn, cotton and sugarcane crops has commenced in Jullundur and Sialkot. Sowings of the autumn crops are in progress in the Lahore, Mooltan, Shahpur, Rohtak, Gurgaon and Gujranwalla districts. Rain is wanted for the autumn ploughing in Hissar. The condition of the standing extra spring crops is good in Amritsar, Lahore, Dera Ismail Khan and Karnal, and average in Rohtak and Gurgaon. The melon crops are suffering in Umballa and Rawalpindi for want of rain, and the extra spring crops are being watered from wells. The condition and prospects of the spring crops are generally reported average in irrigated lands, and below average in unirrigated tracts. Stocks of food-grains are insufficient in parts of Lahore and Shahpur, but are fair in Peshawar and are sufficient elsewhere. The extra spring crops have been slightly injured by hail in part of the Dera Ismail Khan district. A hurricane on Sunday caused some loss, especially of straw on the threshing floors in Gujranwalla; high winds caused some damage to fruit in Karnal. Cattle are in poor condition in Hissar and Umballa and are dying of starvation owing to want of fodder and water. Fodder is scarce in all districts, except Jullundur, Ferozepore, Sialkot, Mooltan, Dera Ismail Khan and Peshawar. Prices are normal in Ferozepore, Shahpur and Dera Ismail Khan, but are rising in parts of Gurgaon and are high elsewhere.

Central Provinces.—*For week ending 20th May* —The weather continues to be occasionally cloudy with very oppressive heat and high winds. Preparation of the land for the autumn sowings is in progress. Scarcity of water and fodder continues to be felt in places. Relief works have been started in all tahsils of the Jubbulpore district. Prices are above normal in Damoh, Jubbulpore, Seoni, Hoshangabad, Raipur and Bilaspur; elsewhere prices are normal.

Burma.—*For week ending 16th May.*—In Upper Burma reaping of dry-weather paddy is still in progress in some districts. Ploughing for the main wet-weather paddy crop has commenced in the Ruby Mines and Shwebo districts and for other wet-weather crops in Thayetmyo, Minbu, and Magwe. Cotton is being sown in the Myingyan district. The standing crops generally are in good condition, but *jowar* (*Sorghum vulgare*) in the Salin township of the Minbu district is suffering from drought. The price of paddy has risen slightly in Rangoon, but has fallen slightly in Prome and Myaungmya; elsewhere prices are stationary.

Assam.—*For week ending 19th May.*—The weather is seasonable. Sowing of the early rice has advanced. Planting of sugarcane is progressing. Prospects of tea are good. The condition of cattle is fair; and fodder and water are sufficient.

Mysore and Coorg.—*For week ending 20th May.*—MYSORE.—Slight rain has fallen in parts. The standing crops are in good condition. Prices have risen slightly in Tumkur, but have fallen in Kadur.

COORG.—Rainfall slight. Ploughing for rice and sowing of *ragi* (*Eleusine coracana*) have commenced. The coffee berries are developing. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 20th May.*—BERAR.—The weather is very warm. Land is being prepared for the autumn sowings. Scarcity of fodder and water continues in most parts of the province. Prices are almost stationary.

HYDERABAD.—No rain during the week. Harvesting of the crop on irrigated areas continues. Fields are under preparation for the autumn crop. Fodder is getting scarce, and the water-supply is also decreasing. Prices are almost stationary.

Central India.—*For week ending 20th May.*—No rain fell in Central India during the week. Ploughing for the autumn crop has commenced in two Agencies. The outturn of the winter crops will be below average in Bhopal, Baghelkhand, Goona and in some districts of Gwalior owing to want of rain. Pasturage is sufficient, except in a few districts of Gwalior. Prices of food-grains are above normal in Bundelkhand, Baghelkhand, Goona and in a few districts of Gwalior; elsewhere prices are normal. The numbers on relief works in Gwalior and Bundelkhand are 6,073 and 10,070 respectively.

Rajputana.—*For week ending 20th May.*—Agricultural operations are generally satisfactory, except in Merwara where the harvest is poor. Ploughing for the autumn crop is in progress in Meywar and Kotah. The crops are very poor in Jaisalmere. Agricultural stock are generally in good condition, but are suffering in Ulwar and parts of Meywar and Jaisalmere for want of fodder. Pasturage or fodder is scarce in Meywar, Tonk, Shahpura, Jeypore, Ulwar and Jaisalmere. Fodder is becoming scarce in Ajmere-Merwara and is failing in Dholepore and Bhurtpore, but is sufficient elsewhere. Prices are rising in six States, and fluctuating in one, but are steady elsewhere. In Marwar 3,833 persons are on relief works, and 360 on gratuitous relief; in Shahpura 235 are on relief works, and 42 on gratuitous relief; in Merwara 2,497 are on relief works; in Ulwar 6,592 are on relief works; in Bikanir 2,216 are on relief works, and 318 on gratuitous relief; in Jaisalmere 468 are on relief works, and 41 on gratuitous relief.

Kashmir.—*For week ending 19th May.*—KASHMIR VALLEY.—The spring crops are excellent. Rice and maize sowings are still in progress. Rapeseed is being sickled. Prices continue normal.

JAMMU PROVINCE.—*For week ending 15th May.*—No rain. The spring harvesting is in progress. Cattle are in fair condition. Prices are falling.

Nepal.—*For week ending 16th May.*—A little rain has fallen, and the weather is cloudy. More rain is required for the early rice and Indian-corn, the sowing of which is finished.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 11TH MAY 1895, AND FROM 1ST JANUARY TO 9TH MAY 1896.

N.B.—As regards the figures in column *Total Earnings from 1st January 1896*, audited figures have been used as far as possible.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 21st May, 1896.

NOTIFICATIONS.

No. 1343 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 16th May 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 165 of 1896.—Reinhold Langner, watchmaker, of No. 7, Hornby Row, Fort Bombay, for an improved burner for oil, spirits of wine or any other illuminant liquid, for incandescent light.

No. 166 of 1896.—James Coleman Connell, of "Dovedell," Simla, for a weir or breakwater which requires no brick or mortar.

No. 167 of 1896.—John Carnrick, manufacturing chemist, of 124 and 126, South Fifth Avenue, in the city, county and state of New York, United States of America, for a digestive compound.

No. 168 of 1896.—Economical Refrigerating Company, a corporation of the state of Illinois, manufacturers with principal office at 21, Quincy Street, Chicago, Illinois, for improvements in refrigerating apparatus.

No. 169 of 1896.—Henry Sabow, engineer, of Kurseong, in the district of Darjeeling, Bengal, for an improvement in the method of packing tea, to be called "H. Sabow's patent vibrating tea packer."

No. 170 of 1896.—The American Wire Novelty Company, manufacturers, of Broadway, New York, United States of America, for improvements in wire devices convertible into twine holders, flower baskets, egg boilers, sad-iron rests, napkin rings and other household articles.

No. 171 of 1896.—The Morris Tube Ammunition and Safety Range Company, Limited, of No. 11, Haymarket, in the county of London, for an improvement in electric primers for firing guns.

No. 172 of 1896.—Samuel Cleland Davidson, merchant, of Sirocco Engineering Works, Belfast, Ireland, for improvements in tea leaf-rolling machines.

No. 173 of 1896.—Edward Jacob Hill, engineer, of 11, Victoria Street, in the city of Westminster, England, and Vincent Walker Hill, secretary and general manager of the Hull Barnsley, and West Riding Junction Railway and Dock Company's offices, Hull, in the county of York, England, for improved means of supporting railway carriage and other similar sash windows.

No 174 of 1896.—Arthur Rogers, civil engineer, of the "Khas Munzil," Garden Reach, 24-Pergunnahs, Alipore, Bengal, India, for a manure to be called "Roger's blended castor manure."

No. 1344 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the office of the Secretary, in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying:—

No. 129 of 1895.—Dick Edwards Radclyffe, gentleman, of 56, Gloucester Crescent, Regent's Park, London, and Taylor Burrows, engineer, of 88, Upper Kennington Lane, London, for an improved apparatus or method or system for preparing China grass or rhea fibre or hemp or similar fibres for combing or spinning. (Filed 7th May 1896.)

No. 311 of 1895.—John William Rickwood, steam crane driver, Great Indian Peninsula Railway, Khandwa, for a self-acting brake. (Filed 15th February 1896.)

No. 318 of 1895.—Gilbert Smelt Knott, gentleman, of 29, Esmond Road, Bedford Park, in the county of Middlesex, England, for improvements in punkah actuating machines. (Filed 7th May 1896.)

No. 319 of 1895.—George Mitchell, consulting engineer, of 47, Victoria Street, Westminster, in the county of London, for an improved bottling cock for liquids. (Filed 7th May 1896.)

No. 320 of 1895.—George Mitchell, consulting engineer, of 47, Victoria Street, Westminster, in the county of London, for an improved container and bottling apparatus for liquids. (Filed 7th May 1896.)

No. 369 of 1895.—James Wright King, manager, Court of Wards' Estates, Gorakhpur, North-Western Provinces, for an improved rein, to be called, "King's patent rein." (Filed 8th May 1896.)

No. 108 of 1896.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, North Britain, for improvements in or connected with machinery or apparatus for drying tea leaf or the like. (Filed 11th May 1896.)

No. 1345 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 103 of 1890.—Arthur Marie François Laurent-Cély, of 59, Rue de Provence, Paris, in the Republic of France, and Illius Augustus Timmis, civil engineer, of No 2, Great George Street, Westminster, London, for improvements in and relating to and in the manufacture of electric secondary cells. (From 27th May 1896 to 26th May 1897.)

No. 203 of 1890.—Frederick Grinnell, manufacturer, of Providence, state of Rhode Island, in the United States of America, for improvements in automatic fire extinguishers. (From 20th May 1896 to 19th May 1897.)

No. 90 of 1892.—Peter Ferguson and William Young Fleming, engineers and shipbuilders, of the firm of Fleming and Ferguson, Phoenix engine works, Paisley, Renfrewshire, and George Dixon, manager to Messrs. John	Musgrave and Sons, engineers, Globe iron works, Bolton, Lancashire, for improvements in motive power engines actuated by steam or other fluid pressure. (From 18th July 1896 to 17th July 1897.)

No. 1346 P.—WHEREAS the inventor of the undermentioned invention has failed to pay within the time limited in that behalf by the Fourth Schedule to the Inventions and Designs Act (V of 1888), the fee hereinafter mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said invention in British India and of authorizing others so to do has ceased:—

No. 119 of 1891.—Mr. M. M. Lindsley's invention for a draught appliance for steam boilers. (Specification filed 15th February 1892.)

Fee in respect of the continuance of an exclusive privilege—

(*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for the above invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888, should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

BOARD OF REVENUE, MADRAS.

NOTIFICATION UNDER SECTION 30 OF ACT XII OF 1882.

(The Indian Salt Act.)

In exercise of the powers conferred by the 2nd paragraph of Notification No. 769, dated 11th February, 1888, issued by the Governor General of India in Council (in the Department of Finance and Commerce), under section 28 of Act XII of 1882, and published at pages 67—72 of the *Gazette of India* dated 11th February, 1888, the Commissioner of Salt, Abkari and Separate Revenue, Madras Presidency, under section 30 of Act XII of 1882, authorizes each of the persons named below to exercise the powers of a Salt Revenue Officer:—

Grey, H.

The 23rd May, 1896.

SEA AND FOREIGN MAILS.

Mails for	Date of closing at Calcutta.	Route by which despatched.
	1896	
Aden, Egypt, Europe, America, Zanzibar, Mozambique, Delagoa Bay, Mauritius, Seychelles, Madagascar, Réunion, etc., Natal and Cape Colony, and in general all countries served through the United Kingdom.	26th May	Per P. & O. Str. from Bombay.
Straits Settlements, China, and Japan.	23rd ,,	*Vid* Tuticorin and Colombo.
*Australasian Colonies . .	23rd ,,	Ditto.*
Ditto ditto . .	30th ,,	Ditto.
Colombo	25th ,,	Per P. & O. Str. *Nubia.*
Straits Settlements, China, and Japan.	29th ,,	Per Steamer *Lightning.*
Rangoon and Moulmein . .	29th ,,	Per Steamer *Palamcotta.*
Rangoon, Moulmein, Penang, and Singapore.	26th ,,	Per Steamer *Africa.*
Akyab, Kyaukpyu, Sandoway, and Rangoon	27th ,,	Per Steamer *Cocomada.*
Port Blair	27th ,,	*Via* Madras.
South African Ports	25th ,,	Per Steamer *Umzinto vid* Madras.
Mauritius and Bourbon . .	31st ,,	*Vid* Tuticorin and Colombo.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of closing for the next Mail steamer, full allowance being made for the Steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any Steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a Steamer not belonging to one of the regular lines.

N.B.—The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late-fee at 7 P.M. precisely; after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up at 7-30 P.M.

On the day of despatch of the Mail for the Australasian Colonies and the Far East *vid* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8 P.M., and late letters and papers fully prepaid will be received up to 8-30 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 7 P.M., and late letters and papers will be received up to 7-30 P.M. for despatch by any Foreign Mails despatched the same night. The late-fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS.
Presidency Postmaster, Calcutta.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1893.

A Registry Office for men of all grades out of employ is kept up by the Principal, Thomason College, Roorkee. Officers requiring men are requested to apply to Principal.

J. CLIBBORN, *Major, S.E.,*
Principal, Thomason College.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin, R18, or, post free, R18-12.

½ „ R 9, „ R9-8.

¼ „ R4-8, „ R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮৲ বা ডাকমাশুল বিনা ১৮৲১০

½ আধ „ „ ৯৲ „ ৯৲৮

¼ সিকি „ „ ৪৲৮ „ ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার সার্টীফীকেট দেওয়া যাইতেছে। ইহা কেবল মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

CEMETERY NOTICE.

I hereby give notification in accordance with Revised Rules for Cemeteries, Home Department Notification, Ecclesiastical, No. 103, dated the 20th June, 1885, Rule XIX, that the undermentioned tombs in St. Mary's Cemetery, Fort Saint George, Madras, are in a ruinous condition and that if no person will undertake to repair them within three months from this date, they will be made level with the ground and slabs contained will be placed over the grave in simple masonry, or be inserted in the wall of the Cemetry:—

Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage*. . . R22-8

	Without postage. R a. p.	With postage. R a. p.
For the Calcutta Series	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town. R a. p.	For mofussil. R a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 3
„ each of the Madras, Bombay, and Allahabad Series; per copy . . .	0 5 3	0 5 9
„ the Calcutta Series. For the year .	7 2 6	8 6 3
„ each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Simla, the 26th May, 1896.

No. 887-*G.*—The services of Lieutenant C. J. Windham, Indian Staff Corps, are replaced at the disposal of the Military Department, with effect from the 1st April, 1896.

No. 890-*G.*—Captain C. F. Minchin, Indian Staff Corps, officiating Political Assistant of the 2nd Class, and Assistant to the British Agent at Gilgit, is granted privilege leave for one month and twenty-five days, with effect from the 16th June, 1896, or the subsequent date on which he may avail himself of the leave.

The 29th May, 1896.

No. 905-*G.*—The following substantive promotion and appointment are made in and to the Berar Commission, with effect from the 2nd April, 1896, consequent on the retirement from the service of Mr. H. S. Nicholetts, a Deputy Commissioner of the 1st Class:

Colonel C. T. Lane, C.I.E., Indian Staff Corps, Deputy Commissioner of the 2nd Class, to be Deputy Commissioner of the 1st Class.

Mr. A. Lucas, of the Indian Civil Service, to be a Deputy Commissioner of the 2nd Class.

No. 1756-*I.-A.*—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879) and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to prescribe the following rules for the better avoidance of loss through the default of Public Accountants in the Civil and Military Station of Bangalore:

1. For the purpose of these rules, every person is a Public Accountant who, by reason of any office held by him in the service of the Government of India or of the Municipal Commissioners of the Civil and Military Station of Bangalore, is entrusted with the receipt, custody or control of any money or security for money, or the management of any buildings or land in the possession of the Government of India or the Municipal Commissioners of Bangalore, or who, as official assignee, trustee or receiver, or in any other official capacity, is entrusted with the receipt, custody or control of any money or security for money, or the management of any buildings or lands belonging to any other person or persons.

2. Every Public Accountant shall give security for the due discharge of the trusts of his office, and for the due account of all moneys which shall come into his possession or control by reason of his office.

3. In default of any law having special reference to the office of any Public Accountant, the security to be given shall be of such amount and kind, real or personal or both, and with such sureties, as the Resident in Mysore, with the previous sanction of the Governor-General in Council, may from time to time prescribe.

4. The head of the office to which any Public Accountant belongs may proceed against such Public Accountant or his sureties or both, for any loss or defalcation in his accounts as if the amount thereof were an arrear of land revenue due to Government.

5. All laws or rules for the time being in force in the Civil and Military Station of Bangalore for the recovery of arrears of land revenue due to Government and for the recovery of damages by any person wrongfully proceeded against for any such arrear shall apply, with such changes in the form of procedure as may be necessary to make them applicable to the case, to any proceedings against or by such Public Accountant.

H. S. BARNES,

Offg. Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT.

NOTIFICATIONS.

The unexpired portion of his furlough from the 9th August to the 5th November 1895 is hereby cancelled.

No. 257.—The following is published for information:

Circular No. 3 Ry., dated Simla, the 22nd May 1896.

RESOLUTION—By the Government of India, Public Works Department.

General Rules of 1895 for working open lines of railway in British India administered by the Government.

Read—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department Circular No. 6 Ry., dated 12th March 1895, promulgating certain general rules made under section 47 of the Indian Railways Act, 1890, for the guidance of the public and railway officials employed on open lines of railway in British India administered by the Government, and directing that the administrations of railways not so administered should be invited to move for sanction to the application of the said general rules subject to such modifications as might be considered necessary in each case.

Government of India, Public Works Department Circular No. 15 Railway, dated 22nd July 1895, postponing the date of introduction of the general rules referred to above to 1st January 1896.

Government of India, Public Works Department Circular No. 19 Ry., dated 9th December 1895, further postponing the date of introduction to 1st July 1896.

Director General of Railways' letter No. 195 T., dated 25th April 1896, and enclosures.

OBSERVATIONS.—Certain railway administrations have proposed modifications in some of the general rules cited in the preamble which were framed under section 47 of the Indian Railways Act, 1890, for the guidance of the public and railway officials employed on open lines of railway in British India administered by the Government, and the Director General of Railways has applied for sanction to adopt the said modifications on State Railways, with certain further amendments.

RESOLUTION.—The Governor General in Council having considered the suggestions put forward is pleased, in exercise of the powers conferred by section 47 of the Indian Railways Act, 1890, to approve of the adoption of the amended rules, as set forth in the schedule to this resolution, in place of the corresponding rules promulgated under Circular No. 6 Ry., dated 12th March 1895, on all lines of railway in British India administered by the Government, and for the time being used for the public carriage of passengers, animals, or goods, and to direct that the said General Rules so modified shall, in supersession of the orders in Circular No. 19 Ry., dated 9th December 1895, come into force on the above mentioned railways from the 1st August 1896, and that their introduction on the railways not administered by Government be postponed until further orders.

The Governor General in Council also desires that the said amended rules may be brought to the notice of the administrations of the several railways not administered by the Government, and that the Agents and Managers of those railways may be invited to submit formal applications for the adoption of the general rules as modified.

ORDER.—Ordered, that this circular, with the schedule annexed, be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3) of the Indian Railways Act, 1890, and that the General Rules as now amended be kept for inspection at railway stations as directed by sub-section (6) of the same section.

Ordered also, that a copy of this circular and its enclosure be communicated to the Local Governments and Administrations, and to the Officers noted in the margin for information and guidance, and to the Governments of the North-Western Provinces and Oudh, and the Punjab, the Chief Commissioner of the Central Provinces, the Agents to the Governor-General in Central India and Baluchistan, the Resident in Mysore, and to the Accountant General, Public Works Department, for information.

The Governments of Madras, Bombay, and Bengal.
The Chief Commissioners of Burma and Assam.
The Resident at Hyderabad.
The Agent to the Governor General for Rajputana.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Assam.

Enclosure to Government of India, Public Works Department Circular No. 3 Ry. of 1896.

Schedule showing modifications of the open line general rules circulated with Government of India Circular No. 6 Railway, dated 12th March 1895.

PART I.

1. (17) "Authorised officer" means the person who is duly empowered by general or special order of the railway administration, either by name or by office, to issue instructions or to do any other thing of the nature referred to in each case.

NOTE.—Such order shall not empower an authorised officer to depute the power conferred upon him thereby to any other person.

67. The guard or person in charge of a ballast train on any part of the main line outside station limits shall be responsible that the line is cleared and the Station Master advised not less than ten minutes before a train is due. On lines worked on the "Absolute block" system the line must be cleared and the Station Master advised not less than five minutes before a train is due to enter the section from either end.

69. A Fixed or Permanent signal is a signal erected for controlling the movement of trains, and is constructed with one or more semaphore arms, discs or other appliances for use by day and lamps for use by night.

N.B.—A Point Indicator, *vide* rule 73, is not a signal.

70. No Fixed or Permanent signal shall be used unless it is constructed to show "danger" in case of any failure in its connections.

72. (1) Fixed or permanent signals, especially when used as "Distant signals," "Main signals" (otherwise called "Station signals," or "Home signals") and "Starting signals" shall ordinarily be of the semaphore type.

72. (2) Distant signals are signals placed at a considerable distance from the station and shall, except when under the proviso to Rule 101 they are used as stop signals, be distinguished by a notched arm, thus—

72. (7) Distant, Main and Starting signals shall be used only in connection with trains approaching, entering, or leaving stations, respectively, and shall not be used for shunting or for any purpose other than the control of trains as aforesaid.

72. (8) When a Disc signal is used as a Fixed or Permanent signal, a disc, bar or other appliance must be exhibited by day and the lights prescribed in rule 71 by night.

73. Point Indicators are appliances attached to points to show for which road the points are set, and shall be so constructed as to be easily distinguished from Fixed or Permanent signals.

Point indicators will apply to all vehicles, whether forming part of a train or not, passing over the lines to which they refer.

85. (1) Shunting operations shall be controlled either by "Fixed or Permanent signals" specially set apart for the purpose, or by hand signals, or by verbal directions as occasion may require.

85. (4) When after a Main or Distant signal has been lowered to admit a train, it is found necessary to obstruct the line on which the train is to be received, the signal must be replaced at danger, and the train brought to a stand before the obstruction is permitted.

86. (1) Except in case of emergency, Platelayers or other workmen employed on the permanent-way shall not work under the protection of the Fixed or Permanent signals, but must invariably use special signals.

91. (2) Unless this duty is imposed on some other railway servant by the authorized officer, the Station Master shall be held responsible that the signals are not lowered to admit a train until all facing points over which the train will pass are correctly set and secured and trailing points correctly set, and that the line over which the train will pass is free from obstructions.

110. When a train has been shunted for another train to pass, the side-lamps must be reversed or so disposed as to avoid showing red to a following train.

113. (1) Unless this duty is imposed on some other railway servant by the authorised officer, the Station Master will be responsible that all facing points over which a train will pass are correctly set and secured and trailing points correctly set.

He will be similarly responsible that all safety points and catch sidings, when it is not necessary that they should be opened, are closed and secured against the line which they are intended to protect.

N.B.—Old rules 73 (1) and 73 (2) are amalgamated and recast and become 72 (8). 73 (3) is recast as 73 above, and old rule 91 (2) becomes 91 (3).

Schedule showing modifications of the open line general rules circulated with Government of India Circular No. 6 Railway, dated 12th March 1895—*contd.*

142. The Guard in charge of a train must satisfy himself, before the train is despatched from any station and during the journey,—

* * * * * * * *

(*c*) that the vehicles are in good order and properly coupled up, and if sheeted, that the sheets are properly secured,—

* * * * * * * *

(*f*) that the windows of all empty compartments and all lamp-holes are closed.

155. No wagon or truck shall be so loaded as to exceed the maximum gross load on the axles prescribed by the Governor General in Council under the Indian Railways Act, 1890, section 19, sub-section (*1*), clause (*c*), or other less load prescribed by the authorised officer.

166. (*3*) If the Guard or the Station Master has reason to apprehend danger from any such vehicle before it can be inspected by a Carriage and Wagon Examiner, the guard shall consult the driver, and if, after such consultation, he considers it necessary to do so, he shall have the vehicle detached from the train.

187. The Station Master must see that the shunting of trains or the crossing of trains from one line to another is performed only at such times and in such a manner as will not involve danger.

211. Each Inspector of permanent-way or authorised officer must see that all broken or defective rails, chairs, sleepers or other permanent-way materials on the length of line under his charge are removed from the road with the least possible delay, and that sound materials are substituted for them.

212. Each Ganger must—

* * * * * * * *

(*c*) unless that duty is imposed on some other railway servant by the authorised officer, keep the fences thereof in repair.

218. (*1*) No Inspector of permanent-way or authorised officer shall change or turn a rail or commence any operation which would obstruct the line and necessitate the showing of a danger signal,—

(*a*) if within station limits,—

until he has obtained the permission of the Station Master and has seen that special signals prescribed in rule 86, clause (*2*) are clearly exhibited and until all necessary signals have been placed at "danger;" or

(*b*) if outside station limits,—

until he has seen that—

(i) a "danger" signal has been plainly shown, and

(ii) two detonators have been placed on the line, ten yards apart, at a distance of at least three-quarters of a mile from the place of obstruction, on a double line in the direction from which trains come on the line obstructed, and on a single line in both directions.

(*2*) In case (*a*), the signals must, if necessary, be kept at danger as provided in rule 91 (3) until the Station Master has been informed by the Inspector of permanent-way or authorised officer that the line is again clear and safe for traffic.

(*3*) In either case the Inspector of permanent-way or authorised officer must himself be present at the spot until the line is clear.

224. (*1*) Ballast shall not be thrown up between the rails higher than rail level and must be thrown as much as possible on the outside of each line or between the two roads.

231. The person in charge of a wagon, truck, lorry, or other impediment causing an obstruction on any line on which a train is expected shall be responsible that the obstruction is removed and the Station Master advised not less than ten minutes before the train is due. On lines worked on the "Absolute block" system, the obstruction must be removed and the Station Master advised not less than five minutes before the train is due to enter the section from either end.

PART II.

23. Except as provided in Appendix B, rule 6—VI (*c*), vehicles loaded with explosives shall be sent only with a goods train, and shall be placed in the rear of the train, but not next the rear brake-van.

Provided that vehicles loaded with ammunition or other explosives belonging to troops may be sent with the train by which the troops travel, but must be placed next behind the front brake-van.

W. S. S. BISSET, *Colonel, R.E.,*
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 23rd, 1896.

As was the case last week, the observations show that pressure has been fairly steady over the Peninsula and the central parts of India, but has been very unsteady in the north. For the first three days a small depression lay over Upper Sind, and gradients were very steep over Sind and Gujarat, but after the 19th this more or less disappeared, and the low pressure area was shown over the Punjab, Rajputana, the Gangetic Plain, and Western Bengal. Readings have been steadily high over the west of the Peninsula, and throughout the week the pressure differences have been large over the Peninsula. Strong westerly and north-westerly winds have prevailed over Sind, Gujarat, Central India, the Central Provinces, and the Peninsula, fresh southerly winds over the Bay, and variable winds elsewhere. Rain has fallen on all days in Burma, on most days in Bengal and Assam and the south-west of the Peninsula, and occasional showers have been received over the Gangetic Plain and the North-Western Himalayas. In Burma, where the rainfall has been constant, the mean temperature has been low, but over India the general abnormal excess noticed during the preceding week has held, though the amount of this excess has been less during the present than during the last period under review.

Daily Summary.—*Sunday, May 17th.*—The barometer had fallen rapidly over Upper Sind, but had changed slightly in other places. A small depression was shown near Jacobabad, and relatively low pressures over the Gangetic Plain and West Bengal. Readings were highest over the west of the Peninsula, and the pressure differences were considerable. Strong winds between south-west and north-west were reported over Sind, Gujarat, Central India, and the Peninsula, fresh southerly to easterly winds over Bengal, and variable breezes elsewhere. The mean temperature was in defect over Lower Burma and North and

Central Bengal, and excessive elsewhere, the largest opposite variations were +13·1° at Ludhiana and —7·6° at Thayetmyo. Rain had fallen over Burma and Assam and part of Bengal, and a few local showers were reported from other parts of the country.

Monday, May 18th.—Pressure had increased briskly to rapidly over the Punjab, and briskly over the North-Western Provinces. Elsewhere the changes were generally slight. The general distribution of pressure was unaltered, and the winds were very little changed either in direction or force. The mean temperature remained slightly to considerably below the normal over Lower Burma, and slightly to moderately below over the Assam Valley and Central and North Bengal, while an area of deficient temperature had been developed over the south-east of the Punjab, Rajputana, and Gujarat. Elsewhere the mean temperature was excessive. The largest opposite variations were +9·0° at Vizagapatam and —6·5° at Delhi. Steady rain had fallen over Lower Burma, and dust and thunder storms had given light to heavy showers to Bengal, Assam, Upper India, and part of the south-west of the Peninsula.

Tuesday, May 19th.—Pressure had decreased briskly over the Punjab, and increased briskly over Baluchistan, but elsewhere the changes continued slight. The general distribution of pressure and the circulation of the winds were both practically unchanged. The low temperature area over Lower Burma had largely disappeared, the only station reporting a deficiency being Moulmein, but over Assam and Bengal and over the south-east of the Punjab, Rajputana, Gujarat, and Lower Sind the mean temperature remained in defect. Rain had fallen over Lower Burma, Lower Bengal, the Kumaun Himalayas, and the south-west of the Peninsula. Tavoy reported the heavy fall of 9½ inches.

Wednesday, May 20th.—The barometer had risen at most places—rapidly in Upper Sind. The slight depression recently holding near Jacobabad had disappeared, and the lowest pressures were reported from the Northern Punjab. In other respects the distribution was little changed. The winds were very variable over Northern and North-Eastern India, but the north-westerly and westerly strong winds and gales reported from the Bombay Presidency, the central parts of the country, and the Peninsula continued. The distribution of temperature relatively to the normal was the same as on the preceding day, and the mean temperature was 12·3° above the normal at Masulipatam, and 5·8° below at Agra. Moderate steady rain had been received over Lower Burma and showers over Assam, Bengal, Oudh, and parts of the Punjab and of the Peninsula. The amounts were not large.

Thursday, May 21st.—The barometer had again risen in most places, the rise over West Bengal and Bihar having been brisk to rapid. Readings were again lowest over Upper Sind. The winds were southerly in the Punjab and easterly or variable in Bengal, but elsewhere the directions were generally between west and north-west. The mean temperature was low over the greater part of Northern India, the area of deficiency extending from Rajputana and Gujarat in the west, along the Gangetic Plain to Bengal in the east. Masulipatam reported an abnormal excess of 9·6°, and Allahabad and Lucknow an abnormal deficiency of 5·8°. Rain had been received over Lower Burma, Bengal, Rajputana, and the west of the Peninsula.

Friday, May 22nd.—Pressure had increased slightly over part of the Peninsula and of Burma and had decreased elsewhere. The change had been brisk to rapid over Northern India. Pressure was low over the Punjab and over West Bengal, and high in Malabar, Ceylon, and Tenasserim. The winds were unaltered. The mean temperature was low over Gujarat, Rajputana, Bengal, and Lower Burma, and excessive elsewhere. The abnormal excess was large over the Carnatic and over the Punjab. Moderate showers were reported from parts of Burma, and light showers from a few places in the North-Western Himalayas and in the Peninsula.

Saturday, May 23rd.—Pressure had again increased over the Peninsula and Burma and decreased in most other places. Readings remained low over the

Gangetic Plain and West Bengal, and high in Malabar. Gradients were moderately steep. The winds remained practically unchanged. The mean temperature was almost everywhere above the normal, the only exceptions being Burma and the Bellary district. General rain had fallen in Burma, and showers in parts of North Bengal, of the Punjab, and of the Peninsula.

Temperature.—At the commencement of the week the mean temperature was lower than usual in Burma and in Central and North Bengal and excessive elsewhere. These general conditions continued during the next two days, but, in addition to the above areas of depressed temperature, a relatively cool area appeared over the south-east of the Punjab on the 18th. This area of low temperature gradually extended eastward until it coalesced with the low temperature area over Bengal, so that, on the 21st and to a less extent on the 22nd, there existed a large low temperature area stretching from Gujarat to Bengal, with excessive temperatures both over the Punjab and over the Peninsula. By the 23rd this band had disappeared, and the mean temperature was excessive in all places, except Burma.

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Provinces.	May 1896.							Mean variation of week.
	17th	18th	19th	20th	21st	22nd	23rd	
	°	°	°	°	°	°	°	°
Burma	−3·8	−3·8	+0·1	+1·5	+0·8	−0·6	−1·1	−0·8
Bengal and Assam	+2·1	+0·1	−0·3	+5·4	−1·2	−0·1	+3·1	+1·3
North-Western Provinces and Oudh	+7·5	+1·7	0	+0·9	−1·5	+2·0	+4·7	+2·2
Punjab	+9·4	+1·4	−0·4	+3·7	+3·3	+5·8	+6·9	+4·3
Bombay	+1·3	+2·2	+2·5	+0·4	+1·4	+1·9	+1·8	+1·6
Central Provinces and Berar	+2·2	+1·7	+1·5	+1·4	+1·5	+1·7	+3·2	+1·9
Central India and Gujarat	+1·9	+1·1	−0·4	+0·8	+0·4	+0·5	+1·7	+0·9
Sind and Rajputana	+3·5	+0·6	−1·0	+0·3	−2·1	+0·8	+3·0	+0·7
Madras	+4·7	+5·0	+5·7	+4·7	+4·6	+4·3	+3·5	+4·6
Mean for whole of India	+3·2	+1·1	+0·9	+2·1	+0·8	+1·8	+3·0	+1·8

The mean temperature of the whole country was excessive for each day of the week, the excess ranging from only 0·9° on the 19th to 3·2° on the 17th and 3·0° on the 23rd. The provincial variations showed that the temperature of the week had been about normal in Burma, Central India, Gujarat, Sind, and Rajputana, and above the normal in all the remaining provinces. The hottest districts were the Carnatic and the North Punjab.

The following were the highest temperatures throughout India recorded on each day:

May 17th	117·1°	at	Jacobabad.
„ 18th	119·5°	„	„
„ 19th	114·8°	„	Nellore.
„ 20th	115·2°	„	Masulipatam
„ 21st	114·2°	„	Khammamett.
„ 22nd	115·1°	„	Jacobabad.
„ 23rd	116·1°	„	„

Rain.—During the week under review rain has fallen steadily over Lower Burma and fairly steadily over Assam, Bengal Proper, and the south-west of the Peninsula. Elsewhere the rainfall has occurred during dust and thunder storms, but these storms have been so general throughout the country that the week's

return shows that rain in greater or less amount has been received in nearly all the rainfall divisions. In Burma rain fell throughout the whole country on the 17th, mainly in Lower Burma on the next five days, and again throughout the whole country on the last day. In Bengal and Assam the weather was showery on all days, except the last two, when the rainfall almost ceased. In Upper India the most showery days were the 18th and 20th, while in the Peninsula local scattered showers occurred throughout. Over the central parts of the country the showers were very light. At Tavoy there was a remarkable fall of 9½ inches reported on the 19th, and on the same day Mangalore received over 4 inches. The concluding table gives the rainfall data. Of the fifty-seven rainfall divisions, which send weekly returns, no less than fifty-one have received more or less rain during the week. Of these fifty-one divisions twelve reported an average actual rainfall of less than one-tenth of an inch, but this leaves thirty-nine divisions which received effective rain, which is considerably in excess of the number reported last week. The divisions which received actually or practically no rain included the following districts :—*viz.*, the North-Western Provinces (East and Submontane), Oudh, the Punjab (Submontane, Hills, and North), Berar, the Central Provinces, Gujarat, Kathiawar, Sind, Baluchistan, Central India (East), and Rajputana (West). In all other parts of India effective rain was received. The average amount of this effective rainfall ranged from 8·97 inches in Tenasserim to 0·10 inch in the hill district of the North-Western Provinces. The second column of the table shows the normal average rainfall of the divisions. This ranges from 8·65 inches in Arakan to a few hundredths in parts of North-Western India. The third column of the table gives the difference between the average actual and average normal rainfall for the week under review. This column shows that the fall has been excessive only in thirteen divisions, *viz*, Tenasserim, Central Burma, Assam (Brahmaputra), Central Bengal, North Bihar, the North-Western Provinces (Central and West), the Punjab (South-East and South), the Bombay Deccan, Sind, the East Coast (North (*a*)), and Central Madras, and that the amount of the excess varies from 2·27 inches in Tenasserim to 0·02 inch in Sind. In all the remaining divisions the rainfall was in defect. In Arakan this defect was very large, only 0·41 inch having been received in place of the normal 8·65 inches. This result appears to have been attributable to the easterly and northerly winds which were experienced over this division. The deficiency was also considerable over the Surma and hill divisions of Assam and in Malabar. In other places the deficiency was generally small and would have been relatively unimportant had it not followed in succession to such a very dry season.

The three concluding columns of the table exhibit the state of the seasonal rainfall, *i.e.*, the actual and normal total rainfall from the 1st of March to the 23rd of May. The only division reporting an excess is Tenasserim, but Central Burma, all the Assam divisions, and North Bengal report a normal rainfall, that is, an actual amount differing by less than 20 per cent from the normal amount. In all the remaining divisions the seasonal fall was in defect, and in the case of Arakan, the North-Western Provinces (East and Submontane), Oudh (South), the Konkan, Berar, the Central Provinces, Gujarat, Kathiawar, Central India, Rajputana (East), Hyderabad (South), and the East Coast (Central) the returns show that there has been practically no rain throughout the whole period of nearly three months.

The following are the principal totals recorded during the week :—Moulmein 8·97 inches, Kyauktan (Rangoon) 6·67 inches, Tharrawaddy 4·38 inches, Mymensingh 5·55 inches, Sylhet 4·70 inches, Alipore (Rungpur) 5·36 inches, Kurseong (Darjeeling) 4·62 inches, Mangalore 4·09 inches, Tumkur 4·65 inches, Tosgaon (Satara) 3·89 inches, Rayadrug (Bellary) 4·63 inches, Chendraghiri (North Arcot) 3·60 inches. In addition to the above Tavoy reported 9·52 inches on the 19th.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *28th May 1896.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 23rd May.*—Report not received.

Bombay.—*For week ending 27th May.*—Rain fell in parts of eleven districts, but was generally slight. The standing crops are good. Threshing of the late crops continues in three districts. Preparations for next season are general. Fodder is insufficient in parts of Sind. Agricultural stock are in good condition, except in five districts. Prices are normal, except in Ahmednagar and Sholapur.

Bengal.—*For week ending 25th May.*—The rainfall was good and general during the week, except in parts of Orissa and Chota Nagpur where more rain is badly wanted. Ploughing is going on steadily, and the rice and jute crops are being sown. Indigo, sugarcane and other crops in the ground are doing well. The harvesting of the spring rice is over with a poor outturn. The recent rain has improved the water-supply to some extent, but want of good drinking water is still felt in some parts. The price of common rice continues abnormally high in Eastern Bengal and in Chota Nagpur.

North-Western Provinces and Oudh.—*For week ending 27th May.*—The weather is stormy with showers in most districts. Slight hail fell in Bahraich. Mangoes have been injured by storms and hot winds in Bulandshahr, Shahjehanpur and Naini Tal. The extra crops are doing well and are being harvested with a good outturn. Sowings for the autumn crops have began in some districts. Irrigation of cane and indigo continues. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, May 23rd, were—Banda 1,33,739, Hamirpur 47,960, Jhansi 41,645, Jalaun 49,617, Allahabad 7,788, Pilibhit 1,717, Garhwal 2,290, Almora 1,103, Hardoi 275—total 2,77,124; of this number 37,257 dependants, mostly children under seven years, were gratuitously relieved on the works, and 7,120 persons received relief under other provisions of the Famine Code. The numbers employed on village works were—Banda 21,202, Hamirpur 22,043 and Jalaun 12,135. The figures for Jhansi have not been reported. The decrease in the numbers in Pilibhit is due to reduction in the rate of wages. In Hardoi signs of distress having again appeared a test relief work has been opened. Supplies are somewhat short in Mirzapur and Kheri, but are sufficient elsewhere. Fodder is becoming scarce in many districts. Water is reported to be deficient in Bijnor, Banda, Hamirpur and Lucknow. Prices are high and are rising.

Punjab.—*For week ending 27th May.*—Slight rain has fallen in all districts except Amritsar, Sialkot, Shahpur and Peshawar. Threshing of the spring crops has commenced in Sialkot, is in progress in Amritsar, Rawalpindi and Dera Ismail Khan, and has been completed in Ferozepore and Lahore. The spring crops have been harvested in Mooltan and are still being harvested in Shahpur. Sowings of the autumn crops are progressing in several districts, and the land is being prepared for the crops in Lahore. The condition of the extra spring crops is good in Delhi and Amritsar, and average in Rohtak and Peshawar, but it is not good in Rawalpindi owing to drought. The sugarcane and melon crops are suffering for want of rain in Umballa. The extra spring crops in Jullundur and the autumn crops in Sialkot are being watered from wells. The melon and cucumber crops are doing well in Gurgaon. The condition and prospects of the spring crops generally are reported average in irrigated lands, and below average in unirrigated tracts. The stock of food-grains is average in Peshawar, and is sufficient elsewhere, except in parts of Lahore and Gujranwalla. Hail injured the extra spring crops in parts of Lahore; high winds are causing loss on threshing floors in Gujranwalla. Cattle are in poor condition in Hissar, Kurnal and Gujranwalla, and they are dying of starvation in Hissar and parts of Kurnal. Fodder is scarce in all districts, except Jullundur, Ferozepore, Amritsar, Sialkot, Mooltan, Dera Ismail Khan and Peshawar. Prices are rising in Amritsar and Gurgaon, and are high elsewhere.

Central Provinces.—*For week ending 27th May.*—The weather is very hot, and at times cloudy with light falls of rain in the North, Chhattisgarh and the Nagpur country. Land is under preparation for the autumn sowings. Scarcity

of water and fodder prevails in several districts. Prices are stationary, except in Damoh and Jubbulpore where the price of gram is rising.

Burma.—*For week ending 23rd May.*—In Lower Burma ploughing for wet-weather paddy has commenced in Amherst, Tavoy and Thaton There is now a sufficient supply of fodder and water for cattle in Hanthawaddy. In Upper Burma reaping of dry-weather paddy still continues. Ploughing for the wet-weather crops has commenced in the Ruby Mines, Shwebo, Sagaing, Lower Chindwin, Thayetmyo, Minbu, Magwe, Meiktila, Yamethin and Myingyan. Ploughing for wet-weather paddy in Mandalay is retarded for want of rain. The island crops in Minbu have been harvested. More rain is required for the dry-weather paddy crop in Yamethin; otherwise the standing crops are in fair condition. The price of paddy has risen slightly in Rangoon, Prome, Myaungmya, Toungoo and Pakokku; elsewhere prices are stationary.

Assam.—*For week ending 26th May.*—The weather is seasonable. Rain is wanted in parts of the Cachar district. Planting of sugarcane continues. Tea is doing well. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 27th May*—MYSORE.—Good rain fell in parts of the State. Paddy has been sown in Bangalore, Hassan and Shimoga, and the crop is being harvested in Kolar, Tumkur and parts of Chitaldroog. Prices have risen in Bangalore, Kadur and Shimoga, but have fallen in Mysore, Hassan and Chitaldroog.

COORG.—Report not received.

Berar and Hyderabad.—*For week ending 27th May.*—BERAR.—The weather is hot and occasionally cloudy and sultry. Preparation of land for the autumn sowings continues. Scarcity of fodder and water is generally prevalent. Prices have risen in Wun, but are stationary elsewhere.

HYDERABAD.—Report not received.

Central India.—*For week ending 27th May.*—Moderate rain fell in six districts of Gwalior during the week. Harvesting of the winter crops has been completed in Gwalior and Bundelkhand. Ploughing for the autumn crops has commenced in Bhopal, Goona and Malwa. Cattle are in good condition, except in Bhopal, Bundelkhand and parts of Gwalior. Pasturage is indifferent in Gwalior, Baghelkhand and Goona, but is fairly good elsewhere. Prices are above normal in Bundelk and, Baghelkhand, Malwa, Goona, and in some districts of Gwalior, but are normal elsewhere. The numbers employed on relief works in Gwalior, Bundelkhand and Baghelkhand were 6,073, 12,923 and 7,171 respectively.

Rajputana.—*For week ending 27th May.*—Rainfall moderate in Harauti, Jeypore and Kerowli, and slight in Ajmere and six States. Agricultural operations are generally satisfactory, except in Merwara where the harvest is poor. The crops are very poor in Jaisalmere. Agricultural stock are generally in good condition, but are suffering in Mewar and Ulwar and in parts of Jaisalmere for want of fodder. Pasturage and fodder are scarce in Kherwara, Meywar, Tonk, Shahpura, Jeypore, Ulwar and Jaisalmere. Fodder is becoming scarce in Ajmere-Merwara and Kerowli and is failing in Dholepore and Bhurtpore, but is sufficient elsewhere. Prices are rising in five States, and fluctuating in one; elsewhere prices are steady. In Marwar 4,313 persons are on relief works, and 419 on gratuitous relief; in Shahpura 235 are on relief works, and 42 on gratuitous relief; in Merwara 2,561 are on relief works; in Ulwar 549 are on relief works; in Bikanir 2,313 are on relief works, and 332 on gratuitous relief; in Jaisalmere 549 are on relief works, and 46 on gratuitous relief.

Kashmir.—KASHMIR VALLEY.—*For week ending 26th May.*—Rainfall moderate. The weather is now fine. The spring crops are excellent. Sowing of rice is almost finished, and the rice fields are being irrigated. Reaping of rape-seed is in progress. Prices continue normal.

JAMMU PROVINCE.—*For week ending 27th May.*—Rainfall slight. The spring harvesting continues. Ploughing for the autumn corps is in progress. Cattle are in fair condition. Scarcity of corn is reported from Ladakh. Prices are stationary.

Nepal.—*For week ending 23rd May.*—Some light showers have fallen. The weather is hot and close. The prospects of the Indian-corn crop are good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

INVENTIONS and DESIGNS.

Calcutta, the 28th May, 1896.

NOTIFICATIONS.

No. 1413 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 23rd May 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 175 of 1896.—Caroline Mysie Gomer, of Calcutta, for a telescopic *lotah*.

No. 176 of 1896.—Hugo Boltze, manager, Messrs. S. J. Tellery & Co., Calcutta, for automatically actuating a small fan, or for pulling an ordinary suspended punkah, to be called "Boltze's automatic punkah machine."

No. 177 of 1896.—Emil Claviez, general director of Leipzig, in the kingdom of Saxony and German empire, for an improved double-acting jacquard-machine.

No. 178 of 1896.—Arthur Wemberg, for the production of polyazo-dyestuffs from gamma-amidonaphtol-sulpho acid.

No. 1414 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the office of the Secretary in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying:—

No. 152 of 1895.—Friend Johnson Bringham, leather worker, and George Bargate, gentleman, both of Ludington building, Chicago, county of Cook, state of Illinois, for machine for making leather loops. (Filed 8th April 1896.)

No. 183 of 1895.—William Martin, retired indigo planter of Agra, now residing in Simla, for an improved vertical mill for crushing and pressing sugarcane. (Filed 22nd February 1896.)

No. 300 of 1895.—John Malvern Dame, at present agent to Messrs. T. Cosser & Co., engineers, Lahore, for a night-soil cart and receptacle. (Filed 18th May 1896.)

No. 306 of 1895.—L. Hund, merchant, of Bangalore city, Mysore, Southern India, for a solution to make wood or tents, trees, etc., proof against whiteants, worms, weather, and fire, which is non-poisonous, non-caustic and has a great covering

power and when dry looks white like oil paint. (Filed 25th March 1896.)

No. 350 of 1895.—John Lawson Johnstone, engineer, of Hopkins Street, Footscray, in the colony of Victoria, Australia, for an improved horse race starting gate. (Filed 24th February 1896.)

No. 361 of 1895.—Samuel Cleland Davidson, merchant, of Sirocco engineering works, Belfast, Ireland, for improvements in tea leaf-rolling machines. (Filed 30th April 1896.)

No. 371A of 1895.—Emil Lawrence Oppermann, Ewald Fischer and Carl Tunstill John Oppermann, engineers, c. o. E. Eaton, 27, Martins Lane, Cannon Street, London, for an improved process for effecting the amalgamation of gold and the like metals in ores. (Filed 14th May 1896.)

No. 391 of 1895.—John Dame, at present loco. foreman, North-Western railway, Lahore, for a self double locking alarm rifle rack. (Filed 16th May 1896.)

No. 1415 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased :—

No. 94 of 1890.—Mr. J. E. Rickards' invention for improvements in machines for rolling tobacco leaf or cut tobacco into cigars, cigarettes, tobacco plugs and other such articles. (Specification filed 22nd February 1892.)

No. 6 of 1891.—Messrs. W. Orr and P. Stuart's invention for improved means for joining the sheets or plates in the manufacture of metal tanks, boxes and the like. (Specification filed 19th February 1892.)

No. 205 of 1891.—Mr. I. L. Hauser's invention for the separation of fibre from fibrous leaves and stalks to be called "The Hauser Fibre Machine." (Specification filed 22nd February 1892.)

No. 280 of 1891.—Messrs. G. J. B. Rodwell, H. C. Secord, and S. J. Moore's invention for an improved sign letter or symbol. (Specification filed 20th February 1892.)

No. 296 of 1891.—A. Goerke's invention for improvements in or connected with buildings or structures. (Specification filed 22nd February 1892.)

Fee in respect of the continuance of an exclusive privilege—

(*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of ₹50 for each of the said inventions.

No. 205 of 1889.—Mr. J. B. Hannay's invention for an improved process and apparatus for manufacture of sulphate of lead pigment. (Specification filed 21st February 1890.)

No. 238 of 1889.—Mr. C. Langdon-Davies' invention for improvements in the rhythmic generation of electric currents. (Specification filed 21st February 1890.)

Fee in respect of the continuance of an exclusive privilege—

(*c*) After the filing of the specification and before the expiration of the sixth year from the date of the filing thereof—

The sum of ₹50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888, should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

ATTENTION is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

Indore Residency, the 23rd May, 1896.

No. 3920.—In supersession of Central India Agency Notification No. 2298, dated the 26th March, 1896, Lieutenant T. S. Tancred, 1st Regiment, Central India Horse, is granted privilege leave for sixty days, with effect from the 30th March, 1896, instead of the 1st April, 1896.

No. 3930.—Surgeon-Captain B. G. Seton, I.M.S., Officiating Medical Officer, 1st Regiment, Central India Horse, is granted privilege leave for thirty days, with effect from the 1st June, 1896, or the subsequent date of departure.

By Order,
A. B. DRUMMOND, *Lieut.*,
Assistant Agent to the Govr.-Genl. for Central India.

DIRECTOR GENERAL OF RAILWAYS.

NOTIFICATION.

Simla, the 19th May 1896.

No. 32.—Mr. W. H. Price, Assistant Traffic Superintendent in class III, grade 1, of the Superior Revenue Establishment of State Railways, is appointed to officiate as District Traffic Superintendent, with temporary rank in class II, grade 4, of that establishment, during the absence of Mr. W. C Boyce on furlough, or until further orders.

The 21st May, 1896.

No. 33.—With reference to Director General of Railways' Notification No. 49 dated 26th July, 1895, Mr. A. Peyton, Assistant Locomotive Superintendent in class III, grade 1, of the Superior Revenue Establishment of State Railways, is, on return from leave, appointed to officiate as District Locomotive Superintendent, Oudh and Rohilkhand Railway, in class II of that establishment, until further orders.

No 34.—Mr. T. G. Acres, Assistant Traffic Superintendent, in class III, grade 1, of the Superior Revenue Establishment of State Railways, is appointed to officiate on the North-Western Railway in class II, with effect from the 20th April, 1896, and until further orders.

The 25th May, 1896.

No. 35.—Lieutenant W. A. S. Kincaid, R.E., in class II, grade 4, of the Superior Revenue Establishment of State Railways, Traffic Department, is granted leave out of India (m. c.) for twelve months, under the leave rules applicable to regimental officers of the British Army serving in India.

T. GRACEY, *Colonel, R.E.*,
Director General.

POST OFFICE.

NOTIFICATIONS.

Calcutta, the 22nd May, 1896.

No. 1377.—Mr. L. Byrne, Superintendent, Railway Mail Service, 3rd grade, is granted privilege leave for two months, with effect from the 15th April, 1896.

The following officiating appointments are made during the absence on privilege leave of Mr. Byrne, or until further orders:—

Mr. A. E. B. Hutton, Superintendent of Post Offices, 4th grade, to officiate in the 3rd grade.

Mr. A. D. Gibson to officiate as Superintendent, Railway Mail Service, 4th grade.

The 27th May, 1896.

No. 1495.—Mr R. H. Granger, Superintendent of Post Offices, 2nd grade, is granted privilege leave for one month, with effect from the 15th May, 1896, or from the date on which he may avail himself of it.

Mr. Willait Rai is appointed to officiate as Superintendent of Post Offices, 4th grade, during the absence on privilege leave of Mr. Granger, or until further orders.

A. U. FANSHAWE,
Dir. Genl. of the Post Office of India.

SEA AND FOREIGN MAILS.

Mails for	Date of closing at Calcutta.	Route by which despatched.
	1896	
Aden, Egypt, Europe, America, Zanzibar, Mozambique, Delagoa Bay, Mauritius, Seychelles, Madagascar, Réunion, etc., Natal and Cape Colony, and in general all countries served through the United Kingdom.	2nd June	Per P. & O. Str. from Bombay.
Straits Settlements, China, and Japan.	6th ,,	*Vid* Tuticorin and Colombo.
*Australasian Colonies . .	6th ,,	Ditto.*
Ditto ditto . .	30th May	Ditto.
Colombo	8th June	Per P. & O. Str. *Coromandel.*
Straits Settlements, China, and Japan.	5th ,,	Per Steamer *Kutsang.*
Rangoon and Moulmein . .	5th ,,	Per Steamer *Purnea.*
Rangoon, Moulmein, Penang, and Singapore.	2nd ,,	Per Steamer *Malda.*
Akyab, Kyaukpyu, Sandoway, and Rangoon.	3rd ,,	Per Steamer *Kistna.*
Port Blair	2nd ,,	*Vid* Rangoon.
Mauritius and Bourbon . .	30th May	*Vid* Tuticorin and Colombo.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the Steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any Steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a Steamer not belonging to one of the regular lines.

N.B.—The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late-fee at 7 P.M. precisely; after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up at 7-30 P.M.

On the day of despatch of the Mail for the Australasian Colonies and the Far East *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8 P.M., and late letters and papers fully prepaid will be received up to 8-30 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 7 P.M., and late letters and papers will be received up to 7-30 P.M. for despatch by any Foreign Mails despatched the same night. The late-fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS.
Presidency Postmaster, Calcutta.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates —per four-ounce tin, *R2-8*; per eight-ounce tin, *R5*; per pound tin, *R10*. The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the under-noted rates: per four-ounce tin, *R3*; per eight-ounce tin, *R6*; per pound tin, *R12*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

سنکونا فبري فيوج يعنے تپ بھگانے والے سنکونا *

سنکونا فبري فيوج کلکته کے بوٹانکل گارڈن يعنے کمپني باغ کے سپرنٹنڈنٹ صاحب سے هرايک ملازم سرکاري اور ايک مشت چھه پونڈ تک لينے والا هر آدمي حسب نرخ ذيل خريد کرسکتا هي— يعنے چار اونس والا ٹين بقيمت دو روپيه آٹھه آنه ؛ آٹھه اونس والا ٹين بقيمت پانچ روپيه ؛ ايک پونڈ والا ٹين بقيمت دس روپيه *

عام آدميوں کو يهه دوا بوٹانکل گارڈن يعنے کمپني باغ کے سپرنٹنڈنٹ صاحب سے بقيمت نقد حسب نرخ ذيل مل سکتي هي - يعنے چار اونس والا ٹين بقيمت تين روپيه ؛ آٹھه اونس والا ٹين بقيمت چھه روپيه ؛ ايک پونڈ والا ٹين بقيمت باره روپيه *

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin, R18, or, post free, R18-12.
½ „ R 9, „ R9-8.
¼ „ R4-8, „ R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮৲ বা ডাকমাশুল বিনা ১৮৲৹
½ আধ „ „ ৯৲ „ ৯৲৹
¼ সিকি „ „ ৪৷৸৲ „ ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের বোটানিক বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

CEMETERY NOTICE.

I hereby give notification in accordance with Revised Rules for Cemeteries, Home Department Notification, Ecclesiastical, No. 103, dated the 20th June, 1885, Rule XIX, that the undermentioned tombs in St. Mary's Cemetery, Fort Saint George, Madras, are in a ruinous condition and that if no person will undertake to repair them within three months from this date, they will be made level with the ground and slabs contained will be placed over the grave in simple masonry, or be inserted in the wall of the Cemetery:—

Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage*. . . Rs22-8

	Without postage.	With postage.
	R a. p.	R a. p.
For the Calcutta Series	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.	For mofussil.
	R a. p.	R a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 3
„ each of the Madras, Bombay, and Allahabad Series; per copy . . .	0 5 3	0 5 9
„ the Calcutta Series. For the year .	7 2 6	8 6 3
„ each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	R 20	R 14	R 9
„ three issues . . .	„ 55	„ 36	„ 24
„ six „ . . .	„ 100	„ 68	„ 45
„ nine „ . . .	„ 145	„ 96	„ 64
„ twelve „ . . .	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.	With postage.
	R a. p.	R a. p.
Bengal Law Reports, for one year .	20 0 0	22 8 0
Single copies Rs2 per copy.		
Full Bench Rulings, Parts I and II .	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, Rs22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

No. 939-*G*.—Lieutenant F. DeB. Hancock, Indian Staff Corps, is appointed to officiate as Assistant to the Governor-General's Agent at Baroda in charge of the Amreli Mahals, with effect from the date of assuming charge, and during such time as Captain P. Z. Cox may officiate as First Assistant to the Governor-General's Agent at Baroda, or until further orders.

No. 942-*G*.—Captain W. E. Evans-Gordon, Indian Staff Corps, Political Agent of the 3rd (officiating Additional Political Agent of the 1st) Class, and officiating Political Agent in Jhalawar, is granted furlough for 180 days, under Article 343 of the Civil Service Regulations, with effect from the 8th May, 1896, or the subsequent date on which he may avail himself of the furlough.

No. 1829-*I.B.*—Whereas the rulers of the States mentioned in the second column of the schedule hereto annexed have ceded to the British Government full jurisdiction within the lands which lie within their respective States and are occupied, or may hereafter be occupied, by the sections of the Indian Midland Railway system specified opposite their names respectively in the first column of the said schedule (including the lands occupied by stations, by out-buildings, and for other railway purposes): In exercise of this jurisdiction and of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879) and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to issue the following orders:

PART I.

The provisions, so far as they may be suitable, and as amended by subsequent enactments, of the Acts mentioned below are hereby applied to the aforesaid lands, namely:

No. and year.	Subject.
Act XLV of 1860	Penal Code.
„ V of 1861	Police.
„ VI of 1864	Whipping.
„ I of 1871	Cattle trespass.
„ X of 1882	The Code of Criminal Procedure, 1882.
„ III of 1888	Police.

Provided that, for the purpose of facilitating the application of the provisions of the enactments hereby applied, any court within the aforesaid lands may construe them with such alterations, not affecting the substance, as may be necessary or proper to adapt them to the matter before the Court: Provided, further, that the Code of Criminal Procedure, 1882, shall be subject to the following modifications, namely:

(*a*) that trials before the Court of Session may, in the discretion of the Judge, be without jury or aid of assessors; and

(*b*) that, notwithstanding anything in the Police Act (V of 1861) or in any other enactment for the time being in force, the Governor-General in Council may confer on any police officer all or any of the powers conferred or conferable by or under the Code on any Magistrate, in regard to particular cases or to a particular class or particular classes of cases, or to cases generally.

PART II.

For the purposes of the exercise of criminal jurisdiction within the aforesaid lands, the following arrangements shall be made:

(1) There shall be a Railway Magistrate, who shall be the Superintendent, Government Railway Police, Southern Section, Jhansi.

(2) Every officer mentioned in the third, fourth or fifth column of the schedule hereto annexed shall exercise, within such sections of the Indian Midland Railway system mentioned opposite his name in the first column of that schedule as are situate within the territories of the States mentioned opposite his name in the second column of that schedule, the powers described in section 30 of the Code of Criminal Procedure, the powers of a Magistrate of the 1st class, and the powers of a District Magistrate respectively as described in that Code respectively; provided that, in any case in which the complainant (if any) and all the accused persons are not British subjects, it shall be in the discretion of the said officers, respectively, to decline to exercise the powers hereby conferred upon them.

3. Every officer mentioned in the sixth or seventh column of the schedule hereto annexed shall exercise, within such sections of the Indian Midland Railway system mentioned opposite his name in the first column of that schedule as are situate within the territories of the States mentioned opposite his name in the second column of that schedule, the powers of a Court of Session

or a High Court, as the case may be, in respect of all offences over which jurisdiction is exercised by any officer mentioned opposite his name in the third, fourth or fifth column of that schedule.

(4) In the exercise of the jurisdiction of a Court of Session conferred upon the Resident at Gwalior, the Political Agent, Eastern Rajputana States, and the Political Agent, Bhopal, in the sixth column of the schedule hereto annexed, any of the said officers may take cognizance of an offence, as a Court of original criminal jurisdiction without the accused person being committed to him by a Magistrate, and shall, when so taking cognizance of an offence, follow the procedure laid down by the Code of Criminal Procedure, 1882, for the trial of warrant-cases by Magistrates.

(5) This part of this notification applies to all proceedings, except—

(*a*) proceedings against European British subjects or persons jointly charged with European British subjects; and

(*b*) proceedings pending at the date of this notification, which should be carried on as if this notification had not issued.

(6) The following notifications of the Government of India in the Foreign Department are hereby cancelled :

No. 1830-*I.B.*—Whereas the rulers of the States mentioned in the second column of the schedule hereto annexed have ceded to the British Government full jurisdiction within the lands which lie within their respective States and are occupied, or may hereafter be occupied, by the sections of the Indian Midland Railway system specified opposite their names respectively in the first column of the said schedule (including the lands occupied by stations, by out-buildings, and for other railway purposes): In exercise of this jurisdiction and of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879) and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to issue the following orders:

PART I.

The provisions, so far as they may be suitable, and as amended by subsequent enactments, of the Acts mentioned below are hereby declared to apply to the aforesaid lands, namely:

No. and year.	Subject.
Act X of 1865	Succession.
„ XIV of 1866	Post office.
„ VII of 1870	Court Fees.
„ I of 1872	Evidence.
„ IX of 1872	Contract.
„ III of 1877	Registration.
„ XV of 1877	Limitation.
„ I of 1879	Stamps.
„ V of 1881	Probate and Administration.
„ XIV of 1882	Civil Procedure.
„ XIII of 1885	Telegraph.
„ IX of 1887	Provincial Small Cause Courts.
„ VII of 1889	Succession Certificates.

Provided that, for the purpose of facilitating the application of the provisions of the enactments hereby applied, any Court within the aforesaid lands may construe them with such alterations, not affecting the substance, as may be necessary or proper to adapt them to the matter before the Court.

PART II.

For the purposes of the exercise of civil jurisdiction within the aforesaid lands, the following arrangements shall be made:

(1) The officer mentioned in the third column of the schedule hereto annexed shall exercise, within the aforesaid lands, the powers of a Court of Small Causes, with jurisdiction in all suits cognizable under Act IX of 1887 when the amount or value of the subject-matter does not exceed one thousand rupees.

(2) Every officer mentioned in the fourth column of the schedule hereto annexed shall exercise, within such sections of the Indian Midland Railway system mentioned opposite his name in the first column of that schedule as are situate within the territories of the States mentioned opposite his name in the second column of that schedule, the powers of a District Court as defined in the Code of Civil Procedure (Act XIV of 1882) with jurisdiction in all original suits, whatever be the amount or value of the subject-matter, and in all other cases in which jurisdiction is conferred on the District Court by the law for the time being in force within the said sections of the Indian Midland Railway system.

(3) The officers mentioned in the fifth column of the schedule hereto annexed shall exercise, within such sections of the Indian Midland Railway system mentioned opposite their names respectively in the first column of that schedule as are situate within the territories of the States mentioned opposite their names in the second column of that schedule, the powers of a High Court for the purposes of hearing appeals from the decisions and orders of the said District Courts, and of disposing of references from the said Court of Small Causes, and for all other purposes whatever connected with the administration of civil justice within the said sections of the Indian Midland Railway system.

(4) The following notifications of the Government of India in the Foreign Department are hereby cancelled:

(*a*) Notification No. 4078-I., dated the 3rd December 1890.

(*b*) „ „ 1336-I., „ „ 23rd March 1891. So much as relates to the Indian Midland Railway.

PUNJAB FRONTIER FORCE.

No. 673.—In G. G. O. No. 146 of 1896, *for* "15th October 1895" *read* "16th October 1895."

No. 674.—*3rd Regiment of Punjab Cavalry*—

Dafadar Mahbub Ali to be Jemadar, *vice* Abdul Aziz, deceased, with effect from the 27th December 1895.

No. 675.—*6th Regiment of Punjab Infantry*—

Havildar Sant Singh to be Jemadar, *vice* Achchhar Singh, resigned, with effect from the 14th February 1896.

RETIREMENTS.

No. 676.—Lieutenant-Colonel Edward Quin, Indian Staff Corps, has been permitted by the Secretary of State for India to retire from the service, with effect from the 10th June 1896, subject to Her Majesty's approval.

VOLUNTEER CORPS.

No. 677.—His Excellency the Governor-General of India has been pleased to confer the Volunteer Officers' Decoration upon the undermentioned officer of the Indian Volunteer Force, who has been duly recommended for the same, under the Royal Warrant of 24th May 1894 (clause 101, India Army Circulars of 1894):

North-Western Railway Volunteer Rifle Corps.

Honorary Captain and Paymaster Thomas Siddle.

APPOINTMENTS.

No. 678.—*Berar Volunteer Rifle Corps*—

Arthur Lucas, Esquire, to be Major Commandant, with effect from the 3rd April 1896, *vice* Nicholetts, transferred to the supernumerary list.

No. 679.—*North-Western Railway Volunteer Rifle Corps*—

Supernumerary Captain Frederick George Royal Dawson to be Captain, with effect from the 1st April 1896, *vice* Cardew, transferred to the supernumerary list.

Henry Parsall Burt, Esquire, to be Captain, *vice* Ivens, promoted.

No. 680.—*Midland Railway Volunteer Rifles*—

Herbert Milton Dwane and Henry Gerald Keily, Gentlemen, to be Second-Lieutenants, with effect from the 25th May 1896, to complete the establishment.

PROMOTIONS.

No. 681.—*Naini Tal Volunteer Rifle Corps*—

Second-Lieutenant Charles Christian Barthmann to be Lieutenant, with effect from the 28th May 1896, to complete the establishment.

No. 682.—*1st Battalion, Bombay, Baroda and Central India Railway Volunteer Rifle Corps*—

Lieutenant Michael William Fleischer to be Captain, *vice* Deane, transferred to the 2nd Battalion.

Second-Lieutenant Albert Clifford Owen to be Lieutenant, *vice* Fleischer, promoted.

No. 683.—*North-Western Railway Volunteer Rifle Corps*—

Major Richard Tickner to be Lieutenant-Colonel, *vice* Wilson, transferred to the supernumerary list.

Captain Fletcher James Ivens to be Major, *vice* Tickner, promoted.

No. 684.—*Midland Railway Volunteer Rifles*—

Second-Lieutenant Edward William Greenshields to be Lieutenant, with effect from the 25th May 1896, *vice* Howell, resigned.

RESIGNATIONS.

No. 685.—*1st Battalion, Calcutta Volunteer Rifle Corps*—

Second-Lieutenant T. S. Earl resigns his commission.

No. 686.—*Malabar Volunteer Rifles*—

Major H. Moberly resigns his commission.

No. 687.—*East Coast Rifle Volunteers*—

Lieutenant L. T. Harris resigns his commission.

MILITARY WORKS DEPARTMENT.

PROMOTIONS.

No. 688.—The following promotions and reversions are made in the Engineer Establishment of the Military Works Department, with effect from the dates specified:

Names.	From	To	Nature of promotion, &c.	With effect from
Lieutenant C. O. Halliday, R.E.	Assistant Engineer, 2nd grade, *supernumerary*.	Assistant Engineer, 1st grade, *supernumerary*.	Permanent . .	27th March 1896.
Lieutenant F. J. W. Johnson, R.E.	Assistant Engineer, 2nd grade.	Assistant Engineer, 1st grade.	Permanent . .	
Lieutenant A. E. Turner, R.E.	Assistant Engineer, 2nd grade, *temporary*.	Assistant Engineer, 2nd grade.	Permanent . .	
Lieutenant H. Biddulph, R.E.	Attached	Assistant Engineer, 2nd grade.	Temporary . .	
Lieutenant A. B. Carey, R.E.	Attached	Assistant Engineer, 2nd grade.	Temporary . .	31st March 1896.
Lieutenant G. R. Pridham, R.E.	Attached	Assistant Engineer, 2nd grade.	Officiating . .	1st April 1896.
Lieutenant G. R. Pridham, R.E.	Assistant Engineer, 2nd grade, *temporary*.	Attached	Reversion . .	7th April 1896.
Lieutenant G. R. Pridham, R.E.	Attached	Assistant Engineer, 2nd grade.	Officiating . .	10th April 1896.
Second-Lieutenant W. Bovet, R.E.	Attached	Assistant Engineer, 2nd grade.	Officiating . .	15th April 1896.
Captain A. R. Reynolds, R.E.	Attached	Executive Engineer, 4th grade.	Officiating . .	16th April 1896.
Captain W. A. Liddell, R.E.	Attached	Executive Engineer, 4th grade.	Officiating . .	
Second-Lieutenant W. Bovet, R.E.	Assistant Engineer, 2nd grade, *officiating*.	Attached	Reversion . .	
Captain C. E. Salvesen, R.E.	Attached	Executive Engineer, 4th grade.	Officiating . .	19th April 1896.
Captain C. E. Salvesen, R.E.	Executive Engineer, 4th grade, *officiating*.	Attached	Reversion . .	28th April 1896.
Captain C. E. Salvesen, R.E.	Attached	Executive Engineer, 4th grade.	Officiating . .	5th May 1896.
Lieutenant R. P. T. Hawkley, R.E.	Attached	Assistant Engineer, 2nd grade.	Officiating . .	8th May 1896.

No. 689.—The following promotions are made in the Engineer Establishment of the Military Works Department, with effect from the dates specified:

Names.	From	To	Nature of promotion, &c.	With effect from
Second-Lieutenant W. Bovet, R.E.	Attached	Assistant Engineer, 2nd grade.	Officiating . .	14th May 1896.
Second-Lieutenant F. W. Tillard, R.E.	Attached	Assistant Engineer, 2nd grade.	Officiating . .	15th May 1896.
Second-Lieutenant B. W. Mainprice, R.E.	Attached	Assistant Engineer, 2nd grade.	Officiating . .	17th May 1896.

MARINE DEPARTMENT.

PROMOTIONS.

No. 37.—The following promotions are made in the Royal Indian Marine, with effect from the dates specified:

To be Engineers.

Assistant Engineer F. Olford,—28th January 1896.

Assistant Engineer E. J. Ellery,—11th May 1896.

P. J. MAITLAND, *Major-General,*
Secretary to the Government of India.

MILITARY DEPARTMENT.

NOTIFICATION.

Simla, the 5th June, 1896.

Under clause 53 of the Regulations appended to the Regimental Debts Act of 1893, it is notified that reports of the deaths of the undermentioned commissioned officers, on the dates specified, were received in the Military Department between the 23rd May and the 5th June 1896:

Corps.	Rank and Names.	Date of decease.	Place of decease.	Testate or Intestate.	Remarks.
Indian Staff Corps .	Lieutenant-Colonel J. Humfrey.	13th May 1896 .	Bombay.		
1st Battalion, The King's Royal Rifle Corps.	Captain H. W. Christian .	21st May 1896 .	Suru Kagal (Kashmir).		

Statement of Deposits on account of Estates between the 9th May and the 5th June 1896.

On whose account.	Rank.	Corps.	Date of decease.	Testate or Intestate.	Total unclaimed amount deposited.	Amount paid in India.	Date to which claims will be received.
					Rs. a. p.		
William James George Nugent. (a)	Assistant Surgeon.	Indian Subordinate Medical Department (Bengal).	30th January 1896.	Intestate .	70 1 2		

(a) *Next-of-kin.*—Children—Harriet Augustina Nugent, Wilfrid Stanley Nugent, Winifred Nugent, Mabel May Nugent, Gertrude Mary Nugent, Ernest Henry Charles Nugent, William James Anthony Nugent.
Brother—Richard Nugent, Medical Practitioner, Calcutta. (Administrator-General, Bengal, administering.)

P. J. MAITLAND, *Major-General,*
Secretary to the Government of India.

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

Simla, the 1st June, 1896.

No. 259.—The services of Lieutenant E. A. Tandy, R.E., who is temporarily employed in the Public Works Department, Burma, as an Assistant Engineer, 3rd Grade, are replaced at the disposal of the Military Department.

The 2nd June, 1896.

No. 260.—Rai Bahadoor Ram Dass Bhuttacharjee, Sub-Engineer, 1st Grade, and Honorary Assistant Engineer, Burma, is permanently transferred to Bengal.

This cancels Public Works Department Notification No. 189, dated the 20th April 1896.

TELEGRAPH.

The 4th June, 1896.

No. 261.—The following reversions are made in the Superior Establishment of the Indian Telegraph Department, with effect from the dates specified:

Name.	From	To	Date.
Mr. A. P. Hill . .	Superintendent, Class V, 2nd Grade, temporary rank.	Assistant Superintendent, Class VI, 1st Grade.	26th April 1896.
Mr. I. C. Thomas .	Superintendent, Class V, 2nd Grade, temporary rank.	Assistant Superintendent, Class VI, 1st Grade.	25th April 1896.

No. 262.—The following is published for general information:

No. 105 I., dated Simla, the 29th May 1896.

RESOLUTION—By the Government of India, Public Works Department.

Review of the Revenue Report of Irrigation Works in the Punjab for 1894-95.

Read—

Letter No. 1661 A. I., dated 17th December 1895, from the Government of the Punjab, forwarding the Revenue Report of Irrigation Works in the Punjab for 1894-95, and the Resolution by that Government reviewing the Report.

OBSERVATIONS.—The Capital outlay (exclusive of contributions) incurred during and up to the end of the year is shown in the following table under the different heads of account:

	Number of works.	During the year 1894-95.							Total direct and indirect to end of 1894-95.
		Works.	Establishment.	Tools and Plant.	Suspense Account.	Total direct charges.	Indirect charges.	Total direct and indirect charges.	
1	2	3	4	5	6	7	8	9	10
MAJOR WORKS.		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Protective Irrigation Works (Account head 35) . . .	1	2,196	489	33	—68	2,650	120	2,770	36,36,947
Irrigation Works not charged against Revenue (Account head 40) . . .	7	24,59,750	5,16,647	67,980	—1,19,176	29,25,210	78,221	30,03,431	7,28,69,867
MINOR WORKS AND NAVIGATION.									
Works of which Capital and Revenue Accounts are kept (Account head 43) . . .	4	19,752	1,809	124	642	22,327	—551	21,776	16,36,426
TOTAL	12	24,81,707	5,18,945	68,137	—1,18,602	29,50,187	77,790	30,27,977	7,81,63,240

2. The total capital outlay of Rs. 30,27,977 was less by Rs. 7,08,456 than that of the preceding year, which, however, was unusually high.

By far the greater part of the outlay was incurred on the Chenab Canal, the expenditure on which during the year was Rs. 17,54,976. Good progress is reported to have been made on all the works connected with the extension project of this canal, the first portion of which will, it is anticipated, come into operation during the year 1896-97.

On the Sirsa Branch of the Western Jumna Canal, Rs. 5,42,498 were expended from Imperial Funds and Rs. 1,23,526 contributed by the Patiala State, and it is stated that the works chargeable to Capital Account were practically completed by the end of the year when the construction estimate was closed.

On the other canals, the expenditure charged against their open Capital Accounts was incurred chiefly on extensions and other works of a remunerative character. The amounts so spent were as follows:

	Rs.
Western Jumna Canal (excluding Sirsa Branch)	2,65,184
Bari Doab Canal	3,60,221
Sirhind Canal from Imperial Funds	39,471
Ditto from contributions	55,711
Sidhnai Canal	40,320
Lower Sohag and Pára Canal	257
Jhelum Canal	504

3. The lengths of main canals and distributaries in operation in British territory at the close of the year under review were as follows:

	Completed.	
	Miles of Canals.	Miles of Distributaries.
MAJOR WORKS.		
Protective Irrigation Works	22	143
Irrigation Works not charged against Revenue	1,409	6,120
MINOR WORKS—		
Of which Capital and Revenue Accounts are kept	1,879	271
Of which only Revenue Accounts are kept	820	453
TOTAL	4,130	6,987

These figures show an increase of 75 miles in the mileage of open canals, and of 331 miles in the aggregate length of distributaries, over the figures of last year. There was no change in the length (386 miles) of navigable canals.

The length of open canals in operation during the year in Native States was the same as in 1893-94, *viz.*, 258 miles, of which 46 miles are navigable. The aggregate length of distributaries, however, in these States increased from 2,109 miles to 2,143 miles.

4. The financial results of the canals in operation are shown in the following statement:

Canal.	Total direct and indirect capital outlay to end of 1894-95.	Gross Revenue collected.			Working Expenses.			Net Revenue	Percentage of net revenue on capital outlay.
		Irrigation Revenue *	Miscellaneous receipts.	Total.	Direct.	Indirect.	Total.		
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Major Works.									
35—Protective Irrigation Works in operation—

GRAND TOTAL, 1893-94	7,51,24,520	63,25,701	6,29,755	70,05,546	32,12,882	1,07,081	34,09,033	35,05,613	4·54†

* Refunds deducted from Revenue.

† These percentages of net revenue on capital outlay do not include Muzaffargarh and Shahpur (Provincial) Canals for which Capital Accounts are not kept.

5. Taken as a whole, and including *all* works (both major and minor) for which Capital and Revenue Accounts are maintained, the Punjab Canals showed the same net return as last year (4·54 per cent.) on the total capital expenditure to the end of the year. This is a very satisfactory result, as it shows that the expansion of revenue is keeping pace with the increase in Capital Expenditure, although this increase has been large (Rs. 30,27,473) and is for the most part as yet quite unremunerative.

Under *Major Works* (the Capital Expenditure on which stood at Rupees 7,64,95,573 at the end of the year) the *net revenue* amounted to Rs. 33,15,002, equivalent to a return on capital outlay of 4·33 per cent. as compared with 3·95 per cent. last year.

The net revenue exceeded the interest charges by Rs. 4,34,432 as compared with a surplus of Rs. 1,55,982 in the previous year, whilst at the close of the year under review the net revenue to date of all Major Works exceeded the total interest charges by nearly 247¾ lakhs of rupees.

Turning to individual canals, it will be seen that there has been considerable improvement on the *Western Jumna Canal* (including the Sirsa Branch), the return on Capital Outlay having amounted to 5·39 per cent. as against 2·92 per cent. in 1893-94 and 4·93 per cent. in 1892-93.

On the *Sirhind Canal*, the returns were less favourable (1·53 per cent.), the falling off being due to the short rabi of 1893-94 having been followed by a still shorter kharif in 1894. The case of this canal has been dealt with at some length in the Chief Engineer's Report (paragraphs 100 and 104), and the conclusion arrived at may be accepted that though the returns of this canal must, for the reasons given, be liable to considerable fluctuations, at any rate for some time to come, still there are good grounds for believing that a succession of five such harvests as those ending with the rabi of 1894-95 is wholly exceptional, and that in the majority of years the canal will prove a remunerative as well as useful irrigation work.

On the *Bari Doab Canal*, the net revenue was slightly in excess of that of the preceding year, the percentage on capital outlay being 9·31 per cent. as compared with an average of 8·74 during the previous four years, while the accumulated surplus of revenue over interest charges on the 31st March 1895 had risen to Rs. 48,52,860.

On the *Lower Sohag and Pára Canal*, the net revenue increased to Rs. 31,259 as compared with Rs. 5,234 in the previous year.

The *Sidhnai Canal* maintained its reputation as a very remunerative project, having given a return of 16·16 per cent. on the Capital Expenditure.

The *Swat River Canal*, though classed as a Protective Work, also maintained the character it has earned as a remunerative work, as it yielded a net revenue of 5·07 per cent.

The prospects of the *Chenab Canal* are most promising. A comparison of the financial results attained during the year, with the forecast of 1891, shows that, though the Capital Outlay to the end of 1894-95 was nearly 15 lakhs less than had been anticipated, the area irrigated during the year was some 100,000 acres more than the forecast, while there was a net revenue to the end of the year amounting to Rs. 4,160, instead of an anticipated loss of Rs. 4,24,590. In other words, the revenue was Rs. 4,28,750 better than the forecast, whilst the Capital Expenditure to the same date had been about 15 lakhs below what had been anticipated.

Under *Minor Works* there was a considerable decrease, amounting to Rs. 2,69,442 in the net revenue as compared with that of 1893-94. The causes which led to this falling off are fully explained in the Report under review, and it is pointed out by the Local Government that, notwithstanding the unfavourable conditions of the year, the return on the capital outlay amounted to 14·31 per cent., so that these canals continue to be highly remunerative.

6. The following statement shows the areas irrigated during the year from the various canals, and the corresponding assessments of water-rates:

Canal.	Area irrigated		Assessment, 1894-95.				Assessment, 1893-94.	Rate per acre irrigated.	
	1894-95.	1893-94.	Occupier's rate.	Owner's rate.	Share of land revenue and other indirect receipts.	Gross assessed revenue, excluding miscellaneous.		1894-95.	1893-94.

* This figure includes full rabi assessments at the consolidated rate, of which two-thirds only was due to water-rates, the remaining third being creditable to land revenue.

† The amount of assessment of water-rates during 1893-94 was incorrect.

7. As explained in last year's review, the areas under the inundation canals do not include areas known as *Kharaba*, on which the crops from any cause failed to come to maturity.

The total area irrigated exceeded that of the previous year by 24,443 acres.

8. The areas irrigated in the kharif and rabi seasons were as follows:

	Kharif.	Rabi.
	Acres.	Acres.
Perennial Canals	578,657	912,440
Inundation Canals	591,907	698,659
	1,170,564	1,611,099

There was a falling off in both the kharif and rabi irrigation on the Perennial Canals. The decrease, which is explained fully in the Report and commented on in the Local Government's Resolution, was mainly due to the copious rainfall of the year, which is said to have been very favourable for agricultural operations throughout the province. On the Inundation Canals, on the other hand, there was an increase in the areas irrigated in both seasons, and it is stated that the total area watered from these canals has only once been exceeded, *viz.*, in 1892-93.

9. The following statement compares the areas of the principal crops irrigated during the last two years:

	1894-95.	1893-94.
	Acres.	Acres.
Sugarcane	75,374	64,481
Rice	179,542	188,155
Jowar	134,549	105,856
Maize	101,475	132,189
Wheat	1,063,144	1,096,748
Cotton	333,479	269,934

The value of the crops irrigated in British territory alone is estimated at about 743 lakhs of rupees.

10. The "duty" obtained on the Perennial Canals, their discharges, and the minimum discharges of the rivers from which they derive their supplies, are exhibited in the following table:

Canals	Minimum discharge of river during 1894-95.	Maximum discharge of canal as designed.	Maximum discharge of canal during year.	Average discharge at head during year.		Acres irrigated per cubic foot of average discharge.	
	Cubic feet per second.	Cubic feet per second.	Cubic feet per second.	Kharif. Cubic feet per second.	Rabi. Cubic feet per second.	Kharif.	Rabi.
1	2	3	4	5	6	7	8
Swat River	2,291	700	673	423	475	69	132
Western Jumna (including Sirsa Branch)	6,600	4,000	4,000	3,001	2,727	72	50
Bari Doab	3,123	3,000	4,081	3,292	3,019	63	108
Sirhind	7,035	5,050	6,610	*2,192	2,284	19	72
Chenab	6,407	8,000	2,640	1,959	2,115	50	81

* Excluding Native States branches.

The rabi duties are all lower than usual owing to the good and seasonable rainfall of the year which removed any strong incentive to economy in the use of canal water. Special reasons for the low duties in both crops on the Sirhind Canal are given in paragraph 92 of the Chief Engineer's report, whilst an explanation of the low duties on the Chenab Canal is contained in paragraph 121 of the same report. It is pointed out that on this new canal the tenants at present appear to be aiming at quantity rather than quality, and that the canal is in consequence severely taxed to afford the requisite supply to a far larger area of land than it had ever been intended to irrigate. It is further suggested that it may be found desirable to restrict remissions in those cases in which tenants have recklessly attempted to irrigate more than a certain proportion of their holdings in each harvest, and it is stated that this question, which is one of great importance, is at present under consideration. Doubtless some remedy must be devised for the state of affairs described, though great care will be needed in limiting the remissions in such a manner that the restrictions may not prove to be oppressive in practice. The Government of India, however, consider that with this expression of opinion the matter may safely be left in the hands of the Government of the Punjab in the full assurance that in dealing with this matter it will safeguard the interests both of the tenants and of the State.

11. The following statement shows the results of the working of the Native States branches of the Sirhind Canal:

State.	Capital outlay.	Gross revenue less refunds.	Working expenses.	Net revenue.	Percentage on capital outlay.	Water-rates assessed.	Area irrigated.	Water-rates assessed per acre.	Working expenses per acre.
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.		Rs.	Acres.	Rs.	Rs.
Patiala	1,15,44,411	4,14,683	2,55,812	1,58,871	1·38	3,30,954	95,793	3·47	2·68
Nabha	12,34,558	47,689	46,443	1,246	0·10	38,914	11,430	3·40	4·06
Jhind	10,27,234	37,158	22,303	14,855	1·26	29,362	5,608	3·63	4·15
TOTAL, 1894-95	1,38,06,203	4,99,530	3,24,558	1,73,972	1·25	3,99,260	1,12,137	3·47	2·89
TOTAL, 1893-94	1,38,40,482	3,96,726	3,82,563	14,163	0·10	4,26,171	1,23,927	3·44	3·08

The decrease in the area irrigated amounted to 11,590 acres as compared with last year's figures, and was entirely in the rabi irrigation. The kharif area,

on the other hand, was greater than that of the previous year and exceeded for the first time the normal proportion of the British area.

The returns shown in column 6 of the preceding table are obtained from the statements furnished by each State. In Patiala and Jind the percentage is only slightly below that obtained on the British branches, which was 1·53.

The value of the crops irrigated by the Patiala branches is stated by the Local Government to have been estimated at Rs. 28,15,425, giving an average rate of Rs. 25 per acre.

12. The working expenses of the several canals are shown in the following table:

	Canals.	1894-95.					1893-94.
		Works.	Establishment.	Tools and Plant.	Indirect charges.	Total.	Total.
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
	MAJOR WORKS.						
PERENNIAL.	35—Protective Irrigation Works—						
	Swat River Canal	27,989	54,269	693	7,598	90,549	95,213
	49—Irrigation Works not charged against Revenue—						
	Western Jumna Canal, including Sirsa Branch	3,53,777	2,91,615	13,699	41,513	7,00,604	6,33,099
	Bari Doab Canal	3,31,727	2,75,460	1,011	38,564	6,46,762	5,93,835
	Sirhind Canal (British portion)	2,76,228	2,83,995	10,766	39,759	5,90,748	6,20,418
	Chenab Canal	2,21,936	2,05,140	3,890	28,721	4,59,696	3,30,725
	Lower Sohag and Para Canal	43,968	23,202	14	3,248	70,432	91,981
	Sidhnai Canal	53,121	32,166	1,718	4,763	91,758	79,789
	TOTAL MAJOR WORKS	12,88,746	11,65,856	31,781	1,64,166	26,50,549	24,45,060
	Per acre irrigated	...	...	...	...	1·55	1·40
	MINOR WORKS.						
INUNDATION.	43—Works for which Capital and Revenue Accounts are kept—						
	Upper Sutlej Canals	70,158	68,507	1,379	9,591	1,49,635	98,046
	Lower Sutlej and Chenab Canals	3,39,434	99,735	376	13,763	4,52,808	3,85,718
	Indus Canals	1,24,487	75,801	1,000	10,642	2,11,930	2,11,021
	Shahpur Canals	29,782	17,407	345	2,437	49,971	43,803
	Works for which Capital Accounts are not kept—						
	Muzaffargarh Canal	1,91,554	58,552	455	8,009	2,58,570	2,26,285
	Shahpur (Provincial) Canal	14,441	20,553	315	...	35,309	...
	TOTAL MINOR WORKS	7,69,856	3,40,055	3,870	44,442	11,58,223	9,64,873
	Per acre irrigated	...	...	...	...	1·19	0·95

On Major Works there was an increase in the working expenses amounting to Rs. 2,05,489. On the Chenab the excess amounted to Rs. 1,28,971 and is reported to have been caused by the special repairs to the weir and to the Rakh and Mian Ali branches of the canal. On the Western Jumna Canal the excess, amounting to Rs. 67,505, is attributed to the heavy expenditure necessitated by the failure of the under-sluices during the flood season. Under Minor Works, the working expenses exceeded those of 1893-94 by Rs. 1,93,350.

The working expenses on Major and Minor Works together amounted to 50·6 per cent. of the gross revenue realised.

13. The following is a statement of the establishment charges for all the canals in the province :

	Revenue management.	Maintenance.	TOTAL.	Percentage.
	Rs.	Rs.	Rs.	
Direction	1,07,198	1,16,188	2,23,386	14·84
Executive	7,24,988	3,62,168	10,87,156	72·19
Medical	...	14,634	14,634	0·97
Collection	1,79,200	...	1,79,200	11·90
Navigation	1,535	...	1,535	0·10
TOTAL .	10,12,921	4,92,990	15,05,911	100·00

14. The cost of Revenue management amounted to 13·4 per cent. of the gross revenue realised.

15. The following are some of the principal works charged against the Revenue Accounts :

Swat River Canal.—Fixing gates and gearing to minor heads; building a new rapid; six new foot-bridges on Rájbahás; a verandah to the Khanmái bungalow and a causeway.

Western Jumna Canal.—New grooves for the head sluices; remodelling head at Dhatrat; additions and improvements to certain buildings.

Bari Doab Canal.—Constructing Shakri minor, Sobráon branch; remodelling Rájbahás; raising piers and abutments of Aliwal Regulator and Escape; building quarters for some subordinates, and some cook-houses.

Sirhind Canal.—Fixing gates and gearing to the heads of some minors and making a village road bridge.

Chenab Canal.—Building two Zilladars' rest-houses; construction of silting reaches on the Rakh branch; stop-dams on some of the tail Rájbahás, and forming date-palm groves in the 2nd Division.

Indus Inundation Canals.—Constructing reclamation bunds, the principal of which is said to have proved very successful, both in its effect on the working of the canal and in the reclamation of river lands.

16. The navigation receipts and charges are shown in the margin.

	Receipts. Rs.	Charges. Rs.
Western Jumna Canal	64,759	8,259
Sirhind Canal (including Native States branches)	7,256	9,780
TOTAL .	72,015	18,039

There was a satisfactory increase in the gross receipts collected on the Western Jumna Canal, due, it is said, entirely to the increasing raft traffic. There was a decrease in the receipts on the Sirhind Canal, also in the raft traffic, but the charges were Rs. 3,078 less than last year. The net profit on the navigation operations amounted to Rs. 53,976.

17. The receipts on account of water-power amounted to Rs. 1,67,924, as compared with Rs. 1,44,948 in the previous year.

18. The value of Statute labour and the sums contributed from the Fine Funds, on the Muzaffargarh, and Lower Sutlej and Chenab Inundation Canals, are included in miscellaneous receipts. The amounts were as follows:

	Lower Sutlej and Chenab Canals.	Muzaffargarh Canals.
	Rs.	Rs.
Value of Statute labour	1,87,619	1,05,136
Contributions from Fine Fund . . .	1,22,155	70,364
Fines inflicted	75,849	24,395
Credit balance at close of year . . .	1,23,507	25,085

The increase in the collections under the Fine Fund on the Lower Sutlej and Chenab Canals is reported to be due to the realization of a large outstanding balance of the previous year, and to the large number of absentees during that year which abnormally increased the collections of fines in 1894-95.

On the Muzaffargarh Canals the realizations under the Fine Fund were satisfactory, the outstanding balance uncollected having been reduced from Rs. 9,032 at the close of 1893-94 to Rs. 4,514 at the end of 1894-95.

The attendance of Statute labour was as follows:

	Lower Sutlej and Chenab Canals.	Muzaffargarh Canals.
Called out	648,449	465,450
Present	474,697	408,875
Absent with sanction	25,620	11,668
Absent without sanction	148,132	45,537
Percentage of absentees	22·85	9·7

The decrease in the number of absentees on the Lower Sutlej and Chenab Canals is satisfactory.

On the Muzaffargarh Canals the absentees were slightly in excess of last year. But it is explained that the attendance was good considering the large number called out on account of the heavy floods of 1894.

19. The work of collection, as is usual on the Punjab Canals, shows very satisfactory results. The year opened with an unrealized balance from the previous year of Rs. 1,21,216. Including this sum and deducting remissions, the net demand for collection during the year amounted to Rs. 51,05,219, against which Rs. 49,84,833 were realized, leaving at the close of the year an uncollected balance of Rs. 1,20,386.

20. The statement of check measurements given in Appendix II of the Chief Engineer's report shows that a larger aggregate area was checked during the year than in 1893-94, and though the percentage of error was perhaps slightly in excess of that of the previous years, it is still satisfactorily small.

21. The Report was received by the Government of India on the 20th December 1895. It bears evidence of careful preparation, and is illustrated by a series of instructive maps and diagrams.

The financial results of the Punjab Canals which are in full operation may be summarized as follows:

	Return on capital outlay.
Major works (excluding Sirsa Branch and Chenab Canals) . .	5·25 per cent.
Minor works for which Capital and Revenue Accounts are kept	14·31 ,,
Major and Minor Works, including Sirsa branch and Chenab Canals	4·54 ,,

The Sirsa Branch and Chenab Canals are not yet in full operation, but the revenue derived from them compares very favourably with the forecasts, and when in a few more years they arrive at maturity, a marked improvement in the returns from the canals, as a whole, may confidently be anticipated. The principal features of the seasons of the year under review are reported to have closely resembled those of 1893-94, *viz.*, early and good rains in the kharif season, and general and heavy rainfall in the rabi season; conditions which tend to restrict the extension of irrigation on perennial canals, though, when attended as in this year with an early rise of the rivers, they are singularly favourable to the inundation canal systems. It may, however, be safely asserted that though the vicissitudes of the seasons have an unquestionable influence on the revenue returns from the Punjab Canals, each year's report brings into more conspicuous prominence the enormous benefit which they have conferred upon the Province and their great financial success, while the results of the more recently completed schemes exceed the most sanguine anticipations.

22. It is satisfactory to learn that the measures adopted on the Sirhind Canal for the prevention of silt have proved effectual and that the residual deposit by the end of March 1895 had been reduced to 68 lakhs of cubic feet.

23. The Government of India concur with the Government of the Punjab in considering that an acknowledgment of good and loyal service is due to the officers whose names have been mentioned in the Chief Engineer's Report, and note with much satisfaction the special commendation bestowed by His Honour on Colonel Jacob and Mr. Preston, Superintending Engineers, respectively, of the Western Jumna and Chenab Circles, as also the deservedly high praise accorded to Mr. Higham, the Chief Engineer of the Punjab Irrigation Department.

The Government of India desire to record their appreciation of the good work brought to notice in the Report and Resolution now under review, and also wish to acknowledge the assistance rendered by Mr. Preston and his staff in undertaking and carrying out on behalf of the North Western Railway all work (except erection of girders and plate laying) on the Wazirabad-Lyallpur Railway.

ORDER.—Ordered, that copies of this Review and of the Report, and the Resolution by the Punjab Government, be forwarded to the Revenue and Agricultural Department for information.

Ordered also, that copies of the Review be forwarded to the Government of the Punjab for information and guidance, and that copies of this Review and of the Report and Resolution by the Punjab Government be forwarded to the Local Governments and Administrations in the Public Works Department, noted in the margin, for information.

The Governments of Madras, Bombay, Bengal, and the North-Western Provinces and Oudh, Public Works Departments.
The Chief Commissioners of the Central Provinces, Burma and Coorg.
The Residents at Hyderabad and Mysore.
The Agents to the Governor General in Central India, Rajputana, and Baluchistan.

Ordered, further, that this Review be published in the *Gazette of India*, and that copies of this Review and of the Report and Resolution by the Punjab Government be forwarded to Her Majesty's Secretary of State for India.

W. S. S. BISSET, *Colonel, R.E.*,
Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 23.] SIMLA, SATURDAY, JUNE 6, 1896.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem it desirable to make known. The Orders of the Legislative Council of India and the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *as soon as it is issued on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been undertaken to publish in the* CALCUTTA GAZETTE, *will be contained in the* SUPPLEMENTS. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Memorandum on the snowfall in the mountain districts bordering Northern India and the abnormal features of the weather in India during the past year, with a forecast of the probable character of the south-west monsoon rains of 1896.

The present memorandum is drawn up in accordance with the practice of the past twelve years, and includes, firstly, a brief summary of the information received from various officers relating to the snowfall of the past winter or cold weather in the Afghan mountains and the Himalayan area; secondly, a statement of the chief peculiarities or abnormal features of the meteorology of India during the past year; and, thirdly, a forecast of the probable character of the approaching south-west monsoon rains based on this information.

The forecast is based in part on the snowfall information and on the abnormal features of the weather during the past five months, and in part on a comparison with the meteorology of the previous twenty years, so far as it is available. It is necessary to point out that the forecast is a statement of probabilities and not of certainties, and that it is liable to error from the limitation and uncertainty of part of the data on which it is based. It has been drawn up after a consideration of all the available information but it should, to use the words of the Famine Commission Report, "*be used with due caution.*"

The monsoon forecasts, as at present issued, necessarily leave out of consideration two important points on which the agricultural value of the monsoon rainfall largely depends, *viz.*,—

(1) the probability of the occurrence of a prolonged break in the rains in July or August;

(2) the probability of the unusually early termination of the rains in Upper India or Bengal;

and are hence imperfect every year to that extent.

The chief features or conditions which influence and determine the extension and general strength of the south-west monsoon currents are as follows :

1st.—The amount and time of occurrence of the cold-weather snowfall in the mountain districts adjacent to Northern India.

2nd.—The local peculiarities of the weather in India immediately antecedent to the advance of the monsoon currents across the coasts of Bombay and Bengal into the interior, and which it is found are generally initiated during the hot weather, and are frequently more or less persistent in character. These abnormal features are, on the whole, best estimated by means of the variations of pressure from the normal.

3rd.—Local peculiarities in the Bay of Bengal and Arabian Sea over which the monsoon currents pass before they reach India and probably also the Indian Ocean, which is the source of the massive current of the south-west monsoon in India.

The first of these conditions or factors is mainly influential in determining the northern limits of the monsoon rains, heavy and prolonged snowfall in the Western Himalayan area either preventing or delaying the extension of the monsoon current over Upper India during the rainy season. Heavy and untimely snowfall in April and May specially exercises a very powerful influence in this way.

The second factor determines those large local district or provincial variations of rainfall during the monsoon which are evidently due to persistent local conditions or peculiarities, and not to general causes influencing the whole of India more or less.

The third and last factor is almost certainly of equal importance with the preceding two, but it is that on which information is most difficult to obtain, and is least in amount and longest in being received. In fact, information respecting the weather conditions in the Arabian Sea, Bay of Bengal or the Indian Ocean is rarely received in time to be utilized in drawing up the annual forecasts.

Summary of snowfall information.

The whole of the information referring to the snowfall in the mountain districts bordering Northern India for each month of the year is now published as it is received in the India Monthly Weather Reviews.

The following gives a brief summary of the information relating to the snowfall of the past cold weather received up to date :

I.—AFGHAN MOUNTAIN DISTRICTS.

(A) SOUTHERN HILL DISTRICTS.

(1) HILLS WEST OF DERA ISMAIL KHAN, INCLUDING WAZIRISTAN.

December.—Light snow fell on the 9th, 10th, 15th and 21st on the highest peaks. The month was fine and warmer than usual, and the snow melted rapidly and disappeared before the end of the month.

January.—A severe snowstorm occurred on the 27th and 28th.

February.—Snow fell on five days in this month on the higher peaks of the Suleiman Range. The weather during the month was regarded as colder than usual by the natives of the district.

March.—No report received.

April.—No snow fell.

(B) WAZIRISTAN (WANO).

October.—Heavy snow fell from the 19th to the 21st. Snow at this season is said to be almost, if not quite, unprecedented.

November.—Light snow fell on the 24th, 25th and 26th above 8,500 feet.

December.—No snowfall reported.

January.—Moderately heavy snow fell on the 11th, 13th, 14th and 27th, and heavy and continuous snow on the 30th and 31st down to a level of about 4,500 feet.

February.—Storms gave light to moderate snow on the hills on the 2nd, 10th, 14th and 23rd. The month was warmer than usual, and the snow melted very rapidly, so that at the end of the month there was little or no snow lying except in sheltered spots.

March.—There were numerous storms during the month, those of the 11th, 17th, 18th, 21st and 22nd giving heavy snow.

April.—No snowfall reported.

The snowfall of the past winter was heavier than usual and began abnormally early in October.

(2) KURRAM.

October.—There was on the 20th a heavy and very unusual fall of snow on the Sufed Koh. The snow line descended to 8,000 feet.

November.—The month was finer than usual and practically no snow fell. The greater part of the snow which fell in October melted away during the month.

December.—There was a heavy fall on the 15th and a very light fall on the 20th. The fall during this month was much lighter than usual and the weather unusually warm.

January.—A storm on the 17th gave snow above 5,500 feet. There was an exceptionally severe snowstorm on the 30th and 31st. The fall on the Sufed Koh was estimated to average 6 feet. The depth of the snow on the highest peaks of the Sufed Koh at the end of the month was said to be 10 feet.

February.—Light falls occurred on the 11th and 23rd, the total fall on the highest peaks not exceeding _ feet. The accumulation on the higher peaks of the Sufed Koh at the end of the month was about 7 feet.

March.—Light showers of snow were received on the higher hills on five days during the month. The depth of snow on the highest peaks of the Sufed Koh at the end of the month was estimated at 6 feet.

April.—The weather was abnormally warm and the snow melted rapidly during the month. Light snow is reported to have fallen on one or two occasions, and the depth of snow on the highest peaks was estimated at four or five feet at the end of the month.

(3) KHYBER DISTRICT.

December.—A light fall of snow was received in Tirah during the last week of the month.

January.—No snow fell during the month, which was, however, unusually cold.

February.—A severe snowstorm occurred during the first week of the month and some light showers during the last fortnight.

March.—No snowfall reported.

April.—No snow.

The natives of the district say that the snowfall of the winter was somewhat heavier than usual.

(4) KABUL.

December.—Snow fell on the 10th and 14th. The amount was reported to be large in Kafiristan.

January.—There were snowstorms during the month,—*viz.*, on the 11th, 16th, 28th, 30th and 31st. The fall during the last storm of the month was exceptionally heavy and the accumulation at the end of the month on the hills in North Afghanistan was estimated as ranging between 3 feet and 18 feet.

February.—There were snowstorms at Kabul on the 2nd, 6th, 14th and 24th.

March and April.—No snowfall reported.

The natives of Kabul consider the snowfall of the past winter to have been heavier than during the preceding five winters.

II.—HIMALAYAS.

(A) THE PUNJAB AND KASHMIR HIMALAYAS.

(1) MURREE.

The following tables give statements of the snowfall as measured at Murree and on the hills near Kahuta during the past and preceding winters for comparison:

Station.	Total fall of snow in the month of										Total during corresponding period of 1894-95.	
	December 1895.		January 1896.		February 1896.		March 1896.		April 1896.		Total of period.			
	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.
Murree . . .	*Nil*		5	2	1	10½	0	4½	*Nil*		7	5	11	10
Kahuta . . .	*Nil*		1	0	*Nil*		*Nil*		*Nil*		1	0	6	10

Station.	Total fall of snow from January to March in								Average of eight years.
	1896.	1895.	1894.	1893.	1892.	1891.	1890.	1889.	
	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.
Murree	7 5	10 4	15 9	29 4	0 5	29 0	3 8	7 3	12 11
Kahuta	1 0	6 0	5 0	18 0	*Nil*	5 3	0 9	4 3	5 0

The data show that the snowfall was very light and much below the normal, and was comparable in amount with the fall in the cold weathers of 1889 and 1890.

(2) LAHOUL.

The following gives a statement of the snowfall registered at the observatory at Kailang in Lahoul:

MONTH.	SNOWFALL, 1895-96.		SNOWFALL, 1894-95.		SNOWFALL, 1893-94.	
	Number of days on which snow fell.	Total snowfall of month.	Number of days on which snow fell.	Total snowfall of month.	Number of days on which snow fell.	Total snowfall of month.
		Ft. In.		Ft. In.		Ft. In.
December	...	...	7	4 0	2	0 3
January	?	1 2	11	3 6	17	3 6
February	?	3 1	6	2 0	14	4 3
March 1st to 17th . . .	?	0 10	13	3 6	11	5 4
April 1st to 5th . . .	...	...	4	1 6	3	2 1
TOTAL ...	...	5 1	41	14 6	47	15 5

The snowfall of the past winter was hence small in amount as compared with that of the two preceding winters.

The Superintendent describes the winter in the following terms:

"The snowfall on the higher ranges has been much less than in preceding years. Fine weather with light winds or calms and clear skies prevailed to a most unusual extent. The southern slopes of the hills were on the 17th of March free from snow below 12,000 feet."

(3) CHAMBA.

October.—There was an unusual and heavy fall of snow down to 6,500 feet on the 15th and 16th.

November.—There were storms on the 16th and 26th which gave light showers.

December.—The first heavy fall of the season was on the 9th and 10th. The snow line descended to 6,000 feet. The snow measured 4 feet in depth on the Padri Pass on the 15th December.

January.—Snowstorms occurred on the 11th, 12th and 13th and the 28th to the 2nd February. The fall during the last period was moderately heavy, and the snow line on the 28th and 29th descended to 5,000 feet.

February.—Snowstorms of slight intensity occurred during the month down to levels of about 8,000 feet on the outer ranges and 5,500 feet in the interior.

March.—Snowstorms occurred during the month at levels above 7,000 feet, but the total fall was small in amount.

The snowfall during the past winter has been much lighter than usual and the weather generally warmer.

The following gives the snowfall as actually measured at seven sites at different elevations in the neighbourhood of Chamba :

Month.	Tisa, 5,000 feet.		Bhandal, 5,500 feet.		Chanan, 6,500 feet.		Thanela, 7,000 feet.		Barmaur, 7,000 feet.	Kalatop, 8,000 feet.		Kilar, 8,000 feet.	
	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.	Ft. In.	Ft.	In.	Ft.	In.
December 1895 .	*Nil*		0	½	0	7	0	10	From 1st December to 5th February 1896, 5 feet 8 inches.	0	9	1	10
January 1896 . .	0	8	2	8½	2	0	2	9		4	3	2	9
February ,, . .	*Nil*		1	0	1	3	4	5		3	6	7	4
March ,, . .	*Nil*		0	1	*Nil*		0	11		*Nil*		4	7
April ,, 1st to 15th	*Nil*		*Nil*		*Nil*		*Nil*		*Nil*	*Nil*		*Nil*	
Total 1895-96 .	0	8	3	10	3	10	8	11	?	8	6	16	6
Total for period December 1894 to 15th April 1895 . .	3	9½	9	3	...		20	7	15 11	26	8	?	

The Deputy Conservator of Forests, writing on the 24th May, remarks as follows :

"The snowfall on 23rd to 27th February was very heavy all over the Chenab valley, and caused many avalanches which created great havoc in the forests and blocked the Chenab for a time. The snowfall during the winter was very heavy at high elevations, and is said to have been more severe and heavier than usual owing to its having chiefly fallen within two months,—*viz.*, from 12th January to 12th March 1896."

The data indicate that the snowfall of the past winter at elevations between 5,000 and 7,000 feet in the Chamba State was much less than that of the preceding winter.

(4) KULU.

January.—Snow fell on seven days in the Kulu Tahsil and on six days in the Plach Tahsil. The falls occurred above 5,000 feet.

February was somewhat more stormy than January. Snow fell on ten days during the month and occurred at elevations exceeding 6,000 feet. The high passes were all (with the exception of Jalori) closed throughout the month.

March.—Snowstorms occurred on nine days in the Kulu Tahsil and on seven days in the Plach Tahsil. The falls were generally light and occurred chiefly on the higher elevations above 11,000 feet. The snow accumulation melted rapidly during the month, as it was hotter than usual.

April.—There were light falls on the higher elevations above 13,550 feet on the 13th and 14th. The passes were open for foot-passengers during the greater part of the month.

The snowfall of this winter is considered by the natives of the district to be very similar in character to that of 1892.

The following gives the depth of snow at the end of each month from January to April 1896 and also on the 25th May of the past six years, on seven of the passes in this district, for comparison:

Tahsil.	Name of pass.	Elevation.	Depth of snow in					Depth of snow on the 25th May					
			January 1896.	February 1896.	March 1896.	April 1896.	May 1896.	1895.	1894.	1893.	1892.	1891.	1890.
		Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.

(5) Upper Sutlej Valley.

October.—There were light showers of snow on the 15th and 16th above 12,000 feet.

November.—The first general fall of the present winter occurred on the 16th, 17th and 18th. Snow fell down to 9,000 feet. There were light falls on the 26th and 27th.

December.—The month was abnormally fine and no snow, excepting light local showers of no importance, was received in this area.

January.—A heavy fall of snow occurred during a storm lasting from the 12th to the 14th, and light snow on the 28th and 31st. The depth of snow on the passes was much less than usual, and on the Bulder pass (elevation 15,000 feet) it was reported to be about 10 feet at the end of the month.

February.—Numerous light falls occurred during the month. A snowstorm lasting from the 23rd to the 27th gave heavy snow at Poo and on the adjacent mountains.

March.—There was a severe snowstorm on the 22nd and 23rd which gave the heaviest fall of the season. Light snow fell on the 11th and 12th and 29th, on which date the height of the snow line was 11,000 feet.

April.—There were light showers on the higher elevations on the 13th, 14th and 20th.

The winter was very dry and mild throughout and the snowfall much below the normal during the period from November to February. The fall of the fourth week of March was very heavy. The snow melted rapidly in April and the accumulation at the end of the month was much less than usual except on the higher elevations, where it is stated to be nearly as large as usual.

(B) NORTH-WESTERN PROVINCES HIMALAYAS.

(1) KUMAON.

The following is a statement of the estimated snowfall in this district measured in the same manner as in former years in accordance with arrangements made in the year 1890 :

Month.	Fall on Pindari and Pankua peaks.		Fall on Ralumdhura and Utadhura passes.		Fall in Malla Byans, Chandans and Darma.	
	Ft.	In.	Ft.	In.	Ft.	In.
November 1895	3	0	1	6	1	0
December ,,	2	0	8	6	1	6
January 1896	3	0	7	6	3	0
February ,,	5	6	13	0	3	6
March 1st to 15th	0	6	1	6	0	6
Total fall in winter of 1896	14	0	32	0	9	6
Total fall in winter of 1895	29	8	71	3	18	3
Total fall in winter of 1894	33	3	57	3	33	6

The snowfall of the past winter in Kumaon was hence only about half of the amount of the preceding winter.

(2) GARHWAL.

December.—No snowfall reported.

January.—A severe snowstorm commenced on the 28th and lasted until the 2nd February. The fall on the highest peaks in Upper Painikhanda was reported to be 15 feet. The snowfall occurred down to about 5,000 feet.

The fall during the winter up to the end of February was heavier than the normal in Talla Painikhanda and over the remainder of the district was somewhat less than usual. The season was unusually cold.

(C) SIKKIM HIMALAYAS.

Gnatong.—The following gives a summary of the snowfall of the past winter as registered at the Gnatong Observatory and a comparison with previous years :

Month.	Number of days on which snow fell in 1895-96.	Total precipitation in					
		1895-96.	1894-95.	1893-94.	1892-93.	1891-92.	1890-91.
October	11	4·23	9·17	8·13	0·80	3·24	11·85
November	11	1·87	1·06	1·85	0·37	1·05	...
December	6?	0·62?	0·81	0·27	0·86	...	0·22
January	6	0·99	0·58	0·44	2·67	0·64	2·40
February	10	1·05	3·32	5·48	2·63	12·24	0·92
March	12	4·75	7·80	2·22	5·17	3·61	5·66
April	11	13·05	11·49	8·48	10·87	7·26	6·94
May 1st to 15th	1	3·44	3·82	5·93	1·87	2·63	1·66
Total of whole period	68	30·00	38·05	32·80	25·24	30·67	29·65

The precipitation at Gnatong was slightly below the normal of the period.

(D) ASSAM HIMALAYAS.

Darrang.—The hill-people report that the snowfall has been normal and similar in amount to that of last year in the hills to the north of this district.

Lakhimpur and Kamrup.—No information.

PERSIA.

The following gives the number of days on which snow fell during the past winter at the higher stations on the Indo-European Telegraph line, from which temperature and weather observations are received by the Meteorological Department:

Month.	Number of days on which snow fell at,							
	Dehbeed.	Soh.	Koom.	Dasht Arjin.	Sivand.	Shiraz.	Koomisheh.	Kashan.
November 1895	1	...	0	...	0	0	...	0
December ,,	0	...	0	0	0	0	...	0
January 1896	6	4	1	5	...	0	0	0
February ,,	3	10	3	3	3	2	1	...
March ,,	2	9	1	1	...	0	4	...
TOTAL	12	23	5	9	3	2	5	0
Total corresponding period, 1894-95	14	4	4	7	3	7	5	1

In the following table is given a comparison of the precipitation at Baghdad and Bushire in the cold-weather seasons of 1894-95 and 1895-96:

Month.	Baghdad.				Bushire.			
	1894-95.		1895-96.		1894-95.		1895-96.	
	Number of rainy days.	Rainfall.	Number of rainy days.	Rainfall.	Number of rainy days.	Rainfall.	Number of rainy days.	Rainfall.
November	7	4·84	2	1·33	9	11·68	2	0·42
December	2	1·03	5	1·47	5	7·81	0	0·12
January	2	1·62	7	4·70	5	2·40	4	2·64
February	2	0·59	1	0·31	2	0·83	0	0·02
March	0	0·07	7	3·64	1	0·29	4	1·05
April	2	0·26	?	?	1	0·33	2	1·10
TOTAL	15	8·41	...	...	23	23·34	12	5·35

The normal average rainfall of the period at Bushire is 13·69 inches, and at Baghdad 9·66 inches. The evidence of the preceding data is somewhat conflicting, but indicates that on the whole the rainfall of the past winter in the Persian area was less than the normal.

Summary of the snowfall data.

The winter commenced considerably earlier than usual in the Persian area (more especially Afghanistan) and the Upper India hill districts. The first general and heavy fall was on the 15th to the 20th of October. It was almost unprecedented in the time of its occurrence in the Kurram valley and other districts in Afghanistan and also in the Punjab hills. Weather was, on the other hand, finer than usual and little or no snow fell during nearly the whole of November and December.

A series of cold-weather disturbances formed, chiefly in Persia, in January, February and March. They advanced eastwards across Northern India, but were of very feeble intensity, and, with only one exception, did not give rise to well-marked secondary depressions in the Punjab. The precipitation due to these disturbances was hence confined to Baluchistan, Afghanistan, the Punjab and Assam. The periods of most general and heaviest snowfall were the 28th January to the 2nd February, the 23rd to the 27th February and the 22nd and 23rd March. The heaviest fall of the season in Kashmir and Afghanistan occurred during the first of these periods, in Gurhwal and Kumaon during the second of these periods and in the Simla hills during the last period. The weather was finer and much drier than usual in the Upper India hill districts in April and May, and the snow melted with unusual rapidity.

The chief features of the snowfall of the cold-weather season were:

(1) The winter commenced considerably earlier than usual in the Persian area, Afghanistan and Kashmir.

(2) The number of cold-weather disturbances from November to March was as large as usual, but the storms were of very slight intensity and the precipitation was much less than usual. The most noteworthy feature was the absence of heavy general falls of snow in the hill districts.

(3) The snowfall was restricted to higher elevations than usual and did not fall below 5,000 feet on the outer ranges of the Kashmir and Punjab Himalayas.

The snowfall of the past season was, so far as can be judged from the data, normal in amount or in slight defect in Persia, Baluchistan and Afghanistan. Frequent light falls were received and heavy falls in the third week of October and last week of January.

The fall in Kashmir was much below the normal during the period from November to February. Frequent snow was received in March. Drier weather than usual has obtained during the past two months. The fall of the past winter was hence much below the normal. The observations at Leh and Kashgar indicate that the snowfall in Thibet and Yarkand has also been light and probably below the normal amount.

The fall in the Punjab Himalayas and in Gurhwal and Kumaon was much below the average. All the reports for this area state that the winter was much milder than usual and the snowfall very light. The snowfall measurements for the Chamba forest stations (except perhaps Kilar), Murree, Kulu, the Upper Sutlej valley and Kumaon indicate clearly that the total precipitation of the winter in those areas has been very small and probably barely one half of the normal amount.

The data hence establish that there has been much less snow than usual during the past winter over the whole of the Western Himalayas and in Thibet. The winter commenced early and terminated in March about the normal date, but was characterized throughout by the absence of heavy falls.

Hence as a result (1st) of the light snowfall of the winter and (2nd) of the unusually dry and hot weather prevailing in Northern India and the adjacent hill districts from February to May, the winter snow accumulation melted unusually rapidly and the extent and depth of the snow accumulation at the end of May were much less than usual over the whole of the Western Himalayas and probably also in Afghanistan.

The information for the Sikkim and Assam Himalayas is even more scanty than in previous years. It however indicates that the snowfall of the past season has almost certainly been below the normal. The accumulation is hence probably less than usual. This is strongly confirmed by the following information received from H. E. Hobson, Esq., the Chinese Commissioner of Customs at Yatung: "On Saturday last, the 9th May, the Chammalarhi peaks (24,100 feet) were, with the exception of the summit of the highest peak of all, entirely clear of snow. I was astonished, as when I last looked at them through field-glasses they were all pearly white and covered with snow."

Abnormal features of the meteorology of the previous eighteen months.

The winter of 1894-95 commenced earlier than usual (in November) in the Persian area and Western Himalayas. Weather was more disturbed than usual in December and January, and the snowfall in this period was considerably above the normal. A remarkable change occurred in the beginning of February 1895, when abnormally fine dry weather set in. Temperature increased rapidly in Upper India and was in moderate to considerable excess in Baluchistan, Upper Sind, the Punjab and North-West Rajputana. March was on the whole finer than usual, although the North and Central Punjab and Punjab Hills received frequent showers. The rainfall of the month was very scanty in Assam and East Bengal and the spring rains in that area were considerably delayed.

April was a remarkably dry and hot month in Baluchistan, Upper Sind, the Punjab and West Rajputana. Numerous series of thunderstorms occurred in Southern India and the Deccan, and the rainfall of the month was in considerable to large excess and temperature in moderate defect in that area.

May was characterized by exaggerated hot-weather conditions over the whole of India. The weather was excessively hot and dry throughout, and temperature was in moderate to large excess over the whole of Northern and Central India. The excess was greatest in Baluchistan (+ 2·9°), the Punjab (+ 6·0°) and Rajputana (+4·3°). The mean temperature of the month of May in the Punjab was higher than has been recorded during the past sixteen years.

The abnormal conditions of great dryness and excessive temperature which held steadily in Upper India from the beginning of February to the end of May reduced the winter accumulation of snow much more rapidly than usual, and in April and May the depth and extent of snow on the Western Himalayas were undoubtedly much less than usual.

At the end of May 1895 conditions in India were very similar to those which obtained in May 1894. The general strength of the monsoon nevertheless differed very largely in the two years, mainly, if not entirely, due to the prevalence of very abnormal conditions in the Indian Ocean in May and June 1895. The monsoon currents were throughout the whole season feeble.

They set in on the Bombay and Malabar coast from a week to a fortnight later than usual, but advanced with unusual rapidity (as in 1893 and 1894) across Central India and Rajputana to the South-East Punjab.

The monsoon currents were of normal strength during the last fortnight of June and gave general rain, moderate in amount, over the whole of Northern and Central India and the North Deccan. They fell off considerably in strength in the beginning of July and were very weak throughout the whole of that month. The rainfall of the month was very deficient over the whole of India except those areas which generally receive heavier rainfall than usual during weak periods of the monsoon, including Assam, North Bengal, the Deccan and the Madras coast districts.

They increased again in the beginning of August and the whole of Northern and Central India received general rain in that month. The monsoon withdrew from Upper India in the first week of September, nearly a month earlier than usual.

The distribution of the rainfall in September 1895 resembled that of October rather than that of September. It was restricted chiefly to the Peninsula and North-Eastern India. The northern half of the Peninsula had heavy rain, in part

due to a cyclonic storm of considerable intensity in the first week of the month. The distribution of the rainfall of the month was very abnormal, more especially in Northern and Central India. This was of course due to the withdrawal of the monsoon currents from North-Western India in the beginning of September and nearly a month earlier than usual. The rainfall of the south-west monsoon proper (*i.e.*, from June to September) was more or less in defect over the whole of Northern and Central India and the northern half of the Peninsula, and was normal or in excess in the southern half of the Peninsula. The following gives data illustrating the general deficiency of rainfall in Northern and Central India :

Province or Division.	South-West Monsoon period, June to September 1895.			
	Average actual.	Average normal.	Variation from normal.	Percentage variation.
	Inches.	Inches.	Inches.	
Punjab	12·06	14·73	−2·67	−18
Rajputana	13·07	18·53	−5·46	−29
Central India	28·72	39·75	−11·03	−28
North-Western Provinces and Oudh	33·03	32·14	+0·89	+3
Bihar	40·17	38·98	+1·19	+3
Chota Nagpur	40·53	45·50	−4·97	−11
Bengal	48·16	58·55	−10·39	−18
Berar	24·04	31·01	−6·97	−22
Central Provinces	42·56	45·48	−2·92	−6
Madras	32·88	29·39	+3·49	+12
Bombay	34·73	38·98	−4·25	−11
Burma	78·99	106·02	−27·03	−25

The monsoon currents withdrew from Bengal and Burma in the first week of October. The air was unusually dry in North-Eastern India in that month and remarkably low night temperatures were registered throughout the month in the interior of Bengal. A cold-weather disturbance affected the Persian area and Upper India from the 15th to the 20th. It gave moderately heavy and unusually early snow on the higher elevations in these areas. The greater part of the Peninsula received frequent rain during the second-half of the month. The rainfall of the month was in moderate excess in Madras, Bombay and the Deccan, but was scanty and considerably below the normal of the month in Burma and Bengal.

November was an unusually dry month in the Peninsula, as well as in North Eastern India. Temperature was hence more or less considerably above the normal over the whole of India. The excess was most marked in Northern and Central India during the first fortnight and in Berar, the Central Provinces and Central India during the last fortnight of the month. Occasional showers fell in the Coromandel and West Coast districts, but the rainfall of the month was everywhere below the normal. Southern India obtained about half of its normal amount. A slight disturbance in the Persian area gave cloudy weather and some snow in the hill districts of Upper India from the 16th to the 18th.

The meteorology of the month of December was characterized by several very abnormal features. A cyclonic storm of considerable intensity formed in the centre of the Bay on the 9th and 10th. It advanced to the mouth of the Megna and gave a heavy local downpour in the Chittagong, Noakhali, Barisal and Tippera districts of Bengal and moderate rain to Burma. Unusually cool dry weather prevailed in the Deccan and Madras Coast districts during the first three weeks of the month, and lower night temperatures were recorded at several stations (more especially Madras) than have been previously registered. A large irregular disturbance which did not develop into a cyclonic storm gave a remarkably heavy burst of rain to the whole of Southern India south of Lat. 13° N. during the last three days of the month. The rainfall of the month was in moderate to large excess in Southern India, Burma and locally in East Bengal and Cachar. It was below the normal over the remainder of India, and practically *nil* over the greater part of that area.

The rainfall of the retreating south-west monsoon was very irregularly distributed, more especially with regard to time. These rains began at least a month earlier than usual in the Peninsula. They were practically normal in amount in October, scanty in November and the first half of December. The rainfall of the last week of that month occurred under very abnormal conditions and was not only unusually heavy and general, but very timely, as it refilled the tanks which had been nearly depleted by the very dry weather of the previous six weeks.

The following is a brief summary of the chief features of the meteorology of India during the past five months:

January.—Pressure averaged ·003 inch in defect in the Indian area. Pressure was in slight relative excess in the Peninsula and Central India and in slight defect elsewhere. A series of feeble cold-weather disturbances gave occasional light rain in Upper India, Assam and North Bengal. Practically no rain fell over the remainder of India and the month was unusually dry. The rainfall of the month was in slight to moderate defect in Upper India and the Gangetic plain and normal in Bengal and Assam. Temperature, both by day and night, was in excess in North-Western India and Baluchistan, and was in slight defect in North-Eastern India and the greater part of the Peninsula, chiefly due to lower night temperatures than usual. The temperature and other conditions of January 1896 were practically inverse to those of January 1895.

February was on the whole slightly more disturbed than usual. The cold-weather storms of the month were, however, feeble, and only one—that of the 23rd to 27th—gave heavy snow in the hill districts of Upper India. The mean pressure of the Indian area was ·012 inch below the normal. Pressure was relatively to this condition in defect in Northern India, the deficiency being most marked in Bengal, and was in excess in the Peninsula. The excess was moderately large in the western half of the Peninsula and was greatest in the Konkan. The chief feature of the month was unusually high temperature over the whole of Northern and Central India. The mean maximum and minimum temperatures were both more or less in excess over the whole area. The mean temperature of the month was most largely in excess in the area represented by the stations of Ajmere, Sambhar, Jhansi, Sutna and Saugor, in which it exceeded 4°. The air was unusually dry in Berar, the Central Provinces, North-Western Provinces, Central India and Mysore. The Punjab received light to moderate rain during the month. Assam light to heavy rain, and Burma and East Bengal light rain. No rain fell over the remainder of India. The rainfall of the month was normal or in slight excess in the Punjab, Burma and East Bengal. It was very irregularly distributed in Assam, but was in considerable excess in Cachar and in moderate defect in the Gangetic plain, Central India and the Central Provinces.

March.—Pressure in the Indian area averaged ·022 inch below the normal. Pressure was in moderate excess relatively to this condition in Baluchistan and the North-West Punjab, and in moderate defect in Assam, North Bihar and Central Bengal. Elsewhere the local variations were small and unimportant. Both the mean day and night temperatures were above the normal over the

whole of India, with one or two local exceptions of little importance. The mean temperature of the month ranged between 2° and 4° in excess in the Gangetic plain, Baghelkhand, the Central Provinces, Chota Nagpur, Bihar and Bengal. The air was unusually dry, and skies were free from cloud over nearly the whole of the interior. These features were most marked in West Bengal and the central districts of the Gangetic plain Assam received moderately heavy rain, the Punjab Hill districts and Sikkim moderate rain and the North and West Punjab and Bengal light to moderate rain. No rain fell over by far the greater part of the country, more especially the Gangetic plain.

April.—The mean pressure of the Indian area was ·032 inch below the normal. Pressure was relatively to the general condition in April, as in the two preceding months, in defect in North-Eastern India and Upper Burma, and the deficiency was moderate in amount in Bengal and Orissa. Pressure was in slight relative excess in the Peninsula, in moderate excess in the Indus valley and in largish excess in Baluchistan. The vertical pressure anomalies in Northern India were positive and moderately large. Temperature was in general excess, slight to moderate in amount, in the coast districts, Sind and Baluchistan, and moderate to considerable over the whole of the interior. The air was much drier than usual in the interior, more especially in the Gangetic plain and West Bengal, and strong westerly winds prevailed during the month in the Gangetic plain and Central India.

The month was unusually dry over the whole of India. Assam received daily showers during two periods, *viz.*, the 15th to the 18th and the 24th to the end of the month, and Bengal from the 28th to the 30th. The rainfall of the month was considerably below the normal in Bengal and slightly above it in Assam.

May.—The mean pressure of the Indian area was slightly above the normal (·013 inch). Pressure was, relatively to the general condition, more or less considerably in defect in Northern and North-Eastern India, and in excess in the Peninsula, Central India, North Bombay, Rajputana and Lower Sind. This contrast of conditions, it may be noted, almost invariably obtains in years of strongly marked hot-weather conditions (following milder winters than usual in the Western Himalayas). The local deficiency was most marked in Central Bihar and the eastern districts of the Central Provinces and the North-Western Provinces, and the local excess was greatest in the West Coast districts from Rajkot to Karwar and the eastern districts of Central India. The following gives data for stations in these areas of greatest excess and deficiency of pressure:

Area of greatest deficiency of pressure.			Area of greatest excess of pressure.		
Station.	Variation of mean 8 A.M. pressure of month from normal.	Anomaly.	Station.	Variation of mean 8 A.M. pressure of month from normal.	Anomaly.
	"	"		"	"

The pressure variations in May 1887, May 1894 and May 1895 were very similar to those of the corresponding month of the present year, the chief difference being that they were slightly more marked in May 1887 and May 1894.

The combination of increased pressure in Western India and diminished pressure in Northern India displaced the trough of low pressure from the south of the Gangetic plain to the centre. On the mean of the month it was defined by the stations of Hazaribagh, Gaya, Allahabad, Lucknow, Cawnpore, Meerut and Montgomery.

Temperature was excessive over nearly the whole of India, but was in slight defect in North and Central Bengal, North Bihar and Lower Burma, which areas received frequent showers during the month; and it was most largely in excess in Upper India, and the month was one of the hottest on record in the Punjab. The following gives data illustrating the temperature conditions of the month:

Division.	Variation from normal of month of		
	Maximum temperature.	Minimum temperature.	Mean temperature.
Burma	— 0·4	+ 0·8	+ 0·2
Assam	— 0·3	+ 0·3	0
Bengal	+ 0·3	+ 0·3	+ 0·3
Bihar	— 0·2	+ 1·2	+ 0·5
Chota Nagpur	+ 4·5	+ 3·1	+ 3·8
North-Western Provinces and Oudh	+ 3·5	+ 3·4	+ 3·5
Punjab	+ 5·0	+ 4·5	+ 4·8
Sind	+ 3·0	+ 2·3	+ 2·7
Rajputana	+ 2·9	+ 3·9	+ 3·4
Central India	+ 2·9	+ 3·9	+ 3·4
Central Provinces	+ 3·5	+ 3·3	+ 3·4
Bombay	+ 1·4	+ 1·8	+ 1·6
Madras	+ 3·4	+ 2·0	+ 2·7

Frequent rain was received in Burma, Assam and Bengal. The greater part of the rain accompanied thunderstorms, series of which occurred almost daily throughout the month in Assam and Bengal. The rainfall of the month was favourable in its distribution in these two areas, and in slight to moderate excess. Weather was frequently disturbed with duststorms in North-Western India during the month, but the rainfall was practically *nil*, not only in the plains but also the hill districts.

The meteorology of India during the past five months has been characterized by strongly-marked abnormal features. The following states the most important:

(1) Pressure was from January to April below the normal over the Indian area, as is shown by the following statement:

Month.	Mean 8 A.M. pressure anomaly of Indian area.
January	—·003
February	—·012
March	—·022
April	—·032
May	+·013

(2) Pressure has been throughout in local defect in North-Eastern India, as is shown by the following data:.

Division.	Mean 8 A. M. pressure anomaly in				
	January.	February.	March.	April.	May.
	"	"	"	"	"
Assam	+·002	−·010	−·018	−·016	−·004
Bengal and Orissa	−·003	−·022	−·017	−·021	−·008
Bihar	+·001	−·028	−·025	−·021	−·016
Chota Nagpur	+·009	−·016	−·002	−·010	−·012

(3) Pressure has been throughout in local excess in the west of the Peninsula, Central India, Rajputana, Sind and the South West Punjab. The area of greatest excess has varied considerably from month to month. The following gives data:

Division.	Mean 8 A. M. pressure anomaly in				
	January.	February.	March.	April.	May.
	"	"	"	"	"
Sind	−·018	−·013	+·008	+·019	+·008

(5) Temperature has been more or less considerably in excess over the whole of Northern and Central India and the northern half of the Peninsula. As is the usual rule in the cold and hot weather seasons, the excess has been somewhat more strongly marked in the day than the night temperature. The following gives comparative data of the variations of the mean maximum, mean minimum, and mean daily temperatures for the whole of Burma, Northern and Central India and the north of the Peninsula, month by month, from January to May 1896.

Maximum Temperature.

Province.	Variation from normal of mean maximum temperature.					
	January 1896.	February 1896.	March 1896.	April 1896.	May 1896.	Mean of period.
	°	°	°	°	°	°

Berar	−1·4	+1·0	+3·2	+3·8	+2·8	+1·9
Central Provinces	−2·5	+1·2	+2·5	+2·5	+3·3	+1·4

Mean Daily Temperature.

Province.	Variation from normal of mean temperature.					
	January 1896.	February 1896.	March 1896.	April 1896.	May 1896.	Mean of period.
	°	°	°	°	°	°
Burma	+0·1	0	+1·0	+1·6	+0·2	+0·6
Assam	−1·0	+0·5	+1·2	+0·7	0	+0·3
Bengal	−0·3	+2·3	+2·6	+2·6	+0·3	+1·5
Bihar	+0·4	+2·3	+2·7	+2·4	+0·5	+1·7
Chota Nagpur	0	+4·1	+3·6	+3·7	+3·8	+3·0
North-Western Provinces . .	+0·5	+2·5	+2·0	+1·9	+3·5	+2·1
Punjab	+2·2	+1·6	+1·6	+1·5	+4·8	+2·3
Rajputana	+2·1	+3·2	+1·9	+3·4	+3·4	+2·8
Central India	+0·4	+3·3	+1·8	+3·0	+3·4	+2·4
Berar	0	+2·0	+3·2	+3·4	+2·7	+2·3
Central Provinces	−0·4	+2·4	+2·7	+2·8	+3·4	+2·2

The preceding data indicate that temperature has been steadily above the normal during the past five months over the whole of India. The excess has been remarkably uniform in amount over nearly the whole of Northern and Central India and the northern half of the Peninsula, and has been nearly as large in amount in the night as in the day temperature. The area of greatest excess of temperature has shifted slightly from month to month. The excess was greatest in February in Chota Nagpur, Rajputana and Central India, in March it was greatest in Chota Nagpur, Berar and the Central Provinces, in April in Berar, Rajputana, Central India and Chota Nagpur, and in May in Upper India. Higher day or maximum temperatures were recorded in some parts of West Bengal, Bihar and the North-Western Provinces in the months of February and March than have been observed at the same stations in the corresponding months of the past twenty years. The maximum temperatures registered in North-Western India during the month of May were by no means remarkable, and it was not until quite the end of the month that day temperatures exceeding 120° were registered.

(6.) The air has been abnormally dry during the period over nearly the whole of the interior, and more especially in Bengal, the Gangetic plain, Rajputana, Central India, Berar, the Central Provinces and Chota Nagpur. It will be sufficient to give comparative data for nine representative stations:

Station.	Variation from normal of mean relative humidity (i.e., percentage of saturation).			
	January 1896.	February 1896.	March 1896.	April 1896.
Calcutta	−11	−14	−14	Data not yet available.
Patna	− 7	−10	−17	
Allahabad	−17	−16	−16	
Roorkee	− 6	− 4	−11	
Meerut	− 8	− 4	−12	
Jeypore	− 9	− 5	− 8	
Khandwa	−14	−11	− 9	
Akola	− 9	− 5	− 4	
Nagpur	− 2	− 5	+ 4	

The preceding data indicate that the air was remarkably dry in West Bengal, Bihar and the eastern districts of the North-Western Provinces in the first three months of the year. It was also abnormally dry in the Gangetic Plain, Central Provinces and Berar in April and May.

(7) Skies have been unusually free from cloud. The following gives the variations from the normal amount expressed as percentages for the different provinces of Northern and Central India:

District.	Variation from normal of mean cloud of month expressed as a percentage.				
	January.	February.	March.	April.	May.
Assam	—42	+24	—26	Data not yet available.	Data not yet available.
Bengal	—59	+16	—14		
Bihar	—70	—50	—68		
Chota Nagpur	—57	—20	— 4		
North-Western Provinces and Oudh	—37	— 3	0		
Punjab	+19	+ 3	+27		
Rajputana	—54	—12	+ 4		
Central India	—69	—70	—64		
Central Provinces	—65	—38	—30		

(8) The most important and noteworthy feature of the whole period from January to May 1896 was the marked deficiency in the rainfall of the period. Assam received larger rainfall than usual in the cold weather, and its normal amount during the hot weather. The cold-weather rainfall of the Punjab was slightly below the normal (16 per cent.). The rainfall of the two seasons was very scanty over the remainder of India, and was practically *nil* during the whole period in the area including Central India, Gujarat, the Central Provinces and Berar. The rainfall of the cold weather was also practically *nil* in Bihar, Chota Nagpur, Orissa, Rajputana and Bombay.

The following table giving comparative data of the rainfall of the two seasons shows clearly the abnormal character of the rainfall of the past five months:—

Division.	Cold weather rainfall.				Hot-weather rainfall (from 1st March to 16th May 1896).			
	Average actual.	Average normal.	Variation from normal.	Percentage variation.	Average actual.	Average normal.	Variation from normal.	Percentage variation.
Burma	0·67	0·24	+0·43	+179	4·16	7·72	—3·56	— 46
Assam	3·96	2·17	+1·79	+ 82	25·75	26·44	—0·69	— 3
Bengal	0·79	1·35	—0·65	— 48	0·53	8·87	—2·34	— 26
Bihar	0·08	1·05	—0·97	— 92	1·04	2·08	— 1·04	— 50
Chota Nagpur	0·06	1·31	—1·25	— 95	0·84	2·90	— 2·06	— 71
Orissa	0·01	1·27	—1·26	— 99	2·92	4·77	—1·85	— 39
North-Western Provinces and Oudh	0·28	1·15	—0·87	— 76	0·17	1·01	—0·84	— 83
Punjab	1·01	1·91	—0·30	— 16	0·72	2·00	—1·28	— 64
Sind	0·18	0·71	—0·53	— 75	0·22	0·35	—0·13	— 37
Rajputana	0·10	0·44	—0·34	— 77	0·28	0·58	—0·30	— 52
Central India	0·07	0·90	—0·83	— 92	0·04	0·46	—0·42	— 91
Gujarat	0	0·07	—0·07	—100	0	0·09	—0·09	—100
Central Provinces	0	0·78	—0·78	—100	0·07	1·11	—1·04	— 94
Berar	0	0·47	—0·47	—100	0·01	0·52	—0·51	— 98

It may be noted that the average rainfall of the whole of India for the cold-weather season is barely one inch, and ranges between a tenth of an inch in Bombay and two inches in Assam. The deficiency was hence nowhere large in actual amount. The rainfall of the hot-weather season ranges between an average of a tenth of an inch in Gujarat and 26 inches in Assam. The deficiency in the rainfall of the hot-weather period was less than one inch in seven out of the fourteen divisions in the preceding table, and ranged between averages of one and four inches in the following divisions:—Central Provinces and Bihar (each—1·04 inches), the Punjab (—1·28 inches), Orissa (—1·85 inches), Bengal (—2·34 inches), and Burma (—3·56 inches). It averaged 1·77 inches in the Madras Presidency.

The more important features of the meteorology of India during the past five months have been fully stated above. They were mainly the direct results, first, of the unusually early termination of the monsoon rains of 1895 in Northern and Central India (from three to four weeks earlier than usual over the whole area), and, second, of the unusual dryness and very deficient precipitation of the cold-weather season.

The following is a brief summary of the chief features of the cold-weather:

(1) Weather was on the whole more disturbed in the Persian area from October to January, and the precipitation in Persia, Baluchistan, and Afghanistan was probably, on the average of the whole area, normal or in slight defect. The winter rains terminated in the whole of this area earlier than usual.

(2) The temperature data of Kashgar, Leh, Meshed, and the Persian stations indicate that there has been no large abnormal accumulation of snow in Persia or Thibet (and probably the whole or greater part of Central Asia).

(3) The winter commenced unusually early on the higher ranges of the Kashmir and Punjab Himalayas (in the month of October) and terminated in March or about the normal date. November, December and February were drier and finer months than usual. The snowfall of the period was much below the normal on the lower elevations up to 8,000 or 9,000 feet, but was probably normal or in slight excess on the higher elevations of Kashmir. The snowfall measurements taken in Chamba, the Simla hill districts, Kulu and Kumaon indicate that the total fall was almost certainly barely half the normal amount of the period. The precipitation occurred as rain to higher levels than usual and little or no snow fell below 5,000 feet. The winter accumulation was hence less than usual and has probably melted more quickly than usual during the hot dry weather of April and May, and the accumulation (both in extent and depth) at the beginning of June is almost certainly much less than usual.

(4) The snowfall on the Eastern Himalayas has probably been less than usual and the accumulation below the normal.

The snowfall conditions are hence most favourable. The winter snowfall was not only less than usual, but occurred early in the season and in March. There has been no untimely snow in April or May, and the accumulation is probably considerably less in extent and depth than the normal of the period over the whole Himalayan area and in Central Asia, with the exception of perhaps North Kashmir.

The chief features of the meteorology of India during the past five months have been in strict accordance with the reported distribution of snowfall during the winter as indicated by theory and strongly support the inferences respecting the diminished accumulation of snow during the period. These features are—

(1) Deficient pressure over the Indian area (more especiallly in Northern India) and increased pressure at the level of the hills.

(2) Increased temperature over the whole of the interior of India, varying slightly in amount, but on the whole most strongly exhibited in Berar, the Central Provinces, Central India, Bihar, and West Bengal.

(3) Abnormal dryness of the air and deficiency of cloud over the greater part of the interior of India, more especially over the Central Provinces and Central India.

(4) Deficient rainfall throughout the period except in Assam where the rainfall of the whole period was in slight excess. The deficiency was small in amount in the Punjab, Burma and East Bengal, and was considerable in the Gangetic Plain. Practically no rain fell in Berar, the Central Provinces, Central India and Rajputana and the North-Western Provinces from the beginning of November to the end of May.

It may be noted that the distribution of the snowfall of the cold-weather of 1895 is very similar to that of the cold weather of 1892, and that the temperature, pressure, and humidity conditions of the hot weather of 1896 resemble those of 1892, 1894 and 1895.

Comparison with previous years.

During the past eighteen years the snowfall in the Himalayas has been scanty and much below the average in the years 1879, 1880, 1881, 1882, 1890 and 1892. The snowfall of 1892 was the lightest on record.

The following gives a very brief statement of the chief features of the meteorology of several years for comparison with those of the present year :

1879.—The snowfall was very light and considerably below the normal in the North-Western Himalayas. Very heavy snow had fallen during the preceding winters of 1876-77 and 1877-78. Pressure was generally in defect, the deficiency being greatest in April and May, when it averaged ·03 inch for the whole of India. The local variations of pressure were not strongly marked or persistent. In the month of May pressure was locally in defect in the west of the Peninsula, more especially in the Gulf of Cambay, and was in excess in Upper India. Temperature was in excess in January, February, April and May. The excess was large in amount in the two latter months, and averaged 4° in the Punjab, where it was greatest.

The rains set in over Bengal fully on the 14th June and commenced at Bombay on the 1st, but were not strong before the 24th. The rainfall of the south-west monsoon period was more or less in excess over the whole of India, except the Punjab, where it was in moderate defect, and in parts of Bengal and Madras, where it was slightly below the normal. The rains ceased in Upper India on the 29th September.

1880.—The winter snowfall was in moderate defect in the Western Himalayas, and the cold-weather rainfall below the normal to a moderate extent in Northern India. Pressure was in general defect from January to May. The deficiency was largest in January (·033″) and averaged ·023″ for the whole period. Pressure was locally in excess in the Peninsula, the excess being most marked at the West Coast stations from Bombay to Calicut. It was locally deficient in Northern India, the deficiency being most marked in the Punjab; where it averaged ·05″. These large local pressure variations were fairly persistent from March to May. Temperature was largely above the average from March to May. The excess was most marked in the Punjab during the whole period. It averaged 7½° in March, 6° in April, and 4½° in May. The rains commenced on the 2nd of June in Bengal and on the 6th at Bombay, but both currents were at first feeble. Very heavy rain fell in the Punjab in July, and the weather was stormy with much snow in the hill districts. This was followed by a prolonged break in the rains, lasting throughout nearly the whole of August. The rains ceased in Upper India on the 24th September. The rainfall of the south-west monsoon period was largely in defect in the Punjab, North-Western Provinces, Rajputana and Central India, and in moderate defect in the Central Provinces and Berar. It was in excess in North-Eastern India, Burma, and Madras.

1881.—The snowfall of the cold weather of 1880-81 was very light throughout the whole season and considerably below the normal in the Western Himalayas.

Pressure was in general excess from January to May, but the average variation for the whole of India was small. There was a slight local excess of pressure on the West Coast and a slight deficiency at the Coromandel coast stations. The local variations over the remainder of India were small and of no importance. Temperature was considerably in excess in January and February and in slight excess in April and May. The greatest excess was shown in the Punjab in February, when the mean temperature was 5° above the normal. The rains commenced on the 2nd June in Bengal and on the 3rd June at Bombay and were hence earlier than usual, but were not established in full strength until nearly the end of the month. The rainfall of the south-west monsoon period was in general excess over the whole of Burma and Western India (including Rajputana and Central India), and was below the normal in the Peninsula. The deficiency was not large except in Malabar and Mysore. The rains ceased in Upper India on the 11th September and hence earlier than usual.

1882.—The snowfall of the winter of 1881-82 in the Western Himalayas was below the normal (probably to a slight extent) and the winter rains in Northern India in moderate defect. The variations of pressure and temperature from the normal during the pre-monsoon period, January to May, were small and apparently of little importance. They, however, indicated the prevalence of approximately normal conditions. The rains commenced on the 2nd June at Bombay and on the 11th June in Bengal. The Bombay current was strong and gave very heavy rain in June and July. The Bengal current was feeble in these two months, but was vigorous in August. The rains ceased on the 15th September in Upper India. The rainfall in the districts and provinces dependent on the Bombay current was abundant, whilst North-East India (*i.e.*, Assam, Bengal, Bihar, and the North-West Provinces) obtained smaller amounts than usual. The deficiency was small except in some parts of Bengal.

1890.—The cold weather of 1889-90 was unusually dry in Northern India, and the snowfall in the Western Himalayas and Afghan Mountains much below the normal amount. The winter was reported to have been very severe in Kashgar in Central Asia. The snowfall in the Eastern Himalayas was also in slight to moderate defect. No rain fell in Rajputana in January and February 1890, and the North-Western Provinces and the Punjab received total average amounts of one-fifth and one-third of the normal amounts respectively. Temperature was considerably above the normal in January and February, the excess being greatest in Upper India, where it averaged 2½°. The hot weather was also drier than usual and temperature was in moderate excess, averaging in the Punjab, where it was greatest, 1½°. Pressure was generally in defect over India during this period by moderate amounts. Pressure was locally in defect in Northern India, the deficiency being most marked in the north of the Bay. It was locally in excess in the Peninsula and North-West India, the excess being largest in Kathiawar, Gujarat, Berar and the North Bombay Deccan, where it ranged from ·93 inch (at Poona) to ·044 inch (at Rajkot). The rains commenced on the Bombay coast on the 1st June and in Bengal feebly on the 7th and fully on the 19th. The rainfall of the south-west monsoon period (June to October) was more or less in excess in Northern India, Konkan, the Central Provinces and Hyderabad, the excess being greatest in Bihar and the North-Western Provinces. It was in moderate defect in Burma, Southern India, and Ceylon, and largely in defect in Gujarat, Sind and Cutch and to a less extent in Western Rajputana. The rains ceased in Upper India on the 27th of September.

1892.—The cold-weather rainfall of 1891-92 was abnormally small in amount and in large defect in Upper India. Pressure was in general defect at the level of the plains and was in considerable relative excess at the hill stations. Temperature was above the normal over the whole of India during the cold weather by amounts averaging 2°. The excess was greatest in the Central Provinces, Berar and Central India. The air was much drier than usual, and cloud in general defect.

The hot-weather conditions were very strongly marked. Temperature was in general excess and was most largely above the normal in Upper India, where the maximum temperature of the whole period, March to May, averaged about 6°

above the normal and the minimum temperature 3½°. Burma and Assam received much heavier rain than usual, and Bengal its normal amount. Over the remainder of India, with the exception of the West Coast districts, the season was unusually dry, and the rainfall very small in amount and much below the normal of the period.

The chief features of the pre-monsoon distribution of pressure were a considerable local deficiency in Northern India, greatest in amount in Upper India, and a moderate to considerable local excess in the west of the Peninsula and North Bombay.

The rains commenced in the first week of June on the west coast and advanced very rapidly to Upper India. This advance was not permanent, and the current withdrew from North-Western and Central India on the 17th and 18th.

A first advance of the monsoon winds occurred in Bengal in the second week of the month. This was followed by their withdrawal in the third week of the month, and dry westerly winds prevailed over the Gangetic Plain until the end of the month. The permanent advance of the monsoon currents took place in the first week of July on the west coast and in the second week in Bengal. The currents extended rapidly over the whole of India and prevailed with unusual steadiness during the remainder of July and in August and September. The rainfall of the monsoon period, June to September, was more or less considerably in excess in the whole of India, with the exception of East, South and Central Bengal, and Burma.

1894—The winter of 1893-94 was somewhat more disturbed than usual, and moderate to heavy snow fell in the Western Himalayan area in January, February and March. April was finer and drier than usual, and May was a remarkably hot month. The winter snow accumulation melted rapidly in April and May, and its amount at the end of May was much below the normal. Pressure was in May locally in considerable to large defect in Northern India, the deficiency being most marked in Bihar and North and Central Bengal. Pressure was in local excess in the Peninsula (more especially the West Coast districts).

The monsoon rains commenced slightly later than usual on the 7th and 8th in the Bombay or Konkan Coast districts, and on the 14th (the normal date) in Bengal. They extended rapidly into the interior and held with great steadiness throughout July, August and September. The rainfall of the period was in more or less general excess over the whole of Northern and Central India, and was in slight defect in Burma and Southern India.

A consideration of the previous shows that the only years the meteorology of which resembles to a marked extent that of 1896 are 1892 and (to a less extent) 1890, 1894 and 1895.

Probable character of the south-west monsoon of 1896.

The present year is the sixth of a series of years characterized by very marked and exceptional meteorological features. The year 1893 was the coolest year on record in India, and the rainfall of the year was much greater than had been received in any year during the past thirty-one years. The precipitation of the cold weather of 1891-92 was the smallest on record in Upper India and the Western Himalayas. The rainfall during the three years, 1892-94, was very largely in excess, as is shown by the following data:

Year.	Average rainfall of whole of India and Burma.	Excess in inches
1892	46·18	+5·09
1893	50·16	+9·07
1894	47·56	+6·47

The excess in the rainfall was chiefly due to much heavier precipitation than usual during each of the monsoons of these three years. A noteworthy feature of the three years was the determination of excessive rainfall to certain districts throughout the whole period, more especially to the North-Western Provinces.

The following gives data of the rainfall and its anomalies (or variations from the normal fall) for the past five years. The twenty-three divisions into which India is arranged for the data of this table are the rainfall divisions adopted by Mr. Blanford in his monograph on the "Rainfall of India." Similar data for the previous twenty-seven years were given in last year's memorandum, and it is not necessary to repeat them this year.

Year.	Number of provinces.			Net anomaly or variation from the normal (Indian area only).		Percentage (calculated on Mr Blanford's estimate of the mean rainfall of year).
	Fall excessive.	Fall normal.	Fall deficient.	Excess.	Deficiency.	
1891	6	...	17	...	—0·30	—1
1892	15	...	8	+4·55	...	+11
1893	22	...	1	+8·94	...	+22
1894	17	...	6	+6·48	...	+16
1895	5	...	18	...	—3·38	—8

It is important to note that the causes of the large variations of the rainfall in India during the past three years have been evidently due to abnormal conditions outside the Indian area and not to local peculiarities or abnormal meteorological features in India itself. The pre-monsoon conditions of temperature, pressure and winter snowfall in the Himalayan area were very similar, in fact almost identical, in the years 1894 and 1895. The monsoon rainfall in 1894 was in general excess over the whole of Northern and Central India, the amount of the excess varying to some extent in different parts of that area and depending undoubtedly upon local conditions. In 1895 the monsoon rainfall was as generally and almost as largely in defect over the same large area as it was in excess in 1894. The deficiency varied to a moderate extent in different parts of Northern India, but the chief feature of the monsoon of 1895 was the general deficiency over the whole of Northern and Central India, Berar and the Central Provinces. The local variations were a subsidiary feature of relatively small importance.

The observations taken at Mauritius, Zanzibar and the Seychelles show that there were large differences in the character and strength of the south-east trades in these two years, and it is almost certain that the monsoon rainfall in India was directly related to these large abnormal features and conditions in the Indian Ocean. The meteorology of India during the past two years has hence emphasized the importance of the conditions in the large sea area to the south of India.

The abnormal features of the meteorology of the past five months have been fully stated above and are summarized in the following paragraphs.

The chief features of the precipitation of the cold weather of 1895-96 in Northern India and the adjacent mountain area were—

(1) The winter snowfall was probably less in amount than the normal in Persia, Afghanistan and Baluchistan, and also in Central Asia, and the winter considerably milder than usual. It terminated early in March, and the snow hence melted earlier in the season than usual.

(2) The cold-weather precipitation in the plains of Northern and Central India and the snowfall in the Western Himalayas were considerably below the normal. The total snowfall over the greater part of the Western Himalayas was probably only from one-half to one-third of its normal amount. The season was unusually mild in the hills, and was much warmer than usual in the plains.

(3) The winter commenced unusually early on the higher ranges of the Kashmir and probably the Punjab Himalayas, and ceased in the fourth week of March, and hence about the normal date. The snowfall of the period was on the whole much less than usual, and the accumulation in April was moderate in amount. It melted much more quickly than usual in May, and the extent and depth of snow at the end of the month were considerably less than the normal.

(4) The snowfall in the Eastern Himalayas in January and February was almost certainly below the normal.

The snowfall conditions of the winter of 1895-96 are very similar to those of the winter of 1891-92, which was the driest on record, and are undoubtedly favourable for a normal or strong monsoon.

The abnormal features of the hot weather are usually the product of the previous cold-weather conditions. When the cold weather or winter is less disturbed and milder than usual, and the precipitation (more especially the snowfall in the Western Himalayan area) in more or less considerable defect, the succeeding hot weather is usually characterized by (1st) excessive temperature, (2nd) abnormal dryness of the air, (3rd) local deficiency of pressure in Northern India and local excess in the Peninsula, and (4th) less rain in Northern and Central India, except in Assam and East and North Bengal, and sometimes Burma.

These features have all been present to a marked degree in the meteorology of the present hot weather, and have been remarkably persistent. For, as shown above, the past four months have been characterized by a steady considerable excess of temperature, great dryness of the air, deficiency of cloud, and very deficient rainfall over the whole of India, excepting Assam and the greater part of Bengal.

In these features it strongly resembles the hot weather of 1892, and to a slightly less extent the hot weathers of 1890, 1894 and 1895. A comparison with these years, as well as theory, indicates that the conditions in India are favourable for a normal or strong monsoon.

Hence the character of the cold-weather precipitation and the hot-weather conditions in India are favourable, and indicate that it is probable the monsoon currents will be of at least normal strength.

The experience of last year, however, shows that unfavourable conditions in the Indian Ocean may exercise a much greater influence on the strength of the monsoon than the prevalence of favourable conditions in India. The few reports received from ships in that area during the past month indicate that the south-east trades are strong and probably of normal strength.

The observations taken at Mauritius and Zanzibar from January to March (those for April have not yet been received) also indicate the probability of at least normal south-east trades. On the other hand, the observations taken at the Seychelles show that the conditions there from the 27th May to the 3rd June were almost identical with those of the same period last year and indicate a probability of some delay in the permanent establishment of the monsoon currents in the Indian seas and India. Taking these and other facts into consideration, it appears to be probable that the monsoon currents will be at least of normal strength.

It is, however, possible that the Seychelles observations may be more significant than is assumed in the previous statement, and hence that the monsoon currents in 1896, as in 1895, may be feeble.

It is therefore necessary to accept the inferences given below with greater reserve than usual, and if it should result that the monsoon currents are (notwithstanding the presence of favourable conditions in India) as much below their normal strength as they were in 1895 (when the antecedent conditions in India were almost as favourable as in the present year) the inferences will require to be suitably modified.

Judging only from the conditions in India itself and the known conditions in the Indian seas, it is on the whole most probable that the monsoon currents will be of normal strength, and that the Bay current is more likely to be above its normal strength than the Bombay current. Assuming that the currents will be of normal strength, the comparison with previous years (more especially 1887, 1889, 1890, 1892 and 1895) indicates that it is probable they will set in about the normal time on both the Bengal and Bombay coasts. The Seychelles observations on the other hand make it almost certain there will be some delay as in June 1895. The Bombay current is more likely to be retarded than the Bengal current, and there is a slight probability it may be not so strong as usual in June.

The rains will hence probably commence in the second week of June on the Bombay coast and the third week on the Bengal coast.

The following is a statement of the inferences respecting the character and distribution of the south-west monsoon rains of 1895 from the comparison of the antecedent conditions of the present year with those of previous years, and based chiefly on the facts and data stated above:

(1) Snowfall conditions in the Western Himalayas and the Afghan Mountains and the pressure conditions in India are favourable to the establishment of at least normal monsoon currents in India. The conditions in the Indian seas are very imperfectly known, but appear to indicate that the currents will probably be of at least normal strength, and the forecast is drawn up on that supposition. The Arabian Sea current will probably be established on the Bombay coast slightly later than usual in the second week of June; and there is a slight probability it may be weak during the month of June. The current will probably advance into the interior more rapidly than usual.

(2) Conditions are, on the whole, favourable to the prevalence of monsoon currents of at least normal strength in the Bay of Bengal. The rains will probably be established about the normal period in Bengal (the third week of June).

(3) Pressure conditions are favourable in Upper Burma and Bengal. The rainfall in Upper Burma will probably be normal or in moderate excess and in Lower Burma normal or in slight defect. The general conditions are more favourable in West and Central Bengal than in East and North Bengal. It is probable that the rainfall will be normal or in slight excess on the average of the whole area, but may be in slight defect in North and East Bengal. It is very probable that it will be normal or in slight to moderate excess in Bihar, Chota Nagpur and Orissa, and probable that it will be normal or in slight defect in Assam, where conditions are similar to those of North and East Bengal.

(4) Conditions in the North-Western Provinces are favourable. The rainfall on the average of the whole province will very probably be at least normal. The rainfall will probably be in excess in the eastern and submontane districts, and normal or in slight defect in the south-western and western districts.

(5) Conditions are on the whole favourable in the eastern districts of the Punjab, but are somewhat unfavourable in the western and central districts (as indicated by the pressure conditions in North Bombay and West Rajputana). The rainfall will probably be less than usual in the south-western and perhaps the central districts, but be normal or in slight defect in the submontane and southern districts.

The character of the rainfall in this area, however, depends chiefly on the general strength of the monsoon and not on the local conditions, and these conclusions should be suitably modified if the monsoon turns out to be weak, in which case the rainfall may be considerably in defect in the West and Central Punjab and in slight to moderate defect in the East Punjab.

(6) Conditions are somewhat unfavourable in Sind, Cutch, Kathiawar and West Rajputana. The rainfall will probably be more or less in defect. The rainfall in these areas, as in the Punjab, depends chiefly on the general strength of the monsoon, and hence, if the Bombay monsoon current be weak, the deficiency may be considerable to large in amount. In Eastern Rajputana the rainfall will either be normal or in slight defect, depending upon the actual strength of the Bombay current.

(7) Conditions are nearly as favourable in Central India as in the North-Western Provinces and Bihar, and it is hence probable that area will receive at least normal rainfall.

(8) Conditions are favourable in Berar, the Central Provinces, the Bombay Deccan, and Hyderabad. It is hence probable that they will receive at least normal rainfall. The conditions are most favourable in the eastern and northern districts of the Central Provinces, and there is hence a moderate probability they may receive rainfall in moderate excess of the normal.

(9) The conditions in the west coast districts are such as are in normal monsoons associated with at least normal rainfall. It is hence very probable that the rainfall of the present year's south-west monsoon will be at least normal in those districts and probable it may be in slight to moderate excess.

(10) A comparison of the conditions in Southern India and the Carnatic with those of similar years indicates that the rainfall will probably be normal or in slight defect, more especially in the southern districts. It is, however, very difficult to forecast for this part of India, as rain in Southern India during the monsoon proper occurs chiefly during the intervals of breaks in the rains of Northern India, and is hence essentially of irregular occurrence. The variations of the rainfall in Southern India during the south-west monsoon are usually inverse to those in Northern India.

It should be carefully noted that the preceding probabilities are obtained on the assumption that the currents will be approximately normal in strength.

The general conclusion is that the rainfall may be deficient to an extent depending chiefly upon the strength of the monsoon, in Sind, Cutch, the South-West and Central Punjab and West Rajputana, that it will very probably be at least normal in amount in the northern half of the Peninsula, Central India, the greater part of the North-Western Provinces, Bihar, Chota Nagpur, and perhaps Bengal, and may be in moderate excess in the Gangetic Plain, West Bengal, the Central Provinces and Central India. It will probably be normal or in slight defect in Burma, Assam and perhaps in East and North Bengal.

It is too early to estimate the probability of a longish break in the rains in July or August; but there are no indications at present of such an event.

JOHN ELIOT,

Meteorological Reporter to the Government of India.

SIMLA, *3rd June, 1896*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 30th, 1896.

During the first part of the week under review pressure was as unsteady as during the preceding two weeks, and the changes from day to day were large, but towards the close of the week the distribution settled down into a fairly normal condition, *i.e.*, pressure became low over the Punjab and relatively low over the Gangetic Plain, and the diurnal changes became much smaller. Pressure differences have, however, been steadily greater than usual during the week, and the winds have been strong over the more central parts of the country. One marked abnormal feature in the weather has been the presence of southerly winds along the West Coast. These winds (south-westerly and south-easterly) appeared first at Goa on the 24th, they extended to Mangalore, Calicut, Ratnagiri and Bombay on the 25th and 26th, and to Kathiawar on the 27th, held steadily during the 28th and 29th, and began to take off on the 30th. They were connected with a cyclone which formed out in the centre of the Arabian Sea and subsequently passed west-north-westerly towards the Arabian Coast. Cyclonic weather was met with by the mail steamer *Sutlej*, and the S.S. *Dido*, *Mohammadi* and *Satos* on the 28th and 29th in Latitudes 15° to 17° N. and Longitudes 65° to 68°, where strong gales were experienced. The southerly winds to the east of the disturbance occasioned a moderate to light fall of rain along the West Coast. Rain fell daily over North-Eastern India, and showers were received on most days in some parts of the Peninsula, and one or two light scattered showers at a few places on the hills and plains of Upper India during the week. The mean temperature was low in Burma, Assam, and part of Bengal and of Bombay, but was steadily excessive in the other provinces.

Daily Summary.—*Sunday, May 24th.*—Pressure had decreased slightly in parts of the Peninsula, of East Bengal, and of Upper Burma, and had increased elsewhere. The rise was rapid over the Punjab and part of Rajputana. Readings were high over the south-east of the Bay and low over West Bengal, the east of the Central Provinces, and the Gangetic Plain. They slightly to considerably exceeded the normal average over Western and Southern India. Westerly winds prevailed over the greater part of the country, but over the Bay the direction was southerly and over North Bengal and the Northern Gangetic Plain easterly and north-easterly. At Goa southerly winds had appeared. The mean temperature was below the normal average over Lower Burma and part of the south of the Peninsula and of the Indus valley. Elsewhere the mean temperature was excessive. Rain was reported from Lower Burma, Assam, North and Central Bengal, and the southern half of the Peninsula, while light local showers had occurred over Upper Burma and at one or two places in Upper India.

Monday, May 25th.—The barometer had fallen briskly in the Punjab, but changed slightly elsewhere. Readings were high in Malabar and the south-east of the Bay; low over the Central Punjab, the Gangetic Plain, West Bengal, and the east of the Central Provinces. Pressure remained excessive over Western

and Southern India. Southerly (south-westerly and south-easterly) winds were blowing from Calicut northward to Bombay, and the directions were very variable in the Punjab, but elsewhere there was little change. The mean temperature was low over Burma, Assam, North Bengal, the south of the Peninsula, and Kathiawar, and excessive elsewhere. Rain continued to be received over Lower Burma, Bengal, Assam, and the south-west of the Peninsula.

Tuesday, May 26th.—Pressure had fallen briskly over a considerable part of Northern India and had changed slightly elsewhere. The general distribution was little changed, but gradients were steeper than on Monday. Pressure read below the normal over nearly the whole of Northern India, but remained excessive in the centre and south. Southerly winds continued to prevail from Mangalore to Bombay, and northerly winds had appeared in the Punjab. The mean temperature was low in Lower Burma, Assam, North Bengal, the south-west of the Peninsula, and Kathiawar, and was higher than usual elsewhere. Rain had been general in Burma, Assam, and the south-west of the Peninsula, and showers had occurred in some other parts of the country.

Wednesday, May 27th.—Pressure had decreased briskly in Malabar and changed slightly elsewhere. Readings were lowest over the east of the Punjab and west of the North-Western Provinces and were relatively low over the Gangetic Plain. They were highest in Tenasserim, and the pressure difference was large. Southerly winds now prevailed from Malabar to Kathiawar. The northerly winds in the Punjab were giving way. The mean temperature was lower than usual over Burma, Assam, East Bengal, the south-west of the Peninsula, and the North-Western Punjab, and was excessive in all other places—most so over the east of the Gangetic Plain. Rain had fallen over Burma, Assam, East and North Bengal, and the west of the Peninsula, and a few local showers were reported from Upper India.

Tuesday, May 28th.—The barometer had risen slightly to briskly over Northern India and decreased over the Peninsula and the central parts of the country. A trough of low pressure lay over North-Western India and the Gangetic Plain, and readings remained highest in Tenasserim. The winds were generally unchanged throughout India. The mean temperature remained lower than usual over North-Eastern India, part of the south-west of the Peninsula, and the North-Western Punjab, but was still excessive generally. Showers were reported from parts of Burma, of Bengal, of Assam, and of the Peninsula.

Friday, May 29th.—The pressure changes were almost everywhere small, and the general conditions were unaltered. The winds were variable over the Gangetic Plain and North-Western India. The mean temperature was low over Assam, North Bengal, and at a few places in the Deccan and Kathiawar. It was very high over West Bengal and the Central Provinces. Showers had again occurred over North-Eastern India and the west of the Peninsula.

Saturday, May 30th.—Pressure had decreased briskly over the north of the Punjab and the Gangetic Plain and changed slightly elsewhere. Readings were low over the Western Gangetic Plain and the Northern Punjab and remained highest in Tenasserim. Pressure exceeded the normal average in all places, except the Gangetic Plain. The wind was shifting round to the westward on the West Coast and was fairly normal in direction in most districts. The mean

temperature remained low over North-Eastern India, but was very excessive over the Gangetic Plain. Rain had again fallen over North-Eastern India and the west of the Peninsula.

Temperature continued excessive over the greater part of the country, but in those regions where the rainfall has been general and abundant, *viz.*, Burma, Assam, North Bengal, and the west of the Peninsula, the mean has been lower than usual. The area of greatest heat relatively to the normal lay over West Bengal and the east of the Peninsula on the 24th, 25th, and 26th; it then moved somewhat northward and was shown over West Bengal and the Gangetic Plain on the 27th, and in this position remained until the close of the week.

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Province.	May 1896.							Mean variation of week.
	24th	25th	26th	27th	28th	29th	30th	
	°	°	°	°	°	°	°	°
Burma	−1·1	−1·0	−0·2	−2·0	−1·0	+0·3	−0·8	−0·8
Bengal and Assam	+3·2	+0·6	+1·4	+1·3	−0·1	+1·0	−0·9	+0·9
North-Western Provinces and Oudh	+5·0	+4·2	+4·8	+6·7	+4·8	+3·8	+5·7	+5·0
Punjab	+3·7	+4·0	+5·7	+3·5	+3·1	+4·6	+4·1	+4·1
Bombay	+0·1	+0·4	−0·1	−0·8	+1·0	+1·6	+1·8	+0·6
Central Provinces and Berar	+2·9	+2·9	+4·1	+4·3	+3·3	+5·2	+5·0	+4·0
Central India and Gujarat	+1·1	+1·4	+2·4	+2·3	+1·7	+2·1	+4·5	+2·2
Sind and Rajputana	+1·7	+2·7	+3·1	+3·9	+3·3	+4·6	+4·9	+3·5
Madras	+2·4	+1·8	+2·0	+1·3	+3·8	+2·9	+1·9	+2·3
Mean for whole of India	+2·1	+1·9	+2·6	+2·3	+2·2	+2·9	+2·9	+2·4

The mean temperature of the whole country was excessive on each day of the week, the abnormal excess ranging from 1·9° on the 25th to 2·9° on the 29th and 30th. In Burma on every day, except the 29th, the mean temperature was below the normal; in Bengal it was below the normal on the 28th and 30th, and in Bombay on the 26th and 27th. With these exceptions the mean temperature was steadily excessive, the abnormal excess for the whole week being as much as 5° in the North-Western Provinces and 4° in the Punjab and Central Provinces.

The following were the highest temperatures throughout India recorded on each day:

May	24th	113·9°	at Chanda.
,,	25th	114·2°	,, Jacobabad.
,,	26th	118·5°	,, ,,
,,	27th	117·1°	,, ,,
,,	28th	115·6°	,, ,,
,,	29th	119·0°	,, ,,
,,	30th	121·0°	,, ,,

Rainfall.—The rainfall of the week under review has been somewhat less general than was the case last week, due to the less general occurrence of thunder

and dust storms. At the close of May it is by no means unusual to have to record temporary advances of monsoon winds to Ceylon and the south-west coast of India on the one hand, and to Tenasserim and Lower Burma on the other. During the present week no advance of this nature has been recorded in Ceylon or the south of the Peninsula, but, on the contrary, over the east of the Bay the distribution of pressure has been such as to favour the flow of southerly winds across the Andaman Sea, and hence Tenasserim and Lower Burma have received very general and steady rainfall. Local southerly winds at the head of the Bay have during the week poured considerable supplies of moisture into North-Eastern India at the same time that easterly winds have been blowing over Assam, North Bengal, and Bihar, and this condition has resulted in frequent severe thunderstorms and a considerable rainfall over Assam and Bengal (North). In nearly all other parts of the country all the rain which has been received during the week has fallen during thunderstorms, but along the West Coast the moderate falls which occurred there between the 25th and 28th were connected with a cyclonic storm which was developed over the Arabian Sea and was encountered over the centre of that sea on the 28th to 30th by several vessels proceeding towards Bombay. The concluding table gives the rainfall data. Rain in greater or less amount was received in thirty-nine of the rainfall divisions as compared with fifty-one last week. Of these thirty-nine divisions, also, as many as ten received an average actual fall for the week of less than one-tenth of an inch, so that there were only twenty-nine divisions in all which received effective rain. The area which received effective rain included all the Burma divisions, all the Assam divisions, all the Bengal divisions, except Bihar (South), the hill division of the North-Western Provinces, and nearly all the divisions in the west and south of the Peninsula. The area which received actually or practically no rain included Bihar (South), all the North-Western Provinces divisions, except the hills, all the Punjab divisions, the Central Provinces and Berar, North Bombay, Baluchistan, Central India, and Rajputana, or roughly the whole area lying to the north of Latitude 20° and the west of Longitude 84°. The heaviest actual average fall was 8·15 inches in Assam (Surma), followed by 6·56 inches in Tenasserim, 5·64 inches in Lower Burma, and 5·04 inches in North Bengal, while the smallest effective fall was 0·13 inch in Hyderabad (South). The second column of the table shows the average normal rainfall of each division for the week under review, and the third column gives the difference between the average actual and average normal fall during the week. In only six divisions had the rainfall been heavier than usual. These six divisions were Lower Burma, East Bengal, Assam (Surma and Brahmaputra), North Bengal, and the Bombay Deccan, and the amount of the abnormal excess ranged from 2·57 inches in Assam (Surma) to only 0·12 inch in the Deccan. In all other parts of India the rainfall of the week had been lighter than usual. The abnormal deficiency was generally slight, but in Arakan it amounted to over 5 inches, in Coorg to over 2 inches, in Tenasserim, Central Burma, the hills of Assam, Malabar, and the East Coast (North (*a*)) to over 1 inch, and in several divisions to between $\frac{1}{2}$ and $\frac{3}{4}$ inch. The continued large deficiency of rain in Arakan is remarkable.

The three concluding columns of the table show the state of the seasonal rainfall, *i.e.*, the actual and normal rainfall from the 1st of March to the 30th of May. In no division at all has the actual rainfall been excessive, but in nine divisions, *viz.*, Tenasserim, Lower Burma, Central Burma, East Bengal, Assam (all divisions), and Central and North Bengal, it has been about normal, *i.e.*, has varied by less than 20 per cent. from the average. In all other parts of the country the rainfall has been in defect, the abnormal deficiency being large—in some cases over 90 per cent.—over the Gangetic Plain and the central parts of the country, where there has been practically no rain throughout.

The following are the principal totals recorded during the week :

Moulmein 7·36 inches, Pegu 8·49 inches, Maubin 8·08 inches, Netrakona (Mymensingh) 9·07 inches, Nemotha (Cachar) 13·21 inches, Cherra Poonjee 12·22 inches, Goalpara 7·34 inches, Thakurgaon (Dinajpur) 8·89 inches, Protabgunj (Bhagalpur) 3·02 inches, Vayitri (Malabar) 6·48 inches, Chintamani (Kolar) 4·60 inches, Nargund (Dharwar) 3·55 inches, Gooty (Anantapur) 3·10 inches.

PROVINCE.	DIVISION.	Rainfall data for week ending May 30th, 1896.			Rainfall data from March 1st to May 30th, 1896.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *4th June 1896.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 23rd May.*—Rainfall moderate in Bellary, North Arcot, parts of Salem and on the West Coast; light or scattered showers fell in most other districts. Agricultural operations are proceeding slowly. The harvest still continues with moderate yield. Pasture is generally scarce, but fodder is sufficient. Prices are slightly dearer in Salem, Coimbatore and Madura, but are cheaper in Tinnevelly and in parts of the Circars; elsewhere prices are generally stationary.

For week ending 30th May.—Rainfall moderate on the West Coast and in parts of the Central and Deccan districts and Circars; light showers have been general elsewhere, except in parts of the Karnatic, Godavari and Tinnevelly. The April-May rainfall has been markedly deficient in the Central and some of the Southern districts, and generally below average; some useful rain has fallen since the close of the week. The water-supply is generally insufficient, and rain is wanted in many places. Cultivation is proceeding slowly, and some harvesting still continues with moderate yield. Pasture is scarce, but fodder is sufficient. Prices show a slight rise, but are stationary in several districts.

Bombay.—*For week ending 3rd June.*—Rain fell in parts of seventeen districts, but the falls were generally slight. Preparations for the monsoon cultivation are general. Sowing of the early crops has commenced in five districts. The young plants in one taluka of Karachi have withered for want of water. Fodder is insufficient in parts of Sind, Khandesh and Baroda territory. Agricultural stock are in good condition, except in parts of Sind and Ratnagiri. Prices are normal, except in Ahmednagar and Sholapur.

Bengal.—*For week ending 1st June.*—Except in Chota Nagpur there has been good general rain during the week, the falls being heavy in the eastern and northern districts of Bengal. Rain is badly wanted in Chota Nagpur, but elsewhere ploughing and sowing are going on well. The prospects of indigo, sugarcane and other standing crops are favourable. There is still want of good drinking water in some districts, but it is less felt than before. The fodder supply is generally sufficient, and cattle are reported to be in good condition. There was no important change in the price of common rice since last week, but the price is generally higher than last year, especially in the districts of East Bengal and Chota Nagpur.

North-Western Provinces and Oudh.—*For week ending 3rd June.*—The weather is somewhat unsettled. Duststorms with showers are reported in several districts. Heavy rain fell in one tahsil in Bara-Banki. The extra crops are flourishing everywhere and are being reaped in places. Cane and indigo are being irrigated where practicable and are doing well. Sowings for the autumn crops continue. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, May 30th, were—Banda 88,688, Hamirpur 49,068, Jhansi 33,953, Jalaun 41,821, Allahabad 8,098, Pilibhit 1,903, Garhwal 2,522, Almora 1,769, Hardoi 793—total 228,615; of this number 30,995 dependants were gratuitously relieved on the works, and excluding Jhansi for which figures are not reported, 7,282 persons received relief under other provisions of the Famine Code. The numbers employed on village works were—Jhansi 915, Banda 22,067, Hamirpur 24,291 and Jalaun 12,495. Supplies are generally sufficent,

but fodder is becoming scarce in many districts. Water is still deficient in Hamirpur and Lucknow. Prices continue high and are rising in most districts.

Punjab.—*For week ending 3rd June.*—Slight rain has fallen in the Jullundur, Amritsar, Sialkot and Gurgaon districts. The autumn ploughings have commenced in Umballa, and autumn sowings are in progress in several districts. The threshing of spring crops is nearly completed in Lahore and Amritsar and is in progress in Sialkot, Rawalpindi and Dera Ismail Khan. The land is being prepared for the autumn crops in Lahore. The condition of the extra spring crop is good in Lahore, Amritsar and Dera Ismail Khan, average in Ferozepore, Sialkot and Rohtak, and not good owing to drought in Rawalpindi. The sugarcane crops are suffering for want of rain in Umballa. The extra spring crops in Jullundur and the autumn crops in Sialkot are being watered from wells. The condition and prospects of the spring crops are generally reported average in irrigated, and below average in unirrigated tracts. The stock of food-grains is average in Peshawar, but is not sufficient in Shahpur and parts of Lahore and Gujranwalla. High winds continue to cause damage to the crops in Gujranwalla. Cattle are in poor condition in Hissar, Umballa, Lahore and Gujranwalla, and they are dying of starvation in Hissar. Fodder is scarce in all districts, except Jullundur, Ferozepore, Sialkot, Mooltan, Dera Ismail Khan and Peshawar. Prices are above normal in Shahpur and are high elsewhere.

Central Provinces.—*For week ending 3rd June.*—The weather continues very hot and is generally cloudy. A light fall of rain and hail in Wardha. Preparations of land for the autumn sowings continue. Fodder and water are becoming scarce. Prices are steady, except those of wheat and gram which are rising in Narsinghpur and Hoshangabad.

Burma.—*For week ending 30th May.*—In Lower Burma ploughing for the wet-weather paddy crop has commenced in Bassein. In Upper Burma reaping of dry-weather paddy still continues in some districts and has been completed in the Upper Chindwin. Agricultural operations are retarded for want of rain in Mandalay and Meiktila, and more rain is required for the dry-weather paddy crop in the Kyabin township of the Minbu district. In other districts cultivation of the wet-weather crops is progressing, and the prospects of the standing crops are promising. The wet-weather paddy is being sown in some circles in Kyaukse. The price of paddy has risen considerably in Tavoy and slightly in Rangoon, Thongwa, Henzada, Upper Chindwin and Minbu, but has decreased considerably in Shwebo; elsewhere prices are stationary.

Assam.—*For week ending 2nd June.*—The weather is seasonable. Prospects of the early rice are fair and of tea good. Ploughing for the late rice has commenced. Planting of sugarcane continues. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 3rd June.*—MYSORE.—Rainfall good in parts. The standing crops are in good condition. Paddy and *ragi* (*Eleusine coracana*) are being sown in parts. Prices have risen in five districts, but have fallen in two others.

COORG.—Rainfall moderate. Ploughing of rice fields is in progress. Sowing of *ragi* (*Eleusine coracana*) continues. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 3rd June.*—BERAR.—The weather is hot and cloudy with moderate rainfall during the week. Breaking up of the land for the autumn sowings is in progress. The fodder and water-supply are inadequate. Prices are stationary.

HYDERABAD.—Report not received.

Central India.—*For week ending 3rd June.*—Slight rain fell in parts of Gwalior and Malwa during the week. Operations for the autumn crops are in progress in Bhopal, Malwa and Goona. The condition of cattle is generally indifferent. Pasturage is good in Bhopal and fair in Bundelkhand and Malwa, but bad in Gwalior, and indifferent elsewhere. Prices are above normal in Bundelkhand, Baghelkhand, Malwa, Goona and in some districts of Gwalior, but are normal elsewhere. The numbers employed on relief works were 5,324 in Gwalior, 11,048 in Bundelkhand, 5,128 in Baghelkhand. The numbers on gratuitous relief were 1,033 in Bundelkhand and 2,043 in Baghelkhand.

Rajputana.—*For week ending 3rd June.*—Rainfall moderate in Bikanir, and slight in Oodeypore. Agricultural operations are generally satisfactory, except in Merwara where the harvest is poor. The crops are very poor in Jaisalmere. Agricultural stock are in good condition, except in Meywar, Ulwar and Jaisalmere. Pasturage and fodder are scarce in Kherwara, Meywar, Tonk, Shahpura, Ulwar and Jaisalmere. Fodder is becoming scarce in Ajmere-Merwara and is failing in Dholepore and Bhurtpore, but is sufficient elsewhere. Prices are rising in four States, but are steady elsewhere. In Marwar 4,387 persons are on relief works, and 372 on gratuitous relief; in Shahpura 245 are on relief works, and 50 on gratuitous relief; in Merwara 2,625 are on relief works; in Ulwar 500 are on relief works; in Bikanir 2,468 are on relief works, and 408 on gratuitous relief; in Jaisalmere 563 are on relief works, and 44 on gratuitous relief.

Kashmir.—KASHMIR VALLEY.—*For week ending 2nd June.*—The spring crops are excellent. Rice sowings are still in progress. Prices continue normal.

JAMMU PROVINCE.—*For week ending 3rd June.*—No rain. Threshing of the spring crops is nearly completed. Fodder is scarce. Prices are stationary.

Nepal.—*For week ending 30th May.*—The weather is showery, but seasonable. Prospects are good.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

No. 2409-S. R.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

Simla, the 5th June, 1896.

Read—

Customs Circular No. IX of 1896.

ORDERED, that the Circular be published for general information in the Supplement to the *Gazette of India*.

J. F. FINLAY,
Secretary to the Government of India.

Customs Circular No. IX of 1896.

From—The Government of India, Finance and Commerce Department, No. 2270, dated the 26th May 1896.

To—The Secretary to the Government of Madras, Revenue Department.

I am directed to acknowledge the receipt of your letter No. 1437, dated the 9th April 1896, referring for orders the question whether hand-pumps should be treated as water-lifts, and as such be held to be exempt from import duty under No. 13 of Schedule IV of the Indian Tariff Act.

2. I am to say that the words "ordinarily used in processes of husbandry, or for the preparation for use or for sale of the products of husbandry," in No. 13 of the Tariff Schedule govern the whole of the exemptions specified in that number. The Government of India therefore agree in the opinion of the Government of Madras that hand-pumps not being ordinarily used for such purposes, and also not being ordinarily known as "water-lifts," are not included in the exemption.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 25TH MAY 1895, AND FROM 1ST JANUARY TO 23RD MAY 1896.

N.B.—As regards the figures in column *Total Earnings from 1st January 1896*, audited figures have been used as far as possible.

RAILWAY.	Average earnings per mile per week during the 1st-half of 1895.	Week ending 25th May 1895.			Week ending 23rd May 1896.			Earnings from 1st January to 25th May 1895.	Earnings from 1st January to 23rd May 1896.	Increase.	Decrease.

INVENTIONS and DESIGNS.

Calcutta, the 4th June, 1896.

NOTIFICATIONS.

No. 1461 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 30th May 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 179 of 1896.—Theodore William Hickson, mechanic, of Point Nepean Road, Brighton, in the colony of Victoria, for improvements in a combination handle and support for cans and cases.

No. 180 of 1896.—Albert Meyenberg, manufacturer, Max Wendorf, mechanician, and Siegmund Henlein, merchant, all of 61, Langestrasse, Frankfort-on-the-Main, Germany, for incandescent lamps.

No. 181 of 1896.—The Alternate Current Electro-Motor Syndicate, Limited, of 2 and 4, Penywern Road, Earls Court, in the county of Middlesex, England, for improvements relating to electro-motors and transformers.

No. 182 of 1896.—Pandit Chandra Sen Chowbey, trader, of No. 53, Burdwan Raj Katara, Burrabazar P. O., Calcutta, for an improved stretcher or *newar* bed, to be called "Chandra Sen's stretcher."

No. 183 of 1896.—Kedar Nath Chakravarti, teacher, South Suburban school, Bhowanipore, residing at No. 21, Rani Sankari's lane, Kalighat, for an invention for printing, entitled "The Easy printer."

No. 1462 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the office of the Secretary, in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying:—

No. 68 of 1895.—Louis Julian, mechanical draughtsman, residing at Harris Road, Pudupett, within the local limits of Madras, for a quadruple horizontal hand oil press. (Filed 20th April 1896.)

No. 286 of 1895.—Arthur Gore Handcock, C. B., Colonel, Indian Staff Corps, and Colonel on the staff, Rawalpindi, Punjab, for hanging, pulling, pushing or swinging punkahs. (Filed 29th April 1896.)

No. 310 of 1895.—Dattoji Brothers & Co., blacksmiths, Bombay, for forced draught double acting bellows. (Filed 25th February 1896.)

No. 1 of 1896.—Eugène Worms, operative, of 51, Rue de Provence, Paris, for improvements in tanning and apparatus for that purpose. (Filed 22nd May 1896.)

No. 2 of 1896.—William Henry Nixon, electrician, of 115, Transit Street, Providence, Rhode Island, United States of America, for improvements in electric systems. (Filed 22nd May 1896.)

No. 6 of 1896.—William Alfred Bromwich, gentleman, of 12, Kensington Square, and Charles Ashbursham Floyd, gentleman, of 12, St. James' Square, both in London, for an improvement in the shafts of vehicles and harness to be used in connection therewith. (Filed 22nd May 1896.)

No. 8 of 1896.—Leo Kamm, electrician, of 1, Gresley Road, Hornsey Rise, London, for improvements in printing telegraphs. (Filed 22nd May 1896.)

No. 64 of 1896.—Robert Allison Hall, of 200 N., Holliday Street, Baltimore, in the United States of America, for improved means for stopping bottles and a tool for use therewith. (Filed 22nd May 1896.)

No. 66 of 1896.—Samuel Cleland Davidson, merchant, of Sirocco Engineering works, Belfast, Ireland, for improvements in the trays or carriers of apparatus for exposing tea, coffee, cocoa, grain and other substances to the drying or other action of air, vapour or gases. (Filed 22nd May 1896.)

No. 1463 P.—THE fee prescribed in schedule 4 of Act V of 1888 has been paid for the continuance of exclusive privilege in respect of the undermentioned invention for the period shown:—

No. 108 of 1892.—Frederick James Mockler, manager of the county of Gloucester Bank, Wotton-under-Edge, Gloucestershire, England, for a removable spring cover for cups, jugs and other vessels. (From 6th June 1896 to 5th June 1897.)

No. 1464 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth Schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorizing others so to do has ceased:—

No. 230 of 1891.—Nagurdas Purbhudas' invention for improvements in fire and thief-proof safes. (Specification filed 29th February 1892.)

No. 338 of 1891.—Mr. W. D. Bohm's invention for improvements in apparatus for leaching ores in separating gold and silver therefrom. (Specification filed 24th February 1892.)

Fee in respect of the continuance of an exclusive privilege—

(*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888, should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

The 6th June, 1896.

SEA AND FOREIGN MAILS.

Mails for	Date of closing at Calcutta.	Route by which despatched.
	1896.	
Aden, Egypt, Europe, America, Zanzibar, Mozambique, Delagoa Bay, Mauritius, Seychelles, Madagascar, Réunion, etc., Natal and Cape Colony, and in general all countries served through the United Kingdom.	9th June	Per P. & O. Str. from Bombay.
Straits Settlements, China, and Japan.	6th ,,	*Vid* Tuticorin and Colombo.
*Australasian Colonies	6th ,,	Ditto.*
Colombo	8th ,,	Per P. & O. Str. *Coromandel.*
Straits Settlements, China, and Japan.	12th ,,	Per Steamer *Catherine Apcar.*
Rangoon and Moulmein	12th ,,	Per Steamer *Canara.*
Rangoon, Moulmein, Penang, and Singapore.	9th ,,	Per Steamer *Ethiopia.*
Akyab, Kyaukpyu, Sandoway, and Rangoon	10th ,,	Per Steamer *Commilla.*
Mauritius and Bourbon	6th ,,	*Vid* Tuticorin and Colombo.
Zanzibar, Dar-es-salam, Mozambique, Delagoa Bay, Natal, Orange Free State, Transvaal, and Tanga.	6th ,,	Direct Steamer from Bombay.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the Steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any Steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a Steamer not belonging to one of the regular lines.

N.B.—The letter-box for Inland Articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late-fee at 7 P.M. precisely; after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up at 7-30 P.M.

On the day of despatch of the Mail for the Australasian Colonies and the Far East *vid* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8 P.M., and late letters and papers fully prepaid will be received up to 8-30 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late-fee at 7 P.M., and late letters and papers will be received up to 7-30 P.M. for despatch by any Foreign Mails despatched the same night. The late-fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,
Presidency Postmaster, Calcutta.

METEOROLOGICAL PUBLICATIONS FOR SALE.

At the Meteorological Office, No. 5, Russell Street, Calcutta, at the prices specified below:—

Hand-book of Cyclonic Storms in the Bay of Bengal for the use of Sailors, describing the phenomena of Cyclonic Storms and Cyclones in the Bay of Bengal, and giving a brief account of six typical Bay of Bengal Cyclonic Storms. It also gives practical hints to sailors respecting Cyclonic Storms in the Bay. Demy, 212 pages, 29 plates (shewing diurnal oscillation of barometer at different Latitudes and Longitudes, mean monthly barometric height, tracks of different Cyclonic Storms, etc., etc.) R5.

Rainfall Map of India in two sheets, scale 64 miles to one inch, showing the annual distribution of rainfall in India (in colours). R1.

Instructions to Observers of the India Meteorological Department, in which are described in detail the various Meteorological instruments in use at the Meteorological observatories, with full instructions how to read them, etc. Demy, 103 pages. R3.

Tables for the Reduction of Meteorological Observations in India. This book contains tables for reducing barometric observations taken at different heights, and for calculating humidity and vapour tension, etc., etc. R2.

Barometer, Wind and Current Charts of the Bay of Bengal and adjacent sea, north of the equator. R5.

Charts of the Bay of Bengal and adjacent sea north of the equator, showing the specific gravity, temperature and currents of the sea surface. R1-8.

Barometer, Wind and Current Charts of the Arabian Sea and the adjacent portion of the North Indian Ocean. R5.

Monthly Weather Review of India, giving a summary of the chief features of the weather in India and containing discussions on atmospheric pressure, barometric depressions, temperature of the air, winds, rainfall, etc. It also contains all available information about snowfall in the mountain districts to the north and north-west of India, and an abstract of observations taken at about 200 observatories in India. Published *monthly*. R1 per month or R12 per annum. Postage 1a. 6p. for each copy outside Calcutta.

India Daily Weather Report and Chart, containing observations recorded at 8 A.M. at 147 observatories, with a Chart shewing the distribution of atmospheric pressure and rainfall all over India, and a brief summary of the chief features of the weather of the day. Issued *daily* from the Simla Meteorological Office. Monthly subscription R2, and postage annas 8.

JOHN ELIOT,
Meteorological Reporter to the Govt. of India.

List of Books for sale at the Library of the Asiatic Society of Bengal, No. 57, Park Street, Calcutta, and obtainable from the Society's Agents, Messrs. Luzac & Co., 46, Great Russell Street, London, W. C., and Mr. Otto Harrassowitz, Bookseller, Leipzig, Germany.

Complete copies of those works marked with an asterisk cannot be supplied—some of the Fasciculi being out of stock.*

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin, R18, or, post free, R18-12.
½ " R 9, " R9-8.
¼ " R4-8, " R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮৲ বা ডাকমাশুল বিনা ১৮৲০
½ আধ " " ৯৲ " ৯৲০
¼ সিকি " " ৪৲৮ " ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনিডাইন নামক অপকৃষ্ট কারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা সমস্ত মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

* The other Fascicali of these works are out of stock, and complete copies cannot be supplied.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates —per four-ounce tin, *R2-8;* per eight-ounce tin, *R5;* per pound tin, *R10*. The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the under-noted rates: per four-ounce tin, *R3;* per eight-ounce tin, *R6;* per pound tin, *R12*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1893.

A Registry Office for men of all grades out of employ is kept up by the Principal, Thomason College, Roorkee. Officers requiring men are requested to apply to Principal.

J. CLIBBORN, *Major, S.E.*,
Principal, Thomason College.

Advertisement of Books and Publications, which are more than two years old, for insertion, in addition to the weekly list, in Part II of the first Gazette of each month.

Catalogue of Books printed at Thomason College Press and procurable from Thomason College Book Depot.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments (electrum) are available at the College Book Depôt, at R64 per box. Drawing Instruments, drawing materials, etc., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

First two Volumes are published in separate sections, as below, but can be bound up in Volumes if required:—

VOLUME I.*

Section	I.	Building Materials	(1895),	R2-8.
"	II.	Masonry	(1891),	R1-8.
"	III.	Carpentry	(1889),	R1-8.
"	IV.	Earthwork	(1892),	R1-8.
"	V.	Tools and Plant	(never published).	

VOLUME II.*

Section	VI.	Buildings	(1891),	R1-8.
"	VII.	Bridges	(in the Press),	say R2-0.
"	VIII.	Roads	(1888),	R2-0.
"	IX.	Railways	(1891),	R1-8.
"	X.	Irrigation Works	(1873),	R2-0.

Roorkee Treatise on Civil Engineering, Vol. II (1867 edition). R5.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods (in the Press).

" II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (6th edition), with Curve Table. R3-8.

XIII. Drawing (by Lieut. R. Pulford, R.E.†) R8.

XIIIa. Drawing, First Principles of Geometrical (by do.) (4th edition). R1-4.

XIV. Simple Applied Mechanics (2nd edition), Parts I and II in one. R3.
Simple Applied Mechanics, Part II (1st edition). 8s.

XV. Examples of Estimating. Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (4th edition) (5th edition in Press).

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 8s.

XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 8s.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Sections IX and X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

* Date of Edition on sale.

† Originally published at R15, reduced to R8.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve (in the Press.)

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 10 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1-8.

Scantlings of Timber for Beams. 8a.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 8a.; mounted on cloth, to fold up. R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces (in the Press), say

Tyndall's Hand-Book of Specifications. R6.

The Indian Engineer's Pocket Book. 4a.

Wooden Bridges and Designs. By Rai Kunhya Lal. R4.

Blasting under Water (2nd edition) (in the Press).

Waugh's Instructions for Topographical Surveying. R1-4.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 8a.

Tables for Degree Curve and Intersection Angles, from 90° to 180°, and for Fixed Tangents from 100 feet to 7,500 feet. By F. G. Brook Fox, Esq., M.I.C.E. R2-4.

Hydraulic Manual, Part I. By Louis D'A. Jackson, Esq. R3.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width. R1-8.

MATHEMATICAL.

Bollean's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pie into decimals of a Rupee. With a few others of general utility (4th edition). R2.

Bollean's Tables of Log sin² ½ P (for computing time) 8a.

Cape's Logarithms, with Tables of Squares, Cubes, etc. (in the Press), say, R1-4.

Cape's Geometry. R1-8.
" **Mechanics.** R2.

Military Topography. 8a.

HINDUSTANI.

Elements of Hindustani Grammar (in the Press), say, 4a

Technical Dialogues—English and Urdu. R1-4.

A Vocabulary of Common and Technical Words in English-Urdu. R1-4.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II, each part 8a.

Short Account of Ganges Canal (English and Urdu) R1.

NOTE AND FIELD-BOOKS etc.

Note-Books (Section paper), large. R1-4.

Surveying Field-Books (ruled). R1.

Levelling Field-Books (English Pattern). R1-8.
" " (Canal "). R1-8.
" " (College "). R2-0.

P. W. D. Note-Book. R1-4 (in the Press.) R1-4.
" **Measurement Book.** R1-4.

Circular Card-board Protractors, 12 inches. R1-8.

GEORGE WAIT,
Reporter on Economic Products to the Govt. of India.

CALCUTTA,
The 28th November, 1894.

FOR SALE.

Report on the Inspection of Mines in India during 1893-94. By JAMES GRUNDY (1894). Price R1.

To be had on application to the Registrar, Geological Survey of India, Calcutta.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage*. . . . Rs22-8

	Without postage. R	a.	p.	With postage. R	a.	p.
For the Calcutta Series	10	0	0	12	8	0
„ each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...			2	0	0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town. R	a.	p.	For mofussil. R	a.	p.
For the Calcutta Series; per copy	0	8	9	0	10	3
„ each of the Madras, Bombay, and Allahabad Series; per copy	0	5	3	0	5	9
„ the Calcutta Series. For the year	7	2	6	8	6	3
„ each of the Madras, Bombay, and Allahabad Series. For the year	4	4	6	4	11	3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.

The Superintendent, Government Central Press, Bombay.

The Curator of Government Books, North-Western Provinces and Oudh.

The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue	R 20	R 14	R 9
„ three issues	„ 55	„ 36	„ 24
„ six „	„ 100	„ 68	„ 45
„ nine „	„ 145	„ 96	„ 64
„ twelve „	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage. R	a.	p.	With postage. R	a.	p.
Bengal Law Reports, for one year	20	0	0	22	8	0
Single copies, R2 per copy.						
Full Bench Rulings, Parts I and II	20	0	0	22	8	0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, Rs22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

BOOKS AND PUBLICATIONS

FOR SALE BY THE

SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA,

8, HASTINGS STREET, CALCUTTA.

All books published by the Superintendent of Government Printing, India, can be purchased either directly or through the following or any other booksellers:—

Cattle Disease in India, Manual of the more deadly forms of. Hindi version. Royal 8vo., stiff boards. 6a.

Ditto. Urdu version. Royal 8vo., stiff boards. 6a.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

The first five volumes and Volume VI, Parts I, II, III, & IV of the Dictionary are now ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 6 annas per volume; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross-references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal 8vo pages; Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L; and Volume V contains the latter half of L to end of O; Vol. VI (which consists of four parts), Part I, contains letters P to R. The whole work completed in nine volumes (including Parts II to IV of Vol. VI), but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and, as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Technical Art Series published up to 1894, together with their explanatory Text—

1886-87, 6 Plates with Text. R1-8 a set (4s.)
1888-89, 18 Plates with Text. R4-8 a set (8s.)

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Simla, the 10th June, 1896.

No. 15.—Whereas by Resolution passed by the Secretary of State for India in Council on the 25th day of September, 1895, the provisions of the 33rd of Vict., Chap. 3, Sec. 1, were declared to be from the 6th idem applicable to the territories known as the South Lushai Hills under the administration of the Lieutenant-Governor of Bengal;

And whereas the Lieutenant-Governor of Bengal has proposed to the Governor General in Council a draft of the following Regulation, together with the reasons for proposing the same;

And whereas the Governor General in Council has taken the draft and reasons into consideration, and has approved of the draft and the same has received the Governor General's assent on the 5th day of June, 1896.

In pursuance of the direction contained in the said section, the said Regulation is now published in the *Gazette of India*.

REGULATION NO. III OF 1896.

A Regulation to provide for the removal of the South Lushai Hills from the operation of enactments in force therein.

WHEREAS it is expedient to provide for the removal of the South Lushai Hills from the operation of enactments in force therein; It is hereby enacted as follows:

Title, extent and commencement.

1. (*1*) This Regulation may be called the South Lushai Hills Regulation, 1896.

(*2*) It extends to the territories known as the South Lushai Hills, under the administration of the Lieutenant-Governor of Bengal; and

(3) It shall come into force at once.

2. The Local Government may, with the previous sanction of the Governor General in Council, by notification in the Calcutta Gazette, direct that any law or enactment for the time being in force in the South Lushai Hills shall cease to be in force therein:

Power to Local Government to direct any enactment shall cease to be in force.

Provided that no such notification shall affect the criminal jurisdiction of any Court over European British subjects.

S. HARVEY JAMES,
Secretary to the Government of India.

HOME DEPARTMENT.

ACCOUNTS AND FINANCE.

PUBLIC DEBT.

No. 2487-A.

Simla, the 13th June, 1896.

The following draft of certain amendments which it is proposed to make, in exercise of the powers conferred by section 14 of the Indian Securities Act (XIII of 1886), in the rules published with the Resolution of the Government of India in the Department of Finance and Commerce, No. 96, dated the 7th January 1888, in the *Gazette of India*, of the same date, is published, as required by section 15 of the said Act, for the information of all persons likely to be affected thereby, and notice is hereby given that the draft will be taken into consideration by the Governor General in Council on or after the 13th August 1896.

2. Any objection or suggestion which may be received from any person with respect to the draft before the above mentioned date, will be considered by the Governor General in Council.

Draft of Proposed Amendments.

I.—For Rule 5 of the said rules the following shall be substituted, namely :

"5. No notice will be taken of any trust appearing in an endorsement of transfer or receipt for interest. When a note is endorsed to, or receipted by, any person, in his capacity of trustee or in any other representative capacity, such person will be treated in all respects as the true owner of the note."

II.—For Rule 7 the following shall be substituted, namely :

"7. The holder of a note may be required to receipt the same for renewal in all or any of the following cases, that is to say :

(1) If the note has been enfaced for payment of interest at a Mofussil Treasury, and the holder thereof is desirous of altering the place of payment.

(2) If only sufficient room remains on the back of the note for one further endorsement, or when any word or words is or are written upon the note across any existing endorsement or endorsements, all cross endorsements being strictly prohibited.

(3) If the note is torn or in any way damaged or crowded with writing, or unfit, in the opinion of the officer before whom it is produced for payment of interest, for receiving endorsement.

(4) If the note bears an endorsement which transfers the note to, or is signed by, any person otherwise than in his personal capacity, except in the under-mentioned cases :

(*a*) where the transferee is a well-known firm, corporate body, or Bank; or the signature attached to the endorsement is the usual name or signature of such a firm or purports to be the impression of the common seal of a corporate body with perpetual succession or is the signature of the Secretary, Deputy Secretary, Manager, or Agent, of a Bank or corporate body;

(*b*) where an endorsement is made in his official capacity by the person holding for the time being one of the offices to which the Governor General in Council has, by notification in the *Gazette of India*, declared section 7, sub-section (1), of the Indian Securities Act (XIII of 1886), to apply;

(*c*) where the transfer is made to or by a person in whose favour a certificate under the Succession Certificate Act (VII of 1889) or probate or letters of administration under the Indian Succession Act (X of 1865), or the Probate and Administration Act (V of 1881) has or have been granted by a Court of competent jurisdiction;

(*d*) where the transfer is made to or by the executor or administrator of an estate who is described as such therein, such executor or administrator being shown to be the holder according to the tenor of the note and previous endorsements.

(5) If the endorsement is not clear and distinct, or if it is made on paper affixed to a Government Promissory Note.

(6) If, in the opinion of the officer before whom the note is presented for payment of interest, the title of the person so presenting the note is irregular or not fully proved.

(7) If the note in question, being a counterpart note issued under the provisions of Rule 8, has ceased to be the property of a minor, or to belong to an estate in which administration is limited to interest.

In all or any of the preceding cases payment of any further interest on such note may be refused until the note is receipted for renewal and actually renewed."

III.—In Rules 10 and 16 for the words "the Act" and in Rules 15 and 22 for the words "the said Act" the words and figures "the Indian Securities Act (XIII of 1886)" shall be substituted.

LEAVE AND APPOINTMENTS.

The 9th June, 1896.

No. 2469-*Gl.*—Mr. H. W. Ronaldson, Superintendent in the Office of the Comptroller and Auditor General, is appointed to act as Chief Superintendent in the Paper Currency Office, Calcutta, with effect from 22nd May 1896, during the absence on leave of Mr. E. Grant, or until further orders.

The 12th June, 1896.

No. 2564-*Gl.*—Mr. W. J. F. Williamson is posted as Assistant Accountant General and Inspector of Local Fund Accounts, Madras, with effect from 6th June 1896.

No. 2568-*Gl.*—Mr. A. Kensington, Indian Civil Service, is appointed Accountant General, North Western Provinces and Oudh, with effect from the date on which he may assume charge of that appointment.

No. 2498-*P.*

The 10th June, 1896.

RESOLUTION—By the Government of India, Finance and Commerce Department.

Read—

Despatch to the Secretary of State for India, No. 169, dated 6th June 1893.

Despatch from the Secretary of State for India, No. 188 (Financial), dated 21st September 1893.

Despatch to the Secretary of State for India, No. 9, dated 9th January 1895.

Despatch from the Secretary of State for India, No. 59, dated 11th April 1895.

Resolution by the Government of India in the Finance Department, No. 2959-P., dated 22nd June 1895.

RESOLUTION.—Under the orders contained in Secretary of State's Despatch No. 188, dated 21st September 1893, a system has been established under which various officers, to whom the Indian Services Leave Rules are applicable during the earlier part of their service, pass at a later stage under the European Services Leave Rules. It is necessary therefore to prescribe the manner in which, when they pass under the European Services Leave Rules, the calculation of the leave earned by them and due to them is to be made.

2. The following rules are accordingly laid down in substitution for the orders contained in paragraph 2 of the Resolution No. 2959-P., dated the 22nd June 1895:

(*a*) When an officer passes at a particular stage of his service from the Indian Services Leave Rules to the European Services Leave Rules, the amount of furlough due to him shall be taken at one-eighth of his active service while under the Indian Services Leave Rules, less the amount of furlough or of leave on private affairs enjoyed by him under articles 370 and 371 of the Civil Service Regulations.

(*b*) Leave on medical certificate shall in this calculation reckon neither as service qualifying for furlough nor as furlough taken, but the amount of furlough due shall not exceed the amount which would be due if the officer had been under the European Services Leave Rules from the beginning of his service and the leave taken by him on medical certificate had been furlough on medical certificate under the European Services Leave Rules.

3. In the case of officers who are brought under the European Services Leave Rules for the first time, by the operation of the orders contained in the despatch of the Secretary of State of the 21st September 1893, but who would have

come under them at an earlier date if they had been in force at the time, the calculation of furlough and other leave due shall be made as follows:

(*a*) If under those orders, they would have been under the European Services Leave Rules from the commencement of their service, the calculation shall be made as if such Rules had applied to them from the commencement of their service, and all leave taken by them had been taken under those Rules.

(*b*) If under those orders they would at some stage in their service have passed from the Indian Services Leave Rules to the European Services Leave Rules, then the calculation shall be made under the rules in paragraph 2 above, as if they had come under the European Services Leave Rules at such earlier stage. They shall be held to have been under the European Services Leave Rules from the said earlier date, and all furlough, leave on private affairs, or leave on medical certificate taken after such date shall be treated as furlough taken under the European Services Leave Rules.

(*c*) Provided that no readjustment of leave allowances already drawn shall in any case be made.

4. An officer who comes under the European Services Leave Rules, while he is on leave under the Indian Services Leave Rules may at his option—

(*a*) change his leave allowances to the amount admissible under the European Services Leave Rules and come under them immediately; or

(*b*) postpone his coming under them until his return from leave.

ORDER.—Ordered, that the Resolution be communicated to the Departments of the Government of India; to the several Local Governments and Administrations; to the Heads of Departments under the Finance Department; to the Comptroller and Auditor General; and to all Accountants General and Comptrollers.

Ordered also, that the Resolution be published in the *Gazette of India*.

No. 2507-P.

The 10th June, 1896.

RESOLUTION—By the Government of India, Finance and Commerce Department.

Read—

Resolution in the Finance and Commerce Department, No. 2959-P., dated 22nd June 1895.

Resolution in the Finance and Commerce Department, No. 4702-P., dated 2nd October 1895.

Read also—

Despatch to Secretary of State, No. 71, dated 18th March 1896.

Telegram from Secretary of State, dated 28th April 1896.

RESOLUTION.—The Governor General in Council is pleased to direct that the following additions be made to the lists appended to the two Resolutions quoted in the preamble, enumerating the officers of the several Branches and Departments of the Public Service to whom the leave rules contained in Chapter XIII of the Civil Service Regulations are now extended. These orders are not to be taken as excluding from the benefit of those rules any officer who has already been admitted to them.

PUBLIC WORKS DEPARTMENT.

General.

(*a*) Officers belonging to one of the establishments or branches named below, and appointed thereto by Her Majesty's Secretary of State or with his particular sanction.

Engineer Establishment.

(*b*) Engineer officers, of whatever rank in the Department, who belong to the Imperial Branch of the establishment (see explanatory note below), or whose names are included in Appendix 13 of the Civil Service Regulations.

(*c*) Executive Engineers of grade II and officers of higher rank, except those who were appointed as natives of India, under the operation of Public Works Department Resolutions No. 1516—28-G., dated 11th November 1882, No. 241—51-G., dated 11th February 1883, and No. 1443-G., dated 13th December 1884, or who belong to the Provincial Branch of the establishment (see explanatory note below).

(*d*) Special Engineers (ungraded) who were taken over from the service of Guaranteed Railway Companies when the lines were transferred from the Companies to the Government, from the time they reach a substantive pay of Rs. 850 or over.

Superior Accounts Branch.

(*e*) Officers of Class IV, grade 2 (old classification), and of Class IV (new classification), and of higher rank.

Superior Revenue Establishment of State Railways.

(*f*) Officers of Class II, grade 2 (pay Rs. 800), and of higher rank of the Managerial, Traffic, Locomotive and Stores Departments.

Government of India, Public Works Department Secretariat.

(*g*) Under Secretary not being a member of a graded establishment.

INDIAN TELEGRAPH DEPARTMENT.

The Imperial Branch of the Department (see explanatory note below).

EXPLANATORY NOTE, REFERRED TO IN THE LIST.—The following extract from the Government of India's Despatch No. 71, dated 18th March 1896, explains the principle on which the Engineer Establishment and the Indian Telegraph Department have been divided into Imperial and Provincial:

"2. In the case of the Engineer Establishment and the Telegraph Department alone * * * has it been found possible to divide the officers into Imperial and Provincial according to the nature of their recruitment, commencing from dates which are fixed by the Resolutions noted in the margin. In regard to all men recruited after the dates fixed by these Resolutions, there is no question that only those recruited in England are officers of the Imperial Establishment, while those recruited in India belong to the Provincial Establishment, and can only come under the Indian leave rules."

Public Works Department Resolution No. 2113-G., dated 19th July 1892.
Public Works Department Resolution No. 158-T.E., dated 25th August 1892.

ORDER.—Ordered, that this Resolution be communicated to the Departments of the Government of India; to the several Local Governments and Administrations; to the Heads of Departments under the Finance Department; to the Comptroller and Auditor General; and to all Accountants General and Comptrollers.

Ordered also, that the Resolution be published in the *Gazette of India*.

SEPARATE REVENUE.

SALT.

No. 2547-*S. R.*

The 12th June, 1896.

In exercise of the powers conferred by section 7 of the Indian Salt Act, XII of 1882, and in supersession of the Notification by the Government of India in the Finance and Commerce Department, No. 1931, dated 6th July 1883, the Governor General in Council imposes a duty of Rs. 2 per Lahori or Kohat maund of $102\frac{17}{28}$ lbs. avoirdupois on salt manufactured in the mines in the district of Kohat, noted on the margin, with effect from the 13th July 1896.

Jatta.	Karrak.
Malgin.	Bahadur Khel.
Narri.	

STATISTICS AND COMMERCE.

CUSTOMS.

The 12th June, 1896.

No. 2470-*S. R.*—The Governor General in Council is pleased to declare that, with effect from the 27th December 1894, the Steam Tramway constructed between Tezpur and Balipara in the Darrang District of Assam shall, for the purposes of article 93 of Schedule IV of the Indian Tariff Act (VIII of 1894), as amended by Acts XVI of 1894 and III of 1896, be included in the term "railway," as used in the said article.

J. F. FINLAY,

Secretary to the Government of India.

Lieutenant-Colonel Graham Stewart Bruce to be Commandant, with effect from the 1st April 1896, *vice* Crighton, resigned.

PROMOTIONS.

No. 711.—*Presidency Volunteer Rifle Battalion*—

Major Joseph Binning, V.D., is granted the honorary rank of Lieutenant-Colonel.

RESIGNATIONS.

No. 712.—*Northern Bengal Mounted Rifles*—

Second-Lieutenant J. R. Donald resigns his commission.

No. 713.—*2nd (Cadet) Battalion, Calcutta Volunteer Rifle Corps*—

Major J. R. Maples resigns his commission.

No. 714.—*South Indian Railway Volunteer Rifle Corps*—

Lieutenant-Colonel C. E. Crighton, Commandant, resigns his appointment, with effect from the 31st March 1896.

No. 715.—*Southern Mahratta Railway Rifle Corps*—

Lieutenant E. M. Proes resigns his commission.

No. 716.—*Bengal-Nagpur Railway Volunteer Rifle Corps*—

Captain J. W. Hartley, Unattached List, resigns his commission.

MARINE DEPARTMENT.

FURLOUGH AND LEAVE.

No. 38.—The undermentioned officer is granted leave to proceed out of India on medical certificate, under the leave rules contained in paragraph 131, Marine Regulations, India, Volume I, Part II; the leave to have effect in India from the date of being struck off duty till the date of sailing; the specified period to count from the date of leaving India:

Sub-Lieutenant R. R. C. Vernon, Royal Indian Marine, for six months.

No. 39.—The undermentioned officers have been granted extensions of leave by the Secretary of State for India:

Engineer B. C. Bunyer, Royal Indian Marine, (m. c.) for three months.

Assistant Engineer C. K. D. Frost, Royal Indian Marine, (m. c.) for three months.

P. J. MAITLAND, *Major-General,*
Secretary to the Government of India.

MILITARY DEPARTMENT.

NOTIFICATION.

Simla, the 12th June, 1896.

Under clause 53 of the Regulations appended to the Regimental Debts Act of 1893, it is notified that reports of the deaths of the undermentioned commissioned officers, on the dates specified, were received in the Military Department between the 6th and the 12th June 1896:

Corps.	Rank and Names.	Date of decease.	Place of decease.	Testate or Intestate.	Remarks.
Invalid Establishment, Bengal.	Captain C. F. Collins . .	28th February 1896.	Mussoorie.		
Ditto .	Lieutenant F. H. Kennedy .	27th March 1896.	Ditto.		

Statement of Deposits on account of Estates between the 6th and the 12th June 1896.

On whose account.	Rank.	Corps.	Date of decease.	Testate or Intestate.	Total enclosed amount deposited.	Amount paid in India.	Date to which claims will be received.
					Rs. a. p.		
Charles Ernest Bliss (a)	Lieutenant	1st Battalion, 3rd Gurkha Rifles.	15th December 1895.	Intestate .	4,804 12 2	...	11th Aug. 1896.

(a) *Next-of-kin.*—Father—The Hon'ble Mr. H. W. Bliss, C.S.I., C.I.E., "Shedlenhome," Ootacamund.

P. J. MAITLAND, *Major-General,*
Secretary to the Government of India.

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

Simla, the 8th June, 1896.

No. 263.—Mr. J. S. Brown, Executive Engineer, 1st Grade, State Railways, is appointed to officiate as Engineer-in-Chief, Main line section of the North-Western Railway, during the absence of Mr. H. L. Monk, on privilege leave, or until further orders.

The 9th June, 1896.

No. 264.—Second-Lieutenant Gerald James Watt Smyth, R.E., is appointed to the Public Works Department as an Assistant Engineer, 3rd Grade, and is posted to State Railways. His services are placed at the disposal of the Director General of Railways for employment on the Rae Bareli-Benares Railway.

No. 265.—Mr. W. E. Curry, Examiner of Accounts, is, on return from leave, appointed Examiner of Accounts, Mandalay-Kunlon Railway.

The 10th June, 1896.

No. 266.—Mr. A. W. U. Pope, Traffic Superintendent, East Coast Railway, in Class II, Grade 1, temporary rank of the Superior Revenue Establishment of State Railways, is promoted permanently to that grade, with effect from the 1st April 1896.

No. 267.—Mr. P. Rainier, Class II, Grade 3, of the Superior Revenue Establishment of State Railways, Traffic Department, has been granted, by Her Majesty's Secretary of State for India, three months' leave, on medical certificate, in extension of that published in Public Works Department Notification No. 15, dated 8th January 1896.

No. 268.—Mr. W. J. Chamberlain, in Class I, Grade 3, of the Superior Revenue Establishment of State Railways, Traffic Department, is appointed to officiate as Traffic Superintendent of the Eastern Bengal State Railway, until further orders.

W. S. S. BISSET, *Colonel, R.E.,*
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, June 6th, 1896.

The principal interest in the weather has centred, during the week under review, in the changes which have been in progress over the west of the Peninsula and the neighbouring portion of the Arabian Sea. In the early part of the week a recovery of pressure was in progress in this region from the disturbed weather noticed in last week's summary, but this recovery did not last long, and on the 3rd of June a fresh area of disturbed weather was shown off the Malabar Coast. This disturbed area passed slowly northward up the Arabian Sea, drawing the wind into south and east at the West Coast ports, and occasioning light to moderate rain over the West Coast districts. By the time this area had reached about Latitude 12°, westerly winds appeared in Malabar, and the first heavy rain of the season was reported on the morning of the 5th. In other parts of India conditions were less disturbed, and as regards general distribution were fairly normal. Thus, pressure was steadily lowest over North-Western India and relatively low down the Gangetic Plain, while strong westerly winds were blowing across the head of the Peninsula, strong southerly winds at the head of the Bay, and easterly winds up the Gangetic Plain. Fairly steady rain fell over North-Eastern India, and showers were experienced at times in Northern India and at some places in the centre. The rain in Bengal and the Gangetic Plain occasioned a decided lowering of temperature, which in both those regions was well below the normal average during a large part of the week.

Daily Summary.—*Sunday, May 31st.*—Pressure had decreased briskly in the extreme north-west and increased briskly at several central stations, but elsewhere the changes were slight. Readings were lowest over the Punjab and high over the west of the Peninsula, Ceylon, and the south-east of the Bay. The wind directions were fairly normal, and the westerly winds over a large part of North-Western and Central India were blowing very strongly. The mean temperature was low over Assam, Bengal, and Bihar, as well as at some central stations, but was excessive elsewhere—most so in the South Gangetic Plain. Thunderstorms had given rain to Burma, Assam, and a considerable part of Bengal and of the south of the Peninsula, while local showers had been received in Berar. The heaviest amounts were reported from North-Eastern India and from the south-west of the Peninsula.

Monday, June 1st.—Pressure had increased over a considerable part of Northern India and had decreased elsewhere. At Mangalore and Calicut the fall had been brisk. The general conditions of pressure were unchanged, but the pressure differences were somewhat slighter. The winds blew from about the normal directions, and the force was still high over part of North-Western India. The mean temperature was slightly to very largely below the normal average over Assam, Bengal, and Bihar, and slightly below over Berar, the Deccan, and Northern Bombay, but remained excessive elsewhere. The greatest variations were −10·7° at Bogra and +10·1° at Peshawar General rain had occurred over North-Eastern India, and showers over the west of the Peninsula and at some central stations.

Tuesday, June 2nd.—The barometer had risen briskly to rapidly over the Punjab, but had changed slightly elsewhere. Readings were lowest in Sind, relatively low within a broad band stretching south-eastward from the Punjab to Orissa, and highest in Tenasserim. The winds still blew from about normal directions. The general distribution of the mean temperature with respect to the normal was much the same as on the preceding day, except that the area of low temperature in the north had moved somewhat westward up the Gangetic Plain, and temperature had risen a little in Assam. At Allahabad the

variation was —9·9°, while at Rawalpindi it was +8·9°. Showers of rain were reported from all provinces, the largest amounts having been 4·15 inches at Bogra and 2·03 inches at Amraoti.

Wednesday, June 3rd.—The barometer had continued to rise briskly to rapidly in part of North-Western India, and to change slightly elsewhere. Readings remained lowest over the western desert, relatively low over the Gangetic Plain, and highest in Tenasserim, but the pressure difference was very much less than it was at the commencement of the week. Calms were reported from Trivandrum and Cochin, easterly winds from Calicut, Mangalore, and Ratnagiri, and a northerly wind from Bombay. In most other places the directions remained fairly normal, except that at Saugor Island an east-north-easterly wind was blowing. The northern area of relatively low temperature had continued to move westward, and now extended from Silchar to Sialkot, while the low temperature area over Berar and the Deccan had intensified. Rain had been received in most parts of the country, except Gujarat, Central India, part of the Central Provinces, Sind, and Rajputana. Scattered showers were reported from most places, but general rain had been received over Burma, Lower Bengal, and the west of the Peninsula.

Thursday, June 4th.—Pressure had decreased briskly over part of the Punjab and North Western Provinces, but had changed slightly and irregularly generally. The general distribution was the same as on the 3rd, and the pressure difference was only moderate. Southerly and south-easterly winds were reported from the West Coast, and conditions were unsettled over the Arabian Sea. The wind was more easterly than usual at the head of the Bay, but, except in this region and along the West Coast, the directions were fairly normal. The mean temperature was excessive over Assam, Burma, the east and south of the Peninsula, and over North-Western and Central India, but was in defect elsewhere. The greatest variations were —7·1° at Calcutta and +6·3° at Mooltan.

General rain had again been received over North-Eastern India and the west of the Peninsula, and there were still a few showers reported from Upper and Central India and the east of the Peninsula, but the rainfall was less widely distributed than on the 3rd.

Friday, June 5th.—Pressure had increased slightly to rapidly in the Eastern Punjab and west of the North-Western Provinces, but elsewhere the changes were again slight. Readings were lowest in Upper Sind and highest in Malabar. The principal change in the distribution was the production of steepish gradients for easterly winds over the Northern Punjab. The winds had returned to their normal westerly directions in Southern Malabar, but they were still southerly to easterly on other parts of the West Coast. Elsewhere the directions were about normal. The mean temperature was low over the Gangetic Plain, West and Lower Bengal, and Ganjam, but was excessive elsewhere. At Gorakhpur the abnormal deficiency was 10·2°, and at Mooltan the excess was 5·6°. Heavy rain varying between 2 and 6 inches had set in in Malabar, and fairly general showers were reported from Burma, South-East Bengal, Bihar, the North-Western Himalayas, and the west of the Peninsula.

Saturday, June 6th.—The barometer had fallen briskly along the West Coast and risen slightly to rapidly over Central and North-Western India. Readings were high in Malabar and Tenasserim and low in Sind, while they were relatively low right across the head of the Peninsula. The winds were irregular and abnormal along the West Coast; fairly regular elsewhere. The mean temperature was low over Northern India and Ganjam, and generally excessive in other places. There was an abnormal deficiency of 8·5° at Lahore and an excess of 5·1° at Indore. Rain had fallen fairly generally over Burma and the west of the Peninsula, and a good deal of scattered rainfall was reported from other parts of the country.

Temperature.—Large changes of temperature have taken place during the week. These changes were due to an inrush of humid winds, which, though undoubtedly temporary, had an important influence on the temperature conditions. In the west the effect was less marked than in Northern India, because, owing to the

peculiar conditions over the Arabian Sea, the winds were confined to the coast districts. On May 31st the low temperature area in Northern India was confined to Assam, North Bengal, and Bihar. On June 1st it had extended to Lower and South-West Bengal and had intensified; on the 2nd it had left Assam and advanced up the Gangetic Plain to the west of the North-Western Provinces; on the 3rd it had advanced into the Eastern Punjab; on the 4th and 5th there was a temporary halt, but by the 6th it had covered the whole Punjab.

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Province.	May 1896.	June 1896.						Mean variation of week.
	31st	1st	2nd	3rd	4th	5th	6th	
	°	°	°	°	°	°	°	°
Burma	+0·5	+0·5	+0·7	+0·6	+0·8	+1·6	+1·8	+1·1
Bengal and Assam	−0·5	−4·7	−2·4	−2·7	−1·7	−1·5	−0·9	−2·1
North-Western Provinces and Oudh	+3·8	+2·7	−3·1	−6·2	−2·0	−3·8	−4·2	−1·8
Punjab	+5·1	+7·5	+5·0	−0·6	+1·4	+1·3	−4·0	+2·2
Bombay	+1·3	+0·9	+1·0	−0·7	−0·2	+1·4	+1·4	+0·7
Central Provinces and Berar	+2·2	+1·3	+0·5	−1·5	−0·1	+1·5	+0·5	+0·6
Central India and Gujarat	+3·7	+1·7	+1·0	+0·4	+1·1	+2·0	+2·4	+1·8
Sind and Rajputana	+2·9	+1·2	+1·4	+1·9	+3·5	+3·9	+2·0	+2·4
Madras	+1·6	+1·5	+2·4	+0·6	+1·0	+0·8	+0·3	+1·2
Mean for whole of India	+2·3	+1·4	+0·7	−0·9	+0·5	+0·8	−0·1	+0·7

The mean temperature of the whole country was excessive on the 31st May and 1st June and was normal thereafter. The provincial variations show that there was a moderate deficiency of temperature over Bengal during the week, a slight deficiency over the North-Western Provinces, practically no variation over the Central Provinces and Bombay, and an excess elsewhere. In Bengal the mean temperature was deficient on all days, in the North-Western Provinces on five days, and in the Punjab, Bombay, and the Central Provinces on two days.

The following were the highest temperatures throughout India recorded on each day:

May	31st	120·0°	at Jacobabad.
June	1st	120·5°	" "
"	2nd	115·1°	" "
"	3rd	115·1°	" "
"	4th	115·6°	" "
"	5th	114·2°	" "
"	6th	116·0°	" "

Rain.—The unsettled cyclonic weather which prevailed during the week over the Arabian Sea and the inrush of humid winds which occurred over Northern India has had a very marked effect on the rainfall, which has been remarkably widely distributed during the period under review. On the West Coast and also over a large part of the north-east of India the rainfall has been fairly steady and continuous, but in all other parts of the country the rain has fallen during thunderstorms. The weather has indeed been on the whole of the normal type, such as at this season is associated with a temporary and irregular advance of monsoon winds, which, passing over countries and districts immediately before occupied by local dry and hot winds, produce feeble but general disturbed conditions, which result in thundery and unsettled weather and in general showers. These conditions are annually established over India prior to the real advance of the monsoon, and during the present week this advance has not taken place. This delay in the advance—June 5th being the average date of the appearance of the monsoon at Bombay—appears to be largely

attributable to the cyclonic disturbances which have been developed over the Arabian Sea. These disturbances have diverted the current and drawn it into circulation around centres of low pressure over the sea and have brought about the precipitation of heavy cyclonic rainfall over the sea area. The delay in the advance of the true monsoon current has thus been due to the diversion of the current from its ordinary direction towards the Malabar Coast by the presence of cyclonic disturbances over the Arabian Sea, but the fact of these disturbances having formed is an indication that the monsoon current itself has so far been weak, and that its advance over the Arabian Sea has been carried out in a hesitating manner. The concluding table gives the rainfall data for the week. The first column shows that Sind and Baluchistan were the only two divisions which had absolutely no rain during the week, but in the case of the Punjab (West), Gujarat, Kathiawar, Central India, and Rajputana the average actual rainfall was less than one-tenth of an inch, so that there were really eight divisions which received practically no rain. In all other parts of India effective rain was received, the average actual amounts ranging from 5·77 inches in Malabar, 5·56 inches in the Assam Hill Tracts, and 4·13 inches in Assam-Surma to only 0·15 inch in the Southern Punjab. The second column of the table gives the average normal rainfall for the week, which ranges from 12·30 inches in Arakan and 10·03 inches in Malabar to a trifling amount in Sind. The third column shows the difference between the actual and normal average rainfall. In the case of twenty-five divisions the actual rainfall was more or less excessive, but the amount of the excess was generally small and, except in the case of the East Coast (North) (*a*), was less than 1·00 inch. The divisions reporting an excess were—Central Bengal, Orissa, the two Bihar divisions, all the North-Western Provinces divisions, the Punjab (South-East, Central, Submontane, Hills and North divisions); Madras (South-Central), Mysore, the Bombay Deccan, Khandesh, the Central Provinces (East), the East Coast (North), and Madras (Central). In all the other parts of the country the week's rainfall was in defect—in some cases very considerably so. Thus, Tenasserim had a deficiency of 5·97 inches, Arakan of 10·02 inches, Malabar of 4·26 inches, Coorg of 4·01 inches, and the Konkan of 3·42. This shows that the ordinary monsoon influence was much weaker, and the storm rainfall much heavier than usual, because it is in Tenasserim, Arakan, and Malabar, where the monsoon current first appears, that the rainfall is deficient, and it is in the Gangetic Plain and the Punjab, where the monsoon is ordinarily much later, that the rainfall is excessive.

The three concluding columns, as this is the first week of a new rainfall period, give the same information as that contained in the first three.

The following are the principal totals recorded during the week :—Pyuntaza (Pegu) 6·80 inches, Myittha (Kyaukse) 6·61 inches, Magok 5·74 inches, Mymensingh 8·93 inches, South Sylhet 7·59 inches, Goalundo (Faridpur) 5·35 inches, Bogra 6·83 inches, Alipore (Jalpaiguri) 4·05 inches, Bahera (Darbhanga) 4·00 inches, Nanpara (Bahraich) 3·05 inches, Maharajgunj (Gorakhpur) 7·60 inches; Dharmsala 4·32 inches, Pannani (Malabar) 14·39 inches, Dharapuram (Coimbatore) 9·04 inches, Sirur (Poona) 8·32 inches, Ameer (Ahmednagar) 7·01 inches, Madakasira (Anantapur) 6·76 inches.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *11th June 1896.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 6th June.*—The rainfall was good on the West Coast; elsewhere, except in parts of the Carnatic and Southern districts, the rainfall was moderate, but very irregularly distributed. The water-supply is generally insufficient. Preparations for sowing are proceeding slowly. Harvesting is still in progress with moderate yield. Pasture is scarce, but fodder is sufficient. Prices are generally dearer, except in Madras, Salem and Tinnevelly.

Bombay.—*For week ending 10th June.*—Rain fell in sixteen districts; generally good or moderate in the Deccan, Karnatak and Konkan, slight in Gujarat and Sind. More rain is required urgently in parts of Thar and Parkar. Preparations for the monsoon cultivation are progressing in twelve districts, but are retarded in parts of the Upper Sind frontier for want of water. Sowing of the early crops continues in ten districts. Fodder is insufficient in four districts. Agricultural stock are in good conditon, except in five districts. Prices are normal, except in Ahmednagar and Sholapur.

Bengal.—*For week ending 8th June.*—There was rain in all districts except Purnea, which has improved the agricultural prospects generally. Ploughing and sowing are everywhere in good progress, and all the standing crops are doing well. The condition of the water-supply has also generally improved, but want of drinking water still exists to a limited extent in a few districts. The price of common rice is still steady in spite of the good rainfall.

North-Western Provinces and Oudh.—*For week ending 10th June.*—Rain has been general throughout the provinces. The falls were heavy in Dehra-Dun, Gorakhpur, Almora and Baraich and lighter in other districts. The standing crops have benefited greatly by the rain, and sowings for the autumn crops are in active progress. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, June 6th, were—Banda 71,259, Hamirpur 34,440, Jhansi 36,686, Jalaun 33,718, Allahabad 9,531, Pilibhit 1,488, Garhwal 2,374, Almora 1,971, Hardoi 2,370—total 1,93,837; of this number 20,912 dependants were gratuitously relieved on the works, and 8,002 persons received gratuitous relief under other provisions of the Famine Code. The numbers employed on village works were—Banda 17,426, Hamirpur 12,253, Jhansi 5,000, Jalaun 11,001. Supplies are sufficent, but fodder is still scarce in several districts. Water is reported to be deficient in Banda and Hamirpur Prices continue high and are rising in fifteen districts and fluctuating in two, but are generally stationary in the remaining districts.

Punjab.—*For week ending 10th June.*—Rain has fallen more or less in all districts, except Peshawar. The spring crops have been threshed. Ploughings for and sowings of the autumn crops are in progress throughout the province. The land is being prepared for the autumn crops in Lahore. The condition of the extra spring crops is good in Amritsar and Dera Ismail Khan, average in Ferozepore, but not good in Rawalpindi owing to drought. The sugarcane crop is suffering for want of rain in Umballa. The outturn of the spring crops is generally reported to be an average one. The condition of the standing crops is good to average. The prospects of the canal crops are good in Rohtak. More rain is urgently wanted in most districts. The stocks of food-grains are average in Peshawar, and not sufficient in parts of Lahore; elsewhere stocks are sufficient. Cattle are in poor condition in Lahore, Shahpur, Rohtak and Gujranwalla; they are dying of starvation in Hissar. Fodder is scarce in all districts, except Jullundur, Ferozepore, Amritsar, Sialkot, Dera Ismail Khan and Peshawar. The number of persons employed on relief works in the Sharakpur tahsil of the Lahore district is 7,460, and that of non-working children and dependants on relief works is 1,845. Prices are above normal in Shahpur and are rising in Peshawar; elsewhere prices are high.

Central Provinces.—*For week ending 10th June.*—The weather is cloudy and warm. Rain has fallen in all districts. Over an inch has been registered in Saugor, Nimar, Seoni, Chanda, Raipur and Sambalpur; other districts have received light showers. Preparation of the land for the autumn sowings has been completed in Nimar and parts of Saugor, and continues elsewhere. Rice is being sown. Fodder and water continue scarce in places; in Nimar, however, the

scarcity of water is decreasing, but that of fodder continues. Prices are generally steady, except in Saugor where the prices of gram, *jowar* (*Sorghum vulgare*) and maize are rising. The price of gram rules high in Jubbulpore, Narsinghpur and Hoshangabad.

Burma.—*For week ending 6th June.*—In Lower Burma ploughing for the wet-weather paddy crop has commenced in Hanthawaddy, Bassein, Henzada and Toungoo. In Upper Burma reaping of dry-weather paddy is still in progress in some districts. In Mandalay ploughing for the wet-weather paddy crop has been resumed, and in other districts the cultivation of paddy, *jowar* (*Sorghum vulgare*), sessamum and other wet-weather crops is in progress. In the Lamaing township of Mandalay the early wet-weather paddy has been damaged by floods. More rain is wanted for the crops generally in Magwe and in the Kyaubin township of Minbu. Elsewhere the prospects of the standing crops are promising. The price of paddy has risen considerably in Mandalay and the Upper Chindwin, and slightly in Pegu, Prome, Amherst and Tavoy; elsewhere prices are stationary.

Assam.—*For week ending 9th June.*—The weather is seasonable. Ploughing for late rice and planting of sugarcane continue. Tea is doing well. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 10th June.*—MYSORE.—Rainfall general. The standing crops are in good condition. Prices have risen somewhat in Bangalore, Tumkur and Shimoga.

COORG.—Rainfall moderate. Ploughing of the rice fields and sowing of *ragi* (*Eleusine coracana*) continue. Water and fodder for cattle are sufficient. Prices continue normal.

Berar and Hyderabad.—*For week ending 10th June.*—BERAR.—The weather is hot and cloudy with seasonable rainfall during the week. The land is being prepared for the autumn crops. Sowing of cotton has commenced in the Jalgaon taluka. Scarcity of fodder and water is still prevalent in some places. Prices are almost stationary.

HYDERABAD.—Rainfall moderate. Fields are under preparation for the autumn crops. General scarcity of fodder is reported. Prices are normal.

Central India.—*For week ending 10th June.*—The rainfall was slight in five Agencies. Operations for the autumn crops are in progress in Bhopal, Bhopawar, Malwa, Baghelkhand and Gonna. Pasturage is good in Bhopal and Bhopawar and fair in Bundelkhand and Malwa, but indifferent in other Agencies. Prices are above normal in Bundelkhand, Baghelkhand, Bhopawar and Malwa and in a few districts of Gwalior, but are normal elsewhere. The numbers employed on relief works were 2,814 in Gwalior, 19,300 in Bundelkhand, 3,564 in Baghelkhand. The numbers on gratuitous relief were 3,072 in Bundelkhand and 1,200 in Baghelkhand.

Rajputana.—*For week ending 10th June.*—The rainfall was slight in Kotah, Ajmere-Merwara, Jeypore, Kishengurh and Ulwar. The land is being prepared for the autumn sowings in Sirohi, Ulwar, Bikanir, Kotah, Jeypore, Kerauli, Meywar and parts of Ajmere-Merwara. The crops are very poor in Jaisalmere. The harvest is poor in Merwara. Agricultural stock generally are in good condition, but are suffering in Meywar and Ulwar, and are dying in parts of Jaisalmere for want of fodder. Pasturage and fodder are scarce in Meywar, Jhallawar, Ulwar and Jaisalmere. Fodder is becoming scarce in Ajmere-Merwara and is failing in Dholepore and Bhurtpore, but is sufficient elsewhere. Prices are rising in five States and have fallen in one; elsewhere prices are steady. In Marwar 5,028 persons are on relief works, and 445 on gratuitous relief; in Merwara 2,179 are on relief works; in Ulwar 803 are on relief works, and 401 on gratuitous relief; in Jaisalmere 712 are on relief works, and 44 on gratuitous relief.

Kashmir.—KASHMIR VALLEY.—*For week ending 9th June.*—Rainfall moderate. Hailstorms are reported from a few villages in Islamabad but no appreciable damage has been caused to the crops. Rapeseed and barley are being harvested. Sowing of rice and Indian-corn is still in progress. Prospects of the spring crops are excellent. Prices continue normal.

JAMMU PROVINCE.—*For week ending 10th June.*—Rainfall slight. Harvesting has been completed. Ploughing for and sowing of the autumn crops are in progress. Prices are stationary.

Nepal.—*For week ending 6th June.*—The weather is showery, but seasonable. Prospects are good.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

INVENTIONS and DESIGNS.

Calcutta, the 11th June, 1896.

NOTIFICATIONS.

No. 1557 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 6th June 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 184 of 1896.—George Ainsworth, government pensioner, residing at the Hope Hall Estate, Mazagon, Bombay, for fastening and sealing corked bottles, so that they cannot be uncorked and the contents extracted without serious damage to the seal.

No. 185 of 1896.—M. B. Mahadev, Messrs. Mahadev and Narayan, printers, Madras, for a water lift.

No. 186 of 1896.—Friedrich Albrecht, metal spinner, of 441, Swanston Street, Melbourne, in the colony of Victoria, Australia, for improvements in connecting devices specially adapted for securing tubes or rods to mains, plates or other articles.

No. 187 of 1896.—James Burgess Readman, analytical and consulting chemist of 4, Lindsay Place, Edinburgh, in the county of Mid Lothian, Scotland, for improvements in apparatus for obtaining cyanides.

No. 188 of 1896.—The Improved Patent Forced Draught Furnace Syndicate, Limited, of 73, Queen Victoria Street, in the city and county of London, for an improved device for equalizing the forced draught for destructor or other furnaces.

No. 189 of 1896.—Andrew Pillatt, mechanical engineer, of 2, Notintone Place, Sneinton, in the town and county of Nottingham, England, for improvements in or relating to furnace fire bars.

No. 190 of 1896.—M. A. Parry and M. E. Möller, engineers, Garden Reach, for a tip-up loading tub.

No. 191 of 1896.—Professor Shanker Abaji Bhise, president of the scientific club, Bombay, for a means of indicating the next station to railway passengers.

No. 1558 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M. at the office of the Secretary in the Imperial Secretariat Buildings, Government Place, West,

Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying :—

No. 252 of 1895.—Emile Flotron, manufacturer of Madretsch, county of Berne, in Switzerland, for hermetical watch, system Kohli. (Filed 30th May 1896.)

No. 301 of 1895.—Frederic Remington, artist, of New Rochelle, in the county of Westchester and state of New York, United States of America, for improvements in stretchers and ammunition carriers. (Filed 28th May 1896.)

No. 325 of 1895.—Johann Ferdinand Robert Knobloch, engineer, of Hamburg, Eimsbüttel, in the German Empire, for improvements in and relating to tidal motors. (Filed 3rd June 1896.)

No. 326 of 1895.—Ralph Stephen Glover, civil engineer, Jhansi, North-Western Provinces, India, to improve the working of Blood's distant signal lever. (Filed 23rd May 1896.)

No. 31 of 1896.—William Garlick, engineer, Edward Garlick, architect, and Adolph Gothard Christiansen, engineer, all of Nesbit Road, Mazagon, Bombay, carrying on business under the name and style of Garlick & Co., engineers and contractors, for a yarn conditioner. (Filed 21st May 1896.)

No. 1559 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fee hereinafter mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased :—

No. 152 of 1890.—Mr. W. D. Clyburn's invention for an improved method of cleaning or ginning cotton by means of quick speed rollers. (Specification filed 1st March 1892.)

No. 120 of 1891.—Mr. E. D. Graff's invention for electric signal apparatus for railway trains. (Specification filed 2nd March 1892.)

No. 242 of 1891.—Mr. F. C. Pallachi's invention for a cheap and simple lamp for the burning of kerosine and other mineral oils. (Specification filed 1st March 1892.)

No. 290 of 1891.—Mr. F. J. Humphries' invention for doing away with the cranks and connecting arms in a steam-power loom. (Specification filed 1st March 1892.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888, should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

A. PEDLER,
Registrar.

SENATE HOUSE;
The 11th June, 1896.

Orders by the Vice-Chancellor and Syndicate of the Calcutta University.

1. The edition of 1891 and of later years of Palgrave's Golden Treasury of Songs and Lyrics has been adopted for the B.A. Examinations in 1897 and 1898.

2. The following changes in the Regulations of the University have been adopted by the Senate and approved by the Governor-General in Council:—

A. (i) That in the form of application for admission to the Entrance Examination, the different heads under "Particulars to be filled in by the candidate" (page 77, Calendar, 1896, Appendix A) be consecutively numbered.

(ii) That a foot-note be added to the head "Where to be examined," to show the places that may, from time to time, be appointed by the Syndicate for holding the examination.

(iii) That the words "Second Language morning paper" be inserted in brackets after "Language in which, besides English, to be examined."

(iv) That in the head "Language into which translation to be made," the word "Vernacular" be inserted before, and the words "from and" after the word "Language," and under the head, the following be inserted as sub-heads:—

(*a*) "English afternoon paper,

(*b*) Second Language afternoon paper,"

and that the following foot-note be added:—

"Sub-head (*a*) is not to be filled up by candidates whose vernacular is English, and sub-head (*b*) need not be filled up by candidates taking up any of the following languages:—

Greek, Latin, Hebrew, Armenian, French or German."

(v) That to the form of Entrance Certificate (page 92, Calendar, 1896, Appendix A) the following foot-note be added:—

The words 'He also passed the optional examination in Drawing' are to be included in the certificate of a candidate who has passed in Drawing."

(vi) That in paragraph 2 of the Regulations for the Examination of Female candidates (page 43, Calendar, 1896), for the word "to be prescribed by the Syndicate, signed by a Member of the Senate, or the head of an affiliated institution," the words "prescribed in Appendix A" be substituted.

(vii) That at the end of the marginal note to the certificate appended to the application form for admission of Female candidates to the Entrance Examination (page 90, Calendar, 1896, Appendix A), after "Inspector of Schools" the words "or a Member of the Senate" be added.

B. (i) That in paragraph 4 of the Regulations for the First Examination in Arts, pages 28-29, Calendar for 1896, (*a*) after the word "Candidate" in the fourth sentence, be added the words "who fails to pass;" (*b*) after the fourth sentence, be added the sentence "A candidate who fails to present himself may be admitted to any one subsequent First Examination in Arts on payment of half the fee."

(ii) That in paragraph 5 of the Regulations for the B.A. Examination, page 32, Calendar for 1896, (*a*) after the word "Candidate" in the fourth sentence, be added the words "who fails to pass;" (*b*) after the fourth sentence be added the sentence "A candidate who fails to present himself may be admitted to any one subsequent B.A. Examination on payment of half the fee."

(iii) That in the Regulations for the M.A. Examination, pages 40 and 43, Calendar for 1896, (*a*) for the word "examined" in the second sentence of paragraph 3, be substituted the words "admitted to the examination;" (*b*) after the third sentence in paragraph 3 and the second sentence in paragraph 12, be added the sentences "A candidate who fails to pass may be admitted to any one or more subsequent M.A. Examinations on payment of a like fee of fifty rupees on each occasion. A candidate who fails to present himself may be admitted to any one subsequent M.A. Examination on payment of half the fee."

C. That in the Regulations for the B.A. Examination under the heading "A. Corresponding Honour Subjects. IV" (page 33, Calendar, 1896) the words "and Arnold's Lectures on Modern History, *or* Mill on representative Government *or* History of the Jews" be omitted, and the words "and the elements of Political Philosophy" be substituted for them.

The changes in the Regulations affecting the form of application for admission to the Entrance Examination and the form of certificate for passing the Entrance Examination, and the changes in the Regulations for the examination of Female candidates will come into force at once

The changes in the F.A., B.A., and M.A. Regulations entitling a candidate who fails to present himself at an examination to be admitted to any one subsequent examination on payment of half the fee will have effect from the examinations of 1895-96.

The change in the Regulations affecting the course in History for the B.A. examination will come into force after the examination in 1898.

3. Bassein has been appointed a centre for holding the Entrance examination in Burma.

A. PEDLER,
Registrar.

SENATE HOUSE, *the 5th June 1896.*

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮৲ বা ডাকমাশুল বিনা ১৮৲০
½ আধ „ „ ৯৲ „ ৯৲০
¼ সিকি „ „ ৪৲৮ „ ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা সকল মূল্যে কেবল গবর্ণমেণ্ট কর্ম্মচারীদিগের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . ₹22-8

	Without postage. ₹ a. p.	With postage. ₹ a. p.
For the Calcutta Series	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India.*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town. ₹ a. p.	For mofussil. ₹ a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 3
„ each of the Madras, Bombay, and Allahabad Series; per copy . . .	0 5 3	0 5 9
„ the Calcutta Series. For the year .	7 2 6	8 6 3
„ each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.

The Superintendent, Government Central Press, Bombay.

The Curator of Government Books, North-Western Provinces and Oudh.

The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1896 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	₹ 20	₹ 14	₹ 9
„ three issues . . .	„ 55	„ 36	„ 24
„ six „ . . .	„ 100	„ 68	„ 45
„ nine „ . . .	„ 145	„ 96	„ 64
„ twelve „ . . .	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage. ₹ a. p.	With postage. ₹ a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies, ₹2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, Rs. 8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

Advertisements and Notices by Private Individuals and Corporations.

IN THE COURT OF THE DISTRICT JUDGE OF MURSHEDABAD.

Cases Nos. 13 and 14 of 1896 (Act VI of 1882).

In *re* Shambhu Mill Company, Limited.

By an order made by the Court of the District Judge of Murshedabad in the above matter, dated the 15th day of May, 1895, on the petitions of Babu Baidya Nath Sarkar and Babu Bhawani Kisore Chakraverty, guardian of Kumar Satis Chandra Roy, minor, contributories to the above Company, it was ordered that the said Shambhu Mill Company, Limited, Doyanagar, be wound up by the said Court under the provisions of the Indian Companies' Act, VI of 1882.

ASUTOSH MAJUMDAR,
Pleader for Petitioners.

SUPPLEMENT TO

The Gazette of India.

No. 24.] CALCUTTA, SATURDAY, JUNE 13, 1896.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

(Joined his appointment on the 3rd June 1896.)

HYDERABAD CONTINGENT.

1st Infantry.

No. 718.—Lieutenant F. F. Major, wing officer, to be Adjutant, with effect from the 23rd May 1896, *vice* Lieutenant H. Lowther, who has vacated.

6th Infantry.

No. 719.—Surgeon-Lieutenant-Colonel C. L. Swaine, M.D., Madras Medical Establishment, to be medical officer, *vice* Surgeon-Captain G. Bidie, appointed medical officer, 4th Infantry. Dated 5th June 1896.

MILITARY ACCOUNTS DEPARTMENT.

No. 720.—Lieutenant C. N. Baker, 2nd (The Queen's Own) Regiment of Bengal (Light)

Infantry, to be an Assistant Military Accountant, 3rd class, on probation, to complete the establishment, with effect from the 28th May 1896.

STAFF CORPS.

No. 721.—Lieutenant Percy Stanislaus Hicks, Hampshire Regiment, officiating squadron officer, 1st Regiment of Lancers, Hyderabad Contingent, having completed eighteen months' probationary service, is admitted to the Indian Staff Corps from the 13th October 1894, subject to confirmation by the Secretary of State for India.

No. 722.—With reference to paragraph 6 of the regulations published with clause 92, India Army Circulars, 1891, the undermentioned officer of the Unattached List is admitted to the Indian Staff Corps, with effect from the date specified, subject to confirmation by the Secretary of State for India:

Second-Lieutenant Ivan Urmston Battye, officiating wing officer, 29th (Punjab) Regiment of Bengal Infantry,—1st April 1896.

CANTONMENTS.

REGULATIONS.

No. 723.—In exercise of the powers conferred by section 26, clauses (13) and (20), and section 27 of the Cantonments Act (XIII of 1889), the Governor-General in Council is pleased to make the following rules and to direct that they shall apply to the Cantonment of Poona:

1. The Cantonment Authority may, by notice in writing,—

Cesspools, receptacles for filth, and soaking of foul water, etc.

(*a*) require any person having control, whether as grantee owner or occupier, of any land or building,—

(*a*) to close any offensive cesspool belonging to the land or building, or

(*b*) to provide a receptacle (of a pattern, if any, approved by the Cantonment Authority) for filth accumulating on or in the land or building, or

(*c*) to keep in a cleanly condition (in such manner, if any, as may be prescribed by the notice) any receptacle provided for such filth, or

(*d*) to prevent the water of any private latrine, urinal, sink or bath-room, or any other offensive matter, from soaking, draining, flowing or being put from the land or building upon any road or public place or into any water-course or into any drain not intended for the purpose; or

Putting private latrine or urinal to public use.

(*e*) require the owner or other person having the control of any private latrine or urinal not to put the same to public use; or

Conformity of private latrines and urinals with standard plan.

(*f*) if any plan for the construction of private latrines or urinals has been approved by the Cantonment Authority,—

(*e*) require any person repairing or constructing a private latrine or urinal not to allow the same to be used until it has been inspected by or under the direction of the Cantonment Magistrate and approved by him as conforming with such plan, or

(*f*) require any person having the control of a private latrine or urinal to rebuild or alter the same in accordance with such plan:

Provided that, on the application of any person to whom a notice under clause (*e*) or clause (*f*) of this rule is addressed, a copy of the approved plan shall be given to him by the Cantonment Magistrate free of charge; or

Removal of private latrine or urinal.

(*g*) require the owner or other person having the control of any private latrine or urinal which, in the opinion of the Cantonment Authority, creates a nuisance, to remove the latrine or urinal, and to substitute fresh earth, to such a depth, not exceeding two feet, as may be specified in the notice, for the earth on which the latrine or urinal stood; or

Roofing, etc., of private latrine, or cleansing of private latrine or urinal.

(*h*) require any person having control, whether as grantee, owner or occupier, of any land or building,—

(*g*) to have any latrine provided for the same shut out by a sufficient roof and wall or fence from the view of persons passing by or dwelling or working in the neighbourhood, or

(*h*) to cleanse with deodorants any latrine or urinal belonging to the land or building; or

Collection of offensive matter and rubbish for public removal.

(*i*) require any persons having control, whether as grantees, owners or occupiers, of any lands or buildings, who have allowed any offensive matter or rubbish to accumulate or remain thereon or therein, to collect the same and deposit it, for removal by the public conservancy establishments, at such times and in such receptacles or places as may be specified in the notice:

Provided that no person shall be required to deposit any offensive matter or rubbish in any receptacle or place situate at a greater distance than one hundred and fifty feet from the nearest boundary of his premises; or

Provision of sufficient drainage.

(*j*) where any land or building is situate within one hundred feet of a public drain or of some other place set apart for the discharge of drainage, and the drains belonging to such land or building are, in the opinion of the Cantonment Authority, insufficient, require

any person having control of the land or building, whether as grantee or owner, or,

in the case of neighbouring lands or buildings, the several grantees or owners having control of the lands or buildings, conjointly,

to provide sufficient drainage within fifteen days from the service of the notice; or

(*8*) require any person to desist from making or altering any drain leading into a public drain; or

Making or altering a private drain leading into a public drain.

(*9*) require any person who is creating or likely to create a nuisance by—

Altering, etc., public drain, or neglecting to provide culvert, or keeping insufficient culvert.

(*j*) altering, obstructing or encroaching upon a public drain, or

(*k*) altering any path leading to his premises or any culvert under such path so as to obstruct the flow of water in or into any public drain, or

(*l*) impeding the flow of water owing to the absence or insufficiency of any culvert or water-course which he has undertaken to construct or is by law liable to construct or maintain,

to desist therefrom; or

(*10*) require any person who is constructing or laying a drain to obey any directions which the Cantonment Authority may, on the advice of the Executive Engineer, think fit to give in order to ensure the completion of the work to its satisfaction; or

Construction of private drain.

(*11*) require any person or persons, being the owner or owners, and having control, of any drain or drains to provide and apply to the same within ten days from the service of the notice such covering as may be specified in the notice; or

Covering of private drains.

(*12*) require any person having the control of a drain,

Cleansing, etc., of private drain.

within a period to be specified in the notice, to remove any obstruction from the drain, or to cleanse, purify, repair or alter the drain, or otherwise to put the same in good order.

2. Whoever fails to comply with any notice issued under rule 1 shall be punishable with fine which may extend to fifty rupees, and, in case of a continuing failure, with an additional fine which may extend to five rupees for every day after the date of the first conviction on which the failure is proved to have been persisted in;

Penalties.

and, if any person required by any such notice to perform any act fails to perform it, the Cantonment Authority may cause the act to be performed and recover the cost from him.

3. (*1*) No persons of any of the following classes, namely:

Licenses required for carrying on of certain occupations.

(*a*) butchers and sellers of poultry, game or fish,

(*b*) persons keeping pigs for profit, and dealers in the flesh of pigs which have been slaughtered in India,

(*c*) persons keeping milch cattle or milch goats for profit,

(*d*) persons keeping for profit any animals other than pigs, milch cattle or milch goats,

(*e*) dairymen and buttermen,

(*f*) makers of bread, biscuits or cake, and sellers of bread, biscuits or cake made in India,

(*g*) sellers of fruit or vegetables,

(*h*) manufacturers of aërated or other potable waters, or ice, and sellers of the same,

(*i*) sellers of any medicines, drugs or articles of food or drink for human consumption (other than the flesh of pigs, milk, butter, bread, biscuits, cake, fruit, vegetables, aërated or other potable waters, or ice) which are of a perishable nature,

(*k*) sellers of water to be used for drinking purposes,

(*l*) washermen,

(*m*) dealers in hay, straw, wood, charcoal or other inflammable material,

(*n*) dealers in fire-works, kerosine oil, petroleum or any other inflammable oil or spirit,

(*o*) tanners and dyers,

(*p*) persons carrying on any trade or occupation from which offensive or unwholesome smells arise,

shall reside in any part of the cantonment for the purpose of carrying on their trades, callings or occupations, unless they have obtained a license from the Cantonment Authority:

(*2*) Provided as follows:

(*i*) a license shall not be withheld if the applicant is willing to comply with such conditions as the Cantonment Authority may consider it necessary to impose under rule 4;

(*ii*) no person who may, when these rules come into force, be carrying on his trade, calling or occupation in any part of the cantonment shall be bound to obtain a license for carrying on such trade, calling or occupation in that part until he has received from the Cantonment Authority not less than three months' notice of his obligation to do so;

(*iii*) if the Cantonment Authority refuses to grant a license to any person mentioned in clause (*ii*) to carry on his trade, calling or occupation in such place, it shall pay him reasonable compensation for any loss incurred by reason only of such refusal.

(*3*) No charge shall be made for any license granted under this rule.

4. A license granted to any person under rule 3 shall specify the part of the cantonment in which the licensee shall reside for the purpose of carrying on his trade, calling or occupation, and may contain any conditions which the Cantonment Authority may think fit to impose with respect to the following matters, namely:

Conditions which may be entered in such licenses.

(*a*) in the case of butchers, and sellers of poultry, game or fish,—

(*i*) the apparatus and coverings to be used in the operations of their trade,

(2) the places at which, and the manner in which, meat, poultry, game or fish may be exposed for sale, and

(3) the disposal of meat, poultry, game or fish when found to be unfit for human consumption:

EXPLANATION.—Meat which has been subjected to the process of blowing shall be presumed to be unfit for human consumption;

(*b*) In the case of persons keeping pigs for profit, and dealers in the flesh of pigs which have been slaughtered in India,—

(4) the places at which pigs may be kept,

(5) the number of pigs which may be kept at any one place,

(6) the season and the places at which pigs may be slaughtered and the flesh offered for sale,

(7) the manner in which pigs shall be inspected prior to slaughter, and

(8) the manner in which the flesh thereof shall be inspected and marked prior to sale, and disposed of when found to be unfit for human consumption;

(*c*) in the case of persons keeping milch cattle or milch goats for profit,—

(9) the places at which such animals may be kept,

(10) the number of such animals which may be kept at any one place,

(11) the sources from which such animals shall be watered,

(12) the segregation of any sick or diseased animals, and

(13) the taking of any other measures which the Cantonment Authority may consider necessary for maintaining the premises in a clean and sanitary state;

(*d*) in the case of persons keeping for profit any animals other than pigs, milch cattle or milch goats,—

(14) the places at which such animals may be kept,

(15) the number of such animals which may be kept at any one place, and

(16) the manner of keeping the animals so as to prevent their becoming a public nuisance or injurious to the public health;

(*e*) in the case of dairymen and buttermen,—

(17) the vessels and other apparatus to be used in the operations of their trade,

(18) the places at which and the manner in which milk or butter may be prepared and kept for sale, and

(19) the taking of any other measures which the Cantonment Authority may consider necessary for keeping the premises and all vessels and apparatus in a cleanly and sanitary state,

(*f*) in the case of makers of bread, biscuits or cake, and sellers of bread, biscuits or cake made in India,—

(20) the apparatus and the water, flour and other ingredients which may be used in the operations of their trade,

(21) the places at which bread, biscuits or cake may be prepared and kept for sale,

(22) the inspection to be exercised over the making of such articles, and

(23) the disposal of any such articles which may be found to be unwholesome;

(*g*) in the case of sellers of fruit or vegetables,—

(24) the places and seasons at which fruit or vegetables, or any specified kinds of fruit or vegetable, may be sold, and

(25) the disposal of any fruit or vegetables which may be found to be unwholesome, or of which the sale has been prohibited under clause (24) of this rule;

(*h*) in the case of manufacturers of aërated or other potable waters, or ice, and sellers of the same,—

(26) the sources from which water used in such manufacture shall be taken,

(27) the machinery, chemicals and ingredients which may be used in such manufacture,

(28) the measures to be taken in order to ensure the proper filtering of the water used and the cleanliness of all apparatus and receptacles used, and

(29) the attachment of labels or the adoption of other means for the purpose of identifying the factory at which each article was made;

(*i*) in the case of sellers of any medicines, drugs or articles of food or drink for human consumption (other than the flesh of pigs, milk, butter, bread, biscuits, cake, fruit, vegetables, aërated or other potable waters, or ice) which are of a perishable nature,—

(30) the disposal of any articles which may be found to be unwholesome;

(*k*) in the case of sellers of water to be used for drinking purposes,—

(31) the sources from which such water shall be taken, and

(32) the taking of measures to ensure the cleanliness of mussucks or any other vessels or utensils used for carrying such water;

(*l*) in the case of washermen,—

(33) the places at which clothes may be washed, dried or kept;

(*m*) in the case of dealers in hay, straw, wood, charcoal or other inflammable material,—

(34) the places at which such materials may be kept,

(35) the quantity which may be stored at any one place, and the manner of storing, and

(36) the precautions against fire to be taken by the dealer or the person in charge of the business;

(*n*) in the case of dealers in fire-works, petroleum, kerosine oil or any other inflammable oil or spirit,—

(37) the places at which, and the quantities in which, any such article may be stored or kept for sale, and

(38) the taking of any measures which the Cantonment Authority may consider necessary for the prevention of danger to life or property;

(e) in the case of tanners and dyers,—

(39) the taking of measures for regulating the discharge of refuse matter from their premises and for abating any nuisance arising from such premises;

(f) in the case of persons carrying on any trade or occupation from which offensive or unwholesome smells arise,—

(40) the taking of any measures which the Cantonment Authority may consider necessary for the abatement of any nuisance arising from the premises.

Feeding animals on filth, etc.

5. No person holding a license under rule 3 for keeping for profit milch cattle or milch goats, or pigs or any other animal which may be used for human consumption, shall allow the same—

(a) to be fed upon refuse or any filthy or deleterious substance, or

(b) to graze in any place in which grazing has for sanitary reasons been prohibited by public notice issued by the Cantonment Authority.

Adulteration of milk.

6. No dairyman holding a license under rule 3 shall mix water with, or otherwise adulterate, any milk intended for sale.

Adulteration of butter.

7. No butterman holding a license under rule 3 shall adulterate any butter intended for sale.

Selling food or drink unfit for human consumption.

8. No person holding a license under rule 3 shall sell any article of food or drink for human consumption which is unfit for that purpose.

Removal of brothels or prostitutes.

9. The Cantonment Authority may, by notice in writing, prohibit—

(a) the keeping of a brothel, or

(b) the residence of a public prostitute,

in any part of the cantonment specified in the notice.

Power to suspend or withdraw license.

10. (1) If any person holding a license under rule 3 fails to comply with any condition imposed upon him under rule 4, or does any act in contravention of rules 5, 6, 7 or 8,

the Cantonment Authority may, in addition to any punishment which may be inflicted under rule 11, by order, suspend the license for any period specified in such order, or withdraw the license.

(2) No person who has obtained a license under these rules for carrying on a trade, calling or occupation in any part of the cantonment shall carry on such trade, calling or occupation in that part while such license is suspended or after the same has been withdrawn.

Penalties.

11. (1) Whoever fails to observe any condition imposed under rule 4, clauses 1 to 16, 20 to 25, 30, or 31 to 39, all inclusive, shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days, and, in case of a continuing failure, with an additional fine which may extend to five rupees for every day after the date of first conviction on which the failure is proved to have been persisted in.

(2) Whoever—

(a) commits any breach of rule 3 or rule 4, clause (2), or

(b) fails to comply with any condition imposed under rule 4, clauses (17), (18), (19), (26), (27), (28), (29), (31), (32), (33), or (40), or

(c) does any act in contravention of rules 5, 6, 7 or 8, or

(d) disregards any prohibition made by notice under rule 9,

shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days, and, in case of a continuing offence or failure, with an additional fine which may extend to five rupees for every day after the date of first conviction on which the offence or failure is proved to have been persisted in.

Keatinge, D. E.	Class III, Grade 3	Class III, Grade 2.

W. S. S. BISSET, *Colonel, R.E.,*
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, June 13th, 1896.

The principal interest in the weather has centered on the West Coast and over the Bay, where conditions have been unsettled, and where indications of the advance of the monsoon have been daily anticipated. Along the West Coast rain has occurred on each day of the week, but the winds have been either southerly, south-easterly, or variable, and there has hence been no extension inland of the rainfall which has prevailed at the coast stations. As was the case last week, these abnormal conditions have resulted from the presence over the Arabian Sea of a cyclonic disturbance which has drawn the winds into circulation around it and interrupted any flow of air from the sea into the inland portions of the Peninsula. The reports of the 7th showed that over the Bay a fairly strong southerly wind was blowing, and that this wind on reaching Bengal drew into south-east and east and with this direction blew up the Gangetic Plain. Moderate rain was received in Bengal, and showers at several stations in Upper India. On the following day a northerly wind sprang up across Oudh, interrupting the flow of easterly winds up the Gangetic Plain; the showers ceased in Upper India, where hot weather conditions were re-established and held till the close of the week Over Bengal the southerly winds from the Bay continued, and fairly general moderate showers were received daily In the central parts of the country and the east of the Peninsula local showers were received during the week and exercised an important local influence on the temperature conditions. The mean temperature of the whole country was about normal on the 7th and 8th, but was excessive on all other days.

Daily Summary.—*Sunday, June 7th.*—Pressure had fallen briskly over the Punjab and had risen briskly over the east of the Central Provinces, but elsewhere the changes were slight Readings were highest in Tenasserim, lowest over the western desert, and relatively low over the north of the Arabian Sea and over the Gangetic Plain. Abnormal southerly to easterly winds prevailed on the West Coast, variable winds and calms in the Southern Gangetic Plain, and normal winds elsewhere. There was no strength in the winds. The mean temperature was excessive over the Indus Valley, the north of the Bombay Presidency, the greater part of the Peninsula and Lower Burma, and was in defect elsewhere. Showers were reported from a large part of the country, the amounts being heaviest in the north-east.

Monday, June 8th.—The barometer had fallen, except over the Peninsula; the change had been brisk to rapid in the north-west and brisk in part of the north-east. Readings were highest in Tenasserim, lowest over the Punjab, and relatively low over the Arabian Sea. The low pressure area over the Gangetic Plain had apparently filled up. Northerly winds had appeared at Gorakhpur, Bahraich, Lucknow, and Cawnpore, but elsewhere the wind directions were practically unaltered. The mean temperature was low over North-Eastern India, the Gangetic Plain, and the central parts of the country, while it was high in most other places. Rain had fallen over a considerable part of the west of the Peninsula, of North-Eastern India, and of Northern India. But in the last region the fall was slight and occurred as light local showers.

Tuesday, June 9th.—Pressure had decreased almost everywhere, the change having been generally brisk to rapid in the north. Pressure was highest in Mâlabar, lowest in the Northern Punjab, and the pressure difference had become considerable. Southerly (south-westerly—south-easterly) winds prevailed along the West Coast from Cochin to Veraval, and normal winds elsewhere. The mean temperature was low over Assam and East Bengal, along the foot of the Himalayas, as well as over West Bengal, the east of the Central Provinces, and the east of the Peninsula. Showers of rain had been received over North-Eastern India, the west and part of the east of the Peninsula, and the Central Provinces.

Wednesday, June 10th.—Pressure had changed rather irregularly, the principal alterations having been a brisk fall over a large part of the Peninsula, and a brisk rise over Lower Bengal. Pressure was highest in Tenasserim and lowest

in the Western Punjab. The winds varied very considerably along the West Coast, but remained about normal in other places. The mean temperature was low in Arakan, Assam, Bengal, and North Bihar, and was excessive elsewhere.

Thursday, June 11th.—Pressure had increased everywhere—briskly to rapidly over Northern India. Readings remained highest in Tenasserim and lowest over the Punjab, but the downward turn of the isobars along the West Coast showed that pressure was still low over the Arabian Sea. The winds were south-easterly along the West Coast from Calicut to Veraval In other places the winds had not changed much and were fairly normal. The mean temperature was low in Malabar and Bengal, and was excessive elsewhere—most so in the central parts of the country and in the Punjab. Rain had been received over North-Eastern India, the west of the Peninsula, and at some central stations.

Friday, June 12th.—Pressure had increased briskly to rapidly over the Bombay Presidency and the west of the Central Provinces, but had changed very little elsewhere. The general distribution of pressure was unaltered. The winds were northerly in Malabar, variable on other parts of the West Coast, and were unchanged elsewhere. The mean temperature was excessive, except in Northern Bihar and Central Bengal. Moderate showers had been received over parts of North-Eastern India, of the Peninsula, and of the central districts.

Saturday, June 13th.—The pressure changes were again slight almost everywhere, and there was no important change in the distribution. A small centre of depression had, however, appeared over the head of the Bay. Pressure was exceedingly low, relatively to the normal, over Ceylon. The winds had shifted to north again along the West Coast and had become feebly cyclonic over the north-west of the Bay, but in other places there was no important change. The mean temperature was low in Central Bengal and Ganjam, but remained excessive in other parts of the Indian region. Fairly general rain was reported from Burma, Lower Bengal, and the west of the Peninsula, while showery weather had prevailed over parts of the Gangetic Plain, the Central Provinces, and Madras.

Temperature.—The distribution of the mean temperature with regard to the normal has undergone considerable changes during the week. On the 1st a large area of relatively low temperature overlay Assam, Bengal, the Gangetic Plain, the Central Provinces, and a considerable part of the Punjab, while surrounding this low temperature area on all sides were temperatures exceeding the normal. These high temperatures gradually encroached on the area of low temperature, so that by the 12th the only area of low temperature was a very small one, overlying Central Bengal and Northern Bihar, where there was a trifling deficiency of about 1½°. On the following day, the 13th, the temperature had fallen, and was low over Bengal, Orissa, and Ganjam.

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Province.	June 1896.							Mean variation of week.
	7th	8th	9th	10th	11th	12th	13th	
	°	°	°	°	°	°	°	°
Burma	+2·3	+2·8	+2·8	+1·9	+2·5	+3·1	+3·1	+2·6

Mean for whole of India	−0·6	+0·6	+2·0	+2·6	+3·1	+3·7	+4·0	+2·2

The mean temperature of the whole country was about normal on the 7th and 8th, but after the 8th a general excess set in which ranged from 2° on the 9th to

4·0° on the 13th. In Bengal there were five days when the temperature was below the normal, in the North-Western Provinces and Central Provinces two days, and in the Punjab one day. In the Punjab at the close of the week the heat was excessive, and the mean temperature of the whole province was 8·3° above the average on the 13th. The provincial variations show that the mean temperature of the week was normal in Bengal and Assam, and excessive elsewhere.

The following were the highest temperatures throughout India recorded on each day:

June 7th	114·2°	at Jacobabad.	
„ 8th	119·0°	„	„
„ 9th	121·0°	„	„
„ 10th	123·0°	„	„
„ 11th	117·4°	„	Khushab and Montgomery.
„ 12th	118·5°	„	Jacobabad.
„ 13th	120·4°	„	Khushab and Montgomery.

Rain.—The rainfall returns show that, as was the case last week, the rainfall has been very widely distributed. The general conditions which have accompanied the rainfall were similar to those reported last week. There was no general advance of monsoon winds, but cyclonic conditions existed over the Arabian Sea, which occasioned unsettled weather over a considerable part of Western and Central India, while there have been temporary and intermittent, but nevertheless important, advances of humid winds across the Bay coasts and into, to a limited extent, the Gangetic Plain. As a consequence of the cyclonic character of the weather over the Arabian Sea and of the intermittent character of the advances on the Bay side, the wind directions have been irregular, and the rainfall has hence occurred all over the country during thunderstorms, and there has been no steady rain, such as falls, when the monsoon currents are fully established. As a consequence of the rainfall being almost wholly due to thunder showers and storms, the amount and extent of the fall have varied very largely from day to day. Thus, on the 7th showers of greater or less amount were received over the larger part of the country, while, on the 12th, on the contrary, the fall was not only everywhere slight or small, but was confined to only a few parts of the country. The concluding table gives the rainfall data. For the week June 7th to 13th, rain fell in forty-nine of the rainfall divisions, instead of 55, as was the case last week. Of these forty-nine divisions five had less than one-tenth of an inch of rain during the week, so that there were forty four divisions which received an effective fall, and these divisions occupy the greater part of the Indian region. The divisions which had actually or practically no rain were—Oudh (South), North-Western Provinces (West and Submontane, East), the Punjab (South-East, South, Central, Submontane, North and West), Sind, Baluchistan, Rajputana, and Central India. Hence the area of dry weather included part of the Gangetic Plain and the whole of Upper India, and in this region hot weather conditions existed practically after the first day of the week. The first column of the table shows that the heaviest average actual rainfall of the week was 7·57 inches in Arakan, followed by 6·33 inches in Malabar, by 4·79 inches in Assam (Surma), and by 4·36 inches in East Bengal. The second column of the table gives the average normal rainfall of each division for the week under review, and shows that in Arakan the normal rainfall is 14·35 inches, in Tenasserim 10·66 inches, and in Malabar 9·18 inches. Hence in the regions of heaviest rainfall the actual amount received has been much less than the normal, and this condition has been maintained throughout the greater part of the country. In only eight divisions, *viz*, Deltaic Bengal, Central Bengal, Orissa, Khandesh, Gujarat, Hyderabad (South), the East Coast (Central), and Madras (South), has the actual rainfall exceeded the normal, and then only by small amounts, while, on the contrary, in Tenasserim, Arakan, and the Bengal Hills there has been an abnormal deficiency of between 6 and 7 inches and in the Konkan and Coorg of about 4½ inches.

The three concluding columns show the state of the rainfall for the two weeks May 31st to June 13th. In Central Bengal, Orissa, Khandesh, Gujarat, and the East Coast (Central) the rainfall so far has been excessive, in Eastern Bengal, Deltaic Bengal, Oudh (North), the North-Western Provinces (Hills), the Punjab (South East), Madras (South-Central), the Bombay Deccan, the Central Provinces (East), the East Coast (North), Hyderabad (South), and Madras (Central and South) the rainfall has been normal, and in all other places it has been deficient.

The following are the principal totals recorded during the week:—Sikaw (Bhamo) 15·23 inches, Magok 8·40 inches, Naaf (Akyab) 9·45 inches, Jamalpur (Mymensingh) 11·79 inches, Cherra Poonjee 13·15 inches. Jessore 8·03 inches, Serajgunj (Pubna) 8·56 inches, Trichur (Malabar) 14·97 inches, Bhatkal (Karwar)

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *18th June 1896.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 13th June.*—The rainfall was good on the West Coast and moderate in the Circars, but irregular; elsewhere light and scattered showers have fallen. The water-supply is generally insufficient, and rain is wanted in parts. Preparations for sowing are proceeding. Pasture is scarce, but is improving in parts. Fodder is sufficient. The condition of cattle is generally good. Prices are generally slightly dearer, except on the West Coast.

Bombay.—*For week ending 17th June.*—Rainfall generally good or moderate throughout the Presidency Proper. Preparations for the monsoon cultivation are progressing in fifteen districts. Sowing of the early crops continues in fifteen districts, but is retarded in Bijapur for want of sufficient rain. Fodder is insufficient in four, and water in three, districts. Agricultural stock are in good condition, except in four districts. Prices are normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 15th June.*—The rainfall was good all over Bengal Proper and Orissa during the week, and showers, usually light, occurred in parts of Bihar and Chota Nagpur. The present agricultural prospects are favourable, but more rain is wanted in Bihar and Chota Nagpur. All crops in the ground, including jute and autumn rice, are doing well, and preparations are being made for the cultivation of winter rice and of the autumn crops in Bihar. The scarcity of water has almost disappeared. The price of common rice is almost stationary.

North-Western Provinces and Oudh.—*For week ending 17th June.*—Rain is reported from all but six districts. The falls have been generally moderate and have benefited the standing crops to a great extent. Sowings for the autumn crops are in active progress. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, June 13th, were—Banda 60,989, Hamirpur 18,112, Jhansi 18,264, Jalaun 27,530, Allahabad 10,068, Pilibhit 1,258, Garhwal 1,789, Almora 1,709, Hardoi 4,422—total 1,44,141; of this number 17,789 dependants were gratuitously relieved on the works, and 7,739 persons received gratuitous relief under other provisions of the Famine Code. The numbers employed on village works were—Banda 1,708, Hamirpur 8,040, Jhansi 2,404, and Jalaun 7,697. Supplies are sufficient, except in the Kheri district. Fodder is still scarce in several districts. Prices continue high and have risen in thirteen districts, but have fallen in seven, and are generally stationary in the remaining districts.

Punjab.—*For week ending 17th June.*—Slight rain has fallen in Delhi and parts of Lahore. The spring crops are being collected. Ploughings for and sowings of the autumn crops are in progress. The cotton and sugarcane crops are being weeded and irrigated by wells in some districts. Rain is badly wanted in most districts. The condition of the extra spring crops is good in Jullundur

and Dera Ismail Khan, and average in Ferozepore. The sugarcane crop is suffering for want of water in Umballa. The standing crops are drying up for want of rain in parts of Gurgaon. The prospects of the autumn crops are said to be unfavourable in parts of Mooltan, but their condition in other districts is said to be generally average. Stocks of food-grains are average in Peshawar, but are insufficient in parts of Lahore; elsewhere stocks are sufficient. Cattle are in poor condition for want of fodder in Umballa, Shahpur and Rohtak, and they are dying of starvation in Hissar. Fodder is scarce in all districts, except Jullundur, Ferozepore, Amritsar, Sialkot, Dera Ismail Khan and Peshawar. The number of persons employed on relief works in the Sharakpur tahsil of the Lahore district is 7,852, and that of non-working children and dependants on relief works is 2,924. Prices are rising in Peshawar and Rohtak, and are above normal in Delhi and Shahpur; elsewhere prices are high.

Central Provinces.—*For week ending 17th June.*—The weather is cloudy and generally warm. Rain fell more or less in nearly all districts. Hoshangabad had a good fall of over two inches. There was a heavy storm in Narsinghpur and Nagpur, in the latter accompanied with thunder. Sowing operations have commenced in several districts. The fodder and water-supply are still insufficient. Prices are generally steady.

Burma.—*For week ending 13th June.*—In Lower Burma ploughing has now commenced in Akyab, Pegu, Tharrawaddy and Myaungmya. Sowing has commenced in Amherst and Thaton. In Upper Burma reaping of dry-weather paddy still continues. The prospect of the dry-weather paddy crops is bad in two townships of Minbu. Ploughing and sowing of nurseries for the wet-weather paddy crop have commenced in Kyaukse; in other districts cultivation of paddy and other wet-weather crops is progressing. Prospects generally are good, but rain is said to be urgently wanted in Thayetmyo. The price of paddy has risen slightly in Prome, Bassein and Tavoy; elsewhere prices are stationary.

Assam.—*For week ending 16th June.*—The weather is hot. Rain is wanted for the standing crops and tea in places. Ploughing for the late rice and planting of sugarcane continue. The condition of cattle is fair. Scarcity of fodder is felt in parts of the Sylhet district. Water is sufficient.

Mysore and Coorg.—*For week ending 17th June.*—MYSORE.—Good rain fell in parts. Prospects are favourable. Paddy has been sown in five districts and has been harvested in Bangalore and Tumkur. Prices have slightly risen in Kolar and Shimoga, but have fallen in Mysore, Hassan, Chitaldrug and Kadur.

COORG.—Rainfall good. The monsoon has commenced. Ploughing of rice-fields is in progress. Sowing of *ragi* (*Eleusine coracana*) is nearly completed. Fodder and water for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 17th June.*—BERAR.—The weather is very warm and cloudy. Light showers of rain have fallen in all districts. Breaking up of the land for the ensuing crop is completed in Akola. Sowings have commenced in four districts. Insufficiency of fodder and water continues in Akola, Amraoti and Wun. Prices are steady.

HYDERABAD.—Rainfall good. Fields are under preparation for the autumn crops. Scarcity of fodder still continues. Prices are normal.

Central India.—*For week ending 17th June.*—Slight rain fell in all Agencies during the week. Operations for the autumn crops are in progress, except in Gwalior. Pasturage is fair in Bundelkhand, Malwa and Bhopawar, but is indifferent in one district of Gwalior, and in Baghelkhand and Goona, and bad in the remaining districts of Gwalior. Prices are above normal in parts of Gwalior and in Malwa, but are normal elsewhere. The numbers employed on relief works were—Gwalior 12,893, Bundelkhand 19,176 and Baghelkhand 2,854. The numbers on gratuitous relief were—Gwalior 538, Bundelkhand 3,067, and Baghelkhand 317.

Rajputana.—*For week ending 17th June.*—The rainfall was nearly two inches at Abu, above one inch and half in Kishengurh, above half an inch in Kherwara, and slight elsewhere, except in Marwar, Kerauli, Dholpore and Jaisalmere. Agricultural operations have commenced in Sirohi, Meywar, Haraoti, Jeypore and in parts of Bhurtpore and Ajmere-Merwara, and are in progress in Ulwar and Bikanir. The crops are very poor in Jaisalmere, and the harvest is poor in Merwara. Agricultural stock generally are in good condition, but are suffering in Meywar and Ulwar, and are dying in parts of Jaisalmere for want of fodder and water. Pasturage and fodder are insufficient in Kherwara, Jhallawar, Kotah and Jeypore. Fodder is scarce in Ulwar, Jaisalmere and Haraoti and is becoming scarce in Ajmere-Merwara, Dholpore and Bhurtpore; elsewhere it is sufficient. Prices are rising in three States, fluctuating in one, and falling in another, but are steady elsewhere. In Marwar 4,810 persons are on relief works, and 489 on gratuitous relief; in Merwara 1,824 are on relief works; in Ulwar 805 are on relief works; in Bikanir 2,604 are on relief works, and 414 on gratuitous relief; in Jaisalmere 674 are on relief works, and 44 on gratuitous relief.

Kashmir.—KASHMIR VALLEY.—*For week ending 10th June.*—Rain has fallen during the week. The spring crops are being harvested. Rice and Indian-corn sowings are still in progress. Prices are slightly above the normal.

JAMMU PROVINCE.—*For week ending 17th June.*—Rainfall general. Ploughing for and sowing of the autumn crops continue. Cattle are in fair condition. Prices are stationary.

Nepal.—*For week ending 13th June.*—Some good showers have fallen during the week, but the weather is warm. Prospects are good.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 8TH JUNE 1895, AND FROM 1ST JANUARY TO 6TH JUNE 1896.

N.B.—As regards the figures in column *Total Earnings from 1st January 1896*, audited figures have been used as far as possible.

SIMLA, SATURDAY, JUNE 20, 1896.

FOREIGN DEPARTMENT.

NOTIFICATION.

Simla, the 20th June, 1896.

The Governor-General in Council has heard with great regret of the death, at Quetta on the 13th instant, of MAJOR-GENERAL SIR JAMES BROWNE, K.C.S.I., C.B., Royal Engineers, Governor-General's Agent in Baluchistan.

SIR JAMES BROWNE'S active service in India extended over a period of more than thirty-six years, in the course of which he took part in the Mahsud-Waziri Expedition, 1860, the Umbeyla Expedition, 1863-64, the Afghan War, 1878-79, and the Egyptian Expedition, 1882. He discharged for two years with conspicuous energy and ability the duties of Engineer-in-Chief of the Sind-Peshin Railway, and he held with distinction from 1889 to 1892 the appointment of Quartermaster-General in India. SIR JAMES BROWNE was specially selected in 1892 for the high post which he filled at his decease, and his death—so near the conclusion of his long and very distinguished career—is much deplored by the Government of India.

By order of the Governor-General in Council,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta the 18th June, 1896.

NOTIFICATIONS.

No. 1613 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 13th June 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888 :—

No. 192 of 1896.—Carl Bergmann, engineer, of 55, Thalstrasse, Meissen i/s in the German Empire, for improvements in and relating to the spindles of spinning or like machines.

No. 193 of 1896.—Robert Greenhalgh, warehouseman, of 26, Nicol Road, Willesden, London, in the county of Middlesex, for an improved method of marking and arranging patterns or sections of wearing apparel.

No. 194 of 1896.—John Fraser, miner, of Malua Street, Brighton, in the colony of Victoria, Australia, for improvements in and connected with fuse lighters.

No. 195 of 1896.—Henry Arzt, engineer, of 38, Margaret Street, Cavendish Square, London, for a new or improved construction or arrangement of generator of electricity.

No. 196 of 1896.—William Falkiner Harnett, assistant locomotive superintendent in charge Kanchrapara workshops, Kanchrapara, Eastern Bengal State Railway, for a bottle lock clasp.

No. 197 of 1896.—Frederick Elijah Blaisdell, gentleman, of Wayne Junction, in the city and county of Philadelphia, state of Pennsylvania, United States of America, for improvements in and connected with holders for pencils, crayons, caustics and the like.

No. 198 of 1896.—Thomas Gare, engineer, of 25, Booth Street, Stockport, in the county of Chester, and Thomas Septimus Hardemann, merchant, of 137, Withington Road, Whalby Range, Manchester, in the county of Lancaster, England, for improvement in the manufacture of coiled lock-nuts.

No. 199 of 1896.—The Combined weight and cost indicating Scale Company, Limited, of 234, High Street, Christchurch, in the colony of New Zealand, for combined weight and cost indicating apparatus for spring balance scale.

No. 200 of 1896.—Hugh Kirkwood Gracey, Indian Civil Service, Etah, North-Western Provinces, for improvements in punkah tubes.

No. 1614 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the office of the Secretary, in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying :—

No. 265 of 1895.—Herbert Credgington, watch-maker, of 7, Pall Mall, Bendigo in the colony of Victoria, for an improved tap to enable kerosine or other liquid to be readily withdrawn from kerosine tins or other similar receptacles. (Filed 9th June 1896.)

No. 278 of 1895.—Orrin Burton Peck, mining engineer, residing at Chicago, Cook county, Illinois, and a citizen of the United States, for improvements in the art of centrifugal separation. (Filed 9th June 1896.)

No. 279 of 1895.—Orrin Burton Peck, mining engineer, residing at Chicago, Cook county, Illinois, and a citizen of the United States, for improvements in centrifugal separators. (Filed 9th June 1896.)

No. 290 of 1895.—Béla Vilmos, machine engineer, of 2563, Kossuthutcza Debreczen, in the kingdom of Hungary, for improvements in rotary engines. (Filed 9th June 1896.)

No. 335 of 1895.—George Mitchell, consulting engineer, of 47, Victoria Street, Westminster, in the county of London, for a new or improved testing machine for oleaginous materials. (Filed 9th June 1896.)

No. 9 of 1896.—The Davy Electrical Construction Company, Limited, of 15, Victoria Street, Westminster, London, for improvements in electric arc lamps. (Filed 6th June 1896.)

No. 10 of 1896.—Emilien Dumoulin, gentleman, of 36, Rue des Petits Champs, Paris, in the republic of France, for improvements in the manufacture of copper and other metal tubes, sheets, wire and the like by electrolysis (Filed 6th June 1896.)

No. 20 of 1896.—Francis Wolley-Dod, executive engineer, in the Public Works Department, at present residing at Simla, British India, for automatically engaging or releasing the connexions of distant signals by the movement of the main signals—the invention to be called "Dod's distant signal release." (Filed 26th May 1896.)

No. 74 of 1896.—Charles Hodgson, engineer, of Canterbury Road, Kilburn, in the county of London, for a method of ensuring safety in the working of railway points and signals, and apparatus for that purpose. (Filed 2nd June 1896.)

No. 81 of 1896.—Max Guillcaume, cable manufacturer of Mülheim-on-the-Rhine, in the German Empire, for improvements in electric cables. (Filed 2nd June 1896.)

No. 143 of 1896.—William Jackson, engineer, of Thorngrove, Mannofield, Aberdeen, North Britain, for improvements in or connected with webs, trays, flaps or carriers for carrying tea leaf or other substances in drying machines. (Filed 8th June 1896.)

No. 1615 P.—THE fees prescribed in schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the period shown against each:—

No. 47 of 1892.—Charles Edward Livesay, M. Inst. C. E., executive engineer, Irrigation branch, Public Works department of Bengal, for completely regulating the supply of water into a canal, — the invention to be called "Livesay's patent regulator." (From 20th June 1896 to 19th June 1897.)

No. 81 of 1892.—Alister MacNab, merchant, of Cocanada, Madras presidency, India, for an improvement in the manufacture of bay salt. (From 13th July 1896 to 12th July 1897.)

No. 1616 P.— WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth Schedule to the Inventions and Designs Act (V of 1888), the fee hereinafter mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorizing others so to do has ceased:—

No. 310 of 1890.—Mr. Robert Dairy Bowman's invention for an improved process and apparatus for the production of oxygen gas. (Specification filed 7th March 1892.)

No. 142 of 1891.—Messrs. Albert Williams Daw and Zacharias Williams Daw's invention for improvements in and connected with valves for percussive rock drills, direct acting pumps and engines. (Specification filed 11th March 1892.)

No. 251 of 1891.—Messrs. Anthony Gapper Southby and Frederick Delacourt Blyth's invention for improvements in apparatus for making ice, refrigerating, evaporating and desiccating. (Specification filed 12th March 1892.)

No. 297 of 1891.—Mr. S. Lloyd Wiegand's invention for improvements in the art of and apparatus for telegraphing and telephoning and similar purposes. (Specification filed 7th March 1892.)

No. 303 of 1891.—M. Henri Galopin's invention for improvements in and connected with apparatus for regulating the supply of liquid hydro-carbon to lamp and other burners in houses, railway carriages and other structures. (Specification filed 8th March 1892.)

No. 308 of 1891.—M. Alphonse Gallois' invention for a new process of manufacturing indigo fecula and apparatus therefor (Specification filed 12th March 1892.)

No. 341 of 1891.—Mr. Algernon Joseph Yorke's invention for improved method of and apparatus for producing available hydraulic pressure. (Specification filed 11th March 1892.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II,

---

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

ADMINISTRATOR GENERAL OF BENGAL.

Notice of death sent to the Administrator General of Bengal under Section 64 of Act II of 1874.

Name of deceased.	Place of death.	Date of death.	By whom death reported and when.	REMARKS.
H. E. Johnston	Mandalay	4th May, 1896	The Additional Judge, District Court, Mandalay, on 11th May, 1896.	No one has applied for the grant of Administration.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin,		R18,	or, post free,	R18-12.
½	„	R 9,	„	R9-8.
¼	„	R4-8,	„	R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন	.	১৮৲ বা ডাকমাশুল বিনা	১৮৲০	
½ আধ „	„	৯৲	„	৯৲০
¼ সিকি „	„	৪৲৮	„	৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের বোটানিক্যল বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad series are distributed direct from Madras, Bombay, and Allahabad, respectively.

SUPPLEMENT TO

The Gazette of India.

No. 25.} CALCUTTA, SATURDAY, JUNE 20, 1896.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

FINANCE AND COMMERCE DEPARTMENT.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Telegraph.

ADMINISTRATION REPORTS OF THE INDO-EUROPEAN TELEGRAPH DEPARTMENT FOR 1893-94 AND 1894-95.

No. 138-T., dated Simla, the 9th June, 1896.

RESOLUTION—By the Government of India, Public Works Department.

READ—

Despatches from Her Majesty's Secretary of State for India, Nos. 4 and 7 Telegraph, dated, respectively, the 17th January, 1895 and 6th February 1896, and their enclosures, being the Administration Reports of the Indo-European Telegraph Department for the years 1893-94 and 1894-95, and the India Office notes reviewing them.

ORDER.—Ordered that the Reports and notes be published in the Supplement to the *Gazette of India*.

N. F. MACKENZIE,
Under Secretary to the Government of India.

ADMINISTRATION REPORT

OF THE

INDO-EUROPEAN TELEGRAPH DEPARTMENT

FOR

1893-94.

1. The control of the Department was transferred from the Government of India to the Secretary of State from the 1st April 1893, and the Office of the Director-in-Chief was re-opened in the India Office, London, on the 2nd June 1893.

CAPITAL AND REVENUE ACCOUNT.

2. *Capital.*—The capital account of the Department was decreased by R13,505, so that the capital expenditure to end of the year amounts to R1,14,46,190. The decrease was due to a reduction of the stores balance.

The following statement shows how the above decrease is made up :—

—	Increase.	Decrease.	TOTAL.
	R	R	R
Works . . .	1,679	...	1,679
Stores . . .	...	—16,333	—16,333
Suspense . . .	1,149	...	1,149
	2,828	—16,333	—13,505

A summary of the year's transactions on capital account is given in Appendix A.

3. *Revenue.*—Appendix B is a summary of the earnings and expenditure. * The earnings amounted to R13,50,856, or an increase of R48,340 when compared with 1892-93, when the sum reached was R13,02,516. The expenditure was R8,60,608 against R8,64,848 or a decrease of R4,240. The net result is a profit of R4,90,248 on the year's working against that of R4,37,668 in 1892-93, an improvement of R52,580.

4. The following statement shows the chief differences between the earnings and expenditure of the current and previous year :—

Earnings.

Head of Account.	1892-93.	1893-94.	Increase.	Decrease.

NET DECREASE.	...	...	...	4,240

* Excluding the cost of the London Office Establishment (1,125*l.*), which is included as part of the Establishment of the Secretary of State.

† *Traffic Earnings.*—This includes the amount collected in India on account of exchange. The tariffs on International messages are fixed in a gold standard, and the balances due to or from Foreign Administrations are settled in that standard. The rupee collections in India vary, therefore, in correspondence with the fluctuations in exchange, and the balance received from the Indian Telegraph Department at Karachi in rupees is sufficient to pay the Telegraph Companies and Foreign Administrations in the gold standard and retain the share of this Department in a gold standard also.

EARNINGS.

5. Under message revenue there is an increase of R60,409 over the previous year. Miscellaneous revenue shows a decrease of R12,069, due chiefly to less realisations in England of sale proceeds of india-rubber cable core.

EXPENDITURE.

6. The increases and decreases under the main heads are as follows :—

(1) *General Charges.—Persian Gulf.*—The net decrease is due principally to the pay of the present Director being less than that of the former Director, owing to the appointment of the Director being on a progressive salary, and the present incumbent drawing less than the maximum of the grade; also owing to less payments having been made during the year as compared with the previous year on account of subsidies payable to the chiefs of the Mekran Coast.

(2) *General Charges.—Persia.*—The decrease is due to the Director having gone on furlough out of India and to the appointment of the Assistant Director having been kept vacant in the meanwhile.

(3) *Line Maintenance.—Persian Gulf.*—The decrease is trifling, the amount being only R1,041.

(4) *Line Maintenance.—Persia.*—The decrease is principally due to the re-insulation of the Teheran Bushire line having been completed.

(5) *Signalling.—Persian Gulf.*—The increase under this head is due chiefly to the expenditure incurred on all buildings connected with the Indo-European Telegraph Department having been charged in the accounts of the Department under the orders conveyed in Government of India, Public Works Department, Letter No. 18 A. T., dated 16th April 1894; also to the annual increase of pay to General Service Clerks, etc.

(6) *Signalling.—Persia.*—The increase of R4,586 is made up of trifling increases and decreases under several of the sub-heads and are of no importance.

(7) *Cable Maintenance.—Persian Gulf.*—The net increase is due principally to the cost of renewing the boilers and of heavy repairs to the telegraph cable steamer *Patrick Stewart*; these were not completed at the end of the year.

NET REVENUE.

7. On a total capital expenditure of R1,14,46,190 a net profit of R4,90,248 was earned, which gives a dividend of 4·28 per cent. as compared with a dividend of 3·8 per cent. in 1892-93. The dividends earned during the past six years are as follows :—

YEAR.	Interest on Capital.
	R
1888-89	1·72
1889-90	0·44
1890-91	*Nil.*
1891-92	1·4
1892-93	3·8
1893-94	4·28

CIS-INDIAN JOINT PURSE.

8. Appendix C deals with the transactions in connection with this Agreement, which was entered into in 1878. The number of words carried between Europe and India or trans-India and *vice versâ* during the year by the three

Administrations (*viz.*, the Eastern Telegraph Company, the Indo-European Telegraph Company and this Department) rose from 4,649,458 to 4,972,182, showing an increase of 322,724, while the net value shows an increase of 52,540*l.* 14*s.* 9*d.* The Department's share of the Purse shows an increase of 5,432*l.* 13*s.* 8*d.*, while the amount paid into the Purse was more than in the previous year by 3,259*l.* 7*s.* 10*d.*

9. The following table shows the sums paid in and drawn out by the Department annually since the agreement was concluded :—

Year.	Paid in.	Drawn out.	Excess.	
			Paid in.	Drawn out.
	£	£	£	£
1878-79 . .	42,265	62,256	...	19,991
1879-80 . .	52,488	68,905	...	16,417
1880-81 . .	57,235	76,295	...	19,060
1881-82 . .	67,108	74,798	...	7,690
1882-83 . .	110,728	84,914	25,814	...

Total .	1,323,762	1,240,024	149,109	65,371
Total Excess paid in .	...	...	83,738	...

10. *Division of Traffic.*—The following are the proportions according to which the Joint Purse receipts have hitherto been divided, but it has now been decided that from the 1st January last a Supplemental Agreement should come into force, by which this Department's percentage on Indian traffic will be increased from 17·27 to 18·06 per cent. This agreement was arrived at owing to the contention of the Department that the Perso-Indian receipts, dealt with by the Department alone, were local receipts :—

Administration.	Indian Receipts		Trans-Indian Receipts.	
	To 1894	From 1894.		
Eastern Telegraph Company . .	60·39	59·82	80·53	
Indo-European Telegraph Company .	22·34 } 39·61	22·12 } 40·18	12·03 } 19·47	
Indo-European Telegraph Department .	17·27	18·06	7·44	

11. The percentages of traffic which have been actually carried since 1878-79 are:—

Year.	On Indian Traffic.		On Trans-Indian Traffic.	
	Vid Suez.	*Vid* Indo-European Route.	*Vid* Suez.	*Vid* Indo-European Route.
	Per cent.	Per cent.	Per cent.	Per cent.
1878-79	71·31	28·69	95·26	4·74
1879-80	67·91	32·09	94·10	5·90
1880-81	69·01	30·99	92·50	7·50
1881-82	64·63	35·37	81·26	18·74
1882-83	48·34	51·66	59·26	40·74
1883-84	55·96	44·04	83·52	16 48
1884-85	53·02	46·98	84·44	15·56
1885-86	52·14	47·86	75·91	24·09
1886-87	55·46	44·54	85·32	14·68
1887-88	60·93	39·07	86·48	13·52
1888-89	51·69	48·31	77·04	22·96
1889-90	49·92	50·08	82·89	17·11
1890-91	46·67	53·33	83·21	16·79
1891-92	43·52	56·48	80·75	19·25
1892-93	48·09	51·91	82·49	17·51
1893-94	51·75	48·25	85·20	14·80

12. *Interruptions affecting Joint Purse Agreement.*—Interruptions which affected traffic between Karachi and Teheran occurred only on the Persian Section, and amounted to 1 day 4 hours and 6 minutes. Beyond Teheran to London interruptions stopping traffic lasted 2 days 23 hours and 57 minutes.

13. On the Turkish route interruptions lasting 23 days 11 hours 28 minutes occurred on the Bushire-Fao Cable, and between Fao and Constantinople the line was interrupted for 101 days 5 hours 41 minutes.

During the last six years the Turkish route beyond Fao has been interrupted as follows:—

Year.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
Days, hours, minutes	51-17-22	31-22-15	62-5-17	77-8-12	108-9-54	101-5-41

Australasian Message Fund.

14. The Australasian Message Fund came into operation on 1st May 1891, from which date the rates to Australasia (excluding Queensland and New Zealand*) were reduced under the following conditions.

15. The total revenue for Australasian traffic, excluding outpayments, derived by the cis-Indian Administrations and the Eastern Extension Telegraph Company during 1889 was taken as the basis, and was fixed at 237,736*l.* If, during any subsequent year, the total revenue of these Administrations (including that with Queensland and New Zealand) should fall below that amount, the Australasian Colonies agreed to pay to the Eastern Extension Company half the amount so lost, which sum the Eastern Extension Company credits to the Common Fund. The other half is borne by the cis-Indian Administrations and the Eastern Extension Company in the proportions agreed upon, except that the Department's loss shall not exceed 1,775*l.* and the Indo-European Telegraph Company's loss 2,800*l.* in any one year.

16. The contribution of the cis-Indian Administrations is that which each partner draws out of the cis-Indian Common Purse on account of Australasian traffic. The Eastern Telegraph Company also pays in its receipts on South African traffic.

* Note.—New Zealand joined the Guarantee Fund in 1893.

This is then divided as follows:—

Eastern Extension Company	64·57 per cent.
Eastern Telegraph Company for South African traffic	·18 ,,
Cis-Indian Administrations	35·25 ,,

and this 35·25 per cent. is divided as follows:—

Eastern Telegraph Company	80·53 ,,
Indo-European Telegraph Company	12·03 ,,
Indo-European Telegraph Department . . .	7·44 ,,

17. In 1891-92 (11 months) the Department's share of the loss was 670*l.*; in 1892-93, 632*l.*; and in 1893-94, 102*l.* (*see* Appendix C. 1.)

TRAFFIC.

18. The service regulations of the Paris International Conference of 1890 were in force throughout the year. The next Conference, which was to be held at Buda Pesth in 1895, has now been postponed until 1896.

19. Appendix E, with its Supplementary Statements E I and E II, shows the traffic carried by the two sections of the Department. The number of words was 1,662,620 against 1,658,435 in the previous year, showing an increase of 4,185; the value as stated in francs shows an increase from 2,372,721 to 2,450,991 francs.

In Indian currency the earnings of the Department are more by R50,208, being R15,58,466 against R15,08,258.

20. The comparative values of the franc and rupee have again varied considerably on the whole with an upward tendency in the value of former, thus increasing our revenue in rupees. The variations in the value of a franc were as follows, *viz.*:—

From 1st April to 31st July 1893	·66 of a rupee.
,, 1st August to 31st August 1893 . . .	·61 of a ,,
,, 1st September to 31st October 1893 . .	·66 of a ,,
,, 1st November 1893 to 31st January 1894 .	·64 of a ,,
,, 1st February 1894 to 28th February 1894 .	·68 of a ,,
,, 1st March 1894 to 31st March 1894 . .	·71 of a ,,

21. The following table gives the amounts paid into the Joint Purse by the Department as compared with its independent traffic revenue:—*

	For Joint Purse, etc.		Independent Revenue.	Total.
	Indian.	Trans-Indian.		
	Frs.	Frs.	Frs.	Frs.
Persian Gulf Section . .	1,711,274	428,359	9,616	2,149,249
Persian Section .	238,374	58,712	4,656	301,742
TOTAL FRANCS .	1,949,648	487,071	14,272	2,450,991

22. Appendix F gives the number of messages and words carried under the four following classes during the past five years:—

State.	Press.
Commercial and Private.	"Times" (special rate).

23. The average length of private messages during the year was 13·54 words as compared with 13·68 in the previous year. In the three years prior to last year, namely, 1891-92, 1890-91, and 1889-90, the averages were 13·70, 12·9 and 12·6, respectively.

24. In addition to the messages already classified, 796 messages, containing 66,814 words, were forwarded to the Resident at Bushire and not charged

* NOTE.—The independent traffic revenue is that obtained from traffic dealt with by this Department and not touching India, such as for telegrams between the stations of Jask and Bushire.

for; these are called Government and Press telegrams, and would, if paid for at press rates, have cost R16,450.

25. The percentage of traffic carried over the Teheran and Turkish routes was 93·60 and 6·40, respectively. The following statement shows the variations for the past six years:—

	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
Vid Teheran .	94·28	93·00	93·92	92·37	92·96	93·60
Vid Turkey .	5·72	7·00	6·08	7·63	7·04	6·40

26. The mean rate of transmission of telegrams between the United Kingdom and Bushire, and between Karachi and Teheran, the latter being the Section worked by the Department, during each of the past six years is as follows:—

Year.	Between the United Kingdom and Karachi, *vid* Teheran.		Between the United Kingdom and Karachi *vid* Turkey.		Between Karachi and Teheran.			
					Karachi to Teheran.		Teheran to Karachi.	
	Hours.	Min.	Hours.	Min.	Min.	Sec.	Min.	Sec.
1888-89 . . .	1	4	19	28	13	26	13	47
1889-90 . . .	0	59	12	14	11	23½	12	28
1890-91 . . .	0	59	10	25	18	26	10	26
1891-92 . . .	0	59	16	12	8	42	6	25
1892-93 . . .	0	45	27	47	5	51	4	26
1893-94 . . .	0	43	36	49	5	40	4	28

27. Appendix G gives the details, month by month, of the speed of working between Karachi and Teheran, and in Appendix H similar details are supplied with regard to the speed between the United Kingdom and Karachi, *viâ* Teheran and *viâ* Turkey. These statements show that a very high rate of speed has been maintained.

28. *Check of Errors.*—The accuracy with which the traffic has been conveyed during the year is shown below. The figures for 1892-93 were slightly lower than those for 1893-94 in the Persian Gulf Section, and higher in the Persian Section, showing an improvement in that Section: the percentage of errors standing as follows:—

In the Persian Gulf Section.

1892-93	0·121
1893-94	0·141

In the Persian Section.

1892-93	0·245
1893-94	0·233

29. *Complaints.*—The number received amounted to 95, or 25 less than in 1892-93; 64 were referred from Europe and 31 from India and the Far East. The details and nature of these complaints are shown in the statement beneath:—

Nature of Complaint.	Received from Europe.	Received from India.	Total.
Non-deliveries .	15	9	24
Non-deliveries due to insufficient address .	1	1	2
Mis-deliveries . .	18	3	21
Delays	3	1	4
Errors	16	11	27
Miscellaneous references	11	6	17
Total .	64	31	92

Of the above, 27 were adjudged inadmissible by the Administrations concerned, and of the remaining 68 this Department was responsible for 14.

ESTABLISHMENT.

30. The following casualties occurred during the year :—

Resignations :—
- 1 Director to take up the appointment of Director-in-Chief of the Department.
- 1 Officer of the *Patrick Stewart*.
- 2 local signallers.
- 1 clerk, Store Branch.

Deaths :—
- 1 General Service Clerk.
- 1 Local Service Signaller.

Dismissals :—
- 2 General Service Clerks.

Services dispensed with :—
- 1 General Service Clerk.
- 1 Storekeeper, Cable Branch.

Re-transferred to Indian Telegraph Department :—
- 1 General Service Clerk.

31. Owing to the Gwadur Station having been closed, the signalling establishment was reduced by one General Service Clerk and one local signaller. The present establishment consists of 68 General Service Clerks and 31 local signallers.

CABLES.

PERSIAN GULF SECTION.

32. The lengths of the various cable sections on the 31st March of the last two years were as follows :—

CABLES.	1892-93.	1893-94.
	Knots.	Knots.
Fao-Bushire . . .	152·393	153·822
Bushire-Jask Cable of 1869	501·460	502·527
Bushire-Jask Cable of 1885	520·538	520·580
Jask-Manora . . .	531·620	528·047
Manora-Karachi (3 cables)	13·179	13·140
TOTAL KNOTS .	1,719·190	1,717·116

showing a decrease of about 2 knots since last year, due to repairs and diversions.

33. In addition to the above, this Department keeps the following cables in good working order :—

	Knots.
(i) Cable for the Military Department connecting Karachi with the Forts at Manora, exclusive of 1·09 miles of land line joining the Central Telegraph Office at Karachi with the Royal Artillery Office in Camp	10·880
(ii) Cable connecting the Port Trust Office at Karachi with the Port Officer's Office at Manora, including short lengths of land line at each end	5·090
TOTAL .	15·970

Electrical condition of the Cables.

34. *Fao-Bushire Cable.*—This section broke down on the 19th March 1894, and up to the end of the year remained interrupted, the cable ship being in dock.

Bushire-Jask Cable of 1869.—The insulation of this cable, though low, remained fairly constant at 40,000 ohms absolute till the 5th March 1894, when

it suddenly fell to 1,100 ohms absolute at the Jask end. The fault, which is in the shore end at Jask, will be removed during the repairs to the Fao-Bushire Section. No difficulty is experienced in working through it.

Bushire-Jask Cable of 1885.—The condition of this cable remains very good: average insulation 847 megohms per knot.

Jask-Manora Cable.—The insulation of this section continues as high as can be excepted, *viz.*, 175 megohms per knot.

Harbour Cables, Karachi to Manora.—These are all in good working order.

Faults and Interruptions, including Diversions.

35. At the close of the official year 1892-93 the following faults remained to be repaired :—

(1) Partial earth fault in the Fao-Bushire Cable, discovered in January 1892.

(2) Partial earth fault in the Bushire-Jask India-rubber Cable of 1869, discovered in November 1892.

36. During the year under review 9 new faults developed in the Gulf Cables, *viz.*, 3 total breaks and 6 partial earths. Of the total breaks, 2 occurred in the Bushire-Fao Section, in both of which the cable broke through the guards having corroded. The third break occurred in the Bushire-Jask Cable of 1869, the guards in this instance having chafed through on a rocky bottom. Of the 6 partial earths 2 occurred in the Bushire-Fao Section, 1 in the Bushire-Jask Cable of 1885, 1 in the Manora-Jask Section, and 1 in the Bushire-Jask Cable of 1869. All these faults have now been removed with exception of 1 in the Bushire-Fao Section, and the high-resistance fault in the Bushire-Jask 1869 Cable, discovered in November 1892; this latter has now been localised in the shore end at Jask, and it is intended to cut it out on the cable steamer's next expedition to the Gulf.

37. Interruptions to traffic occurred only in the Bushire-Fao Section (the Turkish route). These were 2 in number, and were caused through corrosion of the guards of the cable, *viz.* :—

(1) From the 17th to the 26th June 1893, or days 9-10-49.

(2) From the 19th March to the 31st March 1893, or days 12-15-8.*

38. *Repairs and Renewals and Expenditure of Cable :—*

	Knots.
On the 31st March 1893 the stock of cable was	84·505
Manufactured at Manora during the year	24·000
Picked up at sea and re-taped	49·499
Total	158·004
Expended on repairs and renewals	74·955
Balance in stock on the 31st March 1894	83·049

39. One renewal of 36·334 knots, made in May 1883, completed the work of renewing the old cable, sanctioned by the Government of India in December 1888, and mentioned in paragraph 29 of last year's report; of the cable recovered on this occasion 20·5 knots was serviceable.

40. Two total breaks and seven partial faults were repaired with an expenditure of 33 knots of cable. This large expenditure is due to the fact that in the Bushire-Fao Section no less than 19·4 knots had to be inserted to remove four partial faults caused by toredo borers; most of the cable recovered was, however, in good order and after being re-taped was brought on stock.

41. It is intended to use brass-taped core on the Bushire-Fao Section for the future, as it is hoped by doing so that the toredo difficulty will be overcome.

* NOTE.—This break was repaired in April 1894.

Summary of the History of the Cables and their Mechanical Condition during 1893-94.

42. (1) *Fao-Bushire Gutta-percha Cable.*—The high-resistance fault, alluded to in last year's report, fell sufficiently low during August 1893 to be approximately localised, but prior to this (on the 17th June) a total break occurred, from corrosion of the iron guards, at 16½ knots from Reshire cable-house. This break, which was repaired on 26th June, caused a total interruption of 9½ days to international traffic *vid* Turkey. In January 1894 it was decided to remove the existing fault in this cable, but on cutting in at the assumed locality of the fault it was discovered that not one, but five faults existed, four of which were within a 20-knots length of cable, and were cut out. The fifth offered such a variable and high resistance under tests as to make it impossible to localise it with any accuracy, and as it did not interfere with good working, it was left until such time as localisation was possible.

On the 19th March 1894 a total interruption was reported, and it was found that the copper conductor had broken inside the gutta-percha core; this was repaired in April 1894. The general mechanical condition of the section may be taken as good.

(2) *Bushire-Jask India-rubber Cable of 1869.*—This cable was reported interrupted on the 2nd August 1893 and communication was re-established on the 9th. The break was caused by the cable chafing on a rocky bottom off the Island of Frur, 288 knots from Bushire. A small diversion south of the existing line was made when repairing this break, in order, if possible, to escape the worst portion of the hard bottom. The partial fault of high resistance mentioned in the report for 1892-93, and which first appeared on 4th November 1892, did not develop materially till the 5th March 1894, on which date its insulation fell somewhat suddenly to 1,100 ohms. Tests placed the fault in the shore end at Jask, and it will be removed when the ship leaves to repair the Fao-Bushire cable in June.* The mechanical condition of this cable may be considered fairly good, though some of the pieces of retaped old cable may have to be renewed shortly.

(3) *Bushire-Jask Gutta-percha Cable of 1885.*—In this cable no less than four faults were removed in 1892-93, but only one showed itself during the year under review. This was discovered on the 30th April 1893, and found in the shore end at Jask, the cause being the introduction of some foreign matter in the gutta-percha core, apparently while in process of manufacture. As working was unaffected, the fault was not cut out till the 27th May 1893. Since then the cable has continued in perfect condition. Its mechanical condition is also fair.

(4) *Jask-Manora Gutta-percha Cable.*—Since the renewals effected in April and May 1893, off Webb's Bank and off Ormara, this cable has given no trouble in its deep-sea portion, but one partial earth developed in October 1893, which was eventually localised and cut out from the shore end at Manora on the 8th February 1894, where the core had perished in dry ground. A length of 180 feet of sound cable was used to replace such portions of the shore end near the cable-house at Manora as looked deteriorated. No original cable laid in 1864 now remains in this section, and its mechanical condition is very satisfactory.

Cable Steamer "Patrick Stewart."

43. During the year the steamer made four expeditions to the Persian Gulf, one along the Mekran Coast, and three to Bombay, the last of which was in February 1894 for the purpose of receiving new boilers. She was still in dock at the end of the year, as on opening out the deck it was found that both poop and main decks were in very bad state and all had to be renewed, so that the repairs have been more extensive than anticipated.

44. The vessel steamed a total distance of about 10,200 knots during the year. She earned for doing work for other Departments ₹7,669.

* This has been done.

Cable-house and Cable Land Line.

45. All the cable-houses have been regularly inspected, and cable ends renewed where necessary. Cable-boxes 9 and 10 at Manora, both of which required general repairs, have been thoroughly overhauled.

46. The overhead land lines connecting the cable with the Manora Office were replaced by Fowler-Waring lead-covered three-core cable in August 1893. It had hitherto been an extremely difficult matter to keep the insulators on the land lines with reasonable insulation on damp days, but since the Fowler-Waring cable was laid, good results have been maintained and the average insulation of each conductor of this cable may be taken at 250 megohms per knot.

Manora Cable Factory.

47. The pier in the Karachi harbour has been extended an additional 75 feet and is at present accessible at all tides. The sand dredger belonging to the Port authorities has been at work alongside the pier on two occasions since it was extended and this dredging has assisted very materially in deepening the water at the foot of the steps.

48. The locomotive type boiler was inspected on 13th August 1893, and the vertical type boiler on 19th December 1893, and certificates granted by the Government Boiler Inspector for the next twelve months, with a working pressure for the former of 50 lbs., and for the latter of 80 lbs. per square inch. Both boilers were thoroughly cleaned, scaled, and painted.

49. The following is a summary of the work done in the Cable Factory during the year:—

	Knots.
Cable manufactured	24·000
„ repaired and retaped	49·499
„ stripped for core	14·500
TOTAL	87·999

Working and Testing.

50. Duplex working was extended to the Jask-Karachi Section in September 1893. No other alterations have been made during the year in the working and testing of our cables and land lines. On the closing of Gwadur Station in September 1893, a telephonic service was introduced, which permits the Native Political Assistant at Gwadur to converse with and send service messages to Charbar (117 miles), from whence they are transmitted to their destination by telegraph.

51. During the interruption on the Bushire-Jask Cable of 1869 duplex was worked the greater part of the day with perfect success between Bushire and Karachi, and it tended materially to keep the delay within small limits.

52. The average difference between the assumed and actual position of cable faults during the past year was 0·852 knots.

Mekran Coast Land Line.

53. The lengths of the various sections of this line on the 31st March 1894 were as follows:—

	Miles of Line.	Miles of Wire.
Karachi to Sonmiani Branch	41·10	82·20
Sonmiani Branch	1·56	1·56
„ to Ormara	173·35	346·70
Ormara to Pasui Branch	88·40	176·80
Pasui Branch	3·20	3·20
„ to Gwadur	76·50	153·00
Gwadur to Charbar	117·18	234·36
Charbar to Jask	199·47	398·94
TOTAL	700·76	1,396·76

At the end of the official year 1892-93 the total length of line was 702·01. The reduction of 1·25 is due to diversions.

54. *Maintenance and Repairs to Land Line.*—In the Karachi-Gwadur sub-division the line was diverted for 22 miles from a salt plain near the sea to better ground under cover of a range of sand-hills; the line was lengthened by this diversion by about half a mile. Thirty miles of badly corroded wire were renewed, and 85 corroded standards were replaced by sound ones. In the Gwadur-Jask sub-division about 10 miles of corroded wire were renewed; two cylinder piers with masts were erected at the Jagin river, and by the diversion at that river the line was shortened by 2·18 miles.

55. *Interruptions.*—Total breaks occurred at the same time at various places on the Mekran Coast lines, lasting from 7-35 P.M. on the 24th January till 12-21 P.M. on the 1st February—a period of 7 days 16 hours 46 minutes. These interruptions were caused by cyclonic weather all along the coast with very heavy rains and exceptional floods. Another total interruption occurred, lasting 27 hours 20 minutes, through the wilful breaking of some insulators, bringing the duration of the total interruptions during the year up to 8 days 20 hours 6 minutes.

56. The reason of the line being totally interrupted for such a length of time was owing to the country for some 60 miles being under water on account of the heavy floods, and it was found impossible for line guards to cross the rivers and the salt plains.

57. Partial interruptions not affecting communications amounted to a total of 8 days 8 hours 36 minutes.

58. Wilful damages to the line, especially between Charbar and Jask, have much increased during the past year. The value of all material damaged or stolen has been deducted from the subsidies of the chiefs, and they have been warned that their subsidies will be stopped altogether if these damages continue; this appears to have had the desired effect.

Offices.

59. The offices were inspected by the Director during the year. That at Gwadur was closed on the 1st September 1893, but to enable the Political Native Assistant and the telegraph guards stationed there to communicate with the telegraph stations on either side of Gwadur, a telephonic service has been instituted, and this has worked very well on the whole.

60. Through closing Gwadur the establishment of the signalling clerks has been reduced by two men.

PERSIAN SECTION.

61. *Line Maintenance.*—Besides the reinsulation of 505 miles of wire having been completed, ordinary line repairs were carried out throughout the section during the spring and autumn inspections.

62. *Offices.*—There have been very few changes in the offices during the past year. The station buildings at Abadeh, the property of the Persian Government, were completely destroyed by a flood on the 19th and 20th December 1893, and have not yet been re-built by that Government. A temporary office has been hired in the village, the rent of which is defrayed by the Persian Administration.

Quarters for the Superintendent at Shiraz were built during the year.

63. *Interruptions.*—During 1893-94 a disastrous succession of floods and snow-storms were experienced in the South of Persia. The towns of Abadeh and Fasa, besides many villages, were swept away by floods, whilst great damage was done to the City of Shiraz itself. The line was also swept away between Borasjoon and Ahmedy (between Shiraz and Bushire). These floods caused a total interruption of 11 hours 5 minutes; but, by the aid of the new Cardew's vibrators, communication was established between Ispahan and Shiraz. Again, on the 8th and 9th February 1894, during the severest snow-storm which has visited Southern Persia for many years, 44 messages of 621 words were transmitted between Shiraz and Bushire—a distance of 122½ miles—by these delicate

instruments and a total interruption of four hours and five minutes thereby saved; also, on the night of the 28th February, a flood caused a fault at a river 32 miles south of Shiraz. This damage lasted 18 hours 50 minutes, but again total interruption was prevented by the use of the Cardew's vibrators: 46 messages of 445 words being transmitted. The lines stood the extraordinarily severe winter very well, the result comparing favourably with the last severe winter (1885-86), when there were total interruptions amounting to nearly 356 hours.

64. The interruptions from all causes, during the present and previous three years, have been as follows:—

Year.	1 Wire.	2 Wires.	3 Wires.
1890-91	827·22	50·14	41·40
1891-92	402·05	50·09	5·00
1892-93	383·55	28·38	*Nil.*
1893-94	376·03	95·28	11·05

65. *Wilful Damage.*—Three hundred and thirty-one acts of wilful damage were committed during 1893-94, being 45 more than in 1892-93. In the Acting Director's opinion this increase is attributable to the substitution of porcelain for iron-hooded insulators throughout the whole section. These insulators offer an excellent mark, and are easily broken; their cost, however, is not high, and the total amount claimed and recovered from the Persian Government for wilful damage during the year was only Krans 5,587·50, as against 7,296·50 Krans in 1892-93, showing a decrease of Krans 1,709. Of this sum Krans 1,493·50 were recovered from the local governors, and Krans 4,094 through Her Britannic Majesty's Legation at Teheran. The accounts for wilful damage are made up from the 1st February to the 31st January of each year to suit the convenience of the Persian Government.

66. Wilful damage caused interruptions as follows:—

Year.	1 Wire.	2 Wires.	3 Wires.
1890-91	49·58	21·17	*Nil.*
1891-92	21·13	28·31	*Nil.*
1892-93	50·42	22·27	*Nil.*
1893-94	73·01½	*Nil.*	*Nil.*

67. Our relations with the Persian authorities and people, both at Teheran and in the provinces, have been and are of the most cordial description.

68. Owing to the flights of locusts which visited the province of Fars in the spring of 1893, there was great scarcity in Shiraz and the surrounding districts, and the disorder caused thereby throughout the province, during the year's rule of His Royal Highness the Ruku-ud-Dowleh (the brother of the Shah), culminated in serious riots at Shiraz in May 1893.

69. The telegraph office and compound, which are situated in the centre of the town, were occupied by the mob for some eight days, until an objectionable local governor was removed. During this time the Superintendent, Clerk-in-charge, and other officers of this Department were practically prisoners in the office; but, although completely in the power of the mob, they were not injured in any way and the instruments were not touched. This immunity was greatly due to the tact and knowledge of the language and people displayed by Mr. Fargues, the Superintendent, and also to the great respect in which Doctor Scully, the Assistant Medical Superintendent, is held in Shiraz. Without the personal influence of these officers it is impossible to say what might have happened. There were no recognised leaders, though two shop-keepers, descendants of the Prophet and much respected in the city, exerted themselves to keep

the crowd in check and prevent any damage to the telegraph buildings, instruments, etc. By order of the Secretary of State these men have been presented with gold watches and chains in recognition of their valuable services.

70. In Ispahan, too, there have been troubles connected with the high price of food, which culminated a short time since in riots. In this case, however, His Royal Highness the Zil-es-Sultan (the Governor of Ispahan) quieted the people before the rising had gained any head.

71. In Meshed, also, there have been bread riots during this spring (1894).

72. *Cholera.*—A severe epidemic of cholera visited the south of Persia during the end of September and first fortnigh tof October 1893. It was particularly severe at Kazeroon, Daliki, and Borazjoon. At the former place upwards of 1,600 people died. Mr. A. Malcolm, General Service Clerk, an officer well known and much respected throughout Southern Persia, was attacked and died at Borazjoon on the 12th October. Corporal Newey, R.E., and Messrs. Mackertich and Carapet deserve favourable mention for their energy and devotion at this trying time.

TEHERAN-MESHED LINE.

73. The Persian Government made over this line to the Department in 1885, and the Indian Government allow a sum not exceeding R20,000 per annum for its maintenance. The Persian Government also promised this year to contribute a total of Krans 98,788 (R24,697) by four annual sums of about Krans 24,697 for the improvement of the line, and during this year Krans 24,695 were received. The accompanying statement (Appendix I) shows how this sum was spent.

74. *Line Maintenance and Repairs.*—During the year 1,250 new wooden poles were erected, 2,500 Indian field-pattern insulators fixed, 4,700 Britannia joints were made and some 7,000 old twisted and other joints were cut out. Two diversions of 2½ miles and 2 miles were made. The section of line from Meshed to Shahrud (328 miles in length) has now been rejointed throughout with Britannia joints, while the gauge of wire has been made practically uniform. Portions of the sections from Teheran to Shahrud have also been rejointed, and the remainder will be done during 1894-95. Each line guard has been supplied with a complete set of good line tools, which have been paid for from the grant by the Persian Government.

75. Two hundred and fifty local-made insulators were completely destroyed during the winter by frost. The Indian field-pattern insulators are now being fixed in place of these local pattern and are found to stand well.

76. *Offices.*—New Dubern sounder instruments have been supplied to the section between Teheran to Shahrud, including two at the latter station in translation.

77. *Interruptions.*—The line was interrupted for 540 hours and 50 minutes during the year, *viz.*:—

	Hours.
Camels caused interruptions amounting to	109·25
Inattention, ignorance, or carelessness on the part of the Persian clerks	34·20
Wilful damage	124·10
Defective insulation	52·30
Lightning, storms, etc.	89·25
Unknown	133·00
TOTAL	542·50

In 1892-93 the interruptions amounted to 1,242½ hours, and in 1891-92 to 1,471 hours.

78. The great improvement this year is due to the better insulation of the line, while the line guards have repaired the faults much quicker than formerly. An order has also been obtained from His Highness the Governor-General of the Neshabur-Sabzewar district to all heads of villages directing them to

prevent, to the utmost of their power, wilful damage, and it is hoped this may be of great use in the future.

79. *Traffic*.—The paid messages sent over the Meshed line by the Department's clerks during the year consisted of 6,766 words, producing a revenue for the Persian Government of 1,570 Krans (R628), of which 870 Krans were received for State messages sent by the British authorities.

Stores.

80. The principal items of expenditure under this head during the year were as follows:—

	R
Purchase of stores in India	2,621
London stores, including freight, landing charges and exchange	94,751
Stores for other Departments	6,377

and the following were the principal issues of stores:—

Repairs to cable	64,208
Repairs and renewals of land line	13,048
Issues to offices	28,876
Repairs and issues to cable steamer	21,120

Personnel.

81. As mentioned at the commencement of this report, the control of the Department was transferred from the Government of India to the Secretary of State from the 1st April 1893, and Mr. B. T. Ffinch was appointed Director-in-Chief from that date.

82. Lieutenant-Colonel Wells, R.E., held charge of the Persian Section from the 1st April to the 8th June 1893, when he proceeded on 17 months' furlough, making over charge to Major H. F. Chesney, R.E., the Assistant Director, who retained charge to the end of the year.

83. Mr. J. Possmann, formerly the Engineer and Electrician, was appointed Director of the Persian Gulf Section on Mr. Ffinch's vacating the appointment, and held charge of the section throughout the year.

84. Both Mr. Possmann and Major Chesney write in very flattering terms of their staff and of the continued good services rendered by them; and to both the above officers, as well as to Mr. F. W. Townsend, Acting Commander of the Telegraph Steamer, my special thanks are due—to the two former for the ready and willing assistance they rendered me throughout the year, and to the latter for his able services on board the R.I.M. vessel *Lawrence* while that vessel was used as the cable-repairing ship.

INDIA OFFICE;
The 1st November 1894.

B. T. FFINCH,
Director-in-Chief.

Equivalent of francs 2,450,990 66 5/24 at 25 francs = 1*l*. . . . . £ 98,040
Difference between the value of the rupee of the drawing rates and 10 R to the £ . Rx. 62,937
Exchange on English transactions . . . . . Rx. —5,130

Rx. 1,55,847, the exact sum being R15,:8,:66 o 3 (*vide* Appendix B).

NOTE.—Traffic earnings are primarily worked in francs in accordance with the existing convention, but in converting the francs into rupees a uniform rate is not adopted. For the receipts from the Indian Department for traffic interchanged with it, a rate of francs 25·21 to the pound sterling is taken; and from sterling to rupees the coversion is made at the latest rate obtained by the Secretary of State for demand bills which is communicated to the Check Office. On the other hand, for the receipts from or payments to the Indo-European Company and Turkey, which are settled in London in sterling, a uniform rate of francs 25 to the pound in accordance with the convention is adopted, and the conversion to rupees made at the average rate of the Secretary of State's drawings for the year, which in the present case is 14·547*d*. to the rupee.

* *See* Appendix F.

APPENDIX K.

STATEMENT of WORK done by the TELEGRAPH STEAMER "PATRICK STEWART" during the year 1893-94.

DATE. From	DATE. To	PARTICULARS.
1893. April 1	1893. April 3	Diverted Manora-Jask Cable off Webb Bank near Gwadur and returned to Karachi.
,, 4	,, 30	At moorings in Karachi Harbour.
May 1	May 5	Left for Bombay with No. 5 Mountain Battery, arriving 5th.
,, 6	,, 11	In dock, cleaning, painting, etc.
,, 12	,, 15	Left for Karachi, arriving 15th.
,, 16	,, 18	At moorings in Karachi Harbour.
,, 19	,, 30	Left Karachi, repaired faults in Jask-Manora Cable and in Jask-Bushire Cable, and returned to Karachi.
,, 31	June 18	At moorings in Karachi Harbour.
June 19	July 3	Left Karachi, repaired fault in Bushire-Fao Cable, and returned to Karachi.
July 4	Aug. 3	At moorings in Karachi Harbour.
Aug. 4	,, 15	Left Karachi, repaired fault in Bushire-Jask India-rubber Cable, and returned to Karachi.
,, 16	Sept. 30	At moorings in Karachi Harbour.
Oct. 1	Oct. 4	Left for Bombay, arriving on the 4th.
,, 7	,, 22	In dock, cleaning, painting, etc.
,, 23	,, 26	Hauled out of dock and left for Karachi, arriving on the 26th.
,, 27	Nov. 6	At moorings in Karachi Harbour.
Nov. 7	,, 11	Left Karachi with Director and land line stores for Pur and returned to Karachi.
,, 12	1894. Jan. 3	At moorings in Karachi Harbour.
1894. Jan. 4	Feb. 8	Left Karachi with Director, on annual inspection of the Gulf Telegraph stations, and with reliefs and stores. Repaired fault in Bushire-Fao Cable and returned to Karachi.
Feb. 9	,, 19	At moorings in Karachi Harbour.
,, 20	,, 23	Left for Bombay, arriving on the 23rd.
,, 24	March 31	In dock, fitting in new boilers and undergoing other repairs.

ABSTRACT.

	Days.
At moorings in Karachi Harbour	201
In Bombay Harbour and dock	60
At sea	104
TOTAL DAYS	365

Note dated 13th December 1894 by the Secretary, Public Works Department, India Office, reviewing the Administration Report of the Indo-European Telegraph Department for the year 1893-94.

The Indo-European Telegraph Department was transferred to the direct control of the Secretary of State from the 1st April 1893, and Mr. Ffinch now submits his first Annual Report for the year ended 31st March 1894.

The financial results of working the Department, as compared with the four preceding years, were as follows :—

Year.	Total Capital Outlay.	Gross Receipts.	Expenditure	Net Receipts.	Percentage of	
					Net receipts to Capital.	Expenditure to gross Receipts.
	R	R	R	R	R	R
1889-90 . . .	1,14,58,957	10,97,332	10,47,568	49,764	0·44	95·4
1890-91 . . .	1,14,33,245	10,63,469	10,72,203	—8,734	—	100·8
1891-92 . . .	1,15,15,094	11,60,482	9,98,448	1,62,034	1·40	86·0
1892-93 . . .	1,14,59,696	13,02,516	8,64,848	4,37,668	3·80	66·3
1893-94 . . .	1,14,46,190	13,50,856	8,60,608	4,90,248	4·28	63·7

The capital account was decreased by R13,505 owing to a reduction in the Store balance.

The traffic actually carried by the Department shows an increase over the previous year of 4,185 words, while the message revenue increased from R15,08,258 to R15,58,465, but miscellaneous revenue decreased by R12,069, due chiefly to less realisations in England from the sale of old cable core. The Indo-European route actually carried 8·64 per cent. more Indian traffic, and 4·67 per cent. less trans-Indian than its fixed share under the Joint Purse Agreement, with the result that 8,142*l.* had to be refunded by the Department to the other partners against 10,315*l.* in the previous year. The value of Australasian traffic actually carried by the Department was 5,124*l.* more than its share due under the Australasian Message Fund Agreement. These adjustments reduced the gross Receipts to R13,50,856*l.*

Expenditure was reduced by R4,240, which was principally due to less expenditure being necessary on line maintenance in Persia. On the other hand, the cost of repairs to the cable steamer *Patrick Stewart* were heavy and were not completed at the end of the year.

The net receipts show an increased profit of R52,580 over 1892-93, or a total profit of 4·28 per cent. on the year's transactions. If the cost of abandoned lines, etc., had been excluded from the Capital Account the result would have been more favourable.

In paragraphs 8—13, Mr. Ffinch gives a summary of the working of the cis-Indian Joint Purse Agreement from which it will be seen that the share drawn out by the Department has steadily increased since the Agreement came into operation, and has this year reached the highest sum on record. The traffic actually carried in excess of the fixed share is also less, and the revised percentages for Indian traffic recently agreed upon will, it is anticipated, reduce this excess payment by about 3,000*l.* a year.

Paragraphs 14—17 give a summary of the working of the Australasian Message Fund. The result of this fund has been that whereas the Department's share of receipts from Australasian traffic in 1889, when the tariff to Australia was 9*s.* 4*d.* a word was 6,235*l.*, its share under the Agreement whereby the through rate has been reduced to 4*s.* 9*d.* was, during the past year, 6,133*l.*, showing how largely this traffic has developed since the rate was reduced.

The general working of the lines *vid* Teheran during the year was satisfactory, and the average rate of transmission and accuracy of transmission both show an improvement. The Turkish route is, however, still very unsatisfactory, and the line between Constantinople and Fao was frequently interrupted.

The renewal of cables, sanctioned by the Government of India in December 1888, was completed in May 1893, and since then the mechanical condition

of the Persian Gulf cables is reported to be generally good. 19·4 knots of cable had to be inserted in the Fao Bushire Section in consequence of the damage done by teredo borers, but it is proposed to use brass-taped core on this section in future as a preventive against the teredo.

Altogether two total breaks and some partial faults were repaired during the year with an expenditure of 33 knots of cable. At the Manora Cable Factory 24 knots were manufactured and 49½ knots were re-taped and repaired.

A diversion of 22 miles was effected on the Mekran coast land line between Karachi and Gwadur, from a salt plain near the sea to better ground under cover of a range of sand-hills. On 24th January the line was broken at several places for nearly eight days by cyclonic weather all along the coast with heavy rains and floods.

In the Persian Section 331 acts of wilful damage were reported, but the cost of repairs has, in each case, been recovered from the Persian Government.

During 1893-94 a disastrous succession of floods occurred in the south of Persia and the towns of Abadeh and Fasa, besides many villages, were swept away whilst great damage was done to the city of Shiraz itself. The line was also swept away between Borazjoon and Ahmedy. By the aid of the new Cardew vibrators, however, communication was maintained during a great part of the time, and long and serious interruptions were thereby prevented. The lines stood the extraordinarily severe winter very well, the result comparing favourably with the last severe winter (1885-86).

In May 1893 a serious bread riot occured at Shiraz and the Telegraph employés and property were in serious danger, but owing to the tact and knowledge of the language and people displayed by the Superintendent, Mr. Fargues, and also to the great respect in which Dr. Scully, the Assistant Medical Officer, is held, no injury was done. By order of the Secretary of State, two shop-keepers of Shiraz who assisted to keep the peace were presented with gold watches and chains in recognition of their valuable services.

A severe epidemic of cholera visited the south of Persia during the end of September and the first fortnight of October 1893. It was particularly severe at Kazeroom, Daliki and Borazjoon. At the former place upwards of 1,600 people died. Mr. A. Malcolm, General Service Clerk, an officer well known and much respected throughout Southern Persia, was attacked and died at Borazjoon on the 12th October. Corporal Newey, R.E., and Messrs. Mackertich and Carapet are favourably mentioned for their energy and devotion at this trying time.

The line from Teheran to Meshed has been considerably improved and strengthened, and the Persian Government has promised to give four annual contributions, aggregating ₹39,520, towards repairs.

The station at Gwadur was closed on the 1st September 1893, but to enable the Political Native Assistant and the telegraph guards stationed there to communicate with the telegraph stations on either side of Gwadur, a telephonic service has been instituted and has worked very well on the whole. By closing this station the establishment of signalling clerks has been reduced by two men.

This is the first Administration Report of the Indo-European Government Telegraph Department since the control of that Department was transferred from India to England by the appointment to this Office of Mr. Ffinch as Director-in-Chief with effect from 1st April 1893.

It is satisfactory, therefore, to be able to report that the net profit of 4·28 per cent. on capital is the highest yet earned in the administration of the Department. This result has been brought about by a combination of increased traffic and somewhat diminished expenditure. The year's operations also justify the transfer of control to this country as the saving of 3,000*l.* per annum with effect from 1st January 1894, referred to in paragraph 10 of Mr. Ffinch's report, was obtained by the fuller knowledge now brought to bear in our discussions with the Eastern and Indo-European Telegraph Companies, who are our partners in the Joint Purse arrangement.

Various other telegraph questions which have arisen during the year have been referred to Mr. Ffinch, and his reports and suggestions have been valuable and satisfactory.

It is submitted that the report be printed and copies sent to the Government of India.

ADMINISTRATION REPORT

OF THE

INDO-EUROPEAN TELEGRAPH DEPARTMENT

FOR

1894-95.

CAPITAL AND REVENUE ACCOUNT.

1. *Capital.*—The capital account of the Department was decreased by R3,305, so that the capital expenditure to end of the year amounts to R1,14,42,885. The decrease was due to a reduction of the stores balance.

The following statement shows how the above decrease is made up :—

—	Increase.	Decrease.	TOTAL.
	R	R	R
Works . . .	2,281	...	2,281
Stores	...	—3,059	—3,059
Suspense . . .	...	—2,527	—2,527
	2,281	—5,586	—3,305

A summary of the year's transactions on capital account is given in Appendix A.

2. *Revenue.*—Appendix B is a summary of the earnings and expenditure.* The earnings amounted to R15,70,420, or an increase of R2,19,564 as compared with 1893-94, when the sum realised was R13,50,856. The expenditure during the year was R8,26,897 against R8,60,608 in the past year, or a decrease of R33,711. The net result is a profit of R7,43,523 on the year's working against that of R4,90,248 in 1893-94, an improvement of R2,53,275.

3. The following statement shows the chief differences between the earnings and expenditure of the current and previous years :—

Earnings.

HEAD OF ACCOUNT.	1893-94.	1894-95.	Increase.	Decrease.
	R	R	R	R
†Traffic Earnings .	15,58,466	18,14,916	2,56,450	...
Common Purse . .	1,36,353	1,54,001	...	17,648
Australasian Message Fund . . .	84,531	99,788	...	15,257
Profit and loss . .	663	508	155	...
Total Message Revenue	13,36,919	15,60,619	2,56,605	32,905
Miscellaneous Revenue	13,937	9,801	...	4,136
TOTAL .	13,50,856	15,70,420	2,56,605	37,041
Net Increase .	...	...	2,19,564	...

* Excluding the cost of the London Office Establishment (1,292*l.*), which is included as part of the Establishment of the Secretary of State.

† NOTE.—The head "Traffic Earnings" includes the amount collected in India, as also the loss on account of exchange on sterling transactions. The tariffs on International messages are fixed in a gold standard, and the balances due to or from foreign administrations are settled in that standard. The rupee collections in India vary, therefore, in correspondence with the fluctuations in exchange, and the balance received from the Indian Telegraph Department at Karachi in rupees is sufficient to pay the telegraph companies and foreign administrations in the gold standard and retain the share of this Department in a gold standard also.

Expenditure.

Head of Account.	1893-94.	1894-95.	Increase.	Decrease.
	R	R	R	R
Persian Gulf :—				
General charges .	1,27,147	1,36,014	8,867	...
Line maintenance .	31,603	28,407	...	3,196
Signalling . .	1,82,832	1,80,960	...	1,872
Cable maintenance	2,28,024	1,90,815	...	37,209
Persian Section :—				
General charges .	95,869	99,257	3,388	...
Line maintenance .	70,584	59,134	...	11,450
Signalling . .	97,262	96,804	...	458
Exchange .	14,527	24,574	10,047	...
Expenditure by other Departments	12,760	10,932	...	1,828
Total .	8,60,608	8,26,897	22,302	56,013
Net Decrease .	...	...	...	33,711

Earnings.

4. Under message revenue there is a net increase of R2,23,700 over the previous year wholly due to earnings in India on homeward transit messages. Miscellaneous revenue shows a decrease of R4,136, partly due to less earnings of the telegraph steamer *Patrick Stewart*, and partly to their having been no sale of old cable core in England as in previous years.

Expenditure.

5. The increases and decreases under the main heads are as follows :—

(1) *General Charges.—Gulf Section.*—The increase is due partly to furlough allowances paid in England to officers on leave being in excess of similar payments made during the previous year, and partly to the annual increases in the salaries and allowances of officers.

(2) *General Charges.—Persian Section.*—The increase in this section is due to the same causes as in the Gulf Section.

(3) *Line Maintenance.—Gulf Section.*—The decrease is due to less stores having been expended on repairs and renewals of lines than in the previous year.

(4) *Line Maintenance.—Persian Section.*—The decrease is principally under salary and travelling allowances of the line establishment, due to the number of inspectors having been reduced from six to four, from 1st March 1894, as sanctioned by the Secretary of State in Council in Council Minute, dated 5th December 1893.

(5). *Signalling.—Gulf and Persian Sections.*—The decreases are trifling and call for no remarks.

(6) *Cable Maintenance.—Gulf Sections.*—The decrease is due principally to fewer cable repairs being required ; also to a portion of the pay of the permanent establishment employed on the work in connection with the manufacturing and laying of the Ceylon Cable having been charged to the Indian Telegraph Department.

Net Revenue.

6. On a total capital expenditure of R1,14,42,885 a net profit of R7,43,523 was earned, which gives a dividend of 6 50 per cent. as compared with a dividend

of 4·28 per cent. in 1893-94. The dividends earned during the past six years are as follows :—

Year.	Interest on Capital.
	R
1889-90	0·44
1890-91	*Nil.*
1891-92	1·4
1892-93	3·8
1893-94	4·28
1894-95	6·50

Cis-Indian Joint Purse.

7. Appendix C. deals with the transactions in connection with this Agreement, which was entered into in 1878. The number of words carried between Europe and India or Trans-India and *vice versâ* during the year by the three Administrations (*vis.*, the Eastern Telegraph Company, the Indo-European Telegraph Company, and this Department) rose from 4,972,182¼ to 5,110,230¾, showing an increase of 138,048½, while the net value also shows an increase of 11,268*l.* 12*s.* 7*d.* The Department's share of the Purse shows an increase of 1,685*l.* 9*s.* 8*d.*, chiefly caused by the increase to the Department's percentage on Indian traffic, while the amount paid into the Purse was more than in the previous year by 1,798*l.* 12*s.* 10*d.*

8. The following table shows the sums paid in and drawn out by the Department annually since the agreement was concluded :—

Year.	Paid in.	Drawn out.	Excess.	
			Paid in.	Drawn out.
	£	£	£	£
1878-79	42,265	62,256	...	19,991
1879-80	52,488	68,905	...	16,417
1880-81	57,235	76,295	...	19,060
1881-82	67,108	74,798	...	7,690
1882-83	110,728	84,914	25,814	...
1883-84	81,408	76,584	4,824	...
1884-85	85,376	76,738	8,638	...
1885-86	107,317	86,012	21,305	...
1886-87	80,980	75,206	5,774	...
1887 88	71,808	74,021	...	2,213
1888-89	91,295	77,125	14,170	...
1889-90	85,661	73,180	12,481	...
1890-91	95,774	77,417	18,357	...
1891-92	102,641	83,352	19,289	...
1892-93	94,209	83,894	10,315	...
1893-94	97,469	89,327	8,142	...
1894-95	99,267	91,012	8,255	...
Totals	1,423,029	1,331,036	157,364	65,371
Total Excess paid in	...	...	91,993	...

9. *Division of Traffic.*—The following are the proportions according to which the Joint Purse receipts have hitherto been divided, but from the 1st January 1894 a Supplemental Agreement came into force, by which this Department's percentage on Indian Traffic is increased from 17·27 to 18·06 per cent. This agreement was arrived at owing to the contention of the Department

that the Perso-Indian receipts, dealt with by the Department alone, were local receipts.

Administration.	Indian Receipts.				Trans-Indian Receipts.	
	To 1894.		From 1894.			
Eastern Telegraph Company	60·39		59·82		80·53	
Indo-European Telegraph Company	22·34	39·61	22·12	40·18	12·03	19·47
Indo-European Telegraph Department	17·29		18·06		7·44	

10. The percentages of traffic which have been actually carried since 1878-79 are:—

Year.	On Indian Traffic.		On Trans-Indian Traffic.	
	Vid Suez.	*Vid* Indo-European Route.	*Vid* Suez.	*Vid* Indo-European Route.
	Per cent.	Per cent.	Per cent.	Per cent.
1878-79	71·31	28·69	95·26	4·74
1879-80	67·91	32·09	94·10	5·90
1880-81	69·01	30·99	92·50	7·50
1881-82	64·63	35·37	81·26	18·74
1882-83	48·34	51·66	59·26	40·74
1883-84	55·96	44·04	83·52	16·48
1884-85	53·02	46·98	84·44	15·56
1885-86	52·14	47·86	75·91	24·09
1886-87	55·46	44·54	85·32	14·68
1887-88	60·93	39·07	86·48	13·52
1888-89	51·69	48·31	77·04	22·96
1889-90	49·92	50·08	82·89	17·11
1890-91	46·67	53·33	83·21	16·79
1891-92	43·52	56·48	80·75	19·25
1892-93	48·09	51·91	82·49	17·51
1893-94	51·75	48·25	85·20	14·80
1894-95	48·91	51·09	84·31	15·69

11. *Interruptions affecting Joint Purse Agreement.*—Interruptions which affected traffic between Teheran and Karachi occurred only on the Persian Section, and amounted to 2 days 17 hours 35 minutes. Beyond Teheran to London the Indo-European Company's lines were totally interrupted for 4 days 2 hours 42 minutes,

None of these interruptions affected the divisions of the Joint Purse.

12. On the Turkish route interruptions lasting 18 days 13 hours 32 minutes occurred on the Bushire-Fao Cable and between Fao and Constantinople the line was interrupted for 131 days 11 hours 20 minutes.

During the last six years the Turkish route beyond Fao has been interrupted as follows:—

Year.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
Days, hours, minutes	31-22-15	62-5-17	77-8-12	108-9-54	101-5-41	150-0-52

The Department was only liable for 92 days at Fcs. 50 per diem.

Australasian Message Fund.

13. Full particulars regarding the nature of this Fund are given in the Administrative Report of 1893-94 (page 6, paragraphs 14 to 17).

TRAFFIC.

14. The service regulations of the Paris Convention of 1890 were in force throughout the year. The next conference is to be held at Buda Pesth in June 1896.

15. Appendix E, with its Supplementary Statements E. I. and E. II., shows the traffic carried by the two sections of the Department. The number of words was 1,699,729 against 1,662,620 in the previous year, showing an increase of 37,109; the value as stated in francs shows an increase from 2,450,991 to 2,497, 951 francs.

In Indian currency the earnings of the Department are more by R2,56,450, being R18,14,559 against R15,58,466.

16. The comparative values of the franc and rupee continued to vary considerably during the year, falling in the case of the rupee from 1 franc = ·71 rupees in April 1894, to 1 franc = ·80 rupees in January 1895, and rising to 1 franc = ·76 rupees in March 1895. As compared with the previous year the exchange value of the rupee has fallen greatly, which will account for the disproportionate increase in the revenue expressed in rupees, as compared with the increase in the number of words.

The variations were as follows :—

From 1st April to 9th May 1894	·71 of a rupee.
From 10th May to 22nd May 1894	·74 of a rupee.
From 23rd May to 30th June 1894	·76 of a rupee.
From 1st July to 31st August 1894	·74 of a rupee.
From 1st September to 27th September 1894	·71 of a rupee.
From 28th September to 11th December 1894	·74 of a rupee.
From 12th December to 18th January 1895	·76 of a rupee.
From 19th January to 3rd February 1895	·80 of a rupee.
From 4th February to 31st March 1895	·76 of a rupee.

17. The following table gives the amounts paid into the Joint Purse by the Department as compared with its independent traffic revenue :—*

——	For Joint Purse, etc.		Independent Revenue.	Total.
	Indian.	Trans-Indian.		
	Frs.	Frs.	Frs.	Frs.
Persian Gulf Section.	1,670,981	505,006	10,010	2,185,997
Persian Section .	235,614	70,084	6,255	311,953
TOTAL FRANCS .	1,906,595	575,090	16,265	2,497,950

18. Appendix F gives the number of messages and words carried under the four following classes during the past five years :—

State.	Press.
Commercial and Private.	"Times" (special rate).

19. The average length of "private and commercial" messages was 12·67 words in 1894-95 as compared with 13·54 words in the previous year. The average length, calculated from the averages of the past seven years, is 13·15 words.

20. In addition to the messages classified in Appendix I, 747 messages, containing 71,040 words, were forwarded to the British Resident at Bushire free of charge. These are called "Government and Press" telegrams, and would, if charged for, yield R21,753·12·0 at press rates.

* NOTE.—The independent traffic revenue is that obtained from traffic dealt with by this Department and not touching India, such as for telegrams between the stations of Jask and Bushire.

21. The percentages of traffic over the Teheran and Turkish routes were 94·36 and 5·64 respectively. The following table gives the respective percentages for the past seven years :—

Year.	*Vid* Teheran.	*Vid* Turkey.	Remarks.
1888-89 . .	94·28	5·72	
1889-90 . .	93·00	7·00	
1890-91 . .	93·92	6·08	
1891-92 . .	92·37	7·63	
1892-93 . .	92·96	7·04	
1893-94 . .	93·60	6·40	
1894-95 . .	94·36	5·64	

22. The mean rate of transmission of telegrams between the United Kingdom and Bushire, and between Karachi and Teheran, the latter being the Section worked by the Department, during each of the past six years, is as follows :—

Year.	Between the United Kingdom and Karachi *vid* Teheran.		Between the United Kingdom and Karachi *vid* Turkey.		Between Karachi and Teheran.			
					Karachi to Teheran.		Teheran to Karachi.	
	Hours.	Min.	Hours.	Min.	Min.	Sec.	Min.	Sec.
1889-90 . . .	0	59	12	14	11	23½	12	28
1890-91 . . .	0	59	10	25	18	26	10	26
1891-92 . . .	0	59	16	12	8	42	6	25
1892-93 . . .	0	45	27	47	5	51	4	26
1893-94 . . .	0	43	36	49	5	40	4	28
1894-95 . . .	0	43½	46	46	7	7	5	00

23. Appendix G gives the details, month by month, of the speed of working between Karachi and Teheran, and in Appendix H similar details are supplied with regard to the speed between the United Kingdom and Karachi, *vid* Teheran and *vid* Turkey. These statements show that a very high rate of speed has been maintained.

24. The speed of transmission between Karachi and Teheran is not quite so good as that for 1893-94, being 7 minutes 7 seconds from Karachi to Teheran, and 5 minutes from Teheran to Karachi, as against 5 minutes 40 seconds, and 4 minutes 28 seconds. *See* Appendix G. This increase is due partly to longer interruptions on the Persian Gulf cables, and on the Persian line.

25. *Check of Errors.*—The accuracy of transmission over the lines of the Department for the past two years is shown below. It will be seen that in this respect the year under review compares favourably with the preceding one, the percentages of error for both sections being lower.

On both Sections.

1893-94	0·374 per cent.
1894-95	0·284 ,,

26. *Complaints.*—The number of complaints received for investigation amounted to 122, being 27 more than the total for the year 1893-94. Of this number, 80 were from Europe and 42 from India; 81 related to messages *vid* Teheran, and 41 to messages *vid* Turkey.

The following table gives all details :—

Nature of Complaint.	Received from Europe.	Received from India.	Total.
Non-deliveries . .	13	8	21

Of the above, 36 were not admitted by the Administrations concerned, or are still being investigated by them. Of the remaining 86 this Department is responsible for 15.

Establishment.

27. The following casualties occurred during the year :—

Resignations :—
- 1 Assistant-Director, appointment abolished.
- 1 Assistant Superintendent.
- 1 Officer of the *Patrick Stewart* (cable steamer).
- 4 general service clerks.
- 2 local service clerks.
- 1 Director's clerk.
- 1 artificer.

Died :—
- 1 assistant surgeon.
- 1 general service clerk.
- 1 office clerk.

Dismissed :—
- 1 local service clerk.

Instead of a special man being engaged as clerk for the office of the Director, Persian Section, an extra general service clerk was sanctioned, making the present signalling establishment 69 general service clerks and 31 local signallers.

Cables.

Persian Gulf Section.

28. The lengths of the various cable sections on the 31st March 1894 and 1895 were as follows :—

Cables.	1893-94.	1894-95.
	Knots.	Knots.
Fao-Bushire Gutta-percha Cable	153·822	153·850
Bushire-Jask India-rubber Cable of 1869 . .	501·527	501·827
Bushire-Jask Gutta-percha Cable of 1885 . .	520·580	520·578
Jask-Manora Gutta-percha Cable . . .	528·047	528·000
Manora-Karachi (3 harbour cables)	13·140	13·140
Total .	1,717·116	1,717·395

Showing an increase of 0·279 knots since last year, due to repairs.

29. In addition to the above, this Department keeps the following cables in good working order:—

	Knots.
(i) Cable for the Military Department connecting Karachi with the Forts at Manora, inclusive of 1·09 knots of land line joining the Central Telegraph Office at Karachi with the Royal Artillery Office in Camp	10·875
(ii) Cable connecting the Port Trust Office at Karachi with the Port Officer's Office at Manora, including short lengths of land line at each end	5·090
TOTAL	15·965

30. A new length of 1,970 yards of four-core Fowler-Waring underground cable has been laid for the Military Department between Forts 1 and 2 at Manora to replace a couple of thin-type lead-covered wires which are faulty, and an additional length of 1,100 yards of single-core Fowler-Waring cable between Fort 2 and Cable Box No. 9. This new cable will be connected up when the revised system for harbour defences is completed.

Electrical Condition of the Cables.

31. *Fao-Bushire Cable.*—This cable contains a small fault, which reduces its insulation to about 60 megohms per knot.

Bushire-Jask Cable of 1869.—The insulation of this cable is over 100 megohms per knot. This is as high as can be expected.

Bushire-Jask Cable of 1885.—This is satisfactory. The average insulation for the year works out to 627 megohms per knot; no faults occurred.

Jask-Manora Cable.—This section continues in about the same condition with regard to insulation as in 1893-94, *viz.*, about 195 megohms per knot.

Harbour Cables, Karachi to Manora.—These are all in good working order.

Faults and Interruptions, including Diversions.

32. At the close of the official year ending 31st March 1894 the following faults in the cables remained to be eliminated:—

(1) A partial earth fault in the India-rubber cable between Jask and Bushire.

(2) A partial earth fault in the Bushire-Fao Section discovered on 25th January 1894.

(3) A total rupture of the conductor in the same section, which took place on the 19th March 1894.

During the year under review nine additional faults developed, *viz.*, three total breaks and six partial earths.

33. Of the total breaks, two occurred in the Bushire-Jask India-rubber Section from corrosion of guards in pieces of old retaped cable; the third occurred through a chafe on the rock close to the Manora Cable House. Five of the partial earths showed themselves in the India-rubber Section between Bushire and Jask. The sixth is in the Bushire-Fao Section, and appeared after the elimination of a fault on 10th July 1894. An attempt to remove it there and then was made, but its electrical resistance was too high and changeable to localise it with any accuracy, and it has been left until it further develops. All the other faults have been removed.

34. There has been but one total interruption to traffic on our cables during the year, *viz.*, that due to the break of 19th March 1894 in the Bushire-Fao Section, which was repaired on 18th April 1894. The total duration of this interruption was 30 days 10 hours and 55 minutes, of which 12 days 15 hours 8 minutes belong to the previous official year, and 17 days 9 hours 47 minutes to the year under review. The long delay in repairing this cable was owing to the cable steamer being in dock and the difficulty in obtaining another steamer at once. The interruptions on account of three breaks while the sound line was available, and which breaks did not interfere with the traffic,

amounted to 45 days 18 hours 49 minutes. These long partial interruptions were caused in one instance by the cable steamer being in Bombay, and in the other two the ship was up the Gulf on repairing duty when the Jask-Manora* Cable broke, and repairs could not be effected until the vessel's return.

35. The interruptions on account of repairs to partial faults and renewals amount in the aggregate to 6 days 14 hours 54 minutes.

36. **Repairs and Renewals and Expenditure of Cable :—*

	Knots.
On the 31st March 1894 the stock of cable was .	83·049
Manufactured at Manora during the year . .	10·000
Picked up at sea and retaped and relaid . .	15·785
TOTAL. .	108·834
Expended on repairs .	51·594
Balance .	57·240

Summary of the History of the Cables and their Mechanical Condition during 1894-95.

37. *Fao-Bushire Gutta-percha Cable.*—As mentioned in last year's report, this section was totally interrupted on 19th March 1894. As the departmental steamer was then in dock in Bombay undergoing extensive repairs, it was necessary to charter another steamer belonging to the Royal Indian Marine, and the fault was not repaired until the 18th April. Two other faults were, however, found to exist in the cable, but owing to the varying resistance they could not be accurately localized at the time. One was subsequently found and removed on the 10th July, but the other still remains.

The mechanical condition of the cable is the same as last year.

Bushire-Jask India-rubber Cable of 1869.—Eight faults were removed from this cable during the year under review. One was removed on 14th April, and a second which caused an interruption from 26th April was removed on the 14th May. Three other faults were removed in July and two in September, one of which caused a total interruption. The last fault was removed in January 1895, and since then this section has given no trouble, and the mechanical condition of the cable may be considered satisfactory. Most of these faults were caused by deterioration of guards.

While the *Patrick Stewart* was on repairing work, a renewal of 16·795 knots of cable was also made; this was necessitated by the rotten state of the guards.

Bushire-Jask Gutta-percha Cable of 1885.—No faults were reported in this cable during the year 1894-95. Its mechanical condition is perfect.

Jask-Manora Gutta-percha Cable.—Only one fault was reported in this section during the year, *viz.*, on 3rd July, when a total break occurred off Karachi harbour. Owing to the absence of the ship it was not repaired until the 18th, when the spare shore end (laid in 1892) was joined on.

This section's tests are slightly lower than last year, but its mechanical condition may be considered satisfactory.

Harbour Cables.—These have worked very satisfactorily throughout the year, and only one fault was reported and repaired.

Cable Steamer "Patrick Stewart."

38. This vessel was in Bombay receiving new boilers and new poop and main decks from break of poop aft, from the 23rd February 1894 till the 2nd June, when she returned to Karachi. During the year she made three trips to the Persian Gulf, and three to the Mekran Coast.

39. She started on the 1st March 1895 for Ceylon, where she laid a new cable across Adams Bridge connecting India with the Island, repaired the 1885

* The Royal Indian Marine steamer *Lawrence* was on two occasions lent to the Department for cable repairs while the departmental cable steamer was in dock in Bombay. The cabling machinery was fitted on board of the *Lawrence*, and the repairs were quickly and satisfactorily carried out.

Gutta-percha Cable, by inserting 13 knots of new cable, and picked up the old India-rubber Cable, which she brought to Karachi. The Director-General of Telegraphs in India wrote, thanking Captain Tindall and the first officer, Mr. Townsend, for the excellent work performed by them.

40. The vessel steamed a total distance of about 12,500 knots during the year. (*See* Appendix I.)

Cable-houses and Cable Land Lines.

41. The whole of the cable-houses have been inspected and cable ends renewed when necessary.

42. The cable land lines are in good order.

Manora Cable Factory.

43. The following is a summary of the work done in the Cable Factory during the year:—

	Knots.	Knots.
Cable manufactured—For Ceylon . .	43·2416	
„ „ For this Department	10·0000	
Total		53·2416
Cable repaired and retaped		10·7260
„ stripped for core		29·2430
Total passed through Factory .		93·2106

44. The quantity of cable stripped includes 42·6 knots of thin-core gutta-percha which was found to be unserviceable. The total amount of stripped core lying in our tanks on 1st January 1895 was 52·143 knots; 38·26 knots of this (inclusive of the above 4·26 knots thin type) was despatched to London for sale on 19th March 1895.* The rest of the stripped core tests sufficiently high to be made again into cable.

45. A new furnace and drying grate was built near the present one, in which pitch compound is melted; this is intended to coat the coils of wire used for sheathing cables.

46. Quarters for one of the officers of the *Patrick Stewart* are being built in the north-west corner of the factory compound; the woodwork for this building comes from the dismantled telegraph office at Gwadur.

47. The locomotive boiler was inspected on 21st June 1894, and the vertical boiler on 23rd November 1894. Certificates were granted by the Government boiler inspector to each for 12 months. Working pressure for former 50 lbs., and for latter 80 lbs. per square inch. Both boilers were scraped, scaled, and cemented. The locomotive one was found to be considerably worn, and has since been only given extension for another six months. An estimate for a new boiler has been asked for from the Bombay dockyard.

Working and Testing.

48. No alterations have been made in the working or testing of our cables and land lines.

49. The average difference between the assumed and actual position of cable faults during the year was 0·297 knots.

* This has now been sold, and realised 1,036*l*.

Mekran Coast Land Line.

50. The lengths of the various sections of this line on the 31st March 1895 were as under:—

	Miles of Wire.	Miles of Line.
Karachi to Sonmiani Branch	41·10	82·20
Sonmiani Branch	1·56	1·56
„ to Ormara	173 35	346·70
Ormara to Pasui Branch	89·65	179·30
Pasui Branch	3·20	3·20
„ to Gwadur	76·50	153·00
Gwadur to Charbar	117·18	234·36
Charbar to Jask	199·47	398·94
TOTAL	702·01	1399·26

51. At the end of the previous year the total length of line was 700·76 miles. The increase of 1·25 miles is due to the diversion caused by altering the crossing over the Bassole River.

52. *Maintenance and Repairs to Land Lines.*—In the Karachi-Gwadur Subdivision a diversion of over 20 miles was made, rendered necessary by the River Bassole having partly altered its course during the floods in January and February 1894. The line was lengthened 1·25 miles by this diversion. About 16½ miles of badly corroded wire was renewed. 156 wooden posts were substituted for 213 corroded iron standards.

53. *Gwadur-Jask Subdivision.*—About 38 miles of wire were used to replace corroded wire between Jask and Gwadur, making the line perfectly secure. 50 wooden posts were substituted for 69 iron standards. The river crossings were carefully seen to and made secure.

54. The station at Gwadur was re-opened for telegraphic purposes on 5th October 1894, and is now worked as a combined post and telegraph office, with a postmaster in charge.

Interruptions.

55. The total interruptions on the land line during the year amounted to 3 days 15 hours 8 minutes, of which 1 day 7 hours 53 minutes were due to the east mast of Vindar River being carried away, and 2 days 7 hours 15 minutes by the breaking of both wires close together on a very exposed piece of line near the sea.

56. Partial interruptions on the Mekran line, not affecting communication, amounted to 12 days 3 hours 31 minutes, of which 7 days 7 hours 35 minutes are due to wilful damage between Gwadur and Jask, for which the Chiefs have been fined

Inspections.

57. All the offices in the Persian Gulf Section were inspected by the Director during the year. He also inspected the section of the land lines from Gwadur to Ormara, 170 miles. The lines and offices were found in a very satisfactory state, so also were the buildings at all stations excepting the rented one at Bushire, where the excessive rain of last year ruined one and made the two others unsafe. The landlord has since thoroughly repaired the two latter, and is now rebuilding the former. Other houses have been rented at the landlord's expense.

PERSIAN SECTION.

58. *Line Maintenance.*—In addition to the ordinary line repairs two short diversions were carried out which will render the line more secure.

59 *Offices.*—The office at Abadeh, which was destroyed by a flood in December 1893, was rebuilt, but not completed, as the funds supplied by the

Persian Government were not sufficient. Steps are now being taken to get it finished.

60. *Interruptions.*—There was only one total interruption of all the three wires. This occurred in November 1894 and lasted 65 hours 57 minutes. It was caused by the severe weather and exceptional state of the atmosphere, the falling snow being congealed on the wires and posts and causing them to break with the weight.

61. The interruptions on one and two wires were almost all caused by wilful damage and by caravan camels, which are allowed to wander under the line.

62. The interruptions from all causes during the present and previous three years have been as follows.—

Year.	1 Wire.	2 Wires.	3 Wires.
	Hours.	Hours.	Hours.
1891-92	402·05	50·09	5·00
1892-93	383·55	28·38	*Nil.*
1893-94	376·03	95·28	11·05
1894-95	591·38	94·27	65·57

63. There were 208 acts of wilful damage committed during 1894-95, being 123 less than in 1893-94.

64. The total amount claimed and recovered from the Persian Government for the year was Krans 4,538, or 1,049·50 less than in 1892-93. Of the above sum Krans 475 were recovered from Local Governors, and the balance of Krans 4,053 through Her Britannic Majesty's Legation. The accounts for wilful damage are made up from the 1st February to 31st of January of each year to suit the convenience of the Persian Government.

65. Wilful damage caused interruptions as follows:—

Year.	1 Wire.	2 Wires.	3 Wires.
	Hours.	Hours.	Hours.
1890-91	49·58	21·17	*Nil.*
1891-92	21·13	28·31	*Nil.*
1892-93	50·42	22·27	*Nil.*
1893-94	73 01½	*Nil.*	*Nil.*
1894-95	150·38	42·16	*Nil.*

66. Our relations with the Persian authorities and people, both at Teheran and in the provinces, have been and are of the most cordial description.

67. The cost of living in the Province of Fars has become a source of considerable anxiety, as the country has been swarming with locusts for the past few years. The cost of carriage has also increased enormously.

Teheran–Meshed Line.

68. *Maintenance and Repairs.*—1,208 new juniper poles were erected and 3,000 Indian field pattern insulators were placed on the line, while a great many new soldered joints, replacing unsoldered ones, were made.

69. The second special annual payment of Krans 24,695 from the Persian Government for stores for this line were duly received. Details of its expenditure are given in Appendix K.

70. *Offices.*—A new battery room was built at Shahrud, and all the office fittings between that place and Teheran were thoroughly overhauled.

71. *Interruptions.*—The line was interrupted for 581 hours and 2 minutes during the year, *viz.*, :—

	1894—5.	1893—4.	1892—3.
Wilful damage	27·50	124·10	376·45
Camels	313·53	109·25	263·20
Inattention or carelessness of Persian clerks	67·55	34·20	113·00
Defective Insulation	89·00	141·55	489·30
Unknown causes	82·00	133·00	Not recorded

72. *Traffic.*—The paid messages sent over the line by the Department's clerks during the year consisted of 11,951 words, producing a revenue for the Persian Government of Krans 3,657·25, of which 972·20 Krans were received for State messages sent by the British authorities.

PERSIAN SECTION.

73. *Inspections.*—The Acting Director inspected the line and offices from Shiraz to Teheran during the spring of 1894 and was satisfied with the appearance of the lines and offices.

Stores.

74. The principal items of expenditure under this head during the year were as follows:—

	£
Purchase of stores in India	3,300
London stores, including freight and exchange	49,626
Stores for other Departments	5,959

and the following were the principal issues of stores:—

Repairs to cable	32,426
Repairs and renewals of land line	9,921
Issues to offices	25,525
Repairs and issues to cable steamer	3,427

Personnel.

75. Mr. J. Possman, the Director of the Persian Gulf Section, held charge of that section throughout the year with marked success.

Major Chesney, Assistant Director, was in charge of the Persian Section until the return of Lieutenant-Colonel Wells in November, when the appointment of Assistant Director was abolished, and Major Chesney returned to India.

To these gentlemen my cordial thanks are due for rendering easy for me the administration of a Department situated thousands of miles from my headquarters.

Both Lieutenant-Colonel Wells and Mr. Possmann continue to bring to notice in very favourable terms the good services rendered by the whole of their staff, who in a trying climate, and mostly in absolutely isolated localities, perform their duties with a willingness and zeal that is deserving of all praise.

B. T. FFINCH,
Director-in-Chief.

INDIA OFFICE,
1st December 1895.

APPENDICES.

Equivalent of francs 2,497,950·74½ at 25 francs = 1*l*. . . . . £ 99,918
Difference between the value of the rupee at the drawing rates and 10R to the £ . . . Rx. 82.853
Exchange on English transactions . . . . . Rx. —1,284

Rx. 1,81,492, the exact sum being Rs. 18,14,910 1 6 (*vide* Appendix B).

NOTE.—Traffic earnings are primarily worked in francs in accordance with the existing convention, but in converting the francs into rupees a uniform rate is not adopted. For the receipts from the Indian Department for traffic interchanged with it, a rate of francs 25·21 to the pound sterling is taken; and from sterling to rupees the conversion is made at the latest rate obtained by the Secretary of State for demand bills which is communicated to the Check Office. On the other hand, for the receipts from or payments to the Indo-European Company and Turkey, which are settled in London in sterling, a uniform rate of francs 25 to the pound (in accordance with the convention) is adopted, and the conversion to rupees made at the average rate of the Secretary of State's drawings for the year, which in the present case is 14.347d. to the rupee.

* *See* Appendix F. Most of these words are also shown under Persian Gulf Section, and are therefore excluded from the total column.

APPENDIX K.

STATEMENT showing EXPENDITURE against PERSIAN GOVERNMENT GRANT of KRANS 24,695 during the Year 1894-95.

	Krans.
1. Juniper poles purchased	3,400
2. Field insulator cups purchased	2,710
3. Insulator stalks, purchase of	1,400
4. Other stores and instruments	6,989
5. Carriage of stores	8,702
6. Labour contingencies, etc.	561
Balance in hand	933
TOTAL KRANS	24,695

Note dated 22nd January 1896, by the Secretary, Public Works Department, India Office, reviewing the Administration Report of the Indo-European Telegraph Department for the year 1894-95.

The following statement shows the financial results of working the Department during the past five years:—

Year.	Total Capital Outlay.	Gross Receipts.	Expenditure.	Net Receipts.	Percentage of	
					Net Receipts to Capital.	Expenditure to Gross Receipts.
	R	R	R	R	R	R
1890-91 . . .	1,14,33,245	10,63,469	10,72,203	—8,734	—	100·8
1891-92 . . .	1,15,15,094	11,60,482	9,98,448	1,62,034	1·40	86.0
1892-93 . . .	1,14,59,696	13,02,516	8,64,848	4,37,668	3·80	66·3
1893-94 . . .	1,14,46,190	13,50,856	8,60,608	4,90,248	4·28	63·7
1894-95 . . .	1,14,42,885	15,70,120	8,26,897	7,43,523	6·50	52·6

The Capital Account was decreased by R3,305 owing to a reduction on the Store balance.

The traffic earnings of the Department increased from R15,58,466 in 1893-94 to R18,14,916 in 1894-95, and the share of the Indian and trans-Indian traffic (east of India) carried by the Indo-European route was again higher than its fixed *pro rata* share under the Joint Purse Agreement.

Expenditure was reduced by R33,711 as compared with the previous year. This was mainly due to savings on line and cable maintenance, and to a reduction in the number of Inspectors in Persia.

The net receipts show an increased profit of R7,43,523 against R4,90,248 in 1893-94, or 6·50 per cent. on the Capital outlay.

The general working of the lines and cables in Persia and the Persian Gulf has been very satisfactory, the total interruptions on the departmental lines only amounting to 2 days 17 hours and 35 minutes. In addition to this, however, the Indo-European Company's line was totally interrupted for 4 days 2 hours and 42 minutes. The average rate of transmission between the United Kingdom and Teheran still maintains its high standard, and the accuracy of transmission shows an improvement on first year, the percentage of errors being only ·284 against ·374 in 1893-94.

It is pointed out that the average length of "private and commercial" messages has again fallen to 12·67 words against 13·54 in the previous year, and an average of 13·15 in the past seven years. This tends to prove the continued increase and improvement of codes, and it is estimated by the Telegraph Companies that code words at the present time contain on an average from 15 to 20 ordinary words.

The Turkish route still works very badly, and the lines between Constantinople and Fao were interrupted for no less than 150 days during the year. The Fao-Bushire Cable was also interrupted for 18 days 13 hours and 32 minutes owing to the break occurring when the departmental steamer was in dock at Bombay.

In addition to the departmental work, the cable steamer laid a new cable between India and Ceylon for the Indian Telegraph Department; this was made up in the factory at Manora.

It is considered that the report has been carefully and correctly prepared, and that the administration of the Department by Mr. Ffinch continues to be economical and satisfactory. His interviews with the Company's officers, with which his Department works in partnership, have been successfully conducted,

and his reports and suggestions on telegraph questions which have been referred to him during the year have been carefully considered, and are valuable.

Mr. Ffinch, in his report, mentions in favourable terms Lieutenant-Colonel Wells, R.E., and Mr. Possmann, the Local Directors. It is suggested that the thanks of the Secretary of State should be conveyed to these gentlemen for the good services rendered.

Mr. Ffinch draws attention to the fact that the Administration Report for 1893-94 was not published in the *Gazette of India*, and asks that the present and previous one may now be published.

The Gazette of India

EXTRAORDINARY.

PUBLISHED BY AUTHORITY.

SIMLA, MONDAY, JUNE 22, 1896.

NOTIFICATION.

ACCOUNTS AND FINANCE.
PUBLIC DEBT.

No. 2680.

Simla, the 22nd June, 1896.

THREE PER CENT. LOAN OF 1896-97.

His Excellency the Right Honourable the Governor General in Council has resolved to borrow four hundred lakhs of rupees for the public service in the following manner:

2. Promissory Notes will be issued for the said amount, bearing interest at the rate of three per centum per annum, payable half-yearly on the 30th day of June and the 31st day of December. The notes will be in the Form annexed to this Notification and they will not be discharged before December 31st, 1916, nor until the expiration of three months after notice of payment to be published in the Government Gazette.

Tenders.

3. Tenders for the whole or any part of the said amount of Rs. 4,00,00,000 will be received by the Comptroller General from this date to noon of Wednesday, the 22nd July next. Tenders must be for sums of 500 Rupees or multiples of 500 Rupees.

4. Each tender must be addressed, in the Form annexed to this Notification, to the Comptroller General, Calcutta, and enclosed in a closed cover, superscribed "*Tender for the Three Per Cent Loan.*" If the tenderer is not resident in India, he must name an agent resident in India to whom an allotment-certificate may be issued, if any part of the loan is allotted to such tenderer.

NOTE.- Tenders made in accordance with these instructions will also be received by the Accountants General, Madras and Bombay, on account of the Comptroller General, Calcutta, on the 21st July and up to 11-30 or 11 o'clock local time respectively (corresponding with 12 o'clock in Calcutta) on the 22nd July; provided that –

(a) they are delivered personally or by clerk or messenger at the Accountant General's Office (where a receipt will be given for them);

(b) they are made on printed Forms, to be obtained at the same office or at the local Presidency Bank;

(c) each tender is for not less than Rs. 10,000;

(d) that the deposit is either a promissory note or a Treasury Receipt from the Head Office of the local Presidency Bank, or a cheque on a local Bank in Madras or Bombay in favour of the Accountant General, Madras or Bombay, respectively;

(e) that the amount of the tender is made payable either in Calcutta, Madras, or Bombay;

and the Accountant General will return deposits on non-accepted tenders, and will issue allotment-certificates so far as the tenders are payable in Madras or Bombay.

5. The rate at which each tender is made must be specified in rupees or rupees and annas: a tender in which no rate is thus specified, but a subscription is offered in some other terms—as, for example, at the recorded minimum, or at some specified percentage in addition to the recorded minimum, or at the average of the accepted tenders—will be rejected as null and void.

6. The rate at which a tender is made must not contain a fraction of an anna: if a rate containing a fraction of an anna is inserted in any tender such fraction will be struck out and the tender treated as if the rate did not contain such fraction of an anna.

Deposits.

7. Each tender must be accompanied by a deposit of not less than one-hundredth, or, if the tender be for less than Five Lakhs of Rupees, then for not less than one-fiftieth part of the tender. The deposit must be in one of the following forms: (*a*) a receipt for the amount from the Head Office of the Bank of Bengal, or Madras, or Bombay, or one of their Branches, or from an officer in charge of some Public Treasury, or (*b*) a cheque drawn in favour of the Comptroller General on a Bank in Calcutta, Madras, or Bombay, or (*c*) Government Promissory Notes[1] standing in the name of or endorsed to the tenderer or the person making the deposit.

[1] *It is particularly requested that such Promissory Notes may NOT be endorsed to the Comptroller General.*

8. (*a*) Deposits, not being promissory notes, will, in the case of accepted tenders, be credited proportionally in part payment of the allotment-certificates issued in respect of the tender, and will bear interest for the purpose of clause 16 below from the date of the opening of tenders. When a tender is not accepted in full, the deposits, when they are not in the form of promissory notes, will be credited as far as possible proportionately in even tens of rupees in part payment of the allotment-certificates issued in respect of it. If any allotment-certificate is not fully taken up, the deposit credited in respect of it will be forfeited.

(*b*) Promissory notes deposited in respect of any accepted tender will be held until all the allotment-certificates issued in respect of the tender are paid up, and will, if the allotment-certificates are not fully taken up, be appropriated by the Government and cancelled.

Opening of Tenders.

9. The minimum rate at which tenders will be accepted will be recorded under the signature of the Comptroller General, and, before the tenders are opened, placed upon the table in a sealed envelope, but will not be declared unless some tender is rejected only because it is below the recorded minimum.

10. Tenders will be opened publicly by the Comptroller General at the Treasury Buildings, Calcutta, at noon (Calcutta time), on Wednesday, the 22nd July next, and those received under the terms of the note under clause 4 will be similarly opened by the Accountant General, Madras, at 11-30 (Madras time), and by the Accountant General, Bombay, at 11 o'clock (Bombay time) on the same day; but the contents of the tenders will not be disclosed otherwise than as provided in clause 12

11. Tenders at the recorded minimum rate and at rates above the recorded minimum rate will be accepted in the order of the rates tendered, beginning with the highest rate; the amount allotted at the lowest rate at which tenders are accepted will be divided amongst those who have tendered at this rate in proportion, as nearly as may be found convenient, to the amounts of their tenders; provided that no allotment will be issued if the amount distributable on any tender is less than Rs. 500.

Allotment Certificates.

12. To each tenderer (or to his agent) whose tender is accepted in whole or in part such number of allotment-certificates as may be necessary to make up the aggregate amount allotted to him will be issued by the Comptroller General[2] as soon as possible after the 22nd July; and an alphabetical list of the names of those to whom such allotment-certificates are issued will be posted for general information at the Head Offices of the Banks of Bengal, Madras and Bombay.

[2] For tenders received by the Accountant General, Madras or Bombay, and payable at those places, the Accountant General will issue the allotment-certificates.

13 If the allotment made on any tender is less than Rs 3,000, then the whole of the allotment certificates (after credit of the deposit under clause 8(*a*)) will be made payable upon the 9th September.

Otherwise the whole amount of each allotment will be divided into three instalments as follows:

Instalment I.—As near as convenient to 35 per cent., but not exceeding 35 per cent., payable upon the 7th August:

Instalment II.—As near as convenient to 35 per cent., but not exceeding 35 per cent., payable upon the 9th September:

Instalment III.—The balance payable upon the 9th October:

and allotment-certificates will be issued for each instalment separately.

But the whole or any part of any accepted tender may be paid at any time after receipt of the allotment-certificates.

The words "as near as convenient" refer to the necessity for making each instalment an exact multiple of Rs. 500.

14. Any allotment-certificate will, on application to the Comptroller General, be exchanged for an equivalent amount of allotment-certificates of smaller denominations; provided that if any payment (beyond the deposit) is recorded upon the cancelled certificate, it can be taken against, and recorded upon, only one of the certificates issued in exchange.

15 Payment of any allotment-certificate may be made to the account of the Government in the Head Office of the Bank of Bengal or Madras or Bombay, or in any Branch of these Banks, or into any Public Treasury or Treasuries in India which may be named in the tender in respect of which it was issued. Receipts for such payments will be given by the Banks of Bengal, Madras, and Bombay, or their Branches, or by the Officers in charge of the Government Treasuries at which payment is made, by endorsement upon the relative certificate.

Issue of Promissory Notes.

16. (*a*) When any allotment-certificate is fully paid up, the holder will, on presenting it duly receipted at the place where it was paid, obtain from the Public Debt Office, Calcutta, promissory notes of such values as he may desire (each note being in even hundreds and not less than Rs. 500), bearing interest from 31st December 1896, and he will also receive interest at 3 per cent. per annum from the dates on which he may have made payment till the 30th of December 1896.

(*b*) Or he may, at his option, by paying interest at the said rate from 30th June 1896 to the dates on which he may have made payment, obtain promissory notes as above, bearing interest from 30th June 1896.

FORM OF PROMISSORY NOTE (see Clause 2).

Fort William, the

Promissory Note *Government Rupees* *at 3 per cent.*

No. *of 1896-97.*

The Governor General of India in Council does hereby acknowledge to have received from
the sum of Government Rupees Five Hundred only as a loan to the Secretary of State in Council for India, and does hereby promise for and on behalf of the said Secretary of State in Council, to repay the said loan, by paying the said sum of Government Rupees Five Hundred only to the said
his Executors, or Administrators, or his or their Order, on demand, at the General Treasury at Fort William, after the expiration of Three Months' Notice of Payment, to be given by the Governor General of India in Council, in the *Government Gazette*, and to pay the interest accruing on the said sum of Government Rupees Five Hundred only from the
at the rate of three per cent. per annum, by half-yearly payments, at the General Treasury at Fort William, to the said , his Executors, or Administrators, or his or their Order, until the expiration of three months after such notice of payment

as aforesaid, when the amount of interest due will be payable with the principal, and (such notice being considered as equivalent to a tender of payment at the period appointed for the discharge of this note) all further interest shall cease.

The Governor General in Council hereby further engages that Notice of Payment as aforesaid shall not be given before the Thirtieth day of September 1916, and that this Note shall not be discharged before the Thirty-first day of December 1916.

FORM OF TENDER (see Clause 4).

I, *A. B.*, hereby tender for Rupees (*X*) of *The Three Per Cent. Loan* advertised in the Notification published in the *Gazette of India, Extraordinary*, dated the 22nd June 1896, and agree to pay for the same, subject to the conditions notified, at the rate of Rupees (*Y*) Annas (*Z*) for every hundred rupees allotted to me.

I enclose a *deposit receipt** for Rupees (*XX*), and engage, if my offer be accepted, to pay to the account of the Government at the *Bank of*† (*or at the*† *Branch of the Bank of*† ; *or into the Public Treasury at*† *as the case may be*)—

* Or Cheque or Government Promissory Note.
† Here enter the name of Bank, Branch Bank, or Treasury.

The first instalment, not exceeding 35 per cent., on or before 7th August 1896.

The second instalment, not exceeding 35 per cent., on or before 9th September 1896.

The balance on or before 9th October 1896.

Or, if the amount allotted to me be less than Rs. 3,000, then the whole amount on or before 9th September 1896.

Any allotment made to me may be communicated to *C. D.* at*.

* Here insert *C. D.'s* address, which must be in India. This paragraph should only be inserted if *A. B.* does not reside in India, or, if residing in India, he wishes the allotment communicated to an agent, or desires to pay the instalments elsewhere than at the place where the tender is submitted and wishes the allotment-certificates to be given to an agent at that place.

NOTE.—(1) *A separate tender must be made at each rate tendered. The rate tendered should be the whole amount per centum, not the premium or discount: thus "One hundred and two" or "One hundred" or "Ninety-nine"; not "Two per cent. premium" or "Par" or "One per cent discount."*

By order of the Governor General in Council,

J. F. FINLAY,

Secretary to the Government of India.

NOTIFICATION BY THE COMPTROLLER GENERAL.

The Comptroller General requests the attention of tenderers to the following arrangements:

Filling up Tenders.

(1) They are requested to use only the printed forms of tender which will be available at his Office and at the Currency Office on application to the Durwan on duty, at all the Provincial Account Offices and at the Banks of Bengal, Madras, and Bombay, and will also be supplied to the principal Treasuries.

(2) If the deposit is in the form of Promissory Notes or of Currency Notes, their number should be quoted in detail in the tender.

Presentation of Tenders.

(3) For all tenders presented to him in his office upon the last fixed day, or the two days preceding it, he will give the bearer a receipt bearing a number and initialled by himself or an assistant specially deputed for the purpose. The Accountants General, Madras and Bombay, will do likewise in respect of tenders presented to them under the note to clause 4 of the Government Notification.

Return of Deposit in case of Non-acceptance.

(4) The reverse of this receipt is a form in which, in the event of the tender not being accepted, the tenderer may give to the Comptroller General or Accountant General, Madras or Bombay, a receipt for the deposit accompanying it. This form should on the third day after the opening of the tenders be filled up, signed with the same signature as the tender, and be presented at the Office of the Comptroller General or Accountant General, Bombay or Madras. The deposit will then be returned to the bearer in exchange for the receipt.

(5) Deposit upon tenders presented personally, as described in No. (3) above, will be returned only in this way, and will not be sent by post or otherwise. Deposits upon other unsuccessful tenders will be returned by post or by the hands of a clerk.

Accepted Tenders.

(6) The Comptroller General and the Accountant General, Madras or Bombay (in the case of tenders received by such Accountant General and payable in Madras or Bombay), will issue allotment-certificates to successful tenderers. These certificates will be for the following amounts :—Rs. 500, Rs. 1,000, Rs. 2,000, Rs. 5,000, Rs. 10,000, Rs. 20,000, Rs. 50,000, Rs. 1,00,000, making up the full value accepted; and the deposit on the tender will be divided among them; they will be substantially of the following form :

This is to certify that, in accordance with the terms of Notification No. 2680, dated 22nd June 1896 (Gazette of India, Extraordinary, *dated 22nd June 1896*), *the abovenamed tenderer has engaged to take up Rs. 2,000 of the 3 Per Cent. Loan of 1896-97 at the rate abovementioned on or before ; and that on the said payment being completed, he is entitled on endorsing and delivering up this certificate to receive a promissory note or notes of the Government of India for Rs. 2,000, bearing interest from .*

PUBLISHED BY AUTHORITY.

SIMLA, MONDAY, JUNE 22, 1896.

FINANCE AND COMMERCE DEPARTMENT.

NOTIFICATION.

ACCOUNTS AND FINANCE.
PUBLIC DEBT.

No. 2680.

Simla, the 22nd June 1896.

THREE PER CENT. LOAN OF 1896-97.

His Excellency the Right Honourable the Governor General in Council has resolved to borrow four hundred lakhs of rupees for the public service in the following manner:

2. Promissory Notes will be issued for the said amount, bearing interest at the rate of three per centum per annum, payable half-yearly on the 30th day of June and 31st day of December. The notes will be in the Form annexed to this Notification and they will not be discharged before December 31st, 1916, nor until the expiration of three months after notice of payment to be published in the Government Gazette.

Tenders.

3. Tenders for the whole or any part of the said amount of Rs. 4,00,00,000 will be received by the Comptroller General from this date to noon of Wednesday, the 22nd July next. Tenders must be for sums of 500 Rupees or multiples of 500 Rupees.

4. Each tender must be addressed, in the form annexed to this Notification, to the Comptroller General, Calcutta, and enclosed in a closed cover, superscribed "*Tender for the Three Per Cent. Loan.*" If the tenderer is not resident in India, he must name

an agent resident in India to whom an allotment-certificate may be issued, if any part of the loan is allotted to such tenderer.

NOTE.—Tenders made in accordance with these instructions will also be received by the Accountants General, Madras and Bombay, on account of the Comptroller General, Calcutta, on the 21st July and up to 11-30 or 11 o'clock, local time respectively (corresponding with 12 o'clock in Calcutta) on the 22nd July; provided that—

(*a*) they are delivered personally or by clerk or messenger at the Accountant General's Office (where a receipt will be given for them);

(*b*) they are made on printed Forms, to be obtained at the same office or at the local Presidency Bank;

(*c*) each tender is for not less than Rs. 10,000;

(*d*) that the deposit is either a promissory note or a Treasury Receipt from the Head Office of the Local Presidency Bank, or a cheque on a local Bank in Madras or Bombay in favour of the Accountant General, Madras or Bombay, respectively;

(*e*) that the amount of the tender is made payable either in Calcutta, Madras, or Bombay;

and the Accountant General will return deposits on non-accepted tenders, and will issue allotment-certificates so far as the tenders are payable in Madras or Bombay.

5. The rate at which each tender is made must be specified in rupees or rupees and annas: a tender in which no rate is thus specified, but a subscription is offered in some other terms—as, for example, at the recorded minimum, or at some specified percentage in addition to the recorded minimum, or at the average of the accepted tenders—will be rejected as null and void.

6. The rate at which a tender is made must not contain a fraction of an anna: if a rate containing a fraction of an anna is inserted in any tender, such fraction will be struck out and the tender treated as if the rate did not contain such fraction of an anna.

Deposits.

7. Each tender must be accompanied by a deposit of not less than one-hundredth, or, if the tender be for less than Five Lakhs of Rupees, then for not less than one-fiftieth part of the tender. The deposit must be in one of the following forms: (*a*) a receipt for the amount from the Head Office of the Bank of Bengal, or Madras, or Bombay, or one of their Branches, or from an officer in charge of some Public Treasury, or (*b*) a cheque drawn in favour of the Comptroller General on a Bank in Calcutta, Madras, or Bombay, or (*c*) Government Promissory Notes[1] standing in the name of or endorsed to the tenderer or the person making the deposit.

[1] *It is particularly requested that such Promissory Notes may NOT be endorsed to the Comptroller General.*

8. (*a*) Deposits, not being promissory notes, will, in the case of accepted tenders, be credited proportionally in part payment of the allotment-certificates issued in respect of the tender, and will bear interest for the purpose of clause 16 below from the date of the opening of tenders. When a tender is not accepted in full, the deposits, when they are not in the form of promissory notes, will be credited as far as possible proportionately in even tens of rupees in part payment of the allotment-certificates issued in respect of it. If any allotment-certificate is not fully taken up, the deposit credited in respect of it will be forfeited.

(*b*) Promissory notes deposited in respect of any accepted tender will be held until all the allotment-certificates issued in respect of the tender are paid up, and will, if the allotment-certificates are not fully taken up, be appropriated by the Government and cancelled.

Opening of Tenders.

9. The minimum rate at which tenders will be accepted will be recorded under the signature of the Comptroller General, and, before the tenders are opened, placed upon the table in a sealed envelope, but will not be declared unless some tender is rejected only because it is below the recorded minimum.

10. Tenders will be opened publicly by the Comptroller General at the Treasury Buildings, Calcutta, at noon (Calcutta time), on Wednesday, the 22nd July next, and those received under the terms of the note under clause 4 will be similarly opened by the Accountant General, Madras, at 11-30 (Madras time), and by the Accountant General, Bombay, at 11 o'clock (Bombay time) on the same day; but the contents of the tenders will not be disclosed otherwise than as provided in clause 12.

11. Tenders at the recorded minimum rate and at rates above the recorded minimum rate will be accepted in the order of the rates tendered, beginning with the highest rate; the amount allotted at the lowest rate at which tenders are accepted will be divided amongst those who have tendered at this rate in proportion, as nearly as may be found convenient, to the amounts of their tenders; provided that no allotment will be issued if the amount distributable on any tender is less than Rs. 500.

Allotment Certificates.

12. To each tenderer (or to his agent) whose tender is accepted in whole or in part such number of allotment-certificates as may be necessary to make up the aggregate amount allotted to him will be issued by the Comptroller General[1] as soon as possible after the 22nd July; and an alphabetical list of the names of those to whom such allotment-certificates are issued will be posted for general information at the Head Offices of the Banks of Bengal, Madras and Bombay.

[1] For tenders received by the Accountant General, Madras or Bombay, and payable at those places, the Accountant General will issue the allotment-certificates.

13. If the allotment made on any tender is less than Rs. 3,000, then the whole of the allotment-certificates (after credit of the deposit under clause 8(*a*)) will be made payable upon the 9th September.

Otherwise the whole amount of each allotment will be divided into three instalments as follows:

Instalment I.—As near as convenient to 35 per cent., but not exceeding 35 per cent., payable upon the 7th August:

Instalment II.—As near as convenient to 35 per cent., but not exceeding 35 per cent., payable upon the 9th September:

Instalment III.—The balance payable upon the 9th October:

and allotment-certificates will be issued for each instalment separately.

But the whole or any part of any accepted tender may be paid at any time after receipt of the allotment-certificates.

The words "as near as convenient" refer to the necessity for making each instalment an exact multiple of Rs. 500.

14. Any allotment-certificate will, on application to the Comptroller General, be exchanged for an equivalent amount of allotment-certificates of smaller denominations; provided that if any payment (beyond the deposit) is recorded upon the cancelled certificate, it can be taken against, and recorded upon, only one of the certificates issued in exchange.

15. Payment of any allotment-certificate may be made to the account of the Government in the Head Office of the Bank of Bengal or Madras or Bombay, or in any Branch of these Banks, or into any Public Treasury or Treasuries in India which may be named in the tender in respect of which it was issued. Receipts for such payments will be given by the Banks of Bengal, Madras, and Bombay, or their Branches, or by the Officers in charge of the Government Treasuries at which payment is made, by enfacement upon the relative certificate.

Issue of Promissory Notes.

16. (*a*) When any allotment-certificate is fully paid up, the holder will, on presenting it duly receipted at the place where it was paid, obtain from the Public Debt Office, Calcutta, promissory notes of such values as he may desire (each note being in even hundreds and not less than Rs. 500), bearing interest from 31st December 1896, and he will also receive interest at 3 per cent. per annum from the dates on which he may have made payment till the 30th of December 1896.

(*b*) Or he may, at his option, by paying interest at the said rate from 30th June 1896 to the dates on which he may have made payment, obtain promissory notes as above, bearing interest from 30th June 1896.

FORM OF PROMISSORY NOTE (see Clause 2).

Fort William, the

Promissory Note No. *Government Rupees* *at 3 per cent. of 1896-97.*

"The Governor-General of India in Council does hereby acknowledge to have received from

the sum of Government Rupees Five Hundred only, as a loan to the Secretary of State in Council for India, and does hereby promise, for and on behalf of the said Secretary of State in Council,

to repay the said loan, by paying the said sum of Government Rupees Five Hundred only to the said
his Executors, or Administrators, or his or their Order, on demand, at the General Treasury at Fort William, after the expiration of Three Months' Notice of Payment, to be given by the Governor-General of India in Council, in the *Government Gazette*, and to pay the interest accruing on the said sum of Government Rupees Five Hundred only from the
at the rate of three per cent. per annum, by half-yearly payments, at the General Treasury at Fort William, to the said , his Executors, or Administrators, or his or their Order, until the expiration of three months after such notice of payment as aforesaid, when the amount of interest due will be payable with the principal, and (such notice being considered as equivalent to a tender of payment at the period appointed for the discharge of this note) all further interest shall cease.

The Governor-General in Council hereby further engages that Notice of Payment as aforesaid shall not be given before the Thirtieth day of September 1916, and that this Note shall not be discharged before the Thirty-first day of December 1916.

FORM OF TENDER (see Clause 4).

I, *A. B.*, hereby tender for Rupees (*X*) of *The Three Per Cent. Loan* advertised in the Notification published in the *Gazette of India, Extraordinary*, dated the 22nd June 1896, and agree to pay for the same, subject to the conditions notified, at the rate of Rupees (*Y*) Annas (*Z*) for every hundred rupees allotted to me.

I enclose a *deposit receipt** for Rupees (*XX*), and engage, if my offer be accepted, to pay to the account of the Government at the *Bank of* † (*or at the Bank of* † *Branch of the* † ; *or into the Public Treasury at* † *as the case may be*)—

* Or Cheque or Government Promissory Note.
† Here enter the name of Bank, Branch Bank, or Treasury.

The first instalment, not exceeding 35 per cent., on or before 7th August 1896.

The second instalment, not exceeding 35 per cent., on or before 9th September 1896.

The balance on or before 9th October 1896.

Or, if the amount allotted to me be less than Rs. 8,000, then the whole amount on or before 9th September 1896.

* Here insert *C. D.*'s address, which must be in India. This paragraph should only be inserted if *A. B.* does not reside in India, or, if residing in India, he wishes the allotment communicated to an agent, or desires to pay the instalments elsewhere than at the place where the tender is submitted, and wishes the allotment-certificates to be given to an agent at that place.

Any allotment made to me may be communicated to *C. D.* at*

NOTE.—(1) *A separate tender must be made at each rate tendered. The rate tendered should be the whole amount per centum, not the premium or discount: thus "One hundred and two" or "One hundred" or "Ninety-nine"; not "Two per cent. premium" or "Par" or "One per cent. discount."*

By order of the Governor General in Council,

J. F. FINLAY,

Secretary to the Government of India.

NOTIFICATION BY THE COMPTROLLER GENERAL.

The Comptroller General requests the attention of tenderers to the following arrangements:

Filling up Tenders.

(1) They are requested to use only the printed forms of tender which will be available at his Office and at the Currency Office on application to the Durwan on duty, at all the Provincial Account Offices, and at the Banks of Bengal, Madras, and Bombay, and will also be supplied to the principal Treasuries.

(2) If the deposit is in the form of Promissory Notes or of Currency Notes, their number should be quoted in detail in the tender.

Presentation of Tenders.

(3) For all tenders presented to him in his office upon the last fixed day, or the two days preceding it, he will give the bearer a receipt bearing a number and initialled by himself or an assistant specially deputed for the purpose. The Accountants General, Madras and Bombay, will do likewise in respect of tenders presented to them under the note to clause 4 of the Government Notification.

Return of Deposit in case of Non-acceptance.

(4) The reverse of this receipt is a form in which, in the event of the tender not being accepted, the tenderer may give to the Comptroller General or Accountant General, Madras or Bombay, a receipt for the deposit accompanying it. This form should on the third day after the opening of the tenders be filled up, signed with the same signature as the tender, and be presented at the Office of the Comptroller General or Accountant General, Bombay or Madras. The deposit will then be returned to the bearer in exchange for the receipt.

(5) Deposit upon tenders presented personally, as described in No. (3) above, will be returned only in this way, and will not be sent by post or otherwise. Deposits upon other unsuccessful tenders will be returned by post or by the hands of a clerk.

Accepted Tenders.

THREE PER CENT. LOAN OF 1896-97.

His Excellency the Right Honourable the Governor General in Council has resolved to borrow four hundred lakhs of rupees for the public service in the following manner:

2. Promissory Notes will be issued for the said amount, bearing interest at the rate of three per centum per annum, payable half-yearly on the 30th day of June and the 31st day of December. The notes will be in the Form annexed to this Notification and they will not be discharged before December 31st, 1916, nor until the expiration of three months after notice of payment to be published in the Government Gazette.

Tenders.

3. Tenders for the whole or any part of the said amount of Rs. 4,00,00,000 will be received by the Comptroller General from this date to noon of Wednesday, the 22nd July next. Tenders must be for sums of 500 Rupees or multiples of 500 Rupees.

4. Each tender must be addressed, in the Form annexed to this Notification, to the Comptroller General, Calcutta, and enclosed in a closed cover, superscribed *"Tender for the Three Per Cent. Loan."* If the tenderer is not resident in India, he must name an agent resident in India to whom an allotment-certificate may be issued, if any part of the loan is allotted to such tenderer.

NOTE.—Tenders made in accordance with these instructions will also be received by the Accountants General, Madras and Bombay, on account of the Comptroller General, Calcutta, on the 21st July and up to 11-30 or 11 o'clock local time respectively (corresponding with 12 o'clock in Calcutta) on the 22nd July; provided that—

(*a*) they are delivered personally or by clerk or messenger at the Accountant General's Office (where a receipt will be given for them);

(*b*) they are made on printed Forms, to be obtained at the same office or at the local Presidency Bank;

(*c*) each tender is for not less than Rs. 10,000;

(*d*) that the deposit is either a promissory note or a Treasury Receipt from the Head Office of the local Presidency Bank, or a cheque on a local Bank in Madras or Bombay in favour of the Accountant General, Madras or Bombay, respectively;

(*e*) that the amount of the tender is made payable either in Calcutta, Madras, or Bombay;

and the Accountant General will return deposits on non-accepted tenders, and will issue allotment-certificates so far as the tenders are payable in Madras or Bombay.

5. The rate at which each tender is made must be specified in rupees or rupees and annas: a tender in which no rate is thus specified, but a subscription is offered in some other terms—as, for example, at the recorded minimum, or at some specified percentage in addition to the recorded minimum, or at the average of the accepted tenders—will be rejected as null and void.

6. The rate at which a tender is made must not contain a fraction of an anna: if a rate containing a fraction of an anna is inserted in any tender, such fraction will be struck out and the tender treated as if the rate did not contain such fraction of an anna.

Deposits.

7. Each tender must be accompanied by a deposit of not less than one-hundredth, or, if the tender be for less than Five Lakhs of Rupees, then for not less than one-fiftieth part of the tender. The deposit must be in one of the following forms: (*a*) a receipt for the amount from the Head Office of the Bank of Bengal, or Madras, or Bombay, or one of their Branches, or from an officer in charge of some Public Treasury, or (*b*) a cheque drawn in favour of the Comptroller General on a Bank in Calcutta, Madras, or Bombay, or (*c*) Government Promissory Notes[1] standing in the name of or endorsed to the tenderer or the person making the deposit.

[1] *It is particularly requested that such Promissory Notes may NOT be endorsed to the Comptroller General.*

8. (*a*) Deposits, not being promissory notes, will, in the case of accepted tenders, be credited proportionally in part payment of the allotment-certificates issued in respect

of the tender, and will bear interest for the purpose of clause 16 below from the date of the opening of tenders. When a tender is not accepted in full, the deposits, when they are not in the form of promissory notes, will be credited as far as possible proportionately in even tens of rupees in part payment of the allotment-certificates issued in respect of it. If any allotment-certificate is not fully taken up, the deposit credited in respect of it will be forfeited.

(*b*) Promissory notes deposited in respect of any accepted tender will be held until all the allotment-certificates issued in respect of the tender are paid up, and will, if the allotment-certificates are not fully taken up, be appropriated by the Government and cancelled.

Opening of Tenders.

9. The minimum rate at which tenders will be accepted will be recorded under the signature of the Comptroller General, and, before the tenders are opened, placed upon the table in a sealed envelope, but will not be declared unless some tender is rejected only because it is below the recorded minimum.

10. Tenders will be opened publicly by the Comptroller General at the Treasury Buildings, Calcutta, at noon (Calcutta time), on Wednesday, the 22nd July next, and those received under the terms of the note under clause 4 will be similarly opened by the Accountant General, Madras, at 11-30 (Madras time), and by the Accountant General, Bombay, at 11 o'clock (Bombay time) on the same day; but the contents of the tenders will not be disclosed otherwise than as provided in clause 12.

11. Tenders at the recorded minimum rate and at rates above the recorded minimum rate will be accepted in the order of the rates tendered, beginning with the highest rate; the amount allotted at the lowest rate at which tenders are accepted will be divided amongst those who have tendered at this rate in proportion, as nearly as may be found convenient, to the amounts of their tenders; provided that no allotment will be issued if the amount distributable on any tender is less than Rs. 500.

Allotment Certificates.

12. To each tenderer (or to his agent) whose tender is accepted in whole or in part such number of allotment-certificates as may be necessary to make up the aggregate amount allotted to him will be issued by the Comptroller General[2] as soon as possible after the 22nd July; and an alphabetical list of the names of those to whom such allotment-certificates are issued will be posted for general information at the Head Offices of the Banks of Bengal, Madras and Bombay.

[2]For tenders received by the Accountant General, Madras or Bombay, and payable at those places, the Accountant General will issue the allotment-certificates.

13. If the allotment made on any tender is less than Rs. 3,000, then the whole of the allotment-certificates (after credit of the deposit under clause 8(*a*)) will be made payable upon the 9th September.

Otherwise the whole amount of each allotment will be divided into three instalments as follows:

Instalment I.—As near as convenient to 35 per cent., but not exceeding 35 per cent., payable upon the 7th August:

Instalment II.—As near as convenient to 35 per cent., but not exceeding 35 per cent., payable upon the 9th September:

Instalment III.—The balance payable upon the 9th October:

and allotment-certificates will be issued for each instalment separately.

But the whole or any part of any accepted tender may be paid at any time after receipt of the allotment-certificates.

The words "as near as convenient" refer to the necessity for making each instalment an exact multiple of Rs. 500.

14. Any allotment-certificate will, on application to the Comptroller General, be exchanged for an equivalent amount of allotment-certificates of smaller denominations; provided that if any payment (beyond the deposit) is recorded upon the cancelled certificate, it can be taken against, and recorded upon, only one of the certificates issued in exchange.

15. Payment of any allotment-certificate may be made to the account of the Government in the Head Office of the Bank of Bengal or Madras or Bombay, or in any Branch of these Banks, or into any Public Treasury or Treasuries in India which may be named in the tender in respect of which it was issued. Receipts for such payments will be given by the Banks of Bengal, Madras, and Bombay, or their Branches, or by the Officers in charge of the Government Treasuries at which payment is made, by enfacement upon the relative certificate.

Issue of Promissory Notes.

16. (*a*) When any allotment-certificate is fully paid up, the holder will, on presenting it duly receipted at the place where it was paid, obtain from the Public Debt Office, Calcutta, promissory notes of such values as he may desire (each note being in even hundreds and not less than Rs. 500), bearing interest from 31st December 1896, and he will also receive interest at 3 per cent. per annum from the dates on which he may have made payment till the 30th of December 1896.

(*b*) Or he may, at his option, by paying interest at the said rate from 30th June 1896 to the dates on which he may have made payment, obtain promissory notes as above, bearing interest from 30th June 1896.

FORM OF PROMISSORY NOTE (see Clause 2).

Fort William, the

Promissory Note No. *Government Rupees* *at 3 per cent. of 1896-97.*

The Governor General of India in Council does hereby acknowledge to have received from
the sum of Government Rupees Five Hundred only as a loan to the Secretary of State in Council for India, and does hereby promise, for and on behalf of the said Secretary of State in Council, to repay the said loan, by paying the said sum of Government Rupees Five Hundred only to the said
his Executors, or Administrators, or his or their Order, on demand, at the General Treasury at Fort William, after the expiration of Three Months' Notice of Payment, to be given by the Governor General of India in Council, in the *Government Gazette*, and to pay the interest accruing on the said sum of Government Rupees Five Hundred only from the
at the rate of three per cent. per annum, by half-yearly payments, at the General Treasury at Fort William, to the said , his Executors, or Administrators, or his or their Order, until the expiration of three months after such notice of payment as aforesaid, when the amount of interest due will be payable with the principal, and (such notice being considered as equivalent to a tender of payment at the period appointed for the discharge of this note) all further interest shall cease.

The Governor General in Council hereby further engages that Notice of Payment as aforesaid shall not be given before the Thirtieth day of September 1916, and that this Note shall not be discharged before the Thirty-first day of December 1916.

FORM OF TENDER (see Clause 4).

I, *A. B.*, hereby tender for Rupees (*X*) of *The Three Per Cent. Loan* advertised in the Notification published in the *Gazette of India, Extraordinary*, dated the 22nd June 1896, and agree to pay for the same, subject to the conditions notified, at the rate of Rupees (*Y*) Annas (*Z*) for every hundred rupees allotted to me.

I enclose a *deposit receipt** for Rupees (*XX*), and engage, if my offer be accepted, to pay to the account of the Government at the *Bank of*† *(or at the*† *Branch of the Bank of*† *; or into the Public Treasury at*† *as the case may be)*—

* Or Cheque or Government Promissory Note.
† Here enter the name of Bank, Branch Bank, or Treasury.

The first instalment, not exceeding 35 per cent., on or before 7th August 1896.

The second instalment, not exceeding 35 per cent., on or before 9th September 1896.

The balance on or before 9th October 1896.

Or, if the amount allotted to me be less than Rs. 3,000, then the whole amount on or before 9th September 1896.

* Here insert *C. D.*'s address, which must be in India. This paragraph should only be inserted if *A. B.* does not reside in India, or, if residing in India, he wishes the allotment communicated to an agent, or desires to pay the instalments elsewhere than at the place where the tender is submitted, and wishes the allotment-certificates to be given to an agent at that place.

Any allotment made to me may be communicated to *C. D.* at*

NOTE.—(1) *A separate tender must be made at each rate tendered. The rate tendered should be the whole amount per centum, not the premium or discount: thus "One hundred and two" or "One hundred" or "Ninety-nine"; not "Two per cent. premium" or "Par" or "One per cent. discount."*

By order of the Governor General in Council,

J. F. FINLAY,

Secretary to the Government of India.

NOTIFICATION BY THE COMPTROLLER GENERAL.

The Comptroller General requests the attention of tenderers to the following arrangements:

Filling up Tenders.

(1) They are requested to use only the printed forms of tender which will be available at his Office and at the Currency Office on application to the Durwan on duty, at all the Provincial Account Offices, and at the Banks of Bengal, Madras, and Bombay, and will also be supplied to the principal Treasuries.

(2) If the deposit is in the form of Promissory Notes or of Currency Notes, their number should be quoted in detail in the tender.

Presentation of Tenders.

(3) For all tenders presented to him in his office upon the last fixed day, or the two days preceding it, he will give the bearer a receipt bearing a number and initialled by himself or an assistant specially deputed for the purpose. The Accountants General, Madras and Bombay, will do likewise in respect of tenders presented to them under the note to clause 4 of the Government Notification.

Return of Deposit in case of Non-acceptance.

(4) The reverse of this receipt is a form in which, in the event of the tender not being accepted, the tenderer may give to the Comptroller General or Accountant General, Madras or Bombay, a receipt for the deposit accompanying it. This form should on the third day after the opening of the tenders be filled up, signed with the same signature as the tender, and be presented at the Office of the Comptroller General or Accountant General, Bombay or Madras. The deposit will then be returned to the bearer in exchange for the receipt.

(5) Deposit upon tenders presented personally, as described in No. (3) above, will be returned only in this way, and will not be sent by post or otherwise. Deposits upon other unsuccessful tenders will be returned by post or by the hands of a clerk.

Accepted Tenders.

(6) The Comptroller General and the Accountant General, Madras or Bombay (in the case of tenders received by such Accountant General and payable in Madras or Bombay), will issue allotment-certificates to successful tenderers. These certificates will be for the following amounts:—Rs. 500, Rs. 1,000, Rs. 2,000, Rs. 5,000, Rs. 10,000, Rs. 20,000, Rs. 50,000, Rs. 1,00,000, making up the full value accepted; and the deposit on the tender will be divided among them; they will be substantially of the following form:

This is to certify that, in accordance with the terms of Notification No. 2680, dated 22nd June 1896 (Gazette of India, Extraordinary, *dated 22nd June 1896*), *the abovenamed tenderer has engaged to take up Rs. 2,000 of the 3 Per Cent. Loan of 1896-97 at the rate abovementioned on or before ; and that on the said payment being completed, he is entitled on endorsing and delivering up this certificate to receive a promissory note or notes of the Government of India for Rs. 2,000, bearing interest from .*

CALCUTTA;

Jemadar Bishn Singh Kuthait to be Subadar, and Havildar Nakul Singh Adhikari to be Jemadar, *vice* Bahadur Singh Karki, transferred to the pension establishment, with effect from the 16th April 1896.

No. 762.—*1st Battalion, 1st Gurkha (Rifle) Regiment—*

Subadar Kishanbir Rana, from the 2nd Battalion, 1st Gurkha (Rifle) Regiment, to be Subadar-Major, *vice* Tezu Khanka, *Sirdar Bahadur*, transferred to the pension establishment, with effect from the 1st April 1896.

No. 763.—*1st Battalion, 3rd Gurkha (Rifle) Regiment*—

Havildar Tularam Mal to be Jemadar, *vice* Amar Sing Sahi, transferred to the pension establishment, with effect from the 11th December 1895.

No. 764.—*2nd Battalion, 4th Gurkha (Rifle) Regiment*—

Jemadar Ganu Thapa to be Subadar, and Havildar Partab Chand to be Jemadar, *vice* Indarbir Kawar, transferred to the pension establishment, with effect from the 6th April 1896.

No. 765.—*3rd Regiment of Bombay (Light) Infantry*—

Subadar Mirza Ibrahim Beg to be Subadar-Major, Jemadar Dulaji Parrab to be Subadar, and Havildar-Major Ganpat Yadhow to be Jemadar, *vice* Abdulla Beg, transferred to the pension establishment, with effect from the 5th December 1895.

Color-Havildar Gangaram Kadam to be Jemadar, *vice* Lakshiman Mehtar, transferred to the pension establishment, with effect from the 30th October 1895.

No. 766.—*10th Regiment of Bombay (Light) Infantry*—

Jemadar Ganu Sokunde, from the 12th Regiment of Bombay Infantry, to be Subadar, *vice* Daniel Israel, transferred to the pension establishment, with effect from the 23rd April 1896.

PUNJAB FRONTIER FORCE.

No. 767.—*(The Queen's Own) Corps of Guides, Cavalry.*

Kot-Dafadar Muhammad Azim Khan to be Jemadar, *vice* Turra Baz, deceased, with effect from the 9th January 1896.

RESIGNATIONS.

No. 768.—Second class Assistant Surgeon George Henry Key, Indian Subordinate Medical Department, Bengal, is permitted to resign the service.

RETIREMENTS.

No. 769.—Captain Thomas Clarke, Deputy Commissary, Ordnance Department, Madras Command, is permitted to retire from the service, with effect from the 2nd June 1896.

VOLUNTEER CORPS.

PROMOTIONS.

No. 770.—*North-Western Railway Volunteer Rifle Corps*—

Lieutenant Robert Cunningham Williams to be Captain, with effect from the 5th April 1896, *vice* List, resigned.

Second-Lieutenant Edmund Kearsley Horsfall to be Lieutenant, with effect from the 5th April 1896, *vice* Williams, promoted.

MILITARY WORKS DEPARTMENT.

APPOINTMENTS.

No. 771.—Lieutenant-Colonel and Brevet-Colonel N. Arnott, Royal Engineers, Chief Engineer, 3rd class, Madras Command, Military Works Department, is appointed Director-General of Military Works, with effect from the 12th June 1896, *vice* Major-General W. P. Tomkins, C.I.E., Royal Engineers, who has vacated.

PROMOTIONS.

No. 772.—The following promotions and reversions are made in the Engineer Establishment of the Military Works Department, with effect from the dates specified:

Names.	From	To	Nature of promotion, etc.	With effect from
Brevet-Colonel W. T. Shone, C.B., D.S.O., R.E.	Executive Engineer, 1st grade.	Superintending Engineer, class III.	Temporary . .	27th March 1895.
Major E. Glennie, R.E. .	Executive Engineer, 1st grade.	Superintending Engineer, class III.	Officiating . .	
Brevet-Colonel W. T. Shone, C.B., D.S.O., R.E.	Superintending Engineer, class III, *temporary*.	Executive Engineer, 1st grade.	Reversion . .	11th April 1895.
Major E. Glennie, R.E. .	Superintending Engineer, class III, *officiating*.	Executive Engineer, 1st grade.	Reversion . .	
Brevet-Colonel W. T. Shone, C.B., D.S.O., R.E.	Executive Engineer, 1st grade.	Superintending Engineer, class III.	Temporary . .	27th April 1895.
Major E. Glennie, R.E. .	Executive Engineer, 1st grade.	Superintending Engineer, class III.	Officiating . .	
Brevet-Colonel W. T. Shone, C.B., D.S.O., R.E.	Superintending Engineer, class III, *temporary*.	Executive Engineer, 1st grade.	Reversion . .	18th June 1895.
Major E. Glennie, R.E. .	Superintending Engineer, class III, *officiating*.	Executive Engineer, 1st grade.	Reversion . .	

This modifies G. G. O. Nos. 502 and 932 of 1895, so far as the promotions and reversions of Colonel Shone and Major Glennie, Royal Engineers, are concerned.

P. J. MAITLAND, *Major-General*,
Secretary to the Government of India.

MILITARY DEPARTMENT.

NOTIFICATION.

Simla, the 26th June, 1896.

Under clause 53 of the Regulations appended to the Regimental Debts Act of 1893, it is notified that reports of the deaths of the undermentioned commissioned officers, on the dates specified, were received in the Military Department between the 20th and the 26th June 1896:

Corps.	Rank and Names.	Date of decease.	Place of decease.	Testate or Intestate.	Remarks.
Royal Engineers . .	Major-General Sir J. Browne, K.C.S.I., C.B.	13th June 1896 .	Quetta.		
5th (Royal Irish) Lancers	Lieutenant C. H. Haworth .	6th June 1896 .	Poona.		

P. J. MAITLAND, *Major-General,*
Secretary to the Government of India.

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

Simla, the 20th June, 1896.

No. 278.—Mr. J. Godfrey, Deputy Examiner of Accounts, attached to the Eastern Bengal State Railway, is appointed to officiate as Examiner of Accounts of that railway in Class IV of Examiners (new classification) during the absence of Mr. H. Stuart on privilege leave.

No. 279.—With reference to Public Works Department Notification No. 134, dated 9th March 1896, Mr. G. A. Campbell, Executive Engineer, 1st Grade, State Railways, will hold the rank of Superintendent of Works, while officiating as Engineer-in-Chief, Rae Bareli-Benares Railway.

No. 280.—In exercise of the powers conferred by section 146 of the Indian Railways Act, IX of 1890, the Governor General in Council is pleased to extend the provisions of Chapter VIII of that Act to the Tezpur-Balipara Steam Tramway.

The 22nd June, 1896.

No. 281.—Mr. R. N. Hodges, Executive Engineer, 1st Grade, State Railways, and Engineer-in-Chief, Ghaziabad-Moradabad Railway Survey, is granted furlough for nine months, under Article 371 of the Civil Service Regulations, with effect from the 8th July 1896, or such subsequent date as he is permitted to avail himself of it.

The 24th June, 1896.

No. 283.—The following permanent promotions are made in the Superior Revenue Establishment of State Railways, Locomotive Department, with effect from the 1st April 1896:

Names.	From	To
Yates, L. E. H.	Class II, Grade 2	Class II, Grade 1.
White, C. F.	Class II, Grade 3	Class II, Grade 2.
Peyton, A.	Class III, Grade 1	Class II, Grade 4.
Schwabe, V. H.	Class III, Grade 4	Class III, Grade 3.

No. 284.—Mr. W. H. Robinson, Traffic Inspector, Eastern Bengal State Railway, is appointed to officiate as Assistant Traffic Superintendent on that Railway.

The 26th June, 1896.

No. 285.—Mr. C. E. Ross, Examiner of Accounts, is appointed to officiate as Examiner of Public Works Accounts, Assam, during the absence of Mr. E. A. Dennys, on privilege leave.

TELEGRAPH.

The 24th June, 1896.

No. 282.—The Governor General in Council is pleased to order the following temporary and officiating promotions in the Superior Establishment of the Indian Telegraph Department, with effect from the dates specified:

Names.	From	To	Date.
Mr. E. A. Kenyon . .	Assistant Superintendent, Class VI, 1st Grade.	Superintendent, Class V, 2nd Grade, temporary.	18th April 1896.
Mr. A. P. Hill . . .	Assistant Superintendent, Class VI, 1st Grade.	Superintendent, Class V, 2nd Grade, temporary.	2nd May 1896.
Mr. R. Elrington . . .	Assistant Superintendent, Class VI, 2nd Grade.	Superintendent, Class V, 2nd Grade, temporary.	25th April 1896.
Mr. R. Meredith . . .	Assistant Superintendent, Class VII, 1st Grade, and temporary Class VI, 2nd Grade.	Superintendent, Class V, 2nd Grade, officiating.	18th April 1896.
Mr. N. U. K. Leslie . .	Assistant Superintendent, Class VII, 1st Grade, and temporary Class VI, 2nd Grade.	Superintendent, Class V, 2nd Grade, officiating.	25th April 1896.

W. S. S. BISSET, *Colonel, R.E.,*
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, June 20th, 1896.

During the week under review the south-west monsoon has burst on both sides of India. The burst occurred at Colombo on Sunday, the 14th, and on the four succeeding days the current advanced up the West Coast, reaching Bombay on Thursday, the 18th, and Kathiawar and Gujarat on Friday and Saturday. The winds during this advance were exceedingly strong, so that, though good rain fell along the West Coast, the daily amounts of rain varying between 2 and 6 inches, the heaviest amounts were not received at the coast stations but along the sides of the Western Ghâts, where the rainfall was very heavy. On the opposite side of India monsoon rainfall was first received over Burma, where during the whole week moderate to heavy rain was received. On Tuesday, the 16th, the observations gave evidence of the beginnings of a depression at the head of the Bay. This depression gradually grew, and early on Friday morning the centre passed into the Presidency division of Bengal, and thence during the next twenty-four hours westward through West Bengal. The depression was followed by a strong burst of monsoon winds and by heavy rain over a large part of Bengal. The West Coast current has penetrated well into the central parts of India, and good rain has been received at all the central stations. The Bay current has not, however, given much rain to the Gangetic Plain, but in the early part of the week thunderstorms gave good showers to various parts of Upper India. The mean temperature of India was about 3° above the normal on Sunday, the 14th, but with the advent of the monsoon currents a fall set in and normal temperatures were recorded till the close of the week.

Daily Summary.—*Sunday, June 14th.*—Pressure was falling almost everywhere. Readings were highest in Tenasserim and lowest in the Punjab, but all over the west of the Peninsula pressure was uniform and rather low. The barometer was slightly to largely above the normal average over Northern and Central India and slightly to considerably below over the Peninsula and Ceylon. A strong westerly wind had appeared at Colombo, while light northerly winds prevailed on the West Coast, and moderate southerly winds over the Bay. The mean temperature was generally excessive. Light to moderate rain had been received in Burma, a large part of the Peninsula and of the central districts of the country, and the north-western districts of the North-Western Provinces. The most important feature in the weather was the setting in of the monsoon in West Ceylon.

Monday, June 15th.—Pressure had increased slightly to rapidly over part of the Punjab and decreased elsewhere. The fall was much greater over the northern and central parts of India than in the south, so that the uniform pressures over the Peninsula were disappearing, and gradients for westerly winds were developing. Readings were still highest in Tenasserim, but were lowest over Sind. The deficient pressures had extended northward and covered the greater part of India. The monsoon current was working up the coast and had reached

Karwar. Elsewhere the winds were not much changed. The mean temperature was excessive over the western desert, over the greater part of the Peninsula, and over Bengal and Bihar, and was in defect elsewhere—most so in the east of the Punjab. General fairly heavy rain had occurred over the West Coast districts and Burma, and showers, in many instances accompanying thunderstorms, had occurred over a large part of India.

Tuesday, June 16th.—Pressure had risen slightly or been nearly steady over the Peninsula and Ceylon, but had fallen more or less briskly elsewhere. Readings were highest in Malabar and Ceylon and lowest in the western desert, and steepish gradients were developing over the Peninsula and the Bay. Strong monsoon winds were blowing over the west of the Peninsula and the centre and south of the Bay, but in Northern India the winds were light, and calms were reported from Orissa. The mean temperature was low over Lower Burma, the south of the Peninsula, Gujarat, Rajputana, the North-Western Provinces, and the east of the Punjab, but was in excess in other parts of the country. The greatest abnormal deficiency was 11·8° at Agra, and the greatest abnormal excess 6·5° at Gaya. Moderate to heavy rain had again fallen over the West Coast districts and Burma, and thundershowers had occurred at several stations in the interior.

Wednesday, June 17th.—The barometer had generally changed slightly, except at the head of the Bay, where it had fallen briskly. A depression had formed over the north of the Bay, but in other respects the general conditions of pressure were unaltered. The barometer read below the normal average everywhere—most so on the Bombay Coast and over the east of the Bay. The winds were cyclonic over the north of the Bay and off the Bombay Coast, but were fairly normal elsewhere. The mean temperature was excessive over North-Eastern India, the east and south of the Peninsula, and the Punjab and Sind, but was in defect elsewhere. The variations from the normal were large, there having been a deficiency of 11° at Agra and of 8° at Rajkot, and an excess of 6·8° at Mooltan. Heavy rain had fallen over the West Coast districts and Burma, and moderate to light rain over the central parts of the country, Bengal, and the Gangetic Plain.

Thursday, June 18th.—Pressure had increased, except in Lower Sind and part of Kathiawar. Pressure was highest in Tenasserim, lowest in the western desert, and relatively low over Lower Bengal. The depression over the north of the Bay was advancing towards the coast. Gradients remained steep over the Peninsula and the Bay, and strong monsoon winds were blowing over those regions. On the Bengal Coast the directions were north-easterly. The mean temperature remained excessive over Bengal and Assam, the south of the Peninsula, and the extreme north-west of India. At Mooltan there was an abnormal excess of 10°, and at Agra a deficiency of 8°. The Bombay current had given moderate to heavy rain to the West Coast and to the central parts of the country, while the Bengal current had given moderate rain to Burma, Orissa, and South and East Bengal.

Friday, June 19th.—Pressure had fallen briskly over the Punjab and Northern Bombay and briskly to rapidly over Bengal. The depression from the north of the Bay had suddenly developed considerable intensity and lay near Calcutta,

where pressure was 0·35 inch below the normal. A small depression had also appeared over Kathiawar, where pressure was about 0·30 inch below the normal. The winds were cyclonic in the neighbourhoods of both disturbances, and a strong monsoon was blowing over the Peninsula and the Bay. The distribution of the mean temperature with respect to the normal was practically unchanged. Rain had fallen generally, but not very heavily, in the West Coast and central districts, while moderate to heavy rain had occurred over Burma, Orissa, Chota Nagpur, and South Bengal.

Saturday, June 20th.—Pressure had increased slightly to rapidly over part of Burma, Assam, and Bengal and had fallen elsewhere. The fall was greatest in Chota Nagpur and the east of the Central Provinces, and the centre of the depression from the Bay lay near Ranchi. The Kathiawar depression was practically unchanged. Readings were high in Tenasserim, Ceylon, and Malabar. The winds were strong and cyclonic in both depression areas, and a strong monsoon was blowing over the Peninsula and the Bay. The mean temperature was excessive over the Punjab, Rajputana, Sind, and along the foot of the Himalayas, and was deficient elsewhere. Moderate to heavy general rain had fallen over Lower Burma, Bengal, Orissa, Bihar, Chota Nagpur, the central part of the country, the west of the Peninsula, and Northern Bombay.

Temperature.—The variations of temperature from the normal have been large. The rains have not extended into the extreme north-west of India and were not heavy over Assam, North Bengal, and the Northern Gangetic Plain. Hence in these regions the mean temperature has been excessive. In all other parts of the country there has been a fairly general defect, which, though generally moderate, has increased and become very considerable with the occurrence of the heavy rainfall which accompanied the two depressions.

The following table gives the variations of the mean temperature from the normal in the different provinces of India:

Province.	June 1896.							Mean variation of week.
	14th	15th	16th	17th	18th	19th	20th	
	°	°	°	°	°	°	°	°
Burma	+1·7	+0·1	+0·1	0	−0·4	−0·9	−1·1	−0·1
Bengal and Assam	+1·7	+2·1	+2·2	+1·5	+1·3	+0·4	−1·2	+1·1
North-Western Provinces and Oudh	+2·1	−2·2	−4·7	−6·5	−3·4	0	+1·2	−1·9
Punjab	+9·0	−0·7	−2·5	+1·3	+3·5	+5·3	+6·6	+3·2
Bombay	+2·7	+0·4	−0·2	+0·5	−1·6	−1·6	−1·3	−0·2
Central Provinces and Berar	+2·4	−0·5	+1·5	+0·4	−1·5	−4·5	−4·3	−0·9
Central India and Gujarat	+1·8	−1·7	−0·5	−3·0	+0·8	+0·9	+0·7	−0·1
Sind and Rajputana	+4·0	+0·4	−0·2	+1·6	+3·5	+4·6	+5·6	+2·8
Madras	+0·4	+0·3	−0·1	+0·6	−0·7	−3·2	−1·4	−0·6
Mean for whole of India	+2·9	−0·2	−0·5	−0·4	+0·2	+0·1	+0·5	+0·4

The above shows that the mean temperature of the whole country was excessive on the 14th, but thereafter it became about normal, and so remained until the close of the week. As mentioned above the rainfall did not extend

during the week into the extreme north-west and only partially into the extreme north-east. Hence the mean temperature of Bengal and Assam, of the Punjab and of Sind and Rajputana was excessive for the week.

The following were the highest temperatures recorded throughout India on each day:

June 14th	. . . . .	118·4°	at Khushab.
„ 15th	. . . . .	116·4°	„ Montgomery.
„ 16th	. . . . .	110·9°	„ Umballa.
„ 17th	. . . . .	111·8°	„ Jacobabad.
„ 18th	. . . . .	118·0°	„ „
„ 19th	. . . . .	117·1°	„ „
„ 20th	. . . . .	118·0°	„ „

Rain.—The week has been marked by a strong advance of monsoon winds and rain on both sides of India. The burst occurred at Colombo on Sunday, the 14th. Thence the rainfall advanced quickly up the West Coast and was established along the whole coast before the close of the week. The rainfall extended well inland and was heavy over the Deccan and the central parts of the country. On the opposite side the burst of heavy rain commenced in Tenasserim on Monday, the 15th, reached Lower Burma on the 16th, Arakan on the 18th, and Bengal on the 19th and 20th. Slight advances of humid winds occurred at different times up the Gangetic Plain, which gave showers to several stations—more particularly in the submontane regions of Upper India. The heaviest rainfall on the West Coast varied between 3 and 6 inches in the twenty-four hours and in the Bay area between 3 and 5 inches during twenty-four hours. In Upper India some heavy falls occurred during thunderstorms in the early part of the week, the largest amount reported being 3·79 inches, which fell at Roorkee during the twenty-four hours ending at 8 A.M. on the 14th. The concluding table gives the rainfall data. The first column shows that more or less rain fell in all the divisions of India, except the Punjab (South), Sind, and the East Coast (North (*a*)), but in the case of the Punjab (South-East and West) and Baluchistan the average actual rainfall of the week was less than one-tenth of an inch. Hence in these six divisions there was actually or practically no rain during the week, while in all the remaining divisions effective rain was received. The heaviest average actual fall was 21·06 inches in Tenasserim, followed by 19·93 inches in Coorg, by 13·12 inches in Arakan, by 12·98 inches in the Konkan, and by 11·79 inches in the Malabar Coast district. The second column shows that the normal rainfall of the week ranges from 13·69 inches in Arakan to about 0·05 inch in Sind and Baluchistan. This comparison shows that the heavy rainfall in the extreme south, *i.e.*, in Tenasserim and the south-west of the Peninsula was exceptional, but that otherwise the ordinary distribution of rainfall was maintained. The third column shows that in twenty-seven of the rainfall divisions the fall for the week was short of the normal, that in one it was exactly normal, and that in twenty-eight it was in excess. The region of deficient rainfall included Arakan, all the Bengal divisions, except Orissa and Chota Nagpur, all the North-Western Provinces divisions, except the central and hills, all the Punjab divisions, except the Central, Sind, Baluchistan, the East Coast (North (*a*)), Hyderabad (South), and the East Coast (Central). The division with exactly normal rainfall was the Submontane (West) division of the North-Western Provinces, and the region of excessive rainfall included, besides the exceptions noted above, most of the Burma divisions, all the west and south of the Peninsula divisions, and all the

central divisions, including Rajputana. The greatest excess was 13·70 inches in Coorg, followed by 12·29 inches in Tenasserim, by 6·89 inches in the Konkan, and by about 4 inches in Lower Burma, Orissa, and Malabar. The greatest deficiency was 6·99 inches in the hills division of Assam, followed by 5·27 inches in North Bengal, and 4·36 inches in the Bengal Hills. This large deficiency over the Assam and Bengal districts appears to have been largely due to the westerly movement of the cyclonic storm which passed through South and West Bengal on the 19th and 20th. This storm drew the monsoon current after it, so that, while excessive rain was received in Orissa and Chota Nagpur, the more eastern and northern divisions of Bengal and all the Assam divisions were outside the limits of the monsoon current, and received much less than their normal rainfall. The storm mentioned above subsequently passed through the eastern and central divisions of the Central Provinces, and helped to give the excessive rainfall which was reported from that region. This westerly direction of advance of the storm was also in part answerable for the deficient rainfall, which is shown over the Gangetic Plain and the Punjab.

The three concluding columns of the table give the state of the seasonal rainfall, *i.e.*, the actual and normal rainfall for the period May 31st to June 20th. Owing to the delay in the proper establishment of the monsoon over India the general rainfall of the whole period is in defect, but the heavy rainfall of the past week has swept away the deficiency in some regions, and in the case of Orissa, the hill division of the North-Western Provinces, Coorg, Mysore, the Bombay Deccan, Khandesh, Berar, the Central Provinces (East), Gujarat, Kathiawar, and Madras (South) there is an excess of rain. In Baluchistan also there is an excess. In the case of Tenasserim, Lower Burma, Deltaic Bengal, Central Bengal, Chota Nagpur, Oudh (North), the North-Western Provinces (Central and Submontane), the Malabar Coast, Madras (South-Central), the Konkan, the Central Provinces (West and Central), Madras (Central), and East Coast (Central and South) the rainfall of the period has been normal, *i.e.*, has differed by less than twenty per cent. from the average, while in all the remaining divisions it has been in defect.

The following are the principal totals recorded during the week:—Kyaikto (Thaton) 23·16 inches, Rathedaung (Akyab) 14·91 inches, Darjeeling 11·10 inches, Cuttack 10·88 inches, Vayitri (Malabar) 29·12 inches, Karkal (Mangalore) 18·44 inches, Devola (Nilgiris) 14·54 inches, Virajpett (Coorg) 22·67, inches Nagar (Shimoga) 21·73 inches, Thana 23·92 inches, Bovda (Kolhapur) 27·34 inches. At Cherra Poonjee the total fall for the week was only 0·94 inch, which shows how completely the humid currents from the Bay avoided the extreme north-east of India.

PROVINCE.	DIVISION.	Rainfall data for week ending June 30th, 1896.			Rainfall data from May 31st to June 30th, 1896.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *25th June 1896.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 20th June.*—Rainfall good in the Nilgiris and on the West Coast, moderate in the Circars and Coimbatore; light rain elsewhere. The water-supply is insufficient in parts of several districts. Preparations for sowing are proceeding generally. Pasture is scarce, but improving in parts, and fodder is sufficient. The condition of cattle is good. Prices are practically stationary, though some dry grains are slightly dearer in a few districts.

Bombay.—*For week ending 24th June.*—Rain throughout the Presidency Proper; heavy in the Konkan, good or moderate elsewhere, except in Bijapur where the fall was slight. Slight rain also in two districts of Sind. More rain is required for sowing in Sholapur and Thar and Parkar, and urgently in Bijapur. Preparations for the monsoon cultivation are progressing in nine districts. Sowing of the early crops continues in eighteen districts, but is retarded in parts of Satara owing to excessive rain. Fodder is insufficient in three, and water in two, districts. Agricultural stock are in good condition, except in parts of three districts. Prices are normal, except in one taluka of Sholapur.

Bengal.—*For week ending 22nd June.*—Ordinary monsoon weather prevailed with more or less rain in all parts of the province during the week. Agricultural operations are in progress, but in parts of Bihar more rain is required. Prospects of sugarcane, jute and the autumn rice are favourable. Sowing of winter rice and of the autumn crops in Bihar is going on, and in some districts transplantation has begun. In Bihar millets are being harvested. There is no longer any scarcity of water, except in a few places in the 24-Parganas and Patna. The price of common rice continues steady.

North-Western Provinces and Oudh.—*For week ending 24th June.*—Rain has been general and heavy in a few places, but in the majority of districts the fall has been light, and more rain is needed to forward the ploughings and sowings for the autumn crops. The standing crops are flourishing. Shocks of earthquake are reported at Cawnpore, Banda, Hamirpur and Rae Bareli. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, June 20th, were—Banda 61,718, Hamirpur 8,108, Jhansi 8,348, Jalaun 7,055, Allahabad 9,316, Pilibhit 1,181, Garhwal 766, Almora 292, Hardoi 4,274—total 1,01,058; of this number 14,120 dependants were gratuitously relieved on the works, and 7,249 persons received gratuitous relief under other provisions of the Famine Code. The numbers employed on village works were—Banda 1,129, Hamirpur 3,248, Jhansi 3,218, and Jalaun 3,926. Supplies are sufficient, except in the Kheri district. Fodder is still scarce in some districts and is becoming dearer. Prices continue high, but are generally stationary.

Punjab.—*For week ending 24th June.*—Rain has fallen in parts of Sialkot, Rawalpindi and Gurgaon. Harvesting of the spring crops is nearly over.

Ploughings for and sowings of the autumn crops continue. The cotton and sugarcane crops are being watered from wells in some districts. Rice sowings are in progress on canal irrigated lands in Gujranwalla. Rain is badly wanted for the autumn sowings in most districts. The condition of the standing extra spring crops is generally reported good to average; but the sugarcane crop is suffering from drought in Umballa. Prospects of the autumn crops are said to be unfavourable in Rawalpindi owing to drought. Cotton and *jowar* (*Sorghum vulgare*) are coming up well on irrigated lands in Gurgaon. The stock of food-grains is sufficient in all districts, except Peshawar and parts of Lahore. Cattle are in poor condition in Umballa, Rohtak, Gujranwalla and parts of Lahore for want of fodder; they are dying of starvation in Hissar. Fodder is scarce in all districts, except Jullundur, Ferozepore, Amritsar, Sialkot, Mooltan, Dera Ismail Khan and Peshawar. Prices are rising in Peshawar and are high elsewhere. The number of persons employed on relief works in the Sharakpur tahsil of the Lahore district is 6,218, and that of non-working children and dependants on relief works is 1,564.

Central Provinces.—*For week ending 24th June.*—The weather is cloudy with generally good rain. The falls were heavy in Nagpur and Sambalpur. Sowings of rice are in progress, though excess of rain has somewhat retarded sowing operations in Chanda. Sowing of cotton has commenced in Wardha. Scarcity of water is diminishing, but fodder is still insufficient in places. Prices are almost stationary.

Burma.—*For week ending 20th June.*—Good to fair rain has fallen during the week in all districts of the dry zone, except Thayetmyo and Yamethin. In Lower Burma ploughing is progressing in all districts, except Tongwa and Prome. Sowing has now commenced in Tavoy and parts of Bassein and Myaungmya. In Upper Burma reaping of dry-weather paddy still continues in Mandalay, Minbu and Yamethin. The cultivation of wet-weather paddy, early sessamum, *jowar* (*Sorghum vulgare*) and other wet-weather crops is progressing favourably. The condition of the standing crops is generally good, but early sessamum in the Pagan sub-division of Myingyan has been slightly damaged by heavy rain. More rain is required for paddy in parts of Shwebo, and rain is also urgently needed in Thayetmyo. The price of paddy has increased slightly in Myaungmya and decreased slightly in Rangoon and Prome; elsewhere prices are stationary.

Assam.—*For week ending 23rd June.*—The weather is hot. Rain is wanted in Nowgong. Prospects of tea and the standing crops elsewhere are fair. Ploughing for late rice is progressing. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 24th June.*—MYSORE.—Rainfall good in parts. The standing crops are in good condition. Paddy has been sown in parts of the State and harvested in parts of Bangalore and Tumkur. Prices have fallen in Bangalore and Kadur, but have risen in Shimoga.

COORG.—Rainfall very heavy. Ploughing of rice-fields continues. Sowing of *ragi* (*Eleusine coracana*) has been completed. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 24th June.*—BERAR.—The weather is hot and cloudy with plentiful rainfall during the week. Land is being

prepared for the autumn crops. Cotton sowings are in progress throughout the province. Fodder and water are still insufficient in some places. Prices are almost stationary.

HYDERABAD.—Rainfall good. Fields are under preparation for the autumn crops. Prices are normal.

Central India.—*For week ending 24th June.*—Rainfall general. Agricultural operations are in progress in all Agencies. Cattle are in indifferent condition in Baghelkhand and Goona. Pasturage is good in Bhopal, and fair in Bhundelkhand, Malwa and Bhopawar, but indifferent elsewhere. Prices are above normal in Baghelkhand, Malwa, Goona and in some districts of Gwalior; elsewhere prices are normal. The numbers employed on relief works in Gwalior are 12,587; in Bundelkhand 7,953; and on gratuitous relief in Gwalior 1,070 and in Bundelkhand 1,117. The figures for the Baghelkhand Agency have not been reported.

Rajputana.—*For week ending 24th June.*—Rainfall over 6 inches at Abu, 4 inches in Jhallawar, above 2 inches in Bhurtpore and Kishengarh, above 1 inch in Ajmere-Merwara and in six States; slight rain elsewhere, except in Bikanir and Jaisalmere. Agricultural operations have generally commenced, or are in progress, except in Jaisalmere. The crops are very poor in Jaisalmere. Agricultural stock generally are in good condition, but are suffering in Ulwar and dying in parts of Jaisalmere for want of fodder and water. Pasturage and fodder are insufficient in seven States. Fodder is becoming scarce in Ajmere-Merwara and is failing in Dholepore and Bhurtpore; elsewhere it is sufficient. Prices are rising in three States and fluctuating in one, but are steady elsewhere. The numbers employed on relief works were—Marwar 4,819, Shahpura 315, Merwara 1,460, Ulwar 612, Bikanir 2,562, Jaisalmere 616, Shahpura (for the previous week) 228. The numbers on gratuitous relief were—Marwar 477, Shahpura 21, Bikanir 417, Jaisalmere 43, Shahpura (previous week) 45.

Kashmir.—KASHMIR VALLEY.—*For week ending 23rd June.*—The weather is fine. Sowings of rice are almost finished. The spring crops are being harvested. Water is ample for irrigation. Prices are normal.

JAMMU PROVINCE.—*For week ending 24th June.*—Rainfall slight. Sowings of the autumn crops continue. Cattle are in good condition. Prices are stationary.

Nepal.—*For week ending 20th June.*—Heavy showers have fallen daily. Prospects are good.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

(*a*) Includes the Bhopal-Itarsi railway.
(*b*) Includes the Godhra-Rutlam-Nagda railway.
(*c*) Includes the Guntakal-Mysore frontier section.
(*d*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*e*) Includes the Jumma and Kashmir and the Hyderabad-Shadipalli railways.
(*f*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*g*) Includes the Wardha Coal, the Dhond-Manmad, the Khamgaon, and the Amráoti railways.
(*h*) Total earnings from 1st May to 15th June 1895.
(*i*) Includes the Mysore-Nanjangud and the Yesvantpur-Mysore frontier sections.
(*j*) This line is being worked by the Bombay, Baroda and Central India Railway Company as a temporary measure.

G. A. ANDERSON,
Offg. Under Secretary.

SIMLA, *the 25th June, 1896.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ACCOUNT.
RAILWAY.

EAST INDIAN RAILWAY.

Synopsis of transactions for, and to end of, the 1895.

No. 324-A. R., dated Simla, the 18th June, 1896.

RESOLUTION—By the Government of India, Public Works Department.

Read the following:

Note by A. R. BECHER, Esq., Officiating Accountant General, Public Works Department, on the synopsis of transactions of the East Indian Railway for the year 1895.

In continuation of my note No. 357-R. of 17th May 1895, I beg to submit, for the information of the Government of India, a synopsis of the transactions of the East Indian Railway from the date of its purchase by the State (1st January 1880) to the close of the year 1895.

2. The Capital expenditure of the East Indian Railway may be thus stated.

Under the Purchase Act, 42 and 43 Vict., Cap. CCVI, the Capital Stock of the Company was taken over by Government at a commuted value of £125 for every £100 of Capital Stock:

	£
The share capital of the Company, amounting to £26,200,000, was accordingly stated at	32,750,000
Under the same Act the debentures and debenture stock were taken over by Government, and amounted to	4,450,000
TOTAL ...	37,200,000

	Rs.	Rs.
The Company had at 31st December 1879 overdrawn from Government on Capital Account ...		26,45,269
The Cost of the land taken up for the Railway and paid for by Government had been		59,26,183

and the further outlay to close of the year 1895 from grants by Government from borrowed moneys has been:

	Rs.	Rs.
On Construction Account	4,35,60,278	
„ Stores Suspense Account	78,10,911	
„ Capital Advance Account	—9,04,423	
		5,04,66,766
		5,90,38,218

Deduct—Assets on the 31st December 1879, received by Government on purchase of the line, and made over to the Company—

	Rs.	Rs.
Stores in stock ...	76,65,340	
Balance of cash and other Suspense accounts ...	8,22,167	
	84,87,507	
Realization by the sale of surplus and obsolete stores originally valued at Rs. 16,06,079 not taken over by the undertaking, and other miscellaneous receipts	6,30,652	
		91,18,159
making the Capital outlay at close of 1895	Rs.	4,99,20,059 + £37,200,000

	Rs.
3. During the year the gross traffic earnings were ...	5,41,50,856
the working expenses	1,59,34,108
and the net earnings	3,82,16,748

4. These results of working the East Indian Railway affected the finances of the Government of India in the manner and to the extent exhibited in the following paragraphs.

5. The liabilities which the Government of India incurred in connection with the purchase of the East Indian Railway, so far as they are still outstanding, are as follows:

Sterling liabilities—	Capital.	Interest.
	£	£
(*a*) Debenture stock ...	1,500,000	67,500
(*b*) Annuities, terminable in 1953	26,200,000	1,179,000 (inclusive of payment for redemption of Capital).
(*c*) Deferred annuities	6,550,000	262,000
		1,508,500
Less—Annual payment for redemption of Capital ...		65,500
Net sterling annual liability ...		1,443,000 which

at 13·305*d.* per rupee = Rs. 2,60,29,312.

6. The liabilities incurred by Government since the purchase of the line have been—

	Rs.
Debentures discharged	3,54,66,835
Construction Account	4,35,60,278
Stores Suspense Account	78,10,911
Capital Advance Account	—9,04,423
Land charges by the State	59,26,183
Add—	
Capital overdrawn at date of purchase	26,45,269
	9,45,05,053
Less—Credits to Government for value of stores, &c., made over to the Company	91,18,159
TOTAL ...	8,53,86,894

The corresponding figure at the 31st December 1894 was Rs. 7,96,05,227, so that the average for the year may be taken at Rs. 8,24,96,060.

7. The following, therefore, seems to be a fair account of the transactions of the Railway, as they affect Government, for 1895:

	Rs.	
Traffic earnings	5,41,50,856	
Less—Working expenses	1,59,34,108	
Net earnings		3,82,16,748
Sterling liabilities, £1,443,000 at 13·305*d.* per rupee	2,60,29,312	
Interest on Rupee liabilities, Rs. 8,24,96,060 at 4 per cent. ...	32,99,842	
Payment of surplus profits to the Company	14,29,078	
Payment to the Company's Provident Fund	3,82,022	
Total payments		3,11,40,254
Net profit to Government		70,76,494

The corresponding net profit was—

	Rs.
in 1894	56,27,445
„ 1893	85,22,279
„ 1892	73,98,751
„ 1891	1,02,36,236
„ 1890	71,13,115

8. The Capital outlay on the undertaking may be taken as under—

	£	Rs.
Sterling (*vide* paragraph 2)	37,200,000	
Converted into Indian currency at the average rate of 19·961*d.* per rupee at time of purchase		44,72,72,180
Rupee debt	Rs. 8,53,86,894	
Less—Rupee value of debentures discharged	„ *3,54,66,835*	
		4,99,20,059
TOTAL ...		49,71,92,239
The interest at 1 per cent. on this Capital would be ...		49,71,922

It follows from this, that—

(i) the net earnings of the Railway are $\frac{38217}{49719}$, or 7·69 per cent. on the Capital invested by the Government in it;

(ii) the burden which Government bears in respect of it is $\frac{31149}{49719}$, or 6·26 per cent.;

(iii) the clear profit to Government is 1·43 per cent.

ORDER.—Ordered, that a copy of the note and accompaniment now read, be forwarded to the Consulting Engineer to the Government of India for Railways, Calcutta, and to the Department of Finance, for information.

W. S. S. BISSET, *Colonel, R.E.,*
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 25th June, 1896.

NOTIFICATIONS.

No. 1662 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 20th June 1896, under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 201 of 1896.—Moncrieff Lemaitre, permanent-way inspector, at present residing at Delhi, for an invention to be called "Lemaitre's patent combined railway carriage key and ticket nipper with pincers."

No. 202 of 1896.—Munshi Lal, municipal sub-overseer, Pilibhit, North-Western Provinces, for flour-grinding mills.

No. 203 of 1896.—John Malcolm Macdonald, engineer, of 2, Victoria Mansions, Westminster, London, for an improved apparatus for decorticating fibrous plants.

No. 204 of 1896.—Andrew Worthington Billing, chemist, formerly of 30, Moorgate Street, now of 21, Regent Street, London, for improvements in the manufacture of beer.

No. 205 of 1896.—Messrs. Schnek and Khonberger, of 1, Schottenring 23, Vienna, in the Empire of Austria, for improvements in or relating to the manufacture of stays or corsets.

No. 206 of 1896.—William Herbert Hyatt fellow of the chemical society of Great Britain, chemical engineer and metallurgist, of No. 1 Milton Road, Herne Hill, in the county of Surrey, England, for a method for extracting gold without the use of water by means of a combined air blast and mercury and apparatus for effecting same.

No. 207 of 1896.—Arthur James Hefferan locomotive superintendent, Calcutta Tramway Co., 97, Circular Garden Reach Road, Kidderpore, for a method of working trollies or other vehicles by hand power.

No. 1663 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of Act V of 1888, in the office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Government of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the office of the Secretary appointed under the Inventions and Designs Act, 1888, in the

Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying :—

No. 208 of 1895.—The Central Cyclone Company, Limited, of 9 and 11, Fenchurch Avenue, London, for improvements in and relating to machines for grinding, crushing or disintegrating grain or other materials. (Specification filed 15th June 1896.)

No. 244 of 1895.—Angus Campbell, engineer, of Pittsburgh, and Thomas Rhys Morris, merchant, of Allegheny, both in Allegheny county, Pennsylvania, for improvements in cotton-picking machines. (Specification filed 28th May 1896.)

No. 253 of 1895.—Samuel John Moore, manufacturer, of 1429, King Street West, in the city of Toronto, province of Ontario, Canada, for improvements in numbering machines. (Specification filed 28th May 1896.)

No. 317 of 1895.—Charles Hutchinson Thompson, gentleman, of 39, West 27th Street, New York city, in the county and state of New York, United States of America, for improvements in vapour burners or plumbers' torches. (Specification filed 30th May 1896.)

No. 328 of 1895.—Frank Wright, gas engineer, of No. 21, Old Queen Street, Westminster, in the county of London, for improvements in coin freed meter apparatus. (Specification filed 30th April 1896.)

No. 1664 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 34 of 1889.—George Ashworth and Elijah Ashworth, engineers, of the firm of Ashworth Brothers of the Moss Brook works, Collyhurst, Manchester, in the county of Lancaster, England, for improvements in the method of and in means for attaching the clothing to carding engine flats. (From 27th June 1896 to 26th June 1897.)

No. 69 of 1889.—Samuel Cleland Davidson, merchant, of Sirocco works, Belfast, Ireland, for improvements in stoves or air-heating apparatus. (From 25th July 1896 to 24th July 1897.)

No. 306 of 1890.—Samuel Davis Keene, engineer, of 27, Somerset Street, Providence, in the state of Rhode Island, United States of America, for improved method or process of and apparatus for bleaching, dyeing or otherwise treating fibrous materials. (From 15th September 1896 to 14th September 1897.)

No. 24 of 1891.—Samuel Cleland Davidson, merchant of Sirocco works, Belfast, Ireland, for improvements in stoves or air-heating apparatus. (From 15th July 1896 to 14th July 1897.)

No. 42 of 1892.—George Thomas Beilby, chemical engineer, of St. Kitts, Slateford, in the county of Midlothian North, Britain, for a process and apparatus for the manufacture of cyanides. (From 23rd June 1896 to 22nd June 1897.)

No. 166½ P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased :—

No. 181 of 1891.—Messrs. Stephen Wilcock and Samuel Davison's invention for improvements in chiming clock or carillon mechanism. (Specification filed 15th March 1892.)

No. 255 of 1891.—Mr. Charles James Rivett-Carnac's invention for an improvement in wooden golf club heads. (Specification filed 19th March 1892.)

No. 270 of 1891.—Messrs. Alexander Burns and Franz Neubert's invention for process for producing sparkling wines and in the apparatus therefor. (Specification filed 18th March 1892.)

No. 281 of 1891.—Daniel Martin Lamb's invention for electric batteries. (Specification filed 18th March 1892.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of ₹50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,

Offg. Secy. under the Inventions and Designs Act, 1888.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows :—

1-pound tin, R18, or, post free, R18-12.

½ „ R 9, „ R9-8.

¼ „ R4-8, „ R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮৲ বা ডাকমাশুল বিনা ১৮৲০

½ আধ „ „ ৯৲ „ ৯৲০

¼ সিকি „ „ ৪৲৮ „ ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার পরীক্ষা দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্ট কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের বোটানিক বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876 :—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage.	With postage.
	R a. p.	R a. p.
For the Calcutta Series	10 0 0	12 8 0
,, each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
,, a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
,, a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit :—

	For town.	For mofussil.
	R a. p.	R a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 3
,, each of the Madras, Bombay, and Allahabad Series; per copy . . .	0 5 3	0 5 9
,, the Calcutta Series. *For the year* .	7 2 6	8 6 3
,, each of the Madras, Bombay, and Allahabad Series. *For the year* . .	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance :—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	R 20	R 14	R 9
,, three issues . . .	,, 55	,, 36	,, 24
,, six ,, . . .	,, 100	,, 68	,, 45
,, nine ,, . . .	,, 145	,, 96	,, 64
,, twelve ,, . . .	,, 180	,, 120	,, 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates :—

	Without postage.	With postage.
	R a. p.	R a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies, R2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

SUPPLEMENT TO

The Gazette of India.

No. 26.] CALCUTTA, SATURDAY, JUNE 27, 1896.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*
